 Michael Toland, Associate Professor, Ph.D., Nebraska-Lincoln, 2008
 Kenneth M. Tyler, Professor, Ph.D., Howard, 2002
 Ellen Usher, Associate Professor, Ph.D., Emory, 2007
 Judith Worell, Professor Emeritus, Ph.D., Ohio State, 1954
 Lynda Brown Wright, Professor Emeritus, Ph.D., Texas A&M, 1991

EDUCATIONAL LEADERSHIP STUDIES

John Nash, Chair

Justin Bathon, Associate Professor, Ph.D., Indiana-Bloomington, 2008
 Lars G. Björk, Professor, Ph.D., New Mexico, 1983
 Patricia Browne-Ferrigno, Professor, Ph.D., Colorado at Denver, 2001
 Carmen Coleman, Clinical Associate Professor, Ph.D., Kentucky, 2009
 Fred Edmonds, Professor Emeritus, Ed.D., Kentucky, 1961
 Charles F. Faber, Professor Emeritus, Ph.D., Chicago, 1961
 J. John Harris III, Professor Emeritus, Ph.D., Michigan, 1972
 Wayne Lewis, Associate Professor, Ph.D., North Carolina State, 2009
 John Nash, Associate Professor, Ph.D., Wisconsin-Madison, 1992
 Mary John O'Hair, Professor, Ed.D., New Mexico State, 1987
 Amanda Potterton, Assistant Professor, Ph.D., Arizona State, 2017
 Jayson Richardson, Associate Professor, Ph.D., Minnesota, 2007
 Beth Rous, Professor, Ed.D., Professor, University of Kentucky, 2001
 Eddy J. Van Meter, Professor Emeritus, Ed.D., New Mexico State, 1971
 Gene Wilhoit, Clinical Assistant Professor, MAT, Indiana, 1971
 Lu Young, Clinical Associate Professor, Ed.D., Northern Kentucky, 2013

EDUCATIONAL POLICY STUDIES AND EVALUATION

Beth Goldstein, Chair

Richard Angelo, Associate Professor Emeritus, Ed.D., Temple, 1978
 Jeffery P. Bieber, Associate Professor, Ph.D., Michigan, 1990
 Kelly Bradley, Professor, Ph.D., Ohio State, 2002
 Clinton Collins, Associate Professor Emeritus, Ph.D., Indiana, 1970
 Alan J. DeYoung, Professor Emeritus, Ph.D., Stanford, 1975
 Joseph Ferrare, Assistant Professor, Ph.D., Wisconsin, 2011
 Beth Goldstein, Associate Professor, Ph.D., Wisconsin, 1985
 Jane Jensen, Associate Professor, Ph.D., Indiana, 1997
 Willis Jones, Associate Professor, Ph.D., Vanderbilt, 2011
 Edward Kifer, Professor Emeritus, Ph.D., Chicago, 1973
 Jungmin Lee, Assistant Professor, Ph.D., Tennessee, 2014
 Kiluba Nkulu, Clinical Assistant Professor, Ph.D., Kentucky, 2001
 Virginia Davis Nordin, Associate Professor Emeritus, J.D., Harvard, 1959
 Shannon Sampson, Clinical Assistant Professor, Ph.D., Kentucky, 2005
 John Thelin, Professor, Ph.D., California at Berkeley, 1973
 Richard Waddington, Assistant Professor, Ph.D., Michigan, 2012

KINESIOLOGY AND HEALTH PROMOTION

Benjamin Johnson, Chair

Mark Abel, Associate Professor, Ph.D., Utah, 2006
 Rayma Beal, Associate Professor Emeritus, Ed.D., Cincinnati, 1985
 Aaron Beighle, Professor, Ph.D., Arizona State, 2003
 Stephanie Bennett, Assistant Professor, Ph.D., Middle Tennessee State, 2006
 Haley Bergstrom, Assistant Professor, Ph.D., Nebraska, 2014
 Lance Bollinger, Assistant Professor, Ph.D., East Carolina, 2013
 T. Jeff Chandler, Adjunct Professor, Ed.D., Auburn, 1987
 Jody L. Clasey, Professor, Ph.D., Illinois, 1993
 Marc Cormier, Assistant Professor, Ph.D., West Virginia, 2014
 Randall Crist, Assistant Professor, Ed.D., Kentucky, 1994
 Heather Erwin, Associate Professor, Ph.D., Illinois, 2006
 Elizabeth Fettrow-Whitney, Assistant Professor, Ph.D., Ohio, 2013
 Brad Fleenor, Assistant Professor, Ph.D., Missouri-Columbia, 2008
 Fan Gao, Associate Professor, Ph.D., Pennsylvania State, 2005
 John Hall, Associate Professor Emeritus, Ph.D., Oregon, 1975
 Melinda Ickes, Assistant Professor, Ph.D., Cincinnati, 2010
 Benjamin Johnson, Professor, Ph.D., Kentucky, 1985
 Carol Mushett Johnson, Clinical Assistant Professor, M.Ed., Georgia, 1979
 Stanley Labanowich, Associate Professor Emeritus, Ph.D., Illinois, 1975
 Kathryn Lanphere, Assistant Professor, Ph.D., New Mexico, 2013
 Kristen Mark, Associate Professor, Ph.D., Indiana, 2012
 James Nance, Associate Professor Emeritus, Ed.S., Eastern Kentucky, 1977
 Melody Noland, Professor, Ph.D., Maryland, 1981
 Steve Parker, Associate Professor, Ed.D., Kentucky, 1995
 Bruce A. Rector, Adjunct Professor, J.D., Kentucky, 1990
 Richard Riggs, Associate Professor Emeritus, Ed.D., Tennessee, 1975
 Robert Shapiro, Professor, Ph.D., Illinois-Urbana, 1979
 Lucian Taylor, Associate Professor, Ph.D., Mississippi, 1995
 Dennis Vinton, Associate Professor Emeritus, Re.D., Indiana, 1969
 Andrew Weiner, Associate Professor Emeritus, Ed.D., Georgia, 1976
 James W. Yates, Associate Professor Emeritus, Ph.D., Penn State, 1980

STEM: SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS

Jennifer Wilhelm, Chair

Lisa Amick, Clinical Assistant Professor, Ed.D., Illinois, 2014
Brett Criswell, Clinical Assistant Professor, Ph.D., Pennsylvania, 2009
Molly Fisher, Associate Professor, Ph.D., North Carolina-Charlotte, 2009
Cindy Jong, Associate Professor, Ph.D., Boston College, 2009
Rebecca McNall Krall, Associate Professor, Ph.D., Virginia, 2003
Margaret Schroeder, Associate Professor, Ph.D., Texas A&M, 2006
Jonathan Thomas, Associate Professor, Ed.D., Cincinnati, 2010
Jennifer Wilhelm, Professor, Ph.D., Texas-Austin, 2002

COLLEGE OF ENGINEERING

Lawrence E. Holloway, Interim Dean

F. JOSEPH HALCOMB III, M.D. DEPARTMENT OF BIOMEDICAL ENGINEERING

Guigen Zhang, Chair

Kimberly Ward Anderson,* Professor, Ph.D., Carnegie-Mellon, 1986
Babak Bazrgari, Assistant Professor, Ph.D., Ecole Polytechnique, Montreal, 2008
Eugene Bruce, Professor Emeritus, Ph.D., Southern California, 1973
Peter Hardy,* Assistant Clinical Professor, Ph.D., Toronto, 1991
Thomas P. Hedman, Adjunct Associate Professor, Ph.D., University of Strathclyde, Scotland, 1996
Charles F. Knapp, Professor Emeritus, Ph.D., Notre Dame, 1968
Stephen Lai-Fook, Professor Emeritus, Ph.D., Washington, 1972
Lu Yuan Lee,* Professor, Ph.D., Mississippi, 1975
Ai-Ling Lin,* Assistant Professor, Ph.D., University of Texas Health Science Center, 2006
Abhijit Patwardhan, Professor, Ph.D., Kentucky, 1992
David Pienkowski, Associate Professor, Ph.D., Pennsylvania, 1982
David Powell,* Assistant Professor, Ph.D., Kentucky, 2002
David Puleo, Professor, Ph.D., Rensselaer Polytechnic, 1991
David Randall,* Professor, Ph.D., Washington, 1972
Keith Rouch,* Professor, Ph.D., Marquette, 1978
Sibu P. Saha,* Professor, M.D., MBA, University of Rajshahi, 1966
Hainsworth Shin, Adjunct Assistant Professor, Ph.D., Rensselaer Polytechnic, 2003
Betty F. Siskin, Research Professor Emeritus, Ph.D., Kentucky, 1973
Charles Smith,* Assistant Professor, M.D., Tulane, 1979
Sridhar Sunderam, Associate Professor, Ph.D., Kansas, 1999
Margaret M. Szabunio,* Professor, M.D., Hahnemann Medical College, 1984
Janet Walker,* Associate Professor, M.D., South Florida, 1981
Guoqiang Yu, Professor, Ph.D., Tianjin, China, 1999
Guigen Zhang, Professor, Ph.D., Clemson University, 1994
Joseph Zwischenberger,* Professor, M.D., Kentucky, 1977

*Joint Appointment

CHEMICAL AND MATERIALS ENGINEERING

Douglass S. Kalika, Chair

Kimberly Ward Anderson, Professor, Ph.D., Carnegie-Mellon, 1986
Rodney J. Andrews, Professor, Ph.D., Kentucky, 1999
Thomas John Balk II, Professor, Ph.D., Johns Hopkins, 2000
Matthew Beck, Associate Professor, Ph.D., Northwestern, 2005
Bradley J. Berron, Associate Professor, Ph.D., Vanderbilt, 2008
Dibakar Bhattacharyya, Professor, Ph.D., Illinois Institute of Technology, 1966
Yang-Tse Cheng, Professor, Ph.D., California Institute of Technology, 1987
Thomas Cochell, Lecturer, Ph.D., Texas at Austin, 2013
Thomas D. Dziubla, Professor, Ph.D., Drexel, 2002
Nesreen A. Elsayed, Lecturer, Ph.D., Texas A & M University, 2014
Derek L. Englert, Assistant Professor STS, Ph.D., Texas A&M, 2009
Isabel C. Escobar, Professor, Ph.D., University of Central Florida, 2000
Eric A. Grulke, Professor, Ph.D., Ohio State, 1975
J. Zachary Hilt, Professor, Ph.D., Texas at Austin, 2004
Hyun-Tae Hwang, Assistant Professor STS, Ph.D., University of Southern California, 2009
Douglass S. Kalika, Professor, Ph.D., California-Berkeley, 1988
Richard I. Kermode, Professor Emeritus, Ph.D., Northwestern, 1962
Barbara Knutson, Professor, Ph.D., Georgia Institute of Technology, 1994
James Landon, Adjunct Assistant Professor, Ph.D., Carnegie Mellon, 2011
Jennifer Lovely, Lecturer, Ph.D., Kansas State University, 2016
Kenji Okazaki, Professor Emeritus, Dr. Eng. Sci., Kyoto University, 1967

Daniel W. Pack, Professor, Ph.D., California Institute of Technology, 1997
Jonathan T. Pham, Assistant Professor, Ph.D., University of Massachusetts, 2015
Stephen E. Rankin, Professor, Ph.D., Minnesota, 1998
Phillip J. Reucroft, Professor Emeritus, Ph.D., Imperial College, England, 1959
J. Thomas Schrodt, Professor Emeritus, Ph.D., Louisville, 1966
Jeffrey R. Seay, Associate Professor STS, Ph.D., Auburn, 2008
David L. Silverstein, Professor STS, Ph.D., Vanderbilt, 1998
Jim L. Smart, Associate Professor STS Emeritus, Ph.D., Texas at Austin, 1997
Terry W. Strange, Voluntary Lecturer, M.S., Kentucky, 1974
Tate T. H. Tsang, Professor, Ph.D., Texas at Austin, 1980
Matthew C. Weisenberger, Adjunct Assistant Professor, Ph.D., Kentucky, 2007
Sarah A. Wilson, Lecturer, Ph.D., University of Massachusetts, 2015
Fuqian Yang, Professor, Ph.D., Rochester, 1994
Tongguang Zhai, Associate Professor, Ph.D., Oxford, England, 1994

CIVIL ENGINEERING

Reginald R. Souleyrette, Chair

Whitney Blackburn-Lynch, Lecturer, Ph.D., Kentucky, 2015
George E. Blandford, Professor Emeritus, Ph.D., Cornell, 1981
Gail Brion, Professor, Ph.D., Colorado, 1995
L. Sebastian Bryson, Associate Professor, Ph.D., Northwestern, 2002
Richard Cheeks, Adjunct Assistant Professor, M.S., Kentucky, 1972; J.D., Kentucky, 2000
Mei Chen, Associate Professor, Ph.D., New Jersey Institute of Technology, 1999
Joseph Crabtree, Adjunct Assistant Professor, Ph.D., Kentucky, 2004
Gabriel B. Dadi, Assistant Professor, Ph.D., Kentucky, 2013
Brad Davis, Assistant Professor, Ph.D., Virginia Tech, 2008
John A. Deacon, Professor Emeritus, D.Engr., California-Berkeley, 1965
Vincent P. Drnevich, Professor Emeritus, Ph.D., Michigan, 1967
Gregory D. Erhardt, Assistant Professor, Ph.D., University College London, 2016
James Fox, Professor, Ph.D., Iowa, 2005
Hans Gesund, Professor, D.Engr., Yale, 1958
Ronnie Clark Graves, Adjunct Assistant Professor, Ph.D., Kentucky, 2012
Mariantonieta Gutierrez-Soto, Assistant Professor, Ph.D., Ohio State, 2017
Donn E. Hancher, Professor Emeritus, Ph.D., Purdue, 1972
Bobby O. Hardin, Professor Emeritus, Ph.D., Florida, 1961
Issam E. Harik, Professor, Ph.D., Wayne State, 1982
Yang H. Huang, Professor Emeritus, D.Sc., Virginia, 1966
Michael E. Kalinski, Professor, Ph.D., Texas-Austin, 1998
Adam J. Kirk, Adjunct Assistant Professor, Ph.D., Kentucky, 2014
Kamyar C. Mahboub, Professor, Ph.D., Texas A&M, 1988
William F. Maloney, Professor Emeritus, Ph.D., Michigan, 1976
Lindell E. Ormsbee, Professor, Ph.D., Purdue, 1983
Kelly G. Pennell, Associate Professor, Ph.D., Purdue, 2005
Kenneth L. Perry, Associate Professor Emeritus, M.S., Murray, 1975
Jerry G. Rose, Professor Emeritus, Ph.D., Texas A&M, 1971
Reginald R. Souleyrette, Professor, Ph.D., California-Berkeley, 1989
Nikiforos Stamatiadis, Professor, Ph.D., Michigan State, 1990
Timothy Taylor, Associate Professor, Ph.D., Texas A&M, 2009
Robert A. Walker, Associate Professor Emeritus, M.S., Eastern, 1978
Shien T. Wang, Professor Emeritus, Ph.D., Cornell, 1969
Yi-Tin Wang, Professor, Ph.D., Illinois Urbana-Champaign, 1984
Don J. Wood, Professor Emeritus, Ph.D., Carnegie Institute of Technology, 1961
Samantha Jones Wright, Lecturer, M.S., Kentucky, 1997
Scott Yost, Associate Professor, Ph.D., Michigan, 1995

COMPUTER SCIENCE

W. Brent Seales, Chair

Corey Baker, Assistant Professor, Ph.D., University of Florida, 2015
Anthony Q. Baxter, Associate Professor Emeritus, Ph.D., Virginia, 1973
Kenneth L. Calvert, Professor, Ph.D., Texas at Austin, 1991
Fuhua Cheng, Professor, Ph.D., Ohio State, 1982
Licong Cui, Assistant Professor, Ph.D., Case Western Reserve University, 2014
Zongming Fei, Professor, Ph.D., Georgia Institute of Technology, 2000
Raphael A. Finkel, Professor, Ph.D., Stanford, 1976
Judith A. Goldsmith, Professor, Ph.D., Wisconsin-Madison, 1988
James Griffioen, Professor, Ph.D., Purdue, 1991
Brent Harrison, Assistant Professor, Ph.D., North Carolina State, 2014
Jane E. Hayes, Professor, Ph.D., George Mason, 1999
Robert Heath,* Associate Professor, Ph.D., Auburn, 1973
Nathan Jacobs, Associate Professor, Ph.D., Washington, 2010
Jerzy W. Jaromczyk, Associate Professor, Ph.D., Warsaw, Poland, 1984
Kevin W. Joiner, Lecturer, M.S., Vanderbilt University, 1993

Venkata Kavuluru,* Assistant Professor, Ph.D., Kentucky, 2009
 Debby L. Keen, Lecturer, Ph.D., Kentucky, 1994
 Hana Khamfroush, Assistant Professor, Ph.D., University of Porto, Portugal, 2014
 Andrew M. Klapper, Professor, Ph.D., Brown, 1982
 K. Kubota,* Professor, Ph.D., Facultes des Sciences de Paris, France, 1969
 Jinze Liu, Associate Professor, Ph.D., North Carolina-Chapel Hill, 2006
 D. Manivannan, Associate Professor, Ph.D., Ohio State, 1997
 Victor Marek, Professor, Ph.D., Warsaw, Poland, 1968
 Neil Moore, Assistant Professor STS, Ph.D., Kentucky, 2012
 Yi Pike, Lecturer, Ph.D., Kentucky, 2011
 W. Brent Seales, Professor, Ph.D., Wisconsin, 1991
 Simone Silvestri, Assistant Professor, Ph.D., Sapienza University of Rome, 2010
 Mirosław Truszczyński, Professor, Ph.D., Warsaw University of Technology, 1980
 Grzegorz Wasilkowski, Professor, Ph.D., Warsaw, Poland, 1980
 Ruigang Yang, Professor, Ph.D., North Carolina-Chapel Hill, 2003
 Tingting Yu, Assistant Professor, Ph.D., Nebraska, 2014
 Jun Zhang, Professor, Ph.D., George Washington, 1997

*Joint Appointment

ELECTRICAL AND COMPUTER ENGINEERING

Michael T. Johnson, Chair

Robert J. Adams, Professor, Ph.D., Virginia Polytechnic, 1998
 Jeffrey Ashley, Senior Lecturer, Ph.D., Kentucky, 2004
 Lyle N. Back, Assistant Professor Emeritus, M.S., Kentucky, 1962
 Zhi Chen, Professor, Ph.D., Illinois at Urbana-Champaign, 1999
 Sen-ching Samson Cheung, Professor, Ph.D., California-Berkeley, 2002
 Aaron M. Cramer, Associate Professor, Ph.D., Purdue, 2007
 Henry Dietz, Professor, Ph.D., Polytechnic, 1987
 Raymond J. Distler, Associate Professor Emeritus, Ph.D., Kentucky, 1964
 Paul A. Dolloff, Adjunct Assistant Professor, Ph.D., Virginia Polytechnic Institute, 1996
 Kevin D. Donohue, Professor, Ph.D., Illinois Institute of Technology, 1987
 Joseph A. Elias, Adjunct Assistant Professor, Ph.D., Rice, 1996
 Gregory Gerhardt,* Professor, Ph.D., Kansas, 1983
 Regina Hannemann, Senior Lecturer, Ph.D., Kassel, Germany, 2001
 Laurence G. Hassebrook, Professor, Ph.D., Carnegie Mellon, 1990
 J. Todd Hastings, Professor, Ph.D., Massachusetts Institute of Technology, 2003
 J. Robert Heath, Associate Professor, Ph.D., Auburn, 1973
 Gregory Heileman, Professor, Ph.D., University of Central Florida, 1989
 Lawrence E. Holloway, Professor, Ph.D., Carnegie-Mellon, 1990
 Dan M. Ionel, Professor, Ph.D., Polytechnic University of Bucharest, Romania, 1996
 Michael T. Johnson, Professor, Ph.D., Purdue, 2000
 Daniel L. Lau, Professor, Ph.D., Delaware, 1999
 Laura M. Letellier, Lecturer, B.S., Purdue, 1977
 Michael E. Lhamon, Adjunct Assistant Professor, Ph.D., Kentucky, 1997
 Yuan Liao, Professor, Ph.D., Texas A&M, 2000
 Robert A. Lodder,* Professor, Ph.D., Indiana, 1988
 Caicheng Lu, Professor, Ph.D., Illinois at Urbana-Champaign, 1995
 James E. Lumpp, Jr., Professor, Ph.D., Iowa, 1993
 Janet K. Lumpp, Professor, Ph.D., Iowa, 1993
 George D. Ricco, Assistant Professor STS, Ph.D., Purdue, 2013
 Vijay P. Singh, Professor, Ph.D., Minnesota, 1974
 William T. Smith, Associate Professor, Ph.D., Virginia Polytechnic Institute, 1990
 Joseph Sottile, Jr.,* Associate Professor, Ph.D., Penn State, 1991
 Himanshu Thapliyal, Assistant Professor, Ph.D., South Florida, 2011
 Lee T. Todd Jr., Professor Emeritus, Ph.D., Massachusetts Institute of Technology, 1974
 Frederick C. Trutt, Professor Emeritus, Ph.D., Delaware, 1964
 Bruce L. Walcott, Professor, Ph.D., Purdue, 1987
 John C. Young, Assistant Professor, Ph.D., Clemson, 2002
 Yu-Ming Zhang, Professor, Ph.D., Harbin Institute of Technology, China, 1990

*Joint Appointment

MECHANICAL ENGINEERING

Michael W. Renfro, Chair

Nelson K. Akafuah, Assistant Research Professor, Ph.D., Kentucky, 2009
 Rodney J. Andrews,* Professor, Ph.D., Kentucky, 1999
 Fazleena Badurdeen, Associate Professor, Ph.D., Ohio, 2005
 Sean Bailey, Associate Professor, Ph.D., Ottawa, 2006

 Misty Tolle, Adjunct Assistant Professor, M.A., Juilliard School, 2000

SCHOOL OF ART AND VISUAL STUDIES

Robert Jensen, Director

Ruth Adams, Associate Professor, M.F.A., Miami, 1999
 Becky Alley, Lecturer, M.F.A., Kansas, 2005
 Garry Bibbs, Associate Professor, M.F.A., Kentucky, 1986
 Anna Brzyski, Professor, Ph.D., Chicago, 1999
 Dennis Carpenter, Professor Emeritus, M.F.A., Florida, 1979
 Mia Cinelli, Assistant Professor, M.F.A., University of Michigan, 2014
 Jeremy Colbert, Lecturer, M.F.A., Florida State, 2002
 Alice Christ, Associate Professor, Ph.D., Chicago, 1992
 Robert Dickes, Senior Lecturer, M.F.A., Kentucky, 2009
 Joel Feldman, Adjunct Professor, M.F.A., Indiana, 1967
 Gerald Ferstman, Associate Professor Emeritus, M.F.A., Washington, 1965
 Belinda Rae Goodwin, Associate Professor, M.F.A., Winthrop, 2006
 Crystal Gregory, Assistant Professor, M.F.A., Art Institute of Chicago, 2013
 Garrett Hansen, Assistant Professor, M.F.A., Indiana, 2011
 Martha Henton, Senior Lecturer, M.A., Western Kentucky, 1972
 Robert Jensen, Professor, Ph.D., California-Berkeley, 1987
 Miriam Kienle, Assistant Professor, Ph.D., Illinois at Urbana-Champaign, 2014
 Doreen Maloney, Associate Professor, M.F.A., Wisconsin, 1999
 Andrew L. Maske, Associate Professor, D.Phil., Oxford, 1995
 Jonathan McFadden, Assistant Professor, M.F.A.
 Matthew Page, Senior Lecturer, M.F.A., Vermont College, 2006
 Ebony Patterson, Associate Professor, M.F.A., Washington-St. Louis, 2006
 Lee Ann Paynter, Lecturer, M.F.A., California Institute of the Arts, 2011
 Jane S. Peters, Associate Professor Emeritus, Ph.D., Wisconsin-Madison, 1975
 Allan Richards, Associate Professor, Ed.D., Illinois State, 1987
 Paul Rodgers, Lecturer, M.F.A., Cincinnati, 2014
 Arturo A. Sandoval, Professor Emeritus, M.F.A., Cranbrook, 1971
 Robert Scroggins, Professor, M.F.A., Southern Illinois-Edwardsville, 1980
 Robert Shay, Professor, M.F.A., Wisconsin, 1973
 Brandon Smith, Senior Lecturer, M.F.A., Cincinnati, 2004
 James (Rob) Southard, Lecturer, M.F.A., Carnegie Mellon, 2011
 Hunter Stamps, Associate Professor, M.F.A., Indiana, 2005
 Dmitry Strakovsky, Associate Professor, M.F.A., Art Institute of Chicago, 2001
 Heather Stratton, Lecturer, M.F.A., Maryland Institute College of Art, 2012
 George Szekely, Professor, Ed.D., Columbia, 1975
 Monica Visoná, Associate Professor, Ph.D., California-Santa Barbara, 1983
 Paolo Visoná, Adjunct Associate Professor, Ph.D., Michigan, 1985
 James Wade, Jr., Senior Lecturer, M.F.A., Georgia, 1996
 Kathleen Wheeler, Senior Lecturer, M.A., Kentucky, 2005
 David Wischer, Lecturer, M.F.A., Purdue, 2012

SCHOOL OF MUSIC

Interim Director to be Announced

William Anderson, Instructor
 Ben Arnold, Professor, Ph.D., Kentucky, 1986
 Elizabeth P. Arnold, Associate Professor, D.M.A., Cincinnati University-College Conservatory of Music, 2006
 Joseph W. Baber, Professor, M.M., Rochester, 1965
 Michael Baker, Associate Professor, Ph.D., Indiana, 2007
 Dennis Bender, Associate Professor, D.M.A., Cincinnati University-College Conservatory of Music, 2009
 Cody Birdwell, Associate Professor, D.M.A., North Texas, 1996
 Karen Bottge, Associate Professor, Ph.D., Wisconsin-Madison, 2006
 George R. Boulden, Associate Professor, M.M.E., South Carolina, 1986
 Lance W. Brunner, Associate Professor, Ph.D., North Carolina, 1976
 James B. Campbell, Professor, M.M., Northern Illinois, 1978
 Jennifer Campbell, Assistant Professor, M.A., University of Connecticut, 2002
 Andre Campelo, Instructor
 James "Revell" Carr III, Assistant Professor, Ph.D., UC-Santa Barbara, 2006
 Daniel Cecil, Instructor
 W. Harry Clarke, Associate Professor Emeritus, M.A., George Peabody, 1963
 Gordon B. Cole, Associate Professor Emeritus, M.M., New Hampshire, 1976
 Elaine Cook, Instructor
 Marcello Cormino, Instructor
 Kate R. Covington, Associate Professor Emeritus, Ph.D., Indiana, 1982
 Raleigh Dailey, Associate Professor, Ph.D., Kentucky, 2007
 Paul Deathrage, Instructor
 Diana Deen, Instructor
 Richard C. Domek, Jr., Professor Emeritus, Ph.D., Indiana, 1976
 Jason Dovel, Assistant Professor, D.M.A., North Texas, 2007
 David G. Elliott, Associate Professor, M.M., Catholic University of America, 1968
 Angelique Everett, Associate Professor, D.M.A., Kentucky, 2007
 Erin Fulton, Instructor
 Beth Glixon, Instructor
 Jonathan E. Glixon, Professor, Ph.D., Princeton, 1979
 Arthur Graham, Professor Emeritus, Ed.D., Columbia, 1960
 Harold R. Gray, Professor, D.M.A., Illinois, 1994
 Diana R. Hallman, Associate Professor, Ph.D., City University of New York, 1995
 Hubert Henderson, Professor Emeritus, Ph.D., North Carolina, 1954
 Dieter Hennings, Assistant Professor, D.M.A., Eastman, 2015
 Alan B. Hersh, Professor Emeritus, D.Mus., Indiana, 1971
 Lori R. Hetzel, Professor, D.M.A., Michigan State, 1995
 Julie Hobbs, Assistant Professor, D.M., Northwestern, 2006
 Kevin Holm-Hudson, Associate Professor, D.M.A., Illinois, 1992
 Sara Holroyd, Professor Emeritus, M.A., Columbia, 1951
 Michael Hudson, Assistant Professor, Ph.D., Florida State, 2012
 Clifford Jackson, Associate Professor Emeritus, B.A., Oberlin, 1977
 Phyllis Jenness, Professor Emeritus, M.A., Kentucky, 1958
 Jefferson G. Johnson, Professor, D.M.A., Colorado, 1992
 Benjamin C. Karp, Professor, M.M., Indiana, 1983
 Margaret Karp, Lecturer, B.M., Indiana, 1983
 Bradley Kerns, Assistant Professor, M.M., Boston, 2005
 Donna Kwon, Associate Professor, Ph.D., California-Berkeley, 2005
 Cynthia Lawrence-Culkins, Professor, M.M., Colorado, 1987
 Tedrin Blair Lindsay, Lecturer, Ph.D., Kentucky, 2009
 Charles H. Lord, Associate Professor Emeritus, Ph.D., Indiana, 1978
 Noemi G. Lugo, Professor, D.M.A., Colorado, 1992
 ToniMarie Marchioni, Assistant Professor, D.M.A. Juilliard, 2010
 Daniel E. Mason, Professor, M.M., Southern California, 1977
 Everett D. McCorvey, Professor, D.M.A., Alabama, 1989
 Vicki McVay, Senior Lecturer, Ph.D., Kentucky, 2005
 Nan McSwain, Lecturer, M.M., Kentucky, 1992
 Patricia Montgomery, Associate Professor Emeritus, D.M.A., Indiana, 1979
 Eric Murine, Instructor
 John Nardolillo, Professor, M.M., Peabody Conservatory of Music, 1997
 Karl Olsen, Instructor
 Lisa Osland, Instructor
 Miles S. Osland, Professor, M.M., Eastman School of Music, 1987
 Ronald A. Pen, Professor, Ph.D., Kentucky, 1987
 Austin Robinson, Instructor
 Schuyler W. Robinson, Professor, D.M.A., Illinois, 1972
 Christine Sallas, Instructor
 Lorna Segall, Assistant Professor
 Peter C. Simpson, Associate Professor, M.A., New Hampshire, 1975
 David W. Sogin, Professor, Ph.D., Texas at Austin, 1986

Martina Vasil, Assistant Professor, M.A., Rochester, 2011
Irina Vorobieva, Professor, D.M.A., Montreal, 1997
Erin Walker, Lecturer, D.M.A. Kentucky, 2008
Cecilia Hoi-Mee Chu Wang, Professor Emeritus, Ph.D., Texas Tech, 1975
Dale E. Warren, Associate Professor Emeritus, M.M., North Colorado, 1976
Elizabeth Wilson, Instructor
Scott Wright, Associate Professor, D.M.A., Arizona State, 1999
Olivia Yinger, Assistant Professor, Ph.D., Florida State, 2012

DEPARTMENT OF THEATRE AND DANCE

Nancy C. Jones, Chair

Anthony Alterio, Lecturer, M.F.A. University of Michigan, 2016
Herman D. Farrell III, Associate Professor, M.F.A., Columbia, 1994; J.D., New York University, 1989
Nelson Fields, Professor, M.F.A., Iowa, 1992
Tony Hardin, Professor, M.F.A., Virginia, 1999
Robert W. Haven, Associate Professor Emeritus, M.F.A., Delaware, 1992
Russell Henderson, Associate Professor, M.F.A., Trinity University-Dallas Theatre Center, 1979
John Holloway, Professor, M.F.A., Trinity University-Dallas Theatre Center, 1980
Nancy C. Jones, Professor, M.F.A., Western Illinois, 1997
Geraldine Maschio, Professor, Ph.D., Wisconsin-Madison, 1981
Rhoda-Gale Pollack, Professor Emerita, Ph.D., Stanford, 1971
Christina Ritter, Senior Lecturer, Ph.D., Ohio State, 2007
James W. Rodgers, Professor Emeritus, Ph.D., Wayne State, 1968
Zachary Stribling, Senior Lecturer, M.F.A., Florida State, 2003
Susie Thiel, Assistant Professor, M.F.A., Michigan, 2011
Tracy M. Ward, Lecturer, M.F.A., Florida, 2003

COLLEGE OF HEALTH SCIENCES

Scott M. Lephart, Dean

DEPARTMENT OF CLINICAL SCIENCES

Phyllis Nash, Chair

Health Sciences Education and Research

Phyllis Nash, Division Director

Human Health Sciences and Clinical Leadership and Management

Lynda Bennett, Adjunct Assistant Professor, B.H.S., M.S., University of Kentucky and Northern Kentucky, 2013
Geza G. Bruckner, Professor, Ph.D., Kentucky, 1979
Ming Chih, Assistant Professor, MHA, M.S., Ph.D., Wisconsin Madison, 2013
Joseph L. Fink III,* Professor, J.D., Georgetown, 1973
Rachel Hogg, Assistant Professor, Dr. P.H., M.A., Kentucky, 2014
Karen O. Skaff, Professor, Ph.D., Columbia, 1992; Kentucky, 1995
Jami Warren, Lecturer, M.A., Ph.D., Kentucky, 2011

*Joint Appointment

Clinical Nutrition

Geza G. Bruckner, Division Director

Maria G. Boosalis, Associate Professor Emeritus, Ph.D., M.P.H., R.D., L.D., Minnesota, 1984
Geza G. Bruckner, Professor, Ph.D., Kentucky, 1979
David T. Thomas, Associate Professor, Ph.D., RDN, CSSD, LD, FAND, North Carolina-Greensboro, 2009

Medical Laboratory Science

Michelle Butina, Program Director

Michelle Butina, Associate Professor, MLS(ASCP)CM, Ph.D., Georgia, 2010
Kim Campbell, Senior Lecturer, MLS(ASCP)CM, M.S.Ed., Kentucky, 1985
Philip Campbell, Adjunct Assistant Professor, M.T. (ASCP), M.S.Ed., Kentucky, 1979
Patricia Ann Collins, Associate Professor Emeritus, M.T. (ASCP), M.S., West Virginia, 1971
Linda Gorman,* Associate Professor Emeritus, MLS(ASCP)CM, Ph.D., Kentucky 1996
Chad Guilliams, Lecturer, MLS (ASCP)CM, M.Ed, Georgia, 2009
Steve Schwarze, Assistant Professor, MLS(ASCP)CM, Ph.D., Wisconsin, 1998

E. Anne Stiene-Martin,*^ Professor Emeritus, M.T. (ASCP), Ph.D., Kentucky, 1991
Marie Vittetoe, Professor Emeritus, M.T. (ASCP), C.L.S. (NCA), Ed.D., West Virginia, 1973
*Joint Appointment
^Graduate Faculty

Physician Assistant Studies

W. Scott Black, Program Director

Somu Chatterjee, Assistant Professor, M.S., MPH, West Virginia
Deshana Collett, Assistant Professor, Ph.D., Kentucky, 2013
David A. Fahringer, Associate Professor, M.S.P.H., PA-C, Kentucky, 1992
Gerry A. Gairola, Professor, Ph.D., Kentucky, 1975
Sam Powdrill, Associate Professor, M.Phil., PA-C, University of London, England, 1992; North Dakota, 1999
Kevin M. Schuer, Associate Professor, DrPH, MSPAS, PA-C Kentucky, 2007, 2015
Andrew Wyant, Assistant Professor, M.D., Indiana, 1993, M.Div., Asbury University 2014

DEPARTMENT OF REHABILITATION SCIENCES

Janice M. Kuperstein, Chair

Athletic Training

Phillip A. Gribble, Division Director

John P. Abt, Associate Professor, Ph.D., ATC, FACSM, University of Pittsburgh, 2004
Timothy A. Butterfield, Associate Professor, Ph.D., ATC, University of Calgary, 2005
Phillip A. Gribble, Division Director, Associate Professor, Ph.D., ATC, FNATA, Pennsylvania State University, 2003
Nick R. Heebner, Assistant Professor, Ph.D., ATC, University of Pittsburgh, 2015
Johanna M. Hoch, Assistant Professor, Ph.D., University of Kentucky, 2012
Matthew C. Hoch, Lecturer, Ph.D., University of Kentucky, 2011
Carl G. Mattacola, Professor, Ph.D., ATC, FNATA, University of Virginia, 1996
Tim L. Uhl, Professor, Ph.D., ATC, P.T., FNATA, University of Virginia, 1998

Communication Sciences and Disorders

Anne D. Olson, Division Director

Mary Beth Allen, Clinical Assistant Professor, M.S., CCC-SLP, Kentucky, 2007
Richard D. Andreatta, Associate Professor, Ph.D., Indiana, 1999
Vrushali Angadi, Clinical Assistant Professor, Ph.D., CCC-SLP, Kentucky 2016
Sarah Campbell, Clinical Assistant Professor, M.S., CCC-SLP, Kentucky, 2003
Gilson C. Capilouto, Professor, Ph.D., CCC-SLP, South Carolina, 2002
Dan Croake, Clinical Assistant Professor, Ph.D., CCC-SLP, Kentucky 2016
Jodelle F. Deem, Associate Professor, Ph.D., CCC-SLP, Memphis State, 1988
Ellen C. Hagerman, Clinical Assistant Professor, M.A., CCC-SLP, Northern Colorado, 1979
Jane O. Kleinert, Professor, Ph.D., CCC-SLP, Kentucky, 2005
Joneen Lowman, Associate Professor, Ph.D., CCC-SLP Florida State, 2003
Robert C. Marshall, Professor, Ph.D., CCC-SLP, Oklahoma, 1969
Donna Southerland Morris, Associate Professor, M.A., CCC-SLP, Eastern Kentucky, 1982
Peter A. Meulenbroek, Assistant Professor, Ph.D., CCC-SLP, University of Wisconsin, 2013
Anne D. Olson, Associate Professor, Ph.D., CCC-A, Kentucky, 2010
Judith L. Page, Associate Professor, Ph.D., CCC-SLP, Purdue, 1981
Joseph C. Stemple, Professor, Ph.D., CCC-SLP, Cincinnati, 1977
Debra Suiter, Clinical Associate Professor, Ph.D., CCC-SLP, Tennessee, 2001

Physical Therapy

Robert A. (Tony) English, Division Director

Ramona Carper, Assistant Professor, P.T., DPT, Kentucky, 2011
Dean P. Currier, Professor Emeritus, P.T., Ph.D., Maryland, 1971
Joan Darbee, Senior Lecturer, P.T., Ph.D., SUNY-Buffalo, 2000
Esther Dupont-Versteegden, Professor, Ph.D., University of Texas Health Science Center, San Antonio, 1995
Susan Effgen, Professor, P.T., Ph.D., Georgia State, 1984
M. Lynn English, Associate Professor, P.T., D.P.T., Simmons, 2007
Robert A. (Tony) English, Associate Professor, P.T., Ph.D., Kentucky, 2008
Geetanjali Gera, Assistant Professor, PT, Ph.D., Delaware, 2013
Catherine Gohrband, Lecturer, PT, DPT, Kentucky, 2013
Anne L. Harrison, Associate Professor, P.T., Ph.D., Kentucky, 2002
Charles Hazle, Associate Professor, P.T., Ph.D., Kentucky, 2009
Audrey Johnson, Lecturer, PT, DPT, Kentucky, 2010
Nathan Johnson, Assistant Professor, PT, Ph.D., Kentucky, 2012
Deborah G. Kelly, Associate Professor, P.T., M.S.Ed., DPT Arcadia, 2012
Patrick Kitzman, Professor, P.T., Ph.D., Ohio State, 1994

Janice M. Kuperstein, Professor, P.T., Ph.D., Kentucky, 2008
 Terry R. Malone, Professor, P.T., A.T.C., Ed.D., Duke, 1985
 Charles Marshall, Associate Professor, Ph.D., Louisville, 2006
 Arthur J. Nitz, Professor, P.T., Ph.D., E.C.S., O.C.S., Kentucky, 1984
 Brian Noehren, Associate Professor, P.T., Ph.D., Delaware, 2009

Rehabilitation Sciences Doctoral Program

Esther Dupont-Versteegden, Director

John P. Abt, Associate Professor, Ph.D., ATC, FACS, Pittsburgh, 2004
 Richard D. Andreatta, Associate Professor, Ph.D., Indiana, 1999
 Stuart A. Best, Assistant Professor, Ph.D., University of Sydney, Australia, 2002
 Timothy A. Butterfield, Associate Professor, Ph.D., ATC, University of Calgary, 2005
 Gilson Capilouto, Professor, Ph.D., CCC-SLP, South Carolina, 2002
 Jodelle Deem, Associate Professor, Ph.D., CCC-SLP, University of Memphis, 1988
 Susan K. Effgen, Professor, PT, Ph.D., Georgia State, 1984
 Robert A. (Tony) English, Division Director, Associate Professor, PT, Ph.D., Kentucky, 2008
 Amanda C. Glueck, Assistant Professor, Ph.D., Texas Christian University, 2012
 Phillip Gribble, Division Director, Associate Professor, Ph.D., ATC, FNATA, Pennsylvania, 2003
 Anne L. Harrison, Associate Professor, PT, Ph.D., Kentucky, 2002
 Charles Hazle, Associate Professor, PT, Ph.D., Kentucky, 2009
 Nick R. Heebner, Assistant Professor, Ph.D., ATC, University of Pittsburgh, 2015
 Dana Howell, Ph.D., OTD, OTR/L, Kentucky
 Nathan F. Johnson, Assistant Professor, DPT, Ph.D., Kentucky, 2012
 Patrick H. Kitzman, Professor, PT, Ph.D., Ohio State, 1994
 Jane O. Kleinert, Professor, Ph.D., CCC-SLP, Kentucky, 2005
 Janice Kuperstein, Associate Dean for Clinical Engagement, PT, Ph.D., Kentucky, 2008
 Scott M. Lephart, Dean, Ph.D., Virginia, 1988
 Joneen Lowman, Assistant Professor, Ph.D., CCC-SLP, Florida, 2003
 Terry R. Malone, Professor, PT, Ed.D., ATC, FAPTA, Duke, 1985
 Robert C. Marshall, Professor, Ph.D., F-ASHA, CCC-SLP, BC-ANCD, Honors – ASHA, Oklahoma, 1969
 Carl G. Mattacola, Professor, Ph.D., ATC, FNATA, Virginia, 1996
 Arthur J. Nitz, Professor, P.T. Ph.D., E.C.S., O.C.S., Kentucky, 1984
 Brian Noehren, Associate Professor, P.T., Ph.D., Delaware, 2009
 Anne D. Olson, Associate Professor, Ph.D., CCC/A, Kentucky, 2010
 Judith L. Page, Associate Professor, Ph.D., CCC-SLP, Purdue, 1981
 Charlotte A. Peterson, Associate Dean for Research, Ph.D., Virginia, 1984
 Joseph Stemple, Professor, Ph.D., CCC-SLP, Ohio, 1977
 David T. Thomas, Associate Professor, Ph.D., RDN, CSSD, LD, FAND, North Carolina Greensboro, 2009
 Timothy L. Uhl, Professor, Ph.D., ATC, P.T., FNATA, Virginia, 1998

Jason S. Garrison, Assistant Professor, MD, Univ Of Chicago, 2008
 Jeniffer R. Gerstle, Assistant Professor, MD, University of Louisville, 2007
 Jay S. Grider, Professor, DO, PhD, Ohio University, 1993
 Joel B. Gunter, Professor, MD, Univ Of Oklahoma, 1982
 Sarah J. Hall, Assistant Professor, MD, PhD, Univ Of Texas Medical, 2012
 Michael E. Harned, Associate Professor, MD, University of Kentucky, 2004
 Zaki U. Hassan, Professor, MBBS, Charing Cross & Westminster Med, 1989
 Kevin W. Hatton, Associate Professor, MD, University of Kentucky, 2002
 Eugene A. Hessel, Professor, MD, Univ Of San Francisco, 1960
 Henry C. Holt, Assistant Professor, MD, University of Kentucky, 2011
 Ivan Horvath, Associate Professor, PhD, Univ Of Rochester, 1995
 Oksana Klimkina, Associate Professor, MD, First Moscow Medical University, 1984
 Lori C. Kral Barton, Assistant Professor, MD, East Tennessee State University, 2009
 Steven C. Lasher, Assistant Professor, MD, University of Kentucky, 1995
 Rebecca L. Layton, Assistant Professor, MD, University of Kentucky, 1988
 Julie S. Lewis, Assistant Professor, MD, Loma Linda University, 2006
 Richard Lock, Professor, MD, Northeast Ohio University College of Medicine, 1981
 Margaret Faith Lukens, Associate Professor, MD, University of Kentucky, 2003
 Kenneth T. McCoun, Associate Professor, DO, Pikeville College, 2001
 John T. McLarney, Professor, MD, University of Kentucky, 1994
 Judson L. Mehl, Assistant Professor, DO, Virginia State University, 2009
 Jeffrey W. Miller, Associate Professor, MD, Harvard University, 1985
 Christopher L. Montgomery, Professor, MD, University of Kentucky, 1985
 John T. Murphy, Professor, MD, Dalhousie University, 1978
 Dung D.O. Nguyen, Associate Professor, MD, St. George's University School of Medicine, 2008
 Jeffrey S. Oldham, Assistant Professor, MD, University of Kentucky, 2011
 Bjorn T. Olsen, Assistant Professor, MD, Rush University, 2007
 Katherine A. Petersen, Instructor, MD, Ross University, 2010
 Jayant N. Pratap, Assistant Professor, MD, Univ Of Cambridge, 1998
 Dinesh Ramaiah, Associate Professor, MD, Bangalore Medical College, 1990
 Annette Rebel, Professor, MD, Univ Heidelberg, 1993
 Arundathi M. Reddy, Professor, MBBS, Bangalore University, 1990
 Logan Q. Reeves, Assistant Professor, MD, Univ Of Virginia, 2010
 Michael A. Rie, Associate Professor Emeritus, M.D., Harvard University, 1966
 Rosalind Ritchie-Dabney, Associate Professor, MD, Southern Illinois University, 1992
 Zbigniew S. Rogozinski, Associate Professor, MD, Jagellonian University, 1982
 Gregory L. Rose, Professor, MD, University of Kentucky, 1986
 Daniel M. Rusu, Assistant Professor, MD, University of Medicine Carol Davila, 1997
 Randall M. Schell, Professor, MD, Loma Linda University, 1987
 Uttam K. Shastri, Assistant Professor, MD, University of Louisville, 2010
 Jewell W. Sloan, Assistant Professor, PhD, University of Kentucky, 1984
 Paul A. Sloan, Professor, MD, McGill University, 1980
 Rachel M. Sloan, Assistant Professor, MD, University of Kentucky, 2011
 James P. Spaeth, Associate Professor, MD, Univ Of Virginia, 1993
 Cara L. Sparks, Assistant Professor, MD, University of Kentucky, 2011
 Habib Srour, Assistant Professor, MD, Univ Of Toledo, 2010
 Johannes W. Steyn, Assistant Professor, MD, University of Kentucky, 2007
 Pieter G. Steyn, Associate Professor, MD, Univ Of The Orange Free State, 1979
 Lindsey M. Van Drunen, Assistant Professor, MD, Loma Linda University, 2013
 Margaret N. van Wyk, Assistant Professor, MD, Univ Of Pretoria, 1993
 Justin K. Wainwright, Associate Professor, MD, University of Louisville, 2003
 Robert H. Weaver, Assistant Professor, MD, University of Kentucky, 2013
 Kimberly S. Winchester, Assistant Professor, MD, University of Kentucky, 1985
 William Orin Witt, Professor Emeritus, M.D., Univ Of Minnesota, 1976
 Ronnie H. Zeidan, Assistant Professor, MD, Medical College Of Georgia, 2013

COLLEGE OF MEDICINE

Robert S. DiPaola, MD

ANESTHESIOLOGY

Robert R. Gaiser, Chair

Syed Z. Ali, Assistant Professor, MD, Mahadevappa Rampure Med College, 1994
 Matthew L. Baker, Assistant Professor, MD, Wake Forest University, 2009
 Kevin R. Bauereis, Assistant Professor, MD, University of Kentucky, 2010
 Peter P. Bosomworth, Professor Emeritus, M.D., Univ Of Cincinnati, 1955
 Edwin A. Bowe, Professor, MD, Univ Of Missouri Columbia Campus, 1975
 Victoria A. Bradford, Assistant Professor, MD, Univ Of Toledo, 2012
 Raeford E. Brown, Professor, MD, Univ Of North Carolina, 1980
 Jonathan L. Bylund, Assistant Professor, MD, University of Kentucky, 2009
 Destiny F. Chau, Associate Professor, MD, University of Kentucky, 2002
 Jasdeep S. Dhaliwal, Assistant Professor, MD, Tulane University, 2012
 Amy N. DiLorenzo, Senior Lecturer, MS, University of Kentucky, 1998
 Johannes Dorfling, Associate Professor, MD, Univ Of Stellenbosch, 1979
 Jeremy S. Dority, Associate Professor, MD, Univ Of Wisconsin-Madison, 2007
 Sanjay Dwarakanath, Assistant Professor, MBBS, Bangalore Medical College, 2001
 John H. Eichhorn, Professor, MD, Harvard University, 1973
 Mark A. Etscheidt, Professor, PhD, Georgia State University, 1989
 Shelly C. Ferrell, Associate Professor, MD, University of Louisville, 2005
 Brian A. Fischer, Assistant Professor, MD, PhD, Rush University, 2003
 Regina Y. Fragneto, Professor, MD, Univ Of Pittsburgh, 1985
 Robert R. Gaiser, Professor, MD, Columbia University - College of Physicians and Surgeons, 1988
 Shira G. Gambrel, Assistant Professor, MD, Louisiana State University, 2008

BEHAVIORAL SCIENCE

Carl G. Leukefeld, Chair

Michael A. Andrykowski, Professor, PhD, Univ Of Illinois - Urbana, 1984
 Shanna L. Babalonis, Assistant Professor, PhD, University of Kentucky, 2010
 Lee X. Blonder, Professor, PhD, Univ Of Pennsylvania, 1986

Sarah E. D'Orazio, Associate Professor, PhD, Univ Of Miami, 1995

Lucinda A. Elliott, Professor, PhD, University of Kentucky, 1975

Jacqueline D. Fetherston, Professor, PhD, Washington University, 1981

Kenneth A. Fields, Professor, PhD, University of Kentucky, 1999

Eric L. Garcia, Assistant Professor, PhD, Univ Of Michigan-Ann Arbor, 2010

Erin C. Garcia, Assistant Professor, PhD, Univ Of Michigan-Ann Arbor, 2009

Beth Garvy, Professor, PhD, Michigan State University, 1991

Brian P. Higgins, Assistant Professor, PhD, Univ Of Georgia, 2006
 Robert J. Jacob, Associate Professor Emeritus, Ph.D., Syracuse University, 1974
 Jieyun Jiang, Assistant Professor, PhD, China Pharmaceutical University, 2003
 Charlotte S. Kaetzel, Professor Emeritus, Ph.D., Univ Of Maryland, 1979
 Alan M. Kaplan, Professor, PhD, Purdue University, 1969
 Heinz Kohler, Professor Emeritus, M.D., Ph.D., Tec.University Of Munich, 1965
 Joseph P. McGillis, Associate Professor, PhD, George Washington University, 1985
 Robert D. Perry, Professor Emeritus, Ph.D., Michigan State University, 1978
 Martha L. Peterson, Professor, PhD, Univ Of Wisconsin-Madison, 1984
 Carol L. Pickett, Associate Professor, PhD, Univ Of Texas At Austin, 1983
 Thomas L. Roszman, Professor, PhD, Michigan State University, 1966
 Anthony P. Sinai, Professor, PhD, Univ Of Rochester, 1994
 Jesse Ernest Siskin, Professor Emeritus, Ph.D., Columbia Univ School Of General, 1957
 Ernest C. Snow, Professor, PhD, Univ Of Iowa, 1978
 Brett T. Spear, Professor, PhD, Univ Of Pennsylvania, 1985
 Marion Rothberg Steiner, Associate Professor Emeritus, Ph.D., University of Kentucky, 1968
 Brian Stevenson, Professor, PhD, State University Of New York, 1989
 Harold F. Stills, Professor, DVM, Ohio State University, 1975
 Susan Calhoun Straley, Professor Emeritus, Ph.D., Cornell University, 1972
 Yasuhiro Suzuki, Professor, PhD, University of Tokyo, 1982
 Katerina Wolf, Assistant Professor, PhD, Univ Of Berne, 1998
 Jerold G. Woodward, Professor, PhD, Univ Of Utah, 1979
 John R. Yannelli, Associate Professor, PhD, Virginia Commonwealth University, 1982
 Jiayou Zhang, Associate Professor Emeritus, Ph.D., Univ Of Texas At Austin, 1989

MOLECULAR AND CELLULAR BIOCHEMISTRY

Rebecca L. Dutch, Interim Chair

Douglas A. Andres, Professor, PhD, Purdue University, 1990
 Jessica Blackburn, Assistant Professor, PhD, Dartmouth College, 2009
 Shung Kai Chan, Professor Emeritus, Ph.D., Univ Of Wisconsin-Madison, 1962
 Trevor P. Creamer, Professor, PhD, Univ Of Western Australia, 1989
 Robert C. Dickson, Professor, PhD, Univ Of California - Los Angeles, 1970
 Rebecca L. Dutch, Professor, PhD, Stanford University, 1994
 Yvonne N. Fondeufe-Mittendorf, Associate Professor, PhD, George August University Of Gott, 2000
 Michael G. Fried, Professor, PhD, Yale University, 1982
 Jozsef Gal, Assistant Professor, PhD, Jozsef Attila Uni., 2000
 Emilia Galperin, Associate Professor, PhD, Tel-Aviv University, 2002
 Tianyan Gao, Professor, PhD, Northwestern Univ Medical School, 1988
 Matthew S. Gentry, Professor, PhD, Syracuse University, 2003
 Louis B. Hersh, Professor, PhD, Brandeis University, 1967
 Alfred S Hu, Professor Emeritus, Ph.D., Univ Of Oregon, 1957
 Jianhang Jia, Professor, PhD, Chinese Academy of Sciences, 2000
 Konstantin V. Korotkov, Associate Professor, PhD, Shemyakin & Ovchinnikov Inst of Bioorganic Chemisry, 1998
 Natalia A. Korotkova, Assistant Professor, PhD, Institute of Physiology and Biochemistry, Pushchino, Russia, 1999
 Robert L. Lester, Professor Emeritus, Ph.D., California Institute Of Technolo, 1956
 Harry LeVine, Associate Professor, PhD, Johns Hopkins University, 1975
 Yiwei Lin, Assistant Professor, PhD, University of Kentucky, 2012
 Chunming Liu, Professor, PhD, Purdue University, 1997
 Michael D. Mendenhall, Associate Professor, PhD, Univ Of Wisconsin-Madison, 1985
 Sajad H. Mir, Assistant Professor, PhD, Hamdard University, 2012
 Hunter N. Moseley, Associate Professor, PhD, University Of Alabama, 1998
 Michael P. Murphy, Associate Professor, PhD, Univ Of Toronto, 1997
 Daniel J. Noonan, Professor Emeritus, Ph.D., Univ Of Texas At Austin, 1980
 Kathleen L. O'Connor, Professor, PhD, Case Western Reserve University, 1996
 Sabire Ozcan, Associate Professor, PhD, Univ Of Dusseldorf, 1993
 David W. Rodgers, Associate Professor, PhD, Cornell University, 1986
 Jeffrey S. Rush, Assistant Professor, PhD, University of Kentucky, 1981
 Kevin D. Sarge, Professor, PhD, North Carolina State University, 1989
 H. P. Spielmann, Professor, PhD, Univ Of California - Berkeley, 1991
 Stefan Stamm, Professor, PhD, Univ Of Hannover, 1992
 Salvatore J. Turco, Professor, PhD, Univ Of Pittsburgh, 1976
 Thomas C. Vanaman, Professor, PhD, Duke University, 1968
 Craig W. Vander Kooi, Associate Professor, PhD, Vanderbilt University, 2004
 Charles J. Waechter, Professor, PhD, University of Kentucky, 1971
 David S. Watt, Professor, PhD, Harvard University, 1972
 Sidney W. Whiteheart, Professor, PhD, Johns Hopkins University, 1989
 Binhua Zhou, Professor, MD, PhD, Univ Of Texas At Austin, 1996
 Haining Zhu, Professor, PhD, Univ Of California - Los Angeles, 2000

NEUROLOGY

Larry B. Goldstein, Chair

 James W. Van Buren, Assistant Professor, MD, American University of the Caribbean, 2012
 Mark Vranicar, Associate Professor, MD, Loyola University Of Chicago, 1992
 Lars M. Wagner, Professor, MD, University of Kentucky, 1991
 Carmel Wallace, Professor, MD, University of Kentucky, 1975
 Linda Rae Walters, Associate Professor Emeritus, M.D., Indiana University, 1962
 H. David Wilson, Professor Emeritus, M.D., St Louis University, 1966
 Michael L. Wittkamp, Assistant Professor, MD, Emory University, 2001
 Betty I. Wolf, Associate Professor Emeritus, M.D., Univ Of Chicago, 1965
 Peter Wong, Professor Emeritus, M.D., Rangoon Ins.Of Technology, 1968
 Mark A. Wurth, Assistant Professor, MD, University of Kentucky, 2008
 Thomas L. Young, Professor, MD, University of Louisville, 1976
 John A. Yozwiak, Associate Professor, PhD, University of Kentucky, 2003
 Horacio F. Zaglul, Professor, MD, National Uni.Of La Plata, 1975

PHARMACOLOGY AND NUTRITIONAL SCIENCES

Nada M. Porter, Interim Chair

- Eric M. Blalock, Associate Professor, PhD, University of Kentucky, 1997
 Lisa A. Cassis, Professor, PhD, West Virginia University, 1984
 Gang Chen, Associate Professor, PhD, West Virginia University, 2005
 Kuey-Chu Chen, Associate Professor, PhD, Univ Of California - Davis, 1983
 Rolf J. Craven, Associate Professor, PhD, Univ Of North Carolina, 1996
 Florin Despa, Professor, PhD, Institute of Physics, Bucharest Romania, 1997
 Sanda I. Despa, Associate Professor, PhD, Limburgs Uni.Centrum, 2000
 Donald Frank Diedrich, Professor Emeritus, Ph.D., Univ Of Wisconsin-Madison, 1959
 James W. Flesher, Professor Emeritus, Ph.D., Loyola University Of Chicago, 1958
 Howard Glauert, Professor, PhD, Michigan State University, 1982
 Zhenheng Guo, Associate Professor, MD, PhD, Univ Of Virginia, 1999
 Robert W. Hadley, Associate Professor, PhD, Michigan State University, 1987
 Anika M. Hartz, Associate Professor, PhD, Univ Heidelberg, 2005
 Elizabeth Head, Professor, PhD, Univ Of Toronto, 1997
 Cai Huang, Assistant Professor, PhD, Univ Of North Carolina, 2003
 Edgar T Iwamoto, Professor Emeritus, Ph.D., City College Of San Francisco, 1973
 Michael W. Kilgore, Associate Professor, PhD, Texas Tech University, 1990
 Philip W. Landfield, Professor, PhD, Univ Of California - Irvine, 1971
 Sangderk Lee, Assistant Professor, PhD, Univ Of Virginia, 2006
 Ai-Ling Lin, Assistant Professor, PhD, Univ Of Texas Sch Allied Health, 2006
 Analia S. Loria, Assistant Professor, PhD, Univ Of Murcia, 2007
 Jia Luo, Professor, PhD, Univ Of Iowa, 1995
 Christopher M. Norris, Professor, PhD, Univ Of Virginia, 1998
 Kevin J. Pearson, Associate Professor, PhD, University of Cincinnati, 2005
 Norman W. Pedigo, Associate Professor Emeritus, Ph.D., Virginia Commonwealth University, 1977
 Michael T. Piascik, Professor, PhD, Ohio State University, 1978
 Rina Plattner, Professor, PhD, Indiana University, 1992
 Sara B. Police, Assistant Professor, PhD, University of Kentucky, 2008
 Nada M. Porter, Associate Professor, PhD, Univ Of Illinois Medical College, 1987
 Qing-Bai She, Associate Professor, PhD, Gifu University, 1995
 Hollie I. Swanson, Professor, PhD, Purdue University, 1991
 Ryan E. Temel, Associate Professor, PhD, State University Of New York, 2001
 Sean E. Thatcher, Assistant Professor, PhD, Marshall University, 2007
 Olivier H. Thibault, Professor, PhD, Bowman-Gray School Of Medicine, 1993
 Shuxia Wang, Professor, PhD, MD, Peking Medical Col., 1997

Nancy R. Webb, Professor, PhD, University of Kentucky, 1999
 Yadi Wu, Assistant Professor, PhD, Chinese Academy of Sciences, 2003
 Ren Xu, Associate Professor, PhD, Shanghai University, 2002
 Frederique B. Yiannikouris, Assistant Professor, PhD, Blaise-Pascal University, 2005
 Changcheng Zhou, Associate Professor, PhD, Univ Of California - Irvine, 2004

PHYSICAL MEDICINE AND REHABILITATION

Susan M. McDowell, Chair

Lumy S. Adams, Associate Professor, MD, PhD, Univ Of Sao Paulo, 1991
 Dwight Auvenshine, Associate Professor Emeritus, Ph.D., Univ Of Missouri Columbia Campus, 1962
 Jessica L. Colyer, Assistant Professor, MD, University of Cincinnati, 2006
 David Lindsay Cowen, Professor Emeritus, M.D., Univ Of Colorado-Denver, 1959
 Erika E. Erlanson, Assistant Professor, MD, University of Kentucky, 2009
 Cecil T. Hollen, Assistant Professor, DO, Pikeville College, 2013
 Jamie L. Key, Assistant Professor, DO, Pikeville College, 2012
 Gerald V. Klim, Associate Professor, DO, Philadelphia Coll of Osteopathic, 1980
 Susan M. McDowell, Associate Professor, MD, Medical College Of Georgia, 1990
 Robert B. Nickerson, Associate Professor, MD, Medical College Of Georgia, 1989
 Dwan Perry, Assistant Professor, DO, West Virginia School of Osteo Medicine, 2008
 Sara S. Salles, Professor, DO, U of Health Sciences C of Osteo, 1996
 Randal E. Schleenbaker, Associate Professor, MD, Loma Linda University, 1986
 Nancy J. Stiles, Associate Professor, MD, Univ Of Texas Hlth Sci Ctr, 1986

PHYSIOLOGY

Alan Daugherty, Chair

Jose F. Abisambra, Assistant Professor, PhD, Univ Of South Florida, 2010
 Francisco H. Andrade, Professor, PhD, Univ Of Texas At San Antonio, 1994
 Charles H. Bennett, Professor, PhD, University of Kentucky, 1981
 Erhard Bieberich, Professor, PhD, Univ Of Cologne, 1990
 Carie R. Boychuk, Assistant Professor, PhD, Univ Of Florida, 2009
 Jeffery Boychuk, Assistant Professor, PhD, Univ Of Florida, 2009
 Don E Burgess, Professor, PhD, Ohio State University, 1990
 Kenneth S. Campbell, Associate Professor, PhD, Univ Of Birmingham, 1998
 Lei Chen, Assistant Professor, PhD, University of Occupational and Environmental Health, 2006
 Alan Daugherty, Professor, PhD, DSc, Univ Of Bath, 1981
 Maria C. de Beer, Associate Professor, PhD, Univ Of Stellenbosch, 1992
 Brian P. Delisle, Associate Professor, PhD, University of Kentucky, 2001
 John Nicholas Diana, Professor Emeritus, Ph.D., University of Louisville, 1965
 Joseph Engelberg, Professor Emeritus, Ph.D., Univ Of Pennsylvania, 1958
 Steven Estus, Professor, PhD, Case Western Reserve University, 1989
 Brandon K. Fornwalt, Assistant Professor, MD, PhD, Georgia Institute Of Technology, 2008
 Donald T. Frazier, Professor, PhD, University of Kentucky, 1964
 Gregory I. Frolenkov, Associate Professor, PhD, Moscow Institute of Physics and Technology and Cardiology Research Center, 1988
 John C. Gensel, Assistant Professor, PhD, Ohio State University, 2006
 Ming C. Gong, Professor, MD, PhD, Peking Medical Col., 1994
 Henry R. Hirsch, Professor Emeritus, Ph.D., Massachusetts Institute Of Techn, 1960
 Brian A. Jackson, Professor, PhD, Univ Of Sheffield, 1977
 Lance A. Johnson, Assistant Professor, PhD, Univ Of North Carolina, 2011
 Lu Yuan Lee, Professor, PhD, Univ Of Mississippi Medical, 1975
 Sandra J. Legan, Professor, PhD, Univ Of Michigan, 1974
 Xiang-an Li, Professor, PhD, Osaka Uni., 1994
 Hong Lu, Associate Professor, MD, PhD, Kanazawa Uni., 2003
 John J. McCarthy, Associate Professor, PhD, Univ Of Oregon, 1995
 Timothy S. McClintock, Professor, PhD, Univ Of Florida, 1989
 Jennifer S. Moylan, Assistant Professor, PhD, Univ Of Arizona, 1994
 Mariana Nikolova-Karakashian, Professor, PhD, Bulgarian Academy of Sciences, Institute of Biophysics, 1992
 Ok-Kyong Park-Sarge, Associate Professor, PhD, Univ Of Illinois - Urbana, 1989
 Samirkumar P. Patel, Assistant Professor, PhD, Maharaja Sayajirao Uni.Of Baroda, 2006
 Alexander G. Rabchevsky, Professor, PhD, Univ Of Florida, 1995
 David C. Randall, Professor, PhD, Univ Of Washington, 1972
 Michael B. Reid, Professor, PhD, Univ of Texas Southwestern, 1980
 Daniel Ray Richardson, Professor Emeritus, Ph.D., Indiana University, 1969
 Kathryn E. Saatman, Professor, PhD, Univ Of Pennsylvania, 1993
 Jonathan Satin, Professor, PhD, Emory University, 1989
 Bret N. Smith, Professor, PhD, Univ Of Tennessee-Medical, 1992
 Stefanka Spassieva, Assistant Professor, PhD, Univ Of Groningen, 2003
 Dexter F. Speck, Professor, PhD, Loyola University Of Chicago, 1980
 Venkateswaran Subramanian, Assistant Professor, PhD, Annamalai Uni., 2003
 Bradley K. Taylor, Professor, PhD, Univ Of California - San Diego, 1991

Guanghu Wang, Assistant Professor, PhD, Dalian Univ of Science and Techn, 1997
 David R. Wekstein, Professor Emeritus, Ph.D., Univ Of Rochester, 1962
 Donna M. Wilcock, Associate Professor, PhD, Univ Of South Florida, 2005
 Melinda E. Wilson, Associate Professor, PhD, Loyola University Of Chicago, 1997
 Donald B. Witzke, Associate Professor, PhD, Univ Of Texas At Austin, 1975
 James F. Zolman, Professor Emeritus, Ph.D., Univ Of California - Berkeley, 1963

PSYCHIATRY

Lon R. Hays, Chair

Timothy S. Allen, Associate Professor, MD, University of Kentucky, 1998
 Robert G. Aug, Professor, MD, University of Cincinnati, 1955
 Emilee R. Bailey-Offill, Assistant Professor, DO, Pikeville College, 2011
 Sandra D. Batsel-Thomas, Associate Professor, MD, University of Kentucky, 2002
 Allen J. Brenzel, Associate Professor, MD, University of Louisville, 1988
 Jan D. Brink, Instructor, MD, Univ Of California Los Angeles, 1997
 Todd R. Cheever, Associate Professor, MD, University of Kentucky, 1991
 Andrew T. Cooley, Associate Professor, MD, Univ Of Arkansas, 1987
 Kristin L. Dawson, Assistant Professor, MD, University of Kentucky, 2007
 Jose de Leon, Professor, MD, Univ Of Navarre, 1982
 Fiona M. Doherty, Assistant Professor, MD, The Royal Col.Of Physicians, 1985
 Diane R. Follingstad, Professor, PhD, Univ Of Colorado, 1974
 Peter J. Gager, Assistant Professor, PhD, Rutgers University, 1998
 Teresa G. Gevedon, Associate Professor, MD, University of Kentucky, 1983
 Tamela G. Gilbert, Assistant Professor, MD, University of Kentucky, 1990
 James D. Hawthorne, Assistant Professor, MD, University of Kentucky, 2010
 Lon R. Hays, Professor, MD, MHA, University of Kentucky, 1982
 William M. Heffron, Associate Professor, MD, University of Kentucky, 1972
 Kelly K. Hill, Associate Professor, MD, Marshall University, 1986
 Laurie Lee Humphries, Professor Emeritus, M.D., Emory University, 1973
 Lindsey J. Jasinski, Assistant Professor, PhD, University of Kentucky, 2010
 Steven D. Johnson, Associate Professor, PhD, University of Kentucky, 2013
 Hans O. Kaak, Professor, MD, Univ Of Michigan, 1964
 Michael G. Kindred, Assistant Professor, MD, Univ Of Colorado-Denver, 2003
 Robert Francis Kraus, Professor Emeritus, M.D., Univ Of Wisconsin, 1955
 J. Scott Littleton, Assistant Professor, MD, University of Louisville, 1985
 Arnold M Ludwig, Professor Emeritus, M.D., Univ Of Pennsylvania, 1958
 Virginia H. Luftman, Assistant Professor, LCSW, PhD, University of Kentucky, 2009
 Catherine A. Martin, Professor, MD, University of Kentucky, 1976
 Edward N. Maxwell, Associate Professor, MD, University of Kentucky, 1971
 Amy L. Meadows, Assistant Professor, MD, Yale University, 2008
 Matthew J. Neltner, Assistant Professor, MD, University of Kentucky, 2005
 James C. Norton, Professor, PhD, Univ Of Arizona, 1970
 Mary H. Patrick, Assistant Professor, MD, Marshall University, 2009
 John D. Ranseen, Associate Professor, PhD, Ohio University, 1982
 Abner O. Rayapati, Assistant Professor, MD, Spartan Health Sciences Univ, 2007
 Charles I. Shelton, Assistant Professor, DO, West Virginia School of Osteo Medicine, 1989
 David Shraberg, Assistant Professor, MD, Vanderbilt University, 1973
 Robert E. Simon, Assistant Professor, MD, University of Kentucky, 1994
 Mary V. Sprang, Professor, PhD, Univ Of Texas At Austin, 1991
 Marian Swope, Associate Professor, MD, University of Kentucky, 1989
 Adrienne L. Whitt-Woosley, Assistant Professor, PhD, University of Kentucky, 2016

RADIATION MEDICINE

Marcus E. Randall, Chair

Mark E. Bernard, Assistant Professor, MD, Univ Of Pittsburgh, 2012
 Dennis A. Cheek, Assistant Professor, PhD, Univ Of Texas Sch Allied Health, 2005
 Quan Chen, Associate Professor, PhD, Univ Of Wisconsin-Madison, 2004
 Jonathan M. Feddock, Associate Professor, MD, University of Kentucky, 2007
 Ellis L. Johnson, Professor, PhD, University of Kentucky, 1993
 Mahesh R. Kudrimoti, Professor, MBBS, Osmania Uni., 1992
 Wei Luo, Associate Professor, PhD, Univ Of Oklahoma, 2002
 Ronald C. McGarry, Professor, MD, PhD, Univ Of Calgary, 1992
 Janelle A. Molloy, Professor, PhD, Univ Of Virginia, 1990
 Kristie J. Paris, Professor, MD, University of Louisville, 1982
 Pushpa M. Patel, Associate Professor, MD, Univ Of Bombay, 1973
 Damodar Pokhrel, Associate Professor, PhD, Virginia Commonwealth University, 2010
 Marcus E. Randall, Professor, MD, Univ Of North Carolina, 1982
 Vivek M. Rangnekar, Professor, PhD, Univ Of Bombay, 1983
 Robin A. Reams, Assistant Professor, MD, University of Kentucky, 1981
 Marguerite A. Sellitti, Assistant Professor, MD, PhD, State University Of New York, 1988
 William H. St. Clair, Professor, MD, PhD, University of Kentucky, 1995
 Robert D. Zwicker, Professor Emeritus, Ph.D., University of Kentucky, 1972

RADIOLOGY

M. Elizabeth Oates, Chair

Abdulnasser A. Alhajeri, Assistant Professor, MD, Arabian Gulf University, 1999
 Kimberly E. Applegate, Professor, MD, George Washington University, 1988
 Andres R. Ayoob, Associate Professor, MD, Johns Hopkins University, 1999
 Francesca D. Beaman, Associate Professor, MD, Univ Of Florida, 2000
 Gustav A. Blomquist, Assistant Professor, MD, Vanderbilt University, 2004
 Kristi A. Bogan, Assistant Professor, MD, Ross University, 2009
 Michael A. Brooks, Associate Professor, MD, Univ Of Florida, 1997
 Gary R. Conrad, Associate Professor, MD, University of Kentucky, 1977
 Billy E. Cunningham, Assistant Professor, DO, Kirksville College of Osteo Med, 1971
 Adrian A. Dawkins, Assistant Professor, MBBS, Univ Of The West Indies, 1999

 Driss Raissi, Assistant Professor, MD, Universidad del Pais Vasco, 2005
 Flavius D. Raslau, Assistant Professor, MD, U OF Health Science Medical School, 2005
 Carl N. Schofield, Assistant Professor, MD, Louisiana State University, 1983
 Albert C Selke Jr, Professor Emeritus, M.D., Univ Of Pennsylvania, 1959
 Wei-Jen Shih, Professor Emeritus, M.D., National Defense Medical Center School of Medicine Taipei, Taiwan, 1963
 Nasr H. Siddiqi, Associate Professor, MD, King Edward Medical College, 1990
 Phillip J. Silberberg, Assistant Professor, MD, Univ Of The Witwatersrand, 1983
 Paul J. Spicer, Assistant Professor, MD, Meharry Medical College, 2004
 Scott D. Stevens, Associate Professor, MD, Duke University, 1983
 Margaret M. Szabunio, Professor, MD, Hahnemann Medical College, 1984
 Jeremy W. Thacker, Assistant Professor, MD, University of Kentucky, 2005
 Jennifer F. True, Assistant Professor, MD, University of Kentucky, 2006
 Aruna Vade, Professor, MD, Maulana Azad Medical College, 1969
 Charl S. van Wyk, Assistant Professor, MD, Univ Of Pretoria, 1992
 Weiping Wang, Associate Professor, MD, Xi'an Jiaotong Univ, 1983
 Xiaojin J. Wang, Assistant Professor, MD, University of Kentucky, 2010
 Michael A. Winkler, Associate Professor, MD, Univ Of Chicago, 1998
 Marianna Zagurovskaya, Assistant Professor, MD, Almaty State Medical Institute, 1998
 Jie Zhang, Associate Professor, PhD, Univ Of Minnesota, 2004

SURGERY

Joseph B. Zwischenberger, Chair

Cherry Ballard-Croft, Assistant Professor, PhD, Univ Of South Alabama, 1998
 Erik Q. Ballert, Associate Professor, MD, University of Louisville, 2001
 Maher A. Baz, Professor, MD, American University In Beirut, 1989
 Sandra J. Beck, Professor, MD, Wright State University, 1995
 Jonathan C. Berger, Assistant Professor, MD, Univ Of Chicago, 2005
 Andrew C. Bernard, Professor, MD, University of Kentucky, 1995
 Avinash Bhakta, Assistant Professor, MD, Univ Of Nevada, 2010
 Joseph L. Bobadilla, Associate Professor, MD, Univ Of Wisconsin-Madison, 2003
 Anthony J. Bottiggi, Associate Professor, MD, SUNY of Buffalo, 2000
 Sabine M. Brouxhon, Professor, MD, Univ Of Rochester, 1998
 Donald W. Brown, Assistant Professor, DO, Oklahoma State University, 1996
 Roosevelt Bryant, Assistant Professor, MD, Boston University, 1999
 William C. Cavatassi, Associate Professor, MD, West Virginia University, 2005
 Michael J. Cavnar, Assistant Professor, MD, Columbia Univ—Columbia College, 2007
 Phillip K. Chang, Professor, MD, Eastern Virginia Medical School, 1999
 Alfred Martin Cohen, Professor Emeritus, M.D., Johns Hopkins University, 1967
 Christopher L. Culpepper, Assistant Professor, MD, Univ Of Tennessee-Medical, 2007
 Michael F. Daily, Associate Professor, MD, Univ Of Utah, 2000
 Daniel L. Davenport, Associate Professor, PhD, University of Kentucky, 2006
 Sean P. Dineen, Assistant Professor, MD, University of Louisville, 2003
 John M. Draus, Associate Professor, MD, University of Louisville, 2002
 Anil Duggal, Assistant Professor, MD, McMaster University, 2001
 Eric D. Endean, Professor, MD, Univ Of Michigan-Ann Arbor, 1980
 B. Mark Evers, Professor, MD, Univ Of Tennessee-Medical, 1983
 Victor A. Ferraris, Professor, MD, PhD, Thomas Jefferson University, 1977
 Roberto Gedaly, Professor, MD, Universidad Central de Venezuela, 1990
 James F. Glenn, Professor Emeritus, M.D., Duke University, 1952
 William W. Green, Professor Emeritus, Ph.D., Case Western Reserve University, 1970
 Meera Gupta, Assistant Professor, MD, Univ Of Pennsylvania, 2008
 Patrick F. Hagihara, Professor Emeritus, M.D., Abany Medical College, 1960
 Charles T. Harris, Instructor, MD, George Washington University, 2010
 Jon S. Hourigan, Associate Professor, MD, East Tennessee State University, 2000
 Gordon Lee Hyde, Professor Emeritus, M.D., Univ Of Michigan, 1957
 Joseph A. Iacono, Professor, MD, Thomas Jefferson University, 1993
 Joshua M. Judge, Assistant Professor, MD, University of Louisville, 2008
 Herbert Kaufer, Professor Emeritus, M.D., Univ Of Michigan, 1959
 Paul A. Kearney, Professor, MD, Thomas Jefferson University, 1980
 Daniel Edward Kenady, Professor Emeritus, M.D., Georgetown University, 1972
 Jonathan Kiev, Associate Professor, MD, Tulane University, 1989
 Courtney Y. Lee, Associate Professor, MD, Texas Tech University, 2004
 Jing Li, Associate Professor, PhD, Harbin Medical Col., 1999
 James Y. Liao, Associate Professor, MD, University of Kentucky, 2004
 Angela L. Mahan, Assistant Professor, MD, University of Louisville, 2006
 Emily F. Marcinkowski, Assistant Professor, MD, Louisiana State University, 2007
 Francesc Marti, Assistant Professor, PhD, Univ Of Barcelona, 1995
 Patrick C. McGrath, Professor, MD, Univ Of Illinois Medical College, 1980
 J. William McRoberts, Professor Emeritus, M.D., Cornell University, 1959
 Jordan D. Miller, Assistant Professor, DO, Lake Erie College of Osteopathic, 2009
 David J. Minion, Professor, MD, Indiana University, 1989
 David Morales, Professor, MD, Yale University, 1995
 Oscar I. Moreno-Ponte, Assistant Professor, MD, Universidad Centroccidental Lisandro Alvarado, 2004
 Timothy W. Mullett, Professor, MD, Univ Of Florida, 1983
 Melissa R. Newcomb, Assistant Professor, MD, University of Kentucky, 2008
 Nathan T. Orr, Assistant Professor, MD, Univ of Texas Southwestern, 2008
 Jitesh A. Patel, Associate Professor, MD, U of Med&Dent of NJ RW Johnson, 2003
 Andrew R. Pulito, Professor, MD, Columbia University - College of Physicians and Surgeons, 1969
 James A. Quintessenza, Professor, MD, Univ Of Florida, 1981
 Reese W. Randle, Assistant Professor, MD, Univ Of Texas Hlth Sci Ctr, 2009
 Hassan K. Reda, Associate Professor, MD, American University In Beirut, 1995
 Jessica K. Reynolds, Assistant Professor, MD, Medical College Of Georgia, 2011
 Brian D. Rinker, Professor, MD, Yale University, 1996
 Anna K. Rockich, Assistant Professor, PharmD, University of Kentucky, 1998
 John S. Roth, Professor, MD, Virginia Commonwealth University, 1993
 Randall G. Rowland, Professor Emeritus, M.D., Ph.D., Northwestern University, 1972
 Ana Ruzic, Assistant Professor, MD, University of Kentucky, 2005
 Piotr G. Rychahou, Assistant Professor, MD, Byelorussian State Medical University, 2002
 Sibu P. Saha, Professor, MD, MBA, Univ Of Rajshahi, 1966

Hiroshi Saito, Associate Professor, PhD, Univ Of Tokyo, 1987
 Michael E. Sekela, Professor, MD, Yeshiva University, 1981
 Alexis E. Shafii, Associate Professor, MD, Univ Of South Florida, 2002
 Malay B. Shah, Associate Professor, MD, Medical College of Ohio, 2003
 Sean C. Skinner, Associate Professor, MD, Ross University, 1999
 David A. Sloan, Professor, MD, McGill University, 1977
 Marlene E. Starr, Assistant Professor, PhD, Univ Of Texas Medical, 2011
 Daniel H. Stewart, Associate Professor, MD, West Virginia University, 1980
 Cynthia L. Talley, Associate Professor, MD, Univ Of Tennessee-Medical, 2004
 Stuart Tobin, Associate Professor, MD, Univ Of Missouri Columbia Campus, 1971
 Brian K. Tucker, Assistant Professor, DO, Pikeville College, 2002
 James S. Tweddell, Professor, MD, University of Cincinnati, 1985
 Samuel C. Tyagi, Assistant Professor, MD, University of Louisville, 2010
 Henry C. Vasconez, Professor, MD, Central University Of Ecuador, 1978
 Dongfang Wang, Professor, MD, PhD, Hubei University, 1984
 Qingding Wang, Associate Professor, MD, PhD, Institute of Beijing Pharmacology & Toxicology, 1994
 Heidi L. Weiss, Professor, PhD, Univ Of South Carolina, 1993
 Lesley Wong, Associate Professor, MD, Cornell University, 1982
 Theodore S. Wright, Associate Professor, MD, Univ Of Virginia, 1995
 Eleftherios S. Xenos, Professor, MD, Univ Of Athens, 1989
 Joseph B. Zwischenberger, Professor, MD, University of Kentucky, 1977

TOXICOLOGY AND CANCER BIOLOGY

Daret K. St. Clair, Interim Chair

Christine F. Brainson, Assistant Professor, PhD, Tufts University, 2009
 Luksana Chaiswing, Assistant Professor, PhD, Mahidol University, 2004
 Min Chen, Assistant Professor, PhD, Univ Of Texas Medical, 2011
 Whei-Mei T. Fan, Professor, PhD, Univ Of California - Davis, 1983
 Jian Fu, Associate Professor, PhD, University Of Alabama, 2001
 Chandra Gary Gairola, Professor Emeritus, Ph.D., Univ Of Illinois - Urbana, 1969
 Liya Gu, Associate Professor Emeritus, Ph.D., Wayne State University, 1992
 Richard M. Higashi, Professor, PhD, Univ Of California - Davis, 1987
 Tadahide Izumi, Associate Professor, PhD, Kyoto Uni., 1993
 Stuart G. Jarrett, Assistant Professor, PhD, Univ Of Wales, 2005
 Davy Jones, Professor, PhD, Univ Of California - Davis, 1982
 Andrew N. Lane, Professor, PhD, University College London, 1979
 Guo-Min Li, Professor, PhD, Wayne State University, 1991
 Ying Liang, Assistant Professor, MD, PhD, University of Kentucky, 2005
 Amrita Machwe, Assistant Professor, PhD, Univ Of Calgary, 1995
 Isabel Mellon, Associate Professor, PhD, Univ Of Illinois Medical College, 1984
 David K. Orren, Associate Professor, PhD, Univ Of North Carolina, 1991
 Zhen Qi, Assistant Professor, PhD, Chinese Academy of Sciences, 2004
 Xianglin Shi, Professor, PhD, West Virginia University, 1989
 Daret K. St. Clair, Professor, PhD, Univ Of Iowa, 1984
 Nathan L. Vanderford, Assistant Professor, PhD, University of Kentucky, 2008
 Mary Vore, Professor Emeritus, Ph.D., Vanderbilt University, 1972
 Zhigang Wang, Professor, PhD, Univ Of Texas At Austin, 1989
 Zhishan Wang, Assistant Professor, MD, PhD, Tongji University - Wuhan, 1998
 Qiou Wei, Assistant Professor, PhD, Univ Of South Dakota, 2005
 Chengfeng Yang, Professor, PhD, National University Of Singapore, 2001
 Hsin-Sheng Yang, Associate Professor, PhD, Arizona State University, 1994
 Yekaterina Y. Zaytseva, Assistant Professor, PhD, University of Kentucky, 2010
 Zhuo Zhang, Associate Professor, PhD, West Virginia University, 2002

UROLOGY

Stephen E. Strup, Chair

Katie N. Ballert, Associate Professor, MD, University of Louisville, 2001
 John R. Bell, Assistant Professor, MD, Tulane University, 2010
 Amul Bhalodi, Instructor, MD, Marshall University, 2010
 Jason R. Bylund, Associate Professor, MD, University of Kentucky, 2005
 Jon S. Demos, Associate Professor, MD, University of Kentucky, 1975
 Deborah R. Erickson, Professor, MD, Univ Of Missouri Columbia Campus, 1984
 Shubham Gupta, Assistant Professor, MD, All-India Ins.Of Medical Science, 2005
 Andrew M. Harris, Instructor, MD, University of Kentucky, 2007
 William C. James, Assistant Professor, MD, Univ Of Arkansas, 2007
 Natasha Kyprianou, Professor, PhD, Univ Of Wales, 1986
 Bruce A. Lucas, Professor, MD, Duke University, 1965
 David M. Preston, Associate Professor, MD, Emory University, 1990
 Alison M. Rasper, Assistant Professor, MD, University of Cincinnati, 2011
 Stephen E. Strup, Professor, MD, Indiana Central University, 1988
 Ali M. Ziada, Associate Professor, MD, Kasr ElAini Cairo University, 1991

COLLEGE OF NURSING

E. Janie Heath, Dean

Mollie E. Aleshire, Assistant Clinical Professor, D.N.P., Kentucky, 2010
 Kacy T. Allen-Bryant, Lecturer, M.S.N., Kentucky, 2006
 Debra G. Anderson, Associate Professor, Ph.D., Oregon, 1993
 Kristin B. Ashford, Associate Professor, Ph.D., Kentucky, 2007
 Ruth Assell, Associate Professor Emerita, M.S., Colorado, 1966
 Leslie M. Beebe, Senior Lecturer, M.S.N., Kentucky, 1988
 Ruth D. Berry, Assistant Clinical Professor Emerita, M.S.N., Wayne State, 1964
 Martha J. Biddle, Assistant Professor, Ph.D., Kentucky, 2011
 Dorothy A. Brockopp, Professor Emerita, Ph.D., SUNY-Buffalo, 1982
 Patricia V. Burkhart, Professor, Ph.D., Pittsburgh, 1996
 Karen M. Butler, Associate Professor, D.N.P., Kentucky, 2006
 Cathy A. Catlett, Lecturer, M.S.N., McKendree, 2009
 Norma J. Christman, Associate Professor Emerita, Ph.D., Wayne State, 1980
 Misook L. Chung, Professor, Ph.D., Kentucky, 2001
 Tammy L. Courtney, Lecturer, M.S.N., Indiana Wesleyan, 2015
 Jennifer B. Cowley, Senior Lecturer, M.S.N., Kentucky, 1987
 Amanda D. Culp-Roche, Clinical Instructor, M.S.N., Kentucky, 2009
 Judith A. Daniels, Assistant Clinical Professor, Ph.D., Kentucky, 2004
 Audrey Darville, Associate Clinical Professor, Ph.D., Kentucky, 2012
 Jennifer L. Dent, Lecturer, M.S.N., Eastern Kentucky, 2011
 Claudia M. Diebold, Senior Lecturer Emerita, M.S.N., Arkansas, 1993
 Peggy El-Mallakh, Associate Professor, Ph.D., Kentucky, 2005
 Amanda Fallin, Assistant Professor, Ph.D., Kentucky, 2011
 Lillian J. Findlay, Assistant Professor, Ph.D., Kentucky, 2012
 Juanita Fleming, Professor Emerita, Ph.D., Catholic University, 1969
 Janet L. Forren, Associate Professor, Ph.D., Kentucky, 2009
 Susan K. Frazier, Associate Professor, Ph.D., Ohio State, 1996
 Stephanie J. Fugate, Clinical Instructor, M.S.N., Kentucky, 2007
 Beatrice Gaunder, Associate Professor Emerita, M.S.N., SUNY-Buffalo, 1973; M.S.Ed., Niagara, 1973
 Evelyn Geller, Associate Professor Emerita, M.S.N., Catholic University, 1963; M.Ed., Columbia, 1972
 Carrie M. Gordy, Assistant Clinical Professor, M.S.N., Kentucky, 1994
 Margaret R. Grier, Professor Emerita, Ph.D., Texas Woman's University, 1975
 Ellen J. Hahn, Professor, Ph.D., Indiana, 1991
 Julia J. Hall, Lecturer, M.S.N., Kentucky, 2004
 Lynne A. Hall, Professor Emerita, Dr.P.H., North Carolina-Chapel Hill, 1983
 Debra C. Hampton, Assistant Professor, Ph.D., Cincinnati, 1996
 Frances Hardin-Fanning, Assistant Professor, Ph.D., Kentucky, 2010
 Melanie Hardin-Pierce, Associate Professor, D.N.P., Kentucky, 2006
 Jenna Hatcher, Associate Professor, Ph.D., Kentucky, 2006
 E. Janie Heath, Professor, Ph.D., George Mason, 2005
 Angela B. Hensley, Clinical Instructor, D.N.P., Cincinnati, 2013
 Margaret Hickman, Associate Professor Emerita, Ed.D., Ball State, 1982
 Patricia B. Howard, Professor, Ph.D., Kentucky, 1992
 Dianna D. Inman, Assistant Professor, D.N.P., Arizona State, 2009
 Lynne A. Jensen, Associate Clinical Professor, Ph.D., Kentucky, 2007
 Mikael Jones,* Clinical Associate Professor, Pharm.D., Florida, 2002
 Thomas H. Kelly,* Associate Dean for Research, Ph.D., Minnesota, 1983
 Lynn A. Kelso, Assistant Clinical Professor, M.S.N., Case Western Reserve, 1991
 Sarah E. Kerckmar,* Lecturer, Ph.D., Kentucky, 2007
 Nancy R. Kloha, Assistant Clinical Professor, D.N.P., Kentucky, 2011
 Paula R. Kral, Lecturer, M.S.N., Kentucky, 1986
 Whitney L. Kurtz-Ogilvie, Lecturer, M.F.A., School of the Art Institute of Chicago, 2005
 Gretchen LaGodna, Professor Emerita, Ph.D., Kentucky, 1975
 Terry A. Lennie, Professor, Ph.D., Wisconsin-Madison, 1993
 Ana Maria Linares, Associate Professor, D.N.S., Universidad Autonoma de Nuevo Leon, Mexico, 2006
 Sharon E. Lock, Professor, Ph.D., South Carolina-Columbia, 1990
 Wanda Lovitz, Clinical Instructor, M.S.N., Bellarmine, 1998
 Regina C. Lowry, Senior Lecturer Emerita, Ph.D., Kentucky, 2007
 Joanne M. Matthews, Assistant Clinical Professor, D.N.P., Kentucky, 2012
 Sheila D. Melander, Professor, Ph.D., Alabama-Birmingham, 1990
 Debra K. Moser, Professor, D.N.Sc., California-Los Angeles, 1992
 Gia T. Mudd-Martin, Associate Professor, Ph.D., Texas Health Science Center at Houston, 2007
 Chizimuzo T.C. Okoli, Assistant Professor, Ph.D., Kentucky, 2005
 Julianne Ossege, Associate Professor, Ph.D., South Carolina, 1993
 Ann R. Peden, Professor Emerita, D.S.N., Alabama-Birmingham, 1991
 Suzanne Pilon, Lecturer, D.N.P., Kentucky, 2016
 Mary K. Rayens, Professor, Ph.D., Kentucky, 1993

Deborah B. Reed, Professor, Ph.D., Kentucky, 1996
 Carol Riker, Associate Professor Emerita, M.S.N., Kentucky, 1974
 Kay Robinson, Associate Professor Emerita, D.S.N., Alabama-Birmingham, 1995
 Graham D. Rowles,* Professor, Ph.D., Clark, 1976
 Barbara A. Sachs, Professor Emerita, Ph.D., Wayne State, 1981
 Kathryn Sallee, Associate Professor Emerita, M.N., Emory, 1971

Policy on Residency

13KAR2:045.

DETERMINATION OF RESIDENCY STATUS FOR ADMISSION AND TUITION ASSESSMENT PURPOSES.

RELATESTO: KRS Chapter 13B, 164.020, 164.030, 164A.330(6)

STATUTORY AUTHORITY: KRS 164.020(8)

NECESSITY, FUNCTION, AND CONFORMITY: KRS 164.020(8) requires the Council on Postsecondary Education to determine tuition and approve the minimum qualifications for admission to a state postsecondary education institution and authorizes the Council to set different tuition amounts for residents of Kentucky and for nonresidents. This administrative regulation establishes the procedure and guidelines for determining the residency status of a student who is seeking admission to, or who is enrolled at, a state-supported postsecondary education institution.

Section 1. Definitions.

- (1) "Academic term" means a division of the school year during which a course of studies is offered, and includes a semester, quarter, or single consolidated summer term as defined by the institution.
- (2) "Continuous enrollment" means enrollment in a state-supported postsecondary education institution at the same degree level for consecutive terms, excluding summer term, since the beginning of the period for which continuous enrollment is claimed unless a sequence of continuous enrollment is broken due to extenuating circumstances beyond the student's control, including serious personal illness or injury, or illness or death of a parent.
- (3) "Degree level" means enrollment in a course or program that could result in the award of a:
 - (a) Certificate, diploma, or other program award at an institution;
 - (b) Baccalaureate degree or lower, including enrollment in a course by a nondegree-seeking postbaccalaureate student;
 - (c) Graduate degree or graduate certification other than a first-professional degree in law, medicine, dentistry, or "Pharm. D"; or
 - (d) Professional degree in law, medicine, dentistry, or "Pharm. D".
- (4) "Dependent person" means a person who cannot demonstrate financial independence from parents or persons other than a spouse and who does not meet the criteria for independence established in Section 5 of this administrative regulation.
- (5) "Determination of residency status" means the decision of a postsecondary education institution that may include a formal hearing that results in the classification of a person as a Kentucky resident or as a nonresident for admission and tuition assessment purposes.
- (6) "Domicile" means a person's true, fixed, and permanent home and is the place where the person intends to remain indefinitely, and to which the person expects to return if absent without intending to establish a new domicile elsewhere.
- (7) "Full-time employment" means continuous employment for at least forty-eight (48) weeks at an average of at least thirty (30) hours per week.
- (8) "Independent person" means a person who demonstrates financial independence from parents or persons other than a spouse and who meets the criteria for independence established in Section 5 of this administrative regulation.
- (9) "Institution" means an entity defined by KRS 164.001(12) if the type of institution is not expressly stated and includes the Kentucky Virtual University, the Council on Postsecondary Education, and the Kentucky Higher Education Assistance Authority.
- (10) "Kentucky resident" means a person determined by an institution for tuition purpose to be domiciled in and a resident of Kentucky as determined by this administrative regulation.
- (11) "Nonresident" means a person who:
 - (a) Is domiciled outside by Kentucky;
 - (b) Currently maintains legal residence outside Kentucky; or
 - (c) Is not a Kentucky resident as determined by this administrative regulation.
- (12) "Parent" means one (1) of the following:
 - (a) A person's father or mother; or
 - (b) A court-appointed legal guardian if:
 1. The guardianship is recognized by an appropriate court within the United States;
 2. There was a relinquishment of the rights of the parents; and
 3. The guardianship was not established primarily to confer Kentucky residency on the person.

(13) "Preponderance of the evidence" means the greater weight of evidence or evidence that is more credible and convincing to the mind.

(14) "Residence" means the place of abode of a person and the place where the person is physically present most of the time for a noneducational purpose in accordance with Section 3 of this administrative regulation.

(15) "Student financial aid" means all forms of payments to a student if one (1) condition of receiving the payment is the enrollment of the student at an institution, and includes student employment by the institution or a graduate assistantship.

(16) "Sustenance" means living expenses including room, board, maintenance, transportation, and educational expenses including tuition, fees, books, and supplies.

Section 2. Scope.

- (1) State-supported postsecondary education institutions were established and are maintained by the Commonwealth of Kentucky primarily for the benefit of qualified residents of Kentucky. The substantial commitment of public resources to postsecondary education is predicated on the proposition that the state benefits significantly from the existence of an educated citizenry. As a matter of policy, access to postsecondary education shall be provided so far as feasible at reasonable cost to a qualified individual who is domiciled in Kentucky and who is a resident of Kentucky.
- (2) The Council on Postsecondary Education may require a student who is neither domiciled in nor a resident of Kentucky to meet higher admission standards and to pay a higher level of tuition than resident students.
- (3) This administrative regulation shall apply to all student residency determinations regardless of circumstances, including residency determinations made by the state-supported institutions for prospective and currently-enrolled students; the Southern Regional Education Board for contract spaces; reciprocity agreements, if appropriate; the Kentucky Virtual University; academic common market programs; the Kentucky Educational Excellence Scholarship Program; and other state student financial aid programs, as appropriate.

Section 3. Determination of Residency Status; General Rules.

- (1) A determination of residency shall include:
 - (a) An initial determination of residency status by an institution during the admission process or upon enrollment in an institution for a specific academic term or for admission into a specific academic program;
 - (b) A reconsideration of a determination of residency status by an institution based upon a changed circumstance; or
 - (c) A formal hearing conducted by an institution upon request of a student after other administrative procedures have been completed.
- (2) An initial determination of residency status shall be based upon:
 - (a) The facts in existence when the credentials established by an institution for admission for a specific academic term have been received and during the period of review by the institution;
 - (b) Information derived from admissions materials;
 - (c) If applicable, other materials required by an institution and consistent with this administrative regulation; and
 - (d) Other information available to the institution from any source.
- (3) An individual seeking a determination of Kentucky residency status shall demonstrate that status by a preponderance of the evidence.
- (4) A determination of residency status shall be based upon verifiable circumstances or actions.
- (5) Evidence and information cited as the basis for Kentucky domicile and residency shall accompany the application for a determination of residency status.
- (6) A student classified as a nonresident shall retain that status until the student is officially reclassified by an institution.
- (7) A student may apply for a review of a determination of residency status once for each academic term.
- (8) If an institution has information that a student's residency status may be incorrect, the institution shall review and determine the student's correct residency status.
- (9) If the Council on Postsecondary Education has information that an institution's determination of residency status for a student may be incorrect, it may require the institution to review the circumstances and report the results of that review.

(10) An institution shall impose a penalty or sanction against a student who gives incorrect or misleading information to an institutional official, including payment of nonresident tuition for each academic term for which resident tuition was assessed based on an improper determination of residency status. The penalty or sanction may also include:

- (a) Student discipline by the institution through a policy written and disseminated to students; or
- (b) Criminal prosecution.

Section 4. Presumptions Regarding Residency Status.

(1) In making a determination of residency status, it shall be presumed that a person is a nonresident if:

- (a) A person is, or seeks to be, an undergraduate student and admissions records show the student to be a graduate of an out-of-state high school within five (5) years prior to a request for a determination of residency status;
- (b) A person's admissions records indicate the student's residence to be outside of Kentucky at the time of application for admission;
- (c) A person moves to Kentucky primarily for the purpose of enrollment in an institution;
- (d) A person moves to Kentucky and within twelve (12) months enrolls at an institution more than half time;
- (e) A person has a continuous absence of one (1) year from Kentucky; or
- (f) A person attended an out-of-state higher education institution during the past academic year and paid in-state tuition at that institution.

(2) A presumption arising from subsection (1) of this section shall only be overcome by preponderance of evidence sufficient to demonstrate that a person is domiciled in and is a resident of Kentucky.

Section 5. Determination of Whether a Student is Dependent or Independent.

(1) In a determination of residency status, an institution shall first determine whether a student is dependent or independent. This provision is predicated on the assumption that a dependent person lacks the financial ability to live independently of the person upon whom the student is dependent and therefore lacks the ability to form the requisite intent to establish domicile. A determination that a student is independent shall be one (1) step in the overall determination of whether a student is or is not a resident of Kentucky.

(2) In determining the dependent or independent status of a person, the following information shall be considered as well as other relevant information available at the time the determination is made:

- (a) 1. Whether the person has been claimed as a dependent on the federal or state tax returns of a parent or other person for the year preceding the date of application for a determination of residency status; or
2. Whether the person is no longer claimed by a parent or other person as a dependent or as an exemption for federal and state tax purposes; and
- (b) Whether the person has financial earnings and resources independent of a person other than an independent spouse necessary to provide for the person's own sustenance.

(3) An individual who enrolls at an institution immediately following graduation from high school and remains enrolled shall be presumed to be a dependent person unless the contrary is evident from the information submitted.

(4) Domicile may be inferred from the student's permanent address, parent's mailing address, or location of high school of graduation.

(5) Marriage to an independent person domiciled in and who is a resident of Kentucky shall be a factor considered by an institution in determining whether a student is dependent or independent.

(6) Financial assistance from or a loan made by a parent or family member other than an independent spouse, if used for sustenance of the student:

- (a) Shall not be considered in establishing a student as independent; and
- (b) Shall be a factor in establishing that a student is dependent.

Section 6. Effect of a Determination of Dependent Status on a Determination of Residency Status.

(1) The effect of a determination that a person is dependent shall be:

- (a) The domicile and residency of a dependent person shall be the same as either parent. The domicile and residency of the parent shall be determined in the same manner as the domicile and residency of an independent person; and
- (b) The domicile and residency of a dependent person whose parents are divorced, separated, or otherwise living apart shall be Kentucky if either parent is domiciled in and is a resident of Kentucky regardless of which parent has legal custody or is entitled to claim that person as a dependent pursuant to federal or Kentucky income tax provisions.

(2) If the parent or parents of a dependent person are Kentucky residents and are domiciled in Kentucky but subsequently move from the state:

- (a) The dependent person shall be considered a resident of Kentucky while in continuous enrollment at the degree level in which currently enrolled; and
- (b) The dependent person's residency status shall be reassessed [reassumed] if continuous enrollment is broken or the current degree level is completed.

Section 7. Member of Armed Forces of the United States, Spouse and Dependents; Effect on a Determination of Residency Status.

(1) A member, spouse, or dependent of a member whose domicile and residency was Kentucky at the time of induction into the Armed Forces of the United States, and who maintains Kentucky as home of record and permanent address, shall be entitled to Kentucky residency status:

- (a) During the member's time of active service; or
 - (b) If the member returns to this state within six (6) months of the date of the member's discharge from active duty.
- (2) (a) A member of the armed services on active duty for more than thirty (30) days and who has a permanent duty station in Kentucky shall be classified as a Kentucky resident and shall be entitled to in-state tuition as shall the spouse or a dependent child of the member.
- (b) A member, spouse, or dependent of a member shall not lose Kentucky residency status if the member is transferred on military orders while the member, spouse, or dependent requesting the status is in continuous enrollment at the degree level in which currently enrolled.
- (3) (a) Membership in the National Guard or civilian employment at a military base alone shall not qualify a person for Kentucky residency status under the provisions of subsections (1) and (2) of this section. If a member of the Kentucky National Guard is on active duty status for a period of not less than thirty (30) days, the member shall be considered a Kentucky resident, as shall the spouse of a dependent child of the member.
- (4) A person's residency status established pursuant to this section shall be reassessed if the qualifying condition is terminated.

Section 8. Status of Nonresident Aliens; Visas and Immigration.

- (1) (a) A person holding a permanent residency visa or classified as a political refugee shall establish domicile and residency in the same manner as another person.
 - (b) Time spent in Kentucky and progress made in fulfilling the conditions of domicile and residency prior to obtaining permanent residency status shall be considered in establishing Kentucky domicile and residency.
- (2) A person holding a nonimmigrant visa with designation A, E, G, H-1, H-4 if accompanying a person with an H-1 visa, I, K, L, N, R, shall establish domicile and residency the same as another person.
- (3) (a) An independent person holding a nonimmigrant visa with designation B, C, D, F, H-2, H-3, H-4 if accompanying a person with an H-2 or H-3 visa, J, M, O, P, Q, S, TD, or TN shall not be classified as a Kentucky resident, because that person does not have the capacity to remain in Kentucky indefinitely and therefore cannot form the requisite intent necessary to establish domicile as defined in Section 1(6) of this administrative regulation.
- (b) A dependent person holding a visa as described in paragraph (a) of this subsection, but who is a dependent of a parent holding a visa as described in subsection (2) of this section, shall be considered as holding the visa of the parent.
- (c) A dependent person holding a visa described in subsection (2) of this section or paragraph (a) of this subsection, if a parent is a citizen of the United States and is a resident of and domiciled in Kentucky, shall be a resident of Kentucky for the purposes of this administrative regulation.
- (4) A person shall be a Kentucky resident for the purpose of this administrative regulation if the person graduated from a Kentucky high school and:
- (a) Is an undocumented alien;
 - (b) Holds a visa listed in subsections (2) or (3)(a) of this section; or
 - (c) Is a dependent of a person who holds a visa listed in subsections (2) or (3)(a) of this section.
- (5) (a) Except as provided in paragraph (b) of this subsection, a person who has petitioned the federal government to reclassify visa status shall continue to be ineligible until the petition has been decided by the federal government.
- (b) A person who has petitioned the federal government to reclassify his or her visa status based on marriage to a Kentucky resident and who can demonstrate that the petition has been filed and acknowledged by the federal government, may establish Kentucky domicile and residency at that time.

Section 9. Beneficiaries of a Kentucky Educational Savings Plan Trust.

A beneficiary of a Kentucky Educational Savings Plan Trust shall be granted residency status if the beneficiary meets the requirements of KRS 164A.330(6).

Section 10. Criteria Used in a Determination of Residency Status.

- (1) (a) A determination of Kentucky domicile and residency shall be based upon verifiable circumstances or actions.
 - (b) A single fact shall not be paramount, and each situation shall be evaluated to identify those facts essential to the determination of domicile and residency.
 - (c) A person shall not be determined to be a Kentucky resident by the performance of an act that is incidental to fulfilling an educational purpose or by an act performed as a matter of convenience.
 - (d) Mere physical presence in Kentucky, including living with a relative or friend, shall not be sufficient evidence of domicile and residency.
 - (e) A student or prospective student shall respond to all requests for information regarding domicile or residency requested by an institution.
- (2) The following facts, although not conclusive, shall have probative value in their entirety and shall be individually weighted, appropriate to the facts and circumstances in each determination of residency:
 - (a) Acceptance of an offer of full-time employment or transfer to an employer in Kentucky or contiguous area while maintaining residence and domicile in Kentucky;
 - (b) Continuous physical presence in Kentucky while in a nonstudent status for the twelve (12) months immediately preceding the start of the academic term for which a classification of Kentucky residency is sought;
 - (c)
 1. Filing a Kentucky resident income tax return for the calendar year preceding the date of application for a change in residency status; or
 2. Payment of Kentucky withholding taxes while employed during the calendar year for which a change in classification is sought;
 - (d) Full-time employment of at least one (1) year while living in Kentucky;
 - (e) Attendance as a full-time, nonresident student at an out-of-state institution based on a determination by that school that the person is a resident of Kentucky;
 - (f) Abandonment of a former domicile or residence and establishing domicile and residency in Kentucky with application to or attendance at an institution following and incidental to the change in domicile and residency;
 - (g) Obtaining licensing or certification for a professional and occupational purpose in Kentucky;
 - (h) Payment of real property taxes in Kentucky;
 - (i) Ownership of real property in Kentucky, if the property was used by the student as a residence preceding the date of application for a determination of residency status;
 - (j) Marriage of an independent student to a person who was domiciled in and a resident of Kentucky prior to the marriage; and
 - (k) The extent to which a student is dependent on student financial aid in order to provide basic sustenance.
- (3) Except as provided in subsection (4) of this section, the following facts, because of the ease and convenience in completing them, shall have limited probative value in a determination that a person is domiciled in and is a resident of Kentucky:
 - (a) Kentucky automobile registration;
 - (b) Kentucky driver's license;
 - (c) Registration as a Kentucky voter;
 - (d) Long-term lease of at least twelve (12) consecutive months of noncollegiate housing; and
 - (e) Continued presence in Kentucky during academic breaks.
- (4) The absence of a fact contained in subsection (3) of this section shall have significant probative value in determining that a student is not domiciled in or is not a resident of Kentucky.

Section 11. Effect of a Change in Circumstances on Residency Status.

- (1) If a person becomes independent or if the residency status of a parent or parents of a dependent person changes, an institution shall reassess residency either upon a request by the student or a review initiated by the institution.
- (2) Upon transfer to a Kentucky institution, a student's residency status shall be assessed by the receiving institution.
- (3) A reconsideration of a determination of residency status for a dependent person shall be subject to the provisions for continuous enrollment, if applicable.

Section 12. Student Responsibilities.

- (1) A student shall report under the proper residency classification, which includes the following actions:
 - (a) Raising a question concerning residency classification;
 - (b) Making application for change of residency classification with the designated office or person at the institution; and
 - (c) Notifying the designated office or person at the institution immediately upon a change in residency.

- (2) If a student fails to notify an institutional official of a change in residency, an institutional official may investigate and evaluate the student's residency status.
- (3) (a) If a student fails to provide, by the date specified by the institution, information required by an institution in a determination of residency status, the student shall be notified by the institution that the review has been canceled and that a determination has been made.
 - (b) Notification shall be made by registered mail, return receipt requested.
 - (c) Notification shall be made within ten (10) calendar days after the deadline for receipt of materials has passed.
- (4) (a) The formal hearing conducted by an institution and the final recommended order shall be a final administrative action with no appeal to the Council on Postsecondary Education.
 - (b) A formal administrative hearing conducted by the Council on Postsecondary Education for residency determinations related to eligibility for the Academic Common Market and Regional Contract Programs shall be conducted pursuant to the provisions of KRS Chapter 13B and 13 KAR 2:070. The recommended order issued by the President of the Council shall be a final administrative action.
- (5) A student shall not be entitled to appeal a determination of residency status if the determination made by an institution is because a student has failed to meet published deadlines for the submission of information as set forth in subsection (3) of this section. A student may request a review of a determination of residency status in a subsequent academic term.

Section 13. Institutional Responsibilities.

Each institution shall:

- (1) Provide for an administrative appeals process that includes a residency appeals officer to consider student appeals of an initial residency determination and which shall include a provision of fourteen (14) days for the student to appeal the residency appeals officer's determination;
- (2) Establish a residency review committee to consider appeals of residency determinations by the residency appeals officer. The residency review committee shall make a determination of student residency status and notify the student in writing within forty-five (45) days after receipt of the student appeal;
- (3) Establish a formal hearing process as described in Section 14 of this administrative regulation; and
- (4) Establish written policies and procedures for administering the responsibilities established in subsections (1), (2), and (3) of this section and that are:
 - (a) Approved by the institution's governing board;
 - (b) Made available to all students; and
 - (c) Filed with the council.

Section 14. Formal Institutional Hearing.

- (1) A student who appeals a determination of residency by a residency review committee shall be granted a formal hearing by an institution if the request is made by a student in writing within fourteen (14) calendar days after notification of a determination by a residency review committee.
- (2) If a request for a formal hearing is received, an institution shall appoint a hearing officer to conduct a formal hearing. The hearing officer shall:
 - (a) Be a person not involved in determinations of residency at an institution except for formal hearings; and
 - (b) Not be an employee in the same organizational unit as the residency appeals officer.
- (3) An institution shall have written procedures for the conduct of a formal hearing that have been adopted by the board of trustees or regents, as appropriate, and that provide for:
 - (a) A hearing officer to make a recommendation on a residency appeal;
 - (b) Guarantees of due process to a student that include:
 1. The right of a student to be represented by legal counsel; and
 2. The right of a student to present information and to present testimony and information in support of a claim of Kentucky residency; and
 - (c) A recommendation to be issued by the hearing officer.
- (4) An institution's formal hearing procedures shall be filed with the Council on Postsecondary Education and shall be available to a student requesting a formal hearing.

Section 15. Cost of Formal Hearings.

- (1) An institution shall pay the cost for all residency determinations including the cost of a formal hearing.
- (2) A student shall pay for the cost of all legal representation in support of the student's claim of residency.

Policy on Residency

Policy subject to change without notice.

Drug-Free Policy

Policy Statement as a Drug-Free Institution

The University of Kentucky is committed to providing a healthy and safe environment for its students, faculty and staff. The University has defined conduct in relation to the unlawful possession, use, dispensation, distribution or manufacture of alcohol or illicit drugs. Conduct which is violative of this definition poses unacceptable risks and disregard for the health, safety, and welfare of members of the University community and shall result in disciplinary action up to and including suspension or termination.

As a recipient of federal grants and contracts, the University of Kentucky gives this notice to students, faculty and staff that it is in compliance with and shall continue to be in compliance with the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act. Students, faculty and staff are herein notified of the standards of conduct which shall be applicable while on University of Kentucky property, on University business, and/or at University sponsored activities.

Standards of Conduct

By University regulations, by federal law, by state law, and, in some instances, by local ordinance, students, faculty and staff are prohibited from the **unlawful** possession, use, dispensation, distribution, or manufacture of illicit drugs on University property, on University business and/or at University sponsored activities.

Under University regulations, students, faculty and staff are required to abide by state laws concerning alcoholic beverages. Basically, Kentucky laws state that if one is under the age of 21, it is unlawful to:

- (1) possess or consume alcoholic beverages,
- (2) misrepresent one's age for the purpose of purchasing alcoholic beverages, or
- (3) use a fake ID in an attempt to purchase alcoholic beverages.

No matter what one's age, Kentucky law states that it is unlawful to:

- (1) procure any alcoholic beverages for anyone under 21 years of age or
- (2) drink or to be drunk in a public place.

University campuses and buildings are considered as public places for purposes of these laws, except for a facility licensed to serve alcoholic beverages, and except for a facility used as a private residence, unless University regulations state otherwise.

Ordinances of the Lexington-Fayette Urban County Government basically parallel the state laws.

Any member of the University student body, faculty, or staff who violates these defined standards of conduct shall be subject to appropriate disciplinary action up to and including suspension and/or termination. The specifically defined standards of conduct, the disciplinary procedures, and the appropriate sanctions are detailed in the codes of student conduct and in the Administrative Regulations 6:4, and Human Resource Policy & Procedures Numbers 13.0 and 14.0).

In addition, it is a violation of state law to operate a motor vehicle while under the influence of any substance which may impair one's driving ability (drugs or alcoholic beverages).

Sanctions

Under University regulation, students who violate this standard of conduct are subject to disciplinary action from a minimum of a warning to a maximum of suspension from the University. Students who reside in University Housing are subject to further disciplinary action which may vary from a warning to termination of their housing contract.

Faculty and staff are subject to disciplinary action from a minimum of a warning to a maximum of termination from University employment.

Under state and federal drug laws, the gravity of the sanction depends on the classification of the controlled substance, the particular activity involved (possession or trafficking which includes manufacture, sale and possession with intent to sell), and whether or not multiple convictions are involved.

Specific penalties under federal and state laws for trafficking in various controlled substances are outlined in Appendix A to this policy.

Notice of Drug-Related Conviction

In compliance with the Federal Drug-Free Workplace Act of 1988, **any** employee shall notify the immediate supervisor if the employee is convicted of a criminal drug offense occurring in the workplace or while on University business within five (5) days of the conviction. The University shall take appropriate sanction and remedies in accordance within its policies. The provisions of this section are applicable to students who are employees of the University. If the employee is under a federal contract or grant, the University shall notify the contracting or granting agency of the conviction and of its actions. This section of this policy is also applicable to students who receive a Pell grant (federal grant).

Health Risks

The scope and impact of health risks from alcohol and drug abuse are both alarming and well-documented, ranging from mood-altering to life-threatening, with consequences that extend beyond the individual to family, organizations and society at large. The University of Kentucky, therefore, conducts regular programs to educate its students, faculty and staff that consumption and use of drugs may alter behavior, distort perception, impair thinking, impede judgment, and lead to physical or psychological dependence.

Alcohol and/or drugs and/or drug abuse may lead to the deterioration of physical health by causing or contributing to various health conditions including but not limited to fatigue, nausea, personal injury, insomnia, pathological organ damage, some forms of cancer, pancreatitis, heart attack, respiratory depression, birth defects, convulsions, coma, and even death. Alcohol and drug abuse may also result in deterioration of mental health by causing or contributing to various conditions such as increased aggression, hallucinations, depression, disorientation, and psychosis.

A detailed list of the effects and health risks associated with the use of many specific drugs appears as Appendix B to this policy.

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident.

Low to moderate doses of alcohol also increases the incidence of a variety of aggressive acts, including spouse and child abuse.

Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information.

Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

Training and Counseling Resources

Continuous efforts are made to make students, faculty and staff aware of the on-campus and off-campus programs which provide information and professional services on matters related to the abuse of alcohol and drugs.

Lists of sources for information and counseling for students are published in the *Kernel* regularly. Students are encouraged to contact the Dean of Students and/or the Office of Residence Life for information and appropriate referral.

Counseling is provided by such areas as the University Health Services Counseling Center, Educational, School, and Counseling Psychology, the Medical Student Support Services program (MS3), and On-Call Counselors in the residence halls system.

For faculty and staff, the REFER Counseling program provides information as to resources specifically available to employees.

Other counseling, treatment, and rehabilitation services are available in the Lexington community as well as communities throughout the state in which College of Agriculture employees are located.

- Comprehensive Care Centers offer both counseling and treatment. (Visit www.bluegrass.org for locations and contact information.)
- In the Lexington area, the number for Alcoholics Anonymous (AA) is 859-225-1212. (Check local telephone directory for listings.)
- The Chrysalis House Inc. 859-977-2501 offers long term, half-way house residential treatment for recovering chemically dependent women.
- University of Kentucky Family Center: 859-257-7755.
- REFER Counseling Program: 859-257-1467.

Many other services are available and may be located by looking in the local telephone directory yellow pages under "Social Services" or "Alcohol Abuse & Addiction – Information & Treatment" or in the section at the front of the telephone directory. Services may also be located by searching on-line.

Policy Review

This policy statement and any revisions thereto shall be distributed annually to students and employees. Distribution shall be the responsibility of the Vice President for Student Affairs and the Associate Vice President for Human Resources.

Annual Review Policy – The Vice President for Student Affairs and the Associate Vice President for Human Resources shall review and interpret policies and procedures relevant to this policy statement. These two administrators shall jointly be responsible for maintaining records of the annual review of the policy statement.

Appendix A

Federal Trafficking Penalties Schedules I, II, III, IV and V (except Marijuana)							
CSA	PENALTY		Quantity	DRUG(SCHEDULE)	Quantity	PENALTY	
	1st Offense	2nd Offense				1st Offense	2nd Offense
I and	Not less than 5 years, and not more than 40 years.	Not less than 10 years, and not more than life.	5-49 gms pure or 50-499 gms mixture	METHAMPHETAMINE (II)	50 gms or more pure or 500 gms or more mixture	Not less than 10 years, and not more than life.	Not less than 20 years, and not more than life.
			100-999 gms mixture	HEROIN (I)	1 kg or more mixture		
	If death or serious bodily injury, not less than 20 years or more than life.	If death or serious bodily injury, not less than life imprisonment.	500-4,999 gms mixture	COCAINE (II)	5 kgs or more mixture	If death or serious bodily injury, not less than 20 years, or more than life.	If death or serious bodily injury, life imprisonment.
			28-279 gms mixture	COCAINE BASE (II)	280 gms or more mixture		
	Fine of not more than \$5 million if an individual, \$25 million if not an individual.	Fine of not more than \$8 million individual, \$50 million if not an individual.	10-99 gms pure or 100-999 gms mixture	PCP (II)	100 gms or more pure or 1 kg or more mixture	Fine of not more than \$10 million if an individual, \$50 million if other not an individual.	Fine of not more than \$20 million if an individual, \$75 million if not an individual.
			1 - 9 gms mixture	LSD (I)	10 gms or more mixture		
			40-399 gms mixture	FENTANYL (IV)	400 gms or more mixture		
		10-99 gms mixture	FENTANYL ANALOGUE (I)	100 gms or more mixture		2 or More Prior Offenses: Life imprisonment. Fine of not more than \$20 million if an individual, \$75 million if not an individual.	
II	DRUG	Quantity	First Offense		Second Offense		
	Other I and II	Any	Not more than 20 years. If death or serious bodily injury, not less than 20 years or more than life. Fine \$1 million if an individual, \$5 million if not an individual.		Not more than 30 years. If death or serious bodily injury, life imprisonment. Fine \$2 million if an individual, \$10 million if not an individual.		
	Gamma Hydroxybutric Acid (GHB)	Any					
Flunitrazepam	1 gm or more						
III	All	Any	Not more than 10 years. If death or serious bodily injury, not more than 15 years. Fine of not more than \$500,000 if an individual, \$2.5 million if not an individual.		Not more than 20 years. If death or serious bodily injury, not more than 30 years. Fine of not more than \$1 million if an individual, \$5 million if not an individual.		
IV	All	Any	Not more than 5 years. Fine of not more than \$250,000 if an individual, \$1 million if not an individual.		Not more than 10 years. Fine of not more than \$500,000 if an individual, \$2 million if not an individual.		
	Flunitrazepam	less than 1 gm					
V	All	Any	Not more than 1 year. Fine of not more than \$100,000 if an individual, \$250,000 if not an individual.		Not more than 4 years. Fine of not more than \$200,000 if an individual, \$500,000 if not an individual.		

Appendix A

As of August 1, 2017

Federal Trafficking Penalties – Marijuana (Schedule I)			
Description	Quantity	First Offense	Second Offense*
Marijuana mixture containing detectable quantity*	1,000 kg or more mixture or 1,000 or more plants	Not less than 10 years, or more than life. If death or serious bodily injury, not less than 20 years, or more than life. Fine of not more than \$10 million if an individual, \$50 million if not an individual.	Not less than 20 years, or more than life. If death or serious bodily injury, life imprisonment. Fine of not more than \$20 million individual, \$75 million if not an individual.
Marijuana mixture containing detectable quantity*	100 kg to 999 kg mixture, or 100-999 plants	Not less than 5 years, or more than 40 years. If death or serious bodily injury, not less than 20 years, or more than life. Fine of not more than \$5 million if an individual, \$25 million if not an individual.	Not less than 10 years, or more than life. If death or serious bodily injury, life imprisonment. Fine of not more than \$8 million if an individual, \$50 million if not an individual.
Marijuana	50-99 kg mixture or 50 to 99 plants	Not more than 20 years. If death or serious bodily injury, not less than 20 years, or more than life. Fine of not more than \$1 million if an individual, \$5 million if not an individual.	Not more than 30 years. If death or serious bodily injury, life imprisonment. Fine of not more than \$2 million if an individual, \$10 million if not an individual.
Hashish	more than 10 kg		
Hashish Oil	more than 1 kg		
Marijuana	1-49 plants or less than 50 kg	Not more than 5 years. Fine of not more than \$250,000 if an individual, \$1 million if not an individual.	Not more than 10 years. Fine of not more than \$500,000 if an individual, \$2 million if not an individual.
Hashish	10 kg or less		
Hashish Oil	1 kg or less		

*Includes Hashish and Hashish Oil

(Marijuana is a Schedule I Controlled Substance.)

Appendix B

Controlled Substances – Uses & Effects									
DRUGS CSA SCHEDULES	COMMON OR STREET NAMES	MEDICAL USES	DEPENDENCE		USUAL METHODS OF ADMINIS- TRATION	POSSIBLE EFFECTS	EFFECTS OF OVERDOSE	WITHDRAWAL SYMPTOMS	
			Physical	Psycho- logical					
NARCOTICS									
Heroin	I	Big H, Black Tar, Chiva, Hell Dust, Horse, Negra, Smack, Thunder	None	High	High	Injected, smoked, sniffed, snorted	Slowed physical activity, constriction of the pupils, flushing of the face and neck, constipation, nausea, vomiting, slowed/rapid heartbeat and slowed breathing	Constricted (pinpoint) pupils, cold clammy skin, confusion, convulsions, extreme drowsiness slowed breathing, coma and death	Watery eyes, runny nose, yawning, and sweating
Hydromorphone	II	D, Dilies, Dust, Footballs, Juice, Smack	Analgesic	High	High	Oral, injected			
Methadone	II	Amidone, Chocolate Chip Cookies, Fizzies, Maria, Pastora, Salvia, Street Methadone, Wafer	Analgesic	High	High	Oral, injected			
Morphine	II	Dreamer, Emsel, First Line, God's Drug, Hows, MS, Mister Blue, Morf, Morpho, Unkle	Analgesic	High	High	Oral, injected			
Opium	II	Aunt Emma, Big O, Black Pill, Chandoo/Chandu Chinese Molasses, Chinese Tobacco, Toys	Analgesic	High	High	Oral, injected, smoked			
Oxycodone	II	Hillbilly Heroin, Kicker, oC, ox, Roxy, Perc, oxy	Analgesic	High	High	Oral, injected			
STIMULANTS									
Amphetamines	I	Bennies, Black Beauties, Crank, Ice, Speed, Uppers	ADHD, nasal congestion, narcolepsy	High	High	Oral, injected	Dizziness, tremors, headache, increased blood pressure and pulse rates, flushed skin, chest pain with palpitations, excessive sweating, vomiting, and abdominal cramps	Agitation, delusions, hallucinations, high fever, convulsions, difficulty breathing, cardiovascular collapse and death	Depression, anxiety, drug craving, and extreme fatigue (aka "crash")
Cocaine	II	Coca, Coke, Crack, Flake, Snow and Soda Cot	Topical local anesthetic	High	High	Injected, smoked, sniffed, snorted			
Khat	I, IV	Abysinian Tea, African Salad, Catha, Chat, Kat, Oat	None	High	High	Oral, smoked			
Methamphetamine	II	Balu, Bikers Coffee, Black Beauties, Chalk, Chicken Feed, Crank, Crystal, Glass, Go-Fast, Ice, Meth, Poor Man's Cocaine, Shabu, Shards, Speed, Stove Top, Tina, Trash, Tweak, Uppers, Yellow Bam	Obesity, ADHD	High	High	Oral, injected, smoked, sniffed, snorted			
DEPRESSANTS									
Barbiturates	II, III, IV	Barbs, Block Busters, Christmas Trees, Goof Balls, Pinks, Red Devils, Red & Blues, Yellow Jackets	Anesthetic, anticonvulsant, hypnotic, sedative	High	High	Oral, injected	Amnesia, slurred speech, loss of motor coordination, weakness, headache, lightheadedness, blurred vision, dizziness, nausea, vomiting, low blood pressure, slowed breathing	Slowed heart rate and breathing, clammy skin, weak and rapid pulse, severe sedation, unconsciousness, coma, and death	Insomnia, anxiety, tremors, increased heart rate and blood pressure, psychotic thoughts, can be life-threatening
Benzodiazepines	IV	Benzos, Downers	Sedative, anxiety, seizures	Low	Low	Oral, injected			
GHB	I, III	Easy Lay, G, Georgia Home Boy, GHB, Goop Grievous Bodily Harm, Liquid Ecstasy, Liquid X	None	High	High	Oral			
Rohypnol	IV	Circles, Forget-Me-Pill, La Rocha, Lunch Money Drug, Mexican Valium, Roaches, Rohypnol, Row-Shay, Roofies, Wolfies	None	Low	Low	Oral			

Appendix B

Controlled Substances – Uses & Effects, continued

DRUGS CSA SCHEDULES	COMMON OR STREET NAMES	MEDICAL USES	USUAL METHODS OF ADMINISTRATION	POSSIBLE EFFECTS	EFFECTS OF OVERDOSE	WITHDRAWAL SYMPTOMS	
HALLUCINOGENS							
Ecstasy/MDMA	I	Adam, Beans, Clarity, Disco Biscuit, E, Eve, Go Hug Drug, Lover's Speed, MDMA, Peace, STP, X, XTC	None	Oral, smoked, sniffed, snorted	Elevated heart rate, increased blood pressure, dilated pupils	Respiratory depression, coma, convulsions, seizures, death	Flashbacks, depression, muscle spasms, aggressive, hostile or violent behavior, high blood pressure, rapid heart rate
K2/Spice	I	Spice, K2, Blaze, RedX Dawn, Paradise, Derron, Black Magic, Crazy Clown	None	Oral, smoked, sniffed, snorted			
Ketamine	III	Cat Tranquilizer or Valium, Jet K, Kit Kat, Purple, Special K, Super K, Vitamin K	Anesthetic	Oral, injected, smoked, sniffed, snorted			
LSD	I	Acid, Blotter Acid, Dots, Mellow Yellow, Window Pane	None	Oral			
Peyote & Mescaline	I	Buttons, Cactus, Mesc, Peyoto	None	Oral, smoked			
Psilocybin	I	Magic Mushrooms, Mushrooms, Shrooms	None	Oral			
MARIJUANA / CANNABIS							
and Marijuana Concentrates - THC Extractions	I, III	Aunt Mary, Blunts, Chronic, Dope, Gangsta, Grass Hash, Herb, Indo, Joint, Mary Jane, Pot, Reefer, Weed, 710, Wax, Ear Wax, Honey Oil, Budder, BHO	None	Oral, smoked	Sedation, blood shot eyes, increased appetite, lower blood pressure, increased heart rate	Unknown	Restlessness, irritability, sleep difficulties, no appetite
STEROIDS							
	III	Arnolds, Juice, Pumpers, Roids, Stackers, Weight Gainers	Testosterone deficiency	Oral, injected, topical	Side effects include: Acne, early sexual development, stunted growth, deepened female voice, increased facial & body hair, menstrual irregularities, reduced sperm count, sterility, male pattern baldness, enlarged male breast tissue, prostate cancer		
INHALANTS							
		Gluey, Huff, Rush, Whippets	None	Sniffing, snorting, bagging, huffing	Weight loss, muscle weakness, disorientation, irritability, depression	Unconsciousness, death	Unknown
DRUGS OF CONCERN *CURRENTLY NOT REGULATED BY THE CONTROLLED SUBSTANCE ACT.							
Bath Salts*		Bliss, Blue Silk, Cloud Nine, Drone, Energy-1, Ivory Wave, Lunar Wave, MeowMeow, Ocean Burst, Pure Ivory, Purple Wave, Red Dove, Snow Leopard, Stardust, Vanilla Sky, White Dove, White Knight, White Lightening	None	Oral, injected, smoked, sniffed, snorted	Side effects include: paranoia, hypertension, hyperthermia, rapid heartbeat, sweating, teeth grinding, palpitations, seizures, hallucinations, delusions, headaches, death		
DXM*		CCC, Dex, DXM, Poor Man's PCP, Robo, Rojo Skittles, Triple C, Velvet	Cough Suppressant	Oral	Side effects include: confusion, inappropriate laughter, agitation, paranoia, hallucinations, over-excitability, lethargy, loss of coordination, slurred speech, sweating, hypertension		
Salvia Divinorum*		Maria Pastora, Sally-D, Salvia	None	Oral, smoked, vaporized	Side effects include: loss of coordination, dizziness, slurred speech, lack of coordination		

Course Descriptions

A&S Arts and Sciences

A&S 100 SPECIAL INTRODUCTORY COURSE:

TITLE TO BE ASSIGNED. (1-6)

This course permits the offering at the introductory level of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Dean of the College of Arts and Sciences. A particular title may be offered at most three times under the A&S 100 number. Students may not repeat under the same title. May be repeated to a maximum of 12 credits. Prereq: Will be set by instructor.

A&S 101 SPECIAL INTRODUCTORY COURSE:

TITLE TO BE ASSIGNED. (1-6)

This course permits the offering at the introductory level of special courses of an interdisciplinary, topical or experimental nature. Each proposal must be approved by the Dean of the College of Arts and Sciences. A particular title may be offered at most twice under the A&S 101 number. Students may not repeat under the same title. Offered pass/fail only. May be repeated to a maximum of 12 credits. Prereq: Will be set by instructor.

A&S 103 BASIC INSTRUCTION IN LESS COMMONLY

TAUGHT LANGUAGES I (Subtitle required). (3-5)

This course provides elementary language instruction with an emphasis upon the spoken language of everyday use where appropriate. Writing and the elements of grammar are gradually introduced. Students may not repeat this course under the same subtitle. Prereq: Will be set by instructor.

A&S 104 BASIC INSTRUCTION IN LESS COMMONLY

TAUGHT LANGUAGES II (Subtitle required). (3-5)

A continuation of A&S 103. Students may not repeat this course under the same subtitle. Prereq: A&S 103.

A&S 110-A&S 119 SPECIAL INTRODUCTORY COURSE

IN THE HUMANITIES (Subtitle required) (1-6)

An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Humanities requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

A&S 120-A&S 129 SPECIAL INTRODUCTORY COURSE IN THE NATURAL, PHYSICAL, OR MATHEMATICAL SCIENCES (Subtitle required) (1-6)

An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Natural, Physical, or Mathematical Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

A&S 130-A&S 139 SPECIAL INTRODUCTORY COURSE

IN THE SOCIAL SCIENCES (Subtitle required) (1-6)

An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the Social Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

#A&S 140 FOCUS: CONNECT AND RECOVER. (2)

This course is designed to assist students in preparation for the continuing academic rigors of coursework in the College of Arts and Sciences majors. Through lectures, discussions, exercises, and out-of-class assignments, A&S 140: FOCUS: Connect and Recover will enable students to actively develop and maintain skill sets and study habits based on current educational practices and research linked to increased degree completion. Thematic activities will focus on personal and professional development; goal-setting; taking action; developing relationships with students, professors, and advisors; skill development; time management; and discovering and learning how to use college and university based support resources. Prereq: Permission of instructor.

#A&S 141 ASPIRE: ACADEMICALLY SOUND PREPARATION FOR INVOLVED RESEARCH EDUCATION. (3)

This course is designed to assist students in transitioning into majors in the College of Arts and Sciences with a focus on a deeper understanding of research and liberal arts education at a tier 1 research institution. Through lectures, discussions, exercises, and out-of-class assignments, A&S 141 will enable students to actively develop and maintain skill sets and information relevant to their major and planned career path while also emphasizing the interdisciplinary nature of college learning. Prereq: A&S Major; acceptance to Academic Preparation Program.

A&S 150 YOUR CAREER AND ACADEMIC JOURNEY. (2)

This course simplifies the complex process of choosing a major by leading students through personal, academic and occupational information searches. It offers a natural progression for decision making by using thought-provoking self-exploratory activities. Whether choosing or changing a major, the discovery process examines different perspectives, such as relating interests, skills and values to academic fields of study. Once specific academic alternatives are identified, a search of occupational information helps students examine the career possibilities that specifically relate to the majors they are considering.

A&S 203 INTERMEDIATE INSTRUCTION IN LESS COMMONLY

TAUGHT LANGUAGES I (Subtitle required). (3-5)

This course provides intermediate instruction in a less commonly taught language. Development of speaking, listening, reading, and writing skills, as appropriate, will be stressed. Students may not repeat this course under the same subtitle. Prereq: A&S 104 in the same language or permission of instructor.

A&S 300 SPECIAL COURSE (Subtitle required). (1-6)

Interdisciplinary, topical or experimental courses to be approved by the Dean of the College of Arts and Sciences. A particular course may be offered at most three times under the A&S 300 number, and no A&S 300 course may be given for more than six credits per semester. Open to all University students, subject to such limits or prerequisites as set by the instructor. May be repeated to a maximum of 12 credit hours under different subtitles.

A&S 306 SPIRIT CHEMISTRY. (3)

In this course, students will explore the production of distilled spirits. The production of distilled spirits involves three basic steps: selection and processing of a carbohydrate (starch or sugar), fermentation of the carbohydrate to produce ethanol and distillation of the ethanol. In these processes, substances are produced and concentrated in the ethanol that create the unique flavors and fragrances associated with the individual spirit. Seven distilled spirits (moonshine, vodka, gin, rum, tequila, bourbon and scotch) will be discussed in detail. Prereq: Credit hours sufficient to be considered a junior or permission of the instructor.

A&S 310-A&S 319 SPECIAL COURSE IN HUMANITIES

(Subtitle required). (1-6)

An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Humanities requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

A&S 320-A&S 329 SPECIAL COURSE IN NATURAL, PHYSICAL, OR MATHEMATICAL SCIENCES (Subtitle required). (1-6)

An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Natural, Physical, or Mathematical Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

A&S 330-A&S 339 SPECIAL COURSE IN SOCIAL SCIENCES (Subtitle required). (1-6)

An interdisciplinary, topical, or experimental course which may be used toward partial fulfillment of the Social Sciences requirement in the College of Arts and Sciences. Each pilot or experimental course must be approved by the department chair and by the Dean of the College of Arts and Sciences; a particular title may be offered no more than three times under this course number. Open to all university students, subject to controlled enrollment or prerequisites as set by the instructor. May be repeated under different subtitles up to 12 SCH.

A&S 350 PERSONAL STRENGTHS AND YOUR CAREER DEVELOPMENT. (3)

This course is designed to introduce students to the fundamentals of planning and organizing career development strategies. Emphasis is placed on identification of individual goals, assessment of talents/strengths and values, exploration of career options, analysis of the job

market, effective use of employment search tools (e.g., résumés, cover letters, and interviewing), and management of career pathways. Stresses the value of the arts and sciences degree in the labor market and develops job search skills that will be useful throughout life. Prereq: Sophomore standing (30+ credits) or higher.

A&S 500 SPECIAL COURSE (Subtitle required). (1-6)

Interdisciplinary, topical, or experimental courses to be approved by the Dean of the College of Arts and Sciences and the Dean of the Graduate School. A particular course may be offered at most three times under the A&S 500 number. Open to all university students, subject to such limitations or prerequisites as set by the instructor. May be repeated to a maximum of six credits under different subtitles. Prereq: As specified by the instructor.

A-E Art Education

A-E 120 PATHWAYS TO CREATIVITY IN THE VISUAL ARTS. (3)

Students will be challenged to think creatively, expand cognitive development, perception, self-expression, and sensory awareness through research and rich studio experiences. Aesthetic knowledge and skills will provide students with a pathway to learning in art that integrates prior knowledge with new experiences which enhance creative learning through discovery, discussion, and collaboration.

A-E 200 WORKSHOP IN DESIGN EDUCATION FOR ELEMENTARY TEACHERS. (3)

A lecture-laboratory course that explores and analyzes concepts in the visual arts and examines how these concepts might be used to improve and enhance learning opportunities in the visual arts and in various disciplines for elementary students.

A-E 300 INTRODUCTION TO ART EDUCATION. (3)

This course provides an introduction to the art teaching profession with particular emphases on developing the creative, critical, collaborative, and communicative skills that are required in art teaching situations. Opportunities to gain skills will be provided through participation in group-generated projects and leadership activities. Students will engage in personal reflection and critical analysis of the teaching/learning process through journal-keeping, teacher portfolio development and creative research.

A-E 362 FIELD EXPERIENCES IN ART EDUCATION. (1-3)

A-E 362 is the first course in the Art Education professional education sequence. It gives the art education candidate the opportunity for a variety of planned experiences in the schools and other educational and community settings. Candidates will learn to identify standards and unbridled learning tools in school settings, and will develop a variety of products to demonstrate Art Education learning outcomes. 64 field experience hours are required for A-E 362. Prereq: Admission to the Teacher Education Program (TEP).

A-E 395 INDEPENDENT WORK: ART EDUCATION. (1-3)

Supervised individual research, practicum, and field experience leading to the development of art education curriculum theory, and teaching techniques appropriate for various populations and conditions. A learning contract will be submitted to both the department and to the office of the dean at the time of registration. May be repeated to a maximum of six credits. Prereq: Major and consent of instructor.

A-E 399 EXPERIENTIAL EDUCATION. (1-15)

Development of personally motivated and planned projects and internships in art education and interdisciplinary program activities outside the academic classroom experience, encompassing recreation, general education, adult education, special education, state programs, and group field experiences and workshops. May be repeated to a maximum of 15 credits. (Approval of Fine Arts dean required for more than six credits per semester.) Prereq: Recommendation of art faculty member and department chairman; completion of departmental learning agreement.

A-E 515 INTRODUCTION TO ART THERAPY. (3)

An examination of various historical and contemporary conceptions of the therapeutic function and value of art from an art education perspective. The impact of art experience on emotional, intellectual and behavioral development and/or rehabilitation will be explored through readings, discussions, guest lectures, and lab experiences. Lecture, two hours per week; laboratory, two hours per week. Prereq: PSY 331 and major or consent of instructor.

A-E 538 ADVANCED ARTS AND CRAFTS IN THE ELEMENTARY SCHOOL. (3)

Planned to give the elementary teacher an understanding of teaching methods involved in, and construction of, art activities which would enrich the classroom program.

A-E 545 TOPICAL STUDIES IN ART EDUCATION (Subtitle required). (3)

Intensive study and analysis of a designated topic, issue or development in the philosophy, history, or methodology of art education in community and public school settings. May be repeated to a maximum of six credits. Prereq: Art education major or consent of the instructor.

A-E 550 COMMUNITY ART EDUCATION. (3)

An examination of community arts organizations and the role they play in identifying and interpreting the diverse artistic make-up of the community. The course will provide students with the tools to define, locate, and research community organizations as potential sites for art programming.

A-E 560 MUSEUM EDUCATION. (3)

An examination of educational techniques and practices of learning in a museum setting. The course will focus on educational theories, learning styles and techniques, audiences, educational materials and outreach strategies that will prepare students for successful professional careers in museum education.

A-E 576 ART IN MIDDLE SCHOOLS. (3)

Centering on the study of perceptual and aesthetic development of middle school adolescents, this course provides field and practicum experiences that utilize methods and materials appropriate to the teaching of art in the middle school. Topics include: curriculum design, lesson planning, teaching skills, classroom safety and assessment. Lecture, demonstrations, micro-teaching, laboratory and studio experiences are integrated into the class design. Prereq: Major in art education, admission to the Teacher Education Program (TEP), or consent of instructor.

A-E 577 ART IN SECONDARY SCHOOLS. (3)

This course provides students with an overview of the secondary school in American education and explores the history, theory, techniques and contemporary issues of teaching art in the secondary schools. Skills in the planning of multicultural activities and the teaching and evaluation of secondary art experiences are stressed. Full class instruction, video, micro-teaching, laboratory and studio experiences are incorporated into class design. Prereq: Major in art education, admission to the Teacher Education Program (TEP).

A-E 578 ART IN ELEMENTARY SCHOOLS. (3)

Focusing on the study of perceptual and aesthetic development of elementary age children, this course provides field and practicum experiences that utilize methods and materials appropriate to the teaching of art in the elementary school. Topics include: curriculum design, lesson planning, teaching skills, classroom safety and assessment. Lecture, demonstrations, micro-teaching, laboratory and studio experiences are integrated into the class design. Prereq: Major in art education, admission to the Teacher Education Program (TEP).

A-E 579 ARTS AND HUMANITIES IN ART EDUCATION. (3)

Inquiry into the relationship of current philosophies of art education and aesthetics; a consolidation of art education ideas with a formation of criteria for making value judgments; the development of a personal viewpoint consistent with education and art as humanistic endeavors. Prereq: Major in art education, admission to the Teacher Education Program (TEP).

A-E 645 TOPICAL RESEARCH IN ART EDUCATION (Subtitle required). (3)

Advanced study and research of a designated topic, issue, or development in the philosophy, history, or methodology of art education in community and public school settings. May be repeated for a maximum of nine credits. Prereq: Graduate standing in department.

A-E 665 ISSUES IN ART EDUCATION. (3)

This course is built within the context of the Advanced Preparation Programs in Teacher Leader Programs in Art Education. Each week one or two topics representing issues facing the arts in K - 12 education will be assigned to candidates. Selected candidates are expected to research these topics and post their thoughts on them on blackboard. Fellow candidates are expected to research the topics as well and provide cogent responses to the postings of the selected candidates. The class meets once per week through adobe connect for examination and analysis of the assigned topics. Prereq: Candidates must be enrolled in one of the Advanced Teacher Leader Programs in Art Education to take this course or by instructor permission.

A-E 670 SCHOOL AND COMMUNITY ART. (3)

Analysis of the social function of art; organization of school and community related programs in art; case studies of existing programs. Field experience, educational involvement. Lectures and demonstrations. Prereq: Major in Art Education or consent of instructor.

A-E 675 AESTHETICS AND DESIGN. (3)

Aesthetics and Design focuses on advancing aesthetic awareness, developing an understanding of the principles of visual design, and the application of aesthetic design to human-computer interaction in order to integrate an artistic approach to the examination of technological innovation.

A-E 680 HISTORY OF ART EDUCATION. (3)

A-E 680 is a survey of general education practices from classical times to the present. The class will examine the teaching of art in European schools and its influence on American art education. The course will analyze the birth of American art education and significant events related to art in the schools from the 19th to the 21st century.

A-E 685 ACTION RESEARCH IN ART EDUCATION. (3)

This course is built within the context of the Advance Teacher Leader program. All students in this course are expected to integrate the design elements of their curriculum contract into their activities, field experiences, research, and action research projects. Prereq: Students must be enrolled in one of the Advanced Teacher Leader Programs in Art Education to take this course or by instructor permission.

A-E 686 TEACHER LEADERSHIP IN ART EDUCATION. (3)

This course is built within the context of the Advanced Preparation Programs in Teacher Leader Programs in Art Education. All candidates in this course are expected to integrate the design elements of their curriculum contract into their activities, field experiences, research, and action research projects. This course must be repeated for a minimum of two times for a total of six hours but can be repeated for no more than three times for a total of nine credits. Prereq: Candidates must be enrolled in one of the Advanced Preparation Teacher Leader Programs in Art Education to take this course. Candidates must also have completed A-E 685 Action Research in Art Education as a prerequisite.

A-E 695 INDEPENDENT WORK: ART EDUCATION. (1-3)
Supervised individual research, experimental practicum, and the initiation of field programs leading to the discovery and development of new knowledge in art education theory and method. A formal learning contract between student and supervising faculty member is required. May be repeated to a maximum of six credit hours. Prereq: Graduate standing in the department and consent of instructor.

A-E 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

A-H Art History

A-H 101 INTRODUCTION TO VISUAL STUDIES. (3)
The course introduces students to the concepts and techniques of visual literacy. It explores a full spectrum of man-made visual forms encountered by contemporary Americans from architecture and works of art to graphic novels, advertisements, television programs and films, photos and the Internet.

†A-H 104 AFRICAN ART AND ITS GLOBAL IMPACT.

A-H 105 WORLD ART BEFORE 1400. (3)
An introduction to the visual arts of civilizations prior to the Renaissance. Students will become familiar with selected monuments from cultures in Africa, Asia, the Pacific, the Americas and Europe, and will be able to evaluate the development of artistic practices within a tradition or comparatively between traditions.

A-H 106 RENAISSANCE TO MODERN ART. (3)
An introduction to the history of European art and its legacy from the Middle Ages to the present. Students will become familiar with major works and monuments and develop an understanding of how art has functioned and evolved in the European tradition. As an introduction to the discipline of art history, the class develops a student's ability to describe and analyze art and architecture using sophisticated terminology, and enables a student to connect works of art to specific social and historical contexts.

A-H 300 TOPICS IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3)
According to the subtitle, this course examines topics in art history and visual studies that are explicitly not limited by geographical location and/or period in history. Topics might be defined by subject matter, artistic practices and traditions, genres, and other comparable categories within art history and visual studies. May be repeated under a different subtitle for a maximum of six credits. Prereq: At least one Art History and Visual Studies course at the 100-level recommended.

A-H 301 CROSS-CULTURAL TOPICS IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3)
Depending on the subtitle, this course compares images and/or artifacts produced either in different cultural contexts or as a result of intercultural contacts and interchange. May be repeated under a different subtitle to a maximum of six credits. Prereq: At least one Art History and Visual Studies course at the 100-level recommended.

A-H 304 AFRICAN ART AND ITS GLOBAL IMPACT. (3)
Throughout history, visual arts from the African continent (architecture, sculpture, painting, body arts, textiles, photography and performance) have inspired artists from around the world. This course examines a selection of specific African art works that have shaped European and American cultural histories, and created a global modernity. The earliest examples include ancient rock art, and the most recent are comprised of installations and digital works made by African artists working abroad. Prereq: A-H 105 recommended.

A-H 308 STUDIES IN AFRICAN ARTS (Subtitle required). (3)
Depending on the subtitle, the course will focus upon arts connected to a particular period, theme, medium, or region of Africa and the African Diaspora, or examine a specific set of images, themes, theoretical positions or media originating from, or associated with, the African continent. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 104 recommended.

A-H 310 ASIAN ART AND CULTURE (Subtitle required). (3)
Depending on subtitle, a study of the art production of a particular medium, theme, period, or region in East Asia. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended.

A-H 311 THE ARTS AS SOFT POWER: THE JAPANESE TEA CEREMONY. (3)
The term "soft power" was coined by Joseph Nye, a U.S. scholar of international relations. It is used to describe forms of influence used as alternatives to "hard power" – coercive acts such as war, threats, or economic sanctions. This course will investigate how soft power was used as a tool of diplomacy thousands of years before the term was invented, and explore examples of how it is used at the beginning of the 21st century. The course then will examine the Japanese tea ceremony (known as chanoyu or chado) and its domestic use as soft power among Japanese warlords in the late sixteenth century, its adoption as a way to modernize Japanese women in the nineteenth century, and its role in shaping Japan's international image in the twentieth century. Prereq: Sophomore standing or permission of the instructor.

A-H 314 ANCIENT (Subtitle required). (3)
Study of the arts and visual cultures of the Ancient World. According to subtitles, focus may be on selected periods or media of artistic and visual production, in the context of political, social and cultural developments, from Bronze Age through the Roman Empire under Constantine. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended. (Same as CLA 314.)

A-H 323 MEDIEVAL (Subtitle required). (3)
Considers the interrelationships of art and architecture with religion, literature, politics, and other expressive forms as they shape and are shaped by medieval patrons and artists between the fourth and fifteenth century C.E., according to subtitle. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended.

A-H 334 REFRAMING RENAISSANCE ART. (3)
An exploration of Renaissance artistic production as a European phenomenon of dynamic interchange between European artistic centers, artists, and trade in works of art. Besides painting, sculpture, and architecture, the study of Renaissance visual culture is expanded to include prints and the decorative arts. While the achievements of individual artists are considered, focus is placed on the values and motives of the patrons as well as the purposes and functions of art works. Prereq: Sophomore standing or permission of the instructor.

A-H 335 EARLY MODERN ART AND VISUAL CULTURE, 1400-1700 (Subtitle required). (3)
According to the subtitle, this course examines various aspects of the social, political, cultural, and aesthetic contexts of European art and visual culture. Issues of production and reception, style and function, artist and viewer, and European interactions with non-European cultures will be considered. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 101 or A-H 106 recommended.

A-H 339 ART AND VISUAL CULTURE 1700-1840 (Subtitle required). (3)
Study of specific developments, problems, and issues pertaining to art, art practice, and art theory between 1700 and 1840. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 106 recommended.

A-H 340 ART AND VISUAL CULTURE 1840-1914 (Subtitle required). (3)
Study of specific developments, problems, and issues pertaining to art, art practice, and art theory between 1840 and 1914. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 106 recommended.

A-H 341 20TH CENTURY (Subtitle required). (3)
Depending on subtitle, this course examines aspects of 20th century art in its social, political, and aesthetic contexts. May be repeated under a different subtitle for a maximum of six credits. Prereq: A-H 106 recommended.

A-H 342 AMERICAN ART & VISUAL STUDIES (Subtitle required). (3)
According to the subtitle, this course examines various aspects of American art & visual culture in their social, political, and aesthetic contexts between the 18th and the early 21st centuries. Topics range from the traditional fine arts media to photography, advertising, film, and various forms of popular culture. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 101 or A-H 106 recommended.

A-H 343 HISTORY OF PHOTOGRAPHY. (3)
Chronological survey of the history of photography from its inception to the present day. Emphasis on fine art photography, the work and contributions of its practitioners, the relationship of photography to other art forms, general issues within the medium. Prereq: A-H 106 recommended.

A-H 350 CONTEMPORARY ART AND VISUAL STUDIES (Subtitle required). (3)
According to the subtitle, this course examines various aspects of art and visual culture in their social, political, theoretical, and aesthetic contexts after 1965. May be repeated under a different subtitle to a maximum of six credit hours. Prereq: A-H 101 or A-H 106 recommended.

A-H 360 VISUAL CULTURE OF POLITICS. (3)
The course examines specific instances of visual political discourse across a range of historic periods, cultural contexts, political positions, and media. Although a significant portion of the historic part of the course focuses on works of art and architecture, the course also examines popular print culture and political use of mass media from film to television and Internet. Some of the themes covered in the course are: symbols and symbolism of political power, imagery of specific political values, emotional appeal, political propaganda, politics of gender and race, and visual strategies of political opposition and resistance.

A-H 399 EXPERIENTIAL EDUCATION IN ART HISTORY AND VISUAL STUDIES. (1-15)
A community-based or field-based experience in Art History. A formal learning contract among student, field supervisor, and supervising faculty member required. May be repeated to a maximum of 15 hours. Prereq: Any 100-level course in Art History and Visual Studies.

A-H 501 MUSEUM STUDIES I: INTRODUCTION. (3)
An introduction to museology and the museum profession as related to a particular exhibition project. Intended for advanced students in arts related professions. Seminar format, coordinated with the University of Kentucky Art Museum staff. Prereq: Major in art history or arts administration (with art history emphasis), or consent of instructor.

A-H 502 MUSEUM STUDIES II: INTERNSHIP. (3)

A supervised internship in a professional museum setting that builds upon Museum Studies I. The focus may be on a single aspect or several areas of museum activity: administration, curatorship, education, registration and collection management, design, development, public relations, etc. Laboratory, 10 hours per week. May be repeated to a maximum of 9 credits within different contexts. Prereq: Completion of A-H 501 with a grade of B or better.

A-H 504 PRACTICAL ISSUES IN ART HISTORY (Subtitle required). (3)

This course examines art from a practical perspective. It introduces various disciplines that relate to the understanding of art, such as materials, formats, handling, display, storage, conservation, and connoisseurship. In this course, students will have the opportunity to engage firsthand with artworks, meanwhile deepening their knowledge of the background and context of the types of art examined. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing and at least one course in Art History and Visual Studies.

***A-H 510 ART HISTORY AND VISUAL STUDIES HONORS THESIS. (3)**

Faculty-sponsored research projects for Art History and Visual Studies Majors, leading to an Honors Thesis. Enrollment is offered only to outstanding undergraduate majors with a project in progress, including students who are accepted into the University Scholars Program. Topics to be determined. Prereq: A-HVS major and CFA learning contract, approved by faculty sponsor.

A-H 524 THEORY AND METHODS. (3)

According to the subtitle, the seminar will focus on different theoretical and methodological issues pertaining to art and visual studies. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing or permission of the instructor.

A-H 525 STUDIES IN GENRES AND MEDIA (Subtitle required). (3)

Study of a particular genre (type of subject, such as still life) or a particular medium (type of object, such as the icon) in the history of art. May be repeated to a maximum of 6 credits when identified by a different subtitle. Prereq: Junior standing.

A-H 526 ART AND THE ARTIST IN SOCIETY (Subtitle required). (3)

Art historical study of a topic or period with particular emphasis on artists and the social and cultural context of their roles in the production of visual art forms. May be repeated to a maximum of 6 credits when identified by a different subtitle. Prereq: Junior standing.

A-H 527 INTERDISCIPLINARY APPROACHES (Subtitle required). (3)

Study of artistic and other visual production of a period, geographical location, theme, or medium, with emphasis on its interdisciplinary connections. Depending on the topic, readings and research may engage with a wide variety of disciplines, for example, literature, music, theater, history, political science, philosophy, classics, anthropology, etc. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing or permission of instructor.

A-H 528 TOPICAL SEMINAR IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3)

An in-depth study of works of art and visual culture, the study of a specific period, geographic location, medium, or theme, or the study of ideas and/or institutions related to the use of art and other forms of visual expression in society. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing.

A-H 529 TOPICAL SEMINAR IN ARCHITECTURAL OR DESIGN HISTORY (Subtitle required). (3)

According to subtitles, seminar will focus on developments, problems, or issues in architectural or design history. Subtitle required. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Junior standing.

A-H 555 METHODS IN ART HISTORY AND VISUAL STUDIES. (3)

A seminar that reviews basic research methods used by scholars in art history, visual studies, and related fields. In addition to becoming familiar with a range of methodological approaches to the study of objects, environments, and images, students develop and refine the practical skills needed to conduct and present their research. Prereq: Junior status and at least two courses in Art History and Visual Studies at the 300-level, or permission of the instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

A-H 592 AESTHETICS. (3)

Problems of method in aesthetics; major types of aesthetic theory. Aesthetic materials of the arts, in literature, music, and the space arts. Form and types of form. Meaning in the arts. Interrelations of the arts. (Same as PHI 592.)

A-H 598 COORDINATE STUDY IN ART HISTORY AND VISUAL STUDIES. (3)

Course number for those students wishing to do advanced work on a special subject in conjunction with a regularly scheduled 300-level course in Art History and Visual Studies not previously taken by the student. May be repeated to a maximum of nine credits. Prereq: Two courses in Art History and Visual Studies or permission of the instructor.

A-H 599 EXPERIENTIAL EDUCATION IN ART HISTORY AND VISUAL STUDIES. (1-9)

Internship with a university, community, state, regional or national organization that provides practical work experience related to art history and/or visual studies. The internship is identified by the student, conducted under the supervision of the on-site supervisor, and evaluated by a faculty advisor. Students must file a learning contract with the College of Fine Arts to register

for the course. May be repeated to a maximum of nine credits. Prereq: Two art history courses at the 500-level, or graduate status, or permission of the instructor.

A-H 604 PRACTICAL PROBLEMS IN ART HISTORY: (Subtitle required). (3)

A seminar that examines art from a practical perspective. It introduces various disciplines that relate to the understanding of art, such as materials, formats, handling, display, storage, conservation, and connoisseurship. Students engage firsthand with artworks, meanwhile deepening their knowledge of the background and context of the types of art examined. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 624 THEORY AND METHODS: (Subtitle required). (3)

According to the subtitle, the seminar will focus on different theoretical and methodological issues pertaining to art and visual studies. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 625 PROBLEMS IN GENRES AND MEDIA: (Subtitle required). (3)

Study of a particular genre (type of subject), such as still life) or a particular medium (type of object, such as the icon) in the history of art. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Graduate standing.

A-H 626 THE ARTIST IN SOCIETY: (Subtitle required). (3)

Art historical study of a topic or period with particular emphasis on artists and the social and cultural context of their roles in the production of visual art forms. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Graduate standing.

A-H 627 INTERDISCIPLINARY PROBLEMS: (Subtitle required). (3)

Seminar that focuses on the artistic and other visual production of a period, geographical location, theme, or medium with an emphasis on its interdisciplinary connections. Depending on the topic, readings and research may engage with a wide variety of disciplines, for example, literature, music, theater, history, political science, philosophy, classics, anthropology, etc. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 628 ART HISTORY AND VISUAL STUDIES TOPICAL SEMINAR: (Subtitle required). (3)

In-depth study of works of art and visual culture, the study of a specific period, geographic location, medium or theme, or the study of ideas and/or institutions related to the use of art and other forms of visual expression in society. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 629 ART HISTORY TOPICAL SEMINAR IN ARCHITECTURAL OR DESIGN HISTORY (Subtitle required). (3)

According to subtitles, seminar will focus on developments, problems or issues in architectural or design history. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Graduate standing.

A-H 655 ADVANCED RESEARCH METHODS IN ART HISTORY AND VISUAL STUDIES. (3)

This course practices research methods used by scholars in art history, visual studies, and related fields. In addition to becoming familiar with a selection of methodological approaches to the study of art and images, graduate students will refine the practical skills to conduct and present their own research. Prereq: Graduate status in SAVS.

A-H 738 MASTER'S PORTFOLIO PREPARATION. (1-3)

Plan B candidates for the M.A. in Art History may use this course number to execute and receive credit for a plan of preparation for the M.A. non-Thesis Portfolio. College of Fine Arts Learning Contract required.

A-H 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

A-H 768 THESIS FORMULATION AND PREPARATION IN ART HISTORY. (3)

Independent study for art history graduate students to formulate and prepare master's thesis under the direction of their thesis advisor. A formal learning contract between student and thesis advisor is required. May be repeated to a maximum of six credits. Prereq: Art history graduate student completing thesis option (Option A).

A-H 780 INDEPENDENT WORK: ART HISTORY. (1-3)

Supervised and sustained individual research and interpretation in the history of art leading to the discovery and demonstration of new knowledge. A formal learning contract between student and supervising faculty member required. May be repeated to a maximum of six credits. Prereq: Graduate standing in the department, 18 credits in art history and consent of instructor.

A-S Art Studio

A-S 001 FOUNDATION EXHIBITION. (0)

An annual exhibition where all first-year Foundation students will select and exhibit one of their works created in a course at UK during their first year. Students will be required to select their own work, present it professionally, and provide an accompanying artist's statement. The exhibition will occur each spring semester. Grade: P or F. Prereq or concur: A-S 101, A-S 102 and A-S 130.

A-S 101 CREATIVITY PRACTICES IN ART STUDIO. (1)

This seminar course for incoming Art Studio and Art Education majors is designed to develop creative strategies and orient students to the Department and University. Through discussion, in-class exercises, and out-of-class assignments, students will gain knowledge of arts-related resources and programming at UK and in the local community. Students will acquire skills for a sustained career in the visual arts, including an introduction to professional practices and portfolio development. Art Studio and Art Education Majors only; no prerequisites.

A-S 102 TWO-DIMENSIONAL SURFACE. (3)

A broad, cross-disciplinary studio course exploring design elements and principles as the basic means of organizing two-dimensional space. Each student develops the ability to form strategies, concepts and ideas to enhance creativity and articulate personal expression.

A-S 103 THREE-DIMENSIONAL FORM. (3)

A broad, cross-disciplinary studio course exploring the elements and principles of designing in the round. Basic concepts involving three-dimensional design in visual art will be explored through discussion and the creation of spatial forms. Special emphasis will be given to the creative process in problem solving.

A-S 130 DRAWING. (3)

A broad, cross-disciplinary studio course exploring the visual language of drawing through observation. Students learn the mechanisms of visual perception, how individual components of a drawing relate to the organization of the composition as a whole. Each student develops not only observational skills rooted in traditional drawing media for realistic renderings, but also gradually builds strategies, concepts, and ideas for abstract expression.

A-S 200 INTRODUCTION TO DIGITAL ART, SPACE AND TIME. (3)

This course provides fundamental instruction in digital media as a creative tool. Students will learn the basics of digital collage, video editing and sound design. An overview of historical and contemporary digital art practice will be presented as well as elements of designs and composition. Four studio hours and one 50-minute lecture per week.

A-S 201 PROFESSIONAL PRACTICES IN ART STUDIO. (1)

This course is designed to assist Art Studio and Art Education majors in developing practical skills needed to create a successful, professional practice in the visual arts. Students are required to prepare a portfolio emphasizing written, oral, and visual presentation and documentation skills. The course will include developing resumes, artist and biographical statements, community engagement, networking, and locating exhibition opportunities. Art Studio and Art Education majors only. Prereq: A-S 101, A-S 102, A-S 103, A-S 130, and A-S 200; or consent of instructor.

A-S 245 INTRODUCTION TO WEB DESIGN. (3)

An introductory level course designed to prepare students to create web pages. Emphasis is on creating functional and aesthetic web content within the current design parameters of the Internet. Navigation strategies, directory structures and familiarity with networks is stressed. Nine studio hours per week.

A-S 270 CERAMICS FOR NON-MAJORS. (3)

This is a studio course that explores the arts and creativity through the discipline of ceramics. An overview of historical and contemporary ceramic art practices will be presented as well as the basics of design and composition. Using hand building and wheel throwing techniques, students will explore the sculptural and functional potential of clay as an object-making media. No prerequisites.

A-S 280 INTRODUCTION TO PHOTOGRAPHIC LITERACY. (3)

Students are introduced to photography, through both the study of its history and the practice of making photographs. The historical portion will focus on both photographic literacy and aesthetics. The practice will take students through various styles, genres and technical aspects of the medium.

#A-S 285 LENS ARTS. (3)

A-S 285 is an introductory course in digital image making that focuses on the still and moving image as an art practice. Students will learn the fundamentals of camera operation and still and moving image editing software in order to build an individualized portfolio. Students will be introduced to contemporary lens arts practice through research and assignments.

A-S 300 DIGITAL PHOTOGRAPHY. (3)

A-S 300 is an introductory course in digital photography as a creative tool. The primary emphasis is the practice of photography as fine art. This course also provides a thorough background in basic techniques that students may apply to any photographic discipline as well as historical and theoretical approaches to photography. Students receive technical instruction in the DSLR camera, lens choice, exposure controls, digital workflow, processing of digital files, output and presentation. Students must have a DSLR camera. Studio 9 hours per week.

A-S 305 STUDIO LIGHTING. (3)

A-S 305, Studio Lighting is an introductory course in lighting control in photography. This course provides a thorough background in basic techniques that students may apply to any discipline, with its primary emphasis upon the practice of the medium as a fine art. Students will receive technical instruction in types of lighting, exposure controls, lighting styles and working in a photographic lighting studio. Prereq: A-S 300 or consent of instructor.

A-S 310 PAINTING I. (3)

Concentrated painting experience stressing enlargement of formal understanding and personal expression. Prereq: A-S 102 and A-S 130.

A-S 311 PAINTING II. (3)

A continuation of A-S 310. Prereq: A-S 310 and consent of the instructor.

A-S 320 PRINTMEDIA: SCREENPRINT/RELIEF. (3)

Students will learn the skills necessary to create screen and relief prints. Curriculum will focus on building a working knowledge of how both analog and digital stencils can be used to create editionable images. Undertaking several projects in each medium students will explore the use of printmaking as both a fine art and graphic medium. Prereq: A-S 130 or consent of instructor.

A-S 321 PRINTMEDIA: INTAGLIO/LITHOGRAPHY. (3)

Students will learn the skills necessary to create Lithography and Intaglio prints. Curriculum will focus on building a working knowledge of how both analog and digital stencils can be used to create editionable images. Undertaking several projects in each medium students will explore the use of printmaking as both a fine art and graphic medium. Prereq: A-S 130 or consent of instructor.

A-S 322 SCREEN PRINTING. (3)

Intensive studio experience in serigraph printmaking processes and history relevant to contemporary practices in the medium. Six studio hours per week. Prereq: A-S 320.

A-S 330 INTERMEDIATE DRAWING. (3)

Continued studio experience in two-dimensional representation and abstraction using a variety of drawing materials and processes. When offered in the fall, emphasis will be on the human figure. When offered in the spring, course content will cover a broad range of traditional and experimental subjects including landscape, still lifes, collage, and mixing words with images. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 102 or consent of instructor.

A-S 331 EXPLORATION OF HUMAN FORM. (3)

Students strengthen drawing skills through observation and in experimentation with process and strategy. Students gain a better understanding of design and composition in relationship to overall outcome of drawing and explore a range of drawing materials. Prereq: A-S 102 and A-S 130.

A-S 340 INTRODUCTION TO GRAPHIC DESIGN, MEANING AND IMAGE. (3)

An introductory digital-media studio course in graphic design. Emphasis will be placed on the study of typography, illustration, and layout design, as well as the social, political, and historical impact of graphic design. Technical and theoretical issues pertinent to the field will be presented.

A-S 341 GRAPHIC DESIGN: LAYOUT. (3)

Students prepare professional quality assignments in lettering, pictogram systems, logos, and corporate identity design, line art, and cartoons for advertising illustration, as well as solutions for posters, billboards, folders, storyboards, and cover illustration. Nine studio hours per week. Prereq: A-S 340 (with a grade of B or better) and Portfolio Review.

A-S 345 WEB DESIGN. (3)

An intermediate level course designed to prepare students to create web pages. Emphasis is on creating functional and aesthetic web content within the current design parameters of the internet. Navigation strategies, directory structures and familiarity with networks is stressed. Nine studio hours per week. Prereq: A-S 200 or consent of instructor.

A-S 346 DIGITAL VIDEO. (3)

An intermediate level course in which students learn advanced video compositing methods, image control and key effects in the digital world specific to the Final Cut Pro or like environments. Basic and advanced titling and graphic animation are explored as well as storyboarding, sound design and title effects. This course explores various video editing styles. Work is collaborative and individual. Nine studio hours per week. Prereq: A-S 200 or consent of instructor.

A-S 347 MULTIMEDIA (Subtitle required). (3)

An intermediate level course that allows students to explore a variety of programming environments. Programming topics may include video, audio and/or still images with net based or physical installation based output. This class builds on students' previous experiences with digital media production and introduces programming to their tool pallet. Fundamentals of computer programming are presented, supplemented by historical readings and discussions of art theory dealing with the use of digital technologies in artistic context. Nine studio hours per week. May be repeated to a maximum of nine hours when identified under a different subtitle. Prereq: A-S 200 or consent of instructor.

A-S 348 CIRCUITS & BITS: INTRODUCTION TO HARDWARE AND SOFTWARE TOPICS IN ARTS. (3)

A broad, cross-disciplinary, intermedia studio course designed to teach students custom software creation and electronics fabrication in an art environment. Technical information is presented in conjunction with art historical and theoretical issues. Students will be introduced to a skill-set needed to create interactive artworks. Prereq: A-S 200, or junior standing (or above) in the College of Design, or consent of the instructor.

A-S 350 FIBER I. (3)

Introductory studio experience to the design and fabrication of woven and non-woven fiber art in two or three dimensions; emphasis on color, structure and related aesthetic values. Nine studio hours per week. May be repeatable up to six credit hours when identified under a different subtitle. Prereq: A-S 102 or A-S 103 or consent of instructor.

- A-S 351 FIBER II. (3)**
Continuation of A-S 350, emphasis on developing perceptual and technical skills toward increasing aesthetic involvement in two or three dimensions with woven and non-woven fiber and fabric. Nine studio hours per week. May be repeatable up to six credit hours when identified under a different subtitle. Prereq: A-S 350 or consent of instructor.
- A-S 355 INTRODUCTION TO SCULPTURE. (3)**
Emphasis is placed on learning diverse 3D techniques, tools and materials as students create sculptures dealing with movement, emotions, narrative and non-objective/abstract subject matters. Sculptural concepts are explored through individual research, critical discussions and art production. Students experiment with mixed-media, and surface finishing. Prereq: A-S 103.
- A-S 360 INTRODUCTION TO HOT METALS: FABRICATION. (3)**
Art Studio 360 is an introductory course in metal working skills, techniques and processes for producing sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: fabrication, forging and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 103 or consent of instructor.
- A-S 361 INTRODUCTION TO HOT METALS: CASTING. (3)**
Art Studio 361 is an introductory course in metal working skills, techniques and processes for producing sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: casting and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 103 or consent of instructor.
- A-S 370 CERAMICS I. (3)**
Introductory studio experience to a variety of ceramic materials and processes. Nine studio hours per week. Prereq: A-S 103 or consent of instructor.
- A-S 371 CERAMICS II. (3)**
A continuation of A-S 370. Nine studio hours per week. Prereq: A-S 370 or consent of instructor.
- A-S 380 BLACK & WHITE DARKROOM PHOTOGRAPHY. (3)**
A-S 380 is an introductory course in photography. Although it provides a thorough background in basic techniques that students may apply to any discipline, its primary emphasis is upon the practice of the medium as a fine art. Students receive technical instruction in camera and lens construction, exposure controls, processing of black and white negatives and prints, and presentation. Studio, nine hours per week.
- A-S 381 ADVANCED BLACK & WHITE DARKROOM PHOTOGRAPHY. (3)**
A-S 381 is a continuation of A-S 380. The emphasis is upon refining visual perception and basic photographic skills with an introduction to some of the more advanced techniques of black and white photography. Students receive technical instruction in the Zone System, archival processing, toning, and presentation. Studio, nine hours per week. Prereq: A-S 380 or consent of instructor.
- A-S 384 COLOR PHOTOGRAPHY I. (3)**
A-S 384 is an introductory course in color photography. The emphasis is upon the unique qualities of color photography relating to visual perception. Students receive technical instruction in negative and transparency film development and printing. Studio, nine hours per week. Prereq: A-S 380 or consent of instructor.
- A-S 385 DIGITAL METHODS FOR PHOTOGRAPHY. (3)**
An intermediate level course designed to help students integrate traditional silver-based photography processes with new digital computer imaging tools such as Adobe Photoshop or like program. Students are required to produce original photographic imagery for use in creating digital artwork output to printed material with inkjet printers. Advanced methods of input and output calibration, as well as advanced methods of image manipulation, are covered. Emphasis is placed on the aesthetics and ethics of digital photographic art and creating meaningful and effective images. Nine studio hours per week. Prereq: A-S 200 and A-S 380 or A-S 300 or permission of instructor.
- A-S 386 NONSILVER PHOTOGRAPHY I. (3)**
A-S 386 is an introductory course in nonsilver photography. The emphasis is upon the unique qualities of nonsilver photography relating to visual perception. Students receive technical instruction in the use of orthochromatic films, half-tone separations, cyanotypes, Van Dyke brown prints, and gum-bichromate prints. Studio, nine hours per week. Prereq: A-S 380 or consent of instructor.
- A-S 387 TOPICS IN PHOTOGRAPHY (Subtitle required). (3)**
An intermediate level course that allows students to explore a variety of lens based or photographic artistic topics. This class builds on students' previous experiences with photographic media. The class is supplemented by historical readings and discussion of art theory dealing with the use of photographic technology in an artistic context. Six studio hours per week. May be repeated to a maximum of nine credit hours when identified under a different subtitle. Prereq: Will be designated with subtitle or consent of instructor.
- A-S 390 TOPICAL STUDIES (Subtitle required). (3)**
Studio investigation of art forms, processes, and topics not specially treated in the regular studio course of study. Topics announced in schedule book for each semester. Nine studio hours per week. May be repeated to a maximum of 12 credits when identified by different course subtitles. Prereq: To be specified as appropriate when topic is identified.
- A-S 395 INDEPENDENT WORK: ART STUDIO. (1-3)**
Supervised individual work in Art Studio. A learning contract will be submitted both to the department and the office of the dean at the time of registration. May be repeated to a maximum of nine credits. Prereq: Art major, senior standing, grade-point average of 3.0 within the department and consent of instructor.
- A-S 396 WORKSHOP (Subtitle required). (1-6)**
Workshops in a variety of media dealing with supervised investigation of Art-Studio problems. Studio, 3-18 hours per week. May be repeated to a maximum of nine credits when identified by different subtitles. Prereq: Consent of instructor.
- A-S 398 COORDINATED STUDIES IN ART STUDIO. (3)**
Supervised independent study in conjunction with regularly scheduled upper-division classes. Coordinate study credits may not be attached to any upper-division course in which the student is concurrently enrolled. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: Art major, junior standing or above, grade-point average of 3.0 in the department.
- A-S 399 EXPERIENTIAL EDUCATION. (1-15)**
Off-campus studio experience outside the academic environment leading to significant professional growth. A formal learning contract among student, field supervisor and the department. Studio hours per week by arrangement. May be repeated to a maximum of 15 credits. Prereq: Upper division standing; written statement of objective, recommendation of a studio faculty member and the approval of the department chairperson and the Office of Experiential Education.
- A-S 480 PROFESSIONAL PRACTICES IN PHOTOGRAPHY. (3)**
A-S 480 is a seminar style class that looks at the business side of photography. Through this class students will look at different careers and business practices in the photography world. Students will work through exercises in goal setting, financial management, networking, branding, portfolio design and much more. This class is broad enough for students to feel prepared to enter numerous photographic fields after graduation. Prereq: Any two photography 300 level or above classes.
- A-S 490 SENIOR SEMINAR. (1)**
Readings and discussions in art. Selection, preparation, and presentation of senior exhibitions and portfolios. To be taken during the student's final semester of study. Two lecture hours per week. Prereq: Senior standing in Department of Art.
- A-S 510 PAINTING III. (3)**
Supervised individual development in painting. Nine studio hours per week. Prereq: A-S 311 or consent of instructor.
- A-S 511 PAINTING IV. (3)**
Continuation of A-S 510; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 510 or consent of instructor.
- A-S 520 PRINTMEDIA: TOPICS (Subtitle required). (3)**
This course will explore and discuss contemporary and future directions in print media. Students will combine traditional, digital, and post-digital matrices to create works that merge print with installation, design, animation, book-arts, or other mixed-media methods. Prereq: A-S 320 or A-S 321 or consent of instructor.
- A-S 521 PRINTMEDIA: CONTEMPORARY PRACTICES. (3)**
Students will utilize knowledge from previous print courses to develop specific projects and research that develops a professional body of work and studio practice. Prereq: A-S 520 or consent of instructor.
- A-S 530 ADVANCED DRAWING. (3)**
Supervised individual development in drawing. When offered in the Fall, emphasis will be on the human figure. When offered in the Spring, students may select from a broad range of traditional and experimental subjects. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 330 or consent of instructor.
- A-S 540 GRAPHIC DESIGN: PUBLICATION DESIGN. (3)**
Students develop innovative concepts in advertising layout and design through brochures, direct mailers, magazine and newspaper ads. Contemporary techniques in design and production emphasized. Printing techniques, and paper selection introduced as design elements. Nine studio hours per week. Prereq: A-S 341 (with a grade of B or better) and Portfolio Review.
- A-S 541 GRAPHIC DESIGN: ADVANCED DESIGN. (3)**
Provides an opportunity for the advanced study of artistic and technical solutions for graphic design problems. Prospecting for employment, working conditions, avenues for advancement, pricing work, and the legal responsibilities of the artist-designer to the client-agency discussed. Students conclude this course with the presentation of a portfolio demonstrating their ability to do quality work which meets the highest professional standards. Nine studio hours per week. Prereq: A-S 540 (with a grade of B or better) and Portfolio Review.
- A-S 546 INTERMEDIA STUDIO (Subtitle required). (3)**
An advanced course focusing on a specific area of Intermedia art production, i.e. video, installation, robotics, or digital techniques, emphasizing personal development of theoretical and skill-based foundation. May be repeated to a maximum of six credits when identified by the same subtitle and nine credits when identified by different subtitles. Nine studio hours per

week. Prereq: A-S 200 and either A-S 346 or A-S 347 or consent of instructor, or graduate enrollment.

***A-S 547 DIGITAL MEDIA PROJECTS CAPSTONE. (3)**

A culminating course that allows digital media students to propose and create large-scale, in depth projects such as short films, video installations, a complete animation, a photographic series, a 3D printing installation, a web-based research project, etc. that require time and focus to produce. 3 credit hours, may be repeated up to 9 hours. Prereq: Senior Standing, B.S. Digital Media and Design Majors.

A-S 550 FIBER III. (3)

Supervised individual development in fiber. Nine studio hours per week. Prereq: A-S 351 or consent of instructor.

A-S 551 FIBER IV. (3)

Continuation of A-S 550; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 550 or consent of instructor.

A-S 560 ADVANCED HOT METALS: FABRICATION. (3)

Art Studio 560 is an advanced level course, continuing metal working skills, techniques and processes for producing sculptural forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: fabrication, forging and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 360 or consent of instructor.

A-S 561 ADVANCE HOT METALS: CASTING. (3)

Art Studio 561 is an advance course in metal working skills, techniques and processes for production sculpture forms based on traditional and contemporary ideas. Primary emphasis is placed on metal shop orientation: casting and non-traditional materials and surfaces. Sculptural concepts are explored through individual research, critical discussions and art production. Prereq: A-S 361 or consent of instructor.

A-S 570 CERAMICS III. (3)

Supervised individual development in ceramics. Nine studio hours per week. Prereq: A-S 371 or consent of instructor.

A-S 571 CERAMICS IV. (3)

Continuation of A-S 570; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 570 or consent of instructor.

A-S 580 PHOTOGRAPHY PROJECTS I. (3)

A-S 580 is a photography based project course. The emphasis of this course is on the expansion of photographic techniques, self-expression, and long-term project development. Prereq: Any of the following: A-S 381, A-S 384, A-S 385, A-S 386, A-S 305 or consent of instructor.

A-S 581 PHOTOGRAPHY PROJECTS II. (3)

A-S 581 is a continuation of A-S 580. The emphasis of this course is advanced exploration and experimentation of photographic techniques, self-expression, and long-term project development in preparation for student's future success in independent research. May be repeated to a maximum of six credits. Prereq: A-S 580 or consent of instructor.

A-S 584 COLOR PHOTOGRAPHY II. (3)

A-S 584 is a continuation of A-S 384. The emphasis is upon advanced color photographic processes and continued acquisition of skills for self-expression through the medium. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 384 or consent of instructor.

A-S 586 NONSILVER PHOTOGRAPHY II. (3)

A-S 586 is a continuation of A-S 386. The emphasis is upon advanced nonsilver photographic processes and continued acquisition of skills for self-expression through the various media. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 386 or consent of instructor.

A-S 587 ADVANCED TOPICS IN PHOTOGRAPHY (Subtitle required). (3)

An advanced course focusing on a specific area or topic of lens based or photographic arts emphasizing personal development of theoretical, conceptual and technical skills. Six studio hours per week. May be repeated to a maximum of nine credit hours when identified under a different subtitle. Prereq: Will be designated with subtitle or consent of instructor.

A-S 596 WORKSHOP. (1-6)

Workshops in a variety of media dealing with supervised investigation of advanced art studio problems. Prereq: Consent of instructor.

A-S 610 PAINTING V. (3)

Advanced studio investigation of current ideas in painting. Exploration of contemporary and traditional procedures, materials, and issues in a context of a group discussion and review. May be repeated to a maximum of nine credits. Prereq: Graduate standing in the department and approval of the instructor.

A-S 611 PAINTING VI. (3)

Continued studio investigation of current ideas in painting, with increased concentration on critical group discussions of student work and readings in contemporary art. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: A-S 610 and consent of instructor.

A-S 620 PRINTMAKING V. (3)

Advanced studio investigation of current ideas in printmaking. Exploration of contemporary and traditional procedures, materials, and issues. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: Graduate standing in the department and consent of the instructor.

A-S 621 PRINTMAKING VI. (3)

Continued advanced studio investigation of current ideas in printmaking. Increased concentration of technical and aesthetic development in preparation for entry into the professional environment. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: A-S 620.

A-S 630 GRADUATE DRAWING. (3)

Supervised studio course in graduate-level drawing and mixed media works on paper or other two-dimensional surfaces. Emphasis will be placed on personal style, its identification, definition and further development in the context of contemporary drawing. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 646 ADVANCED INTERMEDIA STUDIO (Subtitle required). (3)

A studio course specially designed for graduate students emphasizing sustained individual, technical and theoretical work in the area of Intermedia. May be repeated to a maximum of nine credits when identified by the same subtitle. Nine studio hours. Prereq: A-S 200 and either A-S 346 or A-S 347 or consent of instructor, or graduate enrollment.

A-S 650 FIBER V. (3)

In this supervised graduate studio course in fiber, emphasis will be placed on personal style, its identification, definition, and further development in the context of major directions in the fiber arts. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 651 FIBER VI. (3)

Continued advanced studio investigation of current ideas in the fiber arts. Increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 650.

A-S 660 SCULPTURE V. (3)

In this supervised studio course in graduate sculpture, emphasis will be placed on personal style, its identification, definition, and further development in the context of modern sculpture. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 661 SCULPTURE VI. (3)

Continued advanced studio investigation of current ideas in sculpture. Increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 660.

A-S 670 CERAMICS V. (3)

In this supervised studio course in graduate ceramics, emphasis will be placed on personal style, its identification, definition, and further development in the context of direction in modern ceramics. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 671 CERAMICS VI. (3)

Continued advanced studio investigation of current ideas in ceramics, increased concentration on technical and aesthetic development, professional readings, and group discussions. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: A-S 670.

A-S 680 PHOTOGRAPHY V. (3)

A-S 680 is a continuation of A-S 581. In this supervised studio course in graduate photography, emphasis will be placed on personal style, its identification, definition, and further development in the context of major directions in photography. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 581 and consent of instructor.

A-S 681 PHOTOGRAPHY VI. (3)

A-S 681 is a continuation of A-S 680. The emphasis will be upon continued advanced studio investigation of current ideas in photography with increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 680 and consent of instructor.

A-S 687 GRADUATE TOPICS IN PHOTOGRAPHY (Subtitle Required). (3)

A studio course specially designed for graduate students emphasizing sustained individual, technical and theoretical work in a specified topical area of lens based or photographic arts. May be repeated to a maximum of nine credits when identified under a different subtitle. Six studio hours. Prereq: Graduate standing.

A-S 710 PROBLEMS IN PAINTING. (3)

Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of painting. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 720 PROBLEMS IN PRINTMAKING. (3)

Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of printmaking. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 730 PROBLEMS IN DRAWING. (3)

Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of drawing. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 740 PROBLEMS IN FIBER. (3)

Sustained individual problems and experimental work in the technical and theoretical problems of fiber. May be repeated two times to a maximum of nine credits. Nine studio hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 750 PROBLEMS IN SCULPTURE. (3)

Sustained individual problems and experimental work in the technical and theoretical problems of sculpture. May be repeated to a maximum of nine credits. Nine studio hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 767 M.F.A. STUDIO THESIS PROJECT. (1-6)

Independent research and preparation for the M.F.A. thesis exhibition. For the student working in a highly technical medium or process, the preparation of a correlated written thesis under close guidance will be the outcome. The student will be expected to know the standard forms for photographic records and the preparation of a professional portfolio. May be repeated to a maximum of six credits. Prereq: Normally taken during final semester for graduate study.

A-S 770 PROBLEMS IN CERAMICS. (3)

Sustained individual problems and experimental work in the technical and theoretical problems of ceramics. May be repeated two times for a maximum of nine credits. Nine studio hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 777 PROBLEMS IN INTERMEDIA. (3)

A studio course specially designed for independent graduate research emphasizing individual, technical and theoretical work in the area of Intermedia. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 779 PROBLEMS IN PHOTOGRAPHY. (3)

A-S 779 emphasizes sustained individual problems and experimental work in the technical and theoretical problems of photography. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 780 PROBLEMS IN DESIGN. (3)

Sustained individual problems and experimental work in the technical and theoretical problems of design. May be repeated two times for a maximum of nine credits. Nine studio hours per week. Prereq: 12 credits in upper division studio work and consent of instructor.

A-S 793 GRADUATE STUDIO SEMINAR. (3)

A studio seminar for graduate students in the studio area, in all areas of concentration. Lectures, discussion and criticism will focus on current formal and theoretical problems in the arts. Emphasis will be placed on the integration of concepts and practices arising in the different fields in the visual arts with critical discourse through monthly group critiques. Required of M.F.A. candidates every Fall semester of their residency. May be repeated to a total of 12 credits. Prereq: Graduate standing in the department.

A-S 795 INDEPENDENT RESEARCH. (1-3)

Advanced studio investigation of art forms, processes, and topics not specially treated in the regular curriculum. May be repeated to a maximum of nine credits. Studio, three hours per week per credit. Prereq: Twelve credits in upper division studio work and consent of instructor.

AAD Arts Administration

AAD 150 EXPLORING ARTS ADMINISTRATION. (3)

Exploring Arts Administration introduces the field of arts administration to students interested in investigating the connections between art, artists, and audiences through participation in class discussions, engagement with guest lectures, and attendance of arts events. The questions that drive this inquiring include: What is the work of the arts in society? What intellectual inquiry will guide me within the profession? What are the organizational structures that present the arts? And how do I begin to participate within the profession?

AAD 200 ARTS ADMINISTRATION COMMUNICATIONS. (3)

Arts Administration Communications guides students to master the primary writing styles and communication skills in the field of arts administration that they will be using throughout the remainder of their arts administration courses and into their careers. The course introduces students to different communication styles and dynamic processes through comprehending concepts and practicing skills in verbal, nonverbal, written, visual, listening, and new media communications. In addition, internal and external communication systems and styles are emphasized through concepts and practices in interpersonal, team, organizational, and community communications. Furthermore, communication issues and cultural diversity in communication styles will be explored in this course. Prereq: Completion of CIS 110 or WRD 110.

AAD 250 DIGITAL DESIGN FOR ARTS ADMINISTRATORS I. (3)

Effective visual communication has become vital for business in today's global market. AAD 250: Digital Design for Arts Administrators I will explore the powerful graphic and visual design programs of Adobe Photoshop, InDesign, Illustrator and iMovie. Students will develop

an 'eye' for design through the exploration of advanced design software, advanced design elements, and peer critiques. Students will demonstrate basic design skills through design projects for both print and the web. Prereq: Enrollment limited to AAD pre-majors prior to add/drop.

AAD 260 DIGITAL DESIGN FOR ARTS ADMINISTRATORS II. (3)

A successful organization will have a beautiful and creative online presence through the digital realms of blogging, eNewsletters, and website design. In AAD 260: Digital Design for Arts Administrators II, students will explore topics such as branding, marketing, color theory, and digital analytics. Specifically, students will learn the process of designing, building and maintaining a website that meets an organization's needs. The course will also examine the legal, philosophical, societal and technological issues relevant to delivering information in the 21st century. Prereq: Completion of AAD 200, AAD 250, CIS/WRD 111 or CIS/WRD 112, or consent of the instructor.

AAD 299 ARTS ADMINISTRATION INTERNSHIP ORIENTATION. (1)

All students in Arts Administration are required to complete 6 credit hours of internship work. Internships provide an experiential learning opportunity for students to experience real-world circumstances in the arts. AAD 299: Arts Administration Internship Orientation is designed to prepare students for their internship experience. Topics include searching for an internship, resume and cover letter construction, interviewing skills, and professionalism in the work place. Students must complete AAD 299 before they may register for internship hours. Prereq: Completion of AAD 150, 200, and 250, or consent of instructor.

AAD 300 MANAGEMENT AND PLANNING FOR THE ARTS. (3)

Arts organizations are inherently collaborative. Arts administration students need to understand the concepts and theories of leadership, management and followership in order to contribute effectively in the ever-changing and adaptive environment of arts organizations. AAD 300: Management and Planning for the Arts will explore the principles of arts management, management theory and practice, organizational structure, organizational culture and communication, decision-making and accountability, human resource management and volunteer administration, and ethics and social responsibility. Additionally, students will study the various approaches to conducting strategic planning, using SWOT analysis, as well as identification of strategic issues and the formulation of strategic plans. Prereq: AAD 150 and AAD 200.

AAD 310 MARKETING FOR THE ARTS. (3)

Connecting and communicating with current and prospective arts audiences is essential for ensuring a strong future for the arts. AAD 310: Marketing for the Arts offers an overview of marketing, advertising, and promotion for visual and performing arts institutions. Students will learn practical strategies and solutions for building audiences for the arts through market research, marketing principles, and communication techniques. Topics include audience development, market segmentation, positioning strategies, marketing plans, media coverage, and promotion techniques. Prereq: Completion of AAD 200, AAD 250, CIS/WRD 111 or CIS/WRD 112, or consent of instructor.

AAD 320 FUNDRAISING FOR THE ARTS. (3)

In the United States, a significant amount of nonprofit arts organizations' income comes from unearned revenue through fundraising. Without substantial knowledge and skills specific to fundraising in the nonprofit sector, arts organizations may not be able to sustain themselves long-term. This course prepares students to understand the function of fundraising in arts organizations and helps them pursue careers in fundraising and development within the nonprofit arts sector. Furthermore, this course will guide students through the key theories, principles, processes, and programs of fundraising. Prereq: Completion of AAD 200, AAD 250, CIS/WRD 111 or CIS/WRD 112, or consent of instructor.

AAD 350 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS I. (3)

Financial management is a core function within the management of cultural and arts organizations. It is the foundation upon which the resources (human, physical and financial) of any organization are maintained and monitored. In the nonprofit sector, the relationship of "mission to money" is an important conceptual framework, and must be understood by arts managers. Financial analysis is an essential requisite for sound strategic planning and governance, and managers of nonprofit arts organizations are the source of financial information. AAD 350: Financial Management for Arts Organizations I is the first of two courses that will guide students through the key conceptual areas of financial management. Part I includes understanding the basic principles of accounting, legal reporting requirements, reading financial statements and interpreting performance measurements. Prereq: Completion of AAD 200, AAD 300 and UK Core Quantitative and Statistical requirements or consent of the instructor.

AAD 370 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS II. (3)

Financial management is a core function within the management of cultural and arts organizations. It is the foundation upon which the resources (human, physical, and financial) of any organization are maintained and monitored. In the nonprofit sector, the relationship of "mission to money" is an important conceptual framework, and must be understood by arts managers. Financial analysis is an essential requisite for sound strategic planning and governance, and managers of nonprofit arts organizations are the source of financial information. AAD 370: Financial Management for Arts Organizations II is the second of the two financial management courses that will guide students through the key conceptual areas of financial management. Part II includes creating mission-driven budgets, developing cost-benefit analyses, managing cash flow, endowment and capital management, and understanding the use and purpose of economic impact studies. Prereq: AAD 350.

AAD 390 PROGRAMMING AND EVENT PLANNING. (3)

Arts programming and events are at the core of all arts and cultural organizations. AAD 390: Programming and Event Planning will prepare students for planning and implementing arts programs and events by considering organizational mission and vision; planning processes and logistics; collaboration and individual responsibilities; marketing and fundraising strategies, budget management; and evaluation. Students will be introduced to relevant programming theory and research methodologies for planning and evaluating arts programs. Prereq: AAD 310 and AAD 320, or consent of instructor.

#AAD 395 INDEPENDENT STUDY IN ARTS ADMINISTRATION. (1-9)

Supervised individual work in Arts Administration. Restricted to majors with a 3.2 GPA overall/ 3.5 GPA in major. A learning contract with project clearly defined must be approved by supervising faculty member, program director, and site supervisor (if applicable). May be taken up to 9 credits. Prereq: Major status; 3.2 GPA overall/3.5 in major; consent of instructor.

AAD 399 ARTS ADMINISTRATION PRACTICUM. (1)

Under the supervision of a faculty member, students complete on-campus arts administration service projects. At least one of the two projects must be in service to the student's primary art discipline's department or school. Examples of projects might include conducting a publicity campaign for an event, working on a fundraiser, producing a publication, conducting research, updating a website, etc. Pass/fail option only. Learning contract required. Prereq: Arts Administration major or consent of instructor.

AAD 402 TOPICS IN ARTS ADMINISTRATION (Subtitle required). (3)

A seminar which covers special topics in arts administration. May be repeated to a maximum of 12 credits when identified by different subtitles. Prereq: Completion of AAD 200, AAD 202 and one of the following: CIS 111 or WRD 111, or consent of instructor.

AAD 410 ARTS ENTREPRENEURSHIP. (3)

Beginning at the point of invention, Arts Entrepreneurship will move from the sketch of a shared creative idea and create impact upon our community through original arts programming built upon a shared mission. Driven by the shared belief that creativity is the seed of hope, "Art in Unlikely Places" connects inspiring artists to those most in need of the transformative powers of the arts – orphans, prisoners, the ailing, the impoverished, the elderly, and the distraught, sharing beauty with those whose lives might otherwise be absent of the hope experienced in the artistic moment. Prereq: Completion of AAD 300, AAD 390 and one or more of the following: AAD 310 and AAD 320, or consent of instructor. Students enrolled in the Certificate in Innovation and Entrepreneurial Thinking may enroll without the prerequisite courses.

AAD 420 ARTS ADMINISTRATION: PRACTICES, POLICIES AND THE LAW. (3)

Artists and arts administrators are required to work within current cultural, business and legal environments. Thus, students in AAD 420 Arts Administration: Practices, Policies and the Law will discuss cultural policy, management and legal issues that affect the arts, arts organizations and artists. Topics include cultural policy, funding, advocacy, arts and community, First Amendment rights, intellectual property, organizational structure, contracts, labor unions and employee relations. Students will analyze contemporary and historical case studies to expose the cultural, legal and business issues that frame the arts in today's society. Prereq: Completion of AAD 200 and AAD 300, or consent of instructor.

AAD 450 ARTS ADMINISTRATION SENIOR SEMINAR. (3)

As an advanced seminar course, this course prepares students to enter the job market or pursue graduate studies. It builds upon the other courses in the curriculum as well as practicum and internship experiences. During the course, students will work to revise and prepare electronic portfolios based on written and graphic materials prepared throughout their degree program. Additionally, students will write and critique cover letters and resumes and prepare for job interviews and negotiations. Prereq: Completion of all pre-major requirements, all 200 level AAD courses, AAD 300, AAD 310, AAD 320 and AAD 350. The course should be completed in the final year of a student's BA program. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

#AAD 475G MANAGING YOUR ARTISTIC CAREER. (3)

Artistic careers are exciting, dynamic and meaningful. Yet artists still require the skills and knowledge of business and industry in order to build a successful career. This course will walk you through the steps of setting your goals and the objectives that will guide you in building your career. Using the hybrid format, the course will include presentations of arts administration principles and practices as well as in-person sections tailored to students in Music, Theatre and Dance, and the Visual Arts.

AAD 499 INTERNSHIP IN ARTS ADMINISTRATION. (1-12)

AAD 499: Internship in Arts Administration is designed to provide each student with the opportunity to utilize classroom knowledge in a practical/real-world setting with the support of both an on-site supervisor and a faculty advisor. The internship experience allows students to develop skills and knowledge beyond the classroom. May be repeatable for a maximum of 12 credit hours. Prereq: Completion of AAD 299. Controlled enrollment; Arts Administration Learning Contract is required.

AAD 520 THE ARTS AND ARTISTS IN SOCIETY. (3)

The arts and artists have influenced concepts of love, war, religion, race, ethnicity and gender and helped societies face problems, celebrate accomplishments, mourn losses, beautify environments and drive economies. The course will investigate the intersection of arts and civic life. Through writing research papers, exploring topics including the intrinsic and extrinsic value

of the arts, and through analyzing social, economic and political trends, students will learn the role of the arts and artists in historical and contemporary society. Prereq: Undergraduate Arts Administration students: senior status.

AAD 540 SEMINAR IN ARTS ADMINISTRATION (Subtitle required). (3)

A seminar which covers special topics in arts administration. May be repeated to a maximum of 9 credits when identified by different subtitles.

AAD 550 GRANT WRITING FOR NONPROFIT ORGANIZATIONS. (3)

The competitive grant proposal process is the ultimate exercise in organizational capacity, yet the process itself can be elusive. In AAD 550 Grant Writing for Nonprofit Organizations, students will develop proposal writing, development and research skills. Specific topics will include writing style and format, advanced analysis of tone, institutional prospect research, program design, strategic planning, building a case for support, identifying funding sources, creating the letter of intent, evaluation, sustainability, organizational capacity, and grant writing ethics. Throughout the course, students will write a complete grant proposal for an organization of their choice.

AAD 560 TEACHING ARTISTRY FOR SCHOOL-BASED PROGRAMS. (3)

By giving students both the understanding and skills necessary to create engaging artistic experiences, AAD 560: Teaching Artistry for School-based Programs provides students preparation for reaching out to people and communities of diverse backgrounds. Participants will learn the essential skills, strategies, and processes of teaching artistry and arts education for arts organizations. Building from a historical perspective, students will practice teaching artistry by learning how to "open up works of art" and create interactive performances and art exhibits. Course content will also include classroom lesson and assessment creation as well as models of education utilized in professional arts organizations.

AAD 565 COMMUNITY ENGAGEMENT IN THE ARTS. (3)

All arts programming activities are meant to engage attendees at some level. This seminar examines various ways arts administrators provide community engagement activities within their organizations, including performing arts producing and presenting organizations, museums and art centers and other types of arts organizations. In Community Engagement in the Arts, students will discuss the risks audience members take in order to participate in the arts, why community engagement is important, types of community engagement activities, how to develop community engagement programs, and activity evaluation and assessment.

AAD 600 ARTS ADMINISTRATION TECHNOLOGIES. (3)

From brochures to web sites to video, arts organizations are investing more time and resources in effectively communicating with the public. As such, arts administrators must be skilled in utilizing current technology to convey messages. In this course, students will learn a variety of software applications that will aid in the successful creation of print materials, web sites, video and other multi-media presentations. Additionally, the course will introduce concepts of design principles and relevant theories.

AAD 610 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS. (3)

Financial management is a central function of successful arts management. It is the foundation in which human, physical and financial resources are maintained and monitored. In the nonprofit sector, the relationship of "mission to money" is a key conceptual framework that must be understood by arts managers. Arts managers are the source of financial information to both internal and external stakeholders and successful financial analysis is essential for sound strategic planning and governance. This course guides students through key topics of financial management including accounting practices, interpreting financial statements, creating mission-driven budgets, analyzing cash-flow, developing cost-benefit analyses and managing investments.

AAD 620 MANAGEMENT AND LEADERSHIP IN THE ARTS. (3)

People are the basis of arts organizations. Understanding the factors that determine individual actions and interactions, being able to solve problems, capitalize on new opportunities and reach goals is necessary for being a successful leader in a work environment. As such, this course focuses on the planned, systematic process in which applied organizational theory and behavioral science principles and practices are introduced into organizations, toward the goal of increasing organizational and individual effectiveness. The course prepares students to organize and motivate people within an arts organization, manage social environments, and execute strategic change. Topics explored include organizational design, decision-making, conflict resolution, designing effective reward systems, team building, and organizational dynamics and culture. Additionally, students will focus on reflecting upon their own leadership skills and abilities.

AAD 630 MARKETING RESEARCH AND PLANNING FOR ARTS ORGANIZATIONS. (3)

Arts managers are consistently faced with the challenge of connecting arts offerings with an audience. Understanding the possible markets and developing strategies to reach the desired audience are part of every arts organization's primary administrative activities. Throughout this course, students will explore theories and frameworks crucial to the marketing function including product development, market research, consumer behavior, brand development, pricing strategies and promotion techniques. Students will utilize the knowledge to analyze marketing strategies, investigate consumer behavior and conduct primary and secondary marketing research for an arts organization. Prereq: AAD 600.

AAD 640 PRINCIPLES OF FUNDRAISING. (3)

Most nonprofit organizations earn more than half of their annual revenue from fundraising activities, involving contributions from businesses, foundations, government and individuals. This course will examine how each of these entities are identified, contacted, courted, asked

and ultimately convinced to contribute. Students will learn practical fundraising techniques such as how to identify government and foundation granting programs, how to write successful grants to those programs, how to identify potential individual donors and solicit their contributions, and how to identify and carry out special events that lead to contributions from a variety of donors. The philosophies and theories that underlie the concept of charitable giving will also be examined, as will the ethical considerations inherent in the fundraising process. Prereq: AAD 600, AAD 610, or consent of instructor.

AAD 650 THE ARTS AND THE LAW. (3)

How does art interact with law? How does law impact artistic creation? How can arts administrators ensure that their organization legally protects itself? Understanding the legal environment in which arts organizations exist and artists create empowers arts administrators to make sound and reasoned decisions. Throughout this course, students will be exposed to a variety of legal topics related to artistic creation and the managing of arts organizations. The course will provide historical and contemporary introduction to the laws and policies, both in the United States and internationally, related to intellectual property, First Amendment, cultural property, human resource management, labor relations, immigration and cultural exchange, and contract development and enforcement.

AAD 660 SOCIAL AND CULTURAL ENTREPRENEURIALISM. (3)

Utilizing entrepreneurial concepts, social entrepreneurs use innovative solutions in order to achieve social change. Social entrepreneurialism is a burgeoning field that is garnering attention from investors, philanthropists, foundations and nonprofit leaders in order to achieve meaningful social returns while maintaining financially viable organizations. This course introduces students to the field of social entrepreneurship and explores how to start, grow and maintain successful mission-driven cultural ventures.

AAD 695 INDEPENDENT STUDY IN ARTS ADMINISTRATION. (1-6)

Supervised individual work in Arts Administration. Restricted to majors. A learning contract with project clearly defined must be approved by supervising faculty member, program director, and site supervisor (if required). May be taken up to 6 credits. Prereq: Restricted to majors.

AAD 699 INTERNSHIP IN ARTS ADMINISTRATION. (3)

Students without substantial work experience in the field of Arts Administration are required to complete three credit hours of internships in order to graduate, and must work at least 50 hours for each credit hour earned. While students are ultimately responsible for finding and completing their internships, students do receive ample support and assistance from Program faculty throughout the process. The activities to be carried out during internships must be mutually agreed upon by the student, their faculty supervisor and the host organization supervisor. Most internships are completed during the summer between the student's first and second year in the program. However, internships can also be completed during spring and fall semesters, or the summer after students have completed their regular course work.

AAD 730 MARKETING STRATEGIES AND APPLICATIONS FOR ARTS ORGANIZATIONS. (3)

Effective implementation of a marketing plan and marketing strategies brings an audience and arts organization together. In AAD 730: Marketing Strategies and Applications for Arts Organizations, students will learn the components and construction of a strategic integrated marketing communications plan. The process will allow students to make reasoned and sound marketing decisions for an arts organization based on marketing research conducted in AAD 630: Marketing Research and Planning for Arts Organizations. Additionally, students will utilize their skills in writing, graphic design, and communications to create effective marketing messages in a variety of mediums. Prereq: AAD 630.

AAD 740 FUNDRAISING TECHNIQUES. (3)

This course will explore how the basic techniques examined in AAD 640 Principles of Fundraising are organized into sophisticated annual and capital campaigns. Emphasis will be placed on goal setting, message development, use of outside consultants, prospect identification, pre-campaign testing, campaign execution, and donor follow-up. The course will also cover how these campaigns are supported by planned giving methods, databases and web-based applications, as well as related legal and ethical issues. Prereq: AAD 640.

AAD 750 CAPSTONE COURSE IN ARTS ADMINISTRATION. (3)

As the final course in the graduate program in Arts Administration, students will demonstrate their knowledge of the field through the completion of a significant research project. Students will design an independent study utilizing recognized research methodology under the guidance of their faculty advisor and graduate committee. The research findings, conclusions and recommendations will be presented as both a formal research paper and oral presentation.

AAS African American Studies

AAS 100 INTRODUCTION TO AFRICAN STUDIES. (3)

This course provides a basic overview of African histories, cultures and societies. (Same as HIS 100.)

AAS 168 ALL THAT SPEAK OF JAZZ: AN INTELLECTUAL INQUIRY INTO JAZZ AND DEMOCRACY (3)

This course is a hybrid cultural studies seminar and creative composition course that explores jazz theory as a philosophical artistic practice rooted in American democracy. It investigates jazz aesthetics as a literary, visual, and musical art form, and it examines theories of jazz

composition as philosophical statements in direct conversation with the principles of U.S. democracy. The course also explores the philosophical and aesthetic connections of jazz literature to surrealist and existentialist artistic movements in modern and postmodern cultural contexts. Artists to be discussed include James Baldwin, Harryette Mullen, and others. The theoretical aspects of this course will demonstrate how jazz has been a source of inspiration for a variety of twentieth-century literatures and theoretical practices. The readings include selections of fiction, poetry, drama, and essays with emphasis on jazz literary modes, creative trends, and political connotations specific to African American literature and culture. (Same as ENG 168.)

***AAS 200 INTRODUCTION TO AFRICAN-AMERICAN STUDIES. (3)**

An interdisciplinary course which establishes the intellectual context for an examination of the African-American experience; it introduces students to the various approaches scholars use to analyze that experience. This course employs a topical framework which permits focus on issues reflecting the diversity and richness of African-American experience across geographic boundaries. Additional costs associated with field trips may be associated with this course. It is anticipated the cost will be under \$50.

AAS 235 INEQUALITIES IN SOCIETY. (3)

This course seeks to promote an understanding of inequalities in American society by considering them in the context of the social origins, development, and persistence of inequalities in the United States and other societies. Bases of inequality that may be considered include race/ethnicity, class/status, gender/sexuality, age, political and regional differences as these relate to politics, social justice, community engagement, and/or public policy. Prereq: SOC 101 or CLD 102. (Same as SOC 235.)

AAS 253 HISTORY OF PRE-COLONIAL AFRICA. (3)

This course examines the early history of Africa, from human evolution to colonization by European powers in the late 19th century. Topics include: the development of states from kinship based forms of political organization, the political, cultural, and social transformations that accompanied African conversion to Islam, a close examination of oral epic poetry as a window into medieval empire-building in the Sahel, an extended conversation about the role of Africa in the transatlantic slave trade, and a discussion of the dilemmas faced by African rulers in the era of partition on conquest by European powers. Successful students will gain a thorough introduction to the major developments in the early history of Africa, which will serve as a solid foundation for further coursework in African history and other African studies courses. (Same as HIS 253.)

AAS 254 HISTORY OF COLONIAL AND POSTCOLONIAL AFRICA. (3)

This course is a survey of the history of Africa from the onset of colonial rule in the 1880s to the present. Its main objective is to introduce students to some of the major socio-political and economic developments that made Africa what it is today. The course will explore themes such as the European conquest of Africa and Africans' responses, African nationalism and struggles for independence, as well as post-colonial African politics and economic (under)development. (Same as HIS 254.)

AAS 260 AFRICAN AMERICAN HISTORY TO 1865. (3)

A study of the Black experience in America through the Civil War. An examination of the African heritage, slavery, and the growth of Black institutions. (Same as HIS 260.)

AAS 261 AFRICAN AMERICAN HISTORY 1865-PRESENT. (3)

This course traces the Black experience from Reconstruction to the Civil Rights Movement of the 1960's. The rise of segregation and the ghetto and aspects of race relations are examined. (Same as HIS 261.)

AAS 263 AFRICAN AND CARIBBEAN LITERATURE AND CULTURE OF FRENCH EXPRESSION IN TRANSLATION (Subtitle required). (3)

This course treats major cultural questions concerning the exchange between Africa and the Caribbean in terms of historical, sociological, political, and literary events. No knowledge of French is required. (Same as FR 263.)

AAS 264 INTRODUCTION TO BLACK WRITERS. (3)

An introduction to written and oral works by Black authors of Africa, the Caribbean, and the United States. The course includes writers such as Chinua Achebe (Africa), Wilson Harris (Caribbean), and Toni Morrison (USA), as well as others from the diverse field of literature written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core Credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 264. Prereq: Graduation Writing Requirement Course – credit is awarded to students meeting the GWR prerequisite. (Same as ENG 260.)

AAS 300 HISTORY OF JAZZ. (3)

A listening survey course covering the chronological evolution of jazz from its West African and European roots, through its germination in America, to the present. Emphasis will be on the various styles and functions of jazz, particularly as they have been affected by changing social-cultural patterns during the twentieth century. (Same as MUS 300.)

***AAS 326 CONTEMPORARY AFRICAN LIVES. (3)**

What do you think when you hear AFRICA? This course goes beyond the words, images and stereotypes that we typically learn from western news reports, popular media and mainstream descriptions of issues on the continent. Our goal will be to examine, and challenge, many of the popular portrayals of Africa, and thus build a more realistic and grounded understanding of the region. We will consider issues of geography, social organization and family life, health and food security, economy and ecology, and politics and identity. But our examination will draw from African sources and people living on the continent, as well as media built on long term engagement with the multitude of African nations. We will investigate how social, economic and global systems come together to produce the diversity of lives across the vast region. We will also discover positive, hopeful and sustainable aspects of African life with attention to local people's solutions and efforts to build the lives they want. Ultimately, we will come away with both better understanding of the complex reality of "Africa", and with analytical tools for examining other complex, but often stereotyped, issues in society more broadly. Prereq: Sophomore standing or higher. (Same as ANT 326.)

AAS 328 GEOGRAPHY OF THE MIDDLE EAST AND NORTH AFRICA. (3)

A comprehensive regional overview, emphasizing cultural adaptation to desert environments. The interrelationships among religions, cultures, and the physical environment will be examined, along with the region's position and influence in the global system. Prereq: GEO 152, GEO 160, GEO 172, or consent of instructor. (Same as GEO 328.)

AAS 336 GEOGRAPHY OF SUB-SAHARAN AFRICA. (3)

This course focuses on the cultural and environmental geographies of the subcontinent, rural landscapes and cultures and environmental problems, the historical geography of precolonial and colonial Africa, and the social geography of contemporary economic development. Prereq: GEO 130 and 152, 160, or 172. (Same as GEO 336.)

AAS 360 RACE AND SPORTS IN AMERICA. (3)

This reading seminar examines the history of race and sport in America. (Same as HIS 360.)

AAS 384 BLACK THEATRE WORKSHOP. (3)

A workshop that explores the history, literature and performance of theater artists of the African diaspora. (Same as TA 384.)

AAS 400 SPECIAL TOPICS IN AFRICAN-AMERICAN STUDIES (Subtitle required). (3)

Detailed investigation of a particular topic in African-American Studies, with emphasis both on content and existing research. Topics will vary from semester to semester and are announced the preceding semester. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Twelve hours of African-American Studies minor courses, including AAS 200.

AAS 401 INDEPENDENT READING AND RESEARCH IN AFRICAN-AMERICAN STUDIES. (3)

For African-American Studies minors. The student pursues a course of reading and research under the guidance of a staff member, completes a major research project, and takes an examination. A written contract defining the area of study is negotiated between student and instructor at the beginning of the course. May be repeated to a maximum of six credits. Prereq: African-American Studies minor, 12 hours of African-American Studies minor courses, including AAS 200.

AAS 417G SURVEY OF SUB-SAHARAN POLITICS. (3)

A survey of sub-Saharan government and politics intended to give the student broad knowledge about the setting of African politics, precolonial African political systems, the political legacies of major European colonial powers, and problems of political development. Prereq: PS 210 or 212. (Same as PS 417G.)

AAS 420 AFRICAN-AMERICAN RELIGIOUS EXPERIENCE. (3)

This course explores and examines how African Americans shaped and fashioned their religion to meet their own peculiar needs as they responded to historical occurrences.

AAS 432 RACE AND ETHNIC RELATIONS. (3)

Analysis of relationships between racial and ethnic groups and the behavioral products thereof. Sources and consequences of prejudice and discrimination. Situation and prospects of minorities. Strategies of change and tension reduction. Prereq: Six hours of social science or consent of instructor. (Same as SOC 432.)

AAS 433 TOPICS IN SOCIAL INEQUALITIES (Subtitle required). (3)

A sociological study of topics relevant to social inequalities and stratification. May be repeated under different subtitles to a maximum of six credits. Prereq: Six hours of social science or consent of instructor. (Same as SOC 435.)

AAS 471 RACE, ETHNICITY AND POLITICS. (3)

An examination of the role that race and ethnicity play in the political arena. Students will explore the nature of race, racism, and ethnocentrism, as well as their impact on political institutions and public policy. Particular attention will be given to elections, public opinion, mass media and social movements in the United States. (Same as PS 471.)

AAS 523 SOCIAL PERSPECTIVES ON RACISM AND ETHNIC PREJUDICES IN AMERICA. (2-3)

The course is designed to provide the knowledge needed in understanding the dynamics of institutional racism from a broader perspective of five specific ethnic minorities in rural and urban America. Particular emphasis is placed upon planned community change and strategies pertinent to minority group communities. Students who wish to make a special, in-depth study

of one of the specified content areas may take this course for one additional credit. Prereq: Consent of instructor. (Same as SW 523.)

AAS 535 ADVANCED TOPICS IN SOCIAL INEQUALITIES (Subtitle required). (3)

A sociological study of topics relevant to social inequalities and stratification. May be repeated to a maximum of six credits under different subtitles. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as SOC 535.)

AAS 545 PSYCHOLOGY OF THE BLACK EXPERIENCE. (3)

EDP 545, Psychology of the Black Experience, is an elective course in the Department of Educational, School, and Counseling Psychology and is cross-listed with the Africana Studies program and Psychology department. It is designed to offer enrolled undergraduate and graduate students opportunities to survey, explore, and critique classic and contemporary theories and research articulating the psychologies that inform both social and academic experiences and observed behaviors of Black people. While there are multiple objectives for this upper-level undergraduate and graduate-level seminar course, one central objective for the course is to expose all students to literature and research pertaining to the Black experience in the United States in an effort to develop and refine ideas and mindsets that will foster and reflect innovative ways of thinking about how to enhance the life experiences of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. Prereq: PSY 100 or AAS 200 or consent of the instructor. (Same as EDP 545.)

AAS 550 EDUCATION IN A CULTURALLY DIVERSE SOCIETY. (3)

This course assists future educators in developing strategies to create an equitable teaching/learning environment where all students are validated, stimulated, and nurtured. Course participants explore the rationale for their current belief systems and perceptions of other cultures; investigate how and why their personal attitudes, behaviors, and expectations affect the academic and social development of children and youth, and examine contemporary educational issues. (Same as EDC 550.)

AAS 587 THE CIVIL RIGHTS MOVEMENT IN THE U.S. SINCE 1930. (3)

This course will focus on the struggle for African American equality in the U.S. during the mid twentieth century. It will examine key civil rights issues, events, strategies, leaders and organizations on both the local and national levels. Using historical documents and documentary film presentations this course will discuss the status of race relations in America over the past fifty years. (Same as HIS 587.)

AAS 601 THEORIES, PERSPECTIVES, TRENDS AND ISSUES IN MULTICULTURAL EDUCATION. (3)

This course provides students with a critical analysis of multicultural education theories, perspectives, current issues, and trends. Students will develop the competencies needed to write scholarly literature reviews, identify areas in multicultural education needing further research studies, and submit papers for review and presentation at professional meetings. Prereq: Graduate standing, EDP 557 or consent of instructor. (Same as EDC 601.)

AAS 616 MULTICULTURAL PSYCHOLOGY. (3)

This course is designed to increase one's sensitivity to and respect for individual differences. Models, frameworks, techniques and experiential exercises are presented to increase one's skill level in working with persons from racially and ethnically diverse backgrounds. Prereq: EDP 600 or equivalent or consent of instructor. (Same as EDP 616.)

AAS 635 SEMINAR IN SOCIAL INEQUALITIES. (3)

This course provides a graduate-level introduction to sociological theory and research on social inequalities and stratification. It includes both classic and contemporary works on topics such as political economy, the state, domination, democracy, work, poverty, welfare, resistance, class, race, ethnicities, and gender. The course serves as a foundational course for graduate students with interests in social inequalities, and is required for Sociology graduate students seeking a specialization in this area. Prereq: SOC 650 or SOC 651 or consent of instructor. (Same as SOC 635.)

AAS 654 READINGS IN MODERN AFRICAN-AMERICAN HISTORY. (3)

Introduces graduate students to the historical literature on 20th century African-American history and major historiographical issues. (Same as HIS 654.)

AAS 656 BLACK AMERICAN LITERATURE. (3)

An in-depth study of black American literature, with concentration on major texts by major black writers. (Same as ENG 656.)

AAS 657 RACE RELATIONS IN THE UNITED STATES. (3)

This seminar focuses on the African American experience in the United States from Reconstruction to the present. Using primary documents and secondary readings, this course will examine the construction of race relations and the individuals, organizations, events, and issues significant to the shaping of the black experience. (Same as HIS 657.)

AAS 720 SOCIAL WORK PERSPECTIVES ON HUMAN AND CULTURAL DIVERSITY. (2)

This second required course in the human behavior and social environment sequence builds upon the foundation course. The focus of this course is upon the effects of discrimination and oppression experienced by diverse population groups with special attention to the effects of racism, sexism, ageism, classism and geography upon vulnerable groups; and upon institutionalized societal and cultural themes in diversity; with implications for social work practice. Prereq: SW 620 or advanced standing in the MSW program. (Same as SW 720.)

ABT Agricultural Biotechnology

ABT 101 INTRODUCTION TO BIOTECHNOLOGY. (1)

An introduction to biotechnology: historical perspectives, current applications and future directions. The course will consist of informal lectures and interactive discussions led by Biotechnology faculty and visiting professionals. The course will also orient students to the educational/career opportunities in Biotechnology and assist them in developing a focus for their individualized degree programs. Lecture, two hours per week. Prereq: First year or first semester transfer students in Agricultural Biotechnology. [Offered in fall only.]

ABT 120 GENETICS AND SOCIETY. (3)

This course is designed for science and non-science majors, giving students an understanding of how genetics influences and impacts our social fabric on a daily basis, and equipping students with a sufficient understanding to participate in the policy debates that are impacting our lives. The course will introduce students to the basic concepts of genetics and to the modern methodologies of molecular genetics. The course will also educate students in the process of scientific discovery and empower students with the knowledge and critical thinking skills necessary to evaluate the present and future impact of genetics on society. While the course is intended for first semester freshmen, students at all class standings are welcome to enroll. [Offered in spring only.]

ABT 201 SCIENTIFIC METHOD IN BIOTECHNOLOGY. (1)

A course designed to acquaint students with the common experimental methods used in agricultural biotechnology. Students will be presented with several case studies which demonstrate basic scientific reasoning and experimental strategies. The students will then use their understanding of basic scientific methods and agricultural systems to critically evaluate work from the current scientific literature. Each student will be required to provide a written and oral evaluation of a research project in some aspect of agricultural biotechnology. The class will provide the students with the basic skills needed for preparing their own research proposals. Prereq: ABT 101 and enrollment in the Agricultural Biotechnology degree program or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. [Offered in fall only.]

ABT 301 WRITING AND PRESENTATIONS IN THE LIFE SCIENCES. (2)

The goals of this course are to expose students to current scientific literature in the life sciences, develop skills for the evaluation of primary research literature and presentations, prepare students to write an independent research proposal, and develop oral communication skills. Student participation is a key component of activities, and students are required to provide both oral and written evaluations of research publications, presentations, and proposals. A major part of the course involves students developing, writing, and presenting an independent research proposal in coordination with a research mentor. This course should be taken prior to ABT 395 or ABT 399, and students must identify a research mentor early during the semester. Prereq: Agricultural Biotechnology major or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK. [Offered in fall and spring.]

ABT 360 GENETICS. (3)

The basic principles of heredity as currently understood from evidence accumulated in classical, cytogenetic, molecular, and quantitative genetic experiments. Emphasis is placed on a thorough understanding of genetic principles and the relationship of genetics to all biological disciplines. Prereq: BIO 148, BIO 152 and CHE 105 or consent of instructor. (Same as ENT 360.) [Offered in fall only.]

ABT 361 GENETICS LAB ONLINE. (1)

Analysis and interpretation of genetics problems using interactive computer programs. Prereq: ABT/ASC/ENT 360 (should be taken concurrently).

ABT 395 INDEPENDENT STUDY IN BIOTECHNOLOGY. (1-4)

Independent study in biotechnology under the supervision of a faculty member. May be repeated to a maximum of six credits. Prereq: Agricultural Biotechnology major and consent of appropriate instructor before registration. [Offered in fall, spring and summer II.]

ABT 399 EXPERIENTIAL LEARNING IN BIOTECHNOLOGY. (1-6)

An internship in biotechnology under the supervision of a faculty member. May be repeated for a maximum of six credits. Prereq: Consent of the instructor, chairperson for the Agricultural Biotechnology degree program and completion of a learning contract before registration. [Offered in fall, spring and summer II.]

ABT 460 INTRODUCTION TO MOLECULAR GENETICS. (3)

Molecular genetics is the study of the biochemical basis of heredity and focuses on the structure and expression of DNA at the molecular and cellular level. The course will provide a detailed understanding of the biochemical events involved in genome replication, prokaryotic and eukaryotic transcription, and translation of DNA, as well as RNA processing, recombination and the theoretical underpinnings of genetic engineering. Prereq: ABT/ENT 360 or BIO 304 or consent of instructor. (Same as ENT 460.) [Offered in spring only.]

ABT 461 INTRODUCTION TO POPULATION GENETICS. (3)

This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT

360 (or equivalent) and one course in probability/statistics. (Same as BIO/ENT/FOR 461.) [Offered in spring only.]

ABT 495 EXPERIMENTAL METHODS IN BIOTECHNOLOGY. (4)

A laboratory techniques course designed to give students the technical skills and understanding necessary to critically examine biological systems at the molecular level. The course will emphasize the principles of chemistry, biochemistry and molecular biology as applied to a model system for laboratory investigations. Laboratory, nine hours per week. Prereq: ABT/ENT 360 or BIO 304, Agricultural Biotechnology major or consent of instructor. [Offered in fall and spring.]

ABT 505 EVOLUTION IN AGRICULTURE, MEDICINE AND CONSERVATION BIOLOGY. (3)

An introduction to modern evolutionary theory with emphasis on its application to current problems in agriculture, the biomedical sciences, and conservation biology. Prereq: Genetics (ABT 360, BIO 304 or equivalent introductory genetics course). (Same as ENT 505.)

ACC Accounting

ACC 201 FINANCIAL ACCOUNTING I. (3)

This course is designed to provide an introduction to financial accounting from the users' perspectives. Its primary purposes are to promote understanding of financial accounting information for decision making purposes and to focus on financial accounting's role in communicating business results. Prereq: Successful completion of 27 semester credit hours.

ACC 202 MANAGERIAL USES OF ACCOUNTING INFORMATION. (3)

An introduction to the use of accounting data within an organization to analyze and solve problems and to make planning and control decisions. Prereq: ACC 201 or BE 161 and BE 162.

ACC 211 FINANCIAL ACCOUNTING LAB. (1)

A laboratory-based approach to introductory financial accounting applications, with the primary focus on the accounting cycle. The primary objective is to promote an understanding of how accounting information is identified, recorded, and processed for financial reporting. Prereq: ACC 201. Enrollment priority will be given to accounting and finance majors.

ACC 221 ACCOUNTING FUNDAMENTALS I. (2)

Examines the basic principles/concepts which govern the recording/reporting of accounting data. Studies the language of accounting and the accounting cycle. Establishes a framework for understanding how data is transformed into the accounting statements and how these statements are used by decision makers. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

ACC 222 ACCOUNTING FUNDAMENTALS II. (2)

Examines the preparation and use of accounting information for management decision making. Provides an understanding of various traditional and contemporary management accounting techniques used to combine and analyze data within a company. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

ACC 300 FINANCIAL ACCOUNTING II. (3)

This course is designed for non-accounting majors to provide expanded study of the impact of relevant financial accounting issues on the users of financial reporting. Topics may include financial statements; income recognition; cash and receivables; inventories; operational assets; investments; intangible assets; current liabilities; long-term liabilities emphasizing leases, pensions, postretirement benefits, and bonds; financial instruments; accounting for income taxes; and owner's equity. Not open to Accounting majors. Prereq: ACC 201 and ACC 202.

ACC 301 INTERMEDIATE ACCOUNTING I. (3)

This course is the first of a two-course financial accounting series, providing in-depth study of the accounting cycle, conceptual framework of financial accounting, valuation of balance sheet accounts, recognition of revenues, matching of expenses, and the reporting of the financial condition, operating results, and cash flows of an entity. Prereq: A grade of C or better in ACC 201 and ACC 202 or consent of the Director of the School of Accountancy.

ACC 302 INTERMEDIATE ACCOUNTING II. (3)

This course is the second of a two-course financial accounting series, providing an in-depth study of the accounting cycle, conceptual framework of financial accounting, valuation of balance sheet accounts, recognition of revenues, matching of expenses, and the reporting of the financial condition, operating results, and cash flows of an entity. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

ACC 324 ACCOUNTING INFORMATION SYSTEMS. (3)

This course focuses on two major components of accounting information systems: conceptual models and physical implementation. Accounting systems are studied from an accounting cycles perspective, emphasizing the nature and relevance of accounting internal controls and the relationship of accounting systems to the functional areas of accounting. Using contemporary information technology, students analyze, design, and implement accounting systems along with relevant internal control structures. Prereq: A grade of C or better in ACC 201 and ACC 202 or consent of the Director of the School of Accountancy.

Course Descriptions

ACC 395 INDIVIDUAL WORK IN ACCOUNTING. (1-6)

Students confer individually with the instructor. Written paper usually expected and filed in chairperson's office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

ACC 399 INTERNSHIP IN ACCOUNTING. (1)

A course designed for undergraduate accounting students who, through the Accounting Internship Director, have secured full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and for no more than two consecutive semesters, repeated to a maximum of three credits. Prereq: Junior standing in accounting and approval of the Accounting Internship Director.

ACC 403 AUDITING. (3)

This course examines the attest function in accounting. Emphasis is placed on audit standards and objectives, including the evaluation of internal control structures for the purpose of determining relevant auditing procedures. Prereq: ACC 301 and ACC 324 or consent of the Director of the School of Accountancy.

ACC 407 CONCEPTS OF INCOME TAXATION. (3)

A study of the federal income tax structure with emphasis upon the conceptual foundations of taxation relating to the three types of taxpayers: businesses, individuals, and estates and trusts. Prereq: Junior standing and ACC 202 or consent of the Director of the School of Accountancy.

ACC 410 NOT-FOR-PROFIT AND GOVERNMENTAL ACCOUNTING. (3)

This course examines accounting topics specific to not-for-profit entities and various governmental units. Emphasis is placed on the recording of usual transactions, form and content of reports, and analysis of external reports. Prereq: ACC 302 or consent of the Director of the School of Accountancy.

ACC 418 COST MANAGEMENT. (3)

Traditional and contemporary concepts and techniques that provide accounting information for management decision making at both strategic and operational levels. Topics include the costing of products and services; project and activity analysis; planning and control methods; and performance measurement. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

ACC 507 ADVANCED TOPICS IN TAXATION. (3)

A study of advanced topics in taxation, including corporate taxation, accounting for income taxes, and international tax. Prereq: ACC 302 and ACC 407 or consent of the Director of the School of Accountancy.

ACC 508 CONTROLLERSHIP. (3)

A comprehensive study of the controller's objectives, responsibilities, functions, organizational roles, etc. Prereq: ACC 418.

ACC 516 ADVANCED TOPICS IN FINANCIAL REPORTING. (3)

A comprehensive study of financial accounting and reporting issues involving business combinations, partnerships, foreign currency transactions, not-for-profit accounting and other current accounting issues. Prereq: ACC 302 or consent of the Director of the School of Accountancy.

ACC 555 FORENSIC ACCOUNTING AND FRAUD EXAMINATION. (3)

This course will cover the principles and methodology of fraud detection and deterrence. The course includes such topics as skimming, cash larceny, check tampering, register disbursement schemes, billing schemes, payroll and expense reimbursement schemes, non-cash misappropriations, corruption, fraudulent financial statements, and interviewing witnesses. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

ACC 590 SPECIAL TOPICS IN ACCOUNTING: (Subtitle required). (3)

Readings, projects, lectures and/or discussion to illuminate current topics of special interest or concern in accounting. May be repeated to a maximum of twelve credits. May not be repeated under the same title. Prereq: Consent of instructor.

ACC 601 RESEARCH IN ACCOUNTING THEORY. (3)

Critical examination of accounting concepts and standards. Study of current problems and contemporary developments reflected in accounting literature and reports. Prereq: Admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 603 ATTEST FUNCTION. (3)

A critical examination of contemporary professional attestation theory and practice including a comprehensive review of AICPA audit case studies, statements on audit procedure, and their application in simulated business situations. Prereq: ACC 403 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 605 INTERNAL AUDITING. (3)

This course provides students an understanding of the internal audit profession and the internal audit process. Topics that will be included in this course are: the professional practices framework for internal auditing, organizational governance, risk and control issues, and experience in conducting internal audit engagements. It provides the basic preparation for students to take positions in auditing, compliance, risk management and process improvement. Prereq: Graduate standing.

ACC 610 NOT-FOR-PROFIT AND REGULATORY ACCOUNTING. (3)

A study of the contemporary issues in the area of not-for-profit and regulatory accounting. Prereq: ACC 410G or consent of instructor.

ACC 617 SELECTED TOPICS IN TAXATION. (3)

A study of selected topics in taxation, including partnership taxation, tax research, and other tax topics. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 619 INDEPENDENT STUDY IN ACCOUNTING. (1-3)

Designed for students undertaking special studies to be conducted in regular consultation with the instructor. Prereq: Consent of instructor.

ACC 621 UNDERSTANDING FINANCIAL STATEMENTS. (3)

Financial statements communicate information about a business and its operations. Students will gain an understanding of the information being communicated (or not communicated) by the business entity. Emphasis is on the uses of information, rather than its preparation. Prereq: Admission to MSACC program or consent of DGS.

ACC 624 ENTERPRISE INFORMATION AND CONTROL SYSTEMS. (3)

The course simultaneously examines two issues related to enterprise information systems development: 1) methodologies for designing and implementing information systems, and 2) assessment of enterprise risk and internal control systems. Case analyses and "real world" projects are used to accomplish the course objectives. Current computer technologies, including relational database systems and internet data processing, are integrated into the course content. Prereq: ACC 324, ACC 403 and admission to MSACC program, or consent of the Director of Graduate Studies.

*ACC 628 FINANCIAL/MANAGERIAL ACCOUNTING. (3)

A study of the application of accounting information and services in the recognition or solution of management problems in business. Prereq: Graduate standing in the MBA program. ACC 201 and ACC 202, or its equivalent. Course credit will not be given to students in the MSACC program.

ACC 637 TAXATION OF FLOW-THROUGH ENTITIES. (3)

A detailed study of the income taxation of flow-through entities, including Partnerships, S corporations, and limited liability companies. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 647 MULTIJURISDICTIONAL TAXATION. (3)

A study of the taxation of taxpayers located in two or more tax jurisdictions. The course involves two major categories, international taxation and state and local taxation. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

ACC 700 TOPICAL SEMINAR IN ACCOUNTING RESEARCH (Subtitle required). (1-3)

An advanced seminar on selected topics such as cross-disciplinary research on behavioral decision-making, research using archival data, and analytical models in accounting. May be repeated to a maximum of eighteen credits. Prereq: Doctoral student status in business administration.

ACC 790 DOCTORAL COLLOQUIUM—ACCOUNTANCY. (1-2)

This course provides professional socialization for Ph.D. students in accountancy. Topics include research, teaching, and service, transition, preparation for a career as a professor, and special research topics, including lectures by noted scholars.

ACC 795 INDEPENDENT STUDY IN ACCOUNTING. (1-6)

Designed for students undertaking special studies to be conducted in regular consultation with instructor. May be repeated to a total of 12 credit hours. Prereq: Consent of instructor.

AEC Agricultural Economics

AEC 101 THE ECONOMICS OF FOOD AND AGRICULTURE. (3)

An introduction to the field of agricultural economics and some of the basic tools and concepts of decision making. Concepts are illustrated in terms of selected current social and economic issues including the role of agriculture in both a national and international dimension. Students who have completed ECO 201 are not eligible to take AEC 101 without the consent of the instructor.

AEC 300 TOPICS IN AGRICULTURAL ECONOMICS (Subtitle required). (1-3)

Study in special topics in agricultural economics. May be repeated under a different subtitle to a maximum of fifteen credits. Lecture, one to three hours; laboratory, zero to six hours per week. Prereq: ECO 201. [Offered in fall and spring.]

*AEC 301 CAREER READINESS FOR AGRICULTURAL ECONOMICS. (1)

This course examines post-graduate opportunities, expectations, and strategies in agricultural economics. Students will explore information relevant to writing resumes, completing job applications, and participating in job interviews. Prereq: Standing in Agricultural Economics and a "C" or higher in ECO 201. [Offered in fall and spring.]

AEC 302 AGRICULTURAL MANAGEMENT PRINCIPLES. (4)

A comprehensive study of economic principles and management tools useful in farm and agribusiness decision making. Utilizes a systems approach to the planning, implementation

and control of the agricultural business. Specific attention to application of management and decision theory, economic principles used in decision making, and risk management strategies. Emphasis on planning the future course of the business, acquiring and managing the necessary resources, and establishing physical and financial control over the business. Lab incorporates microeconomic applications of management principles developed in lectures. Prereq: "C" or better in ECO 201. [Offered in fall and spring.]

AEC 303 MICROECONOMIC CONCEPTS IN AGRICULTURAL ECONOMICS. (3)

Emphasis on the development of theoretical models of production and consumption economics and application of these models to problems. The importance of concepts of marginality to managers and consumers is emphasized. Role of risk and uncertainty in resource allocation is outlined. Prereq: "C" or better in ECO 201 and "C" or better in MA 123 or MA 113. [Offered in fall and spring.]

AEC 305 FOOD AND AGRICULTURAL MARKETING PRINCIPLES. (3)

Analysis of the market's role in determining prices and coordinating productive activities in the food and agricultural systems. Prereq: "C" or better in ECO 201. [Offered in fall and spring.]

AEC 306 TECHNICAL COMMUNICATION IN ECONOMICS. (2)

This course examines how to create and distribute original economic ideas in written and oral forms using appropriate digital technologies. Prereq: ECO 201; CIS/WRD 110 and 111 or equivalent; 30 credit hours of coursework. AEC 305 is a co-requisite (recommended) or prerequisite. This course fully satisfies the University's graduation composition and communication requirement (GCCR) for AGEK majors. To receive GCCR credit, students must earn an average (weighted) of "C" or better on all GCCR assignments. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

AEC 309 INTERNATIONAL AGRICULTURE, WORLD FOOD NEEDS AND U.S. TRADE IN AGRICULTURAL PRODUCTS. (3)

Present and projected world food/population balance by geographic regions; food production and world trade in agricultural products with an emphasis upon the implications for U.S. agriculture; an introduction to agricultural development problems of the less developed nations of Latin America, Africa, and Asia. Prereq: "C" or better in ECO 201. [Offered in fall only.]

AEC 311 LIVESTOCK AND MEAT MARKETING. (3)

Provides students with a unique and practical overview of the economics of the livestock and meat marketing system. Topics will include general marketing, price forecasting, price risk management, decision making, and capital investment analysis. Prereq: AEC 305. [Offered in fall only.]

AEC 314 GRAIN MARKETING. (1)

Study of production and utilization of grain by areas of the world, the marketing systems for grain, and the application of economic and marketing principles to the pricing and movement of grain. Prereq: AEC 305, AEC 321. [Offered in fall only.]

AEC 316 COOPERATIVE MANAGEMENT AND MARKETING. (1)

This course provides knowledge about the unique features of cooperatives and their role in a market economy and examines the structure organization, finance, management, and operations of cooperative organizations. Prereq: AEC 305. [Offered in fall only.]

AEC 317 MARKETING HORTICULTURAL PRODUCTS. (1)

This course examines the market structure and institutions associated with horticultural and nursery product markets within the context of formulating and evaluating alternative, firm-specific marketing strategies. Prereq: AEC 305. [Offered in fall only.]

AEC 320 AGRICULTURE PRODUCT MARKETING AND SALES. (3)

This course examines marketing activities within the U.S. food system. Sector performance is considered as well as the competitive behavior of firms within various agricultural market channels. Firm level marketing principles, methods, and strategies are considered, with a special focus on developing effective sales programs for agricultural products. Prereq: AEC 305. [Offered in fall and spring.]

AEC 321 AGRICULTURAL FUTURES MARKETS. (3)

The mechanics, theory, and practical application of hedging as related to agricultural commodities. The historical development of futures markets, functions of the futures markets, and the role of the speculator will also be explored. Prereq: AEC 303 and AEC 305. [Offered in spring only.]

***AEC 324 AGRICULTURAL LAW. (3)**

A study of legislation, administrative regulations, constitutions and court cases that have economic ramifications on agricultural and rural life. Prereq: "C" or higher in ECO 201. AEC majors who have completed AEC 325 or AEC 326 are not eligible to take AEC 324 without consent of the Director of Undergraduate Studies. [Offered in fall and spring.]

***AEC 325 EQUINE LAW. (3)**

This course examines equine law from tort and contractual perspectives dealing with basics of liability, purchase and sale, entity formation, constitutional and tax issues. Following the class, students should be able to recognize when it is necessary to retain a lawyer, but are not expected to be able to act as a lawyer. Prereq: "C" or higher in ECO 201. AEC majors who have completed AEC 324 or AEC 326 are not eligible to take AEC 325 without consent of the Director of Undergraduate Studies. [Offered in spring only.]

***AEC 326 PRINCIPLES OF ENVIRONMENTAL LAW. (3)**

Provides a basic knowledge of the principles of United States environmental law. Addresses the framework of the American Legal system as it applies to environmental regulation. Covers the sources of environmental law and reviews major federal environmental statutes and judicial decisions addressing specific issues. Prereq: "C" or higher in ECO 201. AEC majors who have completed AEC 324 or AEC 325 are not eligible to take AEC 326 without consent of the Director of Undergraduate Studies. [Offered in fall and spring.]

***AEC 340 HUMAN RESOURCE MANAGEMENT IN AGRICULTURE. (3)**

An overview of the management of the human resource in an agricultural context. Major components will include the acquisition, training, motivation, compensation, performance evaluation, and retention of the agricultural labor force. Other topics include the legal and taxation components of hired labor and working with a multi-cultural and multi-generational work force. Prereq: "C" or higher in ECO 201. [Offered in spring only.]

AEC 395 INDEPENDENT RESEARCH IN AGRICULTURAL ECONOMICS. (1-3)

Directed independent study of a selected problem. May be repeated to a maximum of six credits. Prereq: Consent of instructor or director of undergraduate studies and completion of a proposed plan of learning objectives and outcomes prior to registration. The student must have completed 60 credit hours prior to registering for AEC 395 and the student must earn a C or better in one of the following courses: AEC 303, AEC 302, or AEC 305. [Offered in fall, spring and summer.]

AEC 396 INTERNATIONAL STUDIES IN AGRICULTURAL ECONOMICS. (1)

The student will participate in a university-approved study abroad program or in an approved international study tour through the College of Agriculture or through additional international opportunities pre-approved by the director of undergraduate studies. [Offered in spring only.]

AEC 399 EXPERIENTIAL LEARNING IN AGRICULTURAL ECONOMICS. (1-6)

A field or community-based experience in the application of economics to agricultural or rural problems. May be repeated; a maximum of six credits allowed. Pass-fail only. Credit not available for the Agricultural Economics Major Requirements. Prereq: Nine hours in agricultural economics or economics, permission of instructor and department chairperson, and completion of learning agreement prior to registration. [Offered in fall, spring and summer.]

***AEC 422 AGRIBUSINESS MANAGEMENT. (3)**

Examines and analyzes decision-making tools and problem-solving techniques available to agribusiness managers. Provides learning experience in addressing contemporary economic, marketing and management issues through case study analyses, selected readings and computerized business simulations. Prereq: AEC 303, AEC 305, MGT 301, MKT 300, and either FIN 300 or AEC 441G. [Offered in fall and spring.]

AEC 425 FOREST MANAGEMENT. (4)

The principles of sustained yield forest management, management objectives, forest regulation, allowable cut, and timing of timber harvests. Students will identify management objectives for various properties and ownership types and integrate scientific knowledge and both timber and non-timber considerations with landowner objectives to derive management decisions. Prereq: Completion of the Spring Field Semester or consent of instructor. (Same as FOR 425.) [Offered in fall only.]

***AEC 441G AGRICULTURAL FINANCIAL MANAGEMENT. (3)**

Applies micro agricultural finance to farm and other agricultural business firms. Reviews elementary mathematics of finance and the objectives of financial management. Uses financial statements, cash flow analysis, financial leverage and other elements in applying the theory of capital investment for making management decisions. Prereq: AEC 303. [Offered in spring only.]

AEC 445G INTRODUCTION TO RESOURCE AND ENVIRONMENTAL ECONOMICS. (3)

Economic analysis of the problems of assuring resource availability and environmental quality. Theoretical concepts and empirical tools for evaluating resource and environmental policy. Prereq: "C" or better in ECO 201 or consent of the instructor. [Offered in fall and spring.]

***AEC 471 INTERNATIONAL TRADE. (3)**

This is advanced economic course in international trade. The first part of the course covers the basics of why countries trade, what explains the pattern of trade that we observe and what are the effects of trade on welfare and the distribution of income. The second part of the course covers issues concerning trade policy and looks at the positive and normative effects of trade policy and trade agreements as well as investigating topics of current interest. While the focus of the course is on theory, students will also be exposed to many applications of the theory as a means of both explaining the economic intuition and encouraging students to analyze the world around them from an economic perspective. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as ECO 471.) [Offered in fall and spring.]

AEC 479 PUBLIC ECONOMICS. (3)

An application of economic analysis to the study of the role of government. Emphasis is on the reasons for and the effects of government intervention in the economy. Topics covered include: market failure, public goods and externalities, welfare policy, voting and public choice, taxation, public debt and cost-benefit analysis. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as ECO 479.) [Offered in fall and spring.]

AEC 483 REGIONAL ECONOMICS. (3)

This course presents an economic approach to the study of regions. The emphasis is on the role of spatial relationships in economic activity. Topics considered include market area analysis, location theory, economic base and input-output analysis as well as regional economic development. Prereq: AEC 303. [Offered in fall only.]

AEC 490 QUANTITATIVE METHODS AND PRICE ANALYSIS. (3)

An integration of current issues in Agricultural Economics with oral and written communications, problem solving, and research. Major emphasis is on a senior paper and oral presentation. Prereq: AEC 302, 303, 305, ECO 391 and senior standing in Agricultural Economics. [Offered in fall only.]

AEC 503 PRICE THEORY AND APPLICATIONS. (3)

This course uses calculus to develop core concepts in microeconomics and show how they can be applied to agricultural and natural resource issues. A central objective of this course is to link mathematical techniques with economic analysis to show students that calculus provides an efficient way to study producer and consumer behavior. Prereq: AEC 303 and MA 113. [Offered in fall only.]

AEC 510 INTERNATIONAL TRADE AND AGRICULTURAL MARKETING. (3)

A study of institutional, economic and cultural factors that influence aggregate agricultural trade and exports of individual agribusinesses. Macro issues of agricultural trade policies are examined along with elements of international marketing for agricultural products. Prereq: AEC 303 (or equivalent) and AEC 305. [Offered in fall only.]

AEC 531 AGRICULTURAL PRICE ANALYSIS. (3)

The course links calculus-based microeconomic theory, industry-specific pricing systems, and empirical analysis of agricultural and food markets ranging from farm inputs to the consumer level. Students gain experience with tools and techniques used in empirical analysis of supply and demand. Prereq: AEC 503 and (ECO 391 or STA 570). [Offered in spring only.]

AEC 532 AGRICULTURAL AND FOOD POLICY. (3)

This course surveys a variety of current public policies that influence the agricultural and rural economies. Students are exposed to the conflicting views of those concerned with food and agricultural policy issues in an international economy. Economic principles are used to evaluate alternatives in terms of the general welfare of society. Prereq: AEC 303 and AEC 305. [Offered in spring only.]

AEC 545 RESOURCE AND ENVIRONMENTAL ECONOMICS. (3)

This is an advanced level course focused on economic analysis. It will help students frame natural resource and environmental problems so that they can be analyzed and solved. Major topic areas include water resources, fisheries, energy (and other non-renewable resources), agriculture, and pollution. Policy instruments such as pricing, emission fees, and tradable permits will be covered in detail. Prereq: AEC 303 or AEC 445G or consent of instructor. (Same as NRE 545.) [Offered in fall only.]

AEC 580 SPECIAL PROBLEMS IN AGRICULTURAL ECONOMICS. (1-3)

Directed independent study of a selected problem. May be repeated to a maximum of six credits. Prereq: Consent of instructor, director of undergraduate or graduate studies and completion of a proposed plan of learning objectives and outcomes prior to registration. [Offered in fall, spring and summer.]

AEC 590 INTRODUCTION TO QUANTITATIVE ECONOMICS I. (3)

An introduction to mathematical approaches to economic theory. Emphasis on linear models, constrained optimization, and techniques used in comparative statics. Prereq: ECO 401 and MA 113, or consent of instructor. (Same as ECO 590.) [Offered in fall only.]

AEC 606 ADVANCED AGRICULTURAL MARKETING. (3)

A critical examination of objectives and results of various types of research in market organization, marketing functions, price analysis, markets over time, space and form, market information, commodity promotion programs, quality standards, and macroeconomic linkages to marketing. Prereq: AEC 624 and ECO 601 (may be concurrent). [Offered in fall only.]

AEC 610 INTERNATIONAL TRADE IN AGRICULTURAL PRODUCTS. (3)

This course analytically examines current empirical research in the area of agricultural trade. Prereq: ECO 601, AEC 624 and ECO 671. [Offered in spring only.]

AEC 620 ADVANCED PRODUCTION ECONOMICS I. (3)

An advanced treatment of production economics with emphasis on flexible product and factor price situations, factor demand functions, multiple product production, and poly-periodic production theory. Prereq: ECO 601. [Offered in fall only.]

AEC 622 ADVANCED AGRIBUSINESS MANAGEMENT STRATEGIES. (3)

This course integrates knowledge of economics, econometrics, business administration, finance, accounting, marketing, decision making, and research methodology. The focus is on analytical skills and scholarly academic research. Prereq: AEC 422, ECO 601 or AEC 603, an introductory course in econometrics, or consent of instructor. [Offered in spring only.]

AEC 624 ADVANCED QUANTITATIVE METHODS IN AGRICULTURAL ECONOMICS. (3)

This course uses statistical tools to model agricultural and economic systems. Subjects covered include: (1) the classical linear regression model, (2) statistical hypotheses tests, and (3) estimation techniques for single and simultaneous equation models. Prereq: ECO 391, STA 291 and MA 113. [Offered in spring only.]

AEC 626 AGRICULTURE AND ECONOMIC DEVELOPMENT. (3)

Analytical consideration of the role of agriculture in economic development in relation to overall development strategy at various stages of growth. Theoretical and policy issues of particular relevance to the agricultural development in underdeveloped agrarian economies with various resource, social, political and economic systems. Prereq: ECO 473G or consent of instructor. (Same as ECO 674.) [Offered in spring only.]

AEC 640 ADVANCED AGRICULTURAL POLICY. (3)

This course focuses on development of a framework to analyze alternate paradigms of the political economy. The framework focuses on the role of institutions that modify behavior of decision makers. Agricultural and food policies are evaluated in terms of the efficient use of resources and the general welfare of society. Prereq: ECO 601 or AEC 503. [Offered in spring only.]

AEC 645 NATURAL RESOURCE ECONOMICS. (3)

Economic analysis of natural resource use and environmental issues. Discussion of criteria for public decision making, welfare economics, market failure, benefit-cost analysis, and benefit estimation, as applied to natural resources and the environment. Prereq: ECO 590 and ECO 601.

AEC 646 INTERTEMPORAL ALLOCATION OF NATURAL RESOURCES. (3)

This course teaches the application of economic theory to the analysis of solutions for current and prospective natural resource problems. Such understanding will be geared toward fashioning, selecting and implementing planning associated with land, water, air, biological and other natural resources and conservation of the natural environment in serving the needs and desires of citizens. Prereq: ECO 660 and AEC 590.

AEC 653 LOCAL ECONOMIC DEVELOPMENT. (3)

The course develops the capacity to employ the theories, practices and philosophies of economic development as applied to local areas. The primary geographic focus of the course is the rural south-east of the United States, but examples will be drawn from rural areas in other developed countries. Prereq: Graduate status in agricultural economics, public administration, economics, or consent of instructor. (Same as PA 653.) [Offered in spring only.]

AEC 661 PROGRAMMING MODELS IN AGRICULTURAL ECONOMICS. (3)

A study of some programming models useful in agricultural economics; includes an examination of the structure of the models themselves, economic interpretation of their components and their use in research in agricultural economics. Prereq: MA 416G and either AEC 620 or ECO 601. [Offered in fall only.]

AEC 662 QUANTITATIVE METHODS IN RENEWABLE AND NONRENEWABLE RESOURCE MANAGEMENT. (3)

Application of dynamic optimization methods to renewable and nonrenewable resource management. Includes problem formulation, mathematical problem solving, Matlab programming, simulations and optimal policies analysis. Case examples are used to demonstrate applicability and problem formulation in finance and general and partial equilibrium. Prereq: MA 113 and MA 162 or equivalent, and AEC 661 or equivalent. (Same as FOR 662.)

AEC 691 SOCIOLOGY OF FOOD AND AGRICULTURE. (3)

This seminar will analyze the transformation of agriculture and the food system in the historical context of increased globalization. Emphasis is given to key historical transitions, changing social relations surrounding production and consumption of food, and shifts in regulations and policy at the local, national, and/or international levels. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. and global agriculture and food economies. Prereq: Graduate standing, or consent of instructor. (Same as CLD/SOC 691.)

AEC 724 APPLIED ECONOMETRICS. (3)

This course introduces students to the econometric models, estimation procedures, and model applications in the literature. The course includes an overview of different econometric models, model estimations using Stata and SAS, discussion of agricultural and applied economics papers applying these models, and writing mini projects and a term paper with econometric applications. Topics include discrete and limited dependent variable models, panel data models, time-series models, instrumental variables, survival analysis, spatial econometrics and other special topics. Prereq: ECO 703 or consent of instructor. [Offered in spring only.]

AEC 745 ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS. (3)

This course is a graduate-level survey of environmental and natural resource economics. Students will use mathematical models and econometric analysis to address topics including externalities and other market failures, environmental policies, management of renewable and nonrenewable resources, and non-market valuation. Prereq: ECO 701 and 703 (or equivalent courses), or consent of instructor. (Same as ECO 726.) [Offered in fall only.]

AEC 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in fall, spring and summer.]

AEC 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

AEC 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two

semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in fall, spring and summer.]

AEC 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: Consent of adviser and chairperson of department. [Offered in fall, spring and summer.]

AEC 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely. Prereq: Consent of adviser and chairperson of department.

AEC 780 SPECIAL PROBLEMS IN AGRICULTURAL ECONOMICS. (1-3)
Open to graduate students who have the necessary training and ability to conduct research on a selected problem. May be repeated three times for a total of nine credits. Prereq: Consent of instructor and departmental chairperson. [Offered in fall, spring and summer.]

AEC 790 RESEARCH WORK IN AGRICULTURE ECONOMICS. (3-9)
Independent research under the direction of a faculty members and the Director of Graduate Studies. Prereq: Successful completion of written portion of AEC qualifying exam and permission of Director of Graduate Studies. [Offered in fall, spring and summer.]

AEC 796 SEMINAR (Subtitle required). (3)
An extended original investigation of a specific topic designed to give students experience in methods of research and an intensive study of a particular subject in the field of agricultural economics. May be repeated to a maximum of six credits under different subtitles. Prereq: Ph.D. applicant or candidate. [Offered in fall and spring.]

AED Agricultural Education

AED 110 INTRODUCTION TO CAREER AND TECHNICAL EDUCATION. (3)
The history, status, philosophy, and objectives of career and technical education in relation to general education. (Same as FCS 110.)

AED 362 FIELD EXPERIENCES IN CAREER AND TECHNICAL EDUCATION. (3)
Supervised experiences in schools and other agencies. Required of all Career and Technical Education majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Majors only. (Same as FCS 362.)

AED 371 ADVISING A CAREER AND TECHNICAL STUDENT ORGANIZATION. (3)
This course is designed to assist students in developing skills and competencies needed to plan, implement, advise, and evaluate a Career and Technical Student Organization as part of the total CTE program. (Same as FCS 371.)

AED 395 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION. (1-3)
Directed independent study of a selected problem in the field of career and technical education under the supervision of a faculty member. May be repeated to a maximum of 6 credit hours. Prereq: Consent of appropriate instructor. (Same as FCS 395.)

AED 399 EXPERIENTIAL LEARNING IN CAREER AND TECHNICAL EDUCATION. (1-3)
A field based learning experience in career and technical education under the supervision of a faculty member. Student must complete a learning contract which outlines the requirements agreed to by the student for successful completion of the course. Prereq: Consent of appropriate instructor. (Same as FCS 399.)

AED 580 FOUNDATIONS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)
Course focuses on the foundation of teacher development including: effective teacher characteristics, principles of teaching and learning, and preparation of lesson plans. Prereq: Admission into the Teacher Education Program. (Same as FCS 580.)

AED 583 DESIGNING CURRICULUM AND ASSESSMENT IN CAREER AND TECHNICAL EDUCATION. (3)
Instructional methodology course focused on analyzing the principles of teaching and learning to design curriculum, instruction, and assessment for formal and non-formal educational settings. (Same as FCS 583.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

AED 586 METHODS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)
Development of teaching competencies with emphasis on: discussion, demonstration, problem-solving, cooperative learning, service learning methods. Prereq: Admission into the Teacher Education Program and AED/FCS 580. (Same as FCS 586.)

AED 592 TEACHING EXPERIENCE IN CAREER AND TECHNICAL EDUCATION. (12)
Supervised experience in teaching Career and Technical Education. Requires observation, lesson plan development, and incorporation of effective teaching methods and strategies. Regularly scheduled seminars included as an integral part of course. Prereq: Admission into the Teacher Education Program and successful completion of AED/FCS 580 and AED/FCS 586. (Same as FCS 592.)

AED 671 YOUTH ORGANIZATIONS INCAREER AND TECHNICAL EDUCATION. (3)
A study of the underlying philosophy and principles for organizing and advising youth organizations in career and technical education. Emphasis on activities that will enrich and motivate the instructional programs, and develop leadership, cooperation and citizenship. (Same as FCS 671.)

AED 695 SPECIAL PROBLEMS INCAREER AND TECHNICAL EDUCATION. (3)
An independent work course for students interested in career and technical education. Students make individual investigations and report on special problems. (Same as FCS 695.)

AED 799 RESEARCH IN CAREER AND TECHNICAL EDUCATION. (1-3)
Individual research of importance to career and technical education. May be repeated to a maximum of nine credits. (Same as FCS 799.)

AEN Agricultural Engineering

AEN 103 BASIC PRINCIPLES OF SURVEYING. (2)
General use of surveying equipment, development of topographic maps, layout of engineering systems, earthwork computations, and introduction to boundary surveys for Agriculture students. This course is not available for credit to persons who have received credit in another introductory surveying course. Lecture, one hour; laboratory, three hours. Prereq: A course in trigonometry, enrollment in the College of Agriculture and/or consent of instructor.

#AEN 203 BASIC PRINCIPLES OF SURVEYING. (3)
This course provides an introduction to the basic principles of surveying, the general use of surveying equipment, and basic surveying methods. This course is not intended for students who are seeking to become licensed surveyors. Lecture, two hours; laboratory, two hours. Prereq: A minimum of high school trigonometry, and enrollment in the College of Agriculture or consent of the instructor. (Same as TSM 203.)

AEN 220 PRINCIPLES OF INTERNAL COMBUSTION ENGINES. (3)
Principles of selection of internal combustion engines. Operating principles of internal combustion engines including fuel injection, ignition, lubrication, and maintenance. Power transmission application and efficiency are considered. Lecture, two hours per week; lab, two hours per week. (Same as TSM 220.)

AEN 252 FABRICATION AND CONSTRUCTION FOR TECHNICAL SYSTEMS. (3)
Lecture, 1 hour; laboratory 4 hours. Wood and metal work, including reading engineering drawings, welding, power woodworking tools, soldering and pipe work. Prereq: Major in agricultural education, or Individualized Agriculture Curriculum (TSM), or a minor in TSM, or consent of instructor. (Same as TSM 252.)

AEN 263 AGRICULTURAL SAFETY AND HEALTH. (3)
The course provides an overview of major safety and health hazards in agricultural production (farms) and of the basic approaches to prevention of agricultural injuries and illnesses.

AEN 340 PRINCIPLES OF FOOD ENGINEERING. (4)
The functional requirements and principles of operation of systems for the handling and processing of food and agricultural products are studied. The areas covered are mass and energy balances, fluid mechanics, heat transfer, refrigeration, food freezing, evaporation, drying and special topics such as extrusion and microwave heating. Prereq: Completion of PHY 211 and MA 123 or MA 113 or MA 137 and junior standing in Food Science major or Technical Systems Management option in AICU. (Same as TSM 340.)

AEN 341 BREWING SCIENCE AND TECHNOLOGY. (3)
Introduction to the science and technology associated with the brewing of beer. Topics will include the history of beer, varieties of beer, and production of beer. Within the discussions about the production of beer, the effect of raw materials, processing, microbiology, and storage on the taste and appearance of the beer will be studied. The class will also cover beer appreciation and sensory perception, which will complement the discussions of science and technology in the production of beer. Prereq: All students must be 21 by the first day of class. (Same as TSM 341.)

AEN 461G BIOMETEOROLOGY. (3)
An introduction to the impact and relationship of the atmosphere on living organisms. Emphasis on the practical application of meteorology to everyday problems within the biosphere. Weather analysis, interpretation, psychometrics of the atmosphere, and the impact of weather and climate on animals, plants and man are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: Junior, Senior, or Graduate standing. (Same as TSM 461G.)

AEN 462 RESIDENTIAL AND COMMERCIAL IRRIGATION DESIGN. (3)
The utilization of hydraulic principles in the design, assimilation, installation and operation of residential and commercial irrigation systems in applications which emphasize water conservation, nutrient management and environmental protection. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

AFS Air Force Studies

AFS 111 AEROSPACE STUDIES I. (1)

A course designed to provide the student with a basic understanding of the nature and principles of war, national power, and the Department of Defense role in the organization of national security. The student also develops leadership abilities by participating in a military organization, the cadet corps, which offers a wide variety of situations demanding effective leadership.

AFS 112 LEADERSHIP LABORATORY I. (1)

A course designed for development of basic skills required to be a manager, including communications, human relations, and administration of equal opportunity. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 111.

AFS 113 AEROSPACE STUDIES I. (1)

A course designed to provide the student with a basic understanding of the contribution of aerospace power to the total U.S. strategic offensive and defensive military posture. The student also develops leadership abilities by participating in a military organization, the cadet corps, which offers a wide variety of situations demanding effective leadership. Prereq: AFS 111.

AFS 114 LEADERSHIP LABORATORY I. (1)

A continuation of AFS 113. A course designed to develop managerial skills including superior/subordinate relationships, communications, customs and courtesies, basic drill movements and career progression requirements. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 113.

AFS 211 AEROSPACE STUDIES II. (1)

Introduces the study of air power from a historical perspective; focuses on the development of air power into a primary element of national security. Leadership experience is continued through active participation in the cadet corps. Lecture, one hour; leadership laboratory, one hour. Prereq: AFS 111, 113 or PAS approval.

AFS 212 LEADERSHIP LABORATORY II. (1)

A course designed for development of advanced skills required to be a manager/leader, including leadership styles, public speaking, group dynamics, motivation and preparation for field training. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 211.

AFS 213 AEROSPACE STUDIES II. (1)

Provides a foundation for understanding how air power has been employed in military and non-military operations to support national objectives. Examines the changing mission of the defense establishment, with particular emphasis on the United States Air Force. Leadership experience is continued through participation in the cadet corps. Lecture, one hour; leadership laboratory, one hour per week. Prereq: AFS 111, 113 or PAS approval.

AFS 214 LEADERSHIP LABORATORY II. (1)

A continuation of AFS 213. A course designed to develop supervisory management skills to include communications, techniques of critique, social actions, personnel evaluation procedures, problem solving, role playing and field training preparation. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 213.

AFS 311 AEROSPACE STUDIES III. (3)

A study of management functions with emphasis on the individual as a manager in an Air Force environment. Individual motivational and behavioral process, communication, and group dynamics are included to provide a foundation for the development of professional skills as an Air Force Officer. Students refine their leadership and managerial abilities by organizing and managing a quasi-military unit. Prereq: Acceptance into POC or approval of PAS.

AFS 312 LEADERSHIP LABORATORY IIIA. (1)

A course designed and focused on developing advanced leadership skills. Students fill the mid-level management function within the cadet corps. The course involves the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other written and oral communications. Pass/Fail only. Coreq: AFS 311.

AFS 313 AEROSPACE STUDIES III. (3)

A study of leadership with specific emphasis on the Air Force leader. Includes theoretical, professional and communicative aspects. In addition, military justice and administrative law are discussed within the context of the military organization. Students continue to develop and refine their leadership abilities by organizing and managing a military unit, the cadet corps, which offers a wide variety of situations requiring effective leadership. Prereq: AFS 311.

AFS 314 LEADERSHIP LABORATORY III. (1)

Laboratory to accompany AFS 313. Pass/fail only. Coreq: AFS 313.

AFS 395 INDEPENDENT AEROSPACE STUDIES. (2-6)

A study of an advanced problem on a subject area in aeronautical science under the guidance of a departmental staff member. One discussion per week; term paper is required. May not be repeated. Prereq: Senior standing in the AFROTC Program, and 3.0 standing in Aerospace Studies.

AFS 411 AEROSPACE STUDIES IVA. (3)

A study of the military profession, civil-military interaction, communicative skills, framework of defense policy, and formulation of defense strategy. Students refine their leadership abilities

by organizing and managing a military unit, the cadet corps, which offers a wide variety of situations requiring effective leadership. Prereq: AFS 313, or approval of PAS.

AFS 412 LEADERSHIP LABORATORY IVA. (1)

A course designed and focused on developing advanced leadership skills. Students fill the top level management function within the cadet corps. The course involves the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other written and oral communications. The lab also includes practice of leadership techniques aimed at motivating and instructing cadets in the lower three levels. Pass/Fail only. Laboratory, two hours per week. Coreq: AFS 411.

AFS 413 AEROSPACE STUDIES IVB. (3)

Continues the study of strategy and the management of conflict, formulation and implementation of U.S. defense policy, defense organization, and case studies in defense policy making. Students also refine their leadership abilities by organizing and managing a military unit, the cadet corps, which offers a wide variety of situations requiring effective leadership. Prereq: AFS 411 or approval of PAS.

AFS 414 LEADERSHIP LABORATORY IVB. (1)

A continuation of AFS 412. A course designed and focused on developing advanced leadership skills. Students fill the top level management function within the cadet corps. The course involves the planning and controlling of military activities of the cadet corps, and the preparation and presentation of briefings and other written and oral communications. The lab also includes practice of leadership techniques aimed at motivating and instructing cadets in the lower three levels. Pass/Fail only. Laboratory, two hours per week. Coreq: AFS 413.

AHP Allied Health Professions

AHP 840 ETHICS IN HEALTH PRACTICE. (2)

A study of selected ethical issues that arise in the practice of health professionals. The health professional's obligations to patients, colleagues, employing institutions, and the community will be considered, and relevant case studies will be analyzed.

AIS Arabic and Islamic Studies

AIS 101 ELEMENTARY MODERN STANDARD ARABIC. (4)

An introduction to the standard written language of the Arab World. Initial emphasis upon the phonology and script, followed by gradual coverage of the grammar, with exercises in reading, writing, pronunciation, and vocabulary building.

AIS 102 ELEMENTARY MODERN STANDARD ARABIC. (4)

Continuation of AIS 101. Prereq: AIS 101.

AIS 201 INTERMEDIATE MODERN STANDARD ARABIC. (3)

A continuation of AIS 102, stressing comprehension of written and oral material, the ability to read Arabic aloud and to compose written material, and the ability to speak. Prereq: AIS 102.

AIS 202 INTERMEDIATE MODERN STANDARD ARABIC. (3)

A continuation of AIS 201, stressing comprehension of written and oral material, the ability to read Arabic aloud and to compose written material, and the ability to speak. Prereq: AIS 201.

AIS 228 ISLAMIC CIVILIZATION. (3)

This course is an introduction to the religion of Islam and the classical era of the Islamic civilization. A great deal of time will be spent on the life of Muhammad (570-632) and basic beliefs, rituals and practices. The course will also explore aspects of the history of Islamic civilization from the time of Muhammad to around the 17th century, including science, art theology and law.

AIS 301 COLLOQUIAL ARABIC I. (3)

Provides advanced skills in developing linguistic and communicative skills in colloquial Arabic based on Egyptian Arabic that is widely understood throughout the Arab world. Introduces aspects of Egyptian cultural life. Designed for those who have some experience with Standard Arabic. Prereq: AIS 202 or consent of instructor.

AIS 302 COLLOQUIAL ARABIC II. (3)

A continuation of AIS 301. Prereq: AIS 301 or consent of instructor.

AIS 311 ARABIC FOR BUSINESS AND MEDIA I. (3)

This course is designed to meet the needs of intermediate-level students of Arabic as well as members of the business community who wish to learn Arabic for professional purposes. The topics cover travel, social, and business interactions. The course also introduces and engages with a variety of current, authentic and primary Arabic materials through the language of the newspapers, magazines, Internet news sites, and TV news. Some of the media topics that will be covered are meetings and conferences, elections, and demonstrations and social protest. By the end of this course, the students will be at a mid-intermediate level of proficiency in Arabic. Prereq: To enroll in this course, students should have completed four semesters of Arabic (AIS 101, AIS 102, AIS 201, and AIS 202). Alternatively, the students should seek the approval of the course instructor.

AIS 312 ARABIC FOR BUSINESS AND MEDIA II. (3)

This course builds on and expands the business, travel, and social topics covered in AIS 311 through additional and more complex situations and interactions, such as shopping, going around town, at the sales office, at the post office, at the bank, renting and buying a house and a lot of land. The course also expands on the media topics covered in the first part of this course, in terms of both variety and difficulty. Some of the new topics will be elections, conflict and terrorism, business, cultural and social news. The course will take the students to a high-intermediate level of proficiency in Arabic. Prereq: To enroll in this course, students should have completed five semesters of Arabic (AIS 101, AIS 102, AIS 201, AIS 202, and AIS 311). Alternatively, the students should seek the approval of the course instructor.

AIS 320 MODERN ARABIC LITERATURE AND FILM IN TRANSLATION. (3)

This course introduces students to major Arab writers, poets, and film makers through some of their primary novels, novellas, poems, and films with a focus on the heart of the Arab world.

AIS 330 ISLAMIC CIVILIZATION II. (3)

The Islamic world's response to westernization and the resultant reassertion of its cultural role in the modern world.

AIS 331 CLASSICAL ARABIC LITERATURE (in English). (3)

Reading from some of the major works of Arabic literature (poetry and prose) of the 6th-14th centuries which are an integral part of the Arab cultural heritage, e.g., the Mu'allaqat, Koran, Ibn Ishaq's Sirah; al-Tabari's Ta'rikh; Abu'l Faraj's Kitab al-Aghani; al-Ghazzali's Ihya; al-Hariri's Maqamat; and Ibn Khaldun's Muqaddimah.

AIS 338 WOMEN AND ISLAM. (3)

A survey of women's issues related to Islam and contemporary Muslim culture including the perception of women in Islam, the role and rights of women in Islam, female circumcision, honor killing women's dress. The course will discuss the viewpoints of the Muslim traditionalists, modernists, western feminists and the emerging Islamic feminists.

AIS 340 FUNDAMENTALISM AND REFORM IN ISLAM. (3)

This course focuses on the revival of Islam in the 20th century and the various responses of Islam to modernism and western political and intellectual domination. Particular attention will be given to the rise of militant Islam and the terrorist attacks of 9/11. The original writings of major thinkers will be read and discussed.

AIS 345 ISLAMIC MYSTICISM. (3)

This course is an overview of Islamic spirituality, which refers to the spiritual aspects within basic Islamic texts and general Islamic practices, and Islamic mysticism, which refers to the concepts and practices of Sufism. Throughout the entire course, poems from Rumi, the greatest of the Sufi poets, will be read and discussed. The purpose of the course is to expose students to the ideas and practices of Islamic spirituality and mysticism, the history of Sufism and in a lesser extent the debate between Sufism and normative Islam.

AIS 395 INDEPENDENT WORK IN ARABIC/ISLAMIC STUDIES. (1-3)

Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

AIS 410 THEOLOGY AND LAW IN ISLAM. (3)

This course provides an historical and thematic overview of theology and law (Shari'ah or Fiqh) in Islam. The main concepts of Islamic theology are introduced, comparing them to Christian thought and taking into account contemporary issues. The section on law covers the historical development of the classical legal schools and the main concepts of Islamic legal philosophy. Prereq: Islamic Civilization I or the permission of the instructor.

AIS 430 ISLAM IN AMERICA. (3)

This course is an overview of the Muslim experience in America with special emphasis on the issues facing Muslims as they seek to adjust and find their space in America, especially in the wake of 9/11.

AIS 435 TOPICS IN ISLAMIC STUDIES (Subtitle required). (3)

Variable in content, this course focuses on important texts and issues in Islamic history, religion, literature, and philosophy. May be repeated to a maximum of six credits under different subtitles.

AIS 440 INTRODUCTION TO THE QURAN. (3)

An introduction to the disciplines of knowledge related to the Quran, its major themes, style of presentation, and relevance to contemporary societies and issues.

AIS 442 ARABIC READING I. (3)

Advanced skills in speaking, reading, and analyzing selected texts from traditional and modern Arabic literature using formal spoken and written Arabic. Introduction to the use of Arabic computer software. Prereq: AIS 202 or equivalent.

AIS 443 ARABIC READING II. (3)

Continuation of AIS 442 with emphasis on Modern Arabic Short Stories. Prereq: AIS 442 or equivalent.

AIS 495G ADVANCED INDEPENDENT WORK IN ARABIC/ISLAMIC STUDIES. (1-3)

Independent research in Russian and Eastern Studies on an advanced level for undergraduate and graduate students. Students will be required to establish a written contract with the relevant faculty member describing the tasks to be completed in the course. May be repeated to a maximum of six credits, or a total of six credits of AIS 395 and 495G.

AMS American Military Studies**BASIC COURSES****AMS 101 INTRODUCTION TO THE ARMY. (2)**

This introductory level course is designed to give students an appreciation for the role the Army currently plays in our society. The course covers the history of the Army and the roles and relationships of the Army within our society. The course also covers some of the basic skills necessary for today's leaders to include oral presentation, time management, map reading, basic rifle marksmanship and squad tactics. Prereq: Must be concurrent with AMS 250.

AMS 102 INTRODUCTION TO LEADERSHIP. (2)

This course is designed to acquaint the student with the fundamental skills necessary to be a leader, both in military and civilian context. Course also covers basic military map reading skills. Prereq: Must be concurrent with AMS 250.

AMS 211 ADVANCED LEADERSHIP I. (2)

This course focuses on both theoretical and practical aspects of leadership. Students will examine topics such as written and oral communication, effective listening, assertiveness, personality, adult development, motivation, and organizational culture and change. Prereq: AMS 101 and 102, or consent of instructor. Must be taken concurrent with AMS 250.

AMS 212 ADVANCED LEADERSHIP II. (2)

This course focuses principally on officership, providing an extensive examination of the unique purpose, roles, and obligations of commissioned officers. It includes a detailed investigation of the origin of our institutional values and their practical application in decision making and leadership. Prereq: AMS 101, 102 and 211, or consent of the instructor. Must be taken concurrent with AMS 250.

AMS 250 BASIC MILITARY SCIENCE LAB. (1)

A hands-on practicum which exposes the student to the military skills required for basic technical and tactical competence to enter the Advanced Course. Laboratory, two hours per week and two week-end exercises. May be repeated to a maximum of four credits.

ADVANCED COURSES**AMS 301 LEADERSHIP AND MANAGEMENT I. (3)**

Course of study in development of basic skills required to function as a manager; study of leadership styles, group dynamics, communications, motivation and military instruction methods; and school of the soldier and exercise of command. Prereq: AMS 101, 102, graduate or undergraduate student (male or female), successful completion of basic course or basic camp, physically fit to pursue program; consent of PMS. Must be taken concurrent with AMS 350.

AMS 302 ADVANCED TACTICS. (3)

Small unit tactics and communications, organization and mission of combat arms units; leadership and the exercise of command. Prereq: AMS 101, 102, graduate or undergraduate student (male or female), successful completion of basic course or basic camp, physically fit to pursue program; consent of PMS. Must be taken concurrent with AMS 350.

AMS 320 ADVANCED STUDIES IN AMERICAN MILITARY HISTORY. (3)

This course will furnish upper level UK ROTC Cadets, and qualified History majors or minors with the methodological tools and materials needed to gain a more detailed understanding of American Military History and to put together a major research paper. AMS/HIS 320 will emphasize basic research skills: understanding historiographical debates within a military framework, developing effective note taking, outlining techniques, picking a feasible research topic, finding useful primary sources and drawing inferences from them, examining American military campaigns and leaders in order to complete a battle analysis, and short research assignments. Prereq: Consent of instructor (Same as HIS 320.)

AMS 341 LEADERSHIP AND MANAGEMENT II. (3)

An advanced study of logistics, operations, military administrations, personnel management, military justice, world change and military implications, service orientation and leadership training. Prereq: AMS 301, 302. Must be taken concurrent with AMS 350.

AMS 342 COMMAND MANAGEMENT. (3)

An advanced study of logistics, operations, military administration, personnel management, military justice, world change and military implications, service orientation and leadership training. Prereq: AMS 301, 302. Must be taken concurrent with AMS 350.

AMS 350 ADVANCED MILITARY SCIENCE LAB. (1)

A hands-on practicum which exposes the student to the military skills required for advanced technical and tactical competence as an Army officer. The course affords junior and senior cadets opportunities to develop and refine their leadership style and abilities under differing constraints and environments. Laboratory, two hours per week and two weekend exercises. May be repeated to a maximum of four credits. Prereq: AMS 250, AMS 101, AMS 201 and AMS 202. Concurrent: AMS 301, 302, 341 or 342.

AMS 395 INDEPENDENT STUDY IN LEADERSHIP. (1-2)

Advanced study in leadership. Students are under guidance and confer individually with faculty on approved topic(s). A written report or paper is expected and will be filed in the chairperson's office. May be repeated to a maximum of four credits. Prereq: Completion of AMS 302 and approval of PMS.

AN Analytics

AN 250 BUSINESS DATA ANALYSIS. (3)

Business Data Analysis is a course in applied business decision making. It uses Excel to organize, summarize, and analyze data and to interpret the results of such analysis. It is an introduction to the process of transforming raw data into results to support common business decisions. The course will emphasize hands-on problem solving in a business context rather than on the specific techniques. Prereq: MA 113, MA 123, MA 137 or equivalent.

AN 300 ANALYZING BUSINESS OPERATIONS. (3)

To be well-prepared, a business graduate must appreciate the nature and importance of an enterprise's operations. This core business course introduces underlying concepts and basic analytical techniques essential for managing a firm's manufacturing and service operations. Operations decisions focus on how to plan, control, and coordinate the organizational resources and processes concerned with producing and distributing goods and/or services. This course emphasizes quantitative and technology-based analyses of real decision problems involving such operations issues as quality control, capacity planning, location analysis, layout analysis, inventory management, forecasting, and project management within a business firm. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics.

AN 303 SUPPLY CHAIN MANAGEMENT. (3)

The study of supply chain management involves the management of key business processes, the flow of goods and information, and relationships with fellow members of the supply chain. This course will introduce students to the terminology, concepts, and skills related to supply chain management. Students will develop an understanding of the complexities associated with the physical movement of goods and information, and how they affect the mission of the firm. Discussions will address the various processes and activities within an organization and how they interface with other members of the supply chain. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as MKT 303.)

AN 306 ANALYTICS: MODELS AND METHODS. (3)

Analytical activities are rapidly expanding in businesses, government and not-for-profit organizations. For the modern enterprise, problems in practically every domain are being formulated as models, which are then used to analyze data – producing explanations and predictions to help solve these problems. Using potentially vast volumes of data, these models are implemented and solved via computers – generating solutions that must then be interpreted and appropriately applied in decisional processes. This course leads students through the steps of model formulation, solution, interpretation, and application in such crucial decision domains as investment, scheduling, production, inventory, and logistics. It furnishes hand-on experiences with such widely used modeling techniques as linear programming, network flow programming, and multiple-objective decision modeling. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as MKT 306.)

AN 320 BUSINESS COMPUTING SYSTEMS. (3)

This course investigates how business firms use computing systems to facilitate effective and efficient business processes – thereby improving individual and organizational productivity and competitiveness. The course is geared toward non-technical professionals who seek an overall understanding of how firms design and deploy computer-based solutions to organizational problems. Using cases and hands-on exercises as pedagogical tools, the course furnishes a business applications-oriented view of various computing technologies, such as communication networks, databases, decision support systems, and enterprise systems. The course also addresses ethical and global management issues arising from the worldwide deployment and use of such systems by modern, global business firms. Prereq: CS 101 or MOS Certification. Open only to Business Minors; not available for credit to Business and Economics Majors.

AN 322 INFORMATION SYSTEMS IN THE MODERN ENTERPRISE. (3)

This course provides an introduction to the uses of information systems in the management of organizations. Recognizing that modern organizations rely on such systems, it is geared toward aspiring professionals who need to understand both how these systems contribute to their organizations and how they can participate in the realization in value from these systems. The course covers basic systems concepts; socio-technical issues; emerging hardware, software, and telecommunications infrastructure technologies; systems analysis and design, database management; system implementation; project management; and systems management. It also introduces such applications as decision support, knowledge management, and e-business with an emphasis on relevant managerial problems within both local and global contexts. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor.

AN 324 DATA BASE MANAGEMENT. (3)

Databases are the backbone of information systems. Almost every modern organization uses database technology to support its routine operations such as inventory management, customer relationship management, human resources management, and electronic commerce. Database technology is also the foundation of data-driven decision-making that has permeated the business world. With the proliferation of data-driven decision-making and end-user computing, understanding database technologies is necessary for business students to remain competent in the modern business environment. Prereq: Completion of all college pre-major

requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor. (Same as MKT 324.)

AN 390 SPECIAL TOPICS IN ANALYTICS. (3)

This course number gives faculty members the flexibility to teach various special topics of interest to students, subject to contemporary student demand and faculty availability. The special topics are concerned with techniques, technologies, and applications related to analytics. The offerings include, but are not limited to, such courses as Supply Chain Management, Enterprise Systems, Electronic Commerce, Systems Analysis & Design, Data Mining, Data Warehouse & Database Management, Online Analytical Processing, Knowledge Management Systems, and Programming Languages. While a student may take as many distinct DIS 390 courses as are offered, only two or three can be counted as electives. A student may not repeat a special topics course under the same title. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor.

AN 395 INDIVIDUAL WORK IN ANALYTICS. (1-3)

This individually customized course enables the student to independently study a topic of personal interest that is not ordinarily covered in the standard curriculum. The student confers with a willing, qualified instructor to design the course – including the course scope, learning methods, timetable, milestones, deliverables, and evaluation metrics. Typically, a final written report or paper is required. To ensure progress, the student stays in contact with the instructor throughout the course of independent study. Examples of prior individual work include: Lean Logistics, Website Design & Implementation, Enterprise Resources Planning, Materials Requirement Planning, Lot Sizing, Advanced Six Sigma, Programming in Java, and Database Design. A course of independent study may not be requested/offered for material that is already covered in the normal curriculum, except under extenuating circumstances. May be repeated to a maximum of six credits. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Approval of Instructor and DSIS Director of Undergraduate Studies.

AN 403G PRODUCTION AND INVENTORY SYSTEMS. (3)

This course is an advanced introduction to the complexities of managing production and inventory systems. An enterprise's success in today's highly-competitive, often-global business environment, depends on effectively managing its production activities and the related inventories at various production-process stages. Because such decisions are invariably tied to demand forecasts, the course begins with an examination of forecasting. Students are then led through the topics of production planning, master scheduling, material requirements & manufacturing-resources planning, production activity control, capacity management, and sequencing & scheduling. The course culminates with coverage of contemporary trends toward just-in-time manufacturing systems and lean manufacturing systems. Applications of analogous systems and principles in the service sector are also addressed throughout the course. Prereq: Completion of all college pre-major requirements and admission to Upper Division or graduate student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 403.)

AN 406G PRODUCTIVITY AND QUALITY MANAGEMENT. (3)

This course is an advanced treatment of two related concepts that are vital to the success of an enterprise: quality and productivity. As a key ingredient of competitive strategy, quality encompasses many attributes of a product or service – such as its design, its features, fit and finish, durability, safety, and customer treatment. In highly competitive settings, a firm that achieves and sustains high quality levels for its goods and/or services, while remaining at least as efficient as competitors in processes used to produce these outputs, tends to outperform its competitors. Beginning with an examination of connections between quality and productivity, this course examines their underlying philosophic, strategic, and human issues. The coverage includes emergent practices for continuous improvement including Kaizen, Six Sigma, customer relationship management, and strategic planning. Prereq: Completion of all college pre-major requirements and admission to Upper Division or Graduate Student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 406.)

AN 420G DATA MINING. (3)

Data mining is concerned with tools and techniques to help a data/business analyst numerically and visually explore vast data sets, classify data, predict outcomes, or identify associations, patterns, and exceptional events. In practical terms, such capabilities allow firms to better segment markets, evaluate and classify stocks, identify prospective customers, foretell contingencies and catastrophes, identify defaulters and fraudulent transactions, measure churn, identify threats, perform service requests, bundle goods and services, recognize how events (e.g., purchases) are likely to unfold over time, and so on. Such capabilities often make the difference between survival and demise in today's increasingly global, increasingly competitive, and increasingly volatile business settings. Prereq: Completion of all college pre-major requirements and admission to Upper Division or graduate student status in Business and Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 420.)

AN 440G TOPICS IN ANALYTICS. (3)

This course covers contemporary topics in enterprise data, analysis, and decision making. Past coverage has included Data Mining, Data Communications, and Valuation of Information. The topics covered would also be valuable to students from programs such as Computer Science, Telecommunications, Statistics and Engineering. Prereq: Completion of all college pre-major requirements and admission to Upper Division or Graduate Student status in Business and

Economics. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor. (Same as MKT 440.)

ANA 450G ANALYTICS TECHNOLOGIES. (3)

This course develops computing skills relevant to the construction, maintenance, and usage of systems for analytics. It does so by combining the facets of technology (e.g., advanced spreadsheet computing), realistic workplace decision making, and decision support system development into a capstone experience. Prior courses introduce students to analytical techniques commonly used in organizational decision making, as well as current information technologies. This course combines students' abilities in both areas within an advanced software context. Specifically, the course enhances students' abilities in developing computer-based systems that employ analytical techniques for the purpose of aiding organizational decision makers. Prereq: Senior standing or graduate student status in the College of Business and Economics. B&E undergraduate students must have completed 9 of the 18 credits required for an Analytics major. Non-B&E Upper Division undergraduate students and graduate students may be enrolled with the consent of the instructor.

ANA Anatomy and Neurobiology

ANA 109 ANATOMY AND PHYSIOLOGY FOR NURSING I. (4)

Basic anatomy and physiology integrated to prepare freshman students for nursing. Lecture 3 hours, laboratory 1 hour. (This course will have a laboratory fee.)

ANA 110 ANATOMY AND PHYSIOLOGY FOR NURSING II. (4)

Basic anatomy and physiology integrated to prepare freshman students for nursing. Lecture 3 hours, laboratory 1 hour. (This course will have a laboratory fee.) Prereq: Successful completion of ANA 109 with a C or better.

ANA 209 PRINCIPLES OF HUMAN ANATOMY. (3)

The structure of the human body will be examined at various levels: cellular, tissues and organ systems. The gross anatomical arrangement of the body will be studied in a system-by-system format relating structure to function and the fundamentals of human embryology/malformation with adult anatomy. The central nervous system will be emphasized. Prereq: Introductory biology or zoology.

ANA 305 INTRODUCTION TO NEUROSCIENCE TECHNIQUES. (4)

This introductory laboratory course will provide students with practical knowledge and hands-on experience in basic behavioral, anatomical and physiological techniques used by laboratory scientists in the investigation of the nervous system. It is designed as a gateway to independent research experiences in working neuroscience laboratories. Prereq: BIO 302 Introduction to Neuroscience or equivalent. (Same as PSY 305.)

ANA 309 AN INTRODUCTION TO REGIONAL ANATOMY. (5)

This course is designed to serve as a transition between systems-based undergraduate anatomy and regionally-based medical professional anatomy. The human body will be taught in an online format, including modules for independent study, weekly virtual team-based learning sessions, and formal course and practical examinations. Anatomical organization will be presented in a regional format so that students can assimilate the bones, muscles, vasculature, innervations, and lymphatic pattern for each region of the body, similar to the pedagogical approach used in medical professional programs. Prereq: ANA 209 and mastery of the Second Life program.

ANA 394 INDEPENDENT RESEARCH IN NEUROBIOLOGY AND NEUROSCIENCE. (1-3)

ANA 394 is designed to provide students with an intensive experience in laboratory or field research. Participants should take an active role in the design and execution of experiments and in the analysis and interpretation of data. They should be capable of "independent research" in the sense that they can conduct the experiments with little direct supervision. Students are expected to become familiar with related research in the current literature by regularly reading scientific journals. The student is expected to devote at least 3-4 hours per week for each credit hour enrolled to laboratory work, although often more time is necessary.

ANA 395 INDEPENDENT RESEARCH IN ANATOMY AND NEUROBIOLOGY. (1-3)

Independent research with faculty members. May be repeated to a maximum of 12 credits. Laboratory, three to nine hours per week. Prereq: Biology or psychology majors with sophomore, junior, or senior standing and consent of a faculty member.

ANA 410G NEUROBIOLOGY OF BRAIN AND SPINAL CORD DISORDERS. (3)

ANA 410G is a multidisciplinary discussion of neurodegenerative diseases and neurologic disorders. The course objective is to provide an in depth understanding of the basic science and clinical symptoms of selected neurologic disorders and neurodegenerative diseases, current treatment strategies and new approaches for treatment and potential cure of these devastating illnesses. Included are such topics as the 1) subcellular and molecular basis of the diseases, 2) the role of genetics in aging and neurodegeneration, 3) mechanisms of cell death, and 4) the cellular/molecular basis of neurodegenerative diseases and neurologic disorders. The format of the course will consist of a series of formal lectures and informal discussion sessions. Reference materials will be recent review articles. Graduate students taking the course will present studies from the primary medical literature in a journal club format and will also prepare a paper examining one disorder in detail. This course will be of interest to advanced students from a

variety of disciplines whose interests concern brain and spinal cord disorders. Prereq: For undergraduate students: BIO 302 or PSY 312 or consent of course directors. For graduate students: Enrollment in a graduate program in biomedical sciences, gerontological sciences or consent of one of the course directors.

ANA 417G FUNCTIONAL HUMAN NEUROANATOMY. (3)

This course provides an introductory level of understanding of human central nervous system (CNS) anatomy and function. Lecture topics will explore the CNS based on structures that make up functional systems (e.g., motor, sensory, visual, etc.), how these systems interact, and examples of how a loss of function results in disease conditions. Prereq: BIO 302 Introduction to Neuroscience.

ANA 442 MOLECULAR AND CELLULAR NEUROBIOLOGY. (3)

This 3 credit hour course is designed to be an introductory course for undergraduate students aimed at providing an overview of major principles and techniques associated with cellular and molecular neurobiology. Subject matter is intended to range from molecular mechanisms underlying neuronal signaling and cellular function to how these properties are invoked across simple networks, neural systems and behavior. Prereq: BIO 152 or an equivalent; BIO 302 or PSY 312, or consent of course director.

ANA 503 INDEPENDENT WORK IN ANATOMY. (3)

Reading and laboratory work in a defined area of anatomy are carried out under the direct supervision of one staff member. Hours of discussion and laboratory work by individual arrangement. May be repeated to a maximum of 12 credits. Prereq: An introductory course in biology, zoology, or botany and consent of instructor.

ANA 511 INTRODUCTION TO HUMAN ANATOMY. (5)

The principles of organization of the human body are presented. Gross anatomy lectures initially follow a systemic plan. This is succeeded by a regional presentation. Several methods of studying anatomy are utilized. These include radiology, palpation of living structures, and the demonstration of prosected fresh and fixed materials. Prereq: Some background in biology, including one or more such courses as biology, zoology, botany, comparative anatomy or embryology, and enrollment in the College of Medicine or a graduate program in the biomedical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 512 MICROSCOPY AND ULTRASTRUCTURE. (4)

The organization of cells, tissues and organs are presented through lectures and in the laboratory, through the microscopic study of histological sections and illustrations. Prereq: Some background in biology, including one or more such courses as biology, zoology, botany, histological techniques, comparative anatomy or embryology and enrollment in the College of Medicine or a graduate program in the biomedical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 516 SELECTED TOPICS IN ADVANCED NEUROSCIENCE. (3)

ANA 516 will cover advanced topics in neuroscience. Topics include: neural pathways, development, neuroanatomy, neurobiochemistry, neuropharmacology, neural imaging and molecular neuroscience. Laboratory experiences will be used to complement lectures. Prereq: ANA 511, 512, 513; PGY 511; and enrollment in the College of Medicine or a graduate program in the bio-medical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 530 COMBINED HISTOLOGY AND SPECIAL ORAL MICROANATOMY. (5)

An analysis of the histological structure and organization of the human body, including an especially detailed treatment of the tissues and organs related to the oral cavity. Prereq: Admission to the College of Dentistry or some background in biology and consent of instructor.

ANA 534 DENTAL GROSS ANATOMY AND EMBRYOLOGY. (6)

Study of human gross and developmental anatomy with particular emphasis on functional anatomy of the head and neck. Lecture/laboratory course, with dissection being an essential component of the laboratory portion. 140 hours. Prereq: Admission to the College of Dentistry. (Same as OBI 815.)

ANA 536 HUMAN EMBRYOLOGY, AN ABBREVIATED COURSE. (2)

A concise presentation of developmental mechanisms, early development of the embryo, and subsequent development of selected systems and regions of the body. Lecture, one hour. Prereq: Admission to the College of Dentistry.

***ANA 538 DENTAL NEUROANATOMY. (2)**

Study of human dental neuroanatomy with emphasis on functional neuroanatomy of central nervous system, especially related to cranial nerves 5, 7, 9, and 10, pain, and long tracts. Prereq: Admission to the College of Dentistry.

ANA 600 SEMINAR IN ANATOMY. (1)

A weekly seminar devoted to presentation and discussion of classic and new research in the field. May be repeated to a maximum of four credits. Prereq: Admission to the anatomy graduate program or permission of the course director.

ANA 605 NEUROBIOLOGY OF CNS INJURY AND REPAIR. (3)

The objective of the course will be to provide a general overview of the current state of knowledge concerning the pathophysiology and therapeutic approaches to central nervous system injury. The course will provide a strong working background concerning the issues,

techniques and frontiers of neurotrauma therapeutic discovery research aimed at reducing acute post-traumatic neurodegeneration in the injured brain or spinal cord or enabling regeneration and repair. This course is a graduate level course intended for students who are in their second or subsequent years of graduate study and who are pursuing focused research training in neurotrauma research. No special prerequisites, other than graduate standing, are necessary. However, a background in neuroanatomy and neurophysiology is highly recommended. Prereq: Permission of instructor. (Same as PGY 605.)

ANA 609 EDUCATIONAL STRATEGIES IN THE ANATOMICAL SCIENCES. (3)

This course informs on and examines multiple aspects of teaching the Anatomical Sciences. Classroom and laboratory issues, teaching theory, portfolio development and presentation strategies are among the topics covered. Prereq: Admission to the graduate certificate program in the Anatomical Sciences or the permission of the course director.

ANA 611 REGIONAL HUMAN ANATOMY. (5)

Functional human anatomy covering all regions of the body utilizing dissection techniques with an emphasis on cross-sectional anatomy and normal morphology. Lecture, four hours; laboratory, four hours per week. Prereq: Enrollment in the PAS Program of the College of Allied Health or a graduate program in the biomedical sciences (by consent of course director only).

ANA 612 BIOLOGY OF AGING. (3)

A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as BIO/GRN/PGY 612.)

ANA 625 INTRODUCTION TO FUNCTIONAL MRI. (1)

Hands-on course for practitioners interested in acquiring functional MRI technique(s) as a research tool. Prereq: (1) Introductory statistics (e.g. PSY 610, STA 503, STA 570). (2) Permission of instructor.

ANA 631 ADVANCED HUMAN ANATOMY. (3-5)

The objective of this course is to meet individual student needs for increased knowledge in particular areas of gross human morphology. Investigations of problems involving gross morphology will be carried out. One or several defined areas of the body will be studied in considerable detail by dissection, by intensive use of the pertinent literature, by the use of visual aids, prosected materials and other appropriate learning aids. Prereq: A background in gross human anatomy equivalent to a medical school course in regional anatomy and consent of course director and/or Director of Graduate Studies in Anatomy and Neurobiology.

***ANA 636 ADVANCED NEUROSCIENCE. (3-5)**

This course will consist of a comprehensive examination of the nervous system. Emphasis will be placed on structure-function relationships, neurotransmitters, chemical constituents of the nervous system, neuronal as well as non-neuronal cells, plasticity of the nervous system and developmental biology. The detailed content and emphasis will depend on both the background and goals of the students. Depending on the number of credits a student registers for, and the topic and course orientation, laboratory work, library work, written and/or oral presentations may be a course requirement. Prereq: Enrollment in a graduate program in the biomedical sciences, or consent of the instructor.

ANA 638 DEVELOPMENTAL NEUROBIOLOGY. (3)

An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cell biological and molecular approaches to cell differentiation, neuronal pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 535 or consent of instructor. (Same as BIO/PGY/PSY 638.)

ANA 655 INTRODUCTION TO MAGNETIC RESONANCE IMAGING. (3)

Survey of basic concepts and applications in magnetic resonance imaging: physics and chemistry, basic mathematical foundations, workings of a modern MRI scanner, image reconstruction, biology with emphasis on neurobiology, medical applications in the brain and heart. Covers basic functional imaging and spectroscopy. Prereq: Undergraduate major in a science or engineering discipline.

ANA 660 BIOLOGY OF REPRODUCTION. (3)

Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanism of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC/PGY 601 and ASC 364 or BIO/PGY 502 or consent of instructor. (Same as ASC 660 and PGY 660).

ANA 662 ULTRASTRUCTURAL ANATOMY. (2-5)

The objectives of this course are to advance the students' knowledge of the submicroscopic structure of cells and tissues. Correlation of intra- and extracellular morphology and function will be emphasized. Students will do detailed laboratory work in the techniques of electron microscopy. Depending on the number of credits a student registers for, and the topic and course orientation, laboratory work, library work, written and/or oral presentations may be a course

requirement. Prereq: ANA 512, previous work in microscopy including histology or cytology, or equivalents, and consent of instructor.

ANA 710 AGING OF THE NERVOUS SYSTEM. (3)

This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer's disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences is encouraged. (Same as GRN/PGY/PHA 710.)

ANA 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ANA 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ANA 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ANA 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

ANA 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

ANA 780 SPECIAL TOPICS IN NEUROBIOLOGY. (1-3)

A lecture/seminar course offered based on contemporary topics in neurobiology. Course is designed to offer different emphasis in a given year and to cover timely topics. Prereq: Consent of the course director.

ANA 790 RESEARCH IN ANATOMY. (1-12)

Individualized laboratory and research experience under the supervision of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Consent of the instructor.

ANA 801 HISTOLOGY FOR PHYSICAL THERAPY STUDENTS. (1)

A survey of selected basic and specialized mammalian tissues most commonly involved in diseases treated by physical therapists. The course provides information required for understanding the cellular mechanisms behind the various diseases and the rationale for subsequent treatment. Prereq: Admission to the College of Allied Health.

ANA 802 NEUROANATOMY FOR PHYSICAL THERAPY STUDENTS. (2)

A concise account of the functional anatomy of the central nervous system. The anatomical organization is correlated with physiological activity. Emphasis is placed upon the morphological basis for progressively higher levels of control of activity from the simple reflex to voluntary motor activities controlled by the cerebral cortex. This type of knowledge is required for proper understanding and performance of physical therapy technicians in the treatment of medical and surgical disease.

ANA 811 HUMAN ANATOMY FOR ALLIED HEALTH PROFESSIONS. (5)

A dissection-based gross anatomy course designed to present the principles of the human body in a regional format with special emphasis on functional/clinical anatomical relationships. Prereq: Enrollment in the PT program of the College of Allied Health Professions.

ANA 814 HUMAN STRUCTURE/GROSS ANATOMY. (6)

The course consists of lecture, small group, laboratory, and palpation exercises that provide a basic understanding of anatomical principles, organization and development. Anatomical structures are introduced as a basis for future functional correlates and principles are taught via laboratory discussions, prosections, dissections, films and skeletal materials. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year). (Same as MD 814.)

ANA 815 FIRST-YEAR ELECTIVE, ANATOMY. (1-3)

With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Anatomy and Neurobiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

ANA 825 SECOND-YEAR ELECTIVE, ANATOMY. (1-4)

With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Anatomy and Neurobiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

ANA 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)

With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his/her fund of knowledge and clinical competence. Prereq: Admission to the fourth

year, College of Medicine and/or by the permission of the Student Progress and Promotions Committee.

Approved elective:

ANA 850 APPLIED HUMAN ANATOMY

ANS Anesthesiology

ANS 815 FIRST-YEAR ELECTIVE, ANESTHESIOLOGY. (1-3)

With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Anesthesiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

ANS 825 SECOND-YEAR ELECTIVE, ANESTHESIOLOGY. (1-4)

With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Anesthesiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

ANS 842 ADVANCED CLINICAL PHARMACOLOGY AND ANESTHESIOLOGY. (4)

This course uses lectures, interactive small groups, and firsthand experience to introduce anesthesiology as it relates to pharmacology and physiology. The course also teaches pharmacology and therapeutics utilizing clinical cases. Students develop their own personal formularies during the course. Laboratory, 40 hours per week. Prereq: Admission to fourth year of medical curriculum. (Same as PHA 842 and MD 842).

ANS 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)

With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:

ANS 850 CLINICAL CLERKSHIP IN ANESTHESIOLOGY

ANS 851 CRITICAL CARE UNIT

ANS 852 RESEARCH IN ANESTHESIOLOGY

ANS 853 CLINICAL CLERKSHIP IN PAIN MANAGEMENT

ANS 890 ANESTHESIOLOGY OFF-SITE

ANT Anthropology

ANT 101 WHAT MAKES US HUMAN? INTRO TO ANTHROPOLOGY. (3)

This course explores what it means to be human by studying human cultures, past and present. Students will develop an understanding of anthropology that emphasizes the concepts and methods of the major sub-fields, i.e., cultural, biological, archaeology, and linguistics.

ANT 102 ARCHAEOLOGY: MYSTERIES AND CONTROVERSIES. (3)

Scientific archaeology has a problem: fringe ideas about mysteries of the past attract more interest than scholarly accounts of these same mysteries. In discussing the "mysterious" side of archaeology, this course asks why consideration of the past invites some of the most bizarre speculations about human life. Why do fringe theories about lost civilizations, intergalactic interactions, and mysterious technologies gain more popularity than mainstream theories? Why should serious archaeologists and students pay any attention to such "wacko" ideas? To answer these questions, this course attends to two kinds of controversies: fantastic claims in the past (such as the Myth of the Moundbuilders and the Shroud of Turin) and debates in the present (such as the cultural affiliation of Kennewick Man and uses of archaeology to promote discrimination).

ANT 103 SPORTS, CULTURE, AND SOCIETY. (3)

From little league baseball to the world of college and professional sports and the numerous ESPN channels that track them, it is clear that sports play a significant role in our culture and society and yet, we often take for granted this significance. This course introduces students to the anthropology of sports through an examination of the rituals, political and economic dimensions, and social and cultural meanings of sports from around the globe in both the past and the present.

ANT 130 INTRODUCTION TO COMPARATIVE RELIGION. (3)

Comparative study of major world and selected regional religions with emphasis on analysis of belief, ritual, artistic expression and social organization. Eastern and Western religions are considered. (Same as RS 130.)

ANT 160 CULTURAL DIVERSITY IN THE MODERN WORLD. (3)

Directed at non-majors, this course is intended to introduce the student to the diversity of human cultural experience in the contemporary world. Goals of the course include gaining an appreciation for the common humanity and uniqueness of all cultures; to gain a sensitivity toward stereotypes and ethnocentrism, and to understand the distinctions between "race," ethnicity and racism. The course features extended descriptions of the cultural dynamics of the culture(s) with which the instructor has worked.

ANT 220 INTRODUCTION TO CULTURAL ANTHROPOLOGY. (3)

The study of the lifeways and beliefs of different peoples. The objectives of the course are to foster an appreciation for the variety of cultural traditions found throughout the world, and to introduce students to anthropological concepts and methods of inquiry.

ANT 221 NATIVE PEOPLE OF NORTH AMERICA. (3)

This is a survey of the aboriginal Native American cultures of North America and of the impact of four centuries of British, French, Spanish, and Russian contact on Native American societies. Particular emphasis is placed on comparing and contrasting cultural characteristics of Native American groups living in ecologically diverse regions of North America. The course will include consideration of the status of Native Americans in present-day North America.

ANT 222 MIDDLE EAST CULTURES. (3)

As part of the General Education curriculum, this course falls under the "Global Dynamics" category of the broad area of "Citizenship." This course will explore some of the cultures, and aspects of culture, found in the broad region of the Middle East and North Africa. Exploration will be rooted in anthropological research and perspective, and organized around rubrics including kinship, gender, religion, and cultural performance.

ANT 225 CULTURE, ENVIRONMENT AND GLOBAL ISSUES. (3)

A fundamental part of human experience is interacting with our physical surroundings, but in the globalized ecosystem of our planet, our interactions with the physical world increasingly include distant places rather than just the surroundings we see from our door step. This course aims to develop students' awareness, knowledge and ability to reflect on how human behavior intersects with global environments. To do so, it applies an anthropological interpretive framework to topics that link human lifestyles, the environment and global issues. Prereq: Freshman or sophomore standing only.

ANT 230 INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY. (3)

This course explores the ways in which biology, the environment and culture come together to form the human condition. Topics include human genetics, human evolution, primate behavior, contemporary human variation and applied biological anthropology, including forensics, child growth and human nutrition. This course includes a laboratory component.

ANT 240 INTRODUCTION TO ARCHAEOLOGY. (3)

Introduces the theories, techniques, and strategies used by archaeologists to recover and interpret information about past cultures.

ANT 241 ORIGINS OF OLD WORLD CIVILIZATION. (3)

This course explores the rise of civilizations in the Old World through archaeology and history. The course examines theories of civilization and state formation and case studies that demonstrate how states arose. Concentrates on regions that produced some of the earliest and most complex societies on the planet: Mesopotamia, Egypt, the Indus Valley, China, and Europe. Comparing and contrasting these great societies will show how each was influenced by its unique social, cultural and environmental surroundings. The course also examines the origins of agriculture, writing, art, trade, mathematics, astronomy and religion in Africa, Asia, and Europe.

ANT 242 ORIGINS OF NEW WORLD CIVILIZATION. (3)

This course discusses warfare, commerce, social organization, political diplomacy, disease, demographics, religion, and environmental degradation among the ancient peoples of the Americas as revealed by archaeological, art historical, and textual data. Students will gain an appreciation of the diversity of human life in the New World as well as an understanding of the tremendous cultural achievements of the Inca, the Aztec, the Maya, and their neighbors. We will use the concept of complexity as a framework for comparing different societies and for contextualizing the relevance of ancient civilizations for understanding global processes in the contemporary world.

ANT 245 FOOD CULTURE AND SOCIETY. (3)

This course is designed for students in anthropology, food and nutrition, agriculture and environmental studies. It explores food in terms of human food systems. Human food systems include the knowledge, values, and practices used to produce, distribute, process, exchange and consume food. These are embedded in culture and operate within societies. Thus, why we eat, what we eat, when, where and with whom we eat, how and where we obtain our food, how we prepare it, and distribute it in specific ways may vary as a function of the culture in which we live, our place of residence and our location within society. We will explore these issues through the lectures, readings, videos and discussions to gain a better understanding of the complexity of food-related behaviors among people around the world.

ANT 251 GLOBAL HEALTH: CULTURE, PATHOLOGIES AND SOCIAL INEQUALITIES. (3)

What are the relationships between globalization, development, social justice and health? How do different global health interventions influence how people provide and seek out solutions to chronic and emergency health problems? This course explores contemporary global health issues from an anthropological perspective. Participants examine health effects of economic collapse, disasters and socio-political changes in industrialized and developing countries. We also study the growing global health industry from a social science perspective to evaluate the strengths and limitations of international aid, humanitarian interventions and NGOs for the wellbeing of individuals and communities. Topics include chronic and infectious diseases, environmental disasters, pharmaceuticals and the traffic in human organs. Course materials include texts from anthropology, mass media, documentaries, blogs and Twitter feeds. This course will be of interest to students in anthropology and the social sciences, International Studies, pre-med students and those who are interested in pursuing advanced degrees or professional careers in development and policy.

ANT 301 HISTORY OF ANTHROPOLOGICAL THEORY. (3)

The purpose of this course is to acquaint the undergraduate student with the history of the development of anthropological ideas from their precursors in thought about human nature and behavior beginning with ethnographic and philosophical literature from Greek and Roman civilization, and ending with discussion of current emphases in anthropological theory. The course will provide anthropology majors with the foundations they need to master this area of disciplinary knowledge.

ANT 302 ETHNOGRAPHIC METHODS: DOING ANTHROPOLOGY. (3)

Introduction to qualitative research methods in cultural anthropology, with a focus on participant-observation, interviewing, collaborative methods, ethnographic writing, and other techniques. Prereq: Anthropology major or minor status or instructor's approval.

ANT 303 TOPICS IN THE ANTHROPOLOGY OF FOOD AND NUTRITION: (Subtitle required). (3)

This course focuses on food and nutrition through the lens of anthropology. Topics will vary, but each semester the course will provide insight into an aspect of food and nutrition that is relevant to present-day concerns in regional, national, and/or global context. Nutrition is one of the most critical health issues in the U.S. and globally as people struggle with both undernutrition and overnutrition and the long-term consequences of both to human well-being. At the same time, it is important to recognize that food is embedded in cultural, social and political-economic contexts that serve to foster and maintain cultural and social identity, and/or in which food is a commodity to be bought, sold and traded for economic profit and/or political gain.

ANT 311 ANTHROPOLOGY OF GLOBALIZATION. (3)

This course explores the ways in which differences in factors such as nationality, ethnicity, age, gender, class and occupation shape experiences of globalization. We will analyze and interpret rapidly changing patterns of global production, consumption, politics, resistance, adaptation, and identity construction around the world.

ANT 312 BUSINESS, CULTURE AND SOCIETY. (3)

The course introduces students to recent research in business and organizational anthropology within three overlapping domains: marketing and consumer behavior, organizational theory and culture, and global business (especially international marketing, intercultural management and intercultural communication). We will explore and critically examine the meaning and usage of core concepts such as culture, design, social organization, consumption, globalization, ethnography, business, branding and marketing. Students will have opportunities for hands-on research involving observation and critical analysis and will learn how to make effective (oral, written, and visual) critical commentaries on the methods, theories and ethics of business anthropology.

***ANT 315 CULTURE THROUGH FILM AND SOUND. (3)**

Anthropologists have drawn on visual representation and analysis of human experience since the inception of the discipline, and are increasingly paying attention to what can be learned through the other senses as well. This course will explore ethnographic, documentary, and cross-cultural film traditions; ethics, methods, and theories of recording and representation; ways to use sensory anthropology methods in all the subfields (archaeologists reconstructing soundscapes, for example); critical attention to the uses of cinema, television, radio and social media to disempower or empower; indigenous media; and current work in participatory video and interest in analog vs. digital technologies.

ANT 320 ANDEAN CIVILIZATION. (3)

A study of the Inca and other pre-Hispanic civilizations of highland South America in terms of their origins, their development, and their material, social, and intellectual achievements.

ANT 321 INTRODUCTION TO JAPANESE CULTURE, MEIJI (1868) TO PRESENT. (3)

General introduction to Japanese culture from Meiji Restoration (1868) to the present. Topics include: nation-building, Japan and the West, Japan and Asia (for the Meiji period 1868-1912); gender construction and class formation, urbanization and mass culture (for the Taisho period 1912-1926); and Japanese colonialism, WWII, A-bomb, the U.S. occupation, postwar recovery, popular culture, and globalization (for the Showa period 1926-1989 and beyond). (Same as JPN 321.)

ANT 322 ANCIENT MEXICAN CIVILIZATIONS. (3)

The course provides a study of the Aztec and the related cultures of the New World. It provides a detailed discussion of pre-Columbian subsistence practices, economy, religion, and politics by tracing the development of ancient Mesoamerican civilization from its earliest beginnings to the Spanish conquest.

ANT 324 CONTEMPORARY LATIN AMERICAN CULTURES. (3)

This course is a detailed survey of societies and cultures of contemporary Latin America, utilizing contributions from anthropological research. Prereq: Introductory social science course.

ANT 325 LANGUAGE AND CULTURE. (3)

This course is an introduction to linguistic anthropology. The course reviews the basic principles of linguistic analysis and examines the ways in which linguistic structures interact with and reflect cultural variation. (Same as LIN 325.)

***ANT 326 CONTEMPORARY AFRICAN LIVES. (3)**

What do you think when you hear AFRICA? This course goes beyond the words, images and stereotypes that we typically learn from western news reports, popular media and mainstream descriptions of issues on the continent. Our goal will be to examine, and challenge, many of

the popular portrayals of Africa, and thus build a more realistic and grounded understanding of the region. We will consider issues of geography, social organization and family life, health and food security, economy and ecology, and politics and identity. But our examination will draw from African sources and people living on the continent, as well as media built on long term engagement with the multitude of African nations. We will investigate how social, economic and global systems come together to produce the diversity of lives across the vast region. We will also discover positive, hopeful and sustainable aspects of African life with attention to local people's solutions and efforts to build the lives they want. Ultimately, we will come away with both better understanding of the complex reality of "Africa", and with analytical tools for examining other complex, but often stereotyped, issues in society more broadly. Prereq: Sophomore standing or higher. (Same as AAS 326.)

ANT 327 CULTURE AND SOCIETIES OF INDIA AND SOUTH ASIA. (3)

This course considers the interrelationships between the various religious, political and philosophical traditions and practices of India and South Asia in the context of their shared cultural, historic, structural, geographic and demographic ties.

ANT 328 THE ANCIENT MAYA. (3)

This course uses archaeology, epigraphy, ethnohistory and ethnographic analogy to explore the origin, florescence and decline of the ancient Maya (1000 BC to 1500 AD). The class ties economics, politics, social organization, and religion into a holistic understanding of the ancient Maya world.

ANT 329 CULTURES AND SOCIETIES OF EURASIA AND EASTERN EUROPE: SOCIALISM AND POST-SOCIALIST CHANGE. (3)

This course provides an anthropological study of cultures and societies of Eurasia and Eastern Europe. The course considers the demise of Soviet socialism and the emergence of democracy and market economies. We examine how people experience political, cultural and economic transformations in their social relations and in their everyday lives.

ANT 330 NORTH AMERICAN CULTURES. (3)

This course uses readings, films, and music to explore the plurality of peoples and cultures in North America – with particular attention to the US. We will look at youth cultures as sites of creativity and resistance, examine perennial problems in social equality, consider the similarities and differences between urban and rural ways of life, and explore environmental concerns as an integral part of making and sustaining culture.

ANT 331 ANTHROPOLOGY OF NORTH AFRICA. (3)

This is a survey course of North Africa as a cultural area. Countries included in any given semester will vary. North Africa is Islamic and is often considered to be part of the Middle East but has a distinct history and culture of its own. Course content will include cultural, social, historical, economic, religious, and political perspectives on this important region. Ethnicity and the impact of colonialism will be discussed. Other important segments will examine gender status and roles, family and marriage, sociopolitical organization, the life course of males and females, and aging.

ANT 332 HUMAN EVOLUTION. (3)

Basic concepts and theory of evolution will be reviewed and applied to the study of fossil humans. The evidence for the evolution of humans and their primate relatives will be studied, with attention paid to alternate interpretations of the data. Prereq: ANT 230 or BIO 150.

ANT 333 CONTEMPORARY HUMAN VARIATION. (3)

This course focuses on human variation resulting from adaptation to a wide range of environments and the stresses inherent in each. It explores how humans respond/have responded to natural stresses, e.g., cold, heat, aridity and altitude, and human-made stresses, e.g., poverty, malnutrition and chemical pollution.

ANT 335 RELIGION IN EVERYDAY LIFE. (3)

Directed at non-majors (with no anthropology prerequisite), this course is intended to introduce the student to the diversity and unity of religious beliefs and practices in everyday life throughout the world through the lens of the social science anthropology. This includes the study of religions both textual and non-textual, large-scale and small-scale. The course content will include ethnographic materials as well as an examination of various methods and theoretical approaches used in anthropology in the cross-cultural study of religion. Questions that are addressed in this course include: Why do humans have/need religion? What is "religion"? Where, when, and how did "religion" evolve as a cultural universal in the human species? We will examine the basic components of religious beliefs and practices and how they are integrated into human life both individually and in communities. Students will think critically about the social organization of religion and impact of religion on society. Other areas of discussion will include: religious specialists, sacred places, religion and adaptation, religion and gender, and politics and religion. This course is much more than a typical survey of world religions and will specifically encourage the cross-cultural comparative perspective of a significant feature of all human groups.

ANT 338 ECONOMIC ANTHROPOLOGY. (3)

A comparative ethnographic, theoretical, and historical exploration of the socio-cultural constitution of economic practices. Students will examine different approaches to questions of human nature, choice, values and morality. The course explores power and social life in diverse cultures through a topical focus on peasants, markets, gifts, commodities, consumption and systems of production. The course provides a foundation for applying anthropological knowledge to real-world situations and the material is readily applied to archaeology, international business and social science.

ANT 339 HUMAN RIGHTS IN GLOBAL PERSPECTIVE. (3)

This class discusses theoretical debates on human rights within the discipline of anthropology and contrasts these approaches to those of other disciplines. Once students acquire this foundation, they apply their knowledge to a human rights problem of their own choice. They identify a researchable question about human rights and use appropriate evidence and methods to substantiate their claims. Students will also learn through experience the ethic dimensions of research and how research can have an important impact on society.

ANT 340 DEVELOPMENT AND CHANGE IN THE THIRD WORLD. (3)

This course introduces the student to how anthropologists approach the study and practice of economic development. It explores cross-culturally how local populations have responded to development; the different topics of development anthropology, such as agriculture and rural development; and the ways anthropological knowledge is applied in addressing development problems.

ANT 341 APPALACHIAN ENGLISH. (3)

The Appalachian Mountains, which range from New York to Mississippi, making up part of the landscape of 13 different states, are known to many Americans as being home to a unique cultural and linguistic experience. In this course, we will examine the extent to which this uniqueness is true, considering the nature of many myths and stereotypes that exist about this variety. We will discuss certain lexical, phonetic, syntactic, and other linguistic features that set this variety apart from other American varieties while also noting the features the speech of Appalachia shares with others. We will examine the history, origins, and development of English in Appalachia and address issues of identity, education, and standardness with respect to the English of Appalachia. (Same as APP/LIN 311.)

ANT 342 NORTH AMERICAN ARCHAEOLOGY. (3)

This course focuses on the origin and growth of prehistoric American Indian cultures north of Mexico as revealed by archaeological data.

ANT 350 TOPICS IN ANTHROPOLOGY (Subtitle required). (3)

Discussion, reading and writing focusing on specific topics in anthropology. May be repeated to a maximum of nine credits under different subtitle.

ANT 351 SPECIAL TOPICS IN ARCHAEOLOGY (Subtitle required). (3)

Discussion, reading and writing focusing on specific topics in archaeology. May be repeated up to a maximum of twelve credits under a different subtitle.

ANT 352 SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY (Subtitle required). (3)

Discussion, reading and writing focusing on specific topics in cultural anthropology. May be repeated up to a maximum of twelve credits under a different subtitle.

ANT 353 SPECIAL TOPICS IN PHYSICAL OR BIOLOGICAL ANTHROPOLOGY (Subtitle required). (3)

Discussion, reading and writing focusing on specific topics in physical or biological anthropology. May be repeated up to a maximum of twelve credits under a different subtitle.

#ANT 360 STATISTICS IN ANTHROPOLOGY. (3)

Students learn how to use probability and quantitative data to test hypotheses in anthropology. Due to common characteristics of anthropological data sets, this class emphasizes methods appropriate for handling small sample sizes and nominal and ordinal scale variables. The course also covers descriptive statistics, sampling, spatial analysis, confidence intervals, and the creation of charts and tables. Since the class focuses more on core concepts than mechanical computation, lessons learned in the context of anthropological questions can be applied to everyday decisions. Prereq: Any Quantitative Foundations course.

ANT 375 ECOLOGY AND SOCIAL PRACTICE. (3)

This course provides a broad survey of theoretical and historical issues in the link between humans and their environment. Throughout the semester, students will read about and discuss the many ways humans interact with their physical surroundings. Students will examine human cultural adaptation to different ecological settings, with an overall concern of finding general principles that apply to the many human lifestyles on the planet.

ANT 399 FIELD BASED/COMMUNITY BASED EDUCATION IN ANTHROPOLOGY. (1-15)

A community-based or field-based experience in Anthropology under the supervision of a faculty member. May be repeated to a maximum of 15 credits. Pass-fail only. Prereq: Permission of instructor and departmental chairperson; completion of departmental learning agreement.

ANT 401 GENDER ROLES IN CROSS-CULTURAL PERSPECTIVE. (3)

Explores the theoretical and substantive basis for contemporary thinking about gender from an anthropological perspective. Gender content is explored in several cultures representing all levels of sociocultural complexity.

ANT 429 SURVEY OF MEDICAL ANTHROPOLOGY. (3)

This course provides a survey of health, disease, and healing in non-Western and Western societies. An examination of major theoretical perspectives in medical anthropology.

ANT 432 ANTHROPOLOGY OF EASTERN EUROPE AND RUSSIA. (3)

An anthropological approach to the cultural, political, and economic experiences of people living under state socialism and through its demise. We ask how everyday life and social relations in this region are being affected by emerging market relations and democracy. Reading include ethnographic studies and the works of essayists, fiction writers, and scholars from the region. Prereq: ANT 160 or ANT 220.

ANT 433 SOCIAL ORGANIZATION. (3)

This course provides an overview of how anthropologists approach the study of social organization. The class will provide historical and conceptual background to the study of social organization, and explore a range of organizational forms from rural households to complex communities.

ANT 435 CULTURES AND POLITICS OF REPRODUCTION. (3)

This course takes a cross-cultural approach to understanding the ways reproduction and associated phenomena (such as family formations and the social use of technologies) comprise arenas where social relations become created and challenged. Ethnographic case studies will explore cross-cultural constructions of the body (sexuality, anatomy and physiology), parenthood, and kinship relations; and students will examine the ways the state, social movements, legal/medical experts, and lay persons struggle to appropriate reproductive potentials for their own needs. Prereq: ANT 220 or WS 201 or permission of instructor.

ANT 440 ANTHROPOLOGICAL PERSPECTIVES ON CHILD GROWTH. (3)

This course examines basic concepts of child growth and development, the evolutionary pattern of human growth and comparative patterns of human growth across populations. Taking a biocultural approach, it explores the many influences that facilitate or constrain child growth, including poverty, gender ideology, nutrition, and illness, focusing especially on social inequality. Taking a child-centered approach, the course also focuses on the lives of children, how children cope with the circumstances of their lives, and the effect of those circumstances on their well-being.

ANT 450 SYMBOLS AND CULTURE. (3)

Examines the way in which symbolic systems create the meanings through which we experience life. The course will explore symbols and symboling behavior from a humanistic perspective, and will present examples of non-Western symbolic systems. Prereq: ANT 220, or consent of instructor.

ANT 470G REGIONAL AMERICAN ETHNOGRAPHY. (3)

The ethnography of a selected North American or South American culture area or group. Both historical and contemporary cultures will be considered, e.g., Appalachia, Northwest Coast Indians, Urban American, etc. May be repeated to a maximum of six credits.

ANT 506 SOCIOLINGUISTICS. (3)

This course is an advanced survey of current areas of research in sociolinguistics. Topics include dialectology, language variation and change, interactional sociolinguistics, language and gender, bilingualism, and language contact. Prereq: LIN 221 or LIN 222 or SOC 101 or ANT 220. (Same as LIN/SOC 506.)

ANT 507 LINGUISTIC ANTHROPOLOGY. (3)

This course is an advanced survey of current areas of research in linguistic anthropology. Topics include language and thought, cultural differences in linguistic interaction, the ethnography of communication, ritual uses of language, language and identity and cultural poetics. Prereq: LIN 221 or LIN 222 or SOC 101 or ANT 220. (Same as LIN 507.)

ANT 515 PHONOLOGICAL ANALYSIS. (3)

This course is an investigation of the systematic properties of speech sounds in natural languages. It compares current theoretical approaches to the analysis of individual features and sounds as well as larger prosodic units, and identifies the dimensions of typological variation in the phonological domain. Discussion includes extensive reference to languages other than English. Prereq: LIN 221. (Same as LIN 515.)

ANT 516 GRAMMATICAL TYPOLOGY. (3)

This course examines the typological classification of languages according to their morphological and syntactic characteristics. Course work includes practical training in the writing of grammatical descriptions and in the elicitation, transcription, and analysis of data from a non-Western language. Discussion includes extensive reference to languages other than English. Prereq: LIN 221. (Same as LIN 516.)

ANT 519 HISTORICAL LINGUISTICS. (3)

This course studies the historical development of language through time and space, examining the internal mechanisms and external influences involved in language change. Change will be examined at all levels: orthographic, phonetic, phonological, morphological, syntactic, semantic, and lexical. The course will also investigate a variety of topics related to the phenomenon of language change: language classification; comparative linguistics; the reconstruction of linguistic systems; the social context of language change. Through study of these issues, students will gain insights into historical language varieties and writing systems; relationships among the world's languages; and the origins of the sounds, words, and structures of the languages we speak today. Prereq: LIN 221 and LIN 222. (Same as LIN 519.)

ANT 525 APPLIED ANTHROPOLOGY. (3)

Principles of policy research and intervention in cultural anthropology with attention to the theoretical and ethical basis of such research and intervention. Intervention techniques considered include research and development anthropology, action anthropology, community development, community advocacy anthropology and culture brokerage. Prereq: Nine hours of cultural anthropology or consent of instructor.

ANT 530 ELITES IN CROSS-CULTURAL PERSPECTIVE. (3)

This course examines elites in different areas of the world paying special attention to what defines them as power holders, their sub-cultures, histories, strategies of class reproduction, and relations to subaltern groups. The class will also explore the critical perspectives gained from studying up, as well as the theoretical and methodological difficulties of doing this kind of work.

ANT 534 SOCIOLOGY OF APPALACHIA. (3)

A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing regional political economy, society and culture in a global context. Prereq: Sociology, Anthropology or CLD senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as CLD/SOC 534.)

#ANT 536 GLOBAL APPALACHIA. (3)

Appalachia has always had strong global connections, environmentally, economically, and culturally. Current cultural and political economic issues in the region will be examined in comparative perspective through studying related histories and concerns of communities in Appalachia and other mountain regions, including social and economic marginalization within nation-states, resource extraction, low-wage work, migration, and environmental challenges. Students will have the opportunity to communicate directly with residents and scholars of several different global mountain regions, to consider sustainable livelihoods, identity in relationship to place, and social movements.

ANT 541 ARCHAEOLOGICAL METHOD AND THEORY. (3)

Examines the concepts, aims and methodology of archaeology as a scientific discipline within the social sciences. Attention given to the basic principles and recent advances of archaeological fieldwork and post-field analysis. Prereq: ANT 240 and six hours of cultural anthropology or archaeology courses, or consent of instructor.

ANT 543 CULTURAL RESOURCE MANAGEMENT. (3)

Introduction to the theory and practice of culture resource management as it has developed in the historic preservation movement in the United States. The history of preservation is covered along with the development of the contemporary legal tools. The implications of these for the field evaluation of sites is presented. Prereq: Nine hours cultural anthropology or archaeology, or consent of instructor.

ANT 545 HISTORICAL ARCHAEOLOGY. (3)

Historical archaeology applies archaeological methods and techniques to the remains of societies having written histories. The course introduces students to the history and theoretical development of the discipline, and to the variety of the data sources used by historical archaeologists. Particular attention is given to the ways in which historical archaeologists use material culture to address research issues of interest in anthropology, history, and other relevant disciplines. Prereq: ANT 240.

ANT 555 EASTERN NORTH AMERICAN ARCHAEOLOGY. (3)

Detailed analysis of prehistoric cultures of eastern United States with emphasis on interpretation of prehistory in Ohio River Valley. Prereq: ANT 240 and six hours of archaeology or cultural anthropology, or consent of instructor.

ANT 580 ADVANCED TOPICS IN ANTHROPOLOGY. (3)

Selected topics of theoretical or methodological importance in anthropology, with special attention to topics of contemporary relevance. Refer to Schedule of Classes for topics. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

ANT 581 INDEPENDENT WORK IN ANTHROPOLOGY. (1-4)

May be repeated three times to a maximum of 12 credits. Prereq: Major in anthropology, standing of 3.0 in the department and consent of instructor.

ANT 582 SENIOR INTEGRATIVE SEMINAR. (3)

Seminar focusing on current issues in anthropology. Purpose is to provide a format in which advanced undergraduates can integrate knowledge acquired in previous anthropological course work and evaluate the contribution of the different anthropological subdisciplines to understanding contemporary problems. Emphasis placed on oral and written communication. Prereq: Major in anthropology; senior standing.

ANT 585 FIELD LABORATORY IN ARCHAEOLOGICAL RESEARCH. (3-6)

Practical supervised training in-field in archaeological research methods and techniques, problem analysis, field laboratory procedures, recording methods. Laboratory, 20 to 40 hours per week. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

ANT 600 PRACTICUM IN TEACHING ANTHROPOLOGY. (1)

Guided practical experience in teaching, supplemented with group discussions of teaching practice and selected reading on lecture technique, course development, test writing and other skills for participation in the professoriate. May be repeated to a maximum of three credits. Prereq: Graduate status in anthropology or consent of instructor.

ANT 601 THEORIES AND CONCEPTS IN ANTHROPOLOGY. (3)

This course is an intensive examination of the theoretical perspective in anthropology. While attention will be given to the historical foundations of anthropological theory, emphasis will be placed on contemporary concerns in anthropology as illustrated through the contributions of selected theorists. Prereq: Admission to Graduate Program or approval of instructor.

ANT 603 HUMAN BIOLOGY IN CONTEXT OF SOCIOCULTURAL CHANGE. (3)

This course explores the relationship between society, culture, and human biology. Its thematic focus will be how cultural ideologies and social organization play out with respect to the biology of human groups, both archaeological and contemporary populations. We will pay special attention to issues of class, gender and ethnicity and focus on demographic and health-related issues. Current issues in biological anthropology, including critical analysis of evolutionary/adaptation theory and the concept of "race" in contemporary human populations will also be addressed. Prereq: First-year graduate standing in Anthropology, or permission of instructor.

ANT 604 SOCIAL ORGANIZATION, KINSHIP AND IDENTITIES. (3)

Social organization is a core component of anthropology. This seminar encompasses both historical and contemporary approaches to this central focus of the discipline. It includes the major theoretical approaches to the study of social organization and examines key concepts such as kinship and collective identity. Topics include how human groups are defined, organized, perpetuated, and change; as well as the role of individuals in broader social structures. Prereq: Graduate standing in Anthropology.

ANT 608 ANTHROPOLOGY OF FOOD AND NUTRITION. (3)

This graduate seminar explores food as fundamental to human existence in a variety of ways. We eat to maintain life – and the nutritional characteristics of human diets shape the development and health of individuals and populations. But, for the most part, humans do not eat nutrients, humans eat food, and food consumption and production is an intensely cultural, social and political activity. We will explore food and nutrition from all these perspectives. In addition to theorizing food and nutrition, we will become familiar with the methods most often used by national and global scholars and practitioners for assessing dietary and nutritional status of individuals and populations. Prereq: Graduate standing in Anthropology or permission of instructor.

ANT 610 HISTORY OF THEORY IN ANTHROPOLOGY. (3)

This course aims to give graduate students a firm grounding in the development of anthropological thought from its roots in Enlightenment social philosophy and 19th century evolutionism to the emergence of poststructuralist theory in the late 20th century. Upon completion of this course students should be thoroughly familiar with the major theoretical schools and debates in the history of anthropology and the broader social discourses that shaped them. Prereq: Graduate standing in Anthropology or permission of instructor.

ANT 620 TOPICS AND METHODS OF EVALUATION. (3)

An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to: provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as EDP/EPE 620/SOC 622.)

ANT 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)

An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE 620/SOC 622; and consent of instructor. (Same as EDP/EPE 621.)

#ANT 631 RESEARCH ETHICS IN THE SOCIAL SCIENCES. (1)

This course will provide students with an understanding of the ethical dimensions of social science research. Students will learn about the ethics guidelines of different social science disciplines and discuss case studies illustrating the kinds of ethical dilemmas that researchers may encounter. The course will also examine such topics as procedures of the Institutional Review Board and the protection of human subjects; ethical implications of community-based and/or participatory research; and the relationship between ethics, research methodologies, and modes of documentation.

ANT 637 SOCIOCULTURAL DIMENSIONS OF ECONOMIC DEVELOPMENT. (3)

Examination of social, cultural and economic conditions in lesser developed countries. Discussion of the various socioeconomic and cultural theories of change and developments, and of alternative policies for the world of the future. Considers the possible roles for social scientists in policy formulation and application. Prereq: Six graduate credits in social sciences or consent of instructor. (Same as SOC 637.)

ANT 640 SCIENCE, AGRICULTURE, AND DEVELOPMENT. (3)

An in-depth examination of the interrelations between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as CLD/SOC 640.)

ANT 641 GENDER ISSUES IN DEVELOPMENT. (3)

An examination of gender issues in domestic and international development. Prereq: Graduate standing in the social or agricultural sciences or permission of the instructor. (Same as SOC 641.)

ANT 645 ANTHROPOLOGY AND EPIDEMIOLOGY. (3)

This course will introduce students to the fundamentals of epidemiology, as the methodological approach, which underlies biomedical research, and will examine the ways that the methodologies of anthropology and epidemiology complement each other in the study of health and disease. The course will examine the points of similarity between anthropology and epidemiology particularly as regards the importance of examining sociocultural phenomena in order to better understand the origins of disease. The course will explore the tensions between anthropology and epidemiology in matters of methodology, exemplified by the debate over quantitative vs. qualitative approaches, as well as theoretical perspective. Prereq: Permission of instructor.

ANT 646 GLOBAL HEALTH: PEOPLE, INSTITUTIONS AND CHANGE. (3)

This course presents anthropological studies of health in an international context, attending to ways in which anthropological study can contribute to identification of issues relevant to health and development. It will have a dual focus. First, it will deprivilege western concepts and explore both indigenous and biomedical accounts of health. Topics may include culturally-defined syndromes, international medicines and health, and illness and body from an

international, ethnographic perspective. Second, the course will explore the culture of international health agencies, e.g., WHO, UNICEF, etc. Prereq: Permission of instructor.

ANT 650 THEORY IN ARCHAEOLOGY. (3)

This seminar examines the development of archaeological theory with specific emphasis on the discipline of anthropological archaeology in the New World. Particular schools and trends in contemporary archaeological theory are discussed in detail. Prereq: ANT 541 or consent of instructor.

ANT 651 ARCHAEOLOGICAL DATA ANALYSIS. (3)

This course examines the manipulations of archaeological data that follow fieldwork. These procedures, usually consisting of data processing and classification, are often undertaken in the field as data are being gathered. Data organization and analysis are the basic goals of this course. May be repeated to a maximum of six credits. Prereq: ANT 541 or consent of instructor.

ANT 652 HOUSEHOLD, COMMUNITY, AND DEMOGRAPHIC ARCHAEOLOGY. (3)

A seminar which examines the theory and methodology used by archaeologists to study population aggregates ranging from individual households to regional populations. Particular emphasis given to theoretical perspectives which integrate ecological, social and spatial analyses of population data. Prereq: Graduate standing in the Department of Anthropology or consent of instructor.

ANT 653 PREHISTORIC ECONOMICS. (3)

This seminar examines the theory and methodology used by archaeologists to study and reconstruct the economic structure of past societies. Discussion examines forms of subsistence and craft production and systems of resource distribution and exchange. Prereq: ANT 541 or consent of instructor.

ANT 654 ARCHAEOLOGY OF POLITICAL SYSTEMS. (3)

This course is designed to study the archaeology of political systems. The goals are to discuss the major trends, concepts, and perspectives in researching event and process in the evolution of political organization and social integration. A corollary goal is to examine the empirical evidence for, and archaeological correlates of, political evolution. It is not intended as a comprehensive coverage of all theories about past political systems, or as a survey of the rise and development of political forms in complex societies around the world. Prereq: ANT 541, ANT 602 or consent of instructor.

ANT 660 ETHNOGRAPHIC RESEARCH. (3)

Intensive graduate seminar designed to help students develop skills in ethnographic data collection and analysis. The aim of the course is to explore the processes through which anthropologists collect data and then transform materials of ethnographic research into analyses and interpretations. We will give careful consideration to the process of writing and issues specific to writing ethnography. Prereq: Graduate standing in Anthropology or permission of instructor.

ANT 662 RESEARCH DESIGN. (3)

Guided individual student research covering the relationship between theory, methods, and reality: how to better design anthropological inquiry. Prereq: One year graduate work in anthropology and consent of advisor.

ANT 684 FARMING SYSTEMS RESEARCH METHODS. (3)

A critical analysis of the concepts, methods, and practices of farming systems research. Design and carry out an FSR project. Prereq: Graduate standing in the social or agricultural sciences. (Same as SOC 684.)

ANT 691 CULTURAL RESOURCE MANAGEMENT CLERKSHIP. (1-3)

Practical experience in aspects of the cultural resource management process are provided through a one-semester rotation of work in the Office of State Archaeology (OSA), Museum of Anthropology (UKMA), and the program for Cultural Resource Assessment (PCRA). Students are assigned tasks at each work assignment rotation during the semester and are evaluated on the basis of work performance and a journal summary of this experience by a committee of their supervisors. Prereq: Graduate standing in anthropology or consent of instructor.

ANT 724 ANTHROPOLOGY OF THE STATE. (3)

This seminar will offer a critical approach to the study of states and related political forms, with special emphasis on anthropology's contributions to theorizing about the state. Drawing on temporally and spatially diverse examples of state-making, statecraft, and ideologies of the state, it will both question definitions of the state as well as engage in ethnographic exploration of past and current states. Other topics will include related political forms such as tribes, nationalist movements, empires, and multi-lateral actors. Prereq: Graduate standing or consent of instructor.

ANT 725 SEMINAR IN APPLIED ANTHROPOLOGY. (3)

Seminar discussion and individual or group research in the applications of social anthropology theory and methods to the solution of institutional, community, regional or national problems. Attention will be given to ethics, to the role attributes of the applied anthropologist, and to the history of applied anthropology. Prereq: ANT 601 or consent of instructor.

ANT 731 SEMINAR IN SOCIAL AND POLITICAL DYNAMICS. (3)

Theoretical frameworks for the analysis of political systems and processes. The seminar explores politics as action and systemic process in contemporary, prehistoric, and historical contexts. Students are expected to formulate research questions and discuss current theory in

a critical fashion. Prereq: ANT 601 and 602 or consent of instructor.

ANT 732 SEMINAR IN ECOLOGICAL ANTHROPOLOGY. (3)

A study of interrelationship among populations, organization, environment, technology and symbols. The course focuses on recent anthropological contributions to the understanding of ecological relationships both now and in the past, including how people exploit the environment and how resource exploitation results in environmental change. Prereq: Completion of ANT 601 and ANT 602 or consent of instructor.

ANT 733 SEMINAR IN SYMBOLS AND MEANING. (3)

Seminar in the development of anthropological approaches to cultural meaning in actions, thought, and language from the 1960s. Includes the social structural approach to symbolism and ritual, cognitive approaches to meaning, the anthropology of experience and expression, interpretive and post-modern approaches, and topical applications of these approaches. Prereq: ANT 601 and 602 or consent of instructor.

ANT 734 SEMINAR IN ECONOMIC ANTHROPOLOGY. (3)

Theoretical frameworks for the analysis of economic systems and processes. The seminar explores the interaction between economic phenomena and other aspects of social and political organization both as action, structure, and systemic process in contemporary, prehistoric, and historical contexts. Students are expected to formulate research questions and discuss current theory in a critical fashion. Prereq: ANT 601 and 602 (ANT 538 is recommended) or consent of instructor.

ANT 735 SEMINAR IN PRACTICE AND ACTION. (3)

Comparative analysis of various modes of social action including action research, advocacy, cultural action, and participatory action research. Foundations in social theory considered. Prereq: Admission to graduate program in anthropology or consent of instructor.

ANT 736 CULTURE, ENVIRONMENT AND DEVELOPMENT. (3)

This seminar explores the interrelationships between social processes, development and the environment. It provides the graduate student with the necessary theoretical and analytical tools to examine the social and cultural processes of environmental degradation and change. Topics include political ecology, health impacts of development, deforestation, resource tenure systems, environmental grassroots movements and large-scale development organizations. Prereq: Consent of instructor. (Same as SOC 737.)

ANT 737 SOCIOCULTURAL THEORIES IN THE ANTHROPOLOGY OF GENDER. (3)

Anthropological approaches to the study of gender have proliferated since the 1970s. The primary objective of this seminar is to provide participants with an overview of some of the salient "schools" that have emerged, and through comparison, critically to assess their limitations and utility for both theoretical and applied objectives. Prereq: Graduate standing in anthropology, or permission of instructor.

ANT 738 SEMINAR IN REGIONAL ARCHAEOLOGY. (3)

This course examines contemporary issues and theory in the archaeology of a particular region of the world. Students may take this course up to 9 credit hours under a different region each time course is offered. Prereq: Graduate Standing in Anthropology or permission of instructor.

ANT 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ANT 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ANT 750 GRADUATE FIELD STUDY IN ANTHROPOLOGY. (1-6)

Field research as part of a long-range anthropological research program for graduate interns training under direct faculty supervision. Provides student with experience conducting scientific research as research team member. Report required. Laboratory, three hours to full time. Prereq: Appropriate language fluency; preparatory area study plus consent of instructor.

ANT 760 PRACTICUM IN APPLIED ANTHROPOLOGY. (1-6)

Practical field experience in which the student applies the theory and method of social anthropology to the solution of a problem defined by the student in consultation with a community or a public or private service agency. Required of all doctoral students in Applied Anthropology. Prereq: Consent of instructor.

ANT 765 ADVANCED SEMINAR IN MEDICAL ANTHROPOLOGY. (3)

(1) Advanced history and theory of medical anthropology; (2) research design, field work, analysis of data in medical anthropology. Prereq: Consent of instructor. (Same as BSC 765.)

ANT 766 GENDER, ETHNICITY AND HEALTH. (3)

This course will bring the anthropology of gender to the study of medical anthropology. We will examine the interconnections between gender, ethnicity, and class in relation to the greater and lesser likelihood of disease. We will explore differences in health in relation to the resources available and the treatment modalities called upon by people in different social locations within the United States, and internationally. We will also look at the symbolic importance given to different phenomena related to the body, disease, and healing. This course will draw heavily upon the ethnographic literature to develop conceptual accounts of gender, ethnicity, class, and health. Prereq: Permission of instructor.

Course Descriptions

ANT 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ANT 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

ANT 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

ANT 770 TOPICAL SEMINAR: (Subtitle required). (3)

Intensive work in particular fields of anthropology. May be repeated four times. Prereq: Graduate standing in Anthropology, or consent of instructor.

ANT 774 FOOD AND FOOD SECURITY IN A CHANGING WORLD. (3)

This cross-cultural seminar explores the biocultural interactions among food, human biology, and the social, cultural, political and economic factors that shape food-related behaviors and nutritional status of populations. Topics include the social role of food, food beliefs and ideology, the political economy of malnutrition, development strategies and food security, and methods in nutritional anthropology research. Readings and discussions are research focused and approach issues from a variety of theoretical perspectives. Prereq: ANT 601 or consent of instructor. (Same as BSC 774.)

ANT 775 CULTURES AND POLITICS OF REPRODUCTION. (3)

This course takes a cross-cultural approach to understanding how reproduction and associated phenomena (family formations and the social use of technologies) comprise arenas where broader political debates become played out, and social relations become created and contested. Ethnographic case studies include cross-cultural constructions of the body, parenthood, and kinship relations; and we examine how the state, social movements, legal/medical experts, and lay persons struggle to appropriate reproductive potentials for their own needs. Prereq: Graduate standing in Anthropology or consent of instructor.

ANT 776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)

The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutional dependency; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as SOC/PSY/BSC 776.)

ANT 790 RESEARCH PROBLEMS IN ANTHROPOLOGY. (1-6)

Intensive study in the fields of physical anthropology, archaeology and ethnology with qualified staff members. May be repeated to a maximum of nine credits. Prereq: Admission into the graduate program.

APP Appalachian Studies

APP 200 INTRODUCTION TO APPALACHIAN STUDIES. (3)

A multidisciplinary introduction to Appalachian culture, history and society. Examines how Appalachia came to be viewed as a distinct region; looks at its place in American life.

APP 300 TOPICS IN APPALACHIAN STUDIES (Subtitle required). (3)

Study of topics relevant to Appalachian Studies, such as gender, folklore, literature, religion, community development, public policy, social movements and social change. May be repeated to a maximum of twelve credits under different subtitles. Prereq: APP 200 or consent of instructor.

APP 311 APPALACHIAN ENGLISH. (3)

The Appalachian Mountains, which range from New York to Mississippi, making up part of the landscape of 13 different states, are known to many Americans as being home to a unique cultural and linguistic experience. In this course, we will examine the extent to which this uniqueness is true, considering the nature of many myths and stereotypes that exist about this variety. We will discuss certain lexical, phonetic, syntactic, and other linguistic features that set this variety apart from other American varieties while also noting the features the speech of Appalachia shares with others. We will examine the history, origins, and development of English in Appalachia and address issues of identity, education, and standardness with respect to the English of Appalachia. (Same as ANT 341/LIN 311.)

APP 395 INDEPENDENT STUDY. (1-6)

Independent study of special topic under the supervision of Appalachian Studies-affiliated faculty. Students must identify both a topic for this project as well as a faculty mentor who has agreed to supervise this project. May be repeated to a maximum of six credits. Prereq: APP 200.

APP 399 PRACTICUM. (1-6)

A field-, community-based, practical or applied educational experience supervised by an Appalachian Studies Program faculty affiliate. May be repeated to a maximum of 6 hours. Pass-fail only. A learning contract must be filed in order to receive credit for this course. Prereq: APP 200.

#APP 500 SPECIAL TOPICS

IN APPALACHIAN STUDIES (Subtitle required). (3)

An interdisciplinary study of topics, related to, or relevant for the Appalachian region. Topics may include global Appalachia, participatory action research in Appalachia, crime and deviance in Appalachia, Appalachian environmental issues, public health issues in Appalachia, critical regional studies, critical and comparative mountain regions, or any other topics relevant to the region.

A particular course may be offered at most three times under the 500 number. Open to all university students subject to such limitations or prerequisites as set by the instructor. Repeatable to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

ARC Architecture

ARC 101 DRAWING I: OBSERVATIONAL FREEHAND DRAWING. (3)

Focuses on the rigors of observational drawing. Structure, space, contour, line, and color are explored through study of the human body, still life, landscape, and architectural spaces with attention to their application to the architectural experience. Studio: 6 hours per week. Prereq: Admission to the School of Architecture.

ARC 111 INTRODUCTION TO HISTORY AND THEORY. (3)

Introduces enduring themes and generative forces in the history and theory of architecture by examining the cultural periods of various societies in different historical periods.

ARC 151 DESIGN STUDIO I. (6)

Students investigate two-dimensional media, analyze buildings and text, and construct models as a means to explore basic environmental design principles. The studio continues with an emphasis on three-dimensional exploration and construction. Students investigate architectural design programs and materials of constructions. Studio: 12 hours per week. Prereq: Admission to the School of Architecture.

ARC 199 TOPICS IN ARCHITECTURE. (3)

This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 203 DIGITAL MEDIA WITHIN ARCHITECTURE. (3)

A workshop that introduces students to the creative, analytical and generative potential of computers in the design of architecture. Lecture: one hour; laboratory: four hours per week. Prereq: Admission to the School of Architecture.

ARC 212 HISTORY AND THEORY I: 15TH-17TH CENTURIES. (3)

An overview of the key themes and historical developments in architecture from the fifteenth through seventeenth centuries. Emphasis on Western examples and relationships with earlier and later conditions, including contemporary problematics.

ARC 213 HISTORY AND THEORY II: 18TH-19TH CENTURIES. (3)

Continues the investigation of key themes and historical developments of architecture in the eighteenth and nineteenth centuries. Prereq: ARC 212 or consent of instructor.

ARC 231 STRUCTURAL AND MATERIAL CONCEPTS. (3)

Introduces technological concepts of building and investigates the spatial and formal language of architecture with visual and physical analyses of various building structures and materials through the use of computers, field observations, etc. Prereq: Admission to the School of Architecture; MA 109 or MA 123. Paired with: ARC 252.

ARC 252 DESIGN STUDIO II. (6)

Students gain understanding of architectural language based on modern archetypes. Projects explore aesthetic and poetic possibilities while also emphasizing cohesion among space, structure, site, program, and material assembly. A variety of assembly types are introduced for the examining of structural and materials concepts. Studio: 12 hours per week. Prereq: ARC 151 with a grade of C or better. Paired with course: ARC 231. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ARC 253 DESIGN STUDIO III. (6)

Extends the consideration of the issues related to the isolated object to the multiplication of that object with reference to issues of site and context, focusing attention on formal strategies for obtaining thematic unity. Studio: 12 hours per week. Prereq: ARC 252 with a grade of C or better.

ARC 299 TOPICS IN ARCHITECTURE. (3)

This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 314 HISTORY AND THEORY III: 20TH CENTURY AND CONTEMPORARY ARCHITECTURE. (3)

Investigates modern and late twentieth century architecture as well as current themes and issues in contemporary architecture in relation to their historical context. Satisfies graduate writing requirement for Architecture Majors. Prereq: ARC 111, ARC 212 and ARC 213; or consent of the instructor. This course is a Graduation Composition and Communication Requirement

(GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ARC 315 HISTORY AND THEORY OF ARCHITECTURE IV: URBAN FORMS. (3)

An investigation of the factors and a consideration of the theories which have affected world urban form related to architecture. Prereq: ARC 314, or consent of the instructor.

ARC 332 ENVIRONMENTAL CONTROLS I. (3)

Design, analysis and coordination of building systems to meet basic human needs and social expectations of the built environment. Considers ecology when addressing the thermal environment, water, sanitation, concentrated energy, circulation, life-safety, and communication. Prereq: ARC 231. Paired with: ARC 354.

ARC 333 ENVIRONMENTAL CONTROLS II. (3)

A continuing investigation into ideas and issues raised in ARC 332, Environmental Controls I. Prereq: ARC 332. Paired with: ARC 355.

ARC 354 DESIGN STUDIO IV. (6)

Studies the formal characteristics of site and context together with laws and principles of building and nature, ecology, and the ways these forces influence architecture. The studio investigates applications of current technology and building systems. Studio: 12 hours per week. Prereq: ARC 253 with a grade of C or better. Paired with course: ARC 332.

ARC 355 DESIGN STUDIO V. (6)

Explores the architectural problem of a large-scale interior space conditioned by social and cultural programs. Special problems in lighting and acoustics will be addressed along with long-span structure. Attention will be paid to issues of scale, life safety social interaction and public circulation. Studio: 12 hours per week. Prereq: ARC 354 with a grade of C or better. Paired with course: ARC 333.

ARC 399 TOPICS IN ARCHITECTURE. (3)

This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 405 DIGITAL VISUALIZATION I. (3)

Students are introduced to concepts of computer visualization as applied to the study of architecture. Students will utilize modeling, rendering, and animation software to create three-dimensional representations of selected projects. Lecture: two hours; laboratory: two hours per week. Prereq: ARC 203.

ARC 406 DIGITAL VISUALIZATION II. (3)

A continued exploration of computer visualization with particular emphasis on a specific software. Subtitle required. Lecture: 1 hour; laboratory: four hours per week. Prereq: ARC 405.

ARC 410 INDEPENDENT STUDY. (3)

An independent study of architecture history and/or theory, wherein a student will research a specific topic agreed upon with a designated faculty member of the college. Laboratory, six hours per week. May be repeated to a maximum of six hours.

ARC 434 STRUCTURAL DESIGN AND ANALYSIS I. (3)

An exploration of structural concepts with an emphasis on statics, strength of materials, and the use of mathematical and computer-aided methods of analysis. Prereq: ARC 231.

ARC 435 MATERIALS AND METHODS OF CONSTRUCTION. (3)

An intensive exploration of materials and building techniques with special consideration given to the properties of materials and their uses in various methods of construction. Prereq: ARC 231.

ARC 456 DESIGN STUDIO VI. (6)

This studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 355 with a grade of C or better.

ARC 457 DESIGN STUDIO VII. (6)

This studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 455 or ARC 456 with a grade of C or better.

ARC 499 TOPICS IN ARCHITECTURE. (3)

This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 510 GENERATIVE AND CRITICAL STRATEGIES. (3)

This course explores, studies, and tests various visual and analytical tools used by designers to understand their work in order to understand the relationship of form, content, and performance of a design. Students will use these tools to gain an understanding of buildings, spaces, objects, contexts, and landscapes from a wide range of cultures and time periods. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

ARC 511 HISTORY AND THEORY SEMINAR: PRE-20TH CENTURY (Subtitle required). (3)

One of a series of graduate seminars devoted to investigations and analyses of pre-twentieth century architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 512 HISTORY AND THEORY SEMINAR: MODERN (Subtitle required). (3)

One of a series of graduate seminars devoted to investigations and analyses of modern architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 513 HISTORY AND THEORY SEMINAR: CONTEMPORARY (Subtitle required). (3)

One of a series of graduate seminars devoted to investigations and analyses of contemporary architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 514 HISTORY AND THEORY SEMINAR: THEORY AND CRITICISM (Subtitle required). (3)

One of a series of graduate seminars devoted to investigations and analyses of architectural theory and criticism. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 515 HISTORY AND THEORY SEMINAR: URBAN FORMS (Subtitle required). (3)

One of a series of graduate seminars devoted to investigations and analyses of urban forms. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

ARC 533 STRUCTURAL DESIGN AND ANALYSIS II. (3)

An exploration of structural concepts for the materials of steel and wood, including considerations of load and resistance as factors in architectural design. Prereq: ARC 434.

ARC 534 ADVANCED STUDIES IN STRUCTURAL SYSTEMS. (3)

An exploration of structural concepts relating to construction with the materials concrete and masonry, including discussion of stress and load as considerations in architectural design. Prereq: ARC 533.

ARC 550 ACCELERATED DESIGN I. (9)

Accelerated Design I: immersion through design in the comprehensive elements that order architecture with emphasis on integrative strategies. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

ARC 551 ACCELERATED DESIGN II. (9)

Accelerated Design II: an immersion in the art and science of architectural design with emphasis on integrative strategies. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

ARC 584 DESIGN OF TIMBER AND MASONRY STRUCTURES. (3)

Current and historic design methods of buildings and their components using wood, wood products, bricks, and concrete blocks. Prereq: Courses in steel and reinforced concrete design at the senior level, or consent of instructor. (Same as CE 584.)

ARC 599 TOPICS IN ARCHITECTURE. (3)

This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 631 BUILDING SYSTEMS INTEGRATION. (3)

Graduate level study of the art and science of building design with emphasis given to integrative strategies for developing a comprehensive, multi-systemic, architectural project. Paired with: ARC 750.

ARC 632 SPECIAL TOPICS IN ENVIRONMENTAL CONTROLS. (3)

Advanced studies in human environmental design. Topics for research and development will include sustainability, energy, infrastructure, sanitation and water, lighting, and acoustics. Subtitle required. Prereq: ARC 332 and ARC 333.

ARC 634 ARCHITECTURAL DETAILING. (3)

A study of the art and technique of complete building design through detail development. Prereq: Completion of all technical requirements for BA in Architecture or equivalent and admission to the Master of Architecture program.

ARC 641 PROFESSIONAL PRACTICE. (3)

An exploration of professional and ethical responsibilities of the architect as they pertain to the procedural matters of practice and management. Prereq: Admission to the M.Arch. program.

Course Descriptions

ARC 642 PROFESSIONAL INTERNSHIP. (3)

A graduate-level summer internship with a professional architectural firm in which the student, along with a faculty advisor, will determine specific experiential and educational goals to be met. Laboratory: hours to be agreed upon with selected firm (apx. 10-15 hrs/wk for duration of internship). Prereq: Admission to the M.Arch. program.

ARC 658 DESIGN STUDIO VIII. (6)

This graduate level studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 457 with a grade of C or better.

ARC 659 DESIGN STUDIO IX. (6)

This graduate level studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 658 with a grade of C or better.

ARC 699 TOPICS IN ARCHITECTURE. (3)

This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 707 DIGITAL MEDIA: HISTORY AND THEORY. (3)

A graduate level seminar exploring the impact of digital media on visualization and the theoretical implications arising from its use as a means of visual expression. Laboratory: 6 hours per week. Prereq: ARC 406.

ARC 709 MASTER'S PROJECT IN DIGITAL VISUALIZATION. (9)

A final, comprehensive project in the digital visualization concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Digital Visualization concentration.

ARC 719 MASTER'S PROJECT IN HISTORY/THEORY/CRITICISM. (9)

A final, comprehensive project in the history, theory, and criticism concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the History, Theory and Criticism concentration.

ARC 729 MASTER'S PROJECT IN HISTORIC PRESERVATION. (9)

A final, comprehensive project in the historic preservation concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Historic Preservation concentration.

ARC 735 PROJECT DELIVERY. (3)

A study in the execution of an architectural design including contract documents, cost estimation, and construction management. Prereq: Completion of all technical requirements for BA in Architecture or equivalent and admission to the Master of Architecture program.

ARC 736 BUILDING CODES AND DESIGN. (3)

An analysis of content and format of current model building codes combined with discussion of the necessity for building codes, problems in interpretation and applications as well as legal aspects involved. Prereq: Completion of all technical requirements for BA in Architecture or equivalent and admission to the Master of Architecture program.

ARC 738 CONSTRUCTION SPECIFICATIONS. (3)

A study in defining the quality of materials used in architectural design. Prereq: Admission to the Master of Architecture program.

ARC 743 ADVANCED PROFESSIONAL PRACTICE. (3)

A continuation of concepts introduced in ARC 641, Professional Practice, with an emphasis in issues relating to the legal, business, and organizational considerations of architectural practice as well as investigations into advocacy and the public and private leadership roles of the architect. Prereq: ARC 641.

ARC 748 MASTER'S PROJECT RESEARCH. (0)

Half-time to full-time work on Master's Project. May be repeated a maximum of six times. Prereq: All course work toward the degree must be completed.

ARC 750 DESIGN STUDIO X. (6)

Utilizing given site and program requirements, graduate students explore design issues comprehensively by producing a developed and detailed building design. Students will engage in structural design, environmental systems, life-safety and post-design assessments as required to meet the most current NAAB standards for a comprehensive studio. Studio: 12 hours per week. Prereq: ARC 659.

ARC 759 MASTER'S PROJECT IN BUILDING DESIGN. (9)

A final, comprehensive project in the building technology and tectonics concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Building Design concentration.

ARC 761 SPECIAL PROBLEMS IN TOWN DESIGN. (3)

Students explore various topics related to the theory and practice of existing, emerging and new strategies for city and town development, revitalization, and long-term sustainability. Subtitle required. Prereq: Admission to the Master of Architecture program.

ARC 779 MASTER'S PROJECT IN TOWN DESIGN. (9)

A final, comprehensive project in the town design concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Town Design concentration.

ARC 799 TOPICS IN ARCHITECTURE. (3)

This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ART

Art

ART 100 INTRODUCTION TO ART. (3)

This course is open to all University students interested in an understanding and appreciation of the visual arts. The formal and expressive qualities of major art forms are examined through lectures and presentations.

ART 191 ART PROFESSIONS. (1)

Lectures and discussions on the various art professions as they affect the student, the professional artist, the art historian, the art educator, and the community. May be repeated to a maximum of eight hours.

ART 291 B.F.A. STUDIO PRACTICUM. (1)

The study and practice of professional techniques of the organization and maintenance of the art studio environment. Orientation and application of best practices for health and safety. Prereq: Acceptance into B.F.A. program and consent of instructor.

ART 301 PROFESSIONAL PRACTICES. (3)

This course is designed to assist Art Studio majors in developing practical writing and presentation skills needed to maintain a successful, professional practice in the visual arts. Students are required to write in a variety of formats that are standard in the field of art studio. The course will include developing artist and biographical statements, resumes, grant/exhibition proposals and/or reviews, as well as a research paper on a topic of interest in contemporary art. Students will also prepare a digital portfolio emphasizing presentation and documentation skills about a student's own research. Prereq: Majors only; completion of all pre-major/Foundations course-work and completion of 60 credit hours. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

#ART 504 CURATORIAL PRACTICE: HISTORY, THEORY, PRACTICE. (3)

An introduction to the history, theory, and practice of curatorial studies through readings, discussion, critical writing and independent research. Intended for advanced students, this seminar will expand students' understanding of curatorial practice and guide them as they develop a particular curatorial project. Prereq: Junior standing or above, and consent of the instructor.

#ART 604 CURATORIAL PRACTICE: CURATORIAL PROJECTS. (3)

In this course students will realize a curatorial proposal developed in ART 504. The focus will be on implementation, marketing, didactics, and education programming. Students will gain practical experience in promotion, budgeting, time and resource management, and professional standards within the field of curatorial studies. Prereq: Graduate status, consent of instructor, and ART 504 required.

***ART 748 INDEPENDENT THESIS RESEARCH. (0)**

Independent work on thesis project. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

***ART 768 THESIS PREPARATION AND PRESENTATION. (3)**

Independent study to formulate, prepare and present M.F.A. thesis project under the direction of thesis advisor. A formal learning contract between student and thesis advisor is required. Prereq: Good standing as graduate student in curatorial studies; permission of thesis advisor.

#ART 794 INTERNSHIP: BOLIVAR GALLERY. (3)

A supervised internship in the SAVS Bolivar Art Gallery. The aim is to give students hands-on experience handling art, installing exhibitions, writing wall text, completing condition reports and contracts, and doing social media outreach. Interns will work directly with artists and the gallery director, and the content of their work, developing written pieces for digital publication and promotion (website, social media, etc.). Learning contract required. Practicum, 40 hours per credit hour. Prereq: Graduate status in Curatorial Studies.

#ART 795 INTERNSHIP: UK ART MUSEUM. (3)

A supervised internship in the UK Art Museum. The aim is to strengthen the students' skills in research, writing, and speaking through practical applications in the profession through area-specific placement. While interns may do a variety of tasks throughout the internship, the majority of time will be spent working within one of the following departments: curatorial, development, education, or registration. Learning contract required. Practicum, 40 hours per credit hour. Prereq: Graduate status in Curatorial Studies.

#ART 796 INTERNSHIP: COMMUNITY PARTNERS. (3)

A supervised internship with a community partner who integrates the arts into their programming. The focus may be on a single aspect or several areas of community engagement

through the arts such as exhibition development, event planning, fundraising, promotion, administration, etc. A formal learning contract among student, field supervisor, and supervising faculty member required. Practicum, 40 hours per credit hour. Prereq: ART 794 and ART 795 required.

#ART 797 INTERNSHIP: ARTS ORGANIZATION. (3)

A supervised internship at a local, national, or international arts organization that relates to a student's research interests. The aim is to help develop programming that aligns with the mission of the organization. Interns may perform a wide variety of tasks such as curating, fundraising, marketing, education, administration, etc. A formal learning contract among student, field supervisor, and supervising faculty member required. Practicum, 40 hours per credit hour. Prereq: ART 794 and ART 795 required.

ASC Animal Sciences

ASC 101 DOMESTIC ANIMAL BIOLOGY. (3)

The first in a sequence of two courses providing an introduction to the subject of animal science. Emphasis is placed on a fundamental understanding of anatomy, physiology, nutrition, reproduction, genetic and behavior of domestic animals. [Offered in fall only.]

ASC 102 INTRODUCTION TO LIVESTOCK AND POULTRY PRODUCTION. (3)

The second in a sequence of two courses providing an introduction to the subject of animal science. Emphasis is placed on the application of scientific disciplines of anatomy, physiology, nutrition, reproduction, genetics and behavior in the management of domestic animals. Prereq: ASC 101. Primary registration access limited to College of Agriculture, Food and Environment majors and remaining seats open during secondary registration. [Offered in spring only.]

ASC 106 ANIMAL AGRICULTURE IN THE MODERN WORLD. (3)

Relationships of food production and consumption to income of humans throughout the world; major livestock (beef and dairy cattle, sheep, swine, poultry and horses) production areas of the world; relationships between live animal merit and yield of retail cuts of meat; identification of skeletal components; identification and functions of reproductive and digestive tract components; characteristics of breeds of beef and dairy cattle, sheep, swine, poultry and horses.

ASC 205 CAREER DEVELOPMENT FOR ANIMAL SCIENCES. (1)

Local experts in a wide variety of animal production enterprises and associated support services will give presentations on their area of expertise. Following the presentation, students will have the opportunity to discuss the topic of the day and potential employment opportunities in that field with the speaker. Prereq: ASC 102 (or concurrent enrollment). [Offered in fall and spring.]

ASC 209 VETERINARY MEDICAL TERMINOLOGY. (3)

This course will cover veterinary terminology including medical word roots, prefixes, suffixes and animal specific terminology involving food animals, horses and pets. Veterinary case studies will allow students to apply these fundamentals in practical situations. Appropriate for pre-vets and any students interested in animal health and care.

ASC 300 MEAT SCIENCE. (4)

A historical perspective of the meat industry together with major changes in body type and composition in both the live animal and its end product meat. Students will evaluate live market animals (swine, cattle, sheep), harvest the market animals, and follow their carcasses and cuts through fabrication and distribution channels. Major topics of discussion will focus on growth and development, inspection, grading, physical and chemical composition of meat and postmortem changes that affect meat quality. Additional information will cover meat marketing trends, nutrition, meat cookery, meat selection, health issues and consumer information. Prereq: ASC 101 and ASC 102. [Offered in fall only.]

ASC 301 LIVESTOCK SELECTION AND EVALUATION. (3)

Selection principles of purebred and commercial beef cattle, sheep, swine and horses. Evaluation of live animal and carcass characteristics of beef cattle, sheep and swine. Emphasis placed on oral reasons. Laboratory, six hours. Prereq: Junior or senior standing or consent of instructor. [Offered in fall only.]

ASC 303 EVALUATION AND GRADING OF MEATS. (2)

A detailed consideration of the factors involved in the selection, grading and evaluation of carcasses and wholesale cuts of beef, pork and lamb. Specific emphasis will be given to cutability, quality and maturity as they relate to palatability and acceptance by the consumer. Laboratory, four hours. Prereq: FSC 304 or FSC 306. [Offered in spring only.]

ASC 309 ADVANCED EVALUATION AND GRADING OF MEAT. (2)

Further consideration of the factors involved in selecting, grading and evaluating carcasses and wholesale cuts of beef, pork, and lamb. Emphasis will be placed on writing reasons. Laboratory, four hours. Prereq: ASC 303 or consent of instructor. [Offered in fall only.]

ASC 310 EQUINE ANATOMY. (2)

Anatomy of the horse's systems. Topics will include the anatomy of skeletal, muscular, respiratory, digestive, cardiovascular, and nervous systems. By the end of the course the students will be able to name and identify all the equine bones and their respective anatomical landmarks, know the equine muscles and tendons responsible for locomotion and their respective skeletal attachments, and describe the anatomy and recognize the function of the equine respiratory, cardiovascular, digestive, and nervous systems. Prereq: ASC 101. [Offered in fall and spring.]

ASC 311 ADVANCED EQUINE EVALUATION. (1)

Advanced study of conformation and performance in the horse. Selection of horses of different breeds based on conformation, breed character and movement. Emphasis will be placed on developing a knowledge of industry standards and preparation of oral reasons. Prereq: ASC 310. [Offered in fall only.]

ASC 312 ADVANCED LIVESTOCK SELECTION AND EVALUATION. (2)

Selection of purebred and commercial beef cattle, sheep, swine and horses. Special emphasis on oral reasons, livestock contest procedures and herd improvement principles. Laboratory, six hours. Prereq: ASC 301 or consent of instructor. [Offered in spring only.]

ASC 320 EQUINE MANAGEMENT. (3)

Study of the basic principles associated with horse management. Topics will include equine behavior, equine diseases and herd health programs, facilities and environmental management, nutrition and feed management. Lecture, two hours; laboratory, three hours per week. Prereq: ASC 101. [Offered in fall, spring (online), summer (online).]

ASC 321 DAIRY CATTLE EVALUATION. (2)

Evaluation of dairy cattle for type characteristics. Laboratory, four hours. [Offered in spring only.]

ASC 323 ADVANCED DAIRY CATTLE EVALUATION. (1)

Open only to those who have consent of instructor. Laboratory, two hours. Prereq: ASC 321. [Offered in fall only.]

ASC 325 ANIMAL PHYSIOLOGY. (3)

An introduction to the functional anatomy and physiology of major body systems in domestic animals. Emphasis will be on how these systems interact to regular circulation, gas exchange, acid-base balance, digestion and metabolism, location and adapting to environmental changes. Prereq: BIO 152, junior standing or consent of instructor. [Offered in fall only.]

ASC 333 TOPICS IN ANIMAL SCIENCE (Subtitle required). (1-4)

Intensive study in a unique aspect of animal agriculture not covered in other courses currently offered. May be repeated under a different subtitle two times to a maximum of 8 credits. Prereq: Specified by instructor for each offering.

ASC 340 POULTRY PRODUCTION. (2)

A study of the application of avian biology to modern poultry production. Topics include anatomy, physiology, reproduction, incubation and embryonic development, breeding and genetics, nutrition and feeding, disease control, housing and environmental control, management, poultry and egg products, and the structure of the poultry industry. For majors and non-majors. Prereq: ASC 101 or ASC 102 or equivalent or permission of the instructor. [Offered in spring only.]

ASC 362 ANIMAL BREEDING AND GENETICS. (4)

Study of genetics as applied to specific companion animals and livestock species. Roles of selection and mating systems and their expected consequences are examined when applied to qualitative and quantitative traits expressed by specific companion animals and various livestock species. Prereq: ASC 101, BIO 152. [Offered in spring only.]

ASC 364 REPRODUCTIVE PHYSIOLOGY OF FARM ANIMALS. (4)

Introduction to anatomy and physiological processes related to reproduction with a focus on farm animals. Evaluations of management procedures as they related to reproductive physiology. Prereq: ASC 101 and BIO 152. Primary registration access limited to College of Agriculture, Food and Environment majors and remaining seats open during secondary registration. [Offered in spring only.]

ASC 378 ANIMAL NUTRITION AND FEEDING. (4)

A fundamental study of the nutrients, their utilization and their role in the animal in conjunction with an applied understanding of the manner in which feedstuffs are evaluated and blended to meet the various species needs for those nutrients. Prereq: ASC 101 and CHE 230 or CHE 236. [Offered in fall only.]

ASC 380 APPLIED ANIMAL NUTRITION. (3)

The composition and nutritional characteristics of common feedstuffs. The digestive systems, nutritional requirements, formulated rations and economical feeding programs for farm animals. Prereq: ASC 378 or consent of instructor. [Offered in fall (online).]

ASC 382 ANIMAL PRODUCTION PRINCIPLES. (3)

A broad survey of animal agricultural management covering cattle, horses, poultry, swine, sheep and goats. Emphasis is placed on the practical application of scientific disciplines including anatomy, physiology, nutrition, reproduction and genetics. For nonmajors only. [Offered in spring only.]

ASC 388 COMPANION ANIMAL NUTRITION. (3)

This course offers an introductory look at the nutrition of companion animals, primarily the dog and cat. Basic concepts in nutrition, food chemistry, biochemistry, digestive physiology and microbiology will be addressed as they pertain to pet health and well being. Prereq: CHE 230 or CHE 236 or equivalent. [Offered in spring only.]

ASC 389 APPLIED EQUINE NUTRITION AND FEEDING. (2)

This course examines the feeding management of broodmares, growing horses, performance horses and horses with special needs. Lecture material covers common equine feeds, feed and ration analysis, factors influencing the utilization of feeds by horses, and factors affecting nutrient requirements and feeding management of the different classes of horses. Prereq: A course in nutrition or consent of instructor. [Offered in spring only.]

ASC 395 SPECIAL PROBLEM IN ANIMAL SCIENCES. (1-4)

Independent study in Animal Sciences under the supervision of a faculty member. May be repeated for a maximum of eight credits. Prereq: Consent of appropriate instructor. [Offered in fall and spring.]

ASC 399 EXPERIENTIAL LEARNING IN ANIMAL SCIENCES. (1-6)

A field-based learning experience in animal sciences under the supervision of a faculty member. May be repeated to a maximum of six credits on a pass/fail basis. Prereq: Consent of instructor and department chairperson and completion of a departmental learning contract before registration. [Offered in fall and spring.]

ASC 404G SHEEP SCIENCE. (4)

History and importance of the sheep industry; application of the principles of selection, breeding, feeding and management of sheep for efficient lamb and wool production. Lecture, three hours per week; laboratory, three hours per week. Prereq: ASC 300, ASC 362, ASC 364, ASC 378 or consent of instructor. [Offered in fall only.]

ASC 406 BEEF CATTLE SCIENCE. (4)

Scope and importance of the beef cattle industry; roles of the major cattle breeds and organizations associated with the beef cattle industry; application of equipment, identification, nutrition, reproduction, genetics, health, marketing, taxation and management principles to beef cattle production; impact of current economic, social and environmental issues on the beef cattle industry. Lecture, three hours; laboratory, three hours. Prereq: ASC 300, ASC 362, ASC 364 and ASC 378 or consent of instructor. [Offered in fall only.]

ASC 408G SWINE PRODUCTION. (3)

A study of scope and importance of the swine industry. Application of principles of breeding, reproduction, nutrition, housing, health, and management of swine in modern production systems. Prereq: ASC 101 and ASC 102. [Offered in spring only.]

ASC 410G EQUINE SCIENCE. (3)

Detailed study of the anatomy and physiology of the horse as they relate to the nutrition, reproduction, athletic ability, unsoundness and control of diseases and parasites. Lecture, two hours; laboratory, two hours. Prereq: ASC 310, ASC 364, and ASC 378. [Offered in spring only.]

ASC 420G DAIRY CATTLE MANAGEMENT. (3)

Scope and importance of the dairy cattle industry; selection, breeding, housing, feeding and management of dairy cattle. Lecture, two hours; laboratory, two hours. Prereq: ASC 325, ASC 364 and ASC 378 or consent of instructor. [Offered in fall only.]

†**ASC 435 WILDLIFE SCIENCE AND APPLICATIONS.**

ASC 470 CAPSTONE FOR ANIMAL AGRICULTURE. (3)

Discussion of the importance of livestock production to society and consideration of major issues impacting animal agriculture. Principles and practices learned in disciplinary and commodity Animal Sciences courses are integrated into a unified perspective, and the scientific method is employed as an approach to problem analysis and resolution. Refinement of skills in critical thinking, information gathering, writing, and oral communication is emphasized. Prereq: Senior standing in College of Agriculture, Animal Sciences major. [Offered in fall and spring.]

ASC 499 ACADEMIC ENRICHMENT EXPERIENCE IN ANIMAL SCIENCES. (1)

Development and evaluation of the student's required academic enrichment experience (study abroad, undergraduate research, internship, student mentorship, leadership, etc.) Prereq: Open to Animal Sciences majors only.

ASC 564 MILK SECRETION. (3)

Anatomy of the mammary gland, physiology and biochemistry of milk secretion and management factors affecting yield and composition of milk. Prereq: ASC 101 and BIO 152. [Offered in spring only.]

ASC 601 MAMMALIAN ENDOCRINOLOGY. (3)

An introduction to the basic anatomy, physiology and biochemistry of endocrine systems with emphasis on mechanisms of hormone synthesis, secretion and action. Lectures and reading assignments will focus on endocrine function in mammalian species, including laboratory animals, humans and livestock. Prereq: BCH 401G and BIO 350 or equivalents. (Same as PGY 601.)

ASC 602 INTEGRATED NUTRITIONAL SCIENCES II. (3)

Integrated study of the properties, metabolism, biochemical and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601, PGY 206. (Same as CNU/NS 602.) [Offered in spring - odd years.]

ASC 630 ADVANCED MEAT SCIENCE. (4)

Advanced meat science with special reference to the histological, chemical, physical and microbiological properties as they relate to meat quality, organoleptic acceptability and processing procedures. Lecture, three hours; laboratory, two hours. Prereq: FSC 304, FSC 306 or equivalent; one course in histology or biochemistry or consent of instructor. (Same as FSC 630.) [Offered in spring - even years.]

ASC 660 BIOLOGY OF REPRODUCTION. (3)

Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but

are not limited to) molecular and cellular endocrinology, hormone receptors and mechanism of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC/PGY 601 and ASC 364 or BIO/PGY 502 or consent of instructor. (Same as PGY 660 and ANA 660.) [Offered in spring - odd years.]

ASC 680 LABORATORY METHODS IN NUTRITIONAL SCIENCES. (4)

The use of laboratory techniques and instrumentation in the solution of fundamental problems of nutrition. Lecture, one hour; laboratory, six hours. [Offered in fall - odd years.]

ASC 681 ENERGY METABOLISM. (2)

An in-depth discussion of nutritional energetics, from the standpoint of factors which influence the utilization of dietary energy. A critical review of current literature. Prereq: ASC 378 or equivalent, BCH 502 or equivalent or consent of instructor. [Offered in spring - odd years.]

ASC 683 PROTEIN METABOLISM. (2)

A study of the principles and present concepts of protein and amino acid nutrition and metabolism in the animal. Prereq: Graduate level biochemistry. [Offered in fall only.]

ASC 684 ADVANCED RUMINANT NUTRITION. (3)

Principles of ruminant metabolism in the utilization of feedstuffs for meat, milk, and wool production. Prereq: ASC 682 and two or more courses from ASC 681, ASC 683, ASC 685 and ASC 687 or consent of instructor. [Offered in spring - even years.]

ASC 685 MINERAL METABOLISM. (2)

An in-depth review of the function, requirement deficiency and toxicity of mineral elements in nutrition. Emphasis on the interactions between elements and current literature will be made. Prereq: ASC 378 or NFS 510 or equivalent, BCH 502 or equivalent or consent of instructor. [Offered in spring - even years.]

ASC 686 ADVANCED NONRUMINANT NUTRITION. (3)

A study of nutrient utilization as influenced by digestion, absorption and metabolism with emphasis on swine and poultry. Prereq: One course each in nutrition and biochemistry.

ASC 687 VITAMIN METABOLISM. (2)

Detailed study of the metabolism of vitamins and the role of vitamins in the metabolism of carbohydrates, proteins, lipids, and minerals. Prereq: BCH 502 or CHE 552 or consent of instructor. [Offered in spring - odd years.]

ASC 688 EQUINE NUTRITION. (2)

Detailed study of anatomical, physiological and microbiological factors influencing the nutritive requirements of the equine for maintenance, growth, reproduction, lactation and work. Prereq: One course in nutrition and physiology or biochemistry or consent of instructor. [Offered in fall - even years.]

ASC 689 PHYSIOLOGY OF NUTRIENT DIGESTION AND ABSORPTION. (3)

An analysis and comparison of the structure and function of mammalian and avian gastrointestinal tracts, of feedstuff digestive processes, and of specific mechanisms responsible for nutrient absorption in various cell types. Emphasis is placed on livestock and avian species. Prereq: Graduate level Biochemistry. [Offered in fall - even years.]

ASC 690 MACRONUTRIENT METABOLISM IN DOMESTIC ANIMALS. (2)

An in-depth study of macronutrient metabolism and how it can be influenced by nutrition in both ruminant and non-ruminant species. Students will learn the important principles of macronutrient metabolism in domestic animals through lectures, evaluation of the current scientific literature and presentations. Prereq: 3 credits in biochemistry (BCH 401G, IBS 601, or equivalent) and 3 credits in animal nutrition, or consent of the instructor.

ASC 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in fall, spring and summer.]

ASC 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ASC 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in fall, spring and summer.]

ASC 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

ASC 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

ASC 771 ANIMAL SCIENCE SEMINAR. (1)

May be repeated twice for a maximum of three credits. [Offered in fall and spring.]

ASC 777 ADVANCED TOPICS IN ANIMAL SCIENCE (Subtitle required). (1-4)

Intensive study in a unique aspect of animal agriculture not covered in other graduate courses currently offered. May be repeated under a different subtitle two times to a maximum of 8 credits. Prereq: Permission of instructor.

ASC 780 SPECIAL PROBLEMS IN ANIMAL DERIVED FOODS. (1-4)

May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as FSC 780.) [Offered in fall and spring.]

ASC 781 SPECIAL PROBLEMS IN GENETICS AND ANIMAL BREEDING. (1-4)

May be repeated to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 782 SPECIAL PROBLEMS IN ANIMAL NUTRITION. (1-4)

May be repeated to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 783 SPECIAL PROBLEMS IN REPRODUCTIVE PHYSIOLOGY (Subtitle required). (1-4)

Intensive study or investigation of topics in physiology not covered in formalized courses. May be repeated under different subtitle to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 790 RESEARCH IN ANIMAL DERIVED FOODS. (1-6)

Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as FSC 790.)

ASC 791 RESEARCH IN GENETICS AND ANIMAL BREEDING. (1-6)

Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 792 RESEARCH IN ANIMAL NUTRITION. (1-6)

Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

ASC 793 RESEARCH IN REPRODUCTIVE PHYSIOLOGY (Subtitle required). (1-6)

Original investigation of mechanisms and problems related to mammalian reproduction. May be repeated under different subtitle to a maximum of nine credits. Prereq: Consent of graduate adviser. [Offered in fall and spring.]

AST Astronomy**AST 191 THE SOLAR SYSTEM. (3)**

A course emphasizing the nature, origin and evolution of planets, satellites and other objects in the Solar System. Topics also include historical astronomy, the naked eye phenomena of the sky and modern solar system discoveries made by spacecraft. This course may be taken independently of AST 192.

AST 192 STARS, GALAXIES AND THE UNIVERSE. (3)

A course covering the universe outside the Solar System. A principle theme is the origin and evolution of stars, galaxies and the universe at large. Topics also include black holes, quasars and the big bang model of the universe. This course may be taken independently of AST 191.

AST 310 TOPICS IN ASTRONOMY AND ASTROPHYSICS (Subtitle required). (3)

Readings, research, discussions and lectures to illuminate problems of contemporary significance in astronomy and astrophysics. May be repeated to a maximum of six credits under a different subtitle. Prereq: To be announced with subtitle.

AST 395 INDEPENDENT WORK IN ASTRONOMY. (1-3)

Students may select an approved topic for study under the direction of a faculty member. May be repeated to maximum of 12 credits. Prereq: Major and a standing of 3.0 in the department.

AST 591 ASTROPHYSICS I - STARS. (3)

The physics of stars from star formation to stellar death. Topics include stellar structure and evolution, energy generation and transport, the later stages of stellar evolution and stellar remnants. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as PHY 591.)

AST 592 ASTROPHYSICS II - GALAXIES AND INTERSTELLAR MATERIAL. (3)

The physics of galaxies and of the interstellar medium. Topics include galaxy formation, evolution and interaction, phases of the interstellar medium, and physical processes in the interstellar medium. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as PHY 592.)

AST 639 PHYSICAL PROCESSES IN ASTROPHYSICS. (3)

A lecture and problem course covering the physical processes encountered in astrophysics. The topics covered will include micro-physical processes in stellar atmospheres and the interstellar medium, high-energy astrophysics, and basic hydrodynamics and shock waves. Prereq: PHY/AST 592 or consent of instructor. (Same as PHY 639.)

AT Athletic Training**#AT 120 CAREERS IN ATHLETIC TRAINING. (1)**

An overview of the Athletic Training profession(s) including aspects of professional practice, areas of specialization, professional issues and trends, and career paths and opportunities. The course will consist of assignments, lectures and interactive discussions led by faculty and visiting professionals designed to expand students' understanding of the profession(s) and to assist in educational and career planning and discernment.

AT 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)

Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient's individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as HS 500, CLS 500, CNU 500, CD 500, PAS 500.)

#AT 510 LIFE-THREATENING AND EMERGENCY CONDITIONS DURING PHYSICAL ACTIVITY. (3)

This is a course designed for students pursuing licensure as an Athletic Trainer or a similar professional license in a health care profession that requires the ability to understand, recognize and manage life-threatening and emergency conditions. This is part of a sequence of courses that focus on sports injury assessment and recognition. The overall objectives are for the students to provide foundational and conceptual information for the body systems most commonly involved in emergency conditions during physical activity. Students will learn to recognize life-threatening emergency conditions, identify the body systems in crisis, and the associated threats to those body systems. The student will be required to demonstrate competencies in written and practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky.

#AT 520 MANAGEMENT AND ADMINISTRATION IN ATHLETIC TRAINING. (3)

This is a course designed to students pursuing a certification in Athletic Training or similar professional license in health care professions that focuses on the concepts related to the administration of athletic training programs including legal aspects and regulation of clinical practice, department and personnel management, budgeting, medical records management, risk management planning, facility design, development of referral programs and basic program outcome assessment methods. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky.

#AT 550 EVIDENCE-BASED PRACTICE IN ATHLETIC TRAINING. (3)

This is a course designed for students pursuing a certification in Athletic Training or similar professional license in health care professions that exposes the students to importance of supportive, validated research to establish evidence for clinical practice. Lectures will provide foundation information for students to understand the 5 steps of seeking and integrating research into clinical practice. The student will be required to demonstrate competencies in evidence based concepts in written examinations, as well as complete a written and oral presentation of a literature review that utilizes evidence based concepts to address a clinical question. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky.

#AT 591 FOUNDATIONS AND PATHOPHYSIOLOGY OF THE MUSCULOSKELETAL SYSTEM: MUSCLE/TENDON AND NERVE. (3)

This is a course designed for students pursuing a certification in Athletic Training or a similar professional license in health care professions that requires the ability to perform musculoskeletal assessment and management of injuries to the various systems of the human body. This is part of a sequence of anatomy and physiology of human body systems courses that focus on normal and disrupted structures involved in sports injuries. The overall objective is for the students to provide foundation information pertaining to structure and function of muscle, tendon and neural tissues and related systems. The student will be required to demonstrate competencies in written examinations. Prereq: Formal acceptance into the Master of Science in Athletic Training program at The University of Kentucky.

#AT 592 FOUNDATIONS AND PATHOPHYSIOLOGY OF THE MUSCULOSKELETAL SYSTEM FOR ATHLETIC TRAINERS: ARTICULAR/BONE/CARTILAGE. (3)

This is a course designed for students pursuing a certification in Athletic Training or similar professional license in health care professions that require the assessment and management of injuries to the musculoskeletal system. This is part of a series of courses whose content is organized according to anatomical and physiological human body systems. The objective of this class is to understand normal and pathological conditions of the musculoskeletal system specifically focusing on bone, ligament and cartilage structures and systems common to sports injuries. The student will be required to demonstrate competencies via written examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky.

#AT 593 FOUNDATIONS AND PATHOPHYSIOLOGY OF THE MUSCULOSKELETAL SYSTEM FOR ATHLETIC TRAINERS: INTEGUMENTARY AND IMMUNE SYSTEMS. (2)

This is a course designed for students pursuing a certification in Athletic Training or similar professional license in health care professions that requires the ability to perform musculoskeletal assessment and management of the entire human body. This is part of a sequence of anatomical and physiological of human body systems courses that focus on normal and disrupted structures involved in sports injuries. The overall objective is for the students to provide foundation information of integumentary and inflammatory body systems. The student will be required to demonstrate competencies in written examinations. Prereq: Formal acceptance into the Master of Science in Athletic Training program at The University of Kentucky.

#AT 610 ASSESSMENT AND MANAGEMENT OF LIFE-THREATENING AND EMERGENCY CONDITIONS DURING PHYSICAL ACTIVITY. (4)

This is a course designed for students pursuing a certification in Athletic Training or similar health care professions that require patient assessment and the management of life threatening, emergency conditions. A combination of lectures and laboratory experiences will be provided in order for the student to learn and demonstrate appropriate assessment and care for patients of all ages with a variety of medical conditions and traumatic injuries. The overall objective is for the students to be able to survey, deliver and manage emergency conditions that are likely to occur during athletic competition or physical activity. The student will be required to demonstrate competencies in assessment and management with both written and practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky. AT 510 Foundational Systems for Athletic Trainers: Life-Threatening and Emergency Conditions.

#AT 620 GENERAL MEDICAL CONDITIONS IN THE PHYSICALLY ACTIVE. (3)

This is a course designed for students pursuing a certification in Athletic Training or similar professional license in health care professions that requires the study of the pathology, etiology and presentation of common general medical conditions in active populations. Systems will include cardiovascular, respiratory, gastrointestinal, genitourinary, reproductive, and neurologic conditions most common to the physically active. In addition, concepts of pharmacology including pharmacokinetics, basic drug classifications and legal aspects of use will be covered. Specific focus will be placed on common therapeutic drugs used in sports medicine. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky.

#AT 640 PRACTICUM IN ATHLETIC TRAINING. (2-6)

This is a course designed for students pursuing a certification in Athletic Training. This course may be repeated up to 6 times as part of a sequence of practicum courses that combines supervised field experience with review of clinical skills from the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. Students will complete a range of preceptor supervised clinical hours (100-300) and credit hours (2-6 credit hours) that will vary per semester. Additionally, students will be required to demonstrate proficiency in competencies specific to the semester content. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky.

#AT 641 CLINICAL INTEGRATION I: LOWER EXTREMITY ASSESSMENT AND MANAGEMENT. (1)

This is a course designed for students pursuing a certification in Athletic Training. This is part of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky. AT 695.

#AT 642 CLINICAL INTEGRATION II: UPPER EXTREMITY ASSESSMENT AND MANAGEMENT. (1)

This is a course designed for students pursuing a certification in Athletic Training. This is part of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky. AT 690.

#AT 643 CLINICAL INTEGRATION III: ASSESSMENT AND MANAGEMENT OF LIFE-THREATENING AND EMERGENCY CONDITIONS DURING PHYSICAL ACTIVITY. (1)

This is a course designed for students pursuing a certification in Athletic Training. This is part of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky. AT 510. AT 610.

#AT 644 CLINICAL INTEGRATION IV: THERAPEUTIC MODALITIES AND ADVANCED THERAPEUTIC REHABILITATION. (1)

This is a course designed for students pursuing a certification in Athletic Training. This is part

of a sequence of courses that provides a review of clinical skills in the classroom. The overall objective of this course sequence is to integrate clinical skills into clinical experiences, while emphasizing clinical decision making. The student will be required to demonstrate proficiency in competencies specific to the semester content, as well as evaluated on practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky. AT 690. AT 691. AT 695.

AT 660 DIRECTED STUDY IN ATHLETIC TRAINING. (1-3)

A specific topic in Athletic Training related to the student's interests is selected for intensive study. Work to be supervised by a graduate faculty member proficient in the area under investigation. May be repeated to a maximum of six credits. Prereq: Graduate standing and consent of instructor.

AT 670 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING I. (2)

An introduction to the research process in athletic training. The importance of pursuing quality research in athletic training will be stressed and the procedures necessary to complete this process will be presented. May be repeated to a maximum of 8 credits. Prereq: Graduate standing and consent of the instructor.

AT 671 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING II. (2)

The second course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the methodological procedures of designing and pursuing research in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 672 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING III. (2)

The third course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the design of research and synthesis of data in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 673 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING IV. (2)

The final course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will focus on developing the skills needed to critically synthesize material with accepted practice, and prepare professional presentations using acquired data and an appropriate statistical analysis. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing, and consent of instructor.

AT 680 SPECIAL TOPICS IN ATHLETIC TRAINING: (Subtitle required). (1-3)

Study of emerging topics of current high interest in athletic training. May be repeated to a maximum of 9 credits. Prereq: Graduate standing and consent of instructor.

AT 682 CLINICAL SEMINAR IN ATHLETIC TRAINING. (1)

This is an advanced athletic training course encompassing a wide range of topics related to all domains of the athletic training profession. The primary focus of this course will be on the presentation of case studies for group discussion and contribution. This course will utilize a combination of discussion, review, and student presentation.

AT 685 PRINCIPLES AND APPLICATION OF KINESIOLOGICAL EMG. (3)

To introduce the student to the principles and application of kinesiological electromyography (EMG). Kinesiological EMG research incorporates the study of human movement with direct assessment of the muscles involved with human motion. The primary aim for this course is to provide the student with background and practical knowledge of kinesiological EMG in order to be able to perform and critically analyze kinesiological EMG studies. Students will enhance their understanding of neuromuscular properties of skeletal musculature. Students will be exposed to the common procedures used to collect, analyze, and interpret both surface and indwelling kinesiological EMG research. Prereq: KHP 615 or comparable graduate level biomechanics course, the course can be taken concurrently. Approval of instructor.

AT 690 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE UPPER EXTREMITY. (4)

Current evaluation and rehabilitation of upper extremity and upper spine injuries that commonly occur in athletic, recreational or occupational activities. A combination of lecture, laboratory techniques will be used to review current practice and interventions. Prereq: Graduate standing and consent of instructor.

#AT 691 THERAPEUTIC MODALITIES FOR ATHLETIC TRAINERS. (3)

This is a course designed to students pursuing a certification in Athletic Training or similar professional license in health care professions that requires the ability to treat and manage symptoms of musculoskeletal conditions using therapeutic modalities. A combination of lectures and laboratory experiences will be provided in this class in order for the student to gain theoretical knowledge and practical application of the use of these physical agents. The overall objective is for the students to develop the skills necessary to select appropriate modalities that can be used when providing care for musculoskeletal injuries sustained by physically active individuals. The student will be required to demonstrate competencies in therapeutic modality applications with both written and practical examinations. Prereq: Formal acceptance into the Master of Science degree program in Athletic Training at The University of Kentucky. AT 591 Foundational Systems, Disorders and Disruptions in Athletic Injury: Muscle/Tendon/Nerve.

AT 592 Foundational Systems, Disorders and Disruptions in Athletic Injury: Articular/Bone/Cartilage. AT 590 Anatomical Musculoskeletal Dissection.

AT 692 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE SPINE. (4)

This is an advanced athletic training course encompassing a regional study of orthopedic evaluation and management of the cervical, thoracic, and lumbar spine. A combination of lecture, applied evaluation and rehabilitation techniques, critical reviews of the literature, discussion, and student presentations will be employed. Prereq: Graduate standing and consent of instructor.

AT 695 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE LOWER EXTREMITY. (4)

Current evaluation and rehabilitation of lower extremity and lumbar spine injuries that commonly occur in athletic, recreational or occupational activities. A combination of lecture, laboratory and student presentation and written reviews of current practice and interventions will be employed. Prereq: Graduate standing and consent of instructor.

AT 700 MUSCLE MECHANICS. (3)

This is an advanced athletic training course encompassing a wide range of topics related to all aspects of skeletal muscle form and function. The primary focus of this course will be on the mechanical properties of skeletal muscle, and translational aspects of basic science research and clinical care.

AT 720 SPORTS MEDICINE. (3)

A study of the basic areas covered in sports medicine with readings and discussions of current international trends in the research and practice in this field. Prereq: Twelve semester hours; credit in the field of biological sciences; consent of instructor. (Same as KHP 720.)

AT 740 MUSCULOSKELETAL ANATOMICAL DISSECTION. (3)

This course is a 3-credit cadaver anatomy laboratory course, which will include examination and dissection of the human cadaver. Lectures and laboratory experience will emphasize the musculoskeletal, articular, nervous, and vascular systems particularly as they relate to athletic injury mechanism and evaluation.

AT 768 RES CR MASTERS DEGREE. (1-3)

Residency credit for master's thesis.

B&E Business and Economics

B&E 102 MICROSOFT OFFICE SPECIALIST – WORD. (0)

This course is designed to give students experiences with the Microsoft Office Application of Word 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification Exam in Word 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 103 MICROSOFT OFFICE SPECIALIST – POWERPOINT. (0)

This course is designed to give students experience with the Microsoft Office Application of PowerPoint 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification in PowerPoint 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 104 MICROSOFT OFFICE SPECIALIST – EXCEL. (0)

This course is designed to give students experience with the Microsoft Office Application of Excel 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification Exam in Excel 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 105 TECHNOLOGY FOR BUSINESS SOLUTIONS. (1)

This course prepares pre-major students in the Gatton College of Business & Economics to use business software at a high level of proficiency and focuses on Microsoft Excel and Access. Lectures will be supplemented with hands on experiences with business problems. Prereq: ACC 201 and ECO 201, pre-major in the Gatton College of Business & Economics, or consent of instructor.

B&E 120 LEADERSHIP IN THE GLOBAL MARKETPLACE. (3)

An introductory examination of the skills, competencies, and styles of effective global leaders. Activities include individual assessments and a personal leadership development plan. Prereq: Acceptance in the Global Scholars Certificate program.

B&E 122 THE CHALLENGE OF LEADERSHIP. (1)

Current leadership challenges as discussed by the people who confront them. Students have the opportunity to discuss leadership challenges with guest speakers from the corporate, government and non-profit sectors. Prereq: Acceptance into Global Business Leadership certificate program.

#B&E 150 BUSINESS CAREER EXPLORATION AND DECISION MAKING. (1)

B&E 150 guides students to explore business majors and career opportunities while addressing their individual decision making style. Students participate in assessment activities designed

to enhance their understanding of self, including interests, personality, skills and values – factors that influence choosing an academic major and career pathway. Students explore potential career paths of Gatton majors by participating in exploration activities and utilizing resources provided by the Graham Office of Career Management. Students learn basics for resume and cover letter development, interviewing, professionalism and business etiquette while completing the INTERVIEWready program over the span of the course. By completing this course, students will be better equipped to select internships and enrichment activities that align with their career goals.

B&E 201 INTRODUCTION TO BUSINESS. (3)

This course provides an introductory level understanding of how a business operates and how it is managed. Business concepts and activities that will be covered include business development, management, human resources, marketing, accounting and finance. Prereq: Open to all students except those admitted to the Upper Division of the Gatton College of Business and Economics.

B&E 223 INTRODUCTION TO THE ECONOMICS OF BUSINESS. (2)

Provides an introduction to the principles of microeconomics and some key concepts of macroeconomics as they relate and apply to the immediate interests of business managers. Basic tools of economics will be used to study consumer/producer behavior, how markets work, supply and demand interaction, and intra to market structure. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

B&E 240 INTER-CULTURAL BUSINESS COMMUNICATION. (3)

This course is designed to improve students' ability to communicate effectively with people from diverse cultural backgrounds. Prereq: Acceptance into Global Business Leadership certificate program.

B&E 300 CAREER DEVELOPMENT IN BUSINESS AND ECONOMICS. (1)

The course will emphasize the application of analytical, communicative, and critical thinking skills in the development of students' careers. It will address career opportunities, selection of personally appropriate career plans, and job search activities. It will enhance analytical skills through career analysis and company analysis, and enhance written and oral communication skills through their application to job search activities. Prereq: At least 60 hours of earned credit.

B&E 327 LARGER WORLD ISSUES IN BUSINESS. (3)

A case-based course that explores the nexus between business and the social issues of the day (e.g., poverty, the environment). Student activities include a case competition exercise where they examine a social issue in business and hone their analytical and oral presentation skills. Prereq: Acceptance into the Global Scholars program.

#B&E 396 INTERNSHIP SEMINAR. (1-3)

B&E 396 is an on-line seminar course taken by Gatton College business majors in conjunction with any credit-bearing, part-time internship experience during fall, spring, or summer semesters. B&E 396 is also the course credit for full time summer internships. Students work the required hours at the internship site (number of hours to be determined by the number of credit hours being earned and the internship pay status – see Graham Office Internship Guidelines and the Graham Office Pre-Internship Checklist for details) and participate in this four-session seminar course. The seminar serves as a means to provide the academic and career development supervision, supplementing the site supervisor's role in monitoring the progress of each intern. The course is designed to provide web-based discussion that provides an opportunity for students to process their internship experience and how it relates to their career goals. The seminar content focuses on professional and career development topics, such as business etiquette, navigating corporate culture, and building a professional network. Seminar content also includes academic major discipline-specific material and applications. By completing this course, students will benefit from a well-rounded professional work experience that is supported by academic and career development resources. Gatton students can earn up to 3 credit hours of experiential education credit per semester, and 6 credit hours total, which count toward their degree requirements for graduation. A student may not earn B&E 396 academic credit for the same internship experience more than one semester. This course must be taken pass/fail.

#B&E 397 FULL-TIME INTERNSHIP SEMINAR. (1)

B&E 397 is an on-line seminar course taken by Gatton College business majors in conjunction with any credit-bearing, full-time internship experience during the spring or fall semester. Enrollment in this course constitutes full-time student status. Students work the required hours at the internship site (see Graham Office Internship Guidelines and the Graham Office Pre-Internship Checklist for details) and participate in this four-session seminar course. The seminar serves as a means to provide the academic and career development supervision, supplementing the site supervisor's role in monitoring the progress of each intern. The course is designed to provide web-based discussion that provides an opportunity for students to process their internship experience and how it relates to their career goals. The seminar content focuses on professional and career development topics, such as business etiquette, navigating corporate culture, and building a professional network. Seminar content also includes academic major discipline-specific material and applications. By completing this course, students will benefit from a well-rounded professional work experience that is supported by academic and career development resources. Gatton students can earn up to 3 credit hours of experiential education credit per semester, and 6 credit hours total, which count toward their degree requirements for graduation. A student may not earn B&E 397 academic credit for the same internship experience more than one semester. This course must be taken pass/fail.

BA Business Administration

BA 700 TEACHING METHODS IN BUSINESS. (1)

A three part course that examines what constitutes good teaching and explores effective techniques for college instruction. Seminars emphasize practical information for both the principal activities and the details of teaching. Departmental discussions allow students to discuss issues that arise in their teaching practice. Reviews of classroom performance provide professional feedback in order to enhance on-the-job learning. Seminar, two hours per week. Prereq: Approval of Director of Graduate Studies. (Same as ECO 700.)

BA 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BA 762 RESEARCH METHODOLOGY. (3)

Examines fundamental concepts in design, control, and measurement for social science research with emphasis on: reliability, internal and external validity, and causality. Prereq: Admission to DBA program and prior completion of or concurrent enrollment in a graduate level course on the general linear model.

BA 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BA 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

BA 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

BAE Biosystems and Agricultural Engineering

BAE 102 INTRODUCTION TO BIOSYSTEMS ENGINEERING. (1)

An introduction to the engineering of food and fiber production and processing systems. Professionalism and the engineering approach will be emphasized.

BAE 103 ENERGY IN BIOLOGICAL SYSTEMS. (2)

This course introduces the concepts of energy transport in biological systems including the study of thermodynamics, heat transfer, psychometrics, and fluid flow. BAE 102 and prereq or concur: MA 113, or consent of instructor.

#BAE 200 PRINCIPLES OF BIOSYSTEMS ENGINEERING. (3)

The engineering problem solving approach will be practiced to analyze biological systems and to demonstrate the application of mathematical and scientific principles to engineering design. Prereq: MA 113, and concurrent with, PHY 231, CHE 105, EGR 103.

BAE 202 STATISTICAL INFERENCES FOR BIOSYSTEMS ENGINEERING. (3)

Introduction to statistics and statistical inference reasoning. Evaluation of common claims based on statistical constructs, hypothesis tests, margins of error, confidence intervals, and analysis of variation. Identification of possible statistical obstacles, such as confounding, missing data, and inappropriate randomness. Conceptual statistics will be emphasized. Special attention will be given to include biosystems engineering problems. Prereq: MA 114.

***BAE 301 ECONOMIC ANALYSIS OF BIOSYSTEMS. (2)**

The financial and managerial aspects of biosystems in evaluating design alternatives. Typical topics included are: concepts of present and future value, techniques of managerial economics, and biosystem design analysis in the evaluation of alternatives. Retirement/replacement policies and risk analysis. Prereq: BAE 202.

***BAE 305 DC CIRCUITS AND MICROELECTRONICS. (3)**

An introduction to the use of digital electronics and integrated circuits in solving biosystems engineering problems. Digital circuits, microprocessor concepts, computer interfacing, transducers, signal conditioning and control applications are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: EGR 102 and EE 305.

BAE 400 SENIOR SEMINAR. (1)

A course for senior students in biosystems engineering with emphasis on oral communications skills. Students will do literature searches on topics related to the biosystems engineering profession and present oral and written reports. Prereq or concur with BAE 402.

***BAE 402 BIOSYSTEMS ENGINEERING DESIGN I. (2)**

A design course for seniors in BAE requiring students to solve open-ended problems. Students will use previously learned engineering principles to produce actual designs which will be built and analyzed in BAE 403. Prereq: BIO 148, BIO 152, ME 330 or CE 341; EM 302; concurrently with EM 313 and ME 325.

***BAE 403 BIOSYSTEMS ENGINEERING DESIGN II. (2)**

Student design teams evaluate and enhance design solutions, fabricate prototypes, execute performance tests, analyze results, and develop final design specifications. Oral and written reports are required. Prereq: BAE 402; EM 313; ME 325.

BAE 417 DESIGN OF MACHINE SYSTEMS. (3)

A study of the operational characteristics and design features associated with production and processing equipment for food and fiber products and an introduction to conceptualization, analysis and design of these systems. Lecture, two hours; laboratory, two hours per week. Prereq: ME 330 or CE 341, EM 302; prereq or concur: EM 313.

BAE 427 STRUCTURES AND ENVIRONMENT ENGINEERING. (3)

This course teaches load estimate for light timber and concrete structures and introduces the design of heating, cooling, and ventilation systems in these structures. Prereq: CE 341 or ME 330; BIO 148 and 152; prereq or concur: EM 313.

BAE 435G WASTE MANAGEMENT FOR BIOSYSTEMS. (3)

A study of the characteristics; treatment and utilization principles; and analysis and design of systems for managing waste from the production and processing of food and fiber. Lecture, two hours; laboratory, three hours per week. Prereq: MA 214; BIO 152.

BAE 437 LAND AND WATER RESOURCES ENGINEERING. (3)

The hydrologic cycle is studied and design procedures are developed for flood control structures, water table management, wetlands, irrigation, and erosion control systems. Prereq: CE 341 or ME 330; BIO 148 and BIO 152.

†BAE 438G FUNDAMENTALS OF GROUNDWATER HYDROLOGY.

BAE 447 BIOPROCESS ENGINEERING FUNDAMENTALS. (3)

Design principles and equipment selection for the most common processing operations are studied for the manufacturing and preservation of biological materials. Topics will include the design of fluid flow systems, transient heat transfer, heat exchangers, psychometrics, and refrigeration. Prereq: BIO 148 and BIO 152; prereq or concur with ME 325.

BAE 450 SPECIAL PROBLEMS. (1-3)

An intensive study of some phases of biosystems engineering in which the student is particularly interested. Approval of instructor is required. May be repeated to a maximum of six credits. Prereq: Approval of the instructor.

***BAE 502 MODELING OF BIOLOGICAL SYSTEMS. (3)**

This course will introduce students to mathematical modeling of biological systems, both from a conceptual and methodological perspective. The art and science of developing a computer simulation model will be presented and supported by examples/exercises in MATLAB. Prereq: BAE 402.

BAE 503 FUNDAMENTALS OF BIORENEWABLE RESOURCE ENGINEERING. (3)

This course introduces students to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Topics include: Defining the resource base; physical and chemical properties of biorenewable resources; description of biobased products; methods of production for biorenewable resources.

BAE 504 BIOFUELS PRODUCTION AND PROPERTIES. (3)

This course introduces students to the science and engineering of liquid biofuels for transportation. Topics include: physical and chemical properties; engine performance; processing technologies; and environmental impact of biofuels. Prereq: BAE 503 or consent of instructor.

BAE 505 THERMOCHEMICAL PROCESSING OF BIOMASS. (3)

Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Prereq: BAE 503, BAE 504, or consent of instructor.

BAE 506 LIFE CYCLE ASSESSMENTS FOR BIORESOURCE ENGINEERING. (3)

Life Cycle Assessment (LCA) is a method in which the energy and raw material consumption, different types of emissions and other important factors related to a specific production or service are measured, analyzed and summarized over the entire life cycle. This course will cover the theory, practice and application of Life Cycle Assessment. Life Cycle Assessment is one tool in a large tool box of methods, such as Life Cycle Costing (LCC), Substance Flow Analysis (SFA), and Risk Assessment (RA), used to evaluate goods, services and systems. Prereq: Senior or graduate student standing.

BAE 513 SOIL DYNAMICS IN TILLAGE AND TRACTION. (3)

A course for advanced undergraduate and graduate students which presents the principles of dynamic soil-machine interaction. The performance characteristics of tractive devices are presented along with the corresponding soil compliance. Soil response to mechanical disturbance or tillage is also presented. Lecture, two hours; laboratory, two hours per week. Prereq: EM 313; EM 302.

BAE 515 FLUID POWER SYSTEMS. (3)

Analysis and design of fluid power systems used in agricultural, industrial and processing equipment. Selected topics to include: positive displacement components, control devices, actuators, fluid transmission and system dynamics. Lecture, two hours; laboratory, two hours per week. Prereq: ME 330, ME 340 and engineering standing.

- BAE 517 OFF-ROAD VEHICLE DESIGN. (3)**
Morphology, operational characteristics, and design considerations of off-road vehicles used in agriculture, forestry and construction. This course provides an introduction to conceptualization, analysis and design of these vehicles. Topics to be addressed include: engine performance and design, vehicle testing, turbochargers and intercoolers, drivetrains, chassis mechanics, electronic systems, hydraulic systems, and human factors. Prereq: BAE 417.
- BAE 532 INTRODUCTION TO STREAM RESTORATION. (3)**
Introduction to principles of fluvial geomorphology for application in restoring impaired streams. Topics include channel formation processes (hydrology/hydraulics), stream assessment, sediment transport, in-stream structures, erosion control, habitat, and monitoring. Prereq: CE 341 (or equivalent) and engineering standing or consent of instructor. (Same as CE 542.)
- BAE 535 ENVIRONMENTAL CONTROL SYSTEM DESIGN AND RECLAMATION. (3)**
Introduction to the principles of sustainable mine planning with a focus on environmental control system design, reclamation and restoration design, and environmental monitoring systems. Topics will include culvert and diversion design, hydrologic inputs, catchment delineation and routing, sedimentologic inputs, erosion control and best management practice selection, sediment pond design, design of silt fences, grass filters, and sediment ditches, weep berm and vegetated filter strip design, reforestation, grassland/wildlife establishment, stream restoration, wetlands/vernal ponds, environmental monitoring system design, and community integration. Prereq: MNG 291, MNG 463, and engineering standing or consent of instructor. (Same as MNG 535.)
- BAE 536 FLUVIAL HYDRAULICS. (3)**
Rainfall physics, principles of erosion on upland areas and construction sites, stable channel design in alluvial material, mechanics of sediment transport, river mechanics, reservoir sedimentation. Prereq: CE 341 or ME 330 and engineering standing. (Same as CE 546.)
- BAE 537 IRRIGATION AND DRAINAGE ENGINEERING. (3)**
Planning and design of irrigation system; sprinkler, traveling gun, center pivot, trickle, subirrigation and residential and commercial irrigating; pumps; water quality treatment and supply; ponds and wells; principles of water movement and plant-soil relationships; surface and subsurface drainage. Prereq: ME 330 or CE 341 or consent of instructor.
- BAE 538 GIS APPLICATIONS FOR WATER RESOURCES. (3)**
This course studies the principles, methodology and analysis of geographic information systems and spatially-referenced data unique to water resources and hydrologic modeling. Lectures will explore the latest GIS concepts, hydrologic modeling relationships and data sources and be complimented with computer-based laboratory exercises. Prereq: BAE 437, CE 461G, or consent of instructor. (Same as CE 568.)
- BAE 541 INTERMEDIATE FLUID MECHANICS. (3)**
Application of basic fluid mechanics to problems of importance to civil engineering practice. This includes flow measuring, closed conduit flow and pipe networks, open channel flow, turbomachinery (pumps), hydraulic structures, culvert flow. Prereq: CE 341, CS programming course, and engineering standing or consent of instructor. (Same as CE 541.)
- #BAE 543 SOLAR CELL DEVICES AND SYSTEMS FOR ELECTRICAL ENERGY GENERATION. (3)**
Physics of photovoltaic (PV) devices, emerging technologies, design of PV cells and systems, electronic components for signal conditioning, integration, installation, performance evaluation and economic issues related to PV systems. Prereq: EE 211 or EE 305 and Engineering Standing, or consent of instructor. (Same as EE 543/EGR 543.)
- BAE 545 ENGINEERING HYDRAULICS. (3)**
Analysis and Design of flow in closed conduits and natural and artificial open channels. Design of hydraulic structures. Prereq: CE 461G and engineering standing, or consent of instructor. (Same as CE 549.)
- BAE 547 WATERSHED SEDIMENTATION. (3)**
The course objective is to gain an understanding of watershed sedimentation including: (1) erosion and sediment transport processes in a watershed and the mechanisms by which the processes are initiated, developed, and worked towards equilibrium; (2) measurement of the sediment budget for a watershed using sediment fingerprinting and sediment loading data; and (3) prediction of sediment loading in watersheds with different human disturbances using hydrologic-based modeling tools. Specific emphasis will be placed on the use of natural carbon and nitrogen isotopic tracer measurements within sediment fingerprinting as a data-driven approach to measure sediment loading from different sources in a watershed. In order to fulfill the course objective, the instructor will use traditional classroom learning as well as field and laboratory components of the course in order that students can participate in hands-on learning. Prereq: CE 461G (Pre- or Co-requisite or equivalent). (Same as CE 547.)
- BAE 549 BIOLOGICAL PROCESS ENGINEERING. (3)**
An analysis of processing operations for the conversion or generation of biological materials. The course material applies thermodynamics, heat transfer, mass and energy balances, and reaction kinetics to biological process operations such as sterilization, fermentation, product recovery, freezing, drying, evaporation, and refrigeration. Applications include biomedical, food processing, and biochemical and biofuel production from biomass. Prereq: BAE 447 or consent of instructor.
- BAE 556 SOLID AND HAZARDOUS WASTE MANAGEMENT. (3)**
Study of the generation and management of solid and hazardous wastes. Application of engineering principles to the collection, transport, processing, resource recovery and ultimate disposal of these wastes. Prereq: CE 471G, CE 521 or consent of instructor and engineering standing. (Same as CE 556.)
- BAE 580 HEATING, VENTILATING AND AIR CONDITIONING. (3)**
A course emphasizing the use of thermodynamics, fluid mechanics, and heat transfer principles in thermal environmental design. Building energy requirements will be computed and thermal comfort criteria will be studied. Prereq: BAE 427 or ME 321, or consent of instructor. This course is open only to graduate students or undergraduates with engineering standing. (Same as ME 580.)
- BAE 581 PHYSICS OF PLANT AND ANIMAL ENVIRONMENTS. (3)**
A study of the thermal, moisture, light, and gaseous components of plant and animal environments with emphasis on interactions between these biological systems and their environments. Prereq: BAE 427 or consent of instructor.
- BAE 599 TOPICS IN BIOSYSTEMS ENGINEERING. (2-3)**
A detailed investigation of a topic of current significance in biosystems engineering such as: design of small earth dams, vacuum dehydration systems, small particle mechanics, biofuels, environmental control in green houses, sprinkler irrigation, energy conversion in agriculture, bio-simulation. May be repeated to a maximum of six credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the BAE 599 number. Prereq: Variable; given when topic identified.
- †BAE 618 ADVANCED PLANT, SOIL AND MACHINERY RELATIONSHIPS.**
- BAE 625 TOPICS IN ADVANCED ENVIRONMENT CONTROL AND ANALYSIS (Subtitle required). (3)**
A study of current research in environment control and analysis of agricultural, commercial and residential structures. May be repeated three times for a maximum of nine credits, but not more than three credits may be earned under a particular topic. Prereq: Senior course in environment control and HVAC, BAE/ME 580, or consent of instructor.
- BAE 642 OPEN CHANNEL FLOW. (3)**
The study of open channel flow fundamentals and concepts. Topics include uniform flow, varied flow, steady and unsteady flow, energy dissipators, flow transitions, controls, analytical and numerical solutions in 1D and 2D applications. Prereq: CE 541 or consent of instructor. (Same as CE 642.)
- BAE 643 MECHANICS OF SEDIMENT TRANSPORT. (3)**
Fundamentals of turbulence in rivers and sediment transport will be taught including recent theory, derivation of governing equations, experimental methods, modeling, and design based on sediment thresholds. Prereq: CE 341 or consent of instructor. (Same as CE 643.)
- BAE 647 SYSTEM OPTIMIZATION I. (3)**
Introduction to linear and nonlinear optimization and their use in engineering design. Emphasis on numerical approaches and use of optimization methods for engineering systems (e.g. biological, mechanical, structural). Prereq: CS 221 or equivalent; one mathematics course beyond MA 214 or equivalent. (Same as ME 647.)
- BAE 648 ENERGY AND MASS TRANSFER IN BIOSYSTEMS PROCESSING. (3)**
A comprehensive and in-depth study of the principles of energy and mass transfer as they apply to the processing of agricultural and biological materials. Prereq: BAE 549 or consent of instructor.
- BAE 652 BIOLOGICAL PROCESSES FOR WATER QUALITY CONTROL. (3)**
Principles and applications of environmental biotechnology for water quality control. Process microbiology and kinetics for various water and wastewater treatment processes. Prereq: CE 351 or consent of instructor. (Same as CE 652.)
- BAE 653 WATER QUALITY IN SURFACE WATERS. (3)**
Principles of surface water quality modeling and control. Analysis of dispersion, advection, natural aeration, biological oxidation and photosynthesis; their effects on the physical, chemical, and biological quality of waters in streams, lakes, reservoirs, estuaries and other surface waters. Prereq: CE 351 or consent of instructor. (Same as CE 653.)
- BAE 658 INSTRUMENTATION FOR ENGINEERING RESEARCH. (3)**
Instrumentation and measuring system characteristics; transducers for engineering measurements; and data acquisition and analysis. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.
- †BAE 660 SIMILITUDE IN ENGINEERING.**
- BAE 662 STOCHASTIC HYDROLOGY. (3)**
Hydrologic random variables and probability distributions. Statistical measures, development and use of Monte Carlo simulations in the generation of precipitation fields. Statistical tests of hydrologic data. Point frequency and regional frequency analysis. Analysis of hydrologic time series. Long-term trend, harmonic analysis of periodicity, autocorrelation, spectral analysis. Correlation and regression analysis. Linear stochastic models. Introduction to stochastic processes in hydrology, real-time hydrologic forecast (Kalman filter), pattern recognition, and stochastic differential equations. Prereq: MA 214, CE 461G or equivalent. (Same as CE 662.)

BAE 665 WATER RESOURCES SYSTEMS. (3)

Application of systems analysis, mathematic modeling, and optimization in water resources management and design. Solution of engineering problems found in water supply, water quality, urban drainage, and river basin development and management by use of linear, nonlinear, and dynamic programming models. Prereq: Consent of instructor. (Same as CE 665.)

BAE 667 STORMWATER MODELING. (3)

Introduction to deterministic and parametric modeling approaches for mathematically simulating stormwater runoff and quality. Emphasis on modeling concepts and model formulation. Analysis of deterministic component models and their linkage. Formulation of existing parametric models. Presentation of methods for parameter optimization and regionalization. Demonstration of linkage between the two approaches with illustrative examples. Prereq: CE 341 and CE 461G, or consent of instructor. (Same as CE 667.)

BAE 672 LANDFILL DESIGN. (3)

This course deals with the geotechnical aspects of the design of landfills for the disposal of municipal solid waste. Since landfill design is driven by state and federal regulations, time is taken to review these regulations. Landfills are evaluated as engineered systems consisting of multiple components. Each component is investigated individually, and methods are developed to predict and quantify the performance of these components so that appropriate materials, design criteria, and construction methods can be selected to assure that the landfill will function with minimal environmental impact. Prereq: CE 471G. (Same as CE 672.)

BAE 680 BIOCHEMICAL ENGINEERING. (3)

Principles and design of processes involving biochemical reactions, including aerobic and anaerobic respirations and fermentations, and involving pure and mixed cultures. Energy considerations, heat and mass transfer, biochemical kinetics, and application to biological waste treatment. Prereq: CME 550, CME 630, CHE 440G or consent of instructor. (Same as CME 680.)

BAE 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BAE 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BAE 750 SPECIAL PROBLEMS IN BIOSYSTEMS ENGINEERING. (1-3)

Independent work on selected research problems in one of the various fields of biosystems and agricultural engineering. Consultation and laboratory by appointment. May be repeated three times for a maximum of nine credits. Prereq: Approval of chairperson of department.

BAE 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BAE 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

BAE 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

BAE 775 PROFESSIONAL PRACTICES SEMINAR. (2)

Review of current research topics, methods, management tools and communications techniques with applications. Required of all departmental graduate students. May be repeated once for credit. Lecture, two hours per week. Prereq: Graduate standing.

BAE 795 THESIS. (0)

May be repeated twice.

BCH Biochemistry

BCH 395 INDEPENDENT WORK IN BIOCHEMISTRY. (3-12)

Students will carry out a laboratory research project and related reference reading. Laboratory: 9-36 hours per week. May be repeated to a maximum of 12 credits. Prereq: Permission of instructor.

BCH 401G FUNDAMENTALS OF BIOCHEMISTRY. (3)

Descriptive chemistry of amino acids and proteins, carbohydrates, lipids, and nucleic acids. Discussion of structure and function; metabolism and bioenergetics; and biological information flow. At the undergraduate level, understanding is demonstrated through hour examinations; at the graduate level, understanding is demonstrated through hour examinations and a brief paper. Lecture, three hours; one optional conference. Prereq: CHE 107, CHE 236 and BIO 152 or equivalent.

BCH 419G MOLECULAR BASIS OF HUMAN DISEASE. (3)

The goal of this course is to provide students with an understanding of the defining characteristics of the major human diseases, the molecular mechanisms responsible for causing these diseases, and some of the molecular technologies used to diagnose and treat them. Prereq: BCH 401G.

BCH 517 EXPERIMENTAL METHODS IN BIOCHEMISTRY. (4)

A laboratory course dealing with the instrumentation and procedures of biochemical research. Because many of the materials used are labile, the course is given in a block during a four-week period at the end of the spring semester. Five days per week during four-week intersession, or summer session. Prereq: BCH 401G, 502 or 811 and consent of instructor.

BCH 556 PRINCIPLES OF DRUG DESIGN. (3)

Introduction to medicinal chemistry will be explored through rational biochemical and physical organic chemical approaches to drug design, action and development. Structural features, physical properties, mechanism of action and metabolism of drug like molecules, forces that govern interaction of drug-like molecules with their targets, enzyme mechanisms and inhibition and xenobiotic metabolism will be illustrated with specific examples showing how drugs function at the molecular level. Prereq: CHE 230, CHE 232, BIO 148, BIO 152. (Same as PHS 556.)

BCH 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)

Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BIO/MI/PLS/PPA 601.)

BCH 604 STRUCTURAL BIOLOGY. (3)

An advanced course on the structure and function of proteins and nucleic acids. Topics include: the physical determinants of protein structure, classification of protein architecture, protein-nucleic acid and protein-protein interactions, sequence dependence of nucleic acid structure, ribozymes, dynamics and evolutionary relationships. Prereq: IBS 601-602/BCH 607-608 or equivalent.

BCH 607 BIOMOLECULES AND METABOLISM. (3)

An introductory graduate-level biochemistry course designed to provide a basic knowledge of molecular and biochemical principles necessary for advanced graduate study. Protein structure and function, enzyme catalysis, the generation and storage of metabolic energy, amino acid, nucleotide, and lipid metabolism and biological membranes and transport will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents. (Same as IBS 601.)

BCH 608 BIOMOLECULES AND MOLECULAR BIOLOGY. (3)

An introductory graduate-level biochemistry course focused on the cellular mechanisms that underlie the regulated expression of genes, including transcription and translation, as well as basic mechanisms of DNA replication/repair and recombination. Genetic engineering and other experimental approaches critical to molecular biology research will be reviewed. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

BCH 609 PLANT BIOCHEMISTRY. (3)

The course will consider the chemical constituents of plants (with emphasis on biologically or nutritionally significant compounds unique to plants), their biosynthesis, contribution to key metabolic and defense processes and the regulation of their synthesis. Included will be discussions of photosynthesis, carbohydrates, lipids, isoprenoids and phenylpropanoids, nitrogen fixation, nitrogen and sulfur reduction and assimilation, alkaloids and additional secondary compounds, frontiers in plant biochemistry. Prereq: BCH 607 or equivalent or consent of instructor. (Same as PLS/PPA 609.)

BCH 610 STRUCTURE AND FUNCTION OF BIOMEMBRANES. (3)

A lecture and seminar course that discusses primary literature focused on the structures, assembly, and functions of biologically important membranes. Prereq: CHE 232; CHE 442G; BCH 401G, 811, or IBS 601.

BCH 611 BIOCHEMISTRY AND CELL BIOLOGY OF NUCLEIC ACIDS. (3)

A lecture and seminar course devoted to a study of the principles of nucleic acid chemistry and to the role of nucleic acids in cellular function. Prereq: BCH 401G, 502 or 811.

BCH 612 STRUCTURE AND FUNCTION OF PROTEINS AND ENZYMES. (3)

Primarily a lecture course devoted to the relationship of the structure of protein molecules to their biological roles. Proteins will be discussed in terms of their size, shape, conformation, primary structure, catalytic mechanism and regulatory properties. Prereq: BCH 401G, 502 or 811; CHE 444G or consent of instructor. May be taken concurrently with BCH 502.

BCH 615 MOLECULAR BIOLOGY. (3)

This course will develop the student's ability to critically read and evaluate the primary literature in selected areas of molecular biology; various experimental systems and techniques are discussed. While there is some lecture, the time will be predominately spent in class discussions of the primary literature. Prereq: An advanced course in molecular biology and genetics (e.g. IBS 602) or consent of instructor. (Same as BIO/MI 615.)

BCH 618 SEMINAR IN BIOCHEMISTRY. (1)

A weekly seminar, required of all students majoring in biochemistry, devoted to discussions of areas not covered in other courses and to recent developments in the field. May be repeated to a maximum of five credits.

BCH 619 SEMINAR IN BIOCHEMISTRY. (1)

A weekly seminar, required of all students majoring in biochemistry, devoted to discussions of areas not covered in other courses and to recent developments in the field. May be repeated to a maximum of five credits.

BCH 620 BIOSYNTHESIS OF NATURAL PRODUCTS. (3)

An overview of the biochemical pathways leading to compounds called natural products/secondary metabolites. Prereq: Two semesters of organic chemistry. (Same as PHR 620/PLS 642.)

BCH 625 SCIENTIFIC COMMUNICATIONS. (2)

To be useful, scientific research needs to be explained clearly to others – to colleagues, to administrators, to foundations and governmental bodies, and to the public. This course will give students the tools to effectively present their data, their ideas, and themselves to the scientific community. Through a series of directed exercises the students will learn how to write an abstract, a scientific paper, and a grant, and to prepare a poster and to give an oral presentation. The class will draw examples, topics, and exercises from current literature. Prereq: Good standing in a graduate program in the physical, chemical or biomedical sciences.

BCH 640 RESEARCH IN BIOCHEMISTRY. (1-9)

Prereq: Consent of instructor.

BCH 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BCH 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BCH 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BCH 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

BCH 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

BCH 779 MEMBRANE SCIENCES COLLOQUIUM. (1)

Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student's own research in particular. May be repeated to a maximum of six credits. (Same as CHE/CME/PHA/PHR 779.)

BCH 780 TOPICS IN BIOCHEMISTRY. (1-3)

A lecture and seminar course offered on topics of special interest to graduate students. May be repeated to a maximum of six credits.

BCH 812 DENTAL BIOCHEMISTRY. (6)

This is a comprehensive course in biochemistry designed to fulfill the specific needs of student dentists. Course content is generally as outlined in the American Association of Dental Schools suggested curriculum guidelines for biochemistry. Part I acquaints students with the chemical constituents of prokaryotic and eukaryotic cells; topics include the chemistry of lipids, carbohydrates, proteins, vitamins and coenzymes, and the nature of enzyme action. Part II integrates the chemical principles learned from Part I with concepts of cell dynamics, structure, function, subcellular organization, and metabolism. Topics include intermediary metabolism, bioenergetics, DNA replication, protein synthesis, and cellular regulatory and control mechanisms. Course content, where possible, is related to current concepts concerning the etiology of oral diseases, their treatment, and prevention to assist student dentists in attaining institutional goals and objectives for clinical competency. Prereq: Admission into the College of Dentistry. (Same as OBI 812.)

BCH 815 FIRST-YEAR ELECTIVE, BIOCHEMISTRY. (1-3)

With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Biochemistry. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

BCH 819 CELLULAR STRUCTURE AND FUNCTION/BIOCHEMISTRY. (7)

The course combines lecture, small group activities, clinical correlations, problem-based learning, and problem-solving sessions in providing an understanding of the relationship of biochemical principles to human health and disease. Close integration with genetics topics provides a better picture of how biochemistry, molecular biology and genetics contribute to normal human development and medicine. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

BCH 825 SECOND-YEAR ELECTIVE, BIOCHEMISTRY. (1-4)

With the advice and approval of his or her faculty advisor, the second-year student may choose approved electives offered by the Department of Biochemistry. The intent is to provide the student with an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass/Fail only. Prereq: Admission to second year medical curriculum and approval of advisor.

BCH 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)

With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved elective:**BCH 850 ELECTIVE IN BIOCHEMISTRY****BIO****Biology****BIO 101 WAYS OF DOING BIOLOGY. (1)**

Through a series of lectures and discussions students will gain a better understanding of the various academic programs in the life sciences across campus. Information will also be provided about research opportunities and career possibilities. Pass/fail only. Enrollment limited to freshmen and sophomore science majors.

BIO 102 HUMAN ECOLOGY. (3)

A study of the interrelationships of man, populations, space, energy, food, mineral resources and other life on earth. Not for life science majors.

BIO 103 BASIC IDEAS OF BIOLOGY. (3)

Introductory biology. Discussion topics are those relevant to both plants and animals - cell structure and function, molecules important to living things, metabolism, heredity, environment. Not for life science majors.

†BIO 110 INTRODUCTION TO HUMAN BIOLOGY AND HEALTH.**BIO 111 GENERAL BIOLOGY LABORATORY. (1)**

Laboratory studies in the structure and function of cells, plants, and animals; ecology; heredity; and evolution. Prereq or coreq: BIO 103 or consent of instructor.

BIO 148 INTRODUCTORY BIOLOGY I. (3)

BIO 148 introduces the student to the biological mechanisms operating at the molecular, cellular, and population level that contribute to the origin, maintenance, and evolution of biodiversity including the origins and history of the evolutionary process. Course material is presented within a phylogenetic context, emphasizing the shared history of all living organisms on earth through common ancestry. The first semester of an integrated one-year sequence (BIO 148 and BIO 152). Prereq: Math ACT of 24 or above or MA 109, and past or concurrent enrollment in CHE 105.

†BIO 150 PRINCIPLES OF BIOLOGY I.**†BIO 151 PRINCIPLES OF BIOLOGY LABORATORY I.*****BIO 152 PRINCIPLES OF BIOLOGY II. (3)**

The second semester of an integrated one-year sequence (BIO 148 and 152) that is designed to develop understanding and appreciation for the biocomplexity of multicellular eukaryotes, with emphasis on animals and terrestrial plants. Structure and function relationships will be explored at many levels of organization. Prereq: C or better in BIO 148 or permission of Department.

†BIO 153 PRINCIPLES OF BIOLOGY LABORATORY II.**BIO 155 LABORATORY FOR INTRODUCTORY BIOLOGY I. (1)**

This course is designed to provide a broad introduction into the data, results, and information associated with biological research, and into some of the analytical approaches used to test biological hypotheses. Communication of these aspects of biological research is crucial, and much of this lab course will be focused on the development of effective writing skills for the delivery of this information. Prereq: Math ACT of 23 or above or MA 109, past or concurrent enrollment in CHE 105.

BIO 180 SPECIAL TOPICS IN BIOLOGY (INTRODUCTORY LEVEL): (Subtitle required). (1-4)

Interdisciplinary, topical or experimental course in introductory biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO 190 SUPPLEMENTAL BIOLOGY WORKSHOP I. (1)

Cooperative workshop offered only as an optional supplement to certain biology lecture courses. Offered only on a pass/fail basis. Coreq: BIO 150.

BIO 192 SUPPLEMENTAL BIOLOGY WORKSHOP II. (1)

Cooperative workshop offered only as an optional supplement to certain biology lecture courses. Offered only on a pass/fail basis. Coreq: BIO 152.

BIO 198 SCHOLARS BIOLOGY RESEARCH. (2)

Biology 198 is one of the Scholars courses for biology majors in the Department of Biology Scholars Program. This course is designed to provide a solid introduction to 21st century bioscience research. Students will learn how to critically read, interpret, understand and discuss original literature. Students will learn how to discuss data and information from the original literature appropriately, develop reasonable hypotheses from current 21st century bioscience problems and provide plausible conclusions and presentations in regard to those problems

using original information and data. Lastly, the course is designed to equip students with the necessary skills to participate and succeed in an upper level research experience. The course substitutes for BIO 155 for BIOLOGY majors. Prereq: ACT 30 or Reading/Math SAT of 1320 or Reading/Math/Writing SAT of 1980, and declared biology major, and a min High School GPA of 3.5.

BIO 199 RESEARCH EXPERIENCE IN BIOLOGY. (0-1)

Participation in biological research under the direction of a faculty mentor in Biology or a related field. A research contract signed by the student and faculty mentor must be approved by the Director of Undergraduate Studies in Biology. Offered pass/fail only.

***BIO 208 PRINCIPLES OF MICROBIOLOGY. (3)**

The course introduces fundamental microbiological principles and techniques. Emphasis is placed on the interactions between humans and microorganisms, especially bacteria and viruses, the use of antimicrobial agents, microbial antibiotic resistance, and the structural, functional, and evolutionary relationships among microorganisms. Prereq: High school chemistry recommended.

BIO 209 INTRODUCTORY MICROBIOLOGY LABORATORY. (2)

Laboratory exercises in general microbiology. Laboratory, four hours per week. Prereq: One unit of chemistry or consent of instructor; BIO 208 or BIO 308 should be taken concurrently.

BIO 300 GENERAL ENTOMOLOGY. (3)

Fundamentals of insect biology and relationships among insects, plants, and other organisms; identification of commonly encountered insects. Beneficial and detrimental effects of insects are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: One course in introductory biology. (Same as ENT 300.)

BIO 302 INTRODUCTION TO NEUROSCIENCE. (3)

This introductory course is designed to provide students with a basic understanding, at the physiological, cellular and molecular levels, of how the nervous system functions to create behavior. It will also introduce students to the consequences of abnormal system functioning brought about by either disease or injury. Prereq: BIO 152 or equivalent or permission of instructor.

BIO 303 INTRODUCTION TO EVOLUTION. (4)

This course covers topics in evolution, concentrating on the Darwinian theories of evolution including descent with modification, natural selection, and sexual selection. Topics will include: patterns of evolution, the genetic source of variation, measuring evolution, adaptation, speciation, human evolution, "evo-devo", and evolutionary medicine. Taught on campus (lecture: three hours; recitation, three hours) or online. Prereq: BIO 148, BIO 152 and BIO 155 or equivalent.

BIO 304 PRINCIPLES OF GENETICS. (4)

A study of the physical and chemical aspects of the genetic material and their relationship to the expression and inheritance of the phenotype. Lecture, three hours; laboratory, three hours per week. Prereq: BIO 148, BIO 152, BIO 155, CHE 107, CHE 113.

BIO 305 INTRODUCTION TO NEUROSCIENCE TECHNIQUES. (4)

This introductory laboratory course will provide students with practical knowledge and hands-on experience in basic behavioral, anatomical and physiological techniques used by laboratory scientists in the investigation of the nervous system. It is designed as a gateway to independent research experiences in working neuroscience laboratories. Prereq: BIO 302 Introduction to Neuroscience or equivalent.

***BIO 308 GENERAL MICROBIOLOGY. (3)**

Fundamental concepts of microbiology. The nutrition, physiology, genetics, molecular biology of microorganisms, and their roles in nature and in infection and immunity will be studied. Prereq: BIO 304 or ABT 360 or ENT 360 and CHE 230 or CHE 236.

***BIO 309 MICROBIOLOGY LABORATORY. (2)**

This course includes laboratory exercises that are designed to illustrate processes central to microbiology and to familiarize students with basic skills required for working with microorganisms in a safe environment. Students will become familiar with isolating, culturing, and identifying microorganisms, and with molecular techniques used to study and manipulate microbes. Prereq: BIO 304 or ABT 360 or ENT 360 and CHE 230 or CHE 236 or consent of instructor.

BIO 310 THE LIFE PROCESSES OF PLANTS. (3)

This course is intended to provide a basic understanding of the natural products and processes that shape the nature of modern plants and govern their interactions with the environment. Students will develop a basic understanding of how these plant attributes relate to organismic function. Emphasis will be placed on exploring the nature of the major plant biomes of the Earth, their community dynamics, and how member plants compete for space and other resources. Development of optimal plant strategies for reproductive success, plant interaction with other living systems as well as abiotic factors and their defense from predation and attack will also be considered. Prereq: BIO 152.

BIO 315 INTRODUCTION TO CELL BIOLOGY. (4)

The structure and function of cells will be considered. Emphasis will be placed on the ultrastructure of cell organelles in plants and animals as a framework for understanding the compartmentalized nature of cell activity. Lecture, three hours; laboratory three hours/weekly. Prereq: BIO 303 and BIO 304. Coreq: CHE 230 or equivalent. Or consent of instructor.

BIO 325 ECOLOGY. (4)

This course introduces the scientific study of relationship between organisms and their

environment. The course is structured around levels of organization – from physiological ecology to individuals, populations, communities, ecosystems, landscapes, regions, and the biosphere. Students will be expected to develop a solid knowledge base and understanding of key concepts and issues in contemporary ecology; to become familiar with how ecological understanding is attained by researchers; and to see how ecological knowledge and methods can be used to address important societal problems. Lecture, three hours per week; laboratory, an average of three hours per week. Prereq: BIO 150-153 or equivalent introductory biology sequence; and BIO 304 or equivalent genetics course; or consent of instructor.

#BIO 337 MATHEMATICAL MODELING IN THE LIFE SCIENCES. (3)

This course introduces mathematical modeling in biology and other life science disciplines using discrete and continuous tools and techniques, including difference equations and differential equations. Students will learn to construct, analyze, and simulate models and interpret the results within their biological context. Prereq: A grade of B or better in MA 114 (Calculus II) or MA 138 (Calculus II with Life Science Applications) or consent of department. (Same as MA 337.)

BIO 350 ANIMAL PHYSIOLOGY. (4)

An introduction to the basic principles of animal physiology. An elementary discussion of the major vertebrate organ systems including nutrition, metabolism, respiration, circulation, excretion, muscle contraction, peripheral and central nervous system, and endocrine function emphasizing homeostasis. Lecture, three hours; laboratory, three hours. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, CHE 105 (or CHE 109 and CHE 110) and CHE 107 or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

BIO 351 PLANT KINGDOM. (3)

An evolutionary survey of the morphology, taxonomy, life histories and biological relationships of all plant groups comprising the plant kingdom. Lecture, two hours; laboratory, two hours. Prereq: An introductory course in biology.

BIO 355 BIOLOGY STUDY ABROAD (Subtitle required). (3)

This course offers students an opportunity to study unique biological communities and to experience living in a foreign culture. Specific content and location varies. May be repeated a maximum of two times under different subtitles. Prereq: Will be set by instructor.

BIO 361 ECOLOGY OF THE KENTUCKY FLORA AND VEGETATION. (3)

An overview of the physiography, geology, soils, hydrology, climate (paleo and recent), vegetation (paleo and recent), floras (including floristic relationships), archaeobotany, and agriculture of Kentucky. Lecture, two hours; laboratory, two hours per week. Prereq: One year of introductory Biology or consent of instructor.

BIO 375 BEHAVIORAL ECOLOGY AND SOCIOBIOLOGY. (3)

This course will explore the selective forces influencing animal behavior, such as foraging, predator avoidance, mate choice, parental care, and social interaction. Specific phenomena to be explored include the evolution of optimal foraging and search images, extravagant male characteristics, female preferences, conflicts between the sexes, infanticide, parent-offspring conflict, dominance hierarchies, optimal group size, altruism, and eusociality. The study of these behaviors integrates ideas and approaches from ecology, genetics, physiology, and psychology. Students will be encouraged to read outside material, to think carefully, logically, and critically about ideas, and to ask questions and defend their views in class. Prereq: A year of introductory biology (BIO 150/152).

BIO 380 SPECIAL TOPICS IN BIOLOGY (INTERMEDIATE LEVEL) (Subtitle required). (1-4)

Interdisciplinary, topical or experimental course in intermediate (300-level) biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO 394 RESEARCH IN NEUROSCIENCE. (1-3)

An independent research project in an area of neuroscience under the direction of a faculty mentor. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies (Neuroscience). May be repeated to a maximum of 12 credits, but a maximum of only 6 credits may be used to satisfy the requirements of the minor or major in Neuroscience. Prereq: BIO 152 and BIO 302 or PSY 312.

BIO 395 RESEARCH IN BIOLOGY. (1-3)

An independent research project in an area of biology under the direction of a faculty mentor. The research may be conducted in the Department of Biology or in other biological units on campus. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies in Biology. May be repeated to a maximum of 12 credits, but a maximum of only 6 credits may be used to satisfy the requirements of a BS or BA in Biology. Prereq: BIO 148, BIO 152 and BIO 155 or equivalent. Completion of at least one of the Biology core courses (Cell Biology, Evolution, Genetics, Physiology, Ecology) is strongly recommended.

BIO 397 RESEARCH IN MICROBIOLOGY. (1-3)

An independent research project in an area of microbiology under the direction of a faculty mentor. The research may be conducted in the Department of Biology or in other microbiological units on campus. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies in Microbiology. Prereq: BIO 308 and BIO 309.

BIO 401G SPECIAL TOPICS IN BIOLOGY FOR ELEMENTARY, MIDDLE AND HIGH SCHOOL TEACHERS (Subtitle required). (1-4)

Selected topics in biology of special interest to teachers such as biological research experiences related to pharmacological assays, collecting behavioral data, compilation and statistically analysis of data. When the course is offered, a specific title with specific credits, the number of hours in lecture-discussion and laboratory, will be given. Lecture/discussion, two-four hours; laboratory, zero-four hours. May be repeated to a maximum of 12 credits. Prereq: By consent of instructor only.

BIO 404 ADVANCED GENETICS. (3)

This course in contemporary genetic analysis emphasizes experimental approaches to biological questions in a variety of eukaryotic organisms. The course includes discussion of the application of methodologies spanning a wide range of genetics, including classical, molecular, quantitative and genome-wide approaches. Primary scientific literature is investigated to understand the development and application of these methods. The course is intended to provide a good working understanding of current genetic techniques, how to select appropriate approaches to modern biological problems, and how to interpret results of genetic analyses. Prereq: BIO 304 (Introductory Genetics) or equivalent or consent of the instructor is required. BIO 315 (Cell Biology) or equivalent is recommended, but not required.

BIO 405 HUMAN GENETICS. (3)

This course will survey selected topics relevant to the understanding of the diversity and complexity of human genetics and genetic diseases, and will explore some of the contemporary methodologies used to identify genes underlying human genetic diseases. This course will also cover modern methods for genome analysis since the human genome sequence forms the foundation of current human genetics in research and medicine. Prereq: Grade of C or better in BIO 304 or permission of instructor.

BIO 420G TAXONOMY OF VASCULAR PLANTS. (4)

A survey of the evolutionary relationships among the major of vascular plant groups, concentrating heavily on important families flowering plants. Issues in contemporary systematics, including cladistic methods, will be covered. Students will gain practical experience learning the language of descriptive botany and using botanical keys in technical manuals for species identification. Field trips highlight the local spring flora. Lecture, three hours; laboratory, three hours; plus two Saturday field trips. Prereq: Junior standing; BIO 148 and BIO 152 or one course in introductory botany or consent of instructor. (Same as NRE 420G.)

BIO 425 BIOLOGY SEMINAR: (Subtitle required). (1)

This seminar develops effective analysis, presentation, and discussion skills required of Biology majors by exploring various life science topics of interest to faculty and students. Satisfies seminar requirements for Biology majors and can be repeated for a maximum of 2 credits under a different subtitle. Prereq: Senior standing in Biology recommended. BIO 150-153 or equivalent. Additional prereq(s) may be identified by instructor when topic is selected. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

BIO 426 NEUROSCIENCE SEMINAR (Subtitle required). (1)

This seminar course develops effective analysis, presentation and discussion skills required of science majors by exploring one neuroscience topic in detail. Prereq: Determined by instructor.

BIO 427 SEMINAR IN MICROBIOLOGY (Subtitle required). (1)

This seminar course develops effective analysis, presentation, writing and discussion skills required of life science majors by exploring various microbiological topics. Prereq: Senior standing recommended. BIO 308 and BIO 309 or equivalent. Additional prereq(s) may be identified by instructor when topic is selected.

BIO 430G PLANT PHYSIOLOGY. (4)

Basic principles of plant physiology; the physiological processes of green plants and the effect of the environment on these processes. Lecture (three hours) and laboratory (three hours). Prereq: BIO 148, BIO 152, BIO 155 or BIO 198 (or equivalent); CHE 230 and CHE 231 (or equivalent) or consent of instructor.

BIO 440 COMPARATIVE AND FUNCTIONAL ANATOMY. (4)

Comparative and Functional Neuroanatomy explores the cellular bases for sensory, integrative and motor neuroscience from an evolutionary perspective, delineating common features of all nervous systems ranging from cnidarian nerve nets to ventral nerve cords of most invertebrates to the chordate/vertebrate central nervous systems. Discovery of the common features of nervous structure in model system organisms with the human brain will provide students a perspective on the value of model systems for future study. Functional analyses of nervous system structures will enable students to identify anatomical bases for neural function and behavior. Prereq: BIO 302 or consent of instructor.

BIO 446 NEUROPHYSIOLOGY LABORATORY. (3)

This course will focus on experimentation in neurophysiology. The generation of receptor potentials in sensory neurons will be measured in addition to action potentials in axons. Pharmacological experimentation of ionotropic and metabotropic receptors subtypes and second messengers signaling will be conducted. The key role of ion channels and transporters in regulation of the membrane potential will be examined. The concept of electrochemical equilibrium will be introduced and the quantitative examination of the equilibrium membrane potential will include discussion of Goldman and Nernst equations and their applications. The mechanisms of action potential generation, as a result of synaptic and receptor stimulation

within a neural cell, will be measured. Lecture and laboratory. Prereq: BIO 302 or BIO 350 or consent of instructor.

BIO 447 ANIMAL SENSES. (3)

Advanced study on how animals use sensory abilities to communicate, navigate, and detect prey, predators and mates. Focus will be on extreme and unusual sensory systems such as echolocation, electroreception, and magnetoreception, as well as vision, smell, touch, and hearing. Prereq: BIO 350 or PGY 412G or permission of instructor.

†BIO 450 NEUROPHYSIOLOGY LABORATORY.**BIO 452G LABORATORY IN ECOLOGY. (2)**

An introduction to laboratory and field experimentation and computer simulation in ecology. Exercises and demonstrations will be performed to familiarize students with (1) particular populations and ecosystems, (2) some important research problems in ecology, and (3) current research techniques for dealing with them. One or two Saturday field trips will be required. Laboratory, four hours. Prereq or coreq: BIO 325 or equivalent and consent of instructor.

BIO 461 INTRODUCTION TO POPULATION GENETICS. (3)

This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/ENT/FOR 461.)

BIO 494G IMMUNOBIOLOGY. (3)

A survey of theories and mechanisms of immunity including: nature of antigens and antibodies, antigen-antibody reactions, immunocompetent cells, immunogenetics, allergic reactions, tumor immunology and transplantation immunology. Prereq: BCH 401G (may be taken concurrently) and BIO 208 or BIO 308 or consent of instructor. (Same as MI 494G.)

BIO 495G BACTERIAL PATHOGENESIS. (3)

This course will examine the pathogenic mechanisms used by bacteria to cause human disease. Bacterial virulence factors and host susceptibility factors will be discussed, with an emphasis on understanding the techniques that can be used to identify these traits in newly emerging pathogens. Prereq: BIO 308, BIO 315, BCH 401 recommended. Or permission of instructor. (Same as MI 495G.)

BIO 499 BIOLOGY RESEARCH SEMINAR. (1)

A seminar for students engaged in independent research. Students with BIO 395 experience will interact with student colleagues and an experienced research mentor. Prereq: Past or current enrollment in BIO 395.

BIO 502 PRINCIPLES OF SYSTEMS, CELLULAR AND MOLECULAR PHYSIOLOGY. (5)

Advanced survey of major mammalian physiological systems at the systems, cellular and molecular level; lectures, assigned reading, advanced texts or monographs, demonstrations and problem oriented study questions. Prereq: One year each, physics, general chemistry; PGY 206 or its equivalent. (Same as PGY 502.)

***BIO 507 BIOLOGY OF SLEEP AND CIRCADIAN RHYTHMS. (3)**

This course provides an introduction to the fields of sleep and circadian rhythms including the underlying neuroanatomy, neurophysiology, and the molecular and genetic underpinnings of sleep and circadian behaviors. The medical and societal relevance of these areas will also be emphasized. Considerable time will be spent reading and analyzing the primary literature in these fields, including student presentations of selected articles. Prereq: BIO 304 or BIO 302 or consent of instructor.

BIO 508 EVOLUTION. (3)

Mechanisms of evolutionary change, with a brief summary of historical evolution, especially of the Metazoa. Prereq: BIO 304 or ASC/ABT 360.

BIO 510 RECOMBINANT DNA TECHNIQUES LABORATORY. (4)

An introduction to the construction, isolation, and analysis of recombinant DNA clones, with emphasis on practical experience in basic techniques. Graduate students will be given first preference in course enrollment. Lecture, one hour; laboratory, 6 hours per week. Prereq: BIO 304 and BIO 315 or equivalent with consent of instructor.

BIO 515 GENERAL CELL BIOLOGY. (3)

An integrative, analytical study of the cell as the basic unit of biological structure and function, with emphasis on eukaryotes. Lecture, discussions with readings in some original literature. Prereq: BIO 315 or BCH 401G or equivalent and consent of instructor. (Same as MI 515.)

BIO 520 BIOINFORMATICS. (3)

An introduction to computer analysis of macromolecular structure information. This course describes how to access, process, and interpret structural information regarding biological macromolecules as a guide to experiments in biology. Prereq: BIO 315 or BIO 304 or BCH 401 or BCH 501 or BCH 502 or BIO 510 or consent of instructor. (Same as INF 520.)

#BIO 525 ADVANCED ECOLOGY. (3)

BIO 525 is intended to bring students with a baseline knowledge of ecology to a deeper understanding of and experience with the way that ecological studies are conceived, conducted, analyzed and interpreted. BIO 525 is a series of modules that introduce students to the field site and most basic methods and then to a set of research systems for which the group is challenged to come up with the study design, analysis, and interpretation. These modules will address important issues in contemporary ecology and will build on what students learned in previous undergraduate ecology courses. Prereq: BIO 325 (Ecology) or equivalent.

BIO 527 STEM CELLS, TISSUE ENGINEERING, AND REGENERATIVE MEDICINE. (3)

The course will provide students with knowledge from a broad range of topics related to stem cells, tissue engineering and regenerative medicine, including: an historical perspective of these fields, contemporary use of stem cells in medicine, introduction to different concepts in regenerative medicine, research in tissue engineering and biomaterials, and societal issues surrounding stem cells and regenerative medicine. Prereq: BIO 315 and BIO 304.

BIO 529 DEVELOPMENTAL BIOLOGY. (3)

An introduction to the principles of developmental biology, particularly of animals, including genetic and environmental control of development at the molecular, cellular, and physiological levels. Prereq: BIO 304 or equivalent, or graduate standing in life sciences, or consent of instructor.

BIO 530 BIOGEOGRAPHY AND CONSERVATION. (3)

An introduction to the geographic patterning of biological diversity, exploring its origins, dynamics, and present trends. Examines the interplay among physical conditions, ecological interactions, evolutionary processes, and the historical movements of organisms and land masses as they have combined to affect the distribution of species, with particular attention to the application of biogeographic knowledge to current problems of species loss and conservation. Prereq: Two semesters of introductory biology or physical geography, or consent of the instructor. (Same as GEO 530.)

BIO 535 COMPARATIVE NEUROBIOLOGY AND BEHAVIOR. (3)

The course consists of an introduction to neurophysiology and study of the neural basis of sensory processing and motor patterns. A comparative analysis of the neurobiological basis of behavioral responses will be made, utilizing a broad range of vertebrates and invertebrates. Prereq: BIO 350 or consent of instructor. (Same as PGY 535.)

BIO 542 HISTOLOGY. (5)

An in-depth study of vertebrate cell and tissue structure and function. Human tissue is emphasized. Some knowledge of biochemistry, physiology, and anatomy is desirable. The laboratory involves study of prepared microscope slides. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 315 or consent of instructor.

BIO 550 ADVANCED PHYSIOLOGY. (3)

Physiological mechanisms by which animals cope with different environmental stresses. Osmoregulation, respiration, temperature regulation and tolerance, sensory reception, circulation, etc. Prereq: One year college chemistry, BIO 350 or equivalent, one year college physics or consent of instructor.

BIO 551 LIFE CYCLE ECOLOGY OF FLOWERING PLANTS. (4)

The effect of physical and biotic factors on plants and environment. Physiological, morphological and anatomical adaptations of plants to the physical factors of the environment are emphasized. Some of the laboratory exercises are carried out in the field. Lecture, three hours; laboratory, two hours. Prereq: BIO 325 or consent of instructor.

BIO 553 FISH BIOLOGY. (4)

This course explores the biology of fishes from an evolutionary perspective. Lectures cover physiology, functional morphology, ecology, population biology, behavior, evolutionary relationships, and fisheries biology. Laboratory exercises include development of a fish collection; experiments in fish physiology, behavior and ecology; computer modeling of problems in fisheries biology; and field trips. Lecture, three hours; laboratory, two hours per week. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198 or consent of instructor.

BIO 555 VERTEBRATE ZOOLOGY. (5)

An intensive survey of the vertebrate classes with emphasis on trends and processes in evolution, classification, phylogeny, ecology, and adaptations in morphology and behavior. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor.

BIO 556 COMMUNICATION BIOLOGY. (3)

Animals sense and respond to numerous signals from their environment by using sensory modalities attuned to visual, auditory, chemical, and electromagnetic cues. This course is an in-depth examination of the physiological bases of sensory input and the interactive, motor system-mediated, behavioral repertoires exhibited by different species in response to such inputs. Prereq: BIO 325 or BIO 350.

BIO 559 ORNITHOLOGY. (4)

A study of the life histories, habits, identification, structure, adaptations, and physiology of birds. Special emphasis upon migrations, songs, nests and economic importance of our native birds. Lecture, field excursions, laboratory studies. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor.

BIO 560 ENVIRONMENTAL PHYSIOLOGY AND TOXICOLOGY. (4)

Emphasis will be placed on the physiological and toxicological effects of chemicals on natural biota, including considerations at cellular, organismal, population, and community levels. This will include assimilation and metabolism of pollutants by animal species, with emphasis upon biochemical and physiological mechanisms involved in stress-induced responses and stress reduction. Additional areas of concern will include the transport, fate, and effects of chemical stressors on structure and function of biotic communities and will include introductions to ecotoxicology and environmental regulatory strategies. Lecture, three hours; recitation, two hours per week. Prereq: BIO 350 or PGY 502 or equivalent or consent of instructor.

***BIO 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH.**

Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: 3 credits of basic biology (BIO 103 or BIO 148 or equivalent) or permission of instructor. (Same as CPH/ENT 561.)

BIO 563 PARASITOLOGY. (4)

Protozoan, helminth and arthropod parasites of man and domestic animals, emphasis on etiology, epidemiology, methods of diagnosis, control measures, and life histories. Techniques for host examination and preparation of material for study. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor. (Same as ENT 563.)

BIO 564 INSECT TAXONOMY. (4)

A study of insect taxonomy including the collection, preparation, and identification of adult insect specimens. Prereq: Consent of instructor. (Same as ENT 564.)

BIO 567 APPLICATIONS OF GENETICS. (4)

Course covers genetic concepts with an emphasis on interpretation and analysis of molecular and population genetic data using examples from the entomological literature. Prereq: ABT 360 or BIO 304 or equivalent and an introductory statistics course.

BIO 568 INSECT BEHAVIOR. (3)

The principles of animal behavior will be stressed using insects as examples. Physiology, mechanisms, behavioral ecology and evolution of insect behavior will be covered. Prereq: One year of biology. (Same as ENT 568.)

BIO 575 PLANT ANATOMY AND MORPHOLOGY. (4)

A survey of the diverse structural features of plants and their functional and phylogenetic significance. Emphasis will be on the adaptive design of modern vascular plants as a response to natural and artificial selection. Lecture, three hours; laboratory, two hours per week. Prereq: Introductory biology sequence (six hours) or consent of instructor.

BIO 580 SPECIAL TOPICS IN BIOLOGY (ADVANCED LEVEL): (Subtitle required). (1-4)

Interdisciplinary, topical or experimental course in advanced (500-level) biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Course format: variable – Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO 582 VIROLOGY. (3)

Physical, chemical and biological properties of viruses. Modes of replication and control of gene product formation displayed by representative plant, animal, and bacterial viruses. Prereq: BIO 304 and biochemistry or equivalent strongly recommended, or consent of instructor. (Same as MI 582.)

BIO 595 IMMUNOBIOLOGY. (2)

Laboratory in immunology and serology. Preparation, standardization, and uses of biological products; serology. Laboratory, four hours. Prereq: BIO/MI 494G or concurrently; or consent of instructor. (Same as MI 595.)

BIO 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)

Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BCH/MI/PLS/PPA 601.)

BIO 604 GENETIC ANALYSIS. (3)

This course in contemporary genetic analysis emphasizes experimental approaches to biological questions in a variety of eukaryotic organisms. The course includes discussion of the application of methodologies spanning a wide range of genetics, including classical, molecular, quantitative and genome-wide approaches. Primary scientific literature is investigated to understand the development and application of these methods. The course is intended to provide a good working understanding of current genetic techniques, how to select appropriate approaches to modern biological problems, and how to interpret results of genetic analyses. Prereq: BIO 304 (Introductory Genetics) or equivalent or consent of the instructor is required. BIO 315 (Cell Biology) or equivalent is recommended, but not required.

BIO 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)

This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as ENT/FOR 606.)

BIO 607 ADVANCED EVOLUTION. (2)

This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivision) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylo-

genetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 508 or consent of instructor. (Same as ENT/FOR 607.)

BIO 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)

This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as ENT/FOR 608.)

BIO 609 POPULATION AND COMMUNITY ECOLOGY. (3)

This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as ENT/FOR 609.)

BIO 612 BIOLOGY OF AGING. (3)

A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as ANA/GRN/PGY 612.)

BIO 615 MOLECULAR BIOLOGY. (3)

This course will develop the student's ability to critically read and evaluate the primary literature in selected areas of molecular biology; various experimental systems and techniques are discussed. While there is some lecture, the time will be predominantly spent in class discussions of the primary literature. Prereq: An advanced course in molecular biology and genetics (e.g. IBS 602) or consent of instructor. (Same as BCH/MI 615.)

BIO 620 PLANT MOLECULAR BIOLOGY. (3)

This course is intended to be a treatment of current concepts of plant molecular biology. It will be a literature-based course, supplemented by handouts and reading lists. The course will deal as much as is possible with topics that are unique to plants. Current aspects of molecular biology that are relevant to the course content will be covered in the first part of the course; however, these lectures will not be a review of topics that should have been retained from introductory genetics and biochemistry courses. Also, they will not be a substitute for a molecular biology course. Prereq: One semester of undergraduate genetics and biochemistry or consent of instructor. (Same as PLS 620.)

BIO 621 TOPICS IN MODERN BIOLOGY (Subtitle required). (1-3)

A course for students in the biological and related sciences to be taught on various topics by specialists in their fields. Designed to give the student the most up-to-date information on the various topics. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

BIO 622 PHYSIOLOGY OF PLANTS I. (3)

A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as FOR/PLS 622.)

BIO 623 PHYSIOLOGY OF PLANTS II. (3)

A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, phytochrome-photomorphogenesis-phototropism nitrogen and sulfur metabolism. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as FOR/PLS 623.)

BIO 625 INSECT-PLANT RELATIONSHIPS. (3)

This course examines the natural history, ecology, and evolution of insect/plant relationships. Topics include mechanisms and theory of plant defense, behavioral and physiological adaptations of herbivorous insects, pollination biology, multitrophic-level interactions, causes of insect outbreaks, and applications to managed ecosystems. Critical reading and discussion of current literature is emphasized. Prereq: Two years of college-level biology. (Same as ENT 625.)

BIO 632 ADVANCED CELL BIOLOGY I. (3)

A molecular level treatment of cell structure and function derived from current experimental approaches. Eukaryotes will be stressed. Topics will usually include membrane structure and function, the cytoskeleton and the extracellular matrix, and bioenergetics. Lectures and discussions with reading in the original literature. Prereq: BIO 304 or equivalent; coreq: BCH 501 or equivalent or consent of instructor.

BIO 635 INSECT PHYSIOLOGY. (4)

Study of insect physiological processes including development, digestion, reproduction, respiration, excretion, hormones and immunity. Opportunity to learn techniques used in insect physiology and molecular biology. Prereq: Consent of instructor. (Same as ENT 635.)

BIO 636 INSECT MOLECULAR BIOLOGY. (4)

Principles of insect molecular biology. Analysis of insect development, reproduction, behavior, immunity, transgenic insects and insecticide resistance at the molecular level. Hands-on experience with molecular biology techniques. Prereq: ENT/BIO 635 or consent of instructor. (Same as ENT 636.)

BIO 638 DEVELOPMENTAL NEUROBIOLOGY. (3)

An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cell biological and molecular approaches to cell differentiation, neuronal pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 535 or consent of instructor. (Same as ANA/PGY/PSY 638.)

***BIO 650 ANIMAL PHYSIOLOGY LABORATORY. (3)**

Hands-on laboratory exercises in animal physiology. Prereq: Previous or concurrent enrollment in BIO 550. (Same as PGY 650.)

BIO 665 INSECT ECOLOGY. (3)

The biotic and physical factors influencing the distribution and abundance of insects and insect populations. Prereq: Consent of instructor. (Same as ENT 665.)

BIO 667 INVASIVE SPECIES BIOLOGY. (3)

This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as ENT/FOR 667.)

BIO 684 PHYLOGENETIC SYSTEMATICS. (3)

Theory and methods of phylogenetic analysis and cladistics will be explained. Applications of phylogenetic analysis, such as historical biogeography, biological classification, and testing of ecological hypotheses will be explored. (Same as ENT 684.)

BIO 685 IMMUNOBIOLOGY, INFECTION AND INFLAMMATION. (3)

An introductory level graduate course surveying current trends in immunology including the organization of the immune system, cells important for immunity and inflammation; types of immune responses, cellular immunology, molecular immunology, self-nonself discrimination, vaccines and immune mediated diseases. Prereq: BCH 401G, or BCH 501 or 502, IBS 501 or equivalent or consent of the course director. (Same as MI 685.)

BIO 707 CONTEMPORARY TOPICS IN IMMUNOLOGY. (3)

This course will deal with controversial and evolving areas of immunology. Lectures in a given topic will be accompanied by student discussion of contemporary literature. Prereq: MI 685 or equivalent or consent of instructor. (Same as MI 707.)

BIO 720 MICROBIAL STRUCTURE AND FUNCTION. (3)

Molecular basis of structure and function in unicellular microbes. Molecular genetic and structural approaches to the analysis of bacterial architecture growth, division, and differentiation. Prereq: (to reflect appropriate IBS course). (Same as MI 720 and OBI 720.)

BIO 740 MAMMALIAN RADIATION BIOLOGY. (2)

The physical and biological sequelae of radiation effects will be discussed emphasizing human and mammalian responses and radiation health. Emphasis will be for health and medical workers. Prereq: Must have consent of instructor, BIO/RM 540 or RM 546 or equivalent background. (Same as RM 740.)

BIO 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BIO 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BIO 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BIO 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

BIO 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

BIO 770 SEMINAR IN BIOLOGY. (1)

Reports and discussions of current research and literature in biology. Required of all graduate students. May be repeated to a maximum of 8 credits. Prereq: Graduate standing in biological sciences.

BIO 772 SEMINAR IN MICROBIOLOGY. (0-1)

Review of current literature in microbiology; presentation of papers on work in progress in the department or on assigned topics; reports on meetings of national and international scientific and professional societies and symposia. Required of all graduate students. Two hours per week. May be repeated nine times for a maximum of 10 credits. (Same as MI 772.)

BIO 773 SEMINAR IN PLANT PHYSIOLOGY. (1)

Reports and discussions on various topics in plant physiology. May be repeated for a maximum of eight credits.

BIO 782 ADVANCED VIROLOGY. (3)

Current trends in virology. Typical topics include DNA tumor viruses, RNA tumor viruses, persistent virus infections, and interference. Emphases of molecular mechanisms. Prereq: BIO

Course Descriptions

582. Adequate biochemistry and genetics strongly recommended, or consent of instructor. (Same as VS 782.)

BIO 795 RESEARCH IN BIOLOGY. (1-9)
Independent research work in biology. May be repeated to a maximum of 24 credits. Prereq: Graduate standing in biological sciences.

BIO 798 RESEARCH IN MICROBIOLOGY. (1-9)
May be repeated to a maximum of 24 credits. Prereq: Consent of instructor. (Same as MI 798.)

BME Biomedical Engineering

BME 301 FUNDAMENTALS OF BIOMEDICAL ENGINEERING. (3)
Overview of the application of engineering principles to problems in living systems and healthcare delivery. Fundamental anatomy and physiology for engineers. Quantitative measurement and analysis of the structure, function, and control of biological systems. Prereq: Engineering standing or consent of instructor.

BME 395 INDEPENDENT RESEARCH IN BIOMEDICAL ENGINEERING. (1-3)
Individual research on selected problems of current significance in biomedical engineering. Variable credit; may be repeated to a maximum of six credit hours. Prereq: Consent of instructor.

BME 405 INTRODUCTION TO BIOMEDICAL SIGNAL PROCESSING. (3)
Study of continuous and discrete signal concepts, sampling of analog signals, domain transformation (Fourier, LaPlace, Z- Transforms), and introduction to correlation and power spectrum. Characteristics and design of analog and digital filters. Features of biological signals and systems and biomedical applications. Introduction to non-linear systems. Prereq: EE 305 or equivalent and MA 214; or consent of instructor.

BME 472 HUMAN BIOMECHANICS. (3)
This course presents an engineering-based approach to the quantitative study of the human musculoskeletal system. Principles involving static and dynamic mechanical analyses will be applied to quantify the forces and moments in human posture and movement. Study of the material and biological properties of the musculoskeletal system is included because they are intimately coupled to the formulation and interpretation of problems in static and dynamic biomechanics. Prereq: EM 221, EM 313; or consent of instructor.

BME 481 G TOPICS IN BIOMEDICAL ENGINEERING. (3)
Detailed investigation of a topic of current significance in biomedical engineering such as: biomaterials, hard or soft tissue biomechanics, rehabilitation engineering, cardiopulmonary systems analysis, biomedical imaging. Prereq: Consent of instructor.

BME 485 FUNDAMENTALS OF BIOFLUID MECHANICS. (3)
This course is taught concurrently with BME 685 Biofluid Mechanics. This course provides the students with a review of basic fluid mechanics principles and a direct, practical application of these principles to biomedical and clinical problems associated with the human circulatory system. Prereq: Engineering standing or consent of instructor.

BME 488 INTRODUCTION TO BIOMATERIALS. (3)
Study of biological and man-made materials that perform, improve, or restore natural functions. Structure and properties of connective tissue and commonly implanted metals, ceramics, and polymers; biocompatibility of materials used in orthopedic, soft tissue, and cardiovascular applications. Prereq: Engineering standing and MSE 201; or consent of instructor.

BME 501 FOUNDATIONS OF BIOMEDICAL ENGINEERING. (3)
This course demonstrates the application of diverse engineering principles to analysis and understanding of the structure, function, and control of biological systems. Quantitative measurements and analysis of homeostatic, regulatory, transport, biochemical, and biomechanical processes of the human body. Prereq: Engineering standing or consent of instructor.

BME 508 CELL MECHANICS AND MECHANOBIOLOGY. (3)
This course will serve as an introduction to cell and tissue level mechanobiology with focus on human physiological and disease processes. The primary focus is to introduce principles of cell-level mechanics in the context of the biology of living organisms, what we term mechanobiology. In effect, we treat biological processes and regulation as another variable(s) that must be accounted for when modeling the mechanical/physical behavior of human tissues. A large amount of the basic principles in this field of study arose as a result of the intense research in the cardiovascular field. We will draw many examples of mechanobiological principles as it relates to the circulatory system. Despite our cardiovascular focus, the basic principles can be applied to the whole range of mechanobiological research conducted in other applications (orthopedics, urological, pulmonary, etc.). Prereq: EM 302 and/or CME/ME 330 (or equivalent fluid mechanics course); or consent of instructor.

BME 515 MODELING OF PHYSIOLOGICAL SYSTEMS. (3)
This introductory course in mathematical modeling will teach students how to construct simple and elegant models of biological and physiological processes – for instance the absorption and elimination of drugs in the human body or the kinetics of tumour growth in tissue – and to analyze or predict the dynamics of these events by solving the models. Prereq: MA 113, 114, 213, 214, or consent of instructor; familiarity with computer programming.

BME 530 BIOMEDICAL INSTRUMENTATION. (3)
A comprehensive introduction to major aspects of biomedical instrumentation. Topics include basic concept of medical instrumentation, biopotentials, physiological pressure/flow/respira-

tory measurement, optical sensing, and clinical applications of all the above. The fundamental mathematics underlying each instrument will be reviewed and an engineering picture of the hardware and software needed to implement each system will be examined. Prereq: Consent of instructor.

BME 540 MECHANICAL MODELING OF HUMAN MOTION. (3)
An introduction to mechanical modeling of human motion (lectures) along with application of computational software to model and estimates internal tissues responses to physical demands of several different activities/tasks (lab activities). Prereq: EM 221, EM 313; or consent of instructor.

BME 579 NEURAL ENGINEERING: MERGING ENGINEERING WITH NEUROSCIENCE. (3)
A multidisciplinary approach combining engineering principles for systems analysis and control, knowledge of biological control mechanisms, and computational properties of biological neural networks in the development of engineering neural networks for control applications. Topics include: equivalent circuit models for biological neurons and networks, non-linear differential equation representations, biological control strategies for rhythmic movements, design and development of controller for robot function, proposal development and presentation. Prereq: EE 422G and Engineering Standing or consent of instructor. (Same as EE 579.)

BME 580 INTRODUCTION TO BIOMEDICAL IMAGING. (3)
A comprehensive introduction to bio-medical imaging systems used today, including xray imaging and computed tomography (CT), magnetic resonance imaging (MRI), ultrasound imaging (UI), and diffuse optical tomography (DOT). The course will review the fundamental mathematics underlying each imaging modality, the hardware needed to implement each system, and the image reconstruction and analysis. The class may involve homework, projects, and exams. Prereq: EE 305, or consent of instructor.

BME 599 TOPICS IN BIOMEDICAL ENGINEERING (Subtitle required). (3)
An interdisciplinary course devoted to detailed study of a topic of current significance in biomedical engineering, such as cellular mechanotransduction, systems biology, and tissue engineering. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

BME 605 BIOMEDICAL SIGNAL PROCESSING I. (3)
Continuous and discrete signals, sampling, Fourier Transform, LaPlace Transform, Z-Transform, correlation and spectral analysis, digital filters. Prereq: Concurrent enrollment or completion of PGY 412G or PGY 502.

BME 610 BIOMEDICAL CONTROL SYSTEMS I. (3)
Homeostatic mechanisms, input-output analysis, steady state and transient response, feedback concepts, system identification and simulation from actual operating data. Prereq: PGY 502 and ME 440 or equivalent.

BME 615 BIOMEDICAL SIGNAL PROCESSING II. (3)
Stochastic processes, Fourier-based spectral analysis and linear system identification, modern spectral estimation (AR, MA, ARMA), parametric transfer function estimation, time-frequency analysis of nonstationary signals. Prereq: BME 605, BME 610, EE 640 recommended.

BME 640 BIOMEDICAL ENGINEERING ETHICS. (1)
This course presents an engineering-based approach to study the system of ethics applicable to biomedical engineering. This course will describe and examine the responsibilities of biomedical engineers to stakeholders, e.g., patients, research subjects, and engineering clients as well as to the legal system (where applicable) and the profession as an entity. As a scholarly discipline, biomedical engineering ethics draws upon principles from subjects such as: the philosophy of science, the philosophy of engineering, and the ethics of technology. Materials from these principles will be used in this course with adaption to the special circumstances attending the practice of Biomedical Engineering.

BME 642 NAVIGATIONAL GUIDES FOR BIOMEDICAL PRODUCT DEVELOPMENT. (3)
This course teaches engineers how biomedical product designs are influenced by government regulations, economic issues, and ethical concerns.

BME 661 BIOMATERIALS SCIENCE AND ENGINEERING. (3)
Study of biological and man-made materials that perform, improve, or restore natural functions. Structure and properties of connective tissue and commonly implanted metals, ceramics, and polymers; biocompatibility of materials used in orthopedic, soft tissue, and cardiovascular applications. Prereq: Undergraduate engineering degree or consent of instructor.

BME 662 TISSUE-IMPLANT INTERFACE. (3)
Study of the interface between implants and host tissues from both the materials and biological perspective. Structure of the tissue-implant interface; surface characterization of biomaterials; protein adsorption; mechanisms of cell responses; the methods for controlling the tissue-implant interface, with emphasis on orthopedic and cardiovascular applications. Prereq: BME 661 or consent of instructor.

BME 670 BIOSOLID MECHANICS. (3)
Application of laws of mechanics to study the behavior of human organ systems. Stress-strain analysis of soft and hard body tissues with emphasis on pulmonary and musculoskeletal systems. Viscoelastic properties. Prereq: Undergraduate engineering degree or consent of instructor.

BME 672 MUSCULOSKELETAL BIOMECHANICS. (3)
Application of laws of mechanics to study behavior of human musculoskeletal system. Materials science of bone, muscle, tendon are integrated into static and dynamic analyses of isolated (e.g., foot, arm, and hand) and whole body segment. Prereq: PGY 502, ME 330 or consent of instructor.

BME 685 BIOFLUID MECHANICS. (3)
Review of the rheology of circulatory processes in the body. Special emphasis on cardiovascular dynamics: pulsatile pressure and flow, vascular impedance, wave propagation/reflection, cardiac dynamics. Special topics. Lecture, three hours with periodic lab demonstrations. Prereq: Undergraduate engineering degree or consent of instructor.

BME 690 RESEARCH IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Individual study related to a special research project. Intended for M.S. candidates who want a research project experience independent of their M.S. thesis work. This course cannot be used to satisfy residency credit requirements. Lecture, 1-3 hours; laboratory, 3-6 hours per week. May be repeated to a maximum of six credits. Prereq: Consent of instructor and graduate standing in BME.

BME 699 SPECIAL TOPICS IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Special topics in biomedical engineering, addressed primarily in a lecture/discussion format. Presentation of focussed or specialized topics that are not available in standard courses. Lecture, three hours; laboratory 0-2 hours per week. May be repeated to a maximum of nine credits. Prereq: Consent of instructor and graduate standing in BME.

BME 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BME 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BME 766 MANAGEMENT OF TECHNOLOGY. (3)
Successfulness in developing new technologies relies upon knowing which technology advance, the ultimate scientific limits of that technology, and the forecasted rate of technological change. This course presents curricula that explore the direction of technological change and how this affects the rate and extent of innovation.

BME 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BME 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

BME 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

BME 772 SEMINAR. (0)
Review of current literature in the field of biomedical engineering, general discussion and presentation of papers on research in biomedical engineering. Lecture, one hour per week. Required for all graduate students in biomedical engineering.

BME 774 GRADUATE BME SEMINAR. (0-1)
Scientists and engineers present current research in biomedical engineering. Students are required to prepare for and deliver a seminar on their own research. May be repeated to a maximum of 4 credits. Prereq: Graduate standing in Biomedical Engineering or consent of instructor.

BME 777 ADVANCED STUDY PROJECT. (3)
This is an independent study project, topic to be selected in consultation with the instructor. Purpose is to integrate all materials learned in the program and apply these principles to the solution of an actual problem in biomedical engineering technology. Prereq: Permission of instructor and completion of year 1 PBME studies.

BME 781 SPECIAL PROBLEMS IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3)
Discussion of advanced and current topics in biomedical engineering. Individual work on research problems of current interest. May be repeated to a maximum of nine credits. Lecture/laboratory hours, variable. Prereq: Approval of instructor.

BME 790 RESEARCH IN BIOMEDICAL ENGINEERING. (1-9)
Graduate research in any area of biomedical engineering, subject to approval of the Director of Graduate Studies. May be repeated to a maximum of nine hours. Prereq: Consent of the Director of Graduate Studies.

BMI Biomedical Informatics

BMI 633 INTRODUCTION TO BIOINFORMATICS. (3)
This is an introductory course aimed at a multi-disciplinary audience with an interest in applying the principles of information sciences for obtaining insight into biological processes and systems that can eventually be used to make informed decisions.

BMI 730 PRINCIPLES OF CLINICAL INFORMATICS. (3)
This course offers an overview of Clinical informatics, which is the application of informatics principles, methods, and tools to support healthcare practice and research activities as well as business processes.

BMI 731 BIOMEDICAL INFORMATION RETRIEVAL. (3)
This class is an introductory information retrieval class that is focused on biomedical information search engines. Basic IR concepts such index construction, optimization, visualization, and evaluation will be covered. In addition to core IR contexts, students will have an opportunity to learn about search engines, web crawling, and some Web 2.0 technologies based on hands-on exercises and assignments with a focus on techniques that can be used to access, retrieve, organize, and present information. Students will employ an open source indexing engine (e.g., Lemur or Lucene or something similar) to understand how back-end of retrieval engine is effectively and efficiently structured.

BMI 732 BIOMEDICAL ONTOLOGIES AND SEMANTIC WEB TECHNIQUES. (3)
This course is a conceptual introduction to biomedical ontologies and ontological modeling in biomedicine through Semantic Web techniques. Students will learn about RDF, OWL, description logics, and SPARQL and their role in designing ontologies. Biomedical terminologies such as GO, ICD-9/10, SNOMED-CT, and MeSH will be discussed as case studies. Prereq: MA 123 (or equivalent) or consent of the instructor.

BMI 733 BIOMEDICAL NATURAL LANGUAGE PROCESSING. (3)
This course is a technical introduction to the area of biomedical natural language processing (NLP). In the field of biomedical informatics, this focuses on the common steps in extracting information from textual data that arises from biomedical literature and clinical documents. Topics involve n-gram models, tokenization, POS tagging, and parsing. Prereq: MA 123 (or equivalent) or consent of instructor.

BMI 734 INTRODUCTION TO BIOMEDICAL IMAGE ANALYSIS. (3)
This class aims to give students a broad overview of biomedical image analysis and imaging informatics. We will introduce the state-of-the-art knowledge to understand, develop, and apply existing methods and software to handle biomedical image data to extract quantitative matrices.

BMI 735 INTRODUCTION TO BIOIMAGE INFORMATICS. (3)
This class provides an introduction to searching and retrieval in biomedical image analysis and imaging informatics. We will introduce some advanced biomedical image analysis, searching, and retrieval algorithm for fast and efficient image searching and retrieval. Prereq: BMI 734: Introduction to Biomedical Image Analysis.

BSC Behavioral Science

#BSC 152 YOU, ME, MYSELF, AND I: PSYCHOSOCIAL INFLUENCES ON HEALTH. (3)
How do our individual thoughts, behaviors, and social interactions influence our health and wellbeing? In this interdisciplinary course, students explore problems that link psychosocial factors (such as cognition, beliefs, self-concept, social support, behavior change, stress, and decision-making) with health outcomes (such as depression, heart disease, addiction, obesity, and mortality). For those interested in pursuing careers in the health care professions, this course provides a basic understanding of the behavioral concepts that are included in professional school admissions tests as well as board certification tests. Prereq: None. Registration with consent of the course instructor.

#BSC 251 THE ENEMY WITHIN: CULTURE AND HEALTH BEHAVIOR. (3)
This seminar will acquaint students with the major social, cultural, and behavioral phenomena that affect our reactions to variations in health. Students will move from knowledge of basic human universal psychological processes to the social and cultural factors shaping our perceptions of health and the delivery of health care. Concurrent with the conceptual material the use of the Rapid Appraisal (RA) technique for evaluating health needs of populations and environments will be introduced and mastered. For those interested in pursuing careers in the health care professions, this course provides an opportunity to apply the behavioral concepts that are included in professional school admissions tests to real-world health problems. Prereq: None. Registration with consent of the course instructor.

#BSC 301 DOCTORING UNDERCOVER: SHADOWING AND THE CULTURE OF MEDICINE. (3)
This experiential learning course consists of three parts: 1) an interdisciplinary introduction to studies of the "culture" of Western medicine; 2) a placement at a shadowing site and directed observational activities related to the historical, social, and interpersonal contexts that shape contemporary health care; and 3) a unique contribution to a collaborative activity guide for other undergraduates who wish to shadow. In this writing intensive course, students learn to take an active role in the shadowing process by reflecting on their experiences and designing

innovative educational materials for their peers. For those interested in pursuing careers in the health care professions, this course provides an opportunity to observe and analyze behavioral health concepts in clinical settings while also enhancing students' application materials for professional school. Prereq: None. Registration with consent of the course instructor.

BSC 331 BEHAVIORAL FACTORS IN HEALTH AND DISEASE. (3)

The study of human behavior relating to health and disease and the organization of health care as a social system. Selected concepts from the psychological and social sciences are presented in a biobehavioral frame of reference and applied to the consideration of specific problems.

#BSC 425 INTRODUCTION TO INTEGRATIVE AND ALTERNATIVE MEDICINE. (3)

This fully online course will delve into topics at the forefront of integrative and alternative medicine. Students will explore the history and organization of fields such as "functional," "integrative," and "complementary and alternative" medicine, and examine the content and philosophies of these fields. Students will learn about topics such as direct-to-consumer genetic testing, the use, regulation, and safety of vitamin, mineral, and botanical supplementation in personalized medicine, and the influence of ancient healing traditions such as Traditional Chinese Medicine and Ayurveda on Western medicine. This course will give students an introduction to an integrative and alternative view of health and healing. Prereq: Junior classification; undergraduate credit or permission of the instructor.

BSC 534 ETHICS AND RESPONSIBILITY IN CLINICAL RESEARCH. (3)

Clinical scientists need a sound understanding of the ethical principles guiding the conduct of research projects. This course will address issues relevant to ethically sound study design, responsible conduct of research and scientific misconduct. Students will also complete human subjects protection training and learn to conduct research in an ethical manner. During this course, students will engage in both in-class lecture and discussion sessions as well as out of class learning activities (outlined below). The final project for graduate students for this course will serve as a practical application of what is learned during the course to students' stated research interest. The goal of this course is to provide an overview of ethical considerations when conducting and reporting clinical research, as well as to provide experience in the practice and application of ethics to clinical science.

It is assumed by the course directors that students in this course are either actively engaged in clinical research or intend to be involved in clinical research in the near future. This course has been designed around the principle that practical knowledge about how to conduct ethical research should be the focus. A second key principle of this course is that it is student-centered, meaning that it emphasizes the involvement of students in applying the concepts of ethics to their own research interests. The course activities are intended to promote the ethical application of research concepts to students' areas of interest and to foster practical knowledge that supports students' own research agendas. The diverse interests and experiences of students and faculty offer opportunities to learn from each other. Prereq: This course is designed for scholars pursuing research training in clinical and translational science to integrate and apply knowledge obtained in previous training. Permission is required from the Course Director for entry into the class.

BSC 620 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE. (1)

This course offers a structural exposure of students to the varieties of basic and clinical science research and current issues in health care policy under discussion at the University Medical Center. Following weekly attendance at research seminars and clinical rounds, students will present their observations in follow-up discussion groups. May be repeated to a maximum of three credits. (Same as CPH 841.)

BSC 625 FUNDAMENTALS OF BIostatISTICS FOR CLINICAL AND TRANSLATIONAL SCIENCE. (3)

This course is designed to support clinical and translational science students in acquiring an applied understanding of the biostatistical tools and techniques commonly used in the conduct of clinical and translational science research. Through a combination of lectures, readings, demonstrations, discussions, and self-study modules, students will understand and appreciate measurement and statistical challenges that are common to clinical and translational science. Study design, selection of independent and dependent variables, and the selection and use of statistical techniques will be the focus of the course. The course activities are intended to promote the application of biostatistics to research concepts in the students' areas of interest and to foster practical knowledge that supports students' own research agendas. If the course is listed as section 001, the format of the course is a standard lecture/discussion. If the course is listed as section 002 the format of the course is a hybrid, with approximately 50% in the classroom and 50% in an on-line format. Prereq: This course is designed primarily for graduate students pursuing research training in clinical and translational science and who have been admitted to the Clinical and Translational Science training program. All students need permission of the instructor to enroll in this course.

BSC 626 SURVEY OF HEALTH PSYCHOLOGY. (3)

A survey of the field of health psychology. It will explore the ways in which social and psychological research contribute to an understanding of health and illness behavior. Prereq: Graduate or professional standing and consent of instructor. (Same as PSY 626.)

BSC 731 METHODS AND TECHNOLOGIES IN CLINICAL AND TRANSLATIONAL SCIENCE. (3)

This overview course is designed to introduce the student to the major methods and technologies of clinical and translational science (CTS) with an emphasis on human subjects research. Students learn these core methodologies through classroom discussions, readings, and written portfolio activities that challenge them to apply methodological concepts to their own areas of research interest. Specifically, the course teaches students how to formulate research

questions and write literature reviews; apply CTS research methods, including experimental, survey, and qualitative research methodologies, to diverse areas of research by aligning appropriate methodologies to research questions of interest, and enhance interdisciplinary communication skills. It is assumed that students are engaged in research that is consistent with CTS or will become engaged in such research in the near future. Prereq: Graduate standing. Permission is required from the Course Director for entry into the class.

BSC 732 INTERDISCIPLINARY PROTOCOL DEVELOPMENT. (3)

This course will introduce students to the processes involved in the development and implementation of interdisciplinary research. Students will be introduced to key aspects of the leadership, communication and teamwork involved in interdisciplinary research. Students will also be introduced to the structure and functioning of the NIH and the NIH grant application and review process. Finally, students will apply their knowledge regarding the research methods and technologies of clinical and translational science to develop an NIH-format research grant application that addresses a research topic in their own area of interest. This course is intended for advanced graduate or professional students pursuing focused research training in one of the degree or certificate programs available in clinical and translational science. It is expected students will have completed the course in Methods and Technologies in Clinical & Translational Science (BSC 731) prior to this course. Prereq: BSC 731 and graduate standing in the clinical and translational science program.

BSC 733 SEMINAR IN CLINICAL AND TRANSLATIONAL SCIENCE. (1)

This seminar course is designed to orient students to clinical and translational research community and activities at the University of Kentucky and to incorporate a multidisciplinary cooperative approach to clinical and translational research. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to ongoing discussions. The course will consist of seven evening seminars focusing on different topics of clinical and translational research. Students will be required to present a description of their research interests and activities during one seminar. Homework assignments will require students to summarize the key elements of each seminar as related to clinical and translational research and the relevance of these issues to their own research interests and career plans. Active participation by all members is expected. Prereq: Graduate standing.

BSC 746 RESEARCH ETHICS AND DILEMMAS. (3)

This class will utilize case studies for debate, class participation, and papers to help students gain skills to recognize and resolve research dilemmas. Objectives of this class include: (1) understand basic elements of ethical dilemmas; (2) to understand basic ethical theories and frameworks for solving ethical dilemmas; (3) to examine ethical dilemmas within a behavioral or medical science research context; and, (4) to examine ways of eliminating bias and promoting objectivity in a behavioral or medical science research context.

BSC 750 HISTORY OF MEDICINE AMONG AFRICAN AMERICANS: IMPLICATIONS FOR HEALTH DISPARITIES. (3)

This course on the history of medicine among African Americans seeks to provide an understanding of the roots of the African American health deficit. The course will enable students to: 1) Articulate how the earliest encounters between African Americans and Western medical researchers set the stage for health inequities. 2) Engage in and direct thought-provoking discussions of how racist pseudoscientific ideas remain in contemporary society that contributes to health disparities among African Americans. 3) Critically examine the theory of eugenics and social Darwinism and how they are used to justify experimental exploitation and poor medical treatment of African Americans. 4) Understand and identify how historical and contemporary medical issues have contributed to medical ethics of distrust in the African American community.

BSC 755 RACE, RACISM AND HEALTH DISPARITIES AMONG BLACKS IN THE U.S. (3)

This course on racism and health disparities is designed to support graduate studies in the social sciences, allied health, and medical disciplines. This course will briefly review the biological and social history of race in America; critique emerging views on the genetics of race; discuss how the classification/mechanism of "race" operates to contribute to health disparities; explore theoretical frameworks of racism and related measures; differentiate between the terms "health inequities", "health inequalities" and "health disparities"; and, examine the biopsychosocial impact of racism on health. Although it is recognized that the discussion of race, racism and health is relevant to other "racially-classified social groups" the course will draw primarily upon the experience of Blacks in the U.S.

BSC 760 AGING, HEALTH AND DECISION MAKING. (3)

This is a doctoral level seminar that provides an overview of behavioral decisional theories (e.g. rational choice, multiattribute utilities models, naturalistic decision-making, ethnographic decision models, Janis and Mann's conflict theory, information processing theory, heuristic models, process tracing models, etc.) and examines research applications of those theories to the health of older adults. Research focuses on decision made by physicians, older adults, family caregivers and policy makers. A variety of applications include such decision domains as preventative screening, retirement and financial planning, other medical treatments, self-care, seeking medical care, institutionalization, end-of-life, etc.

BSC 763 WOMEN'S TRAUMA AND MENTAL HEALTH. (3)

This course will examine the research on intimate partner violence, mental health, and substance abuse among women. Clinical and legal interventions will also be discussed. Although knowledge of at least basic statistics would be helpful, it is not required for this class.

BSC 764 SEMINAR IN HEALTH INEQUITIES. (3)

This course is designed to critically examine undeniable inequities in the distribution of morbidity and mortality. Students explore linkages between disease burdens and the social, economic, and cultural contexts of our rapidly changing world by integrating local, national and international perspectives from social and biomedical sciences. Prereq: Graduate studies in the social sciences and permission of the instructor.

BSC 765 RESEARCH PROBLEMS IN MEDICAL ANTHROPOLOGY. (3)

(1) Advanced history and theory of medical anthropology; (2) research design, field work, analysis of data in medical anthropology. Prereq: Consent of instructor. (Same as ANT 765.)

BSC 766 CONCEPTS IN MEDICAL SOCIOLOGY. (3)

A review of sociological concepts and methods which have been applied to the study of health and medicine; the contributions of medical sociology to general sociological theory and to concepts and research on health-related problems of society. Prereq: Consent of instructor. (Same as SOC 766.)

BSC 770 PSYCHOSOCIAL ISSUES IN HEALTH AND AGING. (3)

This course will focus on psychosocial issues related to the physical health and functioning of older adults. Topic areas include: theories of aging; age-appropriate research designs; age-related cognitive personality, social and family changes which influence physical health; health behavior and education of older adults; and selected chronic conditions, e.g. Alzheimer's disease, arthritis, depression, diabetes and stroke.

BSC 772 TOPICAL SEMINAR IN MEDICAL BEHAVIORAL SCIENCE. (1-3)

Advanced study of selected topics of current importance in medical behavioral science. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

BSC 773 PSYCHOSOCIAL ONCOLOGY. (3)

This course will introduce the student to the field of psychosocial oncology. Historical and recent developments in the application of behavioral science knowledge and methodology to the understanding and treatment of cancer and the cancer patient will be examined. The role of psychosocial factors in the etiology, prevention, and treatment of cancer will be explored. Emphasis will be placed upon the interaction of biological, psychological, and social factors throughout the course of cancer. Prereq: Graduate standing.

BSC 774 FOOD AND FOOD SECURITY IN A CHANGING WORLD. (3)

This cross-cultural seminar explores the biocultural interactions among food, human biology, and the social, cultural, political and economic factors that shape food-related behaviors and nutritional status of populations. Topics include the social role of food, food beliefs and ideology, the political economy of malnutrition, development strategies and food security, and methods in nutritional anthropology research. Readings and discussions are research focused and approach issues from a variety of theoretical perspectives. Prereq: ANT 601 or consent of instructor. (Same as ANT 774.)

BSC 776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)

The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutional dependency; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as ANT/PSY/SOC 776.)

BSC 778 BEHAVIORAL FACTORS IN SELECTED DISEASES. (3)

An exploration of behavioral science concepts which bear on various physical illnesses. The perspective of the course is interdisciplinary, using concepts from the various behavioral science disciplines. Prereq: Consent of instructor.

BSC 779 BEHAVIORAL FACTORS IN DEATH AND DYING. (3)

Behavioral concepts are examined which explain reactions of individuals, collectivities and social institutions to the phenomenon of death. Prereq: Consent of instructor.

BSC 782 WOMEN'S HEALTH AND AGING. (3)

This class explores the issues related to health and well-being among older women. Using a multidisciplinary approach that blends humanities, social and medical science and public policy, the course examines social, economic and cultural contexts of chronic physical and mental health. Prereq: Upper level/graduate class in social science. (Same as GRN 782.)

BSC 787 BIOBEHAVIORAL PERSPECTIVES ON DRUG AND ALCOHOL ABUSE AND DEPENDENCY. (3)

This seminar course is designed to survey major topics, concepts and issues pertinent to the field of drug and alcohol abuse and dependence. The course will consist of 14 weekly presentations by instructors followed by open discussion of the presentation and assigned readings by class members. Active participation by all members is expected. Each weekly presentation is designed to provide a general overview of the current state of knowledge (e.g. theory, methods, ethics, review of classic and/or exemplary studies) in a given area of drug and alcohol abuse and dependence research. Discussions are intended to integrate the information across traditional disciplinary boundaries. Prereq: Graduate standing.

BSC 788 DRUG ABUSE: CONTEMPORARY THEORIES AND ISSUES. (3)

This course is designed to familiarize students with major concepts and current issues in the field of substance abuse research.

BSC 790 RESEARCH IN MEDICAL BEHAVIORAL SCIENCE. (1-6)

Individually directed research and reading in particular aspects of medical behavioral science under the supervision of one or more members of the faculty. May be repeated to a maximum of 12 hours. Prereq: Consent of instructor.

BSC 814 PATIENTS, DENTISTS AND SOCIETY I. (1)

This course aims to orient the student to the place health and health professions play in modern cultures. Recognition of their own social assumptions and values and those of persons of different backgrounds is encouraged. Understanding, predicting, and changing dental patient behavior from a social standpoint is emphasized. (Same as CDE 814.)

BSC 815 FIRST-YEAR ELECTIVE, BEHAVIORAL SCIENCE. (1-3)

With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

BSC 824 COMMUNICATION IN THE DENTAL HEALTH CARE SETTING. (1)

This course aims to improve the student's ability to communicate with patients and the public in an empathetic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second year standing in the College of Dentistry. (Same as CDE 824.)

BSC 825 SECOND-YEAR ELECTIVE, BEHAVIORAL SCIENCE. (1-4)

With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

BSC 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)

With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:**BSC 850 ELECTIVE IN BEHAVIORAL SCIENCE****BSC 880 TREATMENT OF DENTAL FEAR**

BST Biostatistics

***BST 230 STATISTICAL THINKING IN PUBLIC HEALTH. (3)**

BST 230 provides students with an introduction to statistical concepts that are important for solving real-world public health problems. This course will present statistical principles and associated scientific reasoning underlying public health practice and health policy decision-making. Topics include data visualization, summary statistics, statistical inference, study design and data analysis, and strategies for articulating and evaluating claims using statistical constructs. Prereq: UK Core course in Quantitative Foundations.

BST 655 INTRODUCTION TO STATISTICAL GENETICS. (3)

BST 655 presents an introduction to the statistical methodologies used today to investigate genetic susceptibility to complex diseases. The course focuses on linkage and association analysis with applications to real-world data. Commonly used (and freely available) software will be presented and used throughout. Because the field is constantly evolving, a focus of the material for this course will be recent statistical human genetics literature. Prereq: STA 580 or equivalent. (Same as STA 655.)

BST 675 BIOMETRICS I. (4)

This course, the first of a two-semester sequence in biometrics, introduces probability, discrete random variables, continuous random variables, joint distributions, and sampling distributions. Prereq: STA 580 and MA 114 or equivalent.

BST 676 BIOMETRICS II. (4)

This course, the second of a two-semester sequence in biometrics, introduces techniques for constructing and evaluating point estimators, hypothesis testing procedures, and interval estimators. Prereq: BST 675.

BST 681 LINEAR REGRESSION. (3)

This course, the first in a two-semester sequence in regression modeling, covers linear regression models for normally distributed outcomes. The course will cover simple and multiple linear regression, estimation, interpretation, hypothesis testing, model building and diagnostics, matrix algebra for regression, and an introduction to design of experiments. The course will include the use of computing tools to apply these models to real data. Prereq: STA 580 or consent of instructor.

BST 682 GENERALIZED LINEAR MODELS. (3)

This course, the second in a two-semester sequence in regression modeling, covers regression models for outcomes which are not normally distributed, such as binary and count data. The course will cover the generalized linear model framework, multivariate maximum likelihood theory, logistic regression, Poisson regression, and nominal and ordinal logistic regression models, as well as approaches for building and checking these models. The course will include the use of computing tools to apply these models to real data. Prereq: BST 675, BST 681.

BST 693 STATISTICAL PRACTICE IN PUBLIC HEALTH. (3)

To provide an introduction to statistical practice in public health including improved statistical communication (how to ask good questions in a consulting session, writing analysis plans, and

Course Descriptions

how to express results both orally and in writing), programming for reproducibility and data ethics, and utilizing statistical methodology for problem solving in public health research. Prereq: CPH 630/STA 681 or equivalent and CPH 535 or equivalent.

BST 701 BAYESIAN MODELING IN BIOSTATISTICS. (3)

This course provides an introduction to Bayesian ideas and data analysis applied to the biosciences. The course illustrates current approaches to Bayesian modeling and computation in biostatistics. Prereq: BST 682 and BST 676 or equivalent.

BST 713 CLINICAL TRIALS. (3)

Design and analysis of Phase I-III clinical trials, interim monitoring of trials, sample size, power, crossover trials, bioequivalency, mixed models, and meta analysis. Coreq: STA 603. (Same as STA 653.)

BST 740 SPATIAL STATISTICS. (3)

Course will cover risks and rates, types of spatial data, visualizing spatial data, analysis of spatial point patterns, spatial clustering of health events based on case control studies, and based on regional counts, linking spatial exposure data to health events through regression modeling, Bayesian spatial analysis. Prereq: BST 682.

BST 761 TIME TO EVENT ANALYSIS. (3)

Analysis of time to event data encountered in Public Health and Medicine. Survival distributions and hazard functions. Time to event analysis using Kaplan-Meier method and life-table method. Accelerated failure time model, logit model for discrete data, complimentary log-log model, and proportional hazards model. Tests for goodness-of-fit, graphical methods, and residual and influence statistics. Time-dependent covariates, non-proportional hazards, left truncation, and late entry into the risk set. Sample size and power, competing risks, and time to event analysis with missing data. Prereq: STA 580 or equivalent.

BST 762 LONGITUDINAL DATA ANALYSIS. (3)

This course presents statistical techniques for analyzing longitudinal studies and repeated measures experiments that occur frequently in public health, clinical trials, and outcomes research. This course will cover linear mixed models, generalized linear mixed models and an introduction to nonlinear models as they apply to the analysis of correlated data. Prereq: BST 682 and BST 676. (Same as STA 632.)

BST 763 ANALYSIS OF CATEGORICAL DATA. (3)

Multinomial and product-multinomial models; large-sample theory of estimation and testing, Pearson chi-square and modified chi-square statistics, Pearson-Fisher Theorem, Wald Statistics and generalized least squares technique; applications to problems of symmetry, association and hypotheses of no interaction in multi-dimensional contingency tables. Prereq: STA 603 and STA 606. (Same as STA 665.)

BST 764 APPLIED STATISTICAL MODELING FOR MEDICINE AND PUBLIC HEALTH. (3)

This course introduces some useful statistical models not typically encountered in the core courses of a master's or doctoral biostatistics curriculum. These include finite mixture models, nonparametric regression models, covariance-based models, and stochastic models. Prereq: BST 682 and BST 676.

BST 765 MISSING DATA METHODOLOGY FOR PUBLIC HEALTH. (3)

This course surveys methods for analyzing data with missing observations. This includes methods for data missing completely at random including hot deck cold deck, mean substitution, and single imputation; methods for data missing at random including multiple imputation and weighted estimating equations and methods for data missing not at random including pattern mixture models, selection models, and shared random effects models. Prereq: BST 676 and BST 762.

BST 766 ANALYSIS OF TEMPORAL DATA IN PUBLIC HEALTH. (3)

This course surveys methods for analyzing public health data collected over time. Methods covered include smoothing time series data, the modeling of stationary time series for Gaussian, dichotomous, and case count responses, methods for detecting the clustering of disease over time, and methods for the surveillance of infectious diseases in real time. Prereq: BST 682 and BST 676.

BTH Bioethics

BTH 405 BIOETHICS ON FILM. (1-3)

The objectives of this course are to use a variety of films (some documentaries) to examine core bioethics issues and principles comprising Autonomy, Beneficence, Non-Maleficence and Justice. Core concepts in Professionalism and Humanism will also be explored. The films selected help to illustrate complex bioethics issues within our current social and medical constructs.

CDE Community Dentistry

CDE 814 PATIENTS, DENTISTS AND SOCIETY I. (1)

This course aims to orient the student to the place health and health professions play in modern cultures. Recognition of their own social assumptions and values and those of persons of different backgrounds is encouraged. Understanding, predicting, and changing dental patient behavior from a social standpoint is emphasized. (Same as BSC 814.)

***CDE 815 FUNDAMENTALS OF DENTAL PUBLIC HEALTH. (2)**

Fundamentals of Dental Public Health is a first-year course designed to introduce student dentists to the dental specialty of Dental Public Health, to dental epidemiological concepts, terminology, and methods used in population-based health care. Community oral health problems in Kentucky and the United States will be reviewed. Emphasis will be placed on public health research, programming, and outcome evaluation strategies related to oral disease in populations.

CDE 824 COMMUNICATION IN THE DENTAL HEALTH CARE SETTING. (1)

This course aims to improve the student's ability to communicate with patients and the public in an empathetic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second year standing in the College of Dentistry. (Same as BSC 824.)

***CDE 830 ADVANCED CONCEPTS IN DENTAL PUBLIC HEALTH. (1)**

Advanced Concepts in Dental Public Health is a third year course designed to help students develop the perspective and sensitivities of dentists practicing in the community. It examines the external environment and various factors that influence the oral health of the community including barriers to care. Financing mechanisms and workforce issues will be discussed. To provide a framework for the dental student's professional development, the instructional content builds on the concepts acquired in the first year introductory course in dental public health and presents concepts that will help the student dentist prepare for the Community-Based Dental Education Program. (CDE 841).

Course material is organized around current societal and dental health issues and health care delivery system trends in Kentucky and the United States. These issues and trends will be examined in the context of current national debates concerning access to oral health prevention and care for high risk populations and the associated health disparities to these populations. Prereq: Admission to College of Dentistry or consent of course director.

***CDE 840 ADVANCED COURSE ON THE TREATMENT OF SPECIAL PATIENTS. (1)**

In this course, dental students participate in preclinical seminars and dental treatment of mentally, medically and physically handicapped patients. Several phases of dental treatment of the special patient, such as sedation and general anesthesia, pharmacological evaluation and preventive dentistry, are covered. The course is individually designed based on the student's interest in treating compromised patients. Note: Scheduling for this course will take place outside of regularly scheduled clinic/class time. Enrollment minimum is one and maximum enrollment is four. Prereq: Consent of Course Director, Academic Performance Committee (APC), and Team Leader.

***CDE 841 DENTAL PRACTICE FIELD EXPERIENCE. (4-10)**

Students are provided a full-time, off-campus assignment to a dental practice environment. Students participate in practice management and patient treatment activities under the supervision of a dentist. They also participate in career plan development and in study of the community or region, particularly its health care delivery system and the role of dentistry in that system. Prereq: CDE 830.

CDE 844 DENTAL PRACTICE MANAGEMENT II. (4)

This course is primarily designed to give the student dentists, prior to graduation, practical, useful knowledge on establishing and maintaining a private dental practice. The course will be presented in an active learning format. Course sessions and activities will also include special sessions designed to introduce students to the current environment of dental practice, to organized dentistry in Kentucky, to the College's Alumni Association and to new developments and continuing education in the dental profession. Lecture 69 hours. Prereq: CDE 830 or consent of course director.

***CDE 850 EXTRAMURAL EXPERIENCES FOR STUDENT DENTISTS. (1-6)**

This course is designed to provide student dentists an experiential learning experience in a research program, clinical program, public health program, and/or institutional dental program. Career planning and service-learning are emphasized and coordinated with placement in a community-based site. Students learn by active participation in patient care and/or research, by observation and by discussion with mentors. Discussions and interviews with patients and dental residents and staff are also encouraged. This course provides an opportunity for selected students, based on their own career goals, to participate in short-term elective dental educational experience external to the students dentists' clinics. While the sites vary greatly, most experiences include some patient care experiences (observation, assisting, direct participation in patient care under the direct supervision of an approved mentor). Extramural experiences are customized for each student dentist. Prereq: Consent of Course Director, Academic Performance Committee (APC), and Team Leader.

CDE 855 PUBLIC HEALTH DENTISTRY FIELD EXPERIENCE. (1-2)

This course allows implementation of oral health promotion programs designed in CDE 830 in community settings. Prereq: Must be fourth year dental student.

CDE 880 TREATMENT OF DENTAL FEAR. (1)

This advanced course in the treatment of dental fear is intended to prepare the student to manage very fearful dental patients. Topics covered include etiologies, diagnosis and types, relaxation

and distraction, and case histories. Note: Scheduling for the course will take place outside of regularly scheduled clinic/class time. Prereq: CDS 823 and consent of course director. (Same as BSC 880.)

***CDE 883 COMMUNITY-BASED SERVICE ELECTIVE. (1-5)**

This Community-Based Service elective is designed to give students greater opportunities to provide dental services to diverse, underserved populations. The goals of this course are to expand development of a service ethic and to meet some of the needs of populations who do not have access to dental care. The majority of the time requirements for this course will be rotations to community clinics where students will work under the supervision of a College of Dentistry faculty providing dental services. Prereq: Third year standing and approval of College of Dentistry APC.

CDE 884 INTERNATIONAL ELECTIVE. (1-3)

This community-based service learning elective is designed to afford students greater opportunities to provide a broad spectrum of dental educational, clinical and public health services to diverse, underserved populations in an international setting. The majority of the time requirements for this course will be in a foreign country at designated community sites potentially working with other health care professionals. Activities will include but are not limited to assessing both community and patient needs and providing services based on the needs assessment and community goals. Students will work with UK approved organizations and under the direct supervision of a College of Dentistry faculty while in-country.

CDS Conjoint Dental Science

CDS 611 CHILD GROWTH AND DEVELOPMENT PART I. (2)

A seminar course on nature and physiologic control of physical growth, for graduate students in dentistry. Prereq: Admission to a graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

CDS 612 CHILD GROWTH AND DEVELOPMENT PART II. (2)

A seminar course for graduate students in dentistry covering emotional and intellectual growth of children, and diseases and congenital anomalies of children. Prereq: Admission to graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

CDS 613 CONTEMPORARY LEADERSHIP IN DENTISTRY. (1)

The course will explore the current leadership dilemma in the health professions (specifically). The purpose is to prompt the extension of the role of oral health professionals to serve as leaders who engage a richer "public good" agenda as part of their role as doctor/teacher. The course will concentrate on important issues such as leadership development and theories of leadership; team building; personality preferences and leadership; peer assessment; transformational and transactional leadership; stress management; leading change; negotiation; and giving and receiving feedback. Prereq: Enrollment in one of the College of Dentistry's post-doctoral programs.

CDS 631 DIAGNOSIS AND MANAGEMENT OF TEMPOROMANDIBULAR DISORDERS AND OROFACIAL PAIN. (1)

This course provides information regarding the normal anatomy and function of the masticatory system and then highlights some of the common disorders related to dysfunction of this system. Emphasis is placed on temporomandibular disorders and how they are identified and management in the clinical practice. Other disorders associated with orofacial pain complaints will be discussed so that students are able to identify these conditions and successfully manage them or refer the patient to the appropriate health care provider. Prereq: Admission to dental graduate program; D.D.S. or D.M.D. degree.

CDS 660 RESEARCH DESIGN, METHODS AND DISSEMINATION. (2)

This lecture/seminar course is designed to provide students with an overview of the basic principles of study design and protocol development, with a focus on clinical and translational research. It also is designed to expose students to the interplay between patient care and clinical/translational research and to provide the students with tools that will assist them in dissemination of their research findings. Prereq: Admission to dental graduate program.

CDS 670 ADVANCES IN ORAL AND MAXILLOFACIAL PATHOLOGY. (1)

This course consists of 16 hours of lecture on the major disease topics in Oral and Maxillofacial Pathology including oral mucosal, salivary gland and bone pathology. Current classifications of these major categories will be presented and selected topics of current importance will be discussed. Prereq: Admission to dental graduate program.

CDS 680 CLINICAL MEDICINE FOR POSTGRADUATE DENTAL STUDENTS. (2)

This course is designed to provide graduate students and dental residents with an advanced understanding of how various medical disorders and medical therapies can affect oral health and the delivery of dental care. Prereq: Admission to dental graduate program.

CDS 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CDS 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

***CDS 812 NORMAL HUMAN GROWTH AND DEVELOPMENT. (1)**

This is a lecture course which introduces basic concepts of normal human growth and development from birth through adolescence. Lectures emphasize the time-dependent changes that normally occur during physical and psychological maturation. A special emphasis is directed toward basic knowledge and understanding of craniofacial growth and development of the teeth and occlusion. Prereq: Admission to the College of Dentistry or consent of course director.

***CDS 813 MANAGEMENT I: INTRODUCTION TO MANAGEMENT FOR THE DENTIST. (1)**

CDS 813 is the first in a series of conjoint courses to improve the management of patients by student dentists. The course is co-directed by the patient care Team Leaders. Special didactic and clinical activities are included to provide the student with an introduction to clinical protocol and to the fundamentals of patient management. The course spans both semesters of the academic year, and includes all clinical activities and interactions with Team Leaders. Prereq: Admission to the College of Dentistry.

***CDS 815 INTRODUCTION TO CLINICAL DENTISTRY. (3)**

This survey course presents an introduction to the dental field of operation (operatory), basic assisting procedures, preventive dentistry, infection control, application of sealants and oral isolation techniques. It is designed to prepare students to function in dental environments, safely and efficiently and to prepare them for the school-based sealant experience offered in CDE 815, Fundamentals of Dental Public Health. Prereq: Admission to the College of Dentistry or consent of the course director.

CDS 816 THE PROFESSION OF DENTISTRY. (1)

This course is an introduction to life in the profession of dentistry. The course will explore normal everyday morality, and consider whether a case can be made for an extraordinary morality or ethic for practitioners. The course will conclude with a brief review of the history of dentistry to enable the student to place the profession of dentistry in cultural and historical perspective. Prereq: Admission to the College of Dentistry.

***CDS 818 THE PROFESSION OF DENTISTRY I. (1)**

This course is an introduction to life in the profession of dentistry. The course will explore normal everyday morality, and consider whether a case can be made for an extraordinary morality or ethic for practitioners. The course will conclude with a brief review of the history of dentistry to enable the student to place the profession of dentistry in cultural and historical perspective. Prereq: Admission to the College of Dentistry or consent of Course Director.

***CDS 819 SPECIAL TOPICS IN DENTISTRY I. (1)**

This course is the first year of the two year longitudinal core curriculum in Interprofessional Healthcare Education. The purpose of this first-year course is to present current information on a wide variety of topics ranging from interprofessional collaborative care, culture and society, minority health issues, gender and age as factors in health care, alcohol and substance abuse, evidence-based practice and decision-making, the connection between a healthy work-life balance and being a successful practitioner, and the use of mindful meditation practices for maintaining a work-life balance, along with other subjects of relevance to students enrolled in the dental curriculum. In some cases, the course content applies directly to didactic and clinical courses in the curriculum. At other times, the material is intended to help students increase their success in the curriculum and become better caregivers. Seminar, 20 hours. Prereq: First year standing.

***CDS 821 LOCAL ANESTHESIA. (1)**

The action and dosage of local anesthetic agents used in dentistry are taught as are the proper injection techniques. The technique of venipuncture and administration of intravenous drugs are also included. Patient evaluation and emergency techniques for cardiac and respiratory resuscitation are reviewed. Prereq: ANA 534.

***CDS 822 GERONTOLOGY/GERIATRIC DENTISTRY. (1)**

This course is designed to help students gain an appreciation for the significant opportunities as well as challenges the aging population will bring to their oral health practice. This course will provide students basic knowledge and information in gerontology/geriatric dentistry. Prereq: Permission of course director.

***CDS 823 MANAGEMENT II: CLINICAL PATIENT MANAGEMENT. (1)**

CDS 823 is the second in a series of conjoint courses designed to improve the management of patients by student dentists. The course is directed by the patient care Team Leaders with other faculty. Special didactic and clinical activities are included to improve and maintain the students' ability to manage patients safely and efficiently. One of the primary goals of this course is to improve students' ability to interact with patients in an empathetic and professional manner. The course spans both semesters of the academic year and includes all clinical activities and interactions with Team Leaders. Prereq: CDS 813 or consent of course director.

***CDS 824 ORAL DIAGNOSIS AND TREATMENT PLANNING. (1)**

The purpose of this course is to prepare the student for clinical dentistry by presenting techniques of examination and diagnostic procedures that ultimately lead to diagnosis and

Course Descriptions

treatment planning. Prereq: ODM 814 or consent of course director.

***CDS 828 THE PROFESSION OF DENTISTRY II. (1)**

This course focuses on ethical practice in clinical dentistry. In the life of a health-care clinician circumstances arise daily which are ethical in nature. The dentist, and the patient, must respond to these circumstances in ways that result in the best for all parties concerned. This course will explore the duties assumed by dentists in becoming a provider of oral health care for patients. In doing so, the major question to be addressed is, "How do dentists interact with their patients for the good of both?" Prereq: Admission to the College of Dentistry or consent of Course Director.

CDS 829 SPECIAL TOPICS IN DENTISTRY II. (1)

This course is the second year of the two year longitudinal core curriculum in Interprofessional HealthCare education. The course focuses primarily on team approaches to patient quality and safety and issues surrounding transitions in settings of patient care. Background information is presented through BlackBoard and students then meet in several interprofessional groups for discussions and completion of a group capstone project. There are also two required named lectures to attend and one session on Evidence Based Dentistry (EBD). Seminar, 16 hours. Prereq: CDS 819.

CDS 830 NEW DEVELOPMENTS IN DENTISTRY III. (1-2)

This course will cover selected new developments in dentistry or treat with added emphasis established dental skills and knowledge. The topics will be in such areas as the basic sciences, behavioral science, clinical dentistry, dental practice management, and community dentistry. When offered, this course will be required of third-year dental students. May be repeated to a maximum of four credits. Prereq: Third-year standing in the College of Dentistry; any course prerequisites will be announced.

***CDS 831 CONSCIOUS SEDATION. (1)**

This course is designed to teach the principles of nitrous oxide-oxygen inhalation sedation and intravenous sedation in dentistry. The management of emergencies associated with these techniques and an introduction to the principles of general anesthesia are also included. Prereq: CDS 821.

***CDS 833 MANAGEMENT III: CLINICAL PATIENT MANAGEMENT. (1)**

CDS 833 is the third in a series of conjoint courses to improve the management of patients by student dentists. The course is directed by the four patient care Team Leaders. Special didactic and clinical activities are included to improve and maintain the student dentist's ability to manage patients and provide care. The course spans both semesters of the academic year and includes all clinical activities and interactions with Team Leaders. Prereq: CDS 823.

***CDS 835 DENTAL IMPLANTOLOGY. (2)**

Dental implantology has become an integral part of dental services. This course contains information on patient centered criteria for implant services, surgical considerations, and prosthetically driven treatment results. The student will have the opportunity to familiarize him/herself with the components used in providing such treatment through a hands-on laboratory session. Prereq: Admission to College of Dentistry or discretion of course director.

***CDS 836 DIAGNOSIS AND MANAGEMENT OF OROFACIAL PAIN. (3)**

This course is designed to present information regarding the diagnosis and management of Orofacial Pain and Temporomandibular Disorders. The course will consist of a series of lectures and case presentations. The information provided in this course will allow the student to understand the dentist's role in managing complex orofacial pain problems. The area of temporomandibular disorders will be emphasized since the dentist plays a major role in managing these pain disorders. Prereq: ANA 534, OSG 820, and RSD 822.

CDS 838 THE PROFESSION OF DENTISTRY III. (1)

This course is an introduction to the issues of justice and how we define, appropriate, and ensure justice today. The ethical principle of justice is the touchstone for American law, and a vision for our judiciary system. While dentists, as members of society, comply with laws in a way common to all other citizens, they also have additional legal responsibilities which derive from the unique relationship dentist and dentists have with society generally and patient specifically. This course will explore the relationship of dentistry to society and attempt to explicate further the nature of professional responsibility. In so doing, the major question will be, "How do society and dentistry interact for the good of the public and the profession?" Prereq: Approval of dean and/or his designee for academic affairs and the course director.

***CDS 843 MANAGEMENT IV: CLINICAL PATIENT MANAGEMENT. (1)**

CDS 843 is the fourth in a series of conjoint courses to improve the management of patients by student dentists. The course is directed by the four patient care Team Leaders. Special didactic and clinical activities are also included to improve and maintain your ability to manage patients. The course spans both semesters of the academic year, including all clinical activities and interactions with Team Leaders. Prereq: CDS 833 or consent of course director.

CDS 844 DRUG MISUSE, ABUSE AND DEPENDENCY: WHAT DENTISTS NEED TO KNOW. (1)

This course is designed to provide new insights and understanding into prevention, recognition and treatment of patients with, and at risk for, drug misuse and abuse. The course enables dental students to understand addiction as primary, chronic and progressive disease and to demon-

strate an understanding of the pharmacology, abuse potential, as well as the behavioral and physiological effects of the commonly abused drugs. Emphasis will be on increasing dental students skills and abilities to recognize the signs and symptoms of drug abuse; identify and manage patients at risk for drug problems; and become effective in providing successful care for drug dependent patients while minimizing their potential for relapse.

***CDS 846 DIAGNOSIS AND MANAGEMENT OF OROFACIAL PAIN. (3)**

This course will present information regarding the diagnosis and management of orofacial pain and temporomandibular disorders. The information provided in this course will allow the student to understand the dentist's role in managing complex orofacial pain problems. The area of temporomandibular disorders will be emphasized since the dentist plays a major role in managing these pain disorders. Prereq: ANA 534, OSG 820, and RSD 822.

***CDS 860 SPECIAL TOPICS IN ORAL HEALTH. (1-3)**

This course will engage students in a variety of activities including lectures, independent literature review and reading community-based projects, and individual or small group discussions to address current topics of special interest or concern in oral health. Projects and discussion areas for students participating in an interdisciplinary colloquium will be developed in conjunction with other health care providers. Prereq: Enrollment in the College of Dentistry; approval of the course director.

CDS 863 EXPLORING DENTAL TEACHING ELECTIVE. (1)

This course will provide dental students who have an interest in teaching an opportunity to learn about being a dental faculty member in a systematic way. This course will educate dental students on two main subjects: 1) Roles, responsibilities, and opportunities for dental educators in an academic institution, and 2) Effective teaching in the classroom and clinic. Lecture, 16 hours. Prereq: Open to all 4th year dental students. Open to 3rd year dental students with permission of the course director and the Academic Performance Committee.

***CDS 865 FORENSIC ODONTOLOGY. (1)**

Elective introductory course in forensic dentistry for fourth year dental students. Prereq: Must be fourth year dental student.

CDS 881 MAXILLOFACIAL DISEASE FOR THE HEALTH CARE PROFESSIONAL. (1)

Designed for motivated 4th year medical students who want to understand more about Hospice and Palliative Care. This rotation will present students with a multidisciplinary approach to caring for patients by working with doctors, nurses, home health care providers and chaplains. Prereq: MD 836/837 or consent of course director. (Same as SUR 875.)

CDS 885 ADVANCED DENTAL IMPLANTOLOGY ELECTIVE. (1)

Dental Implantology has become an integral part of dental services. This course contains information on patient centered criteria for advanced implant services, advanced surgical considerations, and advanced prosthetically driven treatment results. Additional topics include treatment planning for complex dental implant cases, mechanical and restorative complication related to implant dentistry, esthetic consideration for implant restorations, immediate implant placement and immediate provisionalization, and immediate/early loading protocols will be discussed. The student will have the opportunity to familiarize him/herself with multiple implant systems and multiple implant placement protocols. The student will have the opportunity to have literatures review on most current techniques and products. 12 hours Lecture, 8 hours Laboratory. Prereq: Successful completion of CDS 835.

CE Civil Engineering

***CE 106 COMPUTER GRAPHICS AND COMMUNICATION. (3)**

Introduction to visualization, orthographic projection, and computer-aided drawing. Graphical solution of spatial problems. Integrated use of computer graphics to create civil engineering drawings. Lecture, two hours; laboratory, three hours per week. Prereq or coreq: MA 113 or consent of instructor.

CE 120 INTRODUCTION TO CIVIL ENGINEERING. (1)

An introduction to the civil engineering profession and the use of computer hardware and software in CE systems analysis and design. Presentations will be used to illustrate the conception, design, construction, and operation processes. Sample problems and class exercises on the various technical areas of civil engineering will make use of existing computer software packages and teamwork principles.

CE 195 INDEPENDENT WORK IN PRE-CIVIL ENGINEERING. (0-4)

Independent or make-up work for lower division engineering students in the field of civil engineering. May be repeated for a maximum of four credit hours. Prereq: Admission to the College of Engineering and consent of department chair or DUS, and the instructor.

CE 211 SURVEYING. (4)

A comprehensive course in the art and science of surveying as applied to civil engineering, including the use and care of surveying instruments; measurement of horizontal and vertical distances, angles and directions; collection of ground and underground data for the design and

layout of roads, buildings, various mineral workings and other structures; and some aspects of the precise determination of position and direction for survey control. Lecture, three hours, laboratory, three hours per week. Prereq or coreq: CE 106; prereq: MA 114.

†**CE 221 APPLIED UNCERTAINTY AND RISK ANALYSIS IN CIVIL ENGINEERING.**

CE 303 INTRODUCTION TO CONSTRUCTION ENGINEERING. (3)

The study of the planning, administration, management, and cost of construction projects and an introduction to the methodology utilized in executing specific designs. Emphasis is placed on the organization of construction firms, development of construction documents, theory of engineering economics, estimating and quantity take-off, contractual and management systems, scheduling, project administration, and inspection of construction operations. Prereq: CE 106 and engineering standing.

CE 329 CIVIL ENGINEERING COMMUNICATIONS AND TEAMS LAB. (1)

The class focuses on presenting the proper tools and techniques for oral presentations, identifying the requirements for proper technical writing, and providing students with the means to effectively work within a team environment. Prereq: CIS 111 Comp and Comm II; Engineering standing.

CE 331 TRANSPORTATION ENGINEERING. (3)

An introduction to transportation engineering. Development of transportation systems in the United States. Route geometrics and design. Traffic flow characteristics and control. Planning financing and economic analysis of transport facilities. Prereq: CE 211 and engineering standing.

CE 341 INTRODUCTION TO FLUID MECHANICS. (4)

Fundamental principles of thermodynamics and fluid flow. Includes fluids at rest, fluids in motion. Continuity, momentum and energy relations, ideal and viscous fluids. Emphasis on incompressible fluids. Description of pumps and open channels. Prereq: PHY 231 and MA 214 and engineering standing.

CE 351 INTRODUCTION TO ENVIRONMENTAL ENGINEERING. (3)

Overview of environmental chemistry and microbiology, water quality, water and wastewater treatment, solid and hazardous wastes management, hazardous waste remediation, and air pollution control. Emphasis on the basic science and engineering principles required to understand both natural and engineered systems, as well as the engineering approach to understanding the natural environment and specific treatment mitigation methods. Prereq: CHE 107, MA 214, PHY 231, and engineering standing.

***CE 381 CIVIL ENGINEERING MATERIALS I. (3)**

A study of the microscopic and macroscopic structures and properties of materials used in civil engineering construction with emphasis on the relationships of their physical and mechanical properties to engineering design and application. Written reports and oral presentation of results will be required. Lecture, two hours; laboratory, three hours per week. Prereq and/or coreq: EM 302 and engineering standing.

CE 382 STRUCTURAL ANALYSIS. (3)

Statically determinate analysis of two-dimensional structures: trusses, beams and frames. Influence lines for truss and beam structures. Displacement calculations using virtual work principles. Statically indeterminate analysis includes approximate, force method and plastic analysis. Prereq: EM 302 and engineering standing.

CE 395 INDEPENDENT WORK IN CIVIL ENGINEERING. (1-6)

Individual work on some selected problem in the field of civil engineering. May be repeated for a maximum of six credits. Prereq: Engineering standing, consent of department chairperson and the instructor.

CE 399 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)

A detailed investigation of a topic of current significance in civil engineering such as: design of small earth dams, man and the environment, drilling and blasting, scheduling construction operations, construction equipment and methods, traffic safety, optimum structural design, environmental impact analysis, systems analysis in civil engineering, motor vehicle noise and its control. May be repeated to a maximum of eight credits, but only four credits can be earned under the same title. A particular topic may be offered at most twice under the CE 399 number. Prereq: Variable; given when topic identified and registration in the College of Engineering.

CE 401 SEMINAR. (1)

A discussion of the ethical and professional aspects of civil engineering practice. Concepts of loss prevention and conflict resolution. Structured small group discussion, oral presentations, and role playing. Lecture, two hours per week. Prereq: Senior classification and engineering standing.

†**CE 403 CONSTRUCTION METHODOLOGY.**

***CE 429 CIVIL ENGINEERING SYSTEMS DESIGN. (3)**

The course is designed to provide the graduating civil engineer with an integration of professional practice issues with planning, design, and construction. Topics to be covered will include: development of teaming, problem solving, and decision-making skills; development of written and oral technical communication skills; procurement of professional services; integration of planning, design, and construction activities; integration of environmental, legal, political, and social issues and concerns into the project process. All activities will be conducted in teams. Lecture, two hours; laboratory three hours per week. Prereq: To be taken during the student's last semester.

CE 433 RAILWAY OPERATIONS

AND MULTI-MODAL TRANSPORTATION. (3)

Study of the transportation engineering aspects of efficient management of railway freight, passenger and intermodal operations and the relationships to the other major transport modes – water, highway, air, pipeline and overland conveyor. Prereq: CE 331 and engineering standing.

†**CE 451 WATER AND WASTEWATER TREATMENT.**

†**CE 460 FUNDAMENTALS OF GROUNDWATER HYDROLOGY.**

CE 461 G WATER RESOURCES ENGINEERING. (4)

A hydrological and hydraulic study of the laws governing the occurrence, distribution, and movement of water in watershed systems. Meteorological considerations, precipitation, evaporation, infiltration, streamflow, hydrograph analysis, flood routing, open channel hydraulics, culvert design, pump systems, groundwater flow, and frequency analysis. Principles of mathematical models that describe the flow processes in a natural watershed and hydraulic structures. Prereq: CE 341 and engineering standing or consent of instructor.

CE 471 G SOIL MECHANICS. (4)

A study of the strength, deformation and hydraulic properties of soils and their relationship to settlement, stress distribution, earth pressure, bearing capacity and slope stability. Design of footing foundations and retaining walls. Written and oral presentations of student projects will be required. Lecture, three hours; laboratory, three hours per week. Prereq: EM 302; prereq or concur: GLY 220; and engineering standing or consent of instructor.

CE 482 ELEMENTARY STRUCTURAL DESIGN. (3)

Application of principles of solid mechanics to the design of steel, timber, and reinforced concrete members and structures. Emphasis on basic ideas and their application to practical design of relatively simple structures according to the building code. Credit may not be used to satisfy degree requirements if credit is earned in CE 485G, or CE 486G, or CE 487G. Prereq: CE 382 and engineering standing.

***CE 486G REINFORCED CONCRETE STRUCTURES. (3)**

Theory and design of beams, slabs, girders and columns as related to building frames and bridges. Introduction to pre-stressed concrete, elastic design and ultimate strength design. Prereq: CE 382 and engineering standing or consent of instructor.

CE 487G STEEL STRUCTURES. (3)

Behavior, analysis, and design of compression members, laterally braced and unbraced beams, beam-columns, composite beams, tension members, directly loaded bolted and welded connections, and column base plates. Evaluation of frame stability. Prereq: CE 382 and engineering standing, or consent of instructor.

CE 499 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)

Devoted to a special topic of current interest in civil engineering. May be repeated to a maximum of eight credits, but not more than four credits may be earned under the same subtitle. A particular topic may be offered at most twice under the CE 499 number. May be counted as technical or design elective with consent of chairman. Prereq: Variable, given when topic is identified, plus engineering standing.

CE 507 CONSTRUCTION SAFETY AND HEALTH. (3)

The course will develop an understanding of safety and health; cost and human impact; hazard and risk analyses; psychological facts of organizational culture and climate; design safe work procedures for the execution of particular types of work; and individual versus management level improvement in safety and health procedures in the construction process. Prereq: Engineering standing and CE 303 or consent of instructor.

CE 508 DESIGN AND OPTIMIZATION OF CONSTRUCTION OPERATIONS. (3)

The course critically examines repetitive operations that occur from project to project and the deterministic approaches used to design and optimize their effectiveness. Scientific techniques used to field measure the efficiency of construction operations are also examined. The primary metrics used to optimization include cost, schedule, and sustainability. Prereq: CE 303, CE 381, and engineering standing or graduate standing.

CE 509 CONTROL OF THE CONSTRUCTION PROJECT. (3)

This course investigates the principles and practices for the control of budget and schedule for construction projects. Topics studied include: estimating construction costs and developing a project budget, planning construction operations and developing a project schedule, documenting and reporting of project progress and spending, and the management of change of contract amount, contract time, and contract scope work. Prereq or coreq: CE 508 or consent of instructor.

CE 517 BOUNDARY LOCATION PRINCIPLES. (3)

Procedures for locating or relocating the boundaries of real property; records searching, technical aspects of field work, preparation of descriptions and survey reports, land data systems, legal aspects, special problems. Prereq: CE 211, engineering standing, or consent of instructor.

CE 525 CIVIL ENGINEERING APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS. (3)

CE 525 focuses on GIS as a tool in Civil Engineering. The terms and concepts related to Geographic Information Systems are introduced. The management of spatial databases, particularly those related to Civil Engineering, is covered. Students will collect data using a Global Positioning System (GPS). Students will be required to use the GIS ArcInfo to solve a specific individual spatial problem that they propose based on several Civil Engineering

Course Descriptions

databases available to them. Lecture, two hours; laboratory, three hours per week. Prereq: Engineering standing and one of the following: CE 331, CE 341, or CE 471 G.

CE 531 GEOMETRIC DESIGN AND OPERATIONS OF ROADWAYS. (3)

Analysis of transportation facilities through a diagnostic study of transportation systems with emphasis on design, capacity and safety. Engineering practice oriented toward open-ended design solutions, mostly focused on roadway design. Prereq: CE 211, CE 331, and engineering standing.

***CE 533 RAILROAD FACILITIES DESIGN AND ANALYSIS. (3)**

Principles of railroad location, construction, rehabilitation, maintenance, and operation with emphasis on track structure design and analysis, bridges and bridge loading, drainage considerations, track geometry effects, and operating systems analysis. Prereq: CE 471 G or graduate standing or consent of instructor.

CE 534 PAVEMENT DESIGN, CONSTRUCTION AND MANAGEMENT. (3)

Design, analysis, construction, and management of flexible and rigid pavements. Stresses and strains, pavement materials, subgrade soil stabilization, bases and subbases, quality control, drainage, pavement-type selection, and pavement management. Prereq: CE 381, prerequisite or concurrent CE 471 G, and engineering standing.

CE 539 TRANSPORTATION SYSTEMS DESIGN. (3)

This course focuses on the design of urban intersections and the procedures used to evaluate the operational level of urban roadway systems. First, a review of urban intersection design principles and aspects is presented. Second, traffic signal timing techniques are reviewed and students are required to use two software packages for evaluation of traffic operation of urban roadway systems. The focal point of the course is a group design project where solutions to accommodate all transportation modes and their issues along a corridor in Lexington are sought. Fieldwork and data collection are part of this course. Lecture, two hours; laboratory, one hour. Prereq: CE 211 and CE 331; CE 531 prereq or concur.

CE 541 INTERMEDIATE FLUID MECHANICS. (3)

Application of basic fluid mechanics to problems of importance to civil engineering practice. This includes flow measuring, closed conduit flow and pipe networks, open channel flow, turbomachinery (pumps), hydraulic structures, culvert flow. Prereq: CE 341, CS programming course, and engineering standing or consent of instructor. (Same as BAE 541.)

CE 542 INTRODUCTION TO STREAM RESTORATION. (3)

Introduction to principles of fluvial geomorphology for application in restoring impaired streams. Topics include channel formation processes (hydrology/hydraulics), stream assessment, sediment transport, in-stream structures, erosion control, habitat, and monitoring. Prereq: CE 341 (or equivalent) and engineering standing or consent of instructor. (Same as BAE 532.)

CE 546 FLUVIAL HYDRAULICS. (3)

Rainfall physics, principles of erosion on upland areas and construction sites, stable channel design in alluvial material, mechanics of sediment transport, river mechanics, reservoir sedimentation. Prereq: CE 341 or ME 330 and engineering standing. (Same as BAE 536.)

CE 547 WATERSHED SEDIMENTATION. (3)

The course objective is to gain an understanding of watershed sedimentation including: (1) erosion and sediment transport processes in a watershed and the mechanisms by which the processes are initiated, developed, and worked towards equilibrium; (2) measurement of the sediment budget for a watershed using sediment fingerprinting and sediment loading data; and (3) prediction of sediment loading in watersheds with different human disturbances using hydrologic-based modeling tools. Specific emphasis will be placed on the use of natural carbon and nitrogen isotopic tracer measurements within sediment fingerprinting as a data-driven approach to measure sediment loading from different sources in a watershed. In order to fulfill the course objective, the instructor will use traditional classroom learning as well as field and laboratory components of the course in order that students can participate in hands-on learning. Prereq: CE 461 G (Pre- or Co-requisite or equivalent). (Same as BAE 547.)

CE 549 ENGINEERING HYDRAULICS. (3)

Analysis and Design of flow in closed conduits and natural and artificial open channels. Design of hydraulic structures. Prereq: CE 461 G and engineering standing, or consent of instructor. (Same as BAE 545.)

CE 551 WATER AND WASTEWATER TREATMENT ENGINEERING. (3)

This course examines the scientific and engineering aspects of water and wastewater treatment. Conventional water treatment processes such as rapid mixing, flocculation, sedimentation, filtration, and disinfection as well as biological processes for wastewater treatment are analyzed. Sustainable alternative treatment techniques are also discussed. Prereq: CE 341, CE 351, and engineering standing or consent of instructor.

CE 553 ENVIRONMENTAL CONSEQUENCES OF ENERGY PRODUCTION. (3)

This course will introduce the relationship of energy, pollution control technology, and the environment. The scientific and engineering aspects of energy production are examined and the associated environmental problems and control technologies are discussed. Prereq: CHE 105, MA 214, and engineering standing or consent of instructor. (Same as EGR 553.)

CE 555 MICROBIAL ASPECTS OF ENVIRONMENTAL ENGINEERING. (3)

Environmental microbiology for engineering students with emphasis on microbially mediated chemical cycles, microbial ecology, and industrial microbiology. Prereq: CE 351, engineering standing, graduate status or consent of instructor.

CE 568 GIS APPLICATIONS FOR WATER RESOURCES. (3)

This course studies the principles, methodology and analysis of geographic information systems and spatially-referenced data unique to water resources and hydrologic modeling. Lectures will explore the latest GIS concepts, hydrologic modeling relationships and data sources and be complimented with computer-based laboratory exercises. Prereq: BAE 437, CE 461 G, or consent of instructor. (Same as BAE 538.)

CE 579 GEOTECHNICAL ENGINEERING. (3)

Application of the principles of soil mechanics and structural mechanics to the design of retaining walls, bracing for excavations, footings, mat and pile foundations and to the analysis of the stability of earth slopes. Prereq: CE 471 G and engineering standing.

CE 581 CIVIL ENGINEERING MATERIALS II. (3)

Design, evaluation, and construction of portland cement concrete and hot mix asphalt (HMA). Advanced topics related to high performance concrete and asphalt materials are covered in this course. Prereq: CE 381 and engineering standing.

†CE 582 INTERMEDIATE STRUCTURAL ANALYSIS.

CE 584 DESIGN OF TIMBER AND MASONRY STRUCTURES. (3)

Current and historic design methods of buildings and their components using wood, wood products, bricks, and concrete blocks. Prereq: Courses in steel and reinforced concrete design at the senior level, or consent of instructor. (Same as ARC 584.)

CE 585 CIVIL ENGINEERING FAILURES. (3)

Fundamentals of failure investigation and forensic engineering; Failure types and mechanisms; Case studies and discussions on various constructed facilities. Prereq: CE 382 or consent of instructor, and engineering standing.

CE 586 PRESTRESSED CONCRETE. (3)

Fundamental basis and underlying principles for the analysis and design of prestressed concrete. Working stress and ultimate strength design methods, full and partial prestressing. Design for shear and torsion, deflection, crack control, and long-term effects, and prestress losses. Composite beams, continuous beams, slabs, short and slender columns, precast structures and their connections. Prereq: CE 486 G and engineering standing.

CE 589 DESIGN OF STRUCTURAL SYSTEMS. (3)

Building codes, design loads, computerized structural analysis and design, gravity and lateral system design, structural system descriptions and selection considerations, and structural contract documents. Prereq: CE 486 G and CE 487 G, engineering standing or consent of instructor.

CE 595 INDEPENDENT WORK IN CE. (1-4)

Individual work on some selected problem in the field of civil engineering. May be repeated for a maximum of six credits. Prereq: Consent of department chairperson and the instructor; with engineering standing.

CE 599 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)

A detailed investigation of a topic of current significance in civil engineering such as: design of small earth dams, man and the environment, drilling and blasting, scheduling construction operations, construction equipment and methods, traffic safety, optimum structural design, environmental impact analysis, systems analysis in civil engineering, motor vehicle noise and its control. May be repeated to a maximum of eight credits, but only four credits can be earned under the same title. A particular topic may be offered at most twice under the CE 599 number. Prereq: Variable; given when topic is identified; plus engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics. For major work, a candidate must hold a bachelor's degree in civil engineering or its equivalent.

CE 602 CONSTRUCTION PROJECT MANAGEMENT. (3)

Management of construction projects; planning, estimating, scheduling and control; organization; site management; material management; safety management; quality management; construction labor relations; productivity management; claims. Prereq: Engineering Standing, graduate status, or consent of instructor.

CE 605 NEW ENGINEERING ENTERPRISES. (3)

The course covers the theory and actual practices of organization, management and operation of engineering companies. Primary emphasis on construction companies; however, the principles apply to most service oriented engineering companies. Students will be required to do several independent exercises related to establishing an engineering company. Prereq: Graduate standing in engineering or consent of instructor.

CE 621 INTRODUCTION TO FINITE ELEMENT ANALYSIS. (3)

Theoretical, conceptual, and computational aspects of the finite element method are developed. Development of the element relationships, element calculations, and assembly of the finite element equations are covered. Both one- and two-dimensional finite element problems are considered. One-dimensional problem areas include elastic deformation, heat conduction, fluid flow, electrostatics, groundwater flow, mass transport, beams on elastic foundations, etc. Two-dimensional problem areas include Poisson's equation, viscous incompressible flow, plane elasticity, and bending of elastic plates. Prereq: MA 432 G, MA 537 or consent of instructor.

CE 631 URBAN TRANSPORTATION PLANNING. (3)

A detailed review of the transportation planning process; inventory methodologies; trip generation, distribution and assignment with associated mathematical models and theories; prediction of future travel; land and use models; modal split; developing and testing proposed systems; simulation. Prereq: CE 531 or equivalent and STA 381, or 681 or equivalent statistics course. (Same as GEO 643.)

CE 633 AIR TRANSPORT ENGINEERING. (3)

Planning location and design of airports, STOL ports, and heliports. Air traffic operations, performance and control as related to facility requirements. Role of governmental agencies. Prereq: CE 531 or consent of instructor.

CE 634 TRAFFIC CHARACTERISTICS. (3)

Vehicle operating characteristics; driver, pedestrian and roadway characteristics as they individually, and collectively as traffic stream characteristics, are related to the planning design and operation of highway facilities.

CE 635 HIGHWAY SAFETY. (3)

A detailed review of the impacts of safety considerations on highway design and planning, focusing on the highway environment, its users (both vehicles and drivers) and their interactions. The role of special interest groups (tracking industry, insurance agencies) is also examined. Prereq: CE 539 or consent of instructor.

CE 641 MECHANICS OF LIQUID FLOW IN PIPES. (3)

Steady and unsteady one-dimensional pipe flow. Water hammer and surge tank analysis. Steady two-dimensional pipe flow. Digital and analog computer applications. Prereq: CE 549.

CE 642 OPEN CHANNEL FLOW. (3)

The study of open channel flow fundamentals and concepts. Topics include uniform flow, varied flow, steady and unsteady flow, energy dissipators, flow transitions, controls, analytical and numerical solutions in 1D and 2D applications. Prereq: CE 541 or consent of instructor. (Same as BAE 642.)

CE 643 MECHANICS OF SEDIMENT TRANSPORT. (3)

Fundamentals of turbulence in rivers and sediment transport will be taught including recent theory, derivation of governing equations, experimental methods, modeling, and design based on sediment thresholds. Prereq: CE 341 or consent of instructor. (Same as BAE 643.)

CE 652 BIOLOGICAL PROCESSES FOR WATER QUALITY CONTROL. (3)

Principles and applications of environmental biotechnology for water quality control. Process microbiology and kinetics for various water and wastewater treatment processes. Prereq: CE 351 or consent of instructor. (Same as BAE 652.)

CE 653 WATER QUALITY IN SURFACE WATERS. (3)

Principles of surface water quality modeling and control. Analysis of dispersion, advection, natural aeration, biological oxidation and photosynthesis; their effects on the physical, chemical, and biological quality of waters in streams, lakes, reservoirs, estuaries and other surface waters. Prereq: CE 351 or consent of instructor. (Same as BAE 653.)

CE 655 WATER SANITATION AND HEALTH. (3)

Prevention of water-related diseases by appropriate supply and sanitation practices with designs applicable to small systems and rural areas of developing nations. (Same as CPH 790.)

CE 662 STOCHASTIC HYDROLOGY. (3)

Hydrologic random variables and probability distributions. Statistical measures, development and use of Monte Carlo simulations in the generation of precipitation fields. Statistical tests of hydrologic data. Point frequency and regional frequency analysis. Analysis of hydrologic time series. Long-term trend, harmonic analysis of periodicity, autocorrelation, spectral analysis. Correlation and regression analysis. Linear stochastic models. Introduction to stochastic processes in hydrology, real-time hydrologic forecast (Kalman filter), pattern recognition, and stochastic differential equations. Prereq: MA 214, CE 461 G or equivalent. (Same as BAE 662.)

CE 664 WATERSHED MANAGEMENT. (3)

This course provides an overview of the scientific principles and management strategies used to effectively manage the physical, chemical, biological and social resources within a watershed so as to improve and sustain the integrity of the watershed system. The course will examine watershed management from both a scientific/engineering perspective as well as from a social science/policy perspective. Examples of effective watershed management will be drawn from cases studies in Kentucky and the United States. Students will be provided with an introduction to those spatial data sets, computer software, and methods currently used in watershed management practice. Prereq: BAE 437 or CE 461 G or an equivalent course in hydrology, or consent of instructor.

CE 665 WATER RESOURCES SYSTEMS. (3)

Application of systems analysis, mathematic modeling, and optimization in water resources management and design. Solution of engineering problems found in water supply, water quality, urban drainage, and river basin development and management by use of linear, nonlinear, and dynamic programming models. Prereq: Consent of instructor. (Same as BAE 665.)

CE 667 STORMWATER MODELING. (3)

Introduction to deterministic and parametric modeling approaches for mathematically simulating stormwater runoff and quality. Emphasis on modeling concepts and model formulation. Analysis of deterministic component models and their linkage. Formulation of existing parametric models. Presentation of methods for parameter optimization and regionalization. Demonstration of linkage between the two approaches with illustrative examples. Prereq: CE

341 and CE 461 G, or consent of instructor. (Same as BAE 667.)

CE 671 ADVANCED SOIL MECHANICS. (3)

Detailed study of soil behavior. Specific topics include soil classification and structure, strength and deformational behavior, compaction, consolidation, and stress distribution in earth masses. Prereq: CE 471 G or consent of instructor.

CE 672 LANDFILL DESIGN. (3)

This course deals with the geotechnical aspects of the design of landfills for the disposal of municipal solid waste. Since landfill design is driven by state and federal regulations, time is taken to review these regulations. Landfills are evaluated as engineered systems consisting of multiple components. Each component is investigated individually, and methods are developed to predict and quantify the performance of these components so that appropriate materials, design criteria, and construction methods can be selected to assure that the landfill will function with minimal environmental impact. Prereq: CE 471 G. (Same as BAE 672.)

CE 676 GROUNDWATER AND SEEPAGE. (3)

Permeability and capillary flow in soils, mathematical theory of flow through porous media. Flow through anisotropic, stratified and composite sections. Solution by flow net, conformal mapping and numerical methods. Seepage toward wells. Dewatering and drainage of soils. Prereq: CE 471 G or consent of instructor.

CE 679 GEOTECHNICAL EARTHQUAKE ENGINEERING. (3)

Introduction to seismology. Dynamic and earthquake response of soils using standard analysis. Liquefaction of soils under cyclic loading. Measurements of dynamic properties of soils. Earthquake resistant design of retaining walls, foundations, slopes, and earth dams. Soil improvement methods for seismic resistant design. Current state-of-the-art techniques in geotechnical earthquake engineering. Prereq: CE 579.

CE 681 ADVANCED CIVIL ENGINEERING MATERIALS. (3)

Fundamental aspects of mechanical behavior of civil engineering materials. Rheology and fracture of asphalt and Portland cement concrete materials. Prereq: CE 381.

CE 682 ADVANCED STRUCTURAL ANALYSIS. (3)

Theory and application of energy principles for plane and space frames; shear wall structures; geometric and material nonlinear formations; and nonlinear solution strategies. Solution techniques for the analysis of large complex structures. Introduction to plane stress/strain, axisymmetric and plate bending finite element analysis.

CE 684 SLAB AND FOLDED PLATE STRUCTURES. (3)

Design and analysis of reinforced concrete floor slabs and folded plate roofs. Elastic and inelastic methods.

CE 686 ADVANCED REINFORCED CONCRETE THEORY. (3)

Background and origin of modern reinforced concrete design procedures and codes. Comparison of American and foreign methods of analysis. Review of current research and projection to anticipated future changes in design and construction practices. Prereq: CE 486 G or consent of instructor.

CE 687 ADVANCED STEEL DESIGN. (3)

Strength of structural steel columns, including asymmetry and slender compression elements. Flexural strength of slender plate girders. Shear strength with and without post-buckling strength. Frame stability. Steel connections. Floor vibration serviceability. Prereq: CE 487 G or consent of instructor.

CE 699 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)

An advanced level presentation of a topic from one of the major areas of civil engineering such as hydraulics, geotechnics, structures, transportation, surveying, or water resources. Course with a given subtitle may be offered not more than twice under this number. Prereq: Variable; given when topic identified; graduate standing.

CE 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CE 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CE 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CE 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

CE 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)

CE 779 ADVANCED GEOTECHNICAL ENGINEERING. (3)

Application of the principles of soil mechanics to the design and analysis of foundations and earth structures. Prereq: CE 579 and CE 671 or consent of instructor.

CE 782 DYNAMICS OF STRUCTURES. (3)

Course Descriptions

Review of methods of analysis of simple structural systems. Effects of wind, earthquake, traffic and machinery loads. Matrix methods for complex dynamic structural systems, random vibrations of structures.

CE 784 SHELL STRUCTURES. (3)
Design and analysis of reinforced concrete shell structures, including domes, barrel shells, hyperbolic paraboloids and cylindrical tanks. Prereq: CE 684 or consent of instructor.

CE 790 SPECIAL RESEARCH PROBLEMS IN CIVIL ENGINEERING. (1-6)
Individual work on some selected problems in one of the various fields of civil engineering. Laboratory, six hours. May be repeated to a maximum of nine credits. Prereq: Consent of the chairperson of the department.

CE 791 SPECIAL DESIGN PROBLEMS IN CIVIL ENGINEERING. (1-6)
Individual work on some selected problems in one of the various fields of civil engineering. Laboratory, six hours. May be repeated to a maximum of nine credits. Prereq: Consent of the chairperson of the department.

CGS Cognitive Science

CGS 500 COGNITIVE SCIENCE IN THEORY AND PRACTICE. (3)
This course will introduce upper-level undergraduate students (and lower-level graduate students) to Cognitive Science, an interdisciplinary field that seeks to study the mind from the perspective of various disciplines: Biology, Computer Science, Linguistics, the Neurosciences, Philosophy, and Psychology. The course will consist of modules in at least four of these six disciplines. Prereq: Upper-class standing.

CHE Chemistry

CHE 101 MOLECULAR SCIENCE FOR CITIZENS. (3)
A conceptual introduction to the molecular nature of natural and man-made materials as well as the key molecules of biological organisms. The important classes of molecules will be discussed in terms of their properties and impact on our everyday real world experience.

CHE 103 CHEMISTRY FOR HEALTH PROFESSIONALS. (4)
A study of the basic concepts of general, organic, and biological chemistry. Topics include electronic structure of atoms and molecules, periodicity of the elements, stoichiometry, states of matter, kinetics, equilibria, acids and bases, organic functional groups, stereochemistry, carbohydrates, lipids, proteins, and enzymes. Topics are presented with an emphasis on application to the allied health professions. Prereq: Credit for MA 111, or Math ACT score above 20, or ALEKS Math Placement above 45.

CHE 104 INTRODUCTORY GENERAL CHEMISTRY. (3)
A study of the general principles including laws of definite and multiple proportions, stoichiometry, gases, electronic structure, chemical bonding, periodic relationships, oxidation-reduction, acid bases, chemical equilibrium and acids/bases. Intended for students interested in a one-semester course in general chemistry and recommended for students seeking careers in nursing, nutrition and allied health science fields. Not open to students who have already completed both CHE 105 and 107. Prereq: Credit for MA 111, or Math ACT score above 20, or ALEKS Math Placement above 45.

CHE 105 GENERAL COLLEGE CHEMISTRY I. (4)
A study of the principles of chemistry and their application to the more important elements and their compounds. Not open to students who have already completed both CHE 104 and 106 or CHE 104 and CHE 108, but open to students who have completed just CHE 104. Prereq: Math ACT of 23 or above (or Math placement test), or MA 109, or MA 110, or the KCTCS course CHE 102R or CHM 100.

CHE 107 GENERAL COLLEGE CHEMISTRY II. (3)
A continuation of CHE 105. A study of the principles of chemistry and their application to the more important elements and compounds. Prereq: CHE 105 or CHE 108 or CHE 110 (with a C or better in any one of these prereqs).

CHE 108 INTRODUCTION TO INORGANIC, ORGANIC AND BIOCHEMISTRY WITHOUT LABORATORY. (3)
A continuation of CHE 104. A study of selected aspects of inorganic, organic, and biochemistry including the chemistry of metals and nonmetals, basic organic functional groups, proteins, nucleic acids, and lipids. Not open to students who have already completed CHE 105 and 107. Not recommended for students seeking careers in medicine, science, dentistry, engineering, veterinary science, agricultural sciences, education, or allied fields for which the recommended sequence is CHE 105/107, and 111/115. Prereq: CHE 104 or the KCTCS course CHM 100.

CHE 109 GENERAL CHEMISTRY I. (4)
A study of the principles of chemistry and their application to the more important elements and their compounds. The two-semester CHE 109/110 sequence covers the same material as CHE 105. Prereq: Math ACT of 23 or above; or math placement test; or KCTCS course CHM 100 or CHM 102.

CHE 110 GENERAL CHEMISTRY II. (4)
The second half of a sequence (with CHE 109) in which the material of CHE 105 is covered in two semesters.

CHE 111 LABORATORY TO ACCOMPANY GENERAL CHEMISTRY I. (1)

A laboratory course, to accompany CHE 105, dealing with the properties of chemical substances and providing an introduction to quantitative chemical analysis. Prereq or concur: CHE 105.

CHE 113 LABORATORY TO ACCOMPANY GENERAL CHEMISTRY II. (2)
A laboratory course, to accompany CHE 107, emphasizing qualitative and quantitative chemical analysis. Prereq: CHE 111; prereq or concur: CHE 107.

CHE 195 GENERAL CHEMISTRY WORKSHOP I. (1)
Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 105 need not be accompanied by enrollment in CHE 195. Prereq: Concurrent registration in CHE 105 required.

CHE 197 GENERAL CHEMISTRY WORKSHOP II. (1)
Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 107 need not be accompanied by enrollment in CHE 197. Prereq: Concurrent registration in CHE 107 required.

CHE 199 RESEARCH EXPERIENCE IN CHEMISTRY. (0)
Participation in laboratory research in chemistry. Offered pass/fail only. Prereq: Permission of instructor.

CHE 226 ANALYTICAL CHEMISTRY. (3)
An introduction to the theory and practice of quantitative chemical analysis. Lecture, 2 hours; laboratory, 3 hours. Prereq: CHE 107 and CHE 113.

CHE 230 ORGANIC CHEMISTRY I. (3)
Fundamental principles and theories of organic chemistry. Prereq: CHE 107 and 113.

CHE 231 ORGANIC CHEMISTRY LABORATORY I. (1)
Laboratory for CHE 230 or CHE 236. Laboratory, three hours per week. Prereq: CHE 113; prereq or concur: CHE 230 or CHE 236.

CHE 232 ORGANIC CHEMISTRY II. (3)
A continuation of CHE 230. Prereq: CHE 230 with grade C or above.

CHE 233 ORGANIC CHEMISTRY LABORATORY II. (1)
Laboratory for CHE 232. Laboratory, three hours per week. Prereq: CHE 231. Prereq or concur: CHE 232.

CHE 236 SURVEY OF ORGANIC CHEMISTRY. (3)
A one-semester course in organic chemistry. Not open to students who have already completed both CHE 230 and 232. Prereq: CHE 107 and 113.

CHE 250 FORENSIC SCIENCE ON TELEVISION. (3)
This course will introduce students to the basic chemical and biochemical principles of forensic science utilized on popular science/science fiction television shows. Forensic science involves the application of techniques from instrumental chemical analysis and molecular biology to identify and quantify evidence collected from crime scenes. By using popular television shows to introduce specific techniques students should gain a basic understanding of the capabilities and limitations of forensic science as it is presently practiced. Prereq: CHE 103 or CHE 104 or CHE 110 or CHE 105.

CHE 295 ORGANIC CHEMISTRY WORKSHOP I. (1)
Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 230 need not be accompanied by enrollment in CHE 295. Prereq: Concurrent registration in CHE 230 required.

CHE 297 ORGANIC CHEMISTRY WORKSHOP II. (1)
Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 232 need not be accompanied by enrollment in CHE 297. Prereq: Concurrent enrollment in CHE 232 required.

CHE 372 COMMUNICATION IN CHEMISTRY I. (1)
Reports and discussions on recent research and current chemical literature; writing and revision of scientific papers; literature searching methods; preparation of effective presentations abstracts and visual aids. CHE 372 and CHE 472 meet the A&S College Writing and Communications Requirement. Prereq: CHE 226 (or concurrent) or CHE 232 (or concurrent) or consent of Director of Undergraduate Studies. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CHE 395 INDEPENDENT WORK IN CHEMISTRY. (1-3)
An independent research project in an area of chemistry under the direction of a chemistry faculty mentor. Must be approved by the Director of Undergraduate Studies in Chemistry. May be repeated to a maximum of 12 credits. Prereq: Declared major in Chemistry; CHE 230, 231; CHE 232 or CHE 226; GPA of at least 3.0 in CHE courses.

CHE 410G INORGANIC CHEMISTRY. (2)
An overview of inorganic chemistry, including fundamental aspects of structure, bonding, periodicity, spectroscopic properties, reaction mechanisms and applications. Prereq: CHE 231 and 232; prereq or concur: a physical chemistry course at or above the 400 level.

CHE 412 INORGANIC CHEMISTRY LABORATORY. (2)
A laboratory course that will acquaint the student with the synthesis, characterization and properties of inorganic and organometallic compounds of both main-group and transition elements. Laboratory, six hours per week. Prereq: CHE 410G; prereq or concur: a physical

chemistry course at or above the 400 level.

CHE 422 INSTRUMENTAL ANALYSIS. (4)

The theory and application of instrumental methods of analysis. Lecture, two hours; laboratory, six hours. Prereq: A physical chemistry course at or above the 400 level.

***CHE 440G INTRODUCTORY PHYSICAL CHEMISTRY. (3)**

A one-semester survey of thermodynamics, chemical kinetics, and quantum chemistry with an elementary introduction to spectroscopy. Prereq: PHY 213 or PHY 232; MA 114; CHE 226 or MA 213.

CHE 441 PHYSICAL CHEMISTRY LABORATORY. (2)

Laboratory studies in physical chemistry, including quantum chemistry, spectroscopy, thermodynamics and chemical kinetics. Laboratory, six hours. Prereq: A physical chemistry course at or above the 400 level.

CHE 442G THERMODYNAMICS AND KINETICS. (3)

Principles of physical chemistry including thermodynamics, chemical kinetics, and statistical thermodynamics. Prereq: CHE 226; MA 213; PHY 213 or 232.

CHE 446G PHYSICAL CHEMISTRY FOR ENGINEERS. (3)

An introductory course in physical chemistry for engineering students. Kinetic theory, thermodynamics, phase diagrams, colligative properties, electrochemistry, transport properties, kinetics, quantum theory, spectroscopy. Prereq: CHE 107, 113; PHY 232; MA 213; CME 200 or the equivalent.

CHE 454 BIOLOGICAL CHEMISTRY LABORATORY. (2)

An introductory biological chemistry laboratory course. Areas of experimentation will include spectroscopic methods, electrophoresis, chromatography, and isolation and characterization of biological macromolecules. Prereq: CHE 232, or CHE 550 and a physical chemistry course at or above the 400 level (e.g., CHE 440), or consent of instructor.

CHE 472 COMMUNICATION IN CHEMISTRY II. (1)

Reports and discussions on recent research and current chemical literature in seminar format; literature searching methods; résumé construction; preparation of effective presentations abstracts and visual aids. CHE 472 and CHE 372 meet the A&S College Writing and Communications Requirement. Prereq: CHE 372 or consent of the Chemistry Director of Undergraduate Studies. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CHE 510 ADVANCED INORGANIC CHEMISTRY. (3)

A course dealing with the concepts of inorganic chemistry with emphasis on atomic structure, periodicity, nomenclature, bonding, reaction mechanisms and acid-base theories. Prereq: CHE 232, CHE 226, and a physical chemistry course at or above the 400 level; or CHE 410G and CHE 412G.

CHE 514 DESCRIPTIVE INORGANIC CHEMISTRY. (3)

A course dealing in detail with descriptive chemistry of the elements and their compounds, excluding the hydrocarbons and their derivatives. Prereq: CHE 226 and CHE 232; or CHE 450G, or permission of instructor.

CHE 516 INORGANIC MATERIALS CHEMISTRY. (3)

Introduction to solid state inorganic materials chemistry, including atomic structure; optical, electronic, and magnetic properties; and characterization methods such as x-ray diffraction and electron microscopy. Prereq: CHE 440G or CHE 547 or equivalent; and CHE 410G or 510 or equivalent; or permission from the instructor.

CHE 520 RADIOCHEMISTRY. (3)

Applications of radionuclides in chemistry with emphasis on principles of radioactive decay, interactions of radiation with matter, use of isotopic tracers, activation analysis, isotope dilution analysis, hot atom chemistry and nuclear dating methods. Prereq: CHE 107, or 226.

CHE 524 CHEMICAL INSTRUMENTATION. (4)

Aspects of electronics, microcomputers, computer interfacing, and data analysis as they apply to chemical measurements and measurement systems. Lecture, two hours; laboratory, six hours per week. Prereq: A physical chemistry course at or above the 400 level or consent of instructor.

CHE 525 BIOANALYTICAL SENSORS. (3)

Theory, principles, and applications of bioanalytical sensors and sensing systems, including transducers, molecular recognition, and microfabrication. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

CHE 526 CHEMICAL SEPARATIONS. (2)

An advanced study of the theory, instrumentation, and analytical applications of chemical separation methods. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

CHE 532 SPECTROMETRIC IDENTIFICATION OF ORGANIC MOLECULES. (2)

A discussion of nuclear magnetic resonance, ultraviolet and infrared spectroscopies, and mass spectrometry in the determination of the structure and stereochemistry of organic molecules. Prereq: CHE 231 and CHE 232.

***CHE 533 ADVANCED ORGANIC CHEMISTRY LABORATORY. (2)**

The practice of synthesis, purification, and characterization of organic compounds in the modern chemistry laboratory. Laboratory, six hours. Prereq: CHE 532.

CHE 535 SYNTHETIC ORGANIC CHEMISTRY. (3)

A general survey of organic chemistry with emphasis on synthetic methods and the synthesis of natural products. Prereq: CHE 232.

CHE 536 ORGANIC MATERIALS: ELECTRONIC AND PHOTONIC PROPERTIES. (3)

A description of relationships between molecular structure and optical and electronic properties, focusing on changes in properties moving from single molecules to aggregates to bulk solid states. Electronic structure and photonic properties of organic molecules, solid-state polymers and interfaces will be considered. Material characteristics will be studied in the types of devices where organic materials show promising performance: displays, lighting, transistors, energy conversion/storage applications, and non-linear optics technologies. Prereq: CHE 232 and PHY 213 or PHY 232, or permission of the instructor.

CHE 538 PRINCIPLES OF ORGANIC CHEMISTRY. (3)

A general survey of the field of organic chemistry. Topics emphasized are: mechanistic principles relating molecular structure to reaction outcome, stereoisomerism and its effect on chemical reactivity, and simple molecular orbital theory as required to understand aromaticity and to predict the occurrence and stereochemistry of pericyclic reactions. Prereq: CHE 232.

CHE 547 PRINCIPLES OF PHYSICAL CHEMISTRY I. (3)

An introduction to quantum chemistry and spectroscopy, emphasizing modern applications of quantum theory to the calculation of molecular properties. Practical experience with quantum chemistry software on various computer platforms is included. Prereq: MA 213; PHY 213 or 232; or consent of instructor.

CHE 548 PRINCIPLES OF PHYSICAL CHEMISTRY II. (3)

Fundamental principles of classical physical chemistry, including thermodynamics, statistical thermodynamics, and chemical kinetics. Prereq: A physical chemistry course at the 400 level or above, or consent of instructor.

CHE 550 BIOLOGICAL CHEMISTRY I. (3)

An introduction to biological chemistry. Topics include amino acids and proteins; nucleic acids and nucleotides; enzyme structure, function and energetics; metabolism including glycolysis; the tricarboxylic acid cycle; electron transport and oxidative phosphorylation; glycogen metabolism; hormone action; and other aspects of modern biological chemistry. Prereq: CHE 232 and a physical chemistry course at or above the 400 level, or consent of instructor.

CHE 552 BIOLOGICAL CHEMISTRY II. (3)

A further introduction to biological chemistry. Topics include lipid metabolism, biosynthesis and metabolism of nitrogen-containing compounds, storage and utilization of genetic information, immunochemistry, and other contemporary topics in biological chemistry. Prereq: CHE 232 and a physical chemistry course at or above the 400 level, or consent of instructor.

CHE 553 CHEMISTRY AND MOLECULAR BIOTECHNOLOGY. (3)

This course focuses on the chemical aspects of biotechnology development. Current topics in biotechnology are emphasized through extensive reading and classroom discussion of the most recent scientific literature. Biotechnology development in fields as diverse as agriculture, the environment, and medicine will be covered. Prereq: An introductory course in biology, biological chemistry, or biochemistry; and CHE 232; or consent of instructor.

CHE 555 HOMO NUCLEAR NMR. (3)

This course will give students hands-on experience with modern NMR experiments that are the mainstays of chemical structural analysis and biophysical studies of macromolecules and pharmaceuticals. Lecture, two hours; laboratory, three hours per week. Prereq: CHE 232 or 236; and a physical chemistry course at or above the 400 level.

CHE 556 ELEMENTS OF NEUROCHEMISTRY. (3)

A course in the neurochemistry of the brain. Among topics to be covered: brain cell cytoarchitecture; chemical bases for: neuronal membrane transport, electrical excitability, and ion channels; axonal transport; energy metabolism; synaptic transmission; cellular signaling; Ca²⁺ homeostasis; neurotransmitters; oxidative stress; apoptosis and necrosis; application of neurochemical principles to the molecular bases of neurodegenerative disorders. Prereq: CHE 232 and a biological chemistry course, or consent of instructor.

CHE 558 HORMONE RECEPTORS AND CELL SIGNALS. (3)

This course starts with the general concepts on hormones and their receptors and describes how hormones interact with their receptors and generate hormone signals and responses. Prereq: BIO 315 or equivalent, BCH 401G or equivalent, CHE 550 or 552 or equivalent, or consent of instructor.

CHE 559 MOLECULAR BIOPHYSICS. (3)

Overview of intermolecular forces responsible for formulation tertiary structure and macromolecular assemblies, as well as linked equilibria, allostery and propagation of signals. Extension of these principles to explain macromolecular machines, complex molecular behavior and, ultimately, processes of life. Prereq: A physical chemistry course at the 400 level or above, or consent of instructor.

CHE 565 ENVIRONMENTAL CHEMISTRY. (3)

A study of the sources, reactions, transport, effects, and fates of chemical species in the atmosphere, hydrosphere, lithosphere and biosphere. Prereq: Two semesters of general college chemistry are required. Courses in analytical and physical chemistry are recommended, but

are not required.

CHE 566 ORGANIC MATERIALS: CHARACTERIZATION AND DEVICES. (3)

A study of applications of organic materials in electronic and optical devices, focusing on appropriate material-selection, processing, and interpretation of device output. Will cover basic methods for the formation of thin films of organic molecules and polymers, various spectroscopic techniques relevant to device performance, and methods to form and measure devices such as transistors and light-emitting diodes. Hybrid organic-inorganic material systems, and complex device structures for all-organic circuitry will be discussed. Prereq: CHE 232 and PHY 213 or PHY 232, or permission of the instructor.

CHE 567 ORGANIC MATERIALS: FABRICATION LABORATORY. (2)

A laboratory course focused on the fabrication and characterization of organic and organic-inorganic hybrid electronic devices. Although a stand-alone course, the laboratory will cover practical aspects related to topics covered in CHE 536 and 566, including processing methods and characterization of optical and electronic properties of organic materials and thin films. Prereq: CHE 536 or CHE 566, and PHY 213 or 232, or permission of the instructor.

CHE 576 POLYMER CHEMISTRY. (3)

Introduction to the theory and practice of polymer chemistry and polymer characterization. Prereq: CHE 230 and CHE 226; or permission from the instructor.

CHE 580 TOPICS IN CHEMISTRY. (1-3)

A detailed investigation of a topic of current significance in chemistry. May be repeated to a maximum of six credits. Lecture and/or laboratory: variable. Prereq: CHE 232 and a physical chemistry course at the 400 level or above, or consent of instructor.

CHE 610 CHEMISTRY OF THE TRANSITION METALS. (3)

A detailed treatment of the chemistry of the transition elements, lanthanides and actinides, including the structure of coordination complexes, bonding, reaction mechanisms and preparations. Prereq: CHE 510.

CHE 612 INORGANIC CHEMISTRY OF THE NON-METALS. (3)

A detailed treatment of the inorganic chemistry of the nonmetals. Topics include theories of bonding, spectral characteristics, reaction mechanisms, preparations, physical methods of characterization and structural determination, and applications. Prereq: CHE 510.

CHE 614 ORGANOTRANSITION METAL CHEMISTRY. (3)

A detailed treatment of the organometallic chemistry of the transition metals, including lanthanides and actinides. Topics include synthesis, structure, bonding theories, reactions, characterization by physical methods, and applications in organic chemistry and catalysis. Prereq: CHE 232, and CHE 410G or 510, and a physical chemistry course at the 400 level or above, or consent of instructor.

CHE 620 ELECTROCHEMICAL METHODS OF ANALYSIS. (3)

An intensive study of the fundamental theories and principles of electrochemistry, and their practical applications for physical and quantitative analytical measurements. Topics include potentiometric, voltammetric, amperometric, and coulometric methods. Prereq: CHE 522 or a physical chemistry course at the 400 level or above.

CHE 623 CHEMICAL EQUILIBRIUM AND DATA ANALYSIS. (3)

An advanced treatment of chemical equilibrium, sampling, and the evaluation of data obtained from chemically related measurements. Prereq: CHE 226 or 522 or a physical chemistry course at the 400 level or above.

CHE 625 SPECTROCHEMICAL ANALYSIS. (3)

An intensive study of the theory, instrumentation, and analytical applications of modern atomic and molecular spectrometric methods. Prereq: CHE 522.

CHE 626 ADVANCED ANALYTICAL CHEMISTRY. (3)

An advanced study of the theory and practice of quantitative analysis.

CHE 640 CHEMICAL CRYSTALLOGRAPHY. (3)

An introduction to modern small-molecule crystallography with emphasis on typical applications of interest to synthetic chemists. Prereq: CHE 232 and a physical chemistry course at the 400-level or above.

CHE 643 SPECTROSCOPY AND PHOTOPHYSICS. (3)

An integrated treatment of modern spectroscopy and photophysics. Topics to include atomic spectroscopy, microwave, infrared and UV-visible spectroscopy of diatomic and polyatomic molecules, lasers, creation and detection of excited states, fluorescence, phosphorescence, radiationless processes and photochemical transformations. Prereq: CHE 547 or 446G or permission of instructor.

CHE 646 CHEMICAL KINETICS. (3)

Studies of chemical reactions from the standpoint of velocity and mechanism. Prereq: CHE 442G.

CHE 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3)

A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CME/EE/MSE 664.)

CHE 666 PROTEOMICS AND MASS SPECTROMETRY. (3)

A course in the identification, characterization, and quantification of the proteins in tissues and cells. Mass spectrometric methods are of central importance, and those techniques (including data analysis) are a major focus of the course. Prereq: CHE 232, a course in physical chemistry at or above the 400-level.

CHE 668 SYMMETRY AND CHEMICAL APPLICATIONS. (3)

An integrated treatment of fundamentals, techniques, and chemical applications of molecular symmetry and group theory. Prereq: A physical chemistry course at the 400-level, or consent of instructor.

CHE 736 TOPICS IN ORGANIC CHEMISTRY. (2-4)

Selected topics which may include heterocyclic organic compounds, natural and synthetic dyes, carbohydrates, nitrogen compounds, and recent advances in the field of organic chemistry. May be repeated to a maximum of 12 credits.

CHE 746 TOPICS IN PHYSICAL CHEMISTRY. (2-4)

Selected topics which may include photochemistry, structure of crystals, molecular spectra, nature of the chemical bond, and other recent advances in the field of physical chemistry. May be repeated to a maximum of 12 credits. Prereq: A physical chemistry course at the 400 level or above.

CHE 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CHE 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CHE 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CHE 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

CHE 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

CHE 772 SEMINAR IN CHEMISTRY INSTRUCTION. (1)

A seminar for teaching assistants on the methods and techniques of effective instruction in laboratory and recitation classes in chemistry. Required of all new graduate teaching assistants. Prereq: Admission to M.S. or Ph.D. program in chemistry.

CHE 776 GRADUATE SEMINAR. (1)

Reports and discussions on recent research and current literature. Required of all graduate students. May be repeated for a total of eight credits.

CHE 779 MEMBRANE SCIENCES COLLOQUIUM. (1)

Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student's own research in particular. May be repeated to a maximum of six credits. (Same as BCH/CME/PHA/PHR 779.)

CHE 780 INDIVIDUAL WORK IN CHEMISTRY. (1-5)

Selected library and laboratory problems in conformance with the student's interest will be attacked and pursued under the direction of a suitable staff member who is proficient in the area under investigation.

CHE 790 RESEARCH IN CHEMISTRY. (1-12)

Work may be taken in the following fields, subject to the approval of the Departmental Graduate Committee: analytical chemistry, industrial chemistry, inorganic chemistry, organic chemistry, radiochemistry, or physical chemistry. May be repeated indefinitely.

CHI Chinese Culture and Language

CHI 101 BEGINNING CHINESE I. (4)

A course in first semester Chinese language.

CHI 102 BEGINNING CHINESE II. (4)

A course in second semester Chinese language. Prereq: CHI 101 or equivalent.

CHI 201 INTERMEDIATE CHINESE I. (4)

A course in third semester Chinese language. Prereq: CHI 102 or equivalent.

CHI 202 INTERMEDIATE CHINESE II. (4)

A fourth semester course in Chinese language. Prereq: CHI 201 or equivalent.

CHI 301 ADVANCED INTERMEDIATE CHINESE I. (3)

A course designed to increase student skills in listening, speaking, writing, reading and culture. More complex grammatical forms introduced; focus on control of basic forms. Development of students' lexicon through reading, watching films, conversation, tapes, etc. Prereq: CHI 202 or equivalent. All students who have had three or more years of high school Chinese or are heritage learners of Chinese and are enrolling in college-level Chinese for the first time must take the Chinese placement exam before enrolling in this course.

CHI 302 ADVANCED INTERMEDIATE CHINESE II. (3)

A course designed to increase student skills in listening, speaking, writing, reading and culture. More complex grammatical forms introduced; focus on control of basic forms. Development of students' lexicon through reading, watching films, conversation, tapes, etc. Prereq: CHI 301 or equivalent. All students who have had three or more years of high school Chinese or are heritage learners of Chinese and are enrolling in college-level Chinese for the first time must take the Chinese placement exam before enrolling in this course.

CHI 320 GENDER POLITICS IN CHINESE LITERATURE. (3)

An interdisciplinary, multimedia approach to the representation of gender relations in Chinese literature over time. Critical engagement of such topics as the complex relationships between women's issues and national discourse, between identity and performance, between the construction of female subjectivity and male fantasy, between gender and genre. Students will be encouraged to conduct cross-genre and cross-cultural comparisons. All readings in English. Prereq: Junior status or consent of instructor.

CHI 321 INTRODUCTION TO CONTEMPORARY CHINESE FILM. (3)

The course offers an overview of major films, directors and actors in the contemporary PRC, Taiwan and Hong Kong. It examines the genres of Chinese film better known in the U.S., including the Hong Kong action film, fifth-generation mainland cinema and Taiwanese urban dramas. The course will provide an understanding of contemporary Chinese cinema through analyses of the content and style, poetics and politics of films/filmmakers/film movements, that reflect the Chinese cultural value system and differing Chinese aesthetics vis-a-vis Western and Hollywood views. All films are screened with English subtitles. Prereq: Junior status or consent of instructor.

CHI 322 SELF AND SOCIETY IN CHINESE CULTURE. (3)

This course takes an interdisciplinary approach to the concept of the self and its relationship to larger social categories such as family and society in Chinese culture. Critical approaches to topics such as self expression in art and literature over time and across genres, self-cultivation, gender, consciousness, modernity, and transnational identity. Course readings will include philosophical and religious texts as well as literature, historical writing, and material culture in its various forms. Prereq: Junior status or consent of instructor.

CHI 323 CHINESE DRAMA – FROM PAST TO PRESENT. (3)

An interdisciplinary course that introduces students to the drama and oral performances of China from their origins in early time to their contemporary developments. Focuses will be the history and aesthetics of Chinese theatrical arts as well as works of regional dramatic forms. Students will also learn to appreciate Chinese performances in terms of both their social, political and historical context and their structural and formal properties. The course will be conducted in English and all required readings are English as well. Students are not expected to know Chinese to take this course.

CHI 330 INTRODUCTION TO CHINESE CULTURE, PRE-MODERN TO 1840. (3)

This course introduces students to premodern Chinese history, society, and culture up to 1840. Some of the major questions to be addressed include: Is "China" the oldest continuous civilization? Was it culturally and ethnically homogenous? Was Chinese traditional culture and society "patriarchal"? To what extent was the state successful in penetrating into the daily lives of individuals? Course assignments will include primary and secondary literature (entirely in English) as well as visual and material culture sources. No prior knowledge of Chinese history, culture, or language required.

CHI 331 INTRODUCTION TO CHINESE CULTURE, 1840 TO PRESENT. (3)

This course introduces students to modern Chinese history, society, and culture from 1840 to the present, with a special focus on developments in the twentieth century. We will investigate three sets of major problems: (1) China is often seen as an ethnically and culturally homogenous society, but what is China and (Han) Chinese? (2) How did China transition from a multi-ethnic empire to a modern nation state? (3) What does modernity mean in the Chinese context? Aside from these specific objectives, this course will also teach students to analyze written and visual texts found in various genres. No prior knowledge of Chinese history, culture, or language required.

CHI 333 CHINESE SHORT STORIES. (3)

This course takes an interdisciplinary approach and analyzes the issues of didacticism in storytelling, the problems of interpretation and the balance between entertaining and enlightening and the art and techniques of narration in traditional Chinese short stories. By reading Taoist, Buddhist, detective and fox and ghost stories as windows onto the social practices and values of traditional China, the course investigates broad social concerns such as identity, gender, sexuality and morality in pre-modern China. The course will be conducted in English and all required readings are in English as well. Students are not expected to know Chinese to take this course.

CHI 334 TRADITIONAL CHINESE MEDICINE. (3)

This course is an interdisciplinary introduction to the history of Chinese medicine: its philosophy, theories, practices and transformations. Drawing on cultural history, anthropol-

ogy, and gender studies, this course investigates Chinese medicine in its intellectual, social and cultural context and emphasizes the following components: 1) reading primary texts in translation; 2) a historical overview of the development of Chinese medicine; 3) examining different methodological approaches. The course will be conducted in English and all required readings are English as well. Students are not expected to know Chinese to take this course.

CHI 345 INTRODUCTION TO EARLY CHINESE THOUGHT. (3)

This course will examine the intellectual history of China's classical period, from the late Shang until the sixth century CE, and critically engage fundamental concepts of early Chinese philosophy and religion including: the Dao, the discourse of tradition, formation of philosophical "schools," cosmic and social gender, the Sage, and human nature. This course will also consider "Religion" and "Philosophy" as terms of inquiry, and synthesize this literature to describe and analyze changes and continuities to Chinese thought during the classical era.

CHI 395 INDEPENDENT WORK IN CHINESE. (1-3)

Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

CHI 401 ADVANCED CHINESE I. (3)

The course builds on material covered in CHI 302 and will cover a wide range of materials, including dialogues and newspaper articles. It will facilitate oral and written practice, allow students to communicate in real-life situations, and read and write Chinese texts with minimal aid of pinyin. Prereq: CHI 302 or equivalent.

CHI 402 ADVANCED CHINESE II. (3)

This course builds on the linguistic skills acquired in previous Chinese study and further trains students in advanced use of the language, including listening, speaking, reading and writing. The course will expand students' vocabulary and improve students' reading and writing, speaking, and listening skills. The topics of the lessons cover the social changes in contemporary China and cultural developments in their social context. Prereq: CHI 401 or equivalent.

CHI 430 POPULAR CULTURE IN MODERN CHINA. (3)

This course provides a critical examination of modern Chinese popular culture and its global cultural significance in the contemporary world. From film to literature, from music to theatre, this course will probe modern Chinese popular culture as it has manifested itself, and trace its sociopolitical, aesthetic, and affective impact on the contemporary world.

***CHI 450 DAOISM. (3)**

Interdisciplinary examination of the development of Daoism, China's indigenous philosophical and religious tradition. Includes critical approaches to texts that are central to the doctrines, concepts, and practices of Daoism, and an assessment of its impact on Chinese art, poetry, fiction, and historical writing form all periods of Chinese history. This course will also offer a discussion of Daoism and its emergence in 20th century American culture and evaluate its impact and effects on North American pop culture, alternative culture, and new religious movements.

CHI 495G ADVANCED INDEPENDENT WORK IN CHINESE. (1-3)

Independent research in Russian and Eastern Studies on an advanced level for undergraduate and graduate students. Students will be required to establish a written contract with the relevant faculty member describing the tasks to be completed in the course. May be repeated to a maximum of six credits, or a total of six credits of CHI 395 and 495G.

CHI 511 LITERARY CHINESE. (3)

This course builds on linguistic skills learned in previous study of Chinese and Japanese, introducing the grammar, vocabulary, and concepts of Literary Chinese. The class will focus on early texts written in what is often referred to as "Classical Chinese," which flourished from the late Zhou to the end of the Han dynasty (220 CE) and was the common written language of East Asia. Prereq: CHI 301 or JPN 301 or consent of instructor.

CIS Communications and Information Studies

CIS 110 COMPOSITION AND COMMUNICATION I. (3)

Composition and Communication I is the introductory course in a two-course sequence designed to engage students in composing and communicating ideas using speech, writing, and visuals. Students will develop interpersonal communication, critical thinking, and information literacy skills by exploring what it means to be engaged, twenty-first century citizens. Students will practice composing, critiquing, and revising ideas based on personal experience, observation, and fieldwork in the community, culminating in several discrete projects using oral, written, and visual modalities.

CIS 111 COMPOSITION AND COMMUNICATION II. (3)

Composition and Communication II is the advanced course in a two-course sequence designed to engage students in composing and communicating ideas using speech, writing, and visuals. In this course, students will work in small groups to explore issues of public concern using rhetorical analysis, engage in deliberation, compose conscientious and well-developed arguments, and propose viable solutions to different audiences. Students will sharpen their ability to conduct research; compose and communicate in spoken, written, and visual forms; and work effectively in teams through sustained interrogation of an issue. A significant component of the class will involve learning to use visual and digital resources both to enhance written and oral presentations and to communicate with public audiences. Prereq: CIS 110.

AND COMMUNICATION II (CIS). (3)

Composition and Communication 112 is an accelerated version of the standard two-semester composition and communication sequence. It focuses on integrated oral, written, and visual communication skill development and emphasizes critical inquiry and research. Students will sharpen their ability to conduct research; compose and communicate in written, oral, and visual modalities; and use interpersonal skills to work effectively in groups (dyads and small groups). Prereq: AP English Composition score of 4 or 5, an ACT English score of 32 or higher, an SAT verbal score of 720 or higher, or acceptance into the University's Honors Program.

CIS 184 COMMUNICATING ARGUMENTS. (3)

Theories; strategies; techniques for researching, analyzing, constructing, and presenting oral arguments for and against selected contemporary topics and issues. Emphasis on in-class presentations. Prereq: Instructor approval required to enroll.

CIS 191 SPECIAL TOPICS IN INSTRUCTIONAL COMMUNICATION (Subtitle required). (1-3)

Study of a specialized topic in instructional communication. May be repeated to a maximum of nine credits under different subtitles. Lecture. Prerequisites will be set by the instructor.

CIS 284 INTERCOLLEGIATE DEBATE AND FORENSICS. (1)

Preparation for and participation in intercollegiate debating and/or forensics. May be repeated seven times for a maximum of eight credits. Prereq: Instructor approval required to enroll.

CIS 300 STRATEGIC BUSINESS AND PROFESSIONAL COMMUNICATION (W). (3)

This communication intensive course prepares students for their careers by developing effective communication skills (integrated written, oral, and visual) applied specifically to today's technology-driven and global business environment. The course will focus on developing strong communication skills in interpersonal settings, on small group teams, and when delivering public presentations. Students will prepare cover letters, resumes, websites, and portfolios; develop effective interviewing skills in face-to-face and online environments; communicate effectively based on audience analysis in face-to-face and online settings; deliver effective formal public business presentations (informative and persuasive) based on audience analysis and using a variety of presentational aids that enhance the message; and learn to manage data, graphics, and a positive online presence (e.g., websites, blogs, social media outlets, email messages, and webinars). Prereq: Upper division status in accounting, analytics, communication, economics, finance, management, marketing, or permission from instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CIS 391 SPECIAL TOPICS IN INSTRUCTIONAL COMMUNICATION (Subtitle required). (3)

Intensive study of a specialized topic in instructional communication. May be repeated to a maximum of 9 credits under different subtitles. Lecture.

CIS 399 CONSULTING AND TRAINING – MULTIMODAL COMMUNICATION CONSULTING CENTER INTERNSHIP. (1-3)

The principle purpose of this course is to provide students with an opportunity to intern in the Multimodal Communication Consulting Center (MC3). The internship will provide students with the ability to act as a peer tutor in the MC3, engage in classroom presentations, and develop out-of-class instructional workshop focused on presentational elements and multimodal communication. Prereq: CIS/WRD 110 and 111 or equivalents and by instructor approval.

CIS 499 INTERNATIONAL INTERNSHIP. (3)

Qualified students enter the professional sector to refine skills and knowledge. Supervised internships in an international location approved by the College allow placements in industry, government, the media, communication agencies, etc. International internship credit will only be given for sites/programs approved by Education Abroad at UK. Pass/Fail only. Prereq: Admission to upper-division in one of the undergraduate majors in the College of Communication and Information (COM, ICT, ISC, JOU or MAS), fulfillment of internship prerequisites for the specific major (for COM 399, JAT 399 or ICT 399), and approval of the College's executive director for international studies.

CIS 590 INTERNSHIP-APPRENTICESHIP IN INSTRUCTIONAL COMMUNICATION (Subtitle required). (3)

This course provides students an opportunity to work one-on-one with a faculty member in the college as a teacher's apprentice in a course in the track of their chosen major. As an apprentice, students will attend all classes of the course they are serving as an apprentice for and meet with the faculty member weekly to discuss course content and pedagogical strategies. Students will also prepare at least three lesson plans and lead the class in working through them at least three times over the course of the semester. Students will ultimately develop a reflective teaching portfolio for the course. This course is repeatable for up to 6 credits. Prereq: Upper division status in the College of Communication and Information, successful completion of the course for which a student wants to as an intern-apprentice (i.e., B or better), an overall GPA of 3.0 or higher, permission from both the teacher of the course and the Director of the Division of Instructional Communication prior to registration, and completion of a Division Learning Contract.

CJT Communication, Journalism,

Telecommunications (Graduate)

CJT 601 PROSEMINAR IN COMMUNICATION. (3)

Introduction to graduate study; theory and systems, research strategies. Prereq: Graduate standing in communication or consent of instructor.

CJT 608 MASS COMMUNICATIONS AND SOCIETY. (3)

A study of the ways in which the communications media play their roles in contemporary society with special attention to the major functions, rights, and responsibilities of media and individuals. Prereq: Graduate standing in communication or consent of instructor.

CJT 610 PARTICIPATORY COMMUNICATION. (3)

This seminar will provide students with a state of the art account of the underlying philosophical, theoretical, and methodological premises of participatory communication. This will help students gain a deep understanding of participatory communication theory and research, and their implications for such contexts as management and organizational communication, health communication, international development, journalism, democracy and civic engagement, public policy, and communication with marginalized groups. Prereq: At least one year of graduate study in communication or consent of instructor.

CJT 615 PROSEMINAR IN COMMUNICATION AND INFORMATION SYSTEMS. (3)

This course is an introductory graduate-level survey of theory and research on human communication mediated by communication and information technologies. This course is designed to cover the areas not typically addressed in traditional courses of mass or interpersonal communication, including theory and research on the use of computers and electronic communication over a variety of communication and information systems. Prereq: Graduate standing or consent of instructor. (Same as LIS 615.)

CJT 616 FOUNDATIONS IN INSTRUCTIONAL COMMUNICATION. (3)

Instructional communication is a blending of three disciplines including pedagogy (i.e., teaching), educational psychology (i.e., cognitive learning), and communication. Although each of these unique disciplines is embedded in its own theoretical and research tradition, this course will focus on where these three disciplines intersect. We will examine and criticize various communication and instructional models, plan for and deliver instruction in both in-person and computer-aided venues, learn various methods for assessing teaching and learning, and discuss the managerial and political aspects of instructional delivery in various professional contexts, with a special emphasis on those in academic, information, and organizational settings.

CJT 619 PROSEMINAR IN INTERNATIONAL/ INTERCULTURAL COMMUNICATION. (3)

Examines important issues in communication from a global perspective. In-depth study of international communications systems, international information flow, problems that occur in communicating with members of different cultures or subcultures, and development of theories and strategies for improving international communications at the mass, organizational, and interpersonal levels. Prereq: CJT 601 and graduate standing in communication or consent of instructor.

CJT 625 PROSEMINAR IN ORGANIZATIONAL COMMUNICATION. (3)

This course is an introductory graduate-level survey of theory and research in the area of organizational communication and related topics. Students will be exposed to a variety of current theoretical perspectives and methodological orientations. Prereq: Graduate standing in communication or consent of instructor.

CJT 629 INTRODUCTION TO MEDICAL INFORMATICS. (3)

This course is designed to introduce the interdisciplinary field of medical informatics to health information professionals. Medical Informatics is a developing field that essentially seeks to apply information and computing technologies to improve all aspects of healthcare, including patient care, research, and education. During the semester we will explore a number of topics central to understanding the field, including: the nature of biomedical information, the electronic medical record, the role of information and computing technologies to support clinical decision making, healthcare and informatics standards, information retrieval, system analysis and technology assessment, and essential issues of information technology in medical education and medical ethics. By the end of this Web-based course, students are expected to be able to understand broad aspects of the field and can use this as a foundation for further education, training, and work in health information professions. (Same as LIS 629.)

CJT 630 PROSEMINAR IN MASS MEDIA LAW AND PUBLIC POLICY. (3)

Study of mass communication law and policy-making. Intensive review of court decisions, statutes and administrative rules and regulations regarding libel, privacy, public access to government meetings and documents, intellectual property, broadcast regulation, commercial and corporate speech, obscenity and protection of news sources. Prereq: CJT 601 and graduate standing in communication or consent of instructor.

CJT 631 PROSEMINAR IN INTERPERSONAL COMMUNICATION. (3)

The course reviews existing and emerging theoretical, perspectives relevant to the context of interpersonal communication. Emphasis is on theories of message production and reception, identity management, relationship development, and related processes. Methods of investigation unique to the study of interpersonal interaction are also addressed. Students are expected to be familiar with general communication theory and basic research methods prior to enrolling in the course.

CJT 636 ASSESSMENT AND EVALUATION METHODS IN APPLIED COMMUNICATION RESEARCH. (3)

In applied instructional settings (e.g., training, workshops, teaching, online courses, conference proceedings), goals are set for specific outcomes to be achieved, whether they are affective, cognitive, or behavioral. In these instructional contexts, assessment is used to evaluate the effectiveness of any program or intervention. Additionally, assessment is used to improve upon existing programs and interventions. Students will learn how to develop, conduct, and evaluate sound assessment plans, and provide recommendations based on assessment results.

CJT 637 INFORMATION TECHNOLOGY. (3)

Study of computer and communication technology used in modern information storage and retrieval systems. Consideration also given to managing microcomputer services, hardware evaluation and selection, and system security. Prereq: Consent of instructor. (Same as LIS 637.)

CJT 638 INTERNET TECHNOLOGIES AND INFORMATION SERVICES. (3)

A course examining the structure, development and evolution of the Internet; network protocols and client/server architecture issues; Web page design, authoring, and evaluation; the use of the Internet as an information storage and retrieval system; recent advances in HTML and scripting languages; and Internet related social issues such as censorship and copyright. Prereq: LIS 636 or consent of instructor. (Same as LIS 638.)

CJT 640 HEALTH INFORMATION RESOURCE SERVICES. (3)

A survey of information agencies and health science libraries, including topics related to: the healthcare community and their information needs, information resources in the health sciences, controlled medical terminologies and classification systems, search and retrieval of information resources, issues in the management of collections and access to health libraries. (Same as ICT/LIS 640.)

CJT 645 PROSEMINAR IN MASS COMMUNICATION THEORY. (3)

A broad examination and critical analysis of major mass communication theories and research areas. Prereq: A course in research methods and graduate standing in communication or consent of instructor.

CJT 646 INTERPERSONAL COMMUNICATION IN INSTRUCTION. (3)

Interpersonal communication exists in the relationships between students and instructors and between students, both in and out of the classroom. Although these relationships differ from other interpersonal relationships (e.g., friends, significant others), their impact is no less profound or influential. In this course, students will explore how interpersonal concepts, constructs, theories, and relationships emerge in the classroom and impact the overall instructional environment in terms of learning outcomes, satisfaction, and engagement, among other important instructional outcomes.

†**CJT 650 DISTANCE EDUCATION: DELIVERY.**

CJT 651 COMMUNICATION THEORY. (3)

Examination and critical analysis of the major theories of communication processes, including systems theory, structural theories and semiotics, behaviorism, symbolic interactionism, theories of the social construction of reality, and other theoretical approaches to the study of communication. Prereq: Graduate standing or consent of instructor.

CJT 652 DISTANCE EDUCATION: MANAGEMENT AND SUPPORT. (3)

This course has been designed for those faculty or future faculty who plan to manage or direct programs delivered through distance education technology. The course will focus on current issues and challenges in distance education administration, including such topics as provision of quality support services; policy issues at the local, state, national, and international level; model administrative structures; instruction and technology funding; and virtual institutions. Prereq: Master's degree. (Same as EDS 652.)

CJT 656 INSTRUCTIONAL COMMUNICATION AND TECHNOLOGY. (3)

Instructional communication often utilizes technology. Teaching and learning now incorporate a wide variety of technologies, ranging from supplementing traditional lectures to holding classes online with students across the world. This course marries traditional areas of concern for instructional communication and emerging technologies to explore the landscape of teaching and learning. Through readings, technology demonstrations, and discussion, the class will examine ethical, technological, professional, and scholarly questions.

CJT 664 QUALITATIVE METHODS IN COMMUNICATION RESEARCH. (3)

Goals, epistemology and methods of qualitative inquiry in communication. Strengths and limitations of different qualitative research methodologies. Distinctive contributions of qualitative research to theory and practice of communication.

CJT 665 QUANTITATIVE METHODS IN COMMUNICATION RESEARCH. (3)

The scientific method. Communication research as part of social science research. Study and practice of quantitative behavioral research techniques which apply to communication. Prereq: Graduate standing in communication or consent of instructor.

***CJT 668 DATABASE MANAGEMENT. (3)**

This course is designed as a first database course for students without any previous experience. The general aim of the course is to understand the basic concepts, principles, and hand-on experiences on database systems. The course will evolve from understanding, visualizing, and analyzing data. Then transition to understanding relational databases by designing and building databases using Access and querying using Structured Query Language (SQL). Prereq: LIS 636 or permission of instructor. (Same as LIS 668.)

CJT 671 PROSEMINAR IN HEALTH COMMUNICATION. (3)

This course is designed to provide a broad introduction to communication in a health care

context. Topics addressed are patient-provider communication, small group communication, communication in health care organizations, intercultural communication in health care, and health images in the mass media. Prereq: Graduate standing in communication or consent of instructor.

CJT 682 COMMUNICATION AND PERSUASION. (3)

An advanced course examining the literature in communication and attitude change. Issues in measurement, theory, and philosophical orientation are central. Covers communication broadly, including interpersonal, mediated, and mass communication. Prereq: Graduate standing in communications or consent of instructor.

CJT 684 PROSEMINAR IN INSTRUCTIONAL COMMUNICATION. (3)

This course is an introductory graduate-level survey of current theory, research, and current developments in the area of instructional communication. Students will be exposed to a variety of current theoretical perspectives and methodological orientations. Hands-on opportunities are provided to construct and refine strategies and resources for instruction. Prereq: Prior teaching experience, or COM 584, or consent of instructor.

CJT 685 SEMINAR: PREPARING FUTURE FACULTY FOR THE MULTICULTURAL CLASSROOM. (1)

This course is to prepare future communication faculty for facilitating and dealing with diverse student learning in an increasingly multicultural classroom context. Prereq: Recommend CJT 684 or GS 650.

CJT 690 SPECIAL TOPICS IN LIBRARY AND INFORMATION SCIENCE. (1-3)

A survey and historical study of multicultural literature for your of all ages. Students will engage in extensive reading, evaluation, and discussion of literature and the issues related to developing an understanding of various cultures and special populations. Prereq: LIS 610 or LIS 614, or consent of instructor.

CJT 696 INTERNSHIP IN COMMUNICATION. (3)

Field experience for candidates for the M.A. degree in any field of communications through work in industry, government, education, research or business agencies. Laboratory, 12 hours per week. Prereq: Admission to M.A. program and 18 hours of graduate work. Consent of DGS required.

CJT 700 DIRECTED READING IN COMMUNICATION. (1-3)

Individual reading study on some communications aspects not treated in depth in a regular course or of topical interest. Advance consultation regarding reading list and examination procedure required. May be repeated to a maximum of 12 credits. Prereq: Graduate standing in communication or consent of instructor.

CJT 719 SEMINAR IN INTERNATIONAL/ INTERCULTURAL COMMUNICATION (Subtitle required). (3)

Special Topics/Issues in International/Intercultural Communication examines the current and the alternative perspectives in the field of study. Topics/Issues such as the New World Information and Communication Order, Information/Communication Technologies, Communication and Development, Transborder Data Flows, etc., are studied. May be repeated to a maximum of six credits. Prereq: CJT 619 and graduate standing in communication or consent of instructor.

CJT 721 SEMINAR IN RISK COMMUNICATION. (3)

This course establishes risk communication as a distinct sub-discipline within the communication discipline. Ethical considerations are paramount in all areas covered in the course. Theories of risk communication such as mindfulness, sensemaking, chaos, image repair, issues management, the constraints of structuration, and renewal discourse are discussed in terms of pre-crisis, crisis, and post-crisis. Applied research areas such as best practices, high reliability organizations, terrorism, and health risks are also considered. Ultimately, the course provides an overview of the established and emerging perspectives on risk and crisis from the communication perspective.

CJT 722 SEMINAR IN CRISIS COMMUNICATION. (3)

This course follows the crisis communication management process through the stages of pre-crisis, crisis, and post-crisis. The pre-crisis stage discusses planning and environmental scanning. The crisis stage discusses communication strategies for image restoration. The post-crisis stage depicts crisis as an opportunity for organizational learning and for rebuilding or expanding public trust. The course uses a case study approach throughout.

CJT 723 SEMINAR IN TRAINING AND CONSULTING. (3)

This graduate course explores communication training and consultation as a research and instructional focus for students interested in applied communication. Students will learn how to identify and assess communication competence and how to develop training programs to enhance communication competency.

CJT 725 SEMINAR IN ORGANIZATIONAL COMMUNICATION: (Subtitle required). (3)

This course is concerned with theory and research relevant to organizational communication and related areas of interest. Special attention is given to various topics relevant to a specific subtitle. May be repeated to a maximum of six credits under a different subtitle. Prereq: Graduate standing in communication or consent of instructor.

CJT 726 COMMUNICATION LEADERSHIP STUDIES. (3)

The primary purpose of this course is to extend students' theoretical understanding of

Course Descriptions

leadership from a communication perspective. Specifically, this course is designed to (1) sharpen the students' understanding of the role of communication in developing effective leadership behaviors; (2) familiarize students with leadership as it relates to the communication process; (3) involve students in major term projects which incorporate current leadership theory and research; and (4) enhance students' understanding of published research in leadership communication.

CJT 730 SEMINAR IN MASS MEDIA AND PUBLIC POLICY (Subtitle required). (3)

The role of mass communications media in making public policy and the effects of public policies on the mass media. One subject area will be investigated each semester; typical topics are (1) political campaign communications; (2) censorship; (3) controversial public issues; (4) rights; (5) international and world agreements. May be repeated to a maximum of six credits under a different subtitle. Prereq: CJT 630 and graduate standing in communication or consent of instructor.

CJT 731 SEMINAR IN INTERPERSONAL COMMUNICATION (Subtitle required). (3)

Consideration of special problems in interpersonal communication with emphasis on emergence of theory and implications for further research. May be repeated to a maximum of six credits under a different subtitle. Prereq: CJT 631 and graduate standing in communication or consent of instructor.

CJT 745 SEMINAR IN MASS COMMUNICATION (Subtitle required). (3)

Consideration of selected topics in mass communication theory and research. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate standing in communication or consent of instructor.

CJT 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CJT 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CJT 751 ADVANCED TOPICS IN COMMUNICATION THEORY CONSTRUCTION. (3)

Intensive examination of selected topics important to the construction, development, and testing of communication theories and problems. Prereq: Completion of required first-year curriculum for the Ph.D.

***CJT 764 ADVANCED TOPICS IN QUALITATIVE RESEARCH METHODS (Subtitle required). (3)**

A focused treatment of one or more issues, topics, or problems in qualitative research methodology in communication, such as ethnography, discourse analysis, semiotics, or historical methods. May be repeated unlimited under different topics. Prereq: CJT 664 or consent of instructor.

CJT 765 ADVANCED SEMINAR IN COMMUNICATION RESEARCH METHODS (Subtitle required). (3)

A course in the methods and design of communication studies. Prereq: CJT 665 or the equivalent and graduate standing in communications or consent of instructor.

CJT 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CJT 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

CJT 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely. Prereq: Satisfactory completion of Qualifying Examination (third year).

CJT 771 SEMINAR IN HEALTH COMMUNICATION (Subtitle required). (3)

A topical seminar discussing issues in the field of health communication from a variety of perspectives, e.g., the relevance of interpersonal, international and intercultural and mass communication processes to the quality and availability of health care. May be repeated.

CJT 775 SEMINAR IN HEALTH COMMUNICATION CAMPAIGNS. (3)

The role of communication in public health campaigns. Includes theories relevant to such campaigns, campaign effects studies, methods of evaluation, and message design and targeting principles. Prereq: CJT 645 and graduate standing in communication or consent of instructor.

CJT 780 SPECIAL TOPICS IN COMMUNICATION (Subtitle required). (3)

Professors will conduct research seminars in topics or problems in which they have special research interests. May be repeated with different topics.

CJT 781 DIRECTED STUDY IN COMMUNICATION. (1-6)

To provide advanced students with an opportunity for independent work to be conducted in regular consultation with the instructor. May be repeated to a maximum of six credits. (To be used for independent work.) Prereq: Consent of instructor.

CJT 790 RESEARCH PROBLEMS IN COMMUNICATION. (1-6)

Significant participation in important aspects of a research project under the direction of a graduate faculty member. May be repeated to a maximum of six credits. Prereq: Completion of all required first-year courses in the doctoral curriculum and consent of Associate Dean for Graduate Studies.

CLA

Classics

COURSES IN CULTURE AND CIVILIZATION

(No knowledge of Greek or Latin expected.)

CLA 100 ANCIENT STORIES IN MODERN FILMS. (3)

This course will view a number of modern films and set them alongside ancient literary texts which have either directly inspired them or with which they share common themes. In the first part of the course, we will consider the relationship between ancient Greek epic, tragic, and comic literature and the modern cinema. In the second part, we will look at a number of ways in which the city of Rome has been treated as both a physical place and as an idea or ideal in the works of both ancient Romans and modern film-makers.

CLA 131 MEDICAL TERMINOLOGY FROM GREEK AND LATIN. (3)

Latin and Greek roots, prefixes, and suffixes as found in medical terminology. Primarily for pre-medical, pre-dental, pre-nursing and pre-veterinary students, but others will be admitted for help in vocabulary building.

CLA 135 GREEK AND ROMAN MYTHOLOGY. (3)

The Greek myths studied both from the standpoint of their meaning to the Greeks and Romans and from the standpoint of their use in later literature and in everyday life. Fulfills Gen Ed Inquiry, Humanities.

#CLA 190 INTRODUCTION TO THE NEW TESTAMENT. (3)

This course introduces students to both the role religion can play in human experience and the principles of the interpretation of historical, especially religious, texts by exploring the literary, historical, and cultural dimensions of the Christian Bible, the New Testament. The scholarly and academically rigorous exploration of sacred texts and religion in general, outside the realm of denominational belief, stretches back nearly 200 years, to the time of the birth of such disciplines as archaeology, anthropology, sociology, cultural history, and folkloric studies, all of which contribute to the modern discipline of biblical studies and the historical-critical method of interpretation. The academic study of the New Testament, especially since it is a text already familiar to many students, can in particular serve to teach reasoned analysis and critical thinking, challenge assumptions, and demonstrate the vital relevance of the humanities disciplines to our daily lives.

CLA 191 CHRISTIANITY, CULTURE, AND SOCIETY: A HISTORICAL INTRODUCTION. (3)

A historical introduction to Christianity in its varying cultural contexts, examining the primary developments in its teachings, practices, and structures from its origins to the sixteenth century.

CLA 210 THE ART OF GREECE AND ROME. (3)

A survey of the major forms of art in ancient Western Asia, Greece, and Rome, with emphasis on the comparative typology and cultural significance of the monuments.

CLA 229 THE ANCIENT NEAR EAST AND GREECE TO THE DEATH OF ALEXANDER THE GREAT. (3)

Covers the birth of civilization in Egypt and Mesopotamia, and the history of the ancient Near East and Greece to the conquest of Greece by Philip of Macedon. (Same as HIS 229.)

CLA 230 THE HELLENISTIC WORLD AND ROME TO THE DEATH OF CONSTANTINE. (3)

Covers the conquests of Alexander the Great, and the main features of the Hellenistic World, the Roman Republic and the Roman Empire to the death of Constantine. (Same as HIS 230.)

CLA 261 LITERARY MASTERPIECES OF GREECE AND ROME. (3)

A survey of major Greek and Roman literary works. Attention will be focused on the various genres of Classical literature, and the course will include comparative analysis of Greek and Latin literary pieces.

CLA 314 ANCIENT (Subtitle required). (3)

Study of the arts and visual cultures of the Ancient World. According to subtitles, focus may be on selected periods or media of artistic and visual production, in the context of political, social and cultural developments, from Bronze Age through the Roman Empire under Constantine. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended. (Same as A-H 314.)

CLA 331 GENDER AND SEXUALITY IN ANTIQUITY. (3)

A survey of the construction of gender, sexuality, and their relation to and expression in the societies of ancient Greece and Rome. Gender roles, marriage, social problems concerning sex and virginity, and different ways of understanding sexuality and gender in historical contexts are examined through the study of ancient literature, art and the insights of contemporary scholarship.

CLA 382 GREEK AND ROMAN RELIGION. (3)

A broad examination of the varieties of religious practice and experience in the ancient

Mediterranean world, particularly in Greece and Rome, with emphasis placed on how dramatically ancient religious concepts and systems differ from those of the modern world.

CLA 390 BACKGROUNDS TO AN EARLY HISTORY OF CHRISTIANITY TO 150 CE. (3)

This course examines the origins of Christianity from its Jewish, Greek, and Roman influences and charts its development through the first one hundred years of its existence. Special emphases are placed on understanding the diversity of Judaic religious identity as well as the influence of Greek philosophy and religion. The world of Jesus, Paul, and the evolution of this new view of one's relationship to God are analyzed historically through a close examination of the texts of this time in the nexus of Jewish, Greek, and Roman cultural interaction. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as HIS 390.)

CLA 391 CHRISTIANS IN THE ROMAN EMPIRE. (3)

This course discusses the changing status of Christians in the Roman Empire between 100 and 500 CE. An underlying theme of this course is: What is it to be a Christian? Students will read and discuss both primary and secondary sources and analyze how the answer to the above-mentioned question changed during the Roman Empire. Topics to be discussed include: heresies, persecution, definitions of doctrines and practices, the relationship to the Roman Empire, and more. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as HIS 391.)

CLA 450G SPECIAL TOPICS IN CLASSICAL STUDIES (Subtitle required). (3)

This course offers advanced study of a particular topic in classical studies not covered in other CLA courses. The field of study for this course is broadly conceived, and can include aspects of Greek or Latin philology and literature, as well as the history and culture of antiquity, archaeology and material studies, literary rhetorical theory and criticism, the classical tradition in the humanities, and pertinent topics in the Middle Ages and Renaissance. Format includes lectures and discussions, assigned and supplementary readings, and paper writing. May be repeated to a maximum of nine credits with different topics.

CLA 462G TOPICS IN CLASSICAL LITERATURE (Subtitle required). (3)

A study of a specific genre or genres, or author or set of authors, selected from Greek and Roman literature read in English translation. In addition to developing an appreciation of the works studied and their ongoing contribution to world literature, the course will examine various methods of literary analysis and criticism as well as the historical, social, and cultural context of these works in classical antiquity. The course is especially suited for students outside the classical languages who wish to acquire a sophisticated understanding of classical culture and for students interested in comparative literary studies.

CLA 509 ROMAN LAW. (3)

An historical introduction to the development of Roman law, from the Twelve Tables through the Codex Justinianus. (Same as HIS 509.)

COURSES IN LATIN

CLA 101 ELEMENTARY LATIN. (4)

An introduction to the study of classical Latin. Emphasis is placed on learning to read the language. Some attention is given to Latin literature and Roman civilization.

CLA 102 ELEMENTARY LATIN. (4)

A continuation of CLA 101. Prereq: CLA 101 or the equivalent.

CLA 201 INTERMEDIATE LATIN. (3)

Review of grammatical principles together with readings from Latin prose and poetry. Selections from a wide range of authors will be included in order to demonstrate the diversity and appeal of Latin literature. Emphasis is placed on developing reading ability. Prereq: CLA 102 or two years of high school Latin or equivalent.

CLA 202 INTERMEDIATE LATIN. (3)

A continuation of CLA 201. Prereq: CLA 201 or three years of high school Latin or equivalent.

CLA 205 COMPREHENSIVE INTERMEDIATE LATIN. (3)

An accelerated course offered in the summer session designed to take the student through the material normally covered in the two intermediate-level Latin courses (201 and 202). This course is intended to expand the student's knowledge of the vocabulary, grammar, and prose idiom of classical and post-classical Latin. There will also be discussions of Roman art, literature, history, and culture and, as time permits, Latin's role in the development of the English language. Oral exercises will also be part of the instruction. Prereq: CLA 102 or equivalent, or permission of the instructor.

CLA 211 ACCELERATED LATIN. (3)

An intensive course that covers, in one semester, all the morphology, syntax, and grammar of Latin that is required to bring students with no background in the language to the level at which they can begin to read unaltered Latin texts.

CLA 301 LATIN LITERATURE I (Subtitle required). (3)

An introduction to the literature of Republican Rome with selected readings of complete works from the major Latin authors. Lectures and class discussions on the various genres, styles, and themes of Latin literature. Topics vary every time the course is offered. May be repeated once under a different subtitle. Prereq: CLA 202 or equivalent.

CLA 302 LATIN LITERATURE II (Subtitle required). (3)

An introduction to the literature of Imperial Rome with selected readings of complete works from the major Latin authors. Lectures and class discussions on the various genres, styles, and themes of Latin literature. Topics vary every time the course is offered. May be repeated once under a different subtitle. Prereq: CLA 202 or equivalent.

CLA 501 LATIN COMPOSITION. (3)

The course is designed for students with a good command of Latin morphology and basic knowledge of Latin syntax. The participants will deepen their knowledge of Latin syntax, internalize the principles of Latin grammar and usage, and develop a sensitivity to prose style. The course will involve readings from Latin authors from all periods, and exercises in Latin prose composition. It will foster familiarization with the language through exercises that will go beyond simple translation from English. English, not Latin, will be the spoken language used in this course. Prereq: Proficiency in Latin above the 300 level.

CLA 521 ADVANCED LATIN COMPOSITION AND READING. (3)

This course continues the study of Latin composition, concentrating on the compound sentence, modes of expression in subordinate clauses, and the figures of speech in rhetoric. Students will become acquainted with masterpieces of Latin prose from all periods, including Cicero, Sallust, Livy, Petronius, Pliny Minor, Einhard, Abelard, Erasmus of Rotterdam, Thomas More. This course, unlike CLA 501, will be conducted entirely in Latin, with the objective of further enhancing the students' abilities to express themselves in correct Latin prose. Prereq: Consent of instructor.

CLA 524 THE LATIN LITERATURE OF THE REPUBLIC (Subtitle required). (3)

A study of one or more works selected from the beginnings of Roman literary history to 31 B.C., the period of such writers as Cicero, Caesar, Sallust, Plautus, Terence, Lucretius, and Catullus. Texts may include prose, including history, philosophy, rhetoric and oratory, and letters, and/or poetry, including drama and satire. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, with lectures and class discussion on the literary milieu. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.

CLA 525 THE LATIN LITERATURE OF THE EMPIRE (Subtitle required). (3)

A study of one or more works selected from approximately 31 B.C. to the end of the Western Empire, the period of such writers as Livy, Tacitus, Pliny, Seneca, Virgil, Horace, Ovid, and Juvenal. Texts may include prose, including history, philosophy, rhetoric and oratory, and letters, and/or poetry, including epic, lyric, elegiac, pastoral, and satire. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, with lectures and class discussion on the literary milieu. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.

CLA 528 LATE ANTIQUE AND POST-IMPERIAL LATIN LITERATURE (Subtitle required). (3)

A study of one or more works selected from Latin literature of late antiquity, or after the fall of the empire in the west, from approximately 200 AD into the Middle Ages and Renaissance. Authors and works may include early Christian Latin writers such as Augustine, late antique pagan writers such as the historian Ammianus, as well as medieval poetry, the Latin novel, medieval Christian writers, and Renaissance figures such as Erasmus. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, as well as the historical and cultural setting of the text and author. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.

CLA 611 LATIN OF ANCIENT ROME AND THE MIDDLE AGES (Subtitle required). (3)

This course is based on extensive reading of Latin texts taken from the Roman through the Medieval periods. It aims to foster close familiarization with the Latin language, cultivate an appreciation for different Latin prose styles, as well as investigate the broader historical and cultural circumstances surrounding each work. The classes will be conducted in Latin, and the assignments will involve Latin composition. May be repeated to a maximum of nine hours. Prereq: At least one course in Latin composition or permission of instructor.

CLA 612 LATIN OF THE MIDDLE AGES TO THE MODERN WORLD (Subtitle required). (3)

This course is based on extensive reading of Latin texts taken from the Medieval through the Modern period. It aims to foster close familiarization with the Latin language, cultivate an appreciation for different Latin prose styles, as well as investigate the broader historical and cultural circumstances surrounding each work. The classes will be conducted in Latin, and the assignments will involve Latin composition. May be repeated to a maximum of nine hours. Prereq: At least one course in Latin composition or permission of instructor.

CLA 624 SEMINAR IN THE LATIN LITERATURE OF THE REPUBLIC (Subtitle required). (3)

Graduate seminar in an author, a literary form, or a problem in the period of the Roman Republic. Intensive study of the Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 625 SEMINAR IN THE LATIN LITERATURE OF THE EMPIRE (Subtitle required). (3)

Course Descriptions

Graduate seminar in an author, a literary form, or a problem in the period of the Roman Empire. Intensive study of the Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 628 SEMINAR IN LATE ANTIQUE AND POST-IMPERIAL LATIN LITERATURE (Subtitle required). (3)

Graduate seminar in an author, a literary form, or a problem from Latin literature of late antiquity or early Christianity, or after the fall of the empire in the west, including the Middle Ages and Renaissance. Intensive study of the Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

COURSES IN GREEK

CLA 151 ELEMENTARY GREEK. (4)

An introduction to the study of Classical Greek. Emphasis is placed on learning to read the language. Some attention is given to Greek literature and civilization.

CLA 152 ELEMENTARY GREEK. (4)

A continuation of CLA 151. Prereq: CLA 151 or equivalent.

CLA 251 INTERMEDIATE GREEK. (3)

Review of grammatical principles together with readings from Greek prose and poetry. Selections from a wide range of authors will be included in order to demonstrate the diversity and appeal of Greek literature. Emphasis is placed on developing reading ability. Prereq: CLA 152 or equivalent.

CLA 252 INTERMEDIATE GREEK. (3)

The reading of Greek prose and poetry. Textual and literary analysis of selections from classical authors and the New Testament. Prereq: CLA 251 or equivalent.

CLA 350 PREPARING TO READ GREEK TEXTS. (3)

This course completes the study of fundamentals of the grammar and syntax of Classical Greek and prepares the student to read original Greek texts with competence and confidence. Prereq: CLA 252 or equivalent, or permission of instructor.

CLA 551 GREEK POETRY AND DRAMA (Subtitle required). (3)

A study of one or more works of Greek poetic and/or dramatic literature, which may include epic, lyric, tragedy, and comedy, selected from the whole of ancient Greek literature from Homer through the Roman period. A particular author, work, genre, or theme is selected each time the course is offered. Emphasis is placed both on mastering the Greek language and on literary analysis of the texts studied. Lectures and class discussions will further illuminate the literary and cultural milieu of the author or text. May be repeated to a maximum of nine credits under a different title. Prereq: CLA 252 or equivalent.

CLA 555 GREEK PROSE (Subtitle required). (3)

A study of one or more works of Greek prose literature, which may include history, biography, philosophy, satire, and the novel, selected from the whole of ancient Greek literature from Homer through the Roman period. A particular author, work, genre, or theme is selected each time the course is offered. Emphasis is placed both on mastering the Greek language and on literary analysis of the texts studied. Lectures and class discussions will further illuminate the literary and cultural milieu of the author or text. May be repeated to a maximum of nine credits under a different title. Prereq: CLA 252 or equivalent.

CLA 651 SEMINAR IN GREEK POETRY AND DRAMA (Subtitle required). (3)

Graduate seminar in Greek poetic and/or dramatic literature, which may include epic, lyric, tragedy, and comedy. Intensive study of the Greek text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine credits. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 655 SEMINAR IN GREEK PROSE (Subtitle required). (3)

Graduate seminar in Greek prose literature, which may include history, biography, satire, and the novel. Intensive study of the Greek text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine credits. Prereq: Graduate standing or consent of the Classics DGS and instructor.

OTHER ADVANCED COURSES

CLA 395 UNDERGRADUATE INDEPENDENT STUDY IN CLASSICS. (1-3)

An independent investigation of a topic, usually outside of or in considerably greater depth than available in the regular course offerings, in Greek and/or Roman language, literature, history, or culture. The course is designed for advanced undergraduate students under the supervision of a faculty member, and usually takes the form of directed readings, writing, and discussion, with tutorial meetings with the instructor no less than once a week. An advanced undergraduate research paper or equivalent project is the standard product of the course. May be repeated to a maximum of 6 credits. Prereq: Advanced undergraduate experience in Classics and permission of the instructor.

CLA 480G STUDIES IN GREEK AND LATIN LITERATURE (Subtitle required). (3)

A study of one or more works of Classical literature, either Greek or Latin, is designed to offer study in a particular text or author meeting a particular need or demand for graduate students from other disciplines and advanced undergraduate students in Classics. The course is not intended for Classics graduate students. Mastering the language of the text is a fundamental objective of this course, but the historical, social, and cultural milieu will also be studied. May be repeated for credit up to a maximum of six hours.

CLA 580 INDEPENDENT WORK IN CLASSICS. (3)

Courses to meet the needs of the student, including those who wish to study Medieval and/or Renaissance Latin, will be arranged in various areas. May be repeated to a maximum of 12 credits. Prereq: Major standing of 3.0 in the department or consent of instructor.

CLA 615 MANUSCRIPT CULTURES. (3)

This course examines how the vehicle of the manuscript and the circumstances of manuscript production shaped the creation, transmission, and reading of texts before the fifteenth century. Among the topics to be studied are orality and literacy, the transcription of sacred texts in Christianity, Judaism, and Islam, the political, economic, and social impacts of manuscript production and circulation, the impact of institutions (such as universities) on reading practices, contexts for the suppression, control, and alteration of texts, and the radical differences between print and manuscript cultures. (Same as HIS 615.)

CLA 616 PALEOGRAPHY. (3)

This course provides training in the skills needed to read the handwritten materials that constitute evidence for historical investigation of the production and circulation of information outside the medium of print. While the specific scripts to be studied will vary from semester to semester, depending upon whether the course is focused upon Latin paleography, Greek paleography, or vernacular paleographies, students will learn to read and transcribe manuscripts, to expand abbreviations appropriately, to recognize the chronological and geographical extent of particular scripts, to develop strategies for reading difficult scripts, to find the specialized reference works to assist them in studying handwritten materials, and to understand the historical arguments that have been constructed on the basis of analysis of scripts and the "archaeology of the book." The course also provides training in basic codicology and editorial techniques for establishing a text and recording variant readings. Prereq: Some familiarity with the language of the materials. (Same as HIS 616.)

CLA 630 SEMINAR IN CLASSICAL LITERATURE AND CULTURE (Subtitle required). (3)

This graduate seminar offers advanced, intensive study in two particular approaches to the study of Classics, requiring a broader and more inclusive approach beyond the scope of the typical Greek or Latin seminar. These are: 1) the coordinated study of works of both Greek and Latin literature, and 2) the study of a specific research area in classical studies and culture. One of these areas will be the focus of the course each time it is offered. Topics in the coordinated study of Greek and Latin literature can take various forms, such as the passions in Greek and Latin poetry, comparative Greek and Latin drama, Homer and Virgil, etc. Research in classics and culture involves extensive reading of a large body of sources and scholarship on a specific topic of current scholarly interest, along with the use of texts in the original language(s) for course assignments and papers. Appropriate competence in reading Latin and/or Greek texts is expected of all students in the course. Topics may include a focused aspect of Greek and/or Roman society, material culture, early Christianity – and its relation to classical culture, aspects of Medieval or Renaissance culture, or the ongoing influence of classical stories, ideals, and cultural forms in modern media. May be repeated for up to six credits on different topics. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 695 INDEPENDENT STUDY. (1-3)

Independent investigation of a problem under supervision of a graduate faculty member; or directed readings, writing, and discussion in small groups on topics outside the usual seminar offerings, guided by a graduate faculty member. May be repeated to a maximum of nine credits. Prereq: Admission to graduate program, permission of instructor and of departmental Director of Graduate Studies.

CLA 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CLA 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

CLA 790 RESEARCH IN THE TEACHING OF CLASSICAL LANGUAGES. (3)

Problems in the teaching of Latin and/or Greek in secondary and/or higher education. Objectives, methods, preparation of materials, development of curricula, or the history of the field. Prereq: CLA 530 or the equivalent.

CLD

Community and

Leadership Development

CLD 100 INTRODUCTION TO COMMUNITY AND LEADERSHIP DEVELOPMENT. (1)

The course explores how communities of place and interest influence our lives and how these different types of communities are related to the media and leadership. Introduces the intellectual frameworks underlying this field as well as the types of research and outreach done by faculty.

CLD 102 THE DYNAMICS OF RURAL SOCIAL LIFE. (3)

Introduces major concepts of sociology by exploring social, political and cultural issues confronting rural society and American agriculture, such as: population change, industrialization, energy developments, agricultural change. Student may not receive credit for both this course and SOC 101.

CLD 225 COMMUNITY AND COMMUNICATION: EXPLORING THEIR INTERSECTIONS. (3)

This course will explore the inextricable link between community and communication by examining the social structure of communities and the media residing within them. Particular emphasis will be placed on the availability of information to citizens and in turn how this information environment facilitates/thwarts social interaction.

CLD 230 INTRAPERSONAL LEADERSHIP. (3)

This course is designed to provide a foundation for individuals "to get to know themselves better" in the context of leadership. Examination of effective leader characteristics, personality traits, motivation, personal leadership vision and other concepts will encourage students to develop a better understanding of their own leadership skills and perspectives. In addition, students will determine their own personality style, and learn how to best use this style when leading others. Ultimately, this type of intrapersonal knowledge will serve as the building block for deeper exploration into the field of leadership.

CLD 250 READING CRITICALLY AND WRITING WELL: COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (3)

This course will provide students with a foundation in critical thinking through an emphasis on reading, writing and analytical discussions addressing basic agricultural topics, controversial agricultural topics and specific topics in community communications and leadership development. Prereq: ENG 104 and sophomore status. Primary registration access limited to majors and remaining seats open during secondary registration.

CLD 260 COMMUNITY PORTRAITS. (3)

This course introduces the social science concept of community. The focus will be on definitions of community, and the different types of communities that exist in society. Students will gather and analyze information about real communities that represent different types of community.

CLD 300 FOUNDATIONAL THEORIES IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)

This course illustrates the role of social theories and research. More importantly, it addresses the question, "How do we apply theory to guide our understanding of the world around us?" Students will study theories common to multiple social science contexts (communications, leadership, community and education) and, following critical analysis, describe how they are applied within various situations. Students will be expected to integrate the theories into a personal holistic viewpoint that affects their lives. Prereq: Major standing in CLD.

CLD 305 RESEARCH METHODS IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)

This course will familiarize students with research concepts, methods, and skills used in community and organizational development and communication. The course focuses on applied research topics such as secondary data analysis, survey design, focus groups, key informant interviews and content analysis. In addition, the course considers the politics of information and ethical concerns in social research. Prereq: Major standing and CLD 300 (may be taken concurrently).

CLD 325 WRITING FOR COMMUNITY MEDIA. (3)

This 3-hour skills course will teach students how to write clearly, concisely and accurately for various community media, including print, radio, television and new social media. It provides a broad-based understanding of writing and communicating to community audiences. Prereq: Major standing in CLD plus completion of graduation writing requirement.

CLD 330 INTERPERSONAL SKILLS FOR TOMORROW'S LEADERS. (3)

This course provides fundamental leadership theories, models, and perspectives to aid students in conducting interpersonal relationships in their daily lives, and help students acquire skills basic to becoming a leader in their professional lives. Each student will begin developing a foundation of practical leadership applications. Prereq: Major standing in CLD.

CLD 340 COMMUNITY INTERACTION. (3)

Examines community effects on group and individual behavior from the perspective of sociological social psychology. By focusing on individuals, individuals in groups, and groups, special emphasis is given to how community context shapes the attitudes, beliefs, and actions of individuals as well as their interactions with others. Prereq: CLD 102 or SOC 101 or consent of instructor. Primary registration access limited to SOC and CLD majors and remaining seats open during secondary registration. (Same as SOC 340.)

CLD 360 ENVIRONMENTAL SOCIOLOGY. (3)

A sociological study of the inter-relationship between human societies and the natural

environment. Topics may include population growth; food systems; energy; climate change; risk perception; disasters; sustainability; social movements; and environmental justice. Prereq: SOC 101 or CLD 102. (Same as SOC 360.)

CLD 362 FIELD EXPERIENCE IN CLD. (3)

Supervised experiences in businesses, agencies or government. Required of all Community Communications and Leadership Development majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Junior standing, majors only.

CLD 370 LEARNING IN SOCIETY. (3)

Learning in Society is designed to assist students in identifying and evaluating human learning and development within various social contexts. This course focuses on the impact social interactions have on human cognition, emotion and identity. Theoretical foundations for this course include social learning, social integration, multiple intelligences, emotional intelligence, systems psychology, and identity development. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 375 CONTEMPORARY ADULT LEARNING. (3)

This course expands on adult learning theory first presented by Malcolm Knowles and focuses on the idea of lifelong learning, differences between pedagogy and andragogy, fundamental andragogical concepts, and the role that adult learning professionals play in the adult learning process. Finally, an international context will be explored by comparing and contrasting adult education in the U.S. and around the world. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 380 GLOBALIZATION: A CROSS-CULTURAL PERSPECTIVE. (3)

A sociological study of how globalization processes affect development in various countries and world regions. Topics shall include development theory; comparative development processes and outcomes; and development policy options. (Same as SOC 380.)

CLD 395 SPECIAL PROBLEMS IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (1-3)

Directed independent study of a selected problem in the field of community communications and leadership development. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

CLD 399 EXPERIENTIAL LEARNING IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (1-3)

A field-based learning experience, under faculty supervision, in the application of community communications and leadership techniques in agricultural/public issues. May be repeated to a maximum of six credits. Offered on a pass/fail basis only. Prereq: Consent of instructor and completion of learning contract.

CLD 400 AGRICULTURAL COMMUNICATIONS CAMPAIGNS. (3)

Exploration of communications campaigns and strategies in the agricultural sector. Students will learn how to plan and enact communications campaigns centered on agricultural issues and audiences. Prereq: Primary registration access limited to majors and remaining seats open during secondary registration.

CLD 401 PRINCIPLES OF COOPERATIVE EXTENSION. (3)

Philosophy, history, and development of Cooperative Extension Service; evaluation of instructional techniques; leadership training; and practice in use of Extension methods. Open to junior and senior students.

CLD 402 PRINCIPLES OF LEADERSHIP. (3)

This course is designed to provide an introduction to leadership. Its focus is the development of an understanding of leadership theories and styles. You will also learn strategies for successful leadership. The introduction will include: 1) historical, theoretical, and cultural perspectives of leadership, 2) leadership skills and styles and strategies for success, and 3) examination of the responsibilities of leadership. Prereq: Admission to the program or consent of instructor. (Same as EDL 402.)

CLD 403 LEADERSHIP AND COMMUNICATION. (3)

This course is designed to expand student understanding of the theory and practice of leadership, conflict management, and decision-making. It is also designed to focus on issues of cohesiveness, trust, motivation, vision, and goals. Students must integrate their personal ethics and definition of leadership in various course assignments and projects. Prereq: Admission to the program or consent of instructor. (Same as EDL 403.)

CLD 404 CONTEMPORARY LEADERSHIP APPLICATIONS. (3)

This course supplements and integrates previous learning and is designed to provide maximum exposure to various concepts and perspectives of leadership through observational experiences, critical thinking, and self-analysis. It is also designed to allow the demonstration of previously learned leadership theories, styles, and strategies. Students must integrate their personal ethics and vision of leadership in their examination of various contemporary leadership contexts. Prereq: Admission to the program or consent of instructor. (Same as EDL 404.)

CLD 420 SOCIOLOGY OF COMMUNITIES. (3)

A sociological study of issues relevant to communities. Topics may include: conceptual approaches to community; organizational and institutional linkages within and beyond the community; social inequality and social processes within communities such as social networks, social capital, power and decision-making, and social change. Prereq: SOC 101 or RSO 102 or CLD 102; and one of the following: SOC 302 or 304 or CLD 405; or consent of instructor. (Same

as SOC 420.)

CLD 430 LEADING IN COMMUNITIES: VISION, ACTION, AND CHANGE. (3)

This course examines the nuances of leadership within communities. To learn what makes an effective community leader and the role a leader plays in community action, students will explore the importance of framing ideas, mobilizing resources, and developing social capital. This course expands on theories to highlight correlations with servant leadership, community behavior, and collaborative leadership styles. Finally, working with community visioning, change and ambiguity will reinforce the need for flexibility within the community leader's toolkit. Prereq: Major standing in CLD.

CLD 440 COMMUNITY PROCESSES AND COMMUNICATION. (3)

This course examines the relationship between community organization and change and the media. Special emphasis is given to the place of media organizations in community structure, the effects of media on community processes, and how community members use the media. Prereq: CLD 102 or SOC 101 and CLD/SOC 340 or consent of instructor. Primary registration access limited to majors and remaining seats open during secondary registration. (Same as SOC 440.)

CLD 460 COMMUNITY DEVELOPMENT AND CHANGE. (3)

This course examines change and change management within communities and organizations. This includes looking at the change process through the eyes of innovation, opinion leader and community member. In addition to individual skill development, this course will introduce a vision of an ideal organization/community, one that supports innovation and creativity, knowledge exchange and application and collaboration; a culture that makes productive change a part of the everyday work, encouraging initiative and promoting viability in today's society. This course weaves together theoretical and experiential threads using insights gained from readings, industry-based examples, case studies, class assignments and experiential activities. Prereq: Major standing in CLD.

CLD 465 TOPICS IN COMMUNITY COMMUNICATIONS (Subtitle required). (3)

Intensive study of a specialized topic in community communications. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 470 TOPICS IN LEADERSHIP (Subtitle required). (3)

Intensive study of a specialized topic in leadership studies. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 475 TOPICS IN NON-FORMAL EDUCATION (Subtitle required). (3)

Intensive study of a specialized topic in non-formal education. May be repeated under different subtitles. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 480 TOPICS IN COMMUNITY (Subtitle required). (3)

Intensive study of a specialized topic in community studies. May be repeated under different subtitles. Prereq: Major standing in CLD.

CLD 490 SEMINAR IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (3)

A capstone course for seniors in community communications and leadership development. Presentations, research papers, outside speakers and career guidance will be significant course components. Prereq: Senior standing in the major, or consent of instructor.

CLD 495 TOPICAL SEMINAR IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT (Subtitle required). (1-3)

Topical seminar using readings, discussions, and papers to focus on current issues of significance to community communications and leadership development. May be repeated to a maximum of twelve credits under different subtitles. Prereq: Consent of instructor. Primary registration access limited to majors and remaining seats open during secondary registration.

CLD 497 PROFESSIONAL PRACTICUM IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)

This is a cooperative educational program between the Community and Leadership Development majors at the University of Kentucky and approved employers who furnish facilities and instruction that help students acquire the skills and knowledge required in their chosen field. Ultimately, this is a dually beneficial relationship; stakeholder relations are improved while students have an opportunity to build relationships/networks that could encourage future career development. Prereq: Major standing in CLD; senior standing.

CLD 517 RURAL SOCIOLOGY. (3)

A sociological study of the issues relevant to rural communities. Topics may include transformations in rural communities; the agrifood system; and the natural environment in the U.S. and the world. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as SOC 517.)

CLD 525 COMMUNITY DIVERSITY AND MEDIA. (3)

This course covers how media, both traditional news media and newly emerging digital communication technologies, relate to community diversity. Specifically, the course focuses on the relationships between media and community (power) structure, community institutions/organizations, social movements and minority groups, urban/rural communities, gender/race/ethnicity/class and more. Prereq: Major standing in CLD or graduate student status.

CLD 530 FUNDAMENTALS OF ORGANIZATIONAL LEADERSHIP. (3)

This course examines the existing and emerging knowledge base for leadership within

organizations. Leadership and motivation of others requires individuals to go beyond their basic knowledge of managing others and learn how cultures, structures, and individuals in organizations interact within the system. This course highlights correlations with organizational behavior, team building, and collaborative leadership styles. In this class, students will explore organizational culture, team synergy and individual leadership capital. Prereq: Major standing in CLD or graduate student status.

CLD 534 SOCIOLOGY OF APPALACHIA. (3)

A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing regional political economy, society and culture in a global context. Prereq: Sociology, Anthropology or CLD senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as ANT/SOC 534.)

CLD 560 COMMUNITY INEQUALITIES. (3)

This course focuses on the emergence and persistence of community inequalities in contemporary American society. This begins by identifying, describing, and analyzing inequalities within and among American communities and then considering the implications of these inequalities for organizational and community processes. The essential questions that will guide this course are: How do we define, measure and evaluate the differences among communities? What factors contribute to the emergence and persistence of the inequalities among communities? What are the consequences of these inequalities for the people who live in these communities? Prereq: Major standing in CLD or graduate student status.

CLD 575 SCHOOLS, COMMUNITY AND SOCIETY. (3)

This course highlights the integral relationships between contemporary and historical societal norms, distinctive communities and educational systems. Prereq: Major standing in CLD; CTE students admitted to TEP; or graduate student status.

CLD 610 EXPERIENTIAL EDUCATION: PROCESS AND PRACTICE. (3)

This course is designed for students to examine and apply theoretical and practical foundations of Experiential Education within classroom and community-based educational environments.

CLD 620 GRADUATE STUDY IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1)

This course is an introduction to the interdisciplinary field of Community and Leadership Development (CLD). CLD reflects the multidisciplinary fields of faculty in the department: Rural Sociology, Community Development, Community Communications, Leadership Development and Agricultural Education.

CLD 630 INDIVIDUAL AND GROUP DYNAMICS. (3)

This course is designed as an advanced course exploring the dynamics involved in individual and group situations. Specifically, students will explore basic psychological and social psychological processes shaping human behavior and learn to apply the knowledge of these processes in educational, organizational and community settings.

CLD 640 SCIENCE, AGRICULTURE, AND DEVELOPMENT. (3)

An in-depth examination of the interrelations between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as ANT/SOC 640.)

CLD 650 APPLIED COMMUNITY COMMUNICATIONS. (3)

Designed to familiarize students with advanced writing and editing techniques, common forms of workplace writing, audience analysis, content analysis, and graphic design tips and tools. Discussion will include some of the larger issues surrounding community communications, such as discourse communities, bias, and ethics. Prereq: Graduate standing.

CLD 660 ADVANCED LEADERSHIP THEORY AND PRACTICE. (3)

This course has been designed to introduce the theoretical and research foundation of leadership studies through current journal articles and text chapters and also emphasizes multiple dimensions and contexts that influence leadership dynamics.

CLD 665 PROGRAM DEVELOPMENT AND EVALUATION. (3)

Course is designed to help students design, implement, and evaluate educational and social programs using a logic-based framework. (Same as SOC 665.)

CLD 670 COMMUNITY ENGAGEMENT. (3)

This course is designed as a service-learning/community engagement experience. It is organized with a field component related to the student's area of interest and an in-class experience that provides students with the opportunity to share and process their field experiences and to learn and grow from them through a variety of interactive exercises, readings, films and guest presentations.

CLD 671 ADVANCED METHODS OF TEACHING. (3)

The principles of method applied to teaching in the fields of classroom and community-based education. Prereq: Teaching experience within a classroom or community-based educational setting.

CLD 672 ADULT EDUCATION IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)

Preparation for teaching adult classes in career and technical education including organization of classes, development of curriculum, and methods of teaching.

CLD 673 CURRENT TRENDS IN AGRICULTURAL EDUCATION. (3)

Class work pertains to current trends and significant developments in agricultural education.

May be repeated to a maximum of nine credits.

CLD 675 THEORETICAL FOUNDATIONS OF COMMUNICATION AND COMMUNITY. (3)

This course is designed to explore the dynamics of community development and leadership communication within both geographic-bounded communities and communities of taste. (Same as SOC 675.)

CLD 676 SUPERVISION IN AGRICULTURAL EDUCATION. (3)

This course includes practice in teaching for observation by others, student teaching, and school visiting.

CLD 678 COLLEGE TEACHING OF AGRICULTURE, NATURAL RESOURCES AND HUMAN SCIENCES. (3)

A course designed to assist current or future college faculty in agriculture, natural resources or human science disciplines seeking to enhance the teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education. Prereq: Graduate Standing in the College of Agriculture.

CLD 684 STATISTICAL ANALYSIS IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)

The purpose of this course is to develop an overview and basic understanding of descriptive and inferential statistics. As a result, students will be able to organize and summarize quantitative data; interpret data; make generalizations from sample data to populations or theory; and, read and understand research reports.

CLD 685 COMMUNITY DEVELOPMENT THEORY AND PRACTICE. (3)

This course examines the application of our conceptual understanding of community and organizational dynamics to community development that builds upon assets and encourages local involvement. (Same as SOC 685.)

CLD 686 RESEARCH DESIGN. (3)

This course is an introduction to research design/methodology in social science research. The course emphasizes conceptualizing and working with the various components of a research inquiry and in particular how these components work together and strengthen the overall research design.

CLD 691 SOCIOLOGY OF FOOD AND AGRICULTURE. (3)

This seminar will analyze the transformation of agriculture and the food system in the historical context of increased globalization. Emphasis is given to key historical transitions, changing social relations surrounding production and consumption of food, and shifts in regulations and policy at the local, national, and/or international levels. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. and global agriculture and food economies. Prereq: Graduate standing, or consent of instructor. (Same as AEC/SOC 691.)

CLD 694 THE ADMINISTRATION OF AGRICULTURAL EDUCATION. (3)

A course designed for superintendents, high school principals, and other administrators. Its purpose is to prepare administrators and supervisors for leadership in agricultural education. (Same as EDL 694.)

CLD 748 MASTER'S THESIS RESEARCH IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CLD 758 CREATIVE COMPONENT IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)

This course offers a non-thesis option in Community and Leadership Development for students interested in completing a practitioner-based scholarly project. Prereq: All course work toward the degree must be completed and approval of the student's Advisory Committee is required.

CLD 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours. Prereq: All course work toward the degree must be completed.

CLD 775 TOPICAL SEMINAR IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)

Advanced study of topics of current importance in community and leadership development such as dispute resolution, volunteer management, or advanced program design and evaluation. May be repeated to a maximum of six credits.

CLD 780 SPECIAL PROBLEMS IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1-6)

Supervised individual study on selected issues in community and leadership development. May be repeated to a maximum of six credits. Learning contract must be filed with Director of Graduate Studies.

CLD 790 RESEARCH IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1-6)

Supervised individual graduate research projects on selected issues in community and leadership development. May be repeated to a maximum of six credits. Research Learning contract must be filed with the Director of Graduate Studies.

and Management

#CLM 104 MINDFULNESS PRACTICES AND STRESS REDUCTION. (1)

This course is designed for students interested in gaining personal insight into their busy mind's activity and learning how to settle the mind and more effectively deal with daily life stressors. Mindfulness practices will be discussed on evidenced based health outcomes and will be applied through personal mindfulness practice experiences. (Same as HHS 104.)

#CLM 120 CAREERS IN CLINICAL LEADERSHIP AND MANAGEMENT. (1)

An overview of the Clinical Leadership and Management profession(s) including aspects of professional practice, areas of specialization, professional issues and trends, and career paths and opportunities. The course will consist of assignments, lectures and interactive discussions led by faculty and visiting professionals designed to expand students' understanding of the profession(s) and to assist in educational and career planning and discernment.

CLM 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3)

Review of the wellness-illness spectrum and the societal response in terms of health services. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also includes a discussion of major health problems and related health care programs. (Same as HHS/HSM 241.)

CLM 350 HEALTH POLICY AND POLITICS. (3)

This course will address the development of the past and current US health policies within the context of historical, economic, cultural, and political environments. The political process and the roles and responsibilities of the executive, legislative, and judicial branches of government will be examined. The power and influence that politics, money, the media and special interest groups have had, and continue to have, upon the development of national and state health policies will be discussed and analyzed. Prereq: HHS 101, HHS 102 and CLM 241. Student admitted to the CLM or HHS program or consent of instructor. (Same as HHS 350.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CLM 351 HEALTH SERVICES ADMINISTRATION. (3)

Theories and practices of administration in health care institutions with special emphases on organizational behavior and analyses of various administrative processes and techniques. Prereq: HHS 101, HHS 102, CLM 241. Student admitted to HHS or CLM program or consent of instructor. (Same as HHS/HSM 351.)

***CLM 353 ETHICS IN HEALTHCARE. (3)**

The course will include the study of moral reasoning and ethical theories in medical ethics. Ethical issues arising in the practice of health care delivery will be examined. Codes of ethics and the health professional's obligations to patients, colleagues, employing institutions, and the community will be considered and relevant case studies will be analyzed. (Same as HHS 353.)

CLM 354 HEALTH LAW. (3)

Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HHS/HSM 354.)

CLM 355 FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS. (3)

A review of financial management practices in health care institutions. Course will analyze regulatory and third party reimbursement for financial management, financial management practices, impact of financing mechanisms and practices on health services decision making. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HSM 355.)

#CLM 370 ELECTRONIC HEALTH RECORDS. (2)

The Electronic Health Records course is an undergraduate level introduction to the concepts and trends in health care electronic health records in today's technology driven health care field. Several areas will be introduced that will provide baseline knowledge for EHRs. Topics include Meaningful Use, EHR Adoption, Quality of Care, Workflow, Implementation, Acute Care, Ambulatory Care, Specialty-specific EHRs, Health Information Exchange, and other related topics. It is highly recommended for students to either have experience working in a health care related field or have a health care major or minor. Some exceptions to being in a health care profession would be computer science or related majors in which the student plans to apply the profession in a health care organization or consent of instructor. (Same as HHS 370.)

#CLM 380 LONG-TERM CARE ADMINISTRATION. (3)

An overview of the long-term care industry. Includes a survey of the history and philosophy of long-term care administration. Provides an introduction to and application of regulatory standards. Specializations within the long-term care industry are discussed. Semester Hours 3 (3 lec). Prereq: Admission to CLM Program, CLM Track C, or by consent of instructor.

CLM 405 EPIDEMIOLOGY AND BIostatISTICS. (3)

This course will provide a foundation in the principles and methods of the epidemiological

CLM Clinical Leadership

University of Kentucky

2017-2018 Undergraduate Bulletin

413

KEY: # = new course * = course changed † = course dropped

investigation of disease with special emphasis on the distribution and dynamic behavior of disease in a population. Etiologic factors, modes of transmission and pathogenesis will be examined. Topics to be covered include epidemics and the spread of infectious disease, epidemiological aspects of non-infectious diseases; rates of morbidity and mortality, sensitivity, specificity, and predictive values' strategies used in epidemiological studies to include measures of disease effect, validity, reliability; sampling methods and computer-based biostatistical analysis that emphasize the generalized linear mode and forms of SEM as appropriate for an upper division undergraduate course. Prereq: Completion of CLM 241, CLM 350, and admission to the CLM Program or consent of instructor. (Same as HHS 405.)

CLM 444 LEADERSHIP AND HUMAN RESOURCE MANAGEMENT. (3)

This course focuses on clinical leadership and managerial roles and responsibilities, with particular emphasis on organizational design, theory, and behavior. Human resource management, team leadership, and strategies for promoting employee motivation, loyalty, and productivity will be discussed. Other topics to be discussed include writing a business plan, financial and budgetary considerations, public relations, and quality and productivity. Laboratory compliance, government regulations, and accreditation will also be covered. Prereq: Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor.

CLM 445 QUALITY AND PRODUCTIVITY IMPROVEMENT AND EVALUATION. (3)

A core program course that focuses on leadership and management knowledge, skills, and practices that promote clinical quality, efficiency, and productivity. Methods to measure, monitor, and evaluate quality and productivity will be discussed. Prereq: Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor.

CLM 452 COMMUNITY AND INSTITUTIONAL PLANNING FOR HEALTH SERVICES DELIVERY. (3)

Theoretical foundations for health planning. History of health planning and regulation. Specific attention will be given to integration of institutional planning with community health planning. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting). Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor. (Same as HSM 452.)

#CLM 470 LONG-TERM CARE MANAGEMENT. (3)

An overview of the functional organizational structures common to long-term health care facilities. An examination of the departments in long-term care facilities, chain of command, personnel, regulatory requirements, quality indicators, and the role of the long-term care administrator. Prereq: CLM 241, CLM 350, CLM 351 and CLM 353 Admission to CLM Program or by consent of instructor.

CLM 480 SEMINAR IN HUMAN HEALTH SCIENCES (Variable topic). (1-3)

Study and analysis of current and topical problems and issues regarding the roles, trends and research for health care professionals. May be repeated to a maximum of six credits. Prereq: Admission to CLM or HHS program or consent of instructor. (Same as HHS 480.)

#CLM 495 INTRODUCTION TO THE CAPSTONE. (1)

To be successful in the CLM degree program and the profession, students are expected to demonstrate excellence in communication skills both orally and in writing. CLM 495 (1.0) is a prerequisite for the capstone project (CLM 595 – 3 credit). It is designed to prepare each CLM student to: 1) Define a project/research question, 2) Learn how to conduct an in depth literature review, 3) Construct a detailed outline of your proposed project/research, 3) Understand the methodology needed to conduct your project/research, and 4) Analyze data/information, summarize findings and derive conclusions/summary. The three credit course will follow the next semester and the student will complete the capstone. Prereq: CLM 241. Admission into the CLM Program or consent of instructor.

***CLM 501 PRACTICUM IN CLINICAL LEADERSHIP AND MANAGEMENT. (1-6)**

Students will gain practical general training and experiences in the healthcare workplace with a focus on exposure/experience in clinical leadership and management. The CLM faculty in coordination with the practicum coordinator will arrange these experiences with the site employer/personnel and develop an individualized plan for the student at each site. The plan relates the workplace training and experiences to the student's general and technical course of study. Prereq: Consent of instructor; HHS 102; student must earn a grade of C or better in previous practicum in order to re-enroll in this course. (Same as HHS 501.)

CLM 510 ORGANIZATION OF THE LONG-TERM CARE SECTOR. (3)

This course examines the structure and function of the long-term care sector with emphasis on nursing homes and the role of noninstitutional alternatives. Analysis focuses on the impact of changes in reimbursement and regulatory policy, interorganizational relations, newly emerging treatment modalities, and the influence of the external organizational, economic, and political environment. Prereq: A course in health care delivery systems or permission of instructor. (Same as HSM 510.)

#CLM 570 MANAGING HEALTH ISSUES IN LONG-TERM CARE: TEAM APPROACH. (2)

This course will cover the identification and management of health issues commonly found in long-term care (LTC) settings. Specifically, this course is designed to recognize, screen and identify the most common health issues present in elder residents of LTC facilities. After identification of these health issues, information regarding the appropriate course of action, utilizing appropriate care team resources, to prevent, manage, as well as treat these health issues

will be provided. Common health issues to be covered include unintentional weight loss (malnutrition, frailty); unintentional weight gain (obesity and related co-morbidities); major organ system dysfunction (heart, kidney, lungs, immune, gastrointestinal, endocrine/hormonal); diminished function of 'senses' (vision, hearing/balance and its implications); physical dysfunction (muscle wasting, mobility issues and implications); osteoporosis (bone health, risk of falls); mental decline (depression, dementia/Alzheimer's Disease); social isolation; spiritual support; polypharmacy. Prereq: HHS 101, HHS 102, CLM 241, GRN 250 or consent of instructor. (Same as HSE 570.)

CLM 595 DIRECTED STUDIES. (1-3)

Independent work devoted to research on specific problems, to challenge the student to synthesize concepts from his total program and relate them to his allied health specialty. Conference, one to three hours per week. May be repeated to a maximum of six credits. Prereq: Completion of CLM 241, CLM 350, CLM 351, CLM 353, CLM 354, CLM 355, CLM 405, CLM 444, CLM 445, CLM 452, CLM 495, or consent of instructor. (Same as HSE 595.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CLS Clinical Laboratory Sciences

CLS 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)

Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient's individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as AT 500, HS 500, CNU 500, CD 500, PAS 500.)

CLS 832 BASIC CLINICAL CHEMISTRY. (1)

The study of the theory and practice of clinical chemistry laboratory testing, including quality control, instrumentation principles, problem-solving, and appreciation of accuracy of and confidentiality for patient laboratory findings. Prereq: Admission into the Clinical Laboratory Sciences Professional Program or consent of instructor.

CLS 833 BASIC HEMATOLOGY. (1)

The theory and practice of clinical hematology laboratory testing, including manual and automated procedures, instrumentation principles, quality assurance, and problem-solving. Hematopoiesis, hemostasis, and blood cell function are discussed as they relate to clinical laboratory practice. Special emphasis is placed on the relationship of clinical hematology testing to pathophysiology and on the acquisition of valid test results. Prereq: Admission into the Clinical Laboratory Sciences Program or consent of instructor.

CLS 838 BASIC IMMUNOHEMATOLOGY. (1)

An introduction to the principles and practice of blood banking follows a review of classic genetics and fundamentals of immunology. The course includes didactic instruction in blood group systems; donor selection and component preparation; antibody detection and identification and compatibility testing. Prereq: Admission to the Clinical Laboratory Sciences Program and CLS 835 (or equivalent) or consent of instructor.

CLS 851 BASIC CLINICAL MICROBIOLOGY. (1)

The study of medically significant microbiology, including commensal flora, normal flora and pathogens. Lectures also cover microbial physiology, interactions between host and pathogenic microorganisms, and the clinical and epidemiological consequences of these interactions. Prereq: Admission to the Clinical Laboratory Sciences Program.

CME Chemical Engineering

CME 006 THE ENGINEERING PROFESSION (JUNIOR AND SENIOR). (0)

Activities of the Student Chapter of the American Institute of Chemical Engineers (for junior and senior year chemical engineering students). Lecture: one hour per week. May be repeated three times. Prereq: Chemical engineering major.

CME 101 INTRODUCTION TO CHEMICAL ENGINEERING. (1)

An introduction to the chemical engineering profession including: problem-solving techniques, use of computers, computer problems and lectures by practitioners.

CME 200 PROCESS PRINCIPLES. (3)

A course in material and energy balances, units, conversions, tie elements, recycle, bypass, equations of state, heat effects, phase transitions, and the first and second laws of thermodynamics applications in separation processes involving equilibrium reactions and energy exchange. Prereq: "C" or better in MA 113; "C" average in CHE 105 and 107; prereq or concur: MA 114, PHY 231.

CME 220 COMPUTATIONAL TOOLS IN CHEMICAL ENGINEERING. (3)

An introduction to computational tools used in chemical engineering, such as Microsoft Excel, MATLAB, and Aspen. Prereq: Grade of "C" or better in CME 200.

CME 320 ENGINEERING THERMODYNAMICS. (4)

Fundamentals of thermodynamics, review of first law, second and third laws, VL, LL and SL

equilibria, homogeneous and heterogeneous chemical reaction equilibria. Prereq: MA 213, PHY 231, and "C" or better in CME 200.

CME 330 FLUID MECHANICS. (3)

Introduction to the physical properties of fluids, fluid statics. Equations of conservation of mass, momentum and energy for systems and control volumes. Dimensional analysis and similarity. Principles of inviscid and real fluid flows; flow through pipes and around bodies. Application and design of fluid handling systems. Prereq: Engineering standing; CME 220, 320; MA 214.

***CME 395 SPECIAL PROBLEMS IN CHEMICAL ENGINEERING. (1-3)**

Individual work on some selected problems in the field of chemical engineering. May be taken three times for a total of 9 credit hours. Prereq: Engineering standing and approval of the chairman of the department.

CME 404G POLYMERIC MATERIALS. (3)

Synthesis, structure, and processing of polymers, useful geometric forms, mechanical and thermal properties, crystallinity, polymer blends, evaluation of polymers for specific applications (aerospace, automotive, biomedical), laboratory activities for each of the above. Prereq: Engineering standing, CHE 230 or CHE 236, MSE 301 or consent of instructor. (Same as MSE 404G.)

CME 415 SEPARATION PROCESSES. (3)

Separations based on both equilibrium stage concepts and mass transfer rate control are addressed for a range of chemical process operations, including distillation, gas absorption, extraction, adsorption, and membrane-based processes. Design problems are conceived to require computer-aided modeling and analysis. Prereq: Engineering standing; CME 220, 320.

CME 420 PROCESS MODELING IN CHEMICAL ENGINEERING. (3)

Applications of principles of material and energy balances, thermodynamics, heat and mass transfer, physical chemistry and numerical methods to problems in separation and transport processes and reactive systems. Prereq: Engineering standing; CME 330, 415.

CME 425 HEAT AND MASS TRANSFER. (4)

Fundamental principles of conduction and convective heat transfer, and diffusional and convective mass transfer. Design applications to heat exchanges and packed bed absorbers. Prereq: Engineering standing; CME 330, 415.

CME 432 CHEMICAL ENGINEERING LABORATORY I. (2)

A laboratory course emphasizing experimental work in fluid flow, separations, heat transfer, and mass transfer. A majority of this course will focus on lab report writing, statistics, experimental design and safety in the laboratory. Prereq: Engineering standing; CME 330, CME 415; CHE 230, 231.

CME 433 CHEMICAL ENGINEERING LABORATORY II. (3)

A continuation of CME 432. A laboratory course emphasizing more detailed experiments in fluid flow, heat transfer, mass transfer, separations, and chemical reaction kinetics with more extensive data collection and analysis as well as a design component based on the experimental results. Prereq: Engineering standing; CME 432; concur: CME 550.

CME 455 CHEMICAL ENGINEERING PRODUCT AND PROCESS DESIGN I. (3)

A lecture and problem-solving course emphasizing process economic evaluation, product design, and process synthesis as they apply to chemical units and systems. Appropriate use of software for simulation and design of chemical systems will also be emphasized. Prereq: Engineering standing; concur: CME 550.

CME 456 CHEMICAL ENGINEERING PROCESS DESIGN II. (4)

A lecture and problem-solving course intended to combine the principles of chemical engineering with optimization as they apply to the design of chemical processes. Results of each design case studied will be presented by both oral and written reports. Prereq: Engineering standing; CME 455, 550.

CME 462 PROCESS CONTROL. (3)

Basic theory of automatic control devices and their application in industrial chemical plants is emphasized. Identification of control objectives, appropriate measurements and manipulations, and possible loops between these, requires integration of the control system with the original process design. Interactions between process units are analyzed using well-known analytical tools and design strategies. Prereq: Engineering standing; CME 420, 550.

CME 470 PROFESSIONALISM, ETHICS AND SAFETY. (2)

Detailed lectures and supervised discussions on standards of ethics and safety as they relate to the chemical engineering profession. Emphasis will be on safety in plant design and process operations, laboratory safety, hazardous risk management, regulation and oversight. Prereq: Engineering Standing. Concurrent: CME 455.

CME 505 ANALYSIS OF CHEMICAL ENGINEERING PROBLEMS. (3)

The application of differential and integral equations to traditional and non-traditional chemical engineering problems. Prereq: CME 425, CME 550 concurrent or consent of instructor.

CME 515 AIR POLLUTION CONTROL. (3)

Kinetics and equilibria of photochemical and "dark" atmospheric reactions. Atmospheric statics and dynamics including lapse rates, inversions, and vertical and horizontal air motion. Single and area source diffusion. Stack meteorology. Prereq: CME 320 or ME 220.

#CME 523 CONCEPTS, ASSESSMENT TOOLS

AND METHODS IN SUSTAINABLE POWER AND ENERGY. (3)

A multidisciplinary course presenting an overview of key topics in sustainability and environmental impact assessment for engineers. Topics will include assessment of current and future energy systems, renewable and conventional energy technologies, supply chain management, sustainability metrics, energy assessment tools, environmental impact assessment and life cycle assessment. Topics will be presented and their attributes described within a framework that aids in evaluation and analysis of energy technology systems and designs in the context of political, social, economic, and environmental goals. Prereq: Engineering Standing and Senior Classification or Consent of Instructor. (Same as EGR/MFS 523.)

CME 542 ELECTRIC POWER GENERATION TECHNOLOGIES. (3)

Overview of technologies used for generating electricity from location, recovery, transportation and storage of fuel to the types of technologies used to convert the fuel to electricity. Included is a discussion of the advantages and disadvantages of each technology and how they must adapt to be viable in the future. Technologies covered include coal, natural gas, nuclear, biomass, wind, solar and advanced technologies. Prereq: Engineering standing or consent of instructor. (Same as EGR 542.)

CME 550 CHEMICAL REACTOR DESIGN. (3)

A lecture and problem course dealing with interpretation of rate data and development of performance equations for single and multiple reactor systems. A design problem will be selected for an industrially important chemical reaction system requiring computer solution. Prereq: Engineering standing; CME 420, 425.

CME 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMER SYSTEMS. (3)

Theory and practice as related to the chemical and physical processing of polymer systems. Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer processing operations and materials selection; flow instabilities. Prereq: CME 330, CME 425 or ME 325; or consent of instructor. This course is open only to graduate students or undergraduates with engineering standing. (Same as ME/MFS/MSE 554.)

CME 556 INTRODUCTION TO COMPOSITE MATERIALS. (3)

Modern composite materials and their applications. Basic concepts and definitions. Fundamental properties of fibers and polymer resins. Manufacturing methods. Analysis and design of laminated and chopped fiber reinforced composites. Micro- and macro-mechanical analysis of elastic constants. Failure theory of composite materials. Computational design of composites. Prereq: Engineering Standing, and EM 302 or with instructor permission. (Same as ME/MFS/MSE 556.)

CME 580 DESIGN OF RATE AND EQUILIBRIUM PROCESSES FOR WATER POLLUTION CONTROL. (3)

The design of chemical and physical processes for the removal and concentration of organic, inorganic, and particulate pollutants from aqueous solution/suspension: adsorption, destabilization, disinfection, membrane processes, thermal processes, flow through beds of solids, etc. Prereq: CHE 440G, CME 425 and prereq or concur: CME 550 or consent of instructor.

CME 599 TOPICS IN CHEMICAL ENGINEERING. (3)

A detailed investigation of a topic of current significance in chemical engineering such as: contemporary energy topics, fuels development, membrane science, computer control of chemical processing. A particular topic may be offered twice under the CME 599 number. May be repeated to a maximum of six credits. Prereq: Engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics, and mathematics. For major work, a candidate must hold a bachelor's degree in chemical engineering or its equivalent.

CME 620 EQUILIBRIUM THERMODYNAMICS. (3)

The criteria for physical and chemical equilibria, including: predictive equations, solution theory, chemical activity, coupled chemical equilibria, and external constraints. Emphasis may be on vapor-liquid equilibrium, chemical reaction equilibrium, or complex ionic equilibria in dilute aqueous solutions and suspensions. Prereq: CHE 440G and CME 320 or consent of instructor.

CME 630 TRANSPORT I. (3)

A unified study of physical rate processes in liquids and vapors, including: mass, energy, and momentum transport, transport in chemically reacting systems, similarities, turbulence modeling, buoyance-induced transport and multicomponent diffusion. Prereq: ME 330, CME 425, CME 505 concurrent or consent of instructor.

CME 650 ADVANCED CHEMICAL REACTOR DESIGN. (3)

Rate expressions for heterogeneous reaction kinetics; energy and mass transport within and external to reacting porous catalysts; design equations for multiphase fixed and moving bed reactors. Prereq: CME 550, CME 630, CME 505, or instructor consent.

CME 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3)

A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/EE/MSE 664.)

CME 680 BIOCHEMICAL ENGINEERING. (3)

Course Descriptions

Principles and design of processes involving biochemical reactions, including aerobic and anaerobic respirations and fermentations, and involving pure and mixed cultures. Energy considerations, heat and mass transfer, biochemical kinetics, and application to biological waste treatment. Prereq: CME 550, CME 630, CHE 440G or consent of instructor. (Same as BAE 680.)

CME 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CME 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CME 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CME 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CME 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

CME 771 SEMINAR. (0)
Review of current literature in the field of chemical engineering, general discussion and presentation of papers on departmental research. Lecture, one hour per week. Required for all graduate students in chemical engineering.

CME 779 MEMBRANE SCIENCES COLLOQUIUM. (1)
Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student's own research in particular. May be repeated to a maximum of six credits. (Same as BCH/CHE/PHA/PHR 779.)

CME 780 SPECIAL PROBLEMS IN CHEMICAL ENGINEERING. (1-3)
Independent study, design, or research in chemical engineering topics. May be repeated to a maximum of 12 credits. Prereq: Approval of the departmental director of Graduate Studies.

CME 790 RESEARCH IN CHEMICAL ENGINEERING. (1-9)
Graduate Research in Chemical Engineering on a topic approved by the Departmental Graduate Studies Committee. May be repeated to a maximum of two semesters. Prereq: Consent of the Director of Graduate Studies.

CNU Clinical Nutrition

CNU 400 NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION. (2)
This course will acquaint students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition related issues commonly observed in physically active individuals and nutritional needs to prevent injury and aid healing following injury. Prereq: Admission into the Human Health Sciences Undergraduate Program or consent of instructor; 200 level physiology or equivalent.

CNU 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient's individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as AT 500, HS 500, CLS 500, CD 500, PAS 500.)

CNU 501 NUTRACEUTICALS AND FUNCTIONAL FOODS IN HEALTH AND DISEASE PREVENTION. (2)
The course will cover the classification, brief history and the impact of nutraceuticals and functional foods on health and disease. An example of nutraceuticals to be covered in the course include isoprenoids, isoflavones, flavanoids, carotenoids, lycopene, garlic, omega 3 fatty acids, sphingolipids, vitamin E and antioxidants, S-adenosyl-L-methionine, CLA, creatine, herbal products in foods and lipoic acid. Prereq: Undergraduate organic chemistry and/or biochemistry.

CNU 502 OBESITY C2C: CELL TO COMMUNITY (Subtitle required). (2)

This course will provide an overview of the obesity epidemic from an applied clinical as well as public health perspective. Topics to be covered include etiology, pathophysiology, evaluation, treatment, management, and prevention of obesity throughout the lifecycle.

CNU 503 NUTRITION FOR HEALTH PROFESSIONS. (1-2)
An interdisciplinary/interprofessional approach to applied and medical nutrition therapy and its role in primary, secondary, and tertiary health care delivery. Covers the fundamental principles and concepts of nutrition science as applied to the human life cycle. Prereq: Undergraduate junior, senior and/or graduate students planning to enroll and/or who are currently enrolled in the Colleges of Medicine, Nursing, Dentistry, Pharmacy, Public Health and/or Health Sciences. Completion of at least one semester of physiology, biology, chemistry and/or biochemistry and/or consent of instructor.

CNU 601 INTEGRATED NUTRITIONAL SCIENCES I. (3)
The material covered in CNU/NS 601 consists of three major emphasis areas: (1) review of carbohydrate, lipid, and protein structure, synthesis, absorption, and metabolism, (2) the impact of nutritional influences on macronutrient metabolism to health and disease, (3) the influence of macronutrient metabolism on the regulation of energy balance. Prereq: IBS 601, PGY 206. (Same as NS 601.)

CNU 602 INTEGRATED NUTRITIONAL SCIENCES II. (3)
Integrated study of the properties, metabolism, biochemical and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601, PGY 206. (Same as ASC/NS 602.)

CNU 603 INTEGRATED NUTRITIONAL SCIENCES III. (2)
This course is aimed at providing medical and health professional students with a working knowledge of dietary requirements and guidelines, nutritional assessment and nutritional requirements, food safety issues and nutritional needs throughout the lifecycle. Prereq: Health Professional Graduate Status. (Same as FSC/NS 603.)

CNU 605 WELLNESS AND SPORTS NUTRITION. (3)
Emphasis is directed toward nutrition as applied to prevention of disease through lifestyle management and the application of nutrition in exercise and sport. Targeted focus areas are: body composition and energy expenditure, the metabolic basis of weight management, nutrient needs throughout the lifecycle, the metabolic changes associated with obesity, behavioral management of obesity, nutrient metabolism and exercise, water and electrolyte balance during exercise, nutritional ergogenic aids, nutrition-strength and performance enhancement. Prereq: PGY 412G, and BCH 401G or equivalent or consent of instructor. (Same as NS/PT 605.)

CNU 606 MOLECULAR BIOLOGY APPLICATIONS IN NUTRITION. (2)
Focus will be on the use of the most recently developed techniques and model systems in molecular biology for studying nutrient regulation of gene expression. Examples include current problems in nutrition such as models for engineering plants containing more desirable nutrient sources (fats); for studying effects of various nutrients in transgenic mice on tumor suppressor genes and oncogene expression, that are important in cancer prevention; and for studying nutrient effects on genes that modulate obesity. Prereq: BCH 501 and 502 or equivalent; or BCH 401G and consent of instructor. (Same as NS 606.)

CNU 608 NUTRITIONAL IMMUNOLOGY. (3)
Theories and mechanisms of immunity will be introduced. The effects of nutrition on immunity will be discussed from experimental and clinical perspectives. A lecture and problem-based learning approach with incorporation of student presentations, three hours per week. Prereq: PGY 412G and CNU 601, or consent of instructor. (Same as NS 608.)

CNU 609 ETHICS IN CLINICAL SCIENCES RESEARCH. (1)
Students will examine ethical issues in biomedical research using a case-study approach. Representative issues addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, scientific misconduct, and informed consent. Prereq: Graduate student status. (Same as CD/CLS/PT/RAS 610.) (Same as NS 609.)

CNU 611 ADVANCED MEDICAL NUTRITION THERAPY. (2)
The overall course objective is for the advanced health care professional to gain an in-depth working knowledge and set of skills in medical nutrition therapy of acute and chronic conditions, including pediatrics that builds upon previous applied nutrition course work and/or experience. Prereq: PGY 206 or equivalent; BCH 401G or equivalent; advanced nutrition course or consent of instructor.

CNU 612 ASSESSMENT SKILLS FOR THE CLINICAL NUTRITIONIST. (2)
The goal of this course is to provide the Clinical Nutrition masters student with the skills necessary to elicit a comprehensive medical history, perform basic physical examination techniques appropriate for nutritional assessment, evaluate and interpret laboratory test results, and systematically report their findings in appropriate oral and written formats. Prereq: Admission into the Center for Nutritional Sciences Masters with emphasis in Clinical Nutrition or by consent of instructor.

CNU 613 APPLIED NUTRITION AND DISEASE PREVENTION. (2)
This course is designed to give the medical and health professional student an understanding of the basic principles of normal nutrition and medical nutrition therapy during the course of health and disease. Areas to be covered include: general principles of macro- and micronutrients; the basics of nutritional assessment; the Recommended Dietary Allowances and Dietary Reference Intakes; the "MyPyramid" Food Guide Pyramid; nutritional needs throughout the life cycle; determination of energy and macronutrient requirements; and nutrition for health promotion and disease prevention, e.g., cardiovascular, diabetes, renal, pulmonary, cancer,

AIDS, gastrointestinal; weight maintenance/weight loss. Prereq: Completion of a 400 or 500 level nutrition course or consent of instructor.

CNU 701 NUTRITION AND CHRONIC DISEASES. (4)
Selected topics in nutritional sciences as related to health and chronic diseases, e.g., gastrointestinal disease, cancer, AIDS, diabetes, cardiovascular disease, obesity, including drug-nutrient interactions. Prereq or concur: NS/CNU 601, NS/ASC 602. (Same as NS 701.)

CNU 702 CLINICAL/ WELLNESS NUTRITION PROBLEM-BASED CASE STUDIES. (1-3)
A problem-based learning approach to case studies is integrated with a traditional didactic approach to offer options in therapeutic nutrition, and/or health promotion. Efforts are directed toward patient, worksite and laboratory data interpretation as well as patient education. Students are directed to develop independent critical thinking related to class presentations including case studies regarding rotations through various medical or health services e.g. surgery, pediatrics, nutrition support and health promotion. Prereq: NS/CNU 601, NS/ASC 602, NS/CNU 701, NS/NFS 610 and graduate status or consent of instructor. (Same as NS 702.)

CNU 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1)
This course is designed to develop the student's independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as NFS/NS 704.)

CNU 782 SPECIAL PROBLEMS. (1-6)
Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as NFS/NS 782.)

CNU 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6)
Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as NFS/NS 790.)

COM Communication

COM 101 INTRODUCTION TO COMMUNICATIONS. (3)
An introduction to the process of communication as a critical element in human interaction and in society. Designed to enhance effective communication and informed use of the mass media.

COM 181 BASIC PUBLIC SPEAKING. (3)
A course designed to give the student platform experience in the fundamentals of effective speaking.

COM 199 PRESENTATIONAL COMMUNICATION SKILLS. (1)
Introduces students to fundamental oral communication skills needed to prepare and present messages effectively. Note: This course will not substitute for the three-credit course COM 181, Basic Public Speaking. It will count toward partial completion of the oral communication skills component of the University Studies Program.

COM 249 MASS MEDIA AND MASS CULTURE. (3)
An examination of the interplay between the technology and content of the mass communication media. Prereq: COM 101 or its equivalent.

COM 252 INTRODUCTION TO INTERPERSONAL COMMUNICATION. (3)
This writing intensive course examines basic verbal and nonverbal concepts affecting the communication process between individuals in various interpersonal contexts. Course also requires participation in written and oral activities designed to develop and improve interpersonal skills. Topics may include: perspective-taking, relationship and conversation management, effective listening, conflict management, communication climate, communication anxiety, and cultural/gender differences in interpersonal communication.

COM 281 COMMUNICATION IN SMALL GROUPS. (3)
A study of communication processes in small group situations. Topics include conflict, leadership, and decision-making. Students will participate in group discussion and develop skills in analyzing group performance.

COM 285 APPLIED PHONETICS. (3)
Study of the phonetic structure of English language with requirement of mastery of international Phonetic Alphabet. Emphasis will be placed on phonetic transcription, and application will be made for students interested in general speech, speech correction, radio, television, and theatre.

COM 287 PERSUASIVE SPEAKING. (3)
A study of the processes involved in attitude change, with emphasis on the preparation and delivery of persuasive messages.

COM 311 TAKING CONTROL OF YOUR HEALTH: PATIENT-PROVIDER COMMUNICATION. (3)
This course helps students explore, understand, and appreciate the patient-provider relationship through an examination and analysis of selected health communication case studies and related materials. It is also designed to improve communication skills with and among physicians, nurses, and allied health professionals.

COM 312 LEARNING INTERCULTURAL

COMMUNICATION THROUGH MEDIA AND FILM. (3)
This course examines intercultural and co-cultural divides using a skills-based approach. Students will be exposed to cultural communication situations and will apply skills using lecture, discussion, and various media (e.g., news, radio, film, blogs), equipping them with more effective skills for communicating with other groups, communities, and cultures.

COM 313 INTERPERSONAL COMMUNICATION IN CLOSE RELATIONSHIPS. (3)
This course focuses on describing and explaining communication processes that occur within the context of close relationships. Three general topic areas include: (1) developing and escalating relationships, (2) satisfying relationships, and (3) coping with relational challenges.

COM 314 THE DARK SIDE OF INTERPERSONAL COMMUNICATION AND RELATIONSHIPS. (3)
Provides an overview of research and theory related to the "dark side" of interpersonal communication and relationships. This course will cover topics such as secrets, bullying, cyberstalking, verbal abuse, and revenge between romantic partners, family members, friends, and sometimes strangers.

COM 315 UNDERSTANDING WORKPLACE COMMUNICATION IN A DIVERSE U.S. SOCIETY. (3)
Understanding workplace communication in U.S. society requires an interdisciplinary approach in preparing students to developing an enlightened consideration of the complex and contextual nature of communication in organizations. The emphasis on community, culture and citizenship is designed to engage students using dynamic learning experiences such as debates and discussion over topics relevant to the role of communication and organizations in U.S. society.

COM 316 EMERGENCY AND DISASTER COMMUNICATION: HUMANITY IN A ZOMBIE APOCALYPSE. (3)
The purpose of this course is to develop an applied humanistic understanding of communication and life skills for high-stress situations. Using the apocalypse as a metaphor for all-hazards scenarios, historical narratives of disaster and films and novels in the zombie genre are used to discuss emergency preparedness and survival strategies. Students will demonstrate an ability to analyze the rhetorical situation of apocalypse, engage in emergency and disaster planning, response, and recovery assignments, activities, and exercises including developing emergency evacuation plans, preparing emergency kits and bug-out bags, and exercising medical triage and first aid.

COM 317 COMMUNICATION IN FAMILY AND MARITAL RELATIONSHIPS. (3)
The goal of this course is to provide you with an in-depth understanding of the communication processes that take place in families and marriage (which includes, straight, gay, and common-law relationships). Emphasis is placed on the theoretical explanations of communication processes and on their practical application through communication behaviors that enhance familial interactions. The course reviews communication theories and theories from allied disciplines that have been employed in scholarly research of families and marriages. What you learn in this course will improve the quality of your family and marriage communication and relationships.

COM 318 COMMUNICATION AND SPORT. (3)
This course is designed to explore in depth the relationship between communication and sport. We will examine theories of communication and their connection to sport. The class will examine the relationship between sport and race, gender, class, violence, community, and society along how communication influences how we interact and engage them.

COM 325 INTRODUCTION TO ORGANIZATIONAL COMMUNICATION. (3)
Designed to introduce students to basic concepts in the study of organizational communication. The course considers approaches to the practice and study of communication within organizational settings, including classical approach, human relations, human resources approaches, systems approaches, cultural approaches, and critical approaches. It also introduces specific issues within the study of organizational communication, including assimilation, decision-making, conflict, change, emotion, cultural diversity and communication technologies. Prereq: Communication major; others need departmental approval.

COM 326 COMMUNICATION STRATEGIES FOR PROFESSIONAL EXCELLENCE. (3)
Communication Strategies for Professional Excellence introduces students to a variety of technical and business theories and practices designed to be applicable to business communication in the real world. This course is focused on communication strategies to use once the job has been secured, rather than those to get the job (i.e., resume, cover letter, interviewing). Specifically, the course teaches the fundamentals of good business communication, including protocols for writing media notices/releases, marketing copy, business letters, memoranda, electronic mail, thank you notes, apology letters, persuasive messages, and business plans. Throughout these writing assignments, you will also become acquainted with the strategies used by communication professionals such as functions of media, employee, community, government, investor, and consumer relations. In addition, there will be instruction in oral presentation and in depth practice on both an individual and a collaborative basis. Finally, students will also learn tactics for running a business meeting, dealing with organizational conflict, and finding ways to enhance their business communication through technically based media. Prereq: Upper Division standing in the Communication Major. ADDITIONALLY, completion of all COMBA/BS pre-major requirements. Specifically: COM 101, COM 249, COM 252, CIS or WRD 110, CIS or WRD 111. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to

be eligible for automatic transfer credit to UK.

COM 350 LANGUAGE AND COMMUNICATION. (3)

An introductory survey course covering syntactic, semantic and pragmatic aspects of language as they relate to communication. Language learning, sign typologies, psycholinguistics, and the nature of meaning are selected topic areas. Emphasis is on behavioral, communication approach. Not open to students who have completed a 300-level (or above) linguistic class.

COM 351 INTRODUCTION TO COMMUNICATION THEORY. (3)

Considers various theoretical perspectives which lead to a more thorough understanding of communication processes. Begins with discussion of the development of theory and inquiry. Includes perspectives of systems, cognitive, behavioral, affective, symbolic interactionist, dramatic, cultural and social reality, interpretive and critical theories. Prereq: Upper Division standing in the Communication Major. ADDITIONALLY, completion of all COMBA/BS pre-major requirements. Specifically: COM 101, COM 249, COM 252, CIS or WRD 110, CIS or WRD 111. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

COM 352 INTERPERSONAL COMMUNICATION AND SOCIAL MEDIA. (3)

With the proliferation of technologically advanced social media (e.g., facebook, chat, twitter) available at the fingertips of individuals through multiple channels (e.g., phone, ipad, laptop, online video games), interpersonal relationships are being affected. Negotiating this relatively new, understudied, and quickly evolving terrain can present relational difficulties for a variety of relationships types. Students in this class will gain a thorough understanding of multiple communication platforms and the communication theory that can explain the interactions occurring in each platform, as well as improve their mediated communication skills to enhance interpersonal relationships. Prereq: CIS 110, CIS 111, COM 252.

COM 365 INTRODUCTION TO COMMUNICATION RESEARCH METHODS. (3)

An introduction to the methods of philosophy of scientific research into the origins, nature, and effects of communication processes. Provides skills necessary for designing research projects and for interpreting and critically evaluating research results. Prereq: STA 210.

COM 381 COMMUNICATION, LEADERSHIP, AND ENTREPRENEURSHIP. (3)

This course provides an introduction to the study and practice of leadership from an entrepreneurial and communication perspective. Course activities will cover, 1) the basic concepts essential to personal skills development and organizational leadership behavior, 2) the theory component, and 3) the practical process of leadership and entrepreneurship. The course is designed to introduce students to leadership perspectives and the role communication plays in effective leadership and entrepreneurial strategies. The course explores communication variables involved when leaders attempt to influence members to achieve a goal. Topics include power, credibility, motivation, research on leader traits, styles, and situations, innovation strategies, organizational dynamics, creative problem solving, and current models of leadership. The different leadership challenges posed by different group and organizational types will also be explored.

COM 390 COMMUNICATION EDUCATION ABROAD (Subtitle required). (1-6)

Communication education abroad is an academically rigorous and experientially rich opportunity for students to work with a UK faculty member by participating in a formal study abroad course, research program, or service project related to one or more of many communication theories, concepts, and skills. Any communication education abroad offering will be grounded firmly in the communication discipline in ways designed to enrich one's understanding of how individual and local communication norms and practices both shape and are shaped by global trends, communication, and interactions. Prereq: CIS 110 and CIS 111 or approval from instructor.

COM 395 INDEPENDENT WORK. (1-3)

Research and study of special topics in communication. The student proposes the specific study to be undertaken and formally contracts with a faculty supervisor for guidance and evaluation. Ordinarily, projects will require the production of written materials as a basis for the evaluation. May be repeated to a maximum of six credits. Prereq: Communication major, departmental approval, and completion of learning contract prior to registration.

COM 399 INTERNSHIP IN COMMUNICATION. (1-6)

Provides field-based experience in communication through work in industry, government, education, etc. Pass-fail only. May be repeated to a maximum of six credits. A maximum of three credit hours may be counted toward the communication major. Prereq: Consent of Department Internship Director prior to registration, and completion of departmental learning contract.

COM 425 COMMUNICATION, NEGOTIATION, AND CONFLICT MANAGEMENT IN ORGANIZATIONS. (3)

This course explores the role of communication in negotiation and conflict management in organizations. The course examines conflict theories and approaches, negotiation processes, and third party intervention through the study of strategies and tactics, interaction processes, phases and stages of negotiation development and conflict framing. The course examines strategies and tactics used in exchange of offers and counteroffers, salary negotiations, buying and selling of products, team bargaining, and multiparty negotiations. Prereq: COM 326 or COM 351.

COM 449 SOCIAL PROCESSES AND EFFECTS OF MASS COMMUNICATION. (3)

This course examines the relationship between the organization of modern society and its communication media with special emphasis on cultural processes and social change. The social-psychological bases of communication are studied within a context of theory and research. Prereq: COM 326 or COM 351.

COM 452 STUDIES IN INTERPERSONAL COMMUNICATION. (3)

Examines current theory and research on the nature and development of interpersonal communication ability. Topics include: understanding strategic communicative relational communication elements, and cultural and institutional influences on the development of interpersonal communication. Prereq: COM 326 or COM 351.

COM 453 DIGITAL AND MASS COMMUNICATION MEDIA LITERACY. (3)

A course designed to examine theory and research related to criticism of the mass media and to the relationship of digital and mass communication to contemporary social issues. Prereq: CIS 110, CIS 111, COM 249.

COM 454 HONORS SEMINAR IN COMMUNICATION (Subtitle required). (3)

Intensive study of a communication topic in professional, theoretical, and research methodology areas of communication. This seminar WILL count toward a Communication major and toward credits for graduation. Prereq: COM 326 or COM 351.

COM 462 INTERCULTURAL COMMUNICATION. (3)

An overview of problems, issues, processes and assumptions involved with communicating across cultures and co-cultures. Theories of cognition and communication will be used to explore and explain communication with people from diverse cultures. Differences in both verbal and nonverbal communication among different cultural groups will be discussed. Prereq: COM 326 or COM 351.

COM 471 INTRODUCTION TO HEALTH COMMUNICATION. (3)

This course examines theory and research relevant to health communication including interpersonal, organizational, and mass communication approaches. Topics include the role of communication in general models of health and illness, the relationship between patients and healthcare providers, social support, and health campaigns.

COM 482 STUDIES IN PERSUASION. (3)

This course examines theory and research of persuasion. Topics include message characteristics, credibility, compliance-gaining, decision-making and motivational appeals. Prereq: COM 326 or COM 351.

COM 525 ADVANCED ISSUES IN ORGANIZATIONAL COMMUNICATION (Subtitle required). (3)

Examines theory and research relevant to understanding advanced issues in organizational communication. Topics may include strategies of innovation, organizing, networking, decision-making, globalization, technology, power, and diversity. Prereq: COM 326 or COM 351.

COM 535 RISK AND CRISIS COMMUNICATION. (3)

This course examines strategic risk and crisis communication research, theory, and practices. Special emphasis is placed on crisis planning, media relationships, image restoration, ethical responses, and organizational learning. Prereq: COM 325 and COM 326 or COM 351.

COM 553 CRITICAL ANALYSIS OF COMMUNICATION AND PERSUASION IN POPULAR CULTURE. (3)

This course focuses on what and how popular culture entertainment media functions to communicate and persuade. Forms to be examined may include films/movies, television programs, music, cartoons, and/or comics. Ultimately, students will be equipped with tools to make educated decisions as critical consumers of the messages conveyed in popular culture entertainment media. Prereq: COM 326 or COM 351.

COM 571 INTERPERSONAL COMMUNICATION IN HEALTH CONTEXTS. (3)

Examines theory and research relevant to the role of interpersonal communication in managing mental and physical health. Topics related to interaction in health contexts include: communicating identity in health and illness, health and personal relationships, health care provider/patient communication, medical decision-making, and interpersonal health education and prevention efforts. Prereq: CIS 110, CIS 111, COM 471.

COM 572 HEALTH COMMUNICATION CAMPAIGNS AND COMMUNITIES. (3)

This online course focuses on the role of the mass media in contemporary public health campaigns. Most class sessions focus on the application of theory and research to the design of these campaigns. Earlier studies examining the role of the mass media in health campaigns indicated that the mass media played a small and rather insignificant role in changing health behaviors. However, more recent studies indicate that careful targeting combined with formative research often yield successful behavior change. Prereq: CIS 110, CIS 111.

***COM 581 TEAMWORK AND LEADERSHIP IN ORGANIZATIONS. (3)**

Examines theory and research on the nature and development of small group communication. Topics include leadership, interpersonal relations and roles, goals, and decision-making in multiple organizational contexts. Communication major or permission of instructor required for enrollment. Prereq: COM 325 AND completion of the major graduation communication and composition in the communication major requirement (COM 326 or COM 351).

COM 584 TEACHING OF COMMUNICATION. (3)

This course uses communication research and theory to develop effective instructors of communication. Topics include instructor identity, course development, teaching communication contexts (e.g., small group, intercultural, persuasion, speech) in diverse settings (e.g., classroom, organizational training), managing learners, and learning assessment. Prereq: COM 326 or COM 351.

COM 591 SPECIAL TOPICS IN COMMUNICATION (Subtitle required). (1-3)

Intensive study of a specialized topic area in communication. May be repeated to a maximum of six credits under different subtitles. Prereq: COM 326 or COM 351.

CPE Computer Engineering**CPE 282 DIGITAL LOGIC DESIGN. (4)**

Boolean algebra; number systems; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using digital logic. Laboratory experiments reinforce the course content. Lecture, three hours; laboratory, one three-hour session. Prereq: EGR 102 or equivalent programming course. (Same as EE 282.)

CPE 287 INTRODUCTION TO EMBEDDED SYSTEMS. (4)

Introduction to Embedded Systems teaches students how to use microcontrollers to interact with the physical world. Lectures will cover the theory behind microcontroller architecture, programming, and interfacing and lab projects will back up that theory with hands-on design experiments using microcontrollers. Topics include assembly language and high-level language programming, address decoding, hardware interrupts, parallel and serial interfacing, analog I/O, and basic real-time processing. Prereq: EE/CPE 282 and prereq or concur: CS 215 or consent of instructor. (Same as EE 287.)

CPE 380 COMPUTER ORGANIZATION. (3)

Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: CS 215 and EE/CPE 282 or EE 280. (Same as CS/EE 380.)

CPE 480G ADVANCED COMPUTER ARCHITECTURE. (3)

This course focuses on advanced computer architectures and low-level system software. Topics include RISC architectures, vector and multiprocessor architectures, multiprocessor memory architectures, and multiprocessor interconnection networks. Peripheral devices such as disk arrays, NICs, and video/audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, linkers, and loaders. Prereq: CPE/CS/EE 380. (Same as CS 480G and EE 480.)

CPE 490 ECE CAPSTONE DESIGN I. (3)

The first semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Topics important in product design and manufacturing are included, including considerations of economics, safety, and communication. Students are expected to formally propose a design project that includes a problem definition that incorporates engineering standards and realistic constraints. Students work in teams to develop and complete the designs. Lecture, two hours; laboratory, three hours per week. Prereq: Engineering standing and completion of all other required 400-level EE/CPE courses, excluding EE/CPE 491. (Same as EE 490.)

CPE 491 ECE CAPSTONE DESIGN II. (3)

The second semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Students work in teams to develop and complete the designs. Topics to include engineering ethics, design, documentation, and communication. Prereq: EE/CPE 490 completed in the previous semester and Engineering standing. (Same as EE 491.)

CPE 580 EMBEDDED SYSTEM DESIGN. (3)

Embedded System Design covers the design and implementation of hardware and software for embedded computer systems. Topics include architectural support for embedded systems, power management, analog and digital I/O, real-time processing design constraints and the design of embedded systems using a real-time operating systems. Prereq: EE/CPE 287, EE/CPE 380, and engineering standing or consent of instructor. (Same as EE 580.)

CPE 584 INTRODUCTION OF VLSI DESIGN AND TESTING. (3)

Introduction to the design and layout of Very Large Scale Integrated (VLSI) Circuits for complex digital systems; fundamentals of the VLSI fabrication process; and introduction to VLSI testing and structured design for testability techniques. Prereq: Engineering standing or consent of instructor. (Same as EE 584.)

CPE 585 FAULT TOLERANT COMPUTING. (3)

Students in this course study the theory and practice of fault-tolerant and dependable computing systems. The course will introduce sources of faults, error and failures in computer controlled systems and approaches to design masking and recovery techniques at the hardware, software, and systems level. Prereq: EE/CPE 380 and engineering standing or consent of the instructor. (Same as EE 585.)

CPE 586 COMMUNICATION AND SWITCHING NETWORKS. (3)

Fundamentals of modern communication networking and telecommunications, data transmission, multiplexing, circuit switching networks, network topology routing and control,

computer communication, packet switching networks, congestion control, frame relay, ATM switching networks, traffic and congestion control. Prereq: EE/CPE 282 and engineering standing. (Same as EE 586.)

CPE 587 ADVANCED EMBEDDED SYSTEMS. (3)

An advanced course in the design of embedded systems using state-of-the-art microcontroller hardware and software development tools. Topics include architecture support for real-time operating systems, language support for embedded and real-time processing, embedded and wireless networking. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as CS/EE 587.)

CPE 588 REAL-TIME COMPUTER SYSTEMS. (3)

This course covers features typically found in real-time and embedded systems. Topics include real-time operating systems, scheduling synchronization, and architectural features of single and multiple processor real-time and embedded systems. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as EE 588.)

CPH College of Public Health**CPH 201 INTRODUCTION TO PUBLIC HEALTH. (3)**

This course provides the student with basic knowledge about the discipline of public health. After receiving a philosophical and political orientation to public health, students will begin to acquire functional knowledge of the strategies most often applied in public health practice. Key content areas (such as HIV prevention, maternal and child health, reducing obesity rates, and reducing tobacco addiction) will become focal points for the investigation of these strategies.

CPH 202 PUBLIC HEALTH THROUGH POPULAR FILM. (3)

This course will provide students with an introductory understanding of public health concepts through critical examination of popular cinema and instruction in basic public health principles, disease principles, and behavioral and social interactions related to the movie topics. A combination of lectures, readings and film viewing will enable students to understand the relationship between behavioral, environmental, biological and other risk factors with disease, injury or other health outcomes. The effect of social, economic and health systems context will also be examined. In addition, students will learn to distinguish between fact and fiction with regard to the science and activities of public health as portrayed in cinema.

CPH 203 SEXUAL HEALTH. (3)

This course will be an in-depth introduction to the relationship of sex and sexual behaviors to health and wellness.

CPH 309 HEALTH, HISTORY, AND HUMAN DIVERSITY. (3)

Health care reform is often in the news, and everyone has an opinion on why the system is broken, how to fix it, who should have access to good medical care, under what circumstances, and what constitutes "good care." This online, multi-format course will consider what it has meant to be a good patient or a good doctor at various points in U.S. history, who was included or excluded in each group, how medicine became professionalized, and how people have organized around health issues. Students will engage with primary sources, watch related films, interact with the professor during virtual "office hours," and participate in online moderated discussions. (Same as GWS 309.)

CPH 310 DISEASE DETECTIVES: EPIDEMIOLOGY IN ACTION. (3)

This course will outline the history of epidemiology as a science and examine its wide-ranging contributions to the fields of public health, medicine, and the social sciences. This course will focus on epidemiological methods to investigate health outcomes and identify associated and causative factors of disease in populations.

CPH 315 CHRONIC DISEASE EPIDEMIOLOGY. (3)

This course is an introduction to the epidemiology of chronic diseases including but not limited to cardiovascular disease, cancer, and diabetes, with a focus upon chronic disease surveillance and risk factors. Prereq: CPH 310 or equivalent (with permission from instructor).

CPH 320 FUNDAMENTALS OF ENVIRONMENTAL HEALTH. (3)

An overview of the physical factors that influence human health, including hazards from unsanitary water, polluted air, traumatic injury hazards, toxins, radiologic risks, and other features of the natural and human made environment that can kill, injure, maim, and cause disease in human populations. Special focus is given to understanding the relationships between biological, chemical, and other factors that produce unhealthy environments that sicken individuals throughout their lifespan. Additional topics include the important influence of environmental hygiene, restaurant inspections, occupational safety and health issues, clean water standards, air pollution regulations, and other laws and regulations that protect the health and safety of human populations. Prereq: BPH Majors only.

#CPH 330 HEALTH ANALYTICS I. (3)

CPH 330 focuses on applying methods for solving public health analytical problems. This course will build on the statistical principles and scientific reasoning introduced in introductory statistics courses, but will focus on the application of methods for categorical data analysis. Topics include data visualization, exploratory data analysis, summary statistics, statistical testing, estimation, confounding, and the use of regression models commonly encountered in public health. An emphasis on data analytic methods will also introduce students to the use of statistical software. Prereq: BPH Majors only or permission of instructor.

#CPH 350 INTRODUCTION TO HEALTH CARE ORGANIZATION AND POLICY. (3)

This introductory course exposes students to the various components of the U.S. health care system and its history, current status, proposed policy solutions, and expanding focus on improving population health. The course begins by describing the contribution of health care to population health. Next, the course discusses how the organization of services influences health care access, quality, and efficiency. It follows with a review of the complexities of the organization of the health care system, including the inter-relationships between health care providers, health insurance and financing, and political forces. Prereq: ECO 201.

CPH 351 PREPARING FOR AN APOCALYPTIC EVENT: POPULATION HEALTH AND CRISIS MANAGEMENT. (3)

Students enrolled in this course will participate in in-depth analyses of multiple large-scale disasters. This course will provide students with the knowledge necessary to participate in all phases of the crisis management process, as overseen by a health service organization. Case studies will be utilized heavily throughout this course and students will have the opportunity to engage in discussion with various health professionals from around Kentucky who engage in crisis management activities. Prereq: CPH 201 or permission of the instructor.

CPH 365 SPECIAL TOPICS IN PUBLIC HEALTH (Subtitle required). (3)

This course provides focused coverage within domains of public health, including: Health Behavior; Epidemiology; Gerontology; Environmental Health; Health Services Management, and Biostatistics. A central goal of these special topics courses is to provide a public health context to material in a way that promotes applicability to undergraduate majors university-wide.

CPH 395 UNDERGRADUATE INDEPENDENT STUDIES IN PUBLIC HEALTH. (1-3)

This course offers students the opportunity to independently promote learning in public health content areas and/or skills that are not covered by formal courses within the college. Students typically work with an individual faculty member to develop specialized or advanced knowledge or skills, or to identify, design and/or conduct research. Students must coordinate with a faculty member to complete a Prospectus for Research/Independent Study prior to registering for CPH 395. This course may be repeated for a maximum of 6 semester hours. Prereq: A minimum of 60 credit hours completed or junior level standing and permission of instructor.

CPH 410 EPIDEMIOLOGY IN THE WEB OF CAUSATION: PEOPLE, PLACE, AND POLITICS. (3)

This course will provide an interdisciplinary introduction to applications of epidemiology in the context of political, community, social, and behavioral influences on health. Epidemiology is the study of patterns of diseases, injury, and other indicators of health in human populations. The course will review principles and introduce novel methods used in epidemiologic research. Students will learn approaches to collecting data about sensitive health behaviors, examining social networks, integrating information from interviews and focus groups, and collecting spatial data using a smart phone application. These topics will be explored using a range of case examples, including infectious disease, humanitarian crises, sexual health, substance abuse, obesity, and others. Prereq: Introduction to Public Health (CPH 201) and Disease Detectives (CPH 310) or equivalents (instructor permission required) should be taken before or at least concurrently with this course.

CPH 423 HEALTH OF KENTUCKIANS. (3)

This course provides an overview of the determinants, factors, and remedies to the traditionally poor health status of Kentuckians. The course focus is on population health of the Commonwealth, with an emphasis on data, trends and solutions to illness, death and disability. Other topics include health rankings, vital statistics and demographic factors. The comparison of Kentucky's population health status to the US average and to other states is presented, plus strategies to improve population health in the Commonwealth. Additional topics include the relationship between Kentucky's demographic, economic, environmental, and education characteristics and their impact on health.

CPH 440 FOUNDATIONS OF HEALTH BEHAVIOR. (3)

This course will provide students with an overview of how the social and behavioral sciences contribute to primary prevention in the rapidly expanding field of health behavior. Emphasis will be placed on theory-driven approaches that are supported by empirical investigations. Students will acquire a working knowledge of foundational theories used in public health practice as well as the ability to measure key theoretical constructs. The course includes an overview of public health issues in the United States. The course also includes training regarding the translation of research findings into public health practice. Prereq: BPH Majors only.

CPH 441 THE SMOKING GUN: TOBACCO AND THE PUBLIC'S HEALTH. (3)

This course will provide a theoretical, cultural and economic rationale for the role of tobacco smoking related to the overall health of US populations in the United States and abroad. This course will examine trends in tobacco smoking from the 1960's to present day and how social and political forces have both directly and indirectly undermined the current public health agenda—to reduce, minimize, and eventually eradicate tobacco related chronic disease and death worldwide. Students will acquire the necessary tools to identify the scientific literature on smoking and disease through traditional published literature, tobacco websites, and national data sets. Prereq: Junior or Senior undergraduate in good academic standing, recommendation of advisor or permission of instructor.

CPH 450 MANAGING HEALTH ORGANIZATIONS TO IMPROVE POPULATION HEALTH. (3)

This course will introduce students to a number of foundational concepts related to leadership and management, specifically in the realm of health organizations (e.g., local and state health departments, hospitals, community clinics, etc.). In particular, this course will explore the areas of managing human and non-human resources, and improving agency performance. Students will have the opportunity to interact with managers and organizational leaders from a variety of health service agencies. Prereq: CPH 201 or permission of the instructor.

CPH 470 PUBLIC HEALTH CAPSTONE. (3)

This course will provide students with training in the practice of conducting literature reviews and in the process of synthesizing reviewed materials into a coherent and timely manuscript. Literature reviews will be focused on core areas within public health such as the prevention of cardiovascular disease, obesity, cancer, and diabetes. Students will draw upon previous coursework in public health to fully understand one clearly defined area of scientific inquiry regarding the prevention of disease at the population level. Using their past acumen of acquired knowledge, students will acquire the cognitive skills needed to analyze and synthesize literature into a simplified and cohesive manuscript that offers practical and evidenced-based conclusions for public health practitioners. They will also acquire professional skills needed for academic presentation of review findings to audiences of public health peers and professionals. Prereq: BPH majors only plus HSM 241, CPH 310, CPH 320, CPH 330 and CPH 440. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CPH 472 PUBLIC HEALTH PROFESSION AND PRACTICE. (3)

This course familiarizes students with the practice of public health, introducing them to the various settings and arenas in which public health professionals work. Through guest lectures and discussions with professionals in the field, students gain exposure to the roles and responsibilities of the public health workforce as well as its interconnection with other professions including medicine, nursing, pharmacy, dentistry, engineering, social work, and communications. Students will assess their own interests, skills, and personality to explore and describe their own career goals. Prereq: BPH Majors only plus CPH 470.

CPH 476G A SICK WORLD: GLOBAL PUBLIC HEALTH IN THE EARLY 21ST CENTURY. (3)

This course provides students with basic knowledge about the issues of global public health and its importance to all peoples of the globe. After receiving an introduction to the principles and goals of global public health, students will begin to acquire functional knowledge of the theoretical and methodological underpinnings of global public health practice. Key content areas such as health determinants, issues of health, education, and poverty, ethical and human rights concerns, the impact of culture on global public health, the burden of disease on the global human population, and other pertinent global public health topics will become focal points for class discussion. This course will emphasize theory-driven empirical investigation of key behavioral issues that influence the health and well-being of people around the globe. Case studies of global public health issues will be utilized. Prereq: BPH Majors only or by permission of the instructor.

CPH 535 DATABASES AND SAS PROGRAMMING. (3)

Students will learn how to construct and maintain databases with applications to public health. They will also learn how to program in SAS, the leading statistical analysis system. SAS skills include report writing, MACRO writing, and Programming using SAS Intranet. Lecture, two hours; laboratory, two hours per week. Prereq: STA 291 or equivalent.

CPH 551 COMPARATIVE HEALTH SYSTEMS. (3)

An overview of healthcare system structure in selected countries with attention to their developmental history, financing, and delivery infrastructure.

#CPH 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH.

Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: 3 credits of basic biology (BIO 103 or BIO 148 or equivalent) or permission of instructor. (Same as BIO/ENT 561.)

#CPH 565 SPECIAL TOPICS IN PUBLIC HEALTH: (Subtitle required). (3)

This course provides focused coverage within domains of public health, including, but not limited to: Biostatistics; Epidemiology; Gerontology; Health, Behavior & Society; Health Management & Policy; and Preventive Medicine and Environmental Health. A central goal of these special topics courses is to provide a public health context to material in a way that promotes applicability to undergraduate and graduate students university-wide.

CPH 580 BIostatISTICS I. (3)

CPH 580 covers univariate statistical methods commonly encountered in public health studies. This includes descriptive statistics, hypothesis testing, paired and unpaired t tests, ANOVA, contingency tables, log rank test, regression and correlation. Prereq: MA 109 or higher. (Same as STA 580.)

***CPH 600 HEALTH SERVICES AND SYSTEMS ORGANIZATION. (3)**

An introduction to the health care delivery system in the United States, including its composition, functioning, the interrelationships of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: Enrollment in a College of Public Health degree program or certificate program (or permission of instructor).

CPH 601 ENVIRONMENTAL HEALTH. (3)

An introduction to the theory and practice of assessing, correcting, controlling, and preventing environmental health hazards that may adversely affect the health of current and future generations. Prereq: Undergraduate chemistry and biology, or permission of instructor. (Same as ES 620.)

CPH 603 BIostatistics Concepts AND APPLICATIONS IN PUBLIC HEALTH. (3)

This course covers topics relating to applications of biostatistics in public health. It provides a conceptual introduction to statistical methods commonly used in public health practice. Topics include data visualization, summary statistics, statistical testing, estimation, confounding, and an introduction to regression (linear, logistic, proportional hazards). Prereq: MA 111 or equivalent.

CPH 604 FOUNDATIONS OF HEALTH BEHAVIOR. (3)

This course will demonstrate how changes in health behavior can and do impact population-level indicators of morbidity and mortality. Students will acquire the necessary tools to identify priority needs for health promotion, design health programs, and to implement and evaluate these programs. Students will be able to make clear linkages between health promotion practices and the overarching goals of public health. Selection and design of strategies will be achieved through an understanding of theory-based approaches that have been widely applied in health promotion research. The course will also introduce students to various methods that can be used to plan, measure, and evaluate health promotion programs. Prereq: Admission to MPH program or permission of instructor.

CPH 605 EPIDEMIOLOGY. (3)

This is an initial graduate level course in the principles of epidemiology and applications in preventive medicine and environmental health. The course consists of lectures and informal discussions. Principles and methods of epidemiologic research with a focus on issues of study design and analysis will be presented. Prereq: Graduate student in good standing in the MPH program, MSPH program, or community health nursing, or consent of instructor.

CPH 608 PUBLIC HEALTH CAPSTONE. (3)

To be successful in the MPH degree program and the profession, students are expected to demonstrate excellence in communication skills both orally and in writing. The 'manuscript' format for the capstone project is intended to familiarize students with the rigors of preparing manuscripts for professional journals. This course provides course credit for students who successfully complete the MPH capstone project and oral final examination. Prereq: MPH students only.

CPH 609 PUBLIC HEALTH PRACTICUM. (3 or 6)

The public health practicum is designed as an integrative experience in the workplace. The practicum is an opportunity to apply classroom theories and methods under the guidance of an experienced public health practitioner with faculty oversight. Prereq: Admission to MPH program or permission of instructor.

CPH 610 INJURY EPIDEMIOLOGY AND CONTROL. (3)

The epidemiological basis for understanding the distribution and determinants for traumatic injury and poisonings including both intentional and unintentional events. Topics include sources of data, methodological approaches to studying injuries, evaluation of injury interventions and the link between epidemiology and public health policy impacting injuries. Prereq: PM 620 and/or permission of instructor.

CPH 611 ADVANCED EPIDEMIOLOGY. (3)

This course provides specialized epidemiologic content and method designed to meet the research and practice needs of health professionals. Practice-based problem sets and hands-on computer assignments will complement this seminar-oriented course, focusing on the role of epidemiology in the prevention of disease and injury. Prereq: CPH 605 or consent of instructor. (Same as PM 621.)

CPH 612 INFECTIOUS/EMERGING DISEASES EPIDEMIOLOGY. (3)

The theory/concepts of infectious diseases epidemiology, such as epidemic modeling expostulated through a systematic study of the more recent emerging diseased. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 613 MOLECULAR EPIDEMIOLOGY, CANCER PREVENTION AND CONTROL. (3)

This course consists of didactic lectures, journal clubs, and small group round table discussions related to the principles of underlying biomarker discovery and development for cancer prevention and control. The overarching goal of this course will be to assess how biomarkers are developed and used for the risk assessment, early detection, diagnosis, prognosis, and theragnosis of cancer. Prereq: CPH 605 or consent of instructor.

CPH 614 MANAGERIAL EPIDEMIOLOGY. (3)

This course applies and integrates the principles and tools of epidemiology to the decision-making process in health care management. Prereq: Enrollment in a Public Health degree program and CPH 605, or consent of instructor.

CPH 615 CANCER EPIDEMIOLOGY. (3)

This course applies and integrates the principles and tools of epidemiology to the study of cancer. The course includes discussion of the burden of various kinds of cancer across the United States and the world by age, gender, and race/ethnicity, the underlying biology behind the development of cancer in humans, cancer surveillance, the epidemiology of various kinds of cancer by category of major risk factors such as human behavior (e.g. smoking and alcohol use),

endogenous/exogenous hormones, viruses, environmental/occupational, and diet, and sources of data and methods for evaluating cancer screening, measuring the impact of risk factors, determining the incidence of cancer and cancer clusters, measuring patterns of care, and understanding the determinants of survival. Prereq: CPH 605 or consent of instructor.

CPH 617 ENVIRONMENTAL/OCCUPATIONAL EPIDEMIOLOGY. (3)

A study of work-related and environmental exposures and hazards associated adverse health outcomes. Integrating the fields of occupational and environmental epidemiology. Prereq: Enrollment in a Public Health degree program and CPH 605/PM 620 or consent of instructor.

CPH 618 EPIDEMIOLOGY OF AGING. (3)

This course introduces the application of epidemiologic methods to the study of older persons. Prereq: Enrollment in a Public Health degree and CPH 605/PM 620 Intro to Epidemiology and GRN 650, or consent of instructor. (Same as GRN 618.)

CPH 620 OCCUPATIONAL AND ENVIRONMENTAL HEALTH II. (3)

CPH 620 addresses advanced theories and practices of identifying, assessing, and controlling occupational and environmental hazards that may adversely affect the health of communities and working populations. The course emphasizes harmful effects of non-chemical hazards, such as radiation, noise, hypoxia, and physical agents that lead to morbidity and mortality. However, evaluation and control measures will cover many types of hazardous exposures, including those from chemical exposures.

CPH 622 TOXIC AGENTS AND THEIR IMPLICATIONS IN PUBLIC HEALTH. (3)

This course provides an overview of chemical agents within the environment, their interaction with the human organism, and resultant public health implications. The goal of this course is to utilize toxicological information to create, understand, and explain control strategies that protect and improve public health. Prereq: CPH 601.

CPH 623 PUBLIC HEALTH BIOLOGY. (1)

Public Health Biology is a 1 credit course offered over five weeks that will introduce students to some of the basic terminology and concepts of human health.

CPH 630 BIostatistics II. (3)

Students will learn statistical methods used in public health studies. This includes receiver operator curves, multiple regression logistic regression, confounding and stratification, the Mantel-Haenzel procedure, and the Cox proportional hazardous model. Lecture, two hours; laboratory, two hours per week. Prereq: STA 580 or CPH 580. (Same as STA 681.)

CPH 631 DESIGN AND ANALYSIS OF HEALTH SURVEYS. (3)

Students will learn design and analysis issues associated with well-known national health surveys, including reliability and validity of measurements, instrument validation, sampling designs, weighing of responses, and multiple imputations. Students will learn how to use statistical software to analyze data from complex survey designs. Lecture, two hours; laboratory, two hours per week. Prereq: STA 580 or equivalent.

#CPH 632 FUNDAMENTALS OF CLINICAL RESEARCH. (3)

This course is intended to lay the foundation for the more advanced study necessary for a clinical research investigator; and, will cover the concepts of clinical research design and implementation with an emphasis on clinical trials. This course is intended to be a springboard and to complement the more advanced curricula in Epidemiology and Biostatistics, by providing concepts that will aid the student in patient-oriented investigation. Some medical knowledge is preferable for the successful completion of this course. Prereq: CPH 605 or permission of instructor.

CPH 636 DATA MINING IN PUBLIC HEALTH. (3)

This course concerns statistical techniques for and practical issues associated with the exploration of large public health data sets, the development of models from such data sets, and the effective communication of one's findings. Prereq: STA/CPH 580 and CPH 535, or graduate program status in Ph.D. Statistics or Ph.D. Epidemiology/Biostatistics.

CPH 640 WOMEN'S HEALTH. (3)

This course will cover a variety of women's health topics including substance abuse, violence against women, nutrition, chronic diseases, reproductive and sexual health, and menopause. The course content will also emphasize the social, economic, environmental, behavioral, and political factors associated with women's health. We will address these content areas using a lifecourse perspective. The epidemiology, measurement and interpretation of these factors, and how these factors can be translated into interventions, programs, and policy, will be of major interest. Our focus will be primarily within the United States though we will touch on some aspects of global health. Prereq: Enrollment in the MPH program or permission of instructor.

CPH 641 PUBLIC HEALTH AND ANTHROPOLOGY. (3)

Examination of how the perspectives and methods of anthropology can be and have been applied in public health research and intervention projects. Prereq: Enrollment in the MPH, or DrPH program, or consent of instructor.

CPH 642 ECOLOGICAL AND ADVANCED HEALTH BEHAVIOR THEORY. (3)

Exploration of ecological model and other advanced theories of health behavior, based on theoretical and case-study literature. Contrasts individual-level and population-level approaches to health behavior. Prereq: CPH 604 or consent of instructor.

CPH 643 MEASURING HEALTH BEHAVIOR: INDIVIDUALS AND COMMUNITIES. (3)

This course focuses on measurement, the key component of research. Topics include types of measurement; units of measurement; theory and measurement; reliability and validity; survey development; how and where to find “good” measures of health behaviors; and cultural considerations in measurement. The course relies upon the socioecological framework, acknowledging that health behaviors (as well as their determinants, consequences, and correlates) can and should be measured at all levels of society (e.g., individual, relational, community, and societal). The goal of the course is to train the student in how to measure health behaviors both responsibly and effectively. Prereq: Enrollment in the M.P.H. or Dr.P.H. program, or consent of instructor.

CPH 644 RURAL HEALTH DISPARITIES. (3)

Through class meetings, course readings, and assignments, this course will provide students with a comprehensive overview of issues pertaining to health disparities of rural populations by examining current programs and policies, relevant literature, public health practice, and quantitative and qualitative research pertaining to the health and well-being of rural populations.

CPH 645 FOOD SYSTEMS, MALNUTRITION AND PUBLIC HEALTH. (3)

Exploration of the role of the global food system in shaping food consumption and the implications for public health. Prereq: Enrollment in College of Public Health or consent of instructor.

CPH 646 SPECIAL TOPICS IN BEHAVIORAL HEALTH: (Subtitle required). (1-3)

This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 647 RESEARCH METHODS FOR PUBLIC HEALTH. (3)

This course provides the student with basic knowledge about the design and analysis of research in the field of health behavior. The theory, design, applications, and analytic strategies used for various types of research are presented in a sequential format. Goals of the course include: 1) gaining the ability to critically evaluate research in health behavior 2) achieving competence in research methodology, and 3) understanding the conceptual application of analytic techniques to data. Prereq: M.P.H., Dr.P.H., or Ph.D. in public health student or permission of instructor.

CPH 648 ELIMINATING RACIAL AND ETHNIC HEALTH DISPARITIES. (3)

This course will help the learner understand differences in minority populations in order to help build and lobby for the infrastructure needed to prevent excess disease and death among underserved populations. A special emphasis in this class will be placed on understanding the role of culture in influencing the adaptation of health attitudes, practices, and behaviors. An additional focus will be placed on health status, current trends, and health indicators for special populations. Prereq: Graduate student in Public Health and others by instructor permission.

CPH 649 INDEPENDENT STUDIES IN HEALTH BEHAVIOR. (1-3)

Designed for advanced students with research or special study interest in Behavioral Health. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 650 MANAGEMENT OF PUBLIC HEALTH ORGANIZATIONS. (3)

This course teaches the theories and practice of administration as they are applied in public health settings. It addresses knowledge and applications of the functions of public health management and their relationship to organizational effectiveness. Prereq: College of Public Health major or by permission of instructor.

CPH 651 POPULATION HEALTH: MEASUREMENT, MANAGEMENT AND IMPROVEMENT. (3)

This course explores strategies for measuring, managing and improving health status on a population-wide basis using insight from the social and behavioral sciences. Students will examine approaches for measuring population health and analyzing determinants of health and wellbeing using primary and secondary sources. Students will acquire an understanding of how multiple service delivery and financing systems interact in shaping health and wellbeing on a population level, and what policy and management strategies and incentives are available to align the medical, public health and social systems that support population health. Finally, the course will introduce students to an array of analytic tools and methodologies for evaluating the implementation and impact of population health improvement strategies. Prereq: Enrollment in the MPH program or permission of the instructor.

***CPH 652 HEALTH FINANCE. (3)**

This course provides students an understanding of key principles of financial management as they are applied in healthcare organizations. Knowledge of key elements of strategic financial planning and their application in developing organizational plans and programs will be enhanced through the case study method. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 653 PUBLIC HEALTH LAW & POLICY. (3)

Overview of public health law with emphasis on topics and materials used by public health practitioners, as well as the use of law to advance a public health agenda. Prereq: Graduate status or approval of instructor.

***CPH 655 MANAGEMENT ACCOUNTING FOR HEALTHCARE ORGANIZATIONS. (3)**

This course introduces the use of management accounting techniques for decision making in healthcare organizations. Lectures, problems and cases will be used to focus on various types of healthcare organizations. Prereq: Enrollment in a College of Public Health degree program or MBA (or permission of instructor).

***CPH 658 HEALTH ECONOMICS. (3)**

Health policies and market forces impact the U.S. health care system in terms of access, cost, and quality. This course provides the perspective that economic reasoning is a valuable critical thinking approach to social science inquiry and demonstrates how this perspective helps students understand health care policy and market issues. Prereq: Enrollment in a College of Public Health degree program or certificate program (or permission of instructor).

CPH 660 GIS AND PUBLIC HEALTH. (3)

This course will introduce students to the ArcView Geographic Information System (GIS) to map and spatially analyze public health data. Prereq: Public Health graduate student or permission of instructor.

CPH 661 BIOETHICS FOR PUBLIC HEALTH PROFESSIONALS. (3)

This course will engage students in readings, projects, and discussions to address controversial issues of bioethics for public health professionals. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 662 PUBLIC HEALTH RESPONSE TO TERRORISM, DISASTERS AND EMERGENCIES. (3)

This course will focus on the public health concepts, history, methods, planning, and response preparedness to weapons of mass destruction, terrorism, natural and human-made disasters, and other health emergencies. Prereq: Enrollment in a Public Health degree program and CPH 605, or consent of instructor.

CPH 663 INTRODUCTION TO PUBLIC HEALTH PRACTICE AND ADMINISTRATION. (3)

This course is to be a practical application of the principles of health care organization to public health at the national, state, and local levels. Prereq: Health care organization course.

CPH 664 DESIGN AND ANALYSIS OF CLINICAL TRIALS. (3)

This course will introduce the fundamental concepts used in the design of Phase I/IV clinical trials and statistical methodology associated with trial data analysis. Prereq: STA 570 or permission of instructor.

CPH 665 ETHICAL ISSUES IN CLINICAL RESEARCH. (3)

Based on NIH guidelines for Responsible Conduct of Research, this course will present ethical and regulatory guidelines for conducting clinical research. Prereq: Participation in curriculum leading to Graduate Certificate in Clinical Research Skills, or permission of instructor. (Same as PHR 665.)

†CPH 669 METHODS AND TECHNOLOGIES IN CLINICAL AND TRANSLATIONAL SCIENCE.

CPH 670 INTERDISCIPLINARY PROTOCOL DEVELOPMENT. (2)

This course is designed to orient students to leadership and teamwork processes involved in clinical and translational research and to train students to function effectively in team settings. Students will be assigned to multidisciplinary teams with a designated principal investigator. Each team will be assigned to develop an integrated multidisciplinary grant application to address an assigned clinical research topic. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to the grant application. The course will consist of four class periods. The first three classes will consist of an orientation to communication and the role of leadership and teamwork in multidisciplinary clinical and translational research. The final class period will be reserved for a teams organizational meeting. Supplemental team meetings are optional. Each team member will be required to complete an individual five-page research methods report that is integrated into a multidisciplinary research application addressing a clinical research topic assigned to the team under the direction of an assigned principal investigator. Prereq: Graduate standing.

†CPH 671 SEMINAR IN CLINICAL AND TRANSLATIONAL SCIENCE.

CPH 672 EVIDENCE-BASED PUBLIC HEALTH PLANNING AND PRACTICE. (3)

This course provides the student with knowledge and skills in evidence-based public health: applying scientific reasoning, systematic use of data and information systems, and appropriate behavioral science theory to the development, implementation, and evaluation of effective programs and policies in public health. The course will emphasize online data, tools, and other resources that support the evidence-based decision making process. Prereq: CPH 604 or permission of instructor.

CPH 680 FUNDAMENTALS OF HEALTHCARE QUALITY AND SAFETY. (3)

This course introduces you to the broad discipline of health services systems with an emphasis on quality and patient safety. By the end of this course you will have a better understanding of the theory, methods, structures, and processes of health services, quality and patient safety and why the core areas of interest are so important in health care. Prereq: CPH 600 or permission of instructor.

***CPH681 LEGAL ASPECTS OF HEALTHCARE MANAGEMENT. (3)**

The course will familiarize students with the application of law to management issues in healthcare organizations. Skills addressed include terminology, legal reasoning, the tools of law, and topics specific to healthcare settings. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

***CPH682 QUANTITATIVE METHODS FOR HEALTHCARE MANAGEMENT. (3)**

This course is a survey of quantitative methods for healthcare managers. Specific content areas include problem selection, data collection, measurement, analytic techniques, and research design. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

***CPH683 OPERATIONS MANAGEMENT AND QUALITY IMPROVEMENT. (3)**

This course covers the basics of operations including management of productivity, quality, and inventory as well as process improvement, capacity and throughput analysis and benchmarking. Development of operational performance metrics and basics of both project management and supply chain management are also covered. The focus is on developing tools to support decision making under conditions of uncertainty, risk, and multiple objectives. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

***CPH684 HUMAN RESOURCES MANAGEMENT IN HEALTHCARE. (3)**

This course will examine concepts, methods, systems, and processes for planning and managing human resources in healthcare. It is designed for those aspiring in strategic leadership roles in complex healthcare organizations, rather than primarily for those seeking a specialized role in human resources. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

***CPH687 ORGANIZATION THEORY AND BEHAVIOR. (3)**

This course introduces the disciplines of organization theory and organization behavior and their application in healthcare organization management. Special attention is given to understanding the practice of administration in healthcare organizations, the skills needed for effective management, and evolving management approaches (i.e. Lean). Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

***CPH688 INTERNSHIP IN HEALTH ADMINISTRATION. (1-3)**

Managerial experience in a healthcare setting is an essential component of the health administration educational process. An administrative internship, also referred to as the internship, provides the student with the opportunity to put into practice the knowledge and skills learned in the classroom in healthcare organizations under the guidance of a senior healthcare administrator with faculty oversight. Prereq: Enrollment in MHA program.

#CPH691 SOCIAL DETERMINANTS OF POPULATION HEALTH. (3)

The fundamental determinants of population health (often referred to as the social determinants of health) are grounded in the social, genetic, and physical environments and may influence multiple risk factors and health outcomes by directly shaping individual health behaviors and by shaping access to living conditions and goods and services such as health care and social resources. This course will examine the major categories of social determinants of population health and emerging strategies to address them. Prereq: Enrollment in the MPH program or permission of the instructor.

CPH695 PUBLIC HEALTH PRACTICE THROUGH SERVICE LEARNING. (1-3)

This course will provide students the opportunity to gain first hand public health experience by participating in projects in a community setting. Number of credit hours, associated contact hours, and assignments to be determined in consultation with the instructor. Prereq: Enrollment in a Public Health degree program and completion of the core curriculum, or consent of instructor.

CPH698 OCCUPATIONAL SAFETY AND HEALTH: FIELD SURVEYS. (3)

The course provides students with the opportunity to visit various work sites and industries in the Appalachian region. This course will provide students with onsite, direct experience recognizing hazards and evaluating control measures to reduce occupational health and safety risks. This is a cross-disciplinary course for graduate students in occupational safety, industrial hygiene, environmental health, occupational health nursing, ergonomics, injury prevention, agricultural health and safety, occupational epidemiology and occupational medicine. Prereq: CPH 620 Occupational Health.

CPH701 CURRENT ISSUES IN PUBLIC HEALTH. (1)

This seminar course will introduce M.S. and Ph.D. students to the critical role of public health in protecting, maintaining, and improving the health of the population. Specific emphasis will be directed to the "Ten Essential Functions of Public Health" through weekly lectures, readings, and writing assignments. While all five core areas of public health will be introduced. Prereq: Admission to College of Public Health M.S. or Ph.D. program.

CPH709 GLOBAL HEALTH INTERNSHIP. (3)

This course will consist of an internship in a foreign country, preferably in a resource-limited setting. Students will have both a University of Kentucky and a local mentor, and will develop a plan for participating in some type of health-related project or activity during a four-week period. A paper or presentation summarizing the key components of the internship experience will be submitted upon returning to Lexington. Prereq: Enrollment in the Graduate Certificate in Global Health Program, and completion of the course CPH 751, Introduction to Global Health, or approval from the Director of the certificate.

CPH710 ADVERSE EVENTS IN HEALTHCARE: EPIDEMIOLOGY AND PREVENTION. (3)

This course will focus on the epidemiology, history, methods, and ancillary laboratory tools used in the study and control of healthcare associated adverse events, including discussions of key concepts and theory, basic types of epidemiological investigations and study designs, and distinctive problems associated with specific risk factors. Adverse events will be discussed as components of patient safety and the quality of care.

CPH711 CHRONIC DISEASE EPIDEMIOLOGY. (3)

A survey course on the leading chronic diseases in the U.S., including cardiovascular disease, cancer and diabetes with focus on surveillance and risk factors. Prereq: Enrollment in a Public Health degree program, CPH 605/PM 620 Introduction to Epidemiology or consent of instructor.

***CPH712 ADVANCED EPIDEMIOLOGY. (3)**

This course provides students with the understanding of advanced issues in the design, analysis, and interpretation of epidemiologic studies. The course text and associated readings will focus on study designs and the methodologic approaches to addressing bias, confounding, and error in the design of population-based health research. The development of a systematic approach for evaluating evidence from epidemiologic studies as it relates to demonstrating causality will be emphasized. Focusing on study design, measures of associations, confounding, interaction, sources of bias and error, the student will gain an understanding of epidemiology and its role in the medical and public health sciences. Prereq: Enrollment in a public health degree program and CPH 605 or consent of instructor.

CPH713 PHARMACOEPIDEMIOLOGY. (3)

This course will provide an overview of the field of pharmacoepidemiology and its relationship to health care research. Various topics including methodology and analytical issues relevant to the conduct of pharmacoepidemiologic research will be covered. Time will also be spent reviewing existing papers in the field of pharmacoepidemiology. Prereq: CPH 605 and STA 580 or equivalent; may be concurrent. (Same as PPS 701.)

CPH714 MATERNAL AND CHILD HEALTH INFORMATION AND DATA SYSTEMS. (3)

This course will equip participants with basic skills in identifying, accessing, interpreting and utilizing U.S. maternal and child health data systems at the national and state level. Participants will learn the essential ways that secondary data sources inform public health practice and how to interpret and present information from these sources. They will also learn key skills in data interpretation, data linkage, working with small numbers, stratifying data by population subgroups and examining trends over time.

CPH715 PERINATAL EPIDEMIOLOGY. (3)

This course will equip participants with basic skills in the field of perinatal epidemiology and its application in the field of Maternal and Child Health. Students will work with birth and death data using SAS, SPSS or STATA to gain experience in secondary data analysis; from initial data base organization and cleaning through descriptive analysis and interpretation of the content. Topics such as proper data coding, the use of prenatal indices and an introduction to data linkage will be included.

CPH716 PROSEMINAR IN OCCUPATIONAL HEALTH AND SAFETY. (0-1)

This course will provide students, in a seminar format for 6 sessions during the semester, presentations from occupational health and safety professionals from a variety of disciplines and experiences. The seminar is 2.5 hours long at each session. Knowledge regarding workplace exposures and related health outcomes will be provided. Students should acquire basic understanding of current topics in the fields of occupational medicine, nursing, safety, industrial hygiene, epidemiology, biostatistics, mining, and agriculture.

CPH718 SPECIAL TOPICS IN EPIDEMIOLOGY: (Subtitle required). (1-3)

This course will engage in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH719 INDEPENDENT STUDIES IN EPIDEMIOLOGY. (1-3)

Designed for advanced students with research or special study interests in Epidemiology. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

#CPH720 HEALTH OF AGRICULTURAL POPULATIONS. (3)

Health of Agricultural Populations addresses the threats and hazards that impact the health, safety and productivity of farmers, members of farm families, hired farm workers, and others who live or work in agricultural environments, such as crop and livestock production, timber production and commercial fishing. This course offers analysis in selected issues of agricultural health and safety. Students will visit agricultural operation sites.

CPH725 CLINICAL PREVENTIVE SERVICES. (3)

Disease prevention and control have been recognized as more efficient and effective in extending the quality and quantity of human life. As a core part of the Preventive Medicine-Public Health Residency curriculum, this course will focus on up-to-date, clinically relevant information and cutting edge research results regarding clinical preventive medicine and public health issues. The primary focus of this course will be 1) evidence based preventive health care services, and 2) recommendations of the United States Preventive Services Task Force for screening and preventive health care services. Prereq: Permission of instructor.

CPH 728 SPECIAL TOPICS IN OCCUPATIONAL/ ENVIRONMENTAL HEALTH: (Subtitle required). (1-3)

This course will engage students in reading, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 729 INDEPENDENT STUDIES IN OCCUPATIONAL/ ENVIRONMENTAL HEALTH. (1-3)

Designed for students with research or special study interest in Occupational and Environmental Health. Structured activities with goals, objectives, and deliverables are designed with individual faculty. May be repeated to a maximum of 6 credit hours per semester. Prereq: Enrollment in a College of Public Health program or consent of instructor. This is a controlled enrollment course; see instructor for additional information.

CPH 738 SPECIAL TOPICS IN BIOSTATISTICS: (Subtitle required). (1-3)

This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 739 INDEPENDENT STUDIES IN BIOSTATISTICS. (1-3)

Designed for advanced students with research or special study interest in Biostatistics. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 740 INTRODUCTION TO MATERNAL AND CHILD HEALTH. (3)

This course will acquaint students with the major issues and challenges of working in the area of maternal and child health. Prereq: UK graduate or professional school student status.

#CPH 746 RESEARCH METHODS AND PROGRAM EVALUATION FOR HEALTH BEHAVIOR. (3)

This course provides the student with basic knowledge about the design and analysis of research in the field of health promotion. The theory, design, applications, and analytic strategies used for various types of research are presented in a sequential format. Goals of the course include: 1) gaining the ability to critically evaluate research in health promotion practice, 2) achieving competence in research methodology, and 3) understanding the conceptual application of analytic techniques to data. This course also prepares second-year MPH students concentrating in Health Behavior to successfully construct and defend their capstone in April of the current academic year. Prereq: CPH 672 and CPH 643, or permission of instructor.

CPH 748 RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CPH 752 LEADERSHIP IN HEALTH ORGANIZATIONS. (3)

This course is designed to explore the dimensions of leadership as presented in both the traditional and contemporary literature. It focuses student understanding on their leadership qualities and the ways to apply them in the current public health environment.

CPH 754 HEALTH CARE ACCESS AND COVERAGE. (3)

This course offered gives students a greater understanding of programs available to underserved populations, how the changes in the health care market impacts care provided to underserved populations, and policy and programmatic options to address the needs of underserved populations. Prereq: Graduate or post-baccalaureate student status.

***CPH 755 LEADING CHANGE WITH HEALTHCARE TEAMS. (3)**

This course focuses on developing the skills necessary to successfully facilitate teams to achieve sustainable change in healthcare systems. The course introduces the foundations of change management, key features of successful teams and factors that lead to team failures; and specific behaviors and communications that enhance effective team interaction. By the end of this course you will have a better understanding of team dynamics and the tools of implementation with special emphasis on applications to improve healthcare quality, safety, satisfaction and efficiency. Prereq: Enrollment in a College of Public Health degree program or certificate program (or permission of instructor).

CPH 758 SPECIAL TOPICS IN HEALTH MANAGEMENT POLICY: (Subtitle required). (1-3)

This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 759 INDEPENDENT STUDIES IN HEALTH MANAGEMENT POLICY. (1-3)

Designed for students with research or special study interest in Health Services Management. Students must develop a prospectus that specifies goals, objectives, and deliverables with individual faculty. May be repeated to a maximum of 6 credit hours per semester. Prereq: Enrollment in a College of Public Health degree program or consent of instructor. This is a controlled enrollment course; contact instructor for additional information.

CPH 763 ETHICS FOR PUBLIC HEALTH. (3)

The focus of this class is on applied ethics and its application to public health issues. In addition to examining current issues that might arise during the timeframe of the course, we will address the following: ethical frameworks, theories, and approaches; a unique public health ethics; social justice; ethics surrounding infectious diseases, including surveillance and control; health

disparities; environmental and occupational health issues; genetics; smoking cessation; end-of-life issues; conundrums regarding vulnerable populations; public health research; and ethical leadership of public health organizations. Prereq: Enrollment in the MPH program or consent of instructor.

CPH 767 DISSERTATION RESEARCH CREDIT. (2)

Students will enroll in this course to complete their research for their dissertation. Prereq: Approval of DGS.

CPH 768 RESIDENCY CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 credits. Prereq: All course work toward the degree must be completed.

CPH 776 INTRODUCTION TO GLOBAL PUBLIC HEALTH. (3)

This course will acquaint students with the major issues and challenges for public health in a variety of wealthy, emerging, and impoverished nations and with the impact of local or regional issues on national and/or global levels. Prereq: UK graduate or professional school student status.

CPH 778 SPECIAL TOPICS IN PUBLIC HEALTH: (Subtitle required). (1-3)

This course will engage in reading, projects, lectures and/or discussions to address current topics of special interest or concern in public health. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 779 INDEPENDENT STUDIES IN PUBLIC HEALTH. (1-3)

Designed for advanced students with research or special study interests in Public Health. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

***CPH 780 STRATEGIC PLANNING AND MARKETING IN HEALTHCARE. (3)**

This course focuses on the future needs of health care organizations as contrasted with day-to-day operations management. Strategies for the design and implementation of organizational change will be addressed. The strategic planning components of environmental analyses, directional strategy, gap analysis, strategic options, goals and objectives, and performance monitoring form the basis of the course. Current trends in health care delivery and financing, marketing and performance measurements are illustrated through case analysis. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

***CPH 781 HEALTHCARE ETHICS AND GOVERNANCE. (2)**

This course addresses the basic concepts and principles of healthcare ethics, including the biomedical, managerial, and organizational components and applies them using case studies, role playing, and analytical exercises. The course also examines the roles and responsibilities of healthcare governing boards and factors that influence their effectiveness. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

***CPH 782 INFORMATION SYSTEMS IN HEALTH CARE. (3)**

This course provides an overview of information systems and their use in healthcare organizations. Topics include the history of IT use, recent developments, continuing challenges and emerging opportunities. The role of the healthcare manager in information system planning, selection and implementation is stressed. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

#CPH 783 APPLICATIONS IN HEALTHCARE FINANCE AND OPERATIONS. (3)

An analysis of the healthcare industry's financial framework and operational issues applying insights from earlier coursework in realistic scenarios. Prereq: Enrollment in MHA Program.

***CPH 784 CASE STUDIES IN HEALTH ADMINISTRATION. (3)**

This course builds on the concepts and techniques introduced in the MHA curriculum and integrates them with a decision making focus in a variety of healthcare problems and settings. Case analysis will be used extensively to develop an opportunity for the student to apply appropriate skills in an unstructured environment. Prereq: Enrollment in MHA program and completion of two semesters of course work.

***CPH 785 HEALTH POLICY. (3)**

An analysis of the development and implementation of health policy on a national, state, local and organizational level. The course will focus on issue and policy analysis, formal and informal processes of policy development and the issues, values, and political and community factors affecting policy development and program implementation. Prereq: Enrollment in a College of Public Health degree program or permission of instructor.

CPH 786 DOCTORIAL SEMINAR. (1)

Students will attend colloquium sessions that will supplement the core curriculum with additional application. Prereq: Enrollment in the Ph.D. in Epidemiology and Biostatistics program.

***CPH 787 INDEPENDENT STUDY IN HEALTH ADMINISTRATION. (1-3)**

Supervised individual research on a topic related to health administration selected by the student. May be repeated to a maximum of six credits. Prereq: Enrollment in MHA program.

***CPH 788 SPECIAL TOPICS IN HEALTH ADMINISTRATION. (1-3)**

An analysis of selected issues with special significance for health administration. Prereq: Enrollment in MHA program.

CPH 790 WATER SANITATION AND HEALTH. (3)

Prevention of water-related diseases by appropriate supply and sanitation practices with designs applicable to small systems and rural areas of developing nations. (Same as CE 655.)

CPH 841 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE. (1)

This course offers a structural exposure of students to the varieties of basic and clinical science research and current issues in health care policy under discussion at the University Medical Center. Following weekly attendance at research seminars and clinical rounds, students will present their observations in follow-up discussion groups. May be repeated to a maximum of three credits. (Same as BSC 620.)

CPH 901 PUBLIC HEALTH DOCTORAL PROFESSIONAL COLLOQUIUM. (1)

Seminar course designed as the integrative introduction, consideration, capstone for the Doctor of Public Health (Dr.P.H.) degree. Offered each semester of enrollment. Prereq: Admission to the Dr.P.H. program.

***CPH 910 ADVANCED EPIDEMIOLOGY. (3)**

This course provides students with the understanding of advanced issues in the design, analysis, and interpretation of epidemiologic studies. The course text and associated readings will focus on study designs and the methodologic approaches to addressing bias, confounding, and error in the design of population-based health research. The development of a systematic approach for evaluating evidence from epidemiologic studies as it relates to demonstrating causality will be emphasized. Focusing on study design, measures of associations, confounding, interaction, sources of bias and error, the student will gain an understanding of epidemiology and its role in the medical and public health sciences. Prereq: Enrollment in the doctorate of public health degree program and CPH 605 or consent of instructor.

CPH 911 PROFESSIONAL SEMINAR IN EPIDEMIOLOGY. (3)

Professional Seminar in Epidemiology is an advanced course in one of the five content areas of public health designed as the link between academic work in epidemiology and application in Public Health practice. Prereq: Admission to the Dr.P.H. program, completion of CPH 910, or approval of instructor.

CPH 920 ADVANCED ENVIRONMENTAL HEALTH. (3)

This professional seminar in Environmental Health is designed to provide comprehensive coverage of the principles upon which the Environmental Health field relies. Prereq: Admission into the Dr.P.H. curriculum.

CPH 921 PROFESSIONAL SEMINAR IN ENVIRONMENTAL HEALTH. (3)

Designed as the link between academic work in environmental health and application health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, or approval of instructor.

CPH 930 BIostatistics CONCEPTS FOR THE PUBLIC HEALTH PRACTITIONER. (3)

This course covers topics relating to applications of biostatistics in public health. It provides a conceptual introduction to statistical methods commonly used in public health practice. Topics include data visualization, summary statistics, statistical testing, estimation, confounding, and an introduction to regression (linear, logistic, proportional hazards). Prereq: Doctor of Public Health Student.

CPH 931 PROFESSIONAL SEMINAR IN BIostatISTICS. (3)

Designed as the link between academic work in biostatistics and application in public health practice; and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 930, or approval of instructor.

CPH 940 HEALTH-RELATED BEHAVIORS: MODELS AND APPLICATIONS. (3)

This course evaluates the use of models of health on related behavior and their applications for intervention in public health problems. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, or approval of instructor.

CPH 941 PROFESSIONAL SEMINAR IN HEALTH ENHANCEMENT. (3)

Designed as the opportunity to link academic work in health enhancement with application in public health practice and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 940, or approval of instructor.

CPH 942 SEMINAR IN PUBLIC HEALTH COMMUNICATION. (3)

This seminar in Public Health Communication is intended to acquaint students with theory and current research related to communication in public health settings. It is designed to provide insight into the communication that serves as the lifeblood of the organized institutions which promote public health. Those who wish to have a significant role in the management of public health practitioners, improve their understanding of organizations, understand how groups and individuals fit into the larger mission, need to apply advanced information and communication technologies, and desire to become more effective communicators will find this course worthwhile. This course is primarily designed to give students a background in theories, perspectives, concepts, and approaches to understanding communication. Thus, it seeks to promote student understanding, analytical skills, and critical thinking necessary for such professions as consulting, research, and management and for their own personal development.

CPH 949 DOCTORAL CAPSTONE RESEARCH. (0)

This course will allow Dr.P.H. students to remain in a full-time enrollment status at the University of Kentucky while working on their doctoral capstone. Enrollment is restricted and

by special permission only; students may only register for this course after all for-credit course work has been completed.

CPH 950 WELL MANAGED PUBLIC HEALTH CARE ORGANIZATION. (3)

The Well Managed Public Health Care Organization is an advanced course addressing effective senior management of public and private organizations focusing upon public health. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, or approval of instructor.

CPH 951 PROFESSIONAL SEMINAR IN PUBLIC HEALTH MANAGEMENT AND PRACTICE. (3)

Designed to link academic work in public health management with application in public health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 950, or approval of instructor.

CPH 952 SEMINAR IN ADVANCED LEADERSHIP. (3)

This course provides the opportunity to link academic work in public health leadership with application in public health practice and to prepare the learner for a leadership role in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health and leadership. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

CPH 953 SEMINAR IN ETHICAL AND MORAL DECISION-MAKING. (3)

This course provides the opportunity to link academic work in public health decision-making with its application to public health practice and to prepare the learner for the practice of public health decision-making based on ethical and moral principles. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health decision-making. The period of Nazi Germany 1933-1945 will compose the underlying case study. The seminar will consider in depth the decisions made by Nazi political and military leaders, citizens, religious leaders, concentration camp commanders, guards, and prisoners, physicians, scientists and business leaders. Films will be used extensively in the seminar. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

CPH 954 SEMINAR IN ADVANCED PUBLIC HEALTH FINANCE AND ECONOMICS. (3)

This course provides the opportunity to link academic work in public health finance and economics with application in public health practice and to prepare the learner for key leadership roles in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health finance and economics. Prereq: Enrollment as a Dr.P.H. student or permission of instructor and approval of the Associate Dean for Admissions and Student Affairs.

CPH 956 PROGRAM EVALUATION FOR PUBLIC HEALTH PROFESSIONALS AND LEADERS. (3)

This course is designed to provide Dr.P.H. students the knowledge and skills to guide and critically review program evaluations in their roles as public health professionals and leaders. The course focuses on providing an overview of the key concepts, methods, and approaches to program evaluation with an emphasis on public health practice. Topics include approaches to program evaluation, defining evaluation questions, managing an evaluation, program evaluation standards, program evaluation designs, reporting and disseminating results and findings, and political issues of evaluation. Prereq: Enrollment as a Dr.P.H. student or by permission of the instructor.

CPH 960 BIOLOGY OF AGING. (3)

This course will focus on the recognition and discussion of the outcomes of biological changes in terms of the effects of aging on the individual's physical and psychosocial systems. It will be organized utilizing a systems approach to presentations, class discussions, class readings and on-line discussions. Prereq: Enrollment as a Dr.P.H. student or by permission of the instructor.

CPH 961 A STUDY OF THE OLDER PERSON. (3)

An increasing elderly population during this century has created a variety of pressing social issues. Underscoring such issues is a long-standing cultural view of elders as a homogenous group of people who are "different" from younger labor force participants, a view that has resulted in pervasive "ageism" – the collection of attitudes and practices that may reflect discrimination against elders. A properly informed public is necessary to combat ageism and establish sound economic, social, cultural and health care policies that successfully encompass all ages of society. Gerontology is a field of study designed to provide knowledge and a sound database for dealing with present and future issues of aging and the older population, especially within the realm of public health. This course has been designed to give students pursuing a Dr.P.H. with a concentration in gerontology a broad yet comprehensive graduate-level introduction to the field and to the experience of an older individual that will provide a solid foundation for subsequent courses, and more importantly, personal scholarly development in the program. An array of topics and themes will be presented to adequately represent the multidisciplinary nature of gerontology. Through critical examination of such topics and themes the learner will gain a conceptual foundation for developing effective skills in interdisciplinary inquiry. Prereq: Enrollment as a Dr.P.H. student or by permission of the instructor.

CPH 993 PROFESSIONAL SEMINAR IN FOUNDATIONS OF PUBLIC HEALTH PRACTICE. (3)

A culminating experience professional seminar linking evidence-based academic work in public health with the foundations of practice. A fundamental part of the course is to prepare the

learner for a community advocacy role in public health using skill sets found in critical analysis and leadership. Prereq: All 9X0 and 9X1 courses in the Dr.P.H. program.

CPH 994 PROFESSIONAL SEMINAR IN LEADING PEOPLE – MANAGING CHANGE. (3)

A culminating experience professional seminar linking academic work in public health leadership, management and ethics with application to public health practice and preparing learners for a leadership role in public health. Prereq: All five 9X0 and three 9X1 courses in the Dr.P.H. program.

CPH 995 DOCTORAL SEMINAR IN PUBLIC HEALTH RESEARCH METHODS. (3)

A survey course in a seminar style covering both classical and recent literature in public health services, including description and critique of research. Prereq: HSM 601/CPH 602, STA 570 or 580, and admission to the Dr.P.H. program or post-doctoral fellowship; or consent of instructor.

CPH 996 PUBLIC HEALTH PROJECT OR DISSERTATION RESEARCH. (1-12)

Public health project or dissertation research for residency credit. To be repeated unlimited. Prereq: Completion of the Dr.P.H. Determinative Examination.

CPH 997 DOCTORAL PUBLIC HEALTH FIELD PRACTICUM. (2-4)

Required public health field work is the integrative component of the curriculum and an opportunity to apply and test didactic learning. May be repeated twice. Laboratory, eight to sixteen hours per week. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, second year status, or approval of instructor.

CPH 998 SPECIAL TOPICS IN PUBLIC HEALTH (Subtitle required). (1-4)

Designed to address contemporary topics of significance in the field of public health as well as the study of specific topics and problems. May be repeated three times. Prereq: Admission to the Dr.P.H. program, consent of instructor.

CPH 999 DIRECTED STUDIES IN PUBLIC HEALTH. (1-4)

Study and research on contemporary and specific topics and problems of significance to the field of public health, and the interests of individual students. May be repeated to a maximum of six hours. Prereq: Admission to the Dr.P.H. program, consent of instructor.

CS Computer Science

CS 100 THE COMPUTER SCIENCE PROFESSION. (1)

An introductory seminar which covers the fundamental activities, principles, and ethics of the computer science profession. An overview of the discipline of computer science, examples of careers, the history of computing and experience with elementary computing tools are included.

CS 101 INTRODUCTION TO COMPUTING I. (3)

An introduction to computing and its impact on society from a user’s perspective. Topics include computation using spreadsheets, beautification using text formatters and word processors, information management with database managers, and problem solving through program design and implementation using a simple programming language. Not open to students who have received credit for higher level computer science courses.

CS 115 INTRODUCTION TO COMPUTER PROGRAMMING. (3)

This course teaches introductory skills in computer programming using a high-level computer programming language. There is an emphasis on both the principles and practice of computer programming. Covers principles of problem solving by computer and requires completion of a number of programming assignments.

***CS 215 INTRODUCTION TO PROGRAM DESIGN, ABSTRACTION, AND PROBLEM SOLVING. (4)**

The course covers introductory object-oriented problem solving, design, and programming engineering. Fundamental elements of data structures and algorithm design will be addressed. An equally balanced effort will be devoted to the three main threads in the course: concepts, programming language skills, and rudiments of object-oriented programming and software engineering. Prereq: EGR 102 or CS 115 or equivalent.

CS 216 INTRODUCTION TO SOFTWARE ENGINEERING TECHNIQUES. (3)

Implementation of large programming projects using object-oriented design techniques and software tools in a modern development environment. Software engineering topics to include: life cycles, metrics, requirements specifications, design methodologies, validation and verification, testing, reliability and project planning. Prereq: CS 215.

***CS 221 FIRST COURSE IN COMPUTER SCIENCE FOR ENGINEERS. (2)**

Characteristics of a procedure-oriented language; description of a computer as to internal structure and the representation of information; introduction to algorithms. Emphasis will be placed on the solution of characteristic problems arising in engineering. Prereq: Not open to students who have received credit for EGR 102 or CS 115.

CS 261 SOCIAL NETWORKS: METHODS AND TOOLS. (3)

The complex connectedness of the modern society is a multifaceted phenomenon resulting from the growing density of the human population, the advent of fast global mass transportation infrastructure, the emergence of global companies and markets, and spurred by the Internet and its applications such as the Web, Facebook and Twitter. In this course, we learn about graph

theory, game theory and computational tools required to model and analyze social networks, matching markets, web search, network externalities, tipping points, information cascades, epidemics, small worlds, and voting schemes. The course requires no programming background and has no university-level prerequisites.

CS 270 SYSTEMS PROGRAMMING. (3)

This course provides an introduction to computer systems and explores computer architecture, operating systems, and networks from a programmer’s perspective. The course also introduces advanced programming and debugging tools. Topics include hardware instruction sets, machine language and C language program representations, linking/loading, operating systems (process management, scheduling, memory management, interprocess communication, and file systems), network programming (socket programming and web protocols), and common security attacks and solutions. Prereq: EE 280 and CS 216.

***CS 275 DISCRETE MATHEMATICS. (4)**

Introduction to the design and analysis of algorithms in Computer Science. Fundamental principles: set theory, induction, relations, functions, Boolean algebra. Techniques of counting: permutations, combinations, recurrences, algorithms to generate them. Introduction to graphs and trees. Prereq: MA 113 and either EGR 102 or CS 115.

CS 315 ALGORITHM DESIGN AND ANALYSIS. (3)

Introduction to the design and analysis of algorithms. Asymptotic analysis of time complexity. Proofs of correctness. Algorithms and advanced data structures for searching and sorting lists, graph algorithms, numeric algorithms, and string algorithms. Polynomial time computation and NP-completeness. Prereq: CS 215, CS 275, and engineering standing.

CS 316 WEB PROGRAMMING. (3)

This course introduces students to the World Wide Web, languages and techniques used for web programming, data transfer over the Internet, and the tools available in the web environment. Prereq: CS 216.

CS 321 INTRODUCTION TO NUMERICAL METHODS. (3)

Floating point arithmetic. Numerical linear algebra: elimination with partial pivoting and scaling. Polynomial and piecewise interpolation. Least squares approximation. Numerical integration. Roots of nonlinear equations. Ordinary differential equations. Laboratory exercises using software packages available at computer center. Prereq: MA 114 and knowledge of a procedural computer language is required. (Same as MA 321.)

CS 335 GRAPHICS AND MULTIMEDIA. (3)

This course focuses on the graphical human-machine interface, covering the principles of windowing systems, graphical interface design and implementation, and processing graphical data. There is an emphasis on medium-scale programming projects with graphical user interfaces using a high-level procedural programming language and concepts such as object-oriented design. Prereq: CS 216 and engineering standing.

CS 340 APPLICABLE ALGEBRA. (3)

Topics include: Euclid’s algorithm, unique factorization moduli arithmetic, Fermat’s and Euler’s theorems. Chinese remainder theorem, RSA public key encryption, Pollard rho factoring, pseudo primes, error correcting codes, Hamming codes, polynomial rings and quotient rings, field extensions, finite fields and BCH codes. Prereq: MA 322 or MA 213. (Same as MA 340.)

CS 371 INTRODUCTION TO COMPUTER NETWORKING. (3)

Introduction to the principles and concepts of the Internet; data communications and digital channel characteristics; networking applications and protocols, client-server paradigm and network programming; reliable data transfer, end-to-end transport; addressing, forwarding and routing, datagram networks; media access control, data link control; selected topics from cloud computing, network security and network management. Concepts are combined with programming and other hands-on assignments to enhance the learning of these topics. Prereq: CS 270, CS 315.

CS 375 LOGIC AND THEORY OF COMPUTING. (3)

Topics in logic and discrete math aimed at applications in Computer Science. Propositional calculus: truth tables, logical relations, proofs, tautologies, soundness. Predicate calculus: variables, quantifiers, equivalencies. Models of computation: logic circuits, finite automata, Turing machines. Prereq: MA 113, CS 215, CS 275 and engineering standing.

CS 378 INTRODUCTION TO CRYPTOLOGY. (3)

The study of secrecy in digital systems. Methods of keeping information secure from classical systems dating from ancient times to modern systems based on modern mathematics. Basic methods of encryption using public key systems, block ciphers, and stream ciphers. The mathematical tools for the design and analysis of such systems. Topics will include classical cryptography, modern methods of public and private key encryption, authentication and digital signatures, hashing, and passwords. Number theory, abstract algebra, combinatorics, and complexity theory necessary for the design and analysis of cryptographic systems. Prereq: CS 315 and STA 281, or instructor’s consent.

CS 380 COMPUTER ORGANIZATION. (3)

Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: CS 215 and EE/CPE 282 or EE 280. (Same as CPE/EE 380.)

CS 383 INTRODUCTION TO EMBEDDED SYSTEMS. (3)

A course in the hardware and software of microprocessors. Assembly language programming,

address decoding, hardware interrupts, parallel and serial interfacing with various special purpose integrated circuits. Each student is expected to do homework assignments using microprocessor hardware. Prereq: EE 280 and EE/CS 380. (Same as EE 383.)

CS 395 INDEPENDENT WORK IN COMPUTER SCIENCE. (1-2)

A course for computer science majors only. A topic, approved by the chairperson of the department, provides an opportunity for supervised individual research and study. May be repeated to a maximum of four credits. Prereq: Consent of instructor.

CS 405G INTRODUCTION TO DATABASE SYSTEMS. (3)

Study of fundamental concepts behind the design, implementation and application of database systems. Brief review of entity-relationship, hierarchical and network database models and an in-depth coverage of the relational model including relational algebra and calculi, relational database theory, concepts in schema design and commercial database languages. Prereq: CS 315 and graduate or engineering standing.

CS 415G COMBINATORICS AND GRAPH THEORY. (3)

A basic course in the theory of counting and graph theory. Topics in enumerative combinatorics may include: generating functions, compositions, partitions, Fibonacci numbers, permutations, cycle structure of permutations, permutations statistics, Stirling numbers of the first and second kind, Bell numbers, inclusion-exclusion. Topics in graph theory may include: Eulerian and Hamiltonian cycles, matrix tree theorem, planar graphs and the 4-color theorem, chromatic polynomial, Hall's marriage theorem, stable marriage theorem, Ramsey theory, electrical networks. Prereq: MA 213 or MA 322. (Same as MA 415G.)

CS 416G INTRODUCTION TO OPTIMIZATION. (3)

The course is an introduction to modern operations research and includes discussion of modeling, linear programming, dynamic programming, integer programming, scheduling and inventory problems and network algorithms. Prereq: MA 213 or equivalent. (Same as MA 416G.)

CS 422 NUMERICAL SOLUTIONS OF EQUATIONS. (3)

Linear equations: Gaussian elimination, special linear systems, orthogonalization, eigenproblem, iterative methods. Nonlinear equations: solutions of equations in one variable, solutions of systems of nonlinear equations. Optimization. Prereq: CS/MA 321 and MA 322; or consent of instructor. (Same as MA 422.)

CS 441G COMPILERS FOR ALGORITHMIC LANGUAGES. (3)

The techniques of processing, specifying, and translating high-level computer languages are studied. Topics include finite state machines and lexical analysis, context-free grammars for language specification, attributed translation grammars, language parsing, and automatic generation of compilers by SLR, LALR, and other methods of analyzing context-free grammars. Other topics may include code optimization, semantics of programming languages, and top-down parsing. Prereq: CS 315 and engineering standing.

CS 450G FUNDAMENTALS OF PROGRAMMING LANGUAGES. (3)

An intensive study of fundamental programming concepts exhibited in current high level languages. Concepts include recursion, iteration, coroutines, multiprocessing, backtracking, pattern-matching, parameter passing methods, data structures, and storage management. Typical languages studied are SNOBOL, LISP, PASCAL, and APL. Prereq: CS 370. Restricted to computer science and electrical engineering majors. Others by permission.

CS 460G MACHINE LEARNING. (3)

Study of computational principles and techniques that enable software systems to improve their performance by learning from data. Focus on fundamental algorithms, mathematical models and programming techniques used in Machine Learning. Topics include: different learning settings (such as supervised, unsupervised and reinforcement learning), various learning algorithms (such as decision trees, neural networks, k-NN, boosting, SVM, k-means) and crosscutting issues of generalization, data representation, feature selection, model fitting and optimization. The course covers both theory and practice, including programming and written assignments that utilize concepts covered in lectures. Prereq: Strong programming ability (CS 315), basic probability and statistics (STA 281), and basic concepts of linear algebra (MA/CS 321 or MA/CS 322), or instructor's consent.

CS 463G INTRODUCTION TO ARTIFICIAL INTELLIGENCE. (3)

The course covers basic techniques of artificial intelligence. The topics in this course are: search and game-playing, logic systems and automated reasoning, knowledge representation, intelligent agents, planning, reasoning under uncertainty, and declarative programming languages. The course covers both theory and practice, including programming assignments that utilize concepts covered in lectures. Prereq: CS 315, CS 375, and engineering standing.

CS 470G INTRODUCTION TO OPERATING SYSTEMS. (3)

This course provides an introduction and overview of operating system design, internals, and administration. Topics include classical operating systems (process management, scheduling, memory management, device drivers, file systems), modern operating systems concepts (kernel/microkernel designs, concurrency, synchronization, interprocess communication, security and protection), and operating system administration. Prereq: CS 315, CS 380, and graduate or engineering standing.

CS 471G NETWORKING AND DISTRIBUTED OPERATING SYSTEMS. (3)

Broad overview of concepts in networking and distributed operating systems with examples. Topics will include protocol stacks, link, network, transport, and application layers, network management, the client-server model, remote procedure calls, and case studies of distributed OS and file systems. Prereq: CS 315 and graduate or engineering standing.

CS 480G ADVANCED COMPUTER ARCHITECTURE. (3)

This course focuses on advanced computer architectures and low-level system software. Topics include RISC architectures, vector and multiprocessor architectures, multiprocessor memory architectures, and multiprocessor interconnection networks. Peripheral devices such as disk arrays, NICs, and video/audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, linkers, and loaders. Prereq: CPE/CS/EE 380. (Same as CPE/EE 480.)

CS 485G TOPICS IN COMPUTER SCIENCE (Subtitle required). (2-4)

Studies of emerging research and methods in computer science. A review and extension of selected topics in the current literature. When the course is offered, a specific title with specific credits, the number of hours in lecture-discussion and laboratory will be announced. Lecture/discussion, two-four hours; laboratory, zero-four hours per week. May be repeated up to the discretion of the department.

CS 498 SOFTWARE ENGINEERING FOR SENIOR PROJECT. (3)

Current approaches—practice and technologies—for developing reliable software: specifications, testing, and verification. Individual and team assignments focused on applying these approaches to software systems. A significant communication and composition component related to specifying, designing, presenting, and documenting software systems. Prereq: CS 115, 215, 216.

CS 499 SENIOR DESIGN PROJECT. (3)

Projects to design and implement complex systems of current interest to computer scientists. Students will work in small groups. Prereq: CS 315 and engineering standing. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CS 505 INTERMEDIATE TOPICS IN DATABASE SYSTEMS. (3)

The course introduces a variety of modern techniques in database and distributed database systems. The major topics include, but are not limited to: object-oriented database systems; distributed, heterogeneous and web-based databases; knowledge based systems; physical database design; and security. The course covers a variety of methods that allow for a solution of database problems where the traditional relational database techniques are not viable or not sufficient. Prereq: CS 405 or consent of instructor.

CS 515 ALGORITHM DESIGN. (3)

The design and analysis of efficient algorithms on data structures for problems in sorting, searching, graph theory, combinatorial optimization, computational geometry, and algebraic computation. Algorithm design techniques: divide-and-conquer, dynamic programming, greedy method, and randomization, approximation algorithms. Prereq: CS 315 and engineering standing.

CS 521 COMPUTATIONAL SCIENCES. (3)

Study of computer science techniques and tools that support computational sciences and engineering. Emphasis on visualization, performance evaluation, parallel computing, and distributed computing. Prereq: Either EGR 102 or CS 115, and CS 380/EE 380 and engineering standing.

CS 522 MATRIX THEORY AND NUMERICAL LINEAR ALGEBRA I. (3)

Review of basic linear algebra from a constructive and geometric point of view. Factorizations of Gauss, Cholesky and Gram-Schmidt. Determinants. Linear least squares problems. Rounding error analysis. Stable methods for updating matrix factorizations and for linear programming. Introduction to Hermitian eigenvalue problems and the singular value decomposition via the QR algorithm and the Lanczos process. Method of conjugate gradients. Prereq: MA 322. (Same as MA 522.)

CS 535 INTERMEDIATE COMPUTER GRAPHICS. (3)

Three-dimensional graphics primitives such as 3D viewing, lighting, shading, hidden line/surface removal, and more advanced topics such as solid modeling, image storage and representation, advanced raster graphics architecture and algorithms, advanced modeling techniques, and animation will be covered. Prereq: CS 335, CS 315, CS 321, and engineering standing.

CS 536 SITUATED COMPUTING. (3)

This course covers the fundamental concepts involved in understanding and engineering a closed-loop, sensing, reasoning, and actuating agent. Biological models of sensing and actuation will be discussed and related to modern artificial counterparts. The course consists of three major topic areas: vision, brain, and robotics. It will introduce students to the issues in computer and biological vision, to models of belief representation and modification, architectures for percept processing and reasoning, machine learning for vision, neural networks, path planning, intelligent localization based on visual cues, and to forward and inverse kinematics, intelligent grasping, and the integration of perception and action. Prereq: CS 460G or consent of instructor.

CS 537 NUMERICAL ANALYSIS. (3)

Floating point arithmetic. Direct methods for the solution of systems of linear algebraic equations. Polynomial and piecewise polynomial approximation, orthogonal polynomials. Numerical integration: Newton Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of commonly occurring problems in science and engineering. Prereq: CS/MA 321 or equivalent or graduate standing or consent of instructor. Knowledge of a procedural computer language is required. (Same as EGR/MA 537.)

CS 541 COMPILER DESIGN. (3)

Intermediate aspects of a compilation process with an emphasis on front-end issues. Practical issues in using compiler writing tools. Code generation for expressions, control statements and procedures (including parameter passing). Symbol tables, runtime organization for simple and structured variables. Using compilers and translators for automation (filters, programs writing programs). Prereq: CS 441 or consent of instructor.

CS 555 DECLARATIVE PROGRAMMING. (3)

The course covers fundamentals of propositional and predicate logic, and their uses in declarative programming to model and solve computational problems. Topics include propositional satisfiability, satisfiability testing techniques such as the DPLL algorithm, automated reasoning techniques for predicate logic such as resolution with unification and logic programming. Prereq: CS 315 and CS 375 or consent of instructor.

CS 570 MODERN OPERATING SYSTEMS. (3)

Brief review of classical operating system concepts (process and memory management, process coordination, device drivers, file systems, starvation/deadlock). Modern topics of files systems (log-structured file systems, distributed file systems, memory-based file systems), operating system design (monolithic, communication-kernel, extensible/adaptable, distributed shared memory), multiprocessor issues (scheduling, synchronization, IPC), security (internet attacks, encryption, defenses). Inspection and modification of actual operating system code (Linux). Prereq: CS 470 and engineering standing.

CS 571 COMPUTER NETWORKS. (3)

Principles of computer networks using current Internet technologies and protocols as examples. Routing algorithms and protocols; end-to-end transport; flow control; congestion avoidance and control; mail, web, and file transfer protocols; designing and implementing applications using common network APIs. Advanced topics, included as time permits, include network security, multicast, and quality of service. Prereq: CS 471G or consent of instructor.

CS 575 MODELS OF COMPUTATION. (3)

The formal study of computation, including computability and computation with limited resources. Church's thesis and models of computation. Formal languages and machines as recognizers of languages. The Chomsky Hierarchy of language types. Topics may include Turing machines or other basic models of computation; decidability and undecidability; basic complexity theory; finite automata and regular languages; pushdown automata and context-free languages. The course will cover primarily theory, including assignments that utilize concepts covered in lectures. Prereq: CS 375 and engineering standing, or consent of instructor.

CS 585 INTERMEDIATE TOPICS IN COMPUTER SCIENCE (Subtitle required). (3)

Topics to be selected by staff. May be repeated to a maximum of six credits, but only three credits may be earned by a student under the same topic. Prereq: Restricted to computer science and electrical engineering majors. Others by permission.

CS 587 ADVANCED EMBEDDED SYSTEMS. (3)

An advanced course in the design of embedded systems using state-of-the-art microcontroller hardware and software development tools. Topics include architecture support for real-time operating systems, language support for embedded and real-time processing, embedded and wireless networking. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as EE/CPE 587.)

CS 610 MASTER'S PROJECT. (3)

Design and implementation of a large computing project under the supervision of a member of the graduate faculty. Prereq: Satisfactory completion of the departmental foundational examinations.

***CS 611 RESEARCH IN COMPUTER SCIENCE. (1-9)**

Doctoral students conduct research work in computer science under supervision of a faculty member from the Department of Computer Science. May be repeated to a maximum of 4 semesters. Prereq: 36 credit hours of graduate course work in computer science and approval of the Departmental Committee on Higher Degrees.

CS 612 INDEPENDENT WORK IN COMPUTER SCIENCE. (1-3)

Reading course for graduate students in computer science. May be repeated to a maximum of nine credits. Prereq: Overall standing of 3.0, and consent of instructor.

CS 616 SOFTWARE ENGINEERING. (3)

This course provides an overview of the software engineering discipline: software requirements, software design, software construction, software management, and software quality. Testing and validation techniques will be emphasized throughout the course. Programs and program fragments will be developed and studied throughout the course to illustrate specific problems encountered in the lifecycle development of software systems. Prereq: At least nine hours of graduate computer science courses.

CS 617 REQUIREMENTS ENGINEERING. (3)

The course examines the requirements phase of the Systems Engineering and Software Engineering lifecycles in detail. Topics include: requirements elicitation, requirements specification, and requirements analysis. Verification and validation techniques are emphasized throughout the course. Students work in small groups to research and present a related topic. Prereq: Nine hours of graduate study.

CS 618 SOFTWARE DESIGN. (3)

This course provides an overview of the software design field: software design overview, software design process, a survey of software design method (such as structured design

methods, object-oriented design methods, concurrent design methods), design reviews, as well as discussing current topics such as aspect-oriented programming, refactoring, and design patterns. Testing and validation techniques are emphasized through the course. Program designs are developed and validated throughout the course. Readings and summaries of current and seminal journal papers and texts are required. Prereq: Nine hours of graduate study.

CS 621 PARALLEL AND DISTRIBUTED COMPUTING. (3)

This course provides graduate students in computer science and in other fields of science and engineering with experience of parallel and distributed computing. It gives an overview of parallel and distributed computers, and parallel computation. The course addresses architectures, languages, environments, communications, and parallel programming. Emphasis on understanding parallel and distributed computers and portable parallel programming with MPI. Prereq: Two 500 level CS courses, or consent of the instructor.

CS 622 MATRIX THEORY AND NUMERICAL LINEAR ALGEBRA II. (3)

Numerical solution of matrix eigenvalue problems and applications of eigenvalues. Normal forms of Jordan and Schur. Vector and matrix norms. Perturbation theory and bounds for eigenvalues. Stable matrices and Lyapunov theorems. Nonnegative matrices. Iterative methods for solving large sparse linear systems. Prereq: MA 522 or equivalent. (Same as MA 622.)

CS 623 PARALLEL ITERATIVE COMPUTING. (3)

The course will present advanced computational science techniques needed to support large scale engineering and scientific computations. Emphasis on iterative methods for solving large sparse linear systems and parallel implementations of iterative techniques. Prereq: CS 537 or consent of the instructor.

CS 630 FREE-FORM SOLID MODELING. (3)

This course follows the path from a conceptual vision of a shape to a concrete computer-based description that is suitable for manufacturing. It covers various solids modeling techniques, including volume representations, boundary representations, instantiation and Boolean combinations of shapes, and procedural generation such as sweeps. It discusses effective data structures and consistent and unambiguous part description formats to transfer a shape from a designer to a fabrication house, as well as problems with maintaining unambiguous topology in the presence of finite-precision geometry. Prereq: CS 535 or consent of instructor.

CS 631 COMPUTER-AIDED GEOMETRIC DESIGN. (3)

Overview of current concepts and issues in CAGD with emphasis on free-form surface design; mathematics of free-form curve and surface representations, including Coons patches, Gregory patches, Bezier method, B-splines, NURBS, triangular interpolants, and their geometric consequences; creating objects with smooth surfaces, covering assembling spline patches, geometric and parametric continuity, texture mapping onto complex shapes, subdivision surfaces, surface evolution, and global optimization. Prereq: CS 535 and CS 321, or consent of instructor.

CS 633 3D COMPUTER ANIMATION. (3)

This course covers the underlying principles and techniques of 3D computer animation. The topics covered include (1) modeling: the process of building the forms that will be animated, (2) rendering: the process of defining how the final picture in the model will look, (3) animation techniques: the process of creating in-between frames and keyframes, (4) compositing and special effects: the process of assembling various pieces of an image to get special two-dimensional effects, and (5) recording: the principles and techniques involved in putting animation frames onto film or video. Prereq: CS 335 or CS 535, or consent of instructor.

CS 634 MULTIMEDIA SYSTEMS. (3)

This course covers fundamental techniques in multimedia systems for capturing, managing, accessing and delivering digital media over local, wide-area and wireless network technology. The core topics will emphasize the digital media (images, video, audio) and the algorithms to generate, store, access and process it. Network concepts will be presented at a high level only. Prereq: CS 335 or consent of instructor.

CS 635 IMAGE PROCESSING. (3)

The course outlines applications of image processing and addresses basic operations involved. Topics covered include image perception, transforms, compression enhancement, restoration, segmentation, and matching. Prereq: Graduate standing and consent of instructor. (Same as EE 635.)

CS 636 COMPUTER VISION. (3)

This course covers digital image processing as well as advanced topics in computer vision. Initial topics include image formation, digital filtering, sensor modeling and feature detection techniques. The course will discuss how these algorithms are used to address general computer vision problems including three-dimensional reconstruction, scene understanding, object recognition, and motion analysis. Prereq: CS 536 or consent of instructor.

CS 637 EXPLORING VIRTUAL WORLDS. (3)

This course covers a mixture of core techniques related to systems for constructing and modeling virtual environments, such as model-building, image-based rendering, head-mounted hardware, stereo image generation, head-tracking, and immersive display technology. The core topics will be presented using textbooks and papers from the current literature. A substantial group project will provide hands-on experience with the concepts, algorithms and technology. Prereq: CS 335 and CS 635.

CS 642 DISCRETE EVENT SYSTEMS. (3)

The objective of the course is to prepare students for research in the field of supervisory control of discrete event systems (DES's). Logical models, supervising control. Stability and optimal

control of DES, complexity analysis and other related research areas will be covered. Prereq: Graduate standing or consent of instructor. (Same as EE 642.)

CS655 PROGRAMMING LANGUAGES. (3)

Overview of programming-language styles: imperative, functional, declarative, object-oriented, concurrent, simulation, glue. Non-local referencing environments, combinatorial control structures (backtracking, coroutines), higher-order types, lazy/eager evaluation. This course looks at features, not complete languages, touching on such languages as Ada, CLU, FP, Haskell, Icon, Lisp, ML, Modula-2, Modula-3, Pascal, Post, Prolog, Russell, CSim, Simula-67, and Smalltalk-80. Students will not become proficient in any of these languages, but rather will learn what contributions each has made to the state of the art in language design. Compiler-construction issues will be touched on only in passing. Prereq: CS 450G or consent of instructor.

CS660 TOPICS IN ARTIFICIAL INTELLIGENCE (Subtitle required). (3)

Advanced topics chosen from the following: knowledge representation, knowledge acquisition, problem solving, very high-level programming languages, expert systems, intelligent and deductive databases, automated theorem proving. May be repeated to a maximum of six credits, but only three credits may be earned under the same topic. Prereq: CS 505 and CS 560 or consent of instructor.

CS663 ARTIFICIAL INTELLIGENCE. (3)

Overview of modern artificial intelligence. Covers topics such as searching and game trees, knowledge representation techniques, methods to represent uncertain information and to reason about it, reasoning about action and planning, expert systems, machine learning and neural networks. Prereq: CS 555 or consent of instructor.

CS670 DISTRIBUTED OPERATING SYSTEM THEORY. (3)

This course covers advanced distributed operating system algorithms and theory. Topics such as distributed mutual exclusion, distributed event ordering, distributed deadlock detection/avoidance, agreement protocols, consistent global snapshot collection, stable predicate detection, failure recovery, faulty-tolerant consensus, leader election, process groups and group communication. Case studies of distributed operating systems such as LOCUS, Grapevine, V System, ISIS, Amoeba, Sprite, and Mach will be used as illustrations of the above algorithms. Prereq: CS 570 or consent of instructor.

CS671 ADVANCED COMPUTER NETWORKS. (3)

This course is intended to provide students with a solid understanding of the state of the art in computer network systems and protocols. Topics are covered in some depth, including both abstract and concrete aspects. The course begins with a study of implementations of the current Internet Protocols (TCP, UDP and IP); this provides a concrete backdrop for the rest of the course. The emphasis is on learning by doing, with programming and other hands-on assignments associated with most topics. Prereq: CS 571 or consent of instructor.

CS673 ERROR CORRECTING CODES. (3)

The problem of correct transmission of data in a noisy environment. The design and analysis of codes that efficiently (in terms of data rate and encryption and decryption speed) correct errors. Linear and nonlinear block codes, general encoding and decoding techniques, fundamental bounds, dual codes, cyclic codes. Specific codes will be studied, including Hamming, BCH, Reed-Muller, Reed-Solomon, trellis, and convolutional codes. Prereq: CS 515 or consent of the instructor.

CS674 HEURISTIC ALGORITHMS. (3)

Solving problems that are intractable. Exact techniques such as search integer programming and dynamic programming. Approximation techniques including local search, divide and conquer, and greedy algorithms. Methods based upon natural models such as force-directed iteration, simulated annealing, genetic algorithms, and neural networks. Examples will be selected from active research areas. Prereq: CS 515 or consent of instructor.

CS675 COMPUTABILITY AND COMPLEXITY. (3)

The formal study of computation, including computability and computation with limited resources. Church's thesis and models of computation. Topics will include Turing machines or other basic models of computation; reductions; computable and computably enumerable sets; Rice's Theorem; decidability and undecidability; basic complexity theory; NP-completeness and notions of intractability. Additional topics may include primitive recursive functions and Grzegorzczuk hierarchy; nondeterminism; the arithmetic hierarchy; formal complexity measures; time and space hierarchy theorems; the polynomial hierarchy and PSPACE; probabilistic complexity classes; circuit complexity. Prereq: CS 575 or consent of instructor.

CS677 COMPUTATIONAL GEOMETRY. (3)

Design and analysis of algorithms and data structures for geometric problems. The particular groups of problems addressed include convex hull construction, proximity, Voronoi Diagrams, geometric search, intersection. Prereq: CS 580.

CS678 CRYPTOGRAPHY. (3)

The study of security in communications and electronic computing. The encryption of data using public key systems, block ciphers, and stream ciphers. The basic tools for the design and analysis of such systems. Topics may include information theory, authentication, digital signatures, secret sharing schemes, complexity theoretic issues, probabilistic encryption, electronic commerce and others. Prereq: CS 515 or consent of the instructor.

CS680 SEMINAR IN COMPUTER SCIENCE. (2)

May be repeated to a maximum of four credits. Prereq: Consent of instructor, or two 500-level computer science courses.

CS683 FINITE-STATE MACHINES. (3)

Analysis and synthesis of sequential machines via state-tables and regular expressions. Equivalence, minimization and decomposition of machines. Partitions and structure-theory. Identification and diagnosis of finite-state machines by means of input-output experiments. Linear, finite-memory, and information-lossless machines. Prereq: EE 280.

CS684 SPECIAL TOPICS IN VISION, GRAPHICS AND MULTIMEDIA (Subtitle required). (3)

Advanced topics in computer graphics, computer vision, and multimedia systems. Specific topics include but are not limited to: isophotes, volume rendering, displacement mapping, geographic information systems (GIS), remote sensing topics, large scale sensor networks, video and audio encoding, visualization, immersive environments, and multimedia interfaces. May be repeated to a maximum of up to 6 credit hours, with no more than 3 in the same topic. Prereq: Consent of instructor.

CS685 SPECIAL TOPICS IN COMPUTER SCIENCE (Subtitle required). (3)

Topics to be selected by staff. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or two 500-level computer science courses.

CS686 SPECIAL TOPICS IN THE THEORY OF COMPUTATION (Subtitle required). (3)

Advanced topics in the theory of computation and the design and analysis of algorithms, including heuristic approaches for algorithm design, parallel computation, flow problems, parallel and concurrent processes and other areas of current research interest. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or CS 575 and CS 580.

CS687 SPECIAL TOPICS IN SYSTEMS. (3)

This course is a special topics course. The topic and syllabus will change each time the course is offered, reflecting the interests of the instructor. Typically the course will survey new research in the topic area but may also look back at canonical and ground breaking work from the past. Example course topics might include things such as web operating systems, global file systems, distributed object-based systems, fault tolerance/distributed check pointing, high-speed networking, network security, active networking, group communication models, compilers for parallel/distributed computing, recent programming languages, and data mining. Prereq: Consent of instructor.

CS689 SPECIAL TOPICS IN NUMERICAL AND SCIENTIFIC COMPUTING (Subtitle required). (3)

Advanced topics in numerical analysis, scientific computation, and complexity of continuous problems. Specific topics may include, but are not limited to: iterative methods, advanced parallel algorithms in numerical linear algebra, multivariate function approximation and integration. Prereq: CS 537 or consent of instructor.

CS690 OPERATING SYSTEMS THEORY. (3)

An advanced study of operating systems theory including cooperating sequential processes, processor scheduling, paging systems, and memory management. Prereq: CS 570.

CS748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CS749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CS767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CS768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

CS769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

CSC

Clinical Sciences

CSC528 LABORATORY TECHNIQUES FOR CLINICAL SCIENCES STUDENTS. (2)

Basic clinical laboratory principles and techniques; includes laboratory safety, sterilization procedures, pipetting, microscopy, routine culture and staining procedures, chamber counts, laboratory math calculations and statistics. Consent of instructor required for non-CS or non-CLS students.

CSC600 HUMAN PATHOPHYSIOLOGY. (4)

A study of disease processes, pathognomonic parameters, and pathologic factors that mediate disease. Diagnostic testing used to validate disease process will be used to emphasize to the

student the role of clinical sciences in the diagnosis of these complex disease states. Variances in disease in relationship to age will be examined. Prereq: Admission to the Clinical Sciences graduate program or consent of the course faculty committee.

CSC 601 HEALTH CARE POLICY AND ETHICS. (3)

The focus of this integrative course will be on policy and ethical issues confronting health care providers, health care systems, and particularly those issues specific to clinical sciences. Emphasis will be placed on current trends and anticipated challenges in providing humane and cost-effective health care services, with particular reference to the medically underserved and other at-risk populations. The different needs of special populations such as the aging, socioeconomically disadvantaged, insured and underinsured persons, ethically and culturally diverse groups such as recent immigrants and minorities will be explored. Discussion of technology dissemination delivery models, funding sources, human resources required to provide health care, alternative methods of coordinating these resources, and shifting from an "illness" orientation to a "wellness" approach will be included. The bioethics of health care delivery addressed will also include global considerations relative to health care, population dynamics, health care rationing, health care economics and assisted reproduction and transplantation issues.

CSC 602 CLINICAL SCIENCES SEMINAR (Subtitle required). (1)

Provides skills required of successful scientist to communicate effectively with peers, clients and general public. Each student will demonstrate an ability to interact with community, to function in an educator role by investigating a topic and preparing and delivering a presentation to the class and a community group. May be repeated up to five times. Prereq: Admission to the Clinical Sciences graduate program or consent of instructor.

CSC 604 RESEARCH METHODS FOR THE CLINICAL SCIENCES. (3)

Introduction to experimental design, data collection and data analyses for clinical biomedical research. Students will also examine ethical issues in biomedical science research using a case-study approach. Representative issues to be addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, review of protocols by human studies committees (institutional review boards or IRB) and informed consent.

CSC 606 ADVANCED LABORATORY STATISTICS AND ADMINISTRATIVE ANALYSIS. (3)

Applications-based statistical and analytical software is used to demonstrate Continuing Quality Improvement (CQI) adherence to Federal regulation, NCCLS/IFCC protocols, and other accrediting agency requirements. Special emphasis is on defining and controlling unstable error through a statistical modeling approach. Documentation structures for quality operations policy; and processes, procedures and implementation of a quality system are examined with special attention to assuring quality of point-of-care testing. Detailed computerized study of method comparison includes receiver operator charting (ROC). Computerized diagnostic screening programs are used to evaluate prevalence, sensitivity, specificity, and predictive values. Utilization of management systems to track expenses, budget/inventory management, employee scheduling, productivity evaluations, process improvement and restructuring are demonstrated. Computerized performance management systems and innovations in compliance strategies are featured. Student evaluation will be based on examinations, projects, and papers.

CSC 615 REPRODUCTIVE LABORATORY SCIENCE. (1)

The course includes basic cell biology and principles of genetics; a review of the male reproductive system including hormonal control, early development, spermatogenesis and fertilization; a review of the female reproductive system including hormonal control, early development, oogenesis, the menstrual cycle, fertilization and early implantation.

CSC 616 ANDROLOGY. (1)

The course will include a review of male physiology, spermatogenesis and fertilization. The procedures appropriate for evaluation of male fertility will be presented and conditions and diseases associated with male factor infertility will be discussed. Basic and advanced andrology tests and procedures for both diagnostic and treatment purposes will be reviewed. Micromanipulation procedures (intracytoplasmic injection ICSI) and treatments using epididymal and testicular sperm will be introduced. Prereq: CSC 528, CSC 615 or consent of the instructor.

CSC 617 REPRO MICROBIOLOGY AND IMMUNOLOGY. (1)

A review of basic immunology will be covered including an overview of the organs, tissues and cells that comprise the immune system, different forms of immunity and the basis of the immune response. The reproductive immunology segment will focus on antibodies associated with infertility and reproductive failure, and also will include properties of the immune system during pregnancy. Microbiology will be covered as it pertains to assisted reproductive technology, focusing on: (1) causes of infertility may be transmitted in the assisted reproductive technology (ART) laboratory and (3) prevention of contamination in the ART facility. Prereq: CSC 528, CSC 615 or consent of instructor.

CSC 618 LABS IN ANDROLOGY, REPRODUCTIVE MICROBIOLOGY AND IMMUNOLOGY. (1)

Student laboratories will focus on semen analysis, sperm function tests, and preparation of partner and donor semen for artificial insemination. Advanced andrology procedures, including the sperm penetration assay and the hemi-zona assay, will be discussed and protocols provided. Reproductive Immunology: Students will perform procedures for detecting antisperm antibodies in semen and in serum. Sperm-cervical mucus testing and cross-testing will be performed using controlled donor semen and bovine cervical mucus. Reproductive Microbiology: Organisms associated with sexually transmitted diseases, infertility, and reproductive failure will be demonstrated with representative demonstrations consisting of: stained slide

bacteria, fungi and parasites and electron micrographs of viruses; organisms on appropriate culture media; examples of testing for identification. Students will use data from the demonstrations to develop summaries for the correct isolation and identification of these organisms. Prereq: CSC 528, CSC 615, CSC 616, and CSC 617 or consent of instructor.

CSC 620 ANDROLOGY. (3)

Review of the male reproductive system including hormonal control, early development, spermatogenesis and fertilization. Basic and advanced andrology procedures will be discussed and laboratories will focus on semen analysis, sperm function tests, and preparation of partner and donor semen for artificial insemination. Prereq: BIO 549.

CSC 621 EMBRYOLOGY/ASSISTED REPRODUCTIVE TECHNOLOGY. (3)

Review of female reproductive system including hormonal control, early development, oogenesis, the menstrual cycle, fertilization and early implantation. Assisted reproductive technology procedures will be discussed with the aid of photographs and videos and laboratories will focus on culturing and manipulating mouse embryos. Prereq: BIO 549, CSC 620.

CSC 623 REPRODUCTIVE IMMUNOLOGY. (1)

Immunology associated with fertilization, implantation, and early development in humans. Various procedures for detecting antibodies associated with reproduction will be discussed and the laboratories will assess both direction and indirect antibodies on spermatozoa. Prereq: BIO 494G, CSC 620, CSC 621.

CSC 624 CRYOPRESERVATION OF REPRODUCTIVE TISSUES. (2)

Principles of methods of cryopreservation will be covered and procedures for freezing human oocytes, embryos, and ovarian and testicular tissues will be detailed. Legal, ethical and policy issues associated with cryopreservation will be introduced. Laboratory sessions will focus on freezing human spermatozoa and mouse gametes and embryos. Prereq: CSC 620 and CSC 621.

CSC 625 POLICY, MANAGEMENT, ETHICAL AND LEGAL ISSUES IN ASSISTED REPRODUCTION. (2)

Current and anticipated regulations of assisted reproductive technology will be discussed. Legal and ethical concerns associated with ART will be introduced and case studies will focus on specific issues. Prereq: CSC 620, 621, 624.

CSC 626 CLINICAL PRACTICUM IN ANDROLOGY LABORATORY. (2)

Students must complete the checklist procedures while working under supervision. Andrology procedures will include semen analysis, sperm function tests, microbiology, preparation for artificial insemination, and cryopreservation of male gametes. Prereq: CSC 620, 621, 623, 624, 625.

CSC 627 CLINICAL PRACTICA IN ART LABORATORY. (3)

Students must complete the checklist procedures while working under supervision. All ART procedures including in vitro fertilization, ICSI, zona hatching and cryopreservation of gametes and embryos will be practiced under supervision using appropriate models for practice. Prereq: CSC 620, 621, 623, 624, 625.

CSC 628 RLS SEMINAR. (1)

Students in the RLS seminar will critique research papers in the field, will develop and present PowerPoint presentations on subjects covering andrology, ART, cryopreservation of human reproductive tissue, management issues in the reproductive laboratory, and policy, ethical and legal issues in ART. May be repeated for total of two credits. Prereq: CSC 528, CSC 615, CSC 616, CSC 617, CSC 618, CSC 619, CSC 621, CSC 624, CSC 625 or consent of instructor.

CSC 630 RLS RESEARCH. (1-5)

Research projects for students in Reproductive Laboratory Science. Students will complete web-based modules, "The Scientific Method and the Art of Research" prior to project initiation. Projects should be related to the student's individual interest and should address an area in reproductive laboratory science. Projects should be under the supervision of a faculty member with expertise in the project area. Prereq: CSC 528, CSC 615, CSC 616, and CSC 617 or consent of instructor. Additional CSC courses in the RLS track may be required as prerequisites depending on the nature of the research project.

CSC 670 HISTOCOMPATIBILITY AND IMMUNOGENETICS. (3)

In-depth study of the human histocompatibility polymorphisms will include genetic inheritance, alleles, typing methodologies, and matching requirements for solid organ and tissue transplantation. The human leukocyte antigen (HLA or MHC) system and its role in transplant rejection will be the major focus, however minor histocompatibility systems will also be examined. Specific and detailed correlation of didactic information will be integrated with case studies to explore current concepts of immunologically-based molecular methods of antigen detection and their impact on clinical practice. Prereq: Immunology course.

CSC 672 TRANSPLANTATION SCIENCE. (3)

Course content includes immunological, biochemical and genetic concepts and molecular biology related to the clinical process of transplantation. Cellular and molecular mechanisms will be an intense focus of this course. Solid organ and tissues transplantation, the need for donor organs and tissues, compatibility requirements for successful transplantation of each type of organ and tissue, immunosuppressive therapy, and research opportunities that may impact successful transplantation and tissue availability will be examined. Literature review and presentation of papers on assigned topics will be required. Prereq: CSC 670 or consent of instructor.

CSC 673 FLOW CYTOMETRY. (3)

This course focuses on principles, applications and quality assurance of flow cytometry in

research and clinical use in hematology and transplantation. Emphasis is placed on the biological and physical principles underlying flow cytometry, specimen processing, operation and specific application in the identification of various hematopoietic and other cells. The use of flow cytometry to screen transplant recipients, cross-match donor and potential recipient, post-transplant monitoring, identifying HLA antigens, diagnosing hemoproliferative disorders, monitoring immunosuppressive therapy and stem cell isolation is presented. Evolving applications in other disciplines such as microbiology and clinical chemistry, will also be explored. Prereq: CSC 670, or CSC 674 and CSC 675, or consent of instructor.

CSC 674 HEMOPOIESIS. (3)

Normal and abnormal hemopoiesis is examined. Special emphasis is placed on understanding the relationship of hemopoiesis to hemoproliferative and immunologic disease; transplantation science, and medical applications. Prereq: Course(s) in hematology and hematologic disease, or consent of instructor.

CSC 676 ADVANCED HEMOSTASIS. (3)

This course will review current knowledge and hypotheses regarding both hypo and hyper coagulable states, drug induced disorders of hemostasis, treatment regimes, and the present state of the art in laboratory testing for high-risk individuals. Prereq: Course in hemostasis including normal mechanisms and pathological states, or consent of instructor.

CSC 677 ERYTHROCYTE DISORDERS. (3)

Advanced review of inherited and acquired disorders of erythrocyte production, destruction and loss including the hemoglobinopathies. The course will address the pathophysiology, laboratory testing and treatment of each disorder. Prereq: CSC 674.

CSC 690 CLINICAL SCIENCES THESIS RESEARCH. (1-6)

Research, design, protocol development and production of thesis are included. Grade will be reported following evaluation of written product by the thesis committee. Prereq: Successful completion of final/comprehensive examinations for the Clinical Sciences graduate program.

CSC 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of CSC 769 residence credit following the successful completion of the qualifying exams.

CSC 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CSC 789 RESEARCH APPRENTICESHIP. (1-4)

The goal of this course is to ensure that the student understands and can apply research methods to identifying a research problem, developing a proposal, conducting an investigation, and preparing a journal-quality research paper. Students will work closely with a clinical sciences researcher to develop these research skills. The course requirements and format will vary depending upon the student's prior experience. Prereq: Admission to the Clinical Sciences doctoral program.

CSC 790 CLINICAL SCIENCES DISSERTATION RESEARCH. (0-12)

Research design, protocol development and production of written dissertation after completion of the dissertation research. Grade will be issued following evaluation of the dissertation by committee. Candidates for the degree must complete nine credit hours in each of two successive semesters of dissertation research. Prereq: Successful completion of the Clinical Sciences qualifying examinations.

CSD Communication Sciences and Disorders

#CSD 120 CAREERS IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY. (1)

An overview of the Speech-Language Pathology and Audiology profession(s) including aspects of professional practice, areas of specialization, professional issues and trends, and career paths and opportunities. The course will consist of assignments, lectures and interactive discussions led by faculty and visiting professionals designed to expand students' understanding of the profession(s) and to assist in educational and career planning and discernment.

CSD 220 AMERICAN SIGN LANGUAGE I AND THE CULTURE OF THE DEAF COMMUNITY IN AMERICA. (3)

An introductory course in American Sign Language (ASL), the native language of the Deaf community in America, this course lays a foundation for effective, respectful, participation in a culturally and linguistically diverse society. The course will employ an immersion approach to develop basic skills in conversational ASL and fingerspelling, as well as an appreciation of the basic grammatical principles of ASL, the historical and cultural background of the language, linguistic and ethical principles related to use of ASL, and the role of Deaf culture in society. Prereq: CSD or HHS majors or permission of the instructor.

CSD 277 INTRODUCTION TO COMMUNICATION DISORDERS. (3)

An introduction to disorders of speech, language, and hearing. The course includes definitions, symptomatology, etiologies, and basic intervention principles for these disorders.

CSD 285 APPLIED PHONETICS. (3)

Study of the phonetic structure of the English language with requirement of mastery of the International Phonetic Alphabet. Emphasis will be placed on phonetic transcription, and application will be made for students interested in communication disorders, communications, telecommunications, and theater.

CSD 320 AMERICAN SIGN LANGUAGE II AND THE CULTURE OF THE DEAF COMMUNITY IN THE US. (3)

An intermediate level course in American Sign Language (ASL), the native language of the Deaf community in America, this course will use an immersion approach to develop skills in conversational ASL and fingerspelling, as well as an appreciation of the grammatical principles of ASL, the historical and cultural background of the language, linguistic and ethical principles related to use of ASL, appropriate use of interpreters, and the role of Deaf culture in society. Prereq: Successful completion of CSD 220 (ASL I) or permission of instructor.

CSD 378 ANATOMY AND PHYSIOLOGY OF SPEECH. (3)

A detailed investigation of structures and functions supporting speech production: respiration, phonation, articulation, and resonance. Neural bases of speech and language will also be introduced. Prereq: CSD major or permission of instructor.

CSD 402 SPEECH AND HEARING SCIENCE. (3)

Investigation of the physiological and acoustic bases of speech and hearing; the physics of sound and the scientific bases of human speech production. Students will have exposure to instrumentation designed to increase understanding of human communication. Prereq: CODI major or permission of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CSD 410 LANGUAGE DEVELOPMENT THROUGH THE LIFESPAN. (3)

An introduction to the normal development of language in individuals from birth to advanced age. Topics include theories of language acquisition; prelinguistic development; development in each of the language domains (phonology, semantics, morphology and syntax, and pragmatics); the relationships between oral language, written language, and academic progress; and cultural differences. Prereq: CODI major or consent of instructor.

CSD 420 AMERICAN SIGN LANGUAGE III. (3)

This course is designed to build receptive and expressive language abilities in American Sign Language (ASL). You will learn to translate and produce narrative language. Instruction includes an advanced level vocabulary, the structure of the language, as well as an expanded exposure to the history and culture of Deaf people. ASL III is taught solely in ASL by an instructor who only uses ASL to communicate. You will not be allowed to use your voice in this class at all. The American Sign Language Teaching Association (ASLTA) recommended curriculum will be followed. Prereq: Successful completion of CSD 320 or permission of the instructor.

CSD 424 AMERICAN SIGN LANGUAGE IV. (3)

This course is designed to further develop your intermediate receptive and expressive language ability in American Sign Language (ASL). You will learn to translate and produce narrative language, temporal & distributional inflections, ASL numbers and ASL classifiers. Instruction includes an upper intermediate level vocabulary, the structure of the language, as well as an expanded exposure to ASL literature. ASL IV is taught solely in ASL by a native speaker of ASL to communicate as recommended by American Sign Language Teachers Association (ASLTA). The ASLTA curriculum will be followed. Prereq: Successful completion of CSD 420 or permission of the instructor.

CSD 481 CLINICAL EXPERIENCE IN COMMUNICATION DISORDERS. (3)

Supervised observation and shadowing of assessment and intervention to familiarize students with diagnostic and clinical services in communication disorders at various settings such as schools, clinics, long term care, home health, and/or hospitals. Lecture: 1 hour; laboratory: 4 hours per week. Prereq: CSD 402 or consent of instructor; CODI majors only. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CSD 482 CLINICAL MANAGEMENT OF COMMUNICATION DISORDERS I. (3)

Introduction to remediation of speech disorders in individuals from birth through adulthood and from culturally and linguistically diverse backgrounds. Emphasis on strategies to deal with disorders in voice, fluency, and articulation. Prereq: CSD 402 or consent of instructor; CODI majors only.

CSD 483 CLINICAL MANAGEMENT OF COMMUNICATION DISORDERS II. (3)

Introduction to remediation of language disorders in individuals from birth through adulthood and from culturally and linguistically diverse backgrounds. Emphasis on strategies to deal with disorders in child language, aphasia, and other language-based disorders, including Alzheimer's Disease and dementia. Prereq: CSD 402 or consent of instructor; CODI majors only.

CSD 484 INTRODUCTION TO DIAGNOSTIC PROCEDURES IN SPEECH-LANGUAGE PATHOLOGY. (3)

Introduction to the principles, techniques, and tools used to develop and implement a diagnostic protocol. Prereq: CSD 402 or consent of instructor; CODI majors only.

CSD 491 AUDIOLOGY. (3)

Introduction to symptomatology and etiologies of hearing impairment and principles of hearing assessment. Topics include: peripheral hearing impairment; central and nonorganic

hearing impairment; screening for hearing impairment; hearing conservation; pure tone air and bone conduction threshold testing; basic speech audiometry; masking; audiometric calibration; and acoustic immittance screening. Prereq: CSD 402 or consent of instructor; CODI majors only.

CSD 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)

Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient's individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as AT 500, HS 500, CLS 500, CNU 500, PAS 500.)

CSD 520 INTRODUCTION TO MANUAL COMMUNICATION. (2)

An introduction to manual communication systems, including American Sign Language and other commonly-used manual sign systems. Includes study of the characteristics and use of existing manual communication systems. Students will learn to code and decode sentences using a combination of signs and fingerspelling. Lecture: one hour; laboratory: two hours per week.

CSD 571 NEURAL BASES OF SPEECH, LANGUAGE, AND HEARING. (3)

Detailed investigation of the neuroanatomy and neurophysiology of speech, language, and hearing from a communication sciences perspective. Emphasis on anatomy and physiology of the central nervous system, neurodevelopment, and normal neural substrates involved in speech, language, and hearing. Prereq: CSD 378 or permission of the instructor.

CSD 588 VARIABLE TOPICS IN COMMUNICATION DISORDERS (Subtitle required). (1-3)

In-depth study of a current problem or issue related to the communication disorders profession. May be repeated for a maximum of 6 credits. A title is assigned each time the course is offered. Prereq: Undergraduate or master's level CODI majors only and consent of the instructor.

CSD 589 INDEPENDENT STUDY IN COMMUNICATION DISORDERS. (1-6)

Independent study for undergraduate or master's level graduate students with an interest in a specific problem or issue in communication disorders. May be repeated for a maximum of six credits. Prereq: Undergraduate or master's level graduate CODI majors only and consent of the instructor.

CSD 591 AURAL REHABILITATION. (3)

Management strategies for people with hearing loss. Topics include: variables affecting hearing handicap; characteristics, selection, counseling, and orientation in regard to amplification systems; acoustic, perceptual and visual aspects of speech; assessment and management of problems resulting from hearing loss across the lifespan. Prereq: CSD 420 or consent of instructor; undergraduate and graduate CODI majors only. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

CSD 621 ALTERNATIVE AND AUGMENTATIVE COMMUNICATION. (3)

A detailed investigation of the use of augmentative and alternative communication systems with individuals with moderate to severe communication disorders. Participants will examine the full range of augmentative/alternative communication systems and the related assessment and intervention considerations. Prereq: EDS 375 or equivalent or graduate status in CODI or RHB, or consent of instructor.

CSD 647 LANGUAGE DISORDERS IN DEVELOPMENTALLY YOUNG INDIVIDUALS. (3)

A detailed investigation of language disorders and language intervention in developmentally young populations. Includes an in-depth discussion of prevention strategies, service delivery models, assessment tools and paradigms, and intervention strategies. Provides practice in self-directed inquiry. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 648 LANGUAGE DISORDERS IN SCHOOL-AGE POPULATIONS. (3)

A detailed investigation of language disorders and language intervention in school-age populations. Includes an in-depth discussion of prevention strategies, service delivery models, related cultural diversity issues, and assessment and intervention principles and strategies. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 649 COMMUNICATION, AAC, AND TECHNOLOGY FOR INDIVIDUALS WITH AUTISM SPECTRUM DISORDERS. (3)

This course prepares persons who will be serving individuals with ASD. The focus of the course is on developing communication in this population, exploring augmentative and alternative communication devices, and using technology to teach individuals with ASD. The course will provide information on (a) typical language development, (b) characteristics of persons with autism and their unique communication needs, (c) assessment of communication needs, (d) development of communication goals, (e) development and delivery of effective strategies for teaching communication, and (f) use of technology to teach individuals with ASD. The objectives of this course are designed to provide students with a comprehensive knowledge of the communication characteristics of persons with autism, the state-of-the-art techniques in providing communication services for this population, and research-based strategies utilizing technology in teaching individuals with ASD. This course will be taught jointly by the Department of Special Education & Rehabilitation Counseling and the Department of Communication Sciences and Disorders. Prereq: EDS 601, EDS 661, EDS 662. (Same as EDS 662.)

CSD 654 CLINICAL ORIENTATION IN COMMUNICATION DISORDERS. (3)

A lecture-laboratory experience designed to orient the student to the professional activities in speech-language pathology. Lecture, one hour; laboratory, four hours per week. Prereq: Graduate status in CODI or consent of instructor.

CSD 657 CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY. (1-3)

Experience with children and adults in the assessment and management of communication and swallowing disorders. Lecture, one hour; practicum, four hours per week. May be repeated to a maximum of 12 credits. Prereq: Graduate status in CODI, CSD 481 or equivalent, and CSD 654.

CSD 659 CLINICAL ROTATION IN SPEECH-LANGUAGE PATHOLOGY. (1-12)

Supervised clinical experience in the evaluation and management of children and adults. Up to 40 laboratory hours per week (at site all day). May be repeated up to 36 hours. Prereq: Graduate status in CODI, successful completion of 6 hours of graduate clinical practicum and consent of instructor.

CSD 661 PHONOLOGICAL DEVELOPMENT AND DISORDERS. (3)

A comprehensive course in phonological theory, assessment, and treatment. Advanced principles of diagnosis and remediation for patients across the age span and from culturally and linguistically diverse backgrounds. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 670 VOICE DISORDERS. (3)

Assessment and management of adults and children with disorders of voice and resonance. Includes laryngectomy. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 674 DISORDERS OF FLUENCY. (3)

Analysis, identification and management of fluency disorders. Prereq: Permission of instructor.

CSD 675 LOW INCIDENCE COMMUNICATION DISORDERS (Subtitle required). (1)

Assessment and management of adults and children with low incidence communication disorders including disorders of fluency, craniofacial anomalies and tracheostomy. Topics may vary depending on current trends in the discipline. Prereq: Graduate status in CODI or consent of instructor.

CSD 677 APHASIA AND RELATED DISORDERS. (3)

Identification, appraisal, diagnosis, and clinical management of persons with aphasia and related disorders. Primary emphasis is given to aphasia and apraxia of speech in adults. Prereq: Graduate status in RHB or CODI or consent of instructor.

CSD 701 RESEARCH METHODS IN COMMUNICATION DISORDERS. (3)

Principles and methods for designing research in communication sciences and disorders. Topics include: introduction to the scientific method, research designs, measurement techniques, formulating research questions, writing and evaluating research reports, and ethics of research. Prereq: Graduate standing in Communication Disorders.

CSD 710 COGNITIVE COMMUNICATION DISORDERS. (3)

The class will focus on the neuroanatomy and pathology of traumatic brain injury, right hemisphere disorders, and dementia. Students will learn current theory regarding differential diagnosis and treatment of these disorders. Prereq: CSD 571 or permission of instructor.

CSD 744 ADULT SWALLOWING AND MOTOR SPEECH DISORDERS. (3)

Analysis, identification and management of adult neurogenic disorders of speech and swallowing. Emphasis will be placed on clinical management of adult dysarthria and the concomitant communication and swallowing disorders. Prereq: CSD 571 or permission of instructor.

CSD 745 PEDIATRIC FEEDING AND MOTOR SPEECH DISORDERS. (3)

Analysis, identification and management of pediatric disorders of speech, feeding and swallowing. Emphasis will be placed on clinical management of dysarthria and the concomitant communication, feeding and swallowing disorders. Prereq: CSD 571 or permission of instructor.

CSD 747 SEMINAR IN LANGUAGE DEVELOPMENT IN CHILDREN. (3)

A contemporary overview of processes governing language acquisition and their role in atypical language development. Topics include: theories of language acquisition; roles of perception, cognition, social interaction, and genetics on language acquisition; and influence of atypical situations on language. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CSD 761 APPLIED PHONOLOGY: DEVELOPMENT AND DISORDERS. (3)

Critical review and discussion of clinical and developmental phonology research and phonological theories. Study of the bases for normal and disordered phonological development from birth through age twelve. Study of procedures for assessment and treatment of children with phonological disorders including the development of individualized remediation plans for expediting intelligibility gains. Course will include information regarding second language acquisition and oral and written language as these relate to phonological systems. Prereq:

Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CSD 771 DYSPHAGIA. (3)
This course includes a review of the anatomy and physiology of normal deglutition; the nature and characteristics of swallowing disorders; methods of evaluation and management of dysphagia in adults and children; and consideration of medical conditions such as aspiration pneumonia, tracheostomy, and other complicating factors associated with dysphagia. Also included is a brief review of professional issues relating to efficacy of treatment; third party reimbursement; and roles and responsibilities of other health care professionals in feeding and swallowing. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 775 SEMINAR IN LITERATE LANGUAGE. (3)
A review and discussion of the literature concerning literate language. Topics include: 1) characteristics of literate language; 2) differences between literate and oral language; 3) emergent literacy; 4) theories of the reading and writing processes; 5) components, development, strategies, and factors involved in typical reading and writing; 6) literate language and speaking; and 7) issues pertaining to atypical readers and writers. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 788 VARIABLE TOPICS IN COMMUNICATION DISORDERS (Subtitle required). (1-3)
In-depth study of a current problem or issue related to the communication disorders profession. May be repeated for a maximum of nine credits. A title is assigned each time the course is offered. Prereq: Graduate status in RHB or CODI or consent of instructor.

CSD 789 INDEPENDENT STUDY IN COMMUNICATION DISORDERS. (1-6)
Independent study for graduate students with an interest in a specific problem in communication disorders. May be repeated to a maximum of 12 credits. Lecture, 1-6 hours; laboratory, 2-12 hours per week. Prereq: Graduate status and consent of instructor.

DES Design

DES 100 DESIGN IN YOUR WORLD. (3)
Understanding how design unfolds from and informs culture, students garner appreciation for and creatively experiment with the embedded practice of design as a basic human response for inhabitation, work, play, and worship. Prereq: For students in all colleges except for the College of Design.

DHN Dietetics and Human Nutrition

DHN 101 HUMAN NUTRITION AND WELLNESS. (3)
Food composition, digestion, absorption and metabolism as related to selection of nutrients essential for human life, growth, reproduction, lactation, wellness and physical activity. Not open to DHN majors except hospitality management students.

DHN 212 INTRODUCTORY NUTRITION. (3)
An elementary study of the principles of nutrition and the application of these principles to providing adequate nutrition to humans. The chemical and physiological approach to nutrition is emphasized. Prereq: CHE 105 or CHE 103 or CHE 108; plus, past or concurrent BIO 103 or BIO 148 or BIO 152 or BIO 208.

DHN 241 FOOD SERVICE SANITATION. (1)
This course covers the principles of food microbiology, important food borne diseases, standards that are enforced by regulatory agencies, and applied measures for the prevention of food borne diseases and other microbiological problems. It leads to certification from the National Restaurant Association.

DHN 301 DIETETICS PRACTICE. (2)
This course provides a study of dietetic practice including professional ethics, standards of practice, scope of practice, educational pathways, credential attainment and maintenance, competencies required for entry level practice, responsibilities as a professional. Experiences allow exploration of dietetics practice in medical nutrition therapy, food service management and delivery of nutrition services. Prereq: DHN 212 and completion of dietetics premajor requirements with a cumulative GPA of 2.4

DHN 302 PRINCIPLES OF FOOD PREPARATION. (3)
The physical and chemical principles involved in the preparation of foods and the application of these principles to control for quality outcomes. Laboratory experiences link theory to practice to ensure that the standards of safety and overall quality factors are applied to maximize nutrient retention while maintaining the acceptability and nutritional qualities of foods produced for individuals and groups. Lecture, one hour; laboratory, four hours. Prereq: DHN 241; limited to DHN and Family and Consumer Science (FSC) department majors and with permission of instructor.

DHN 304 EXPERIMENTAL FOODS. (3)
Chemical and physical properties of food and the changes resulting from processing and preparation. Experimental study of variations in ingredients and preparation methods on food quality. Design, execute and report an independent research project. Lecture, two hours; laboratory and discussion, three hours per week. Prereq: DHN 302; CHE 230 or CHE 236.

DHN 311 NUTRITIONAL BIOCHEMISTRY. (3)
An introductory study of the biochemical basis of nutrition – the physiochemical properties of nutrients and other essential biochemicals and their role in physiological and metabolic processes. Prereq: CHE 230 or CHE 236 must be completed prior to DHN 311; PGY 206 must be taken concurrently or prior to DHN 311.

***DHN 312 LIFE CYCLE AND COMMUNITY NUTRITION I.** (3)
A study of the physiological changes occurring in the human life cycle with associated nutrient needs. The course focuses on assessment and determination of nutrition issues and nutrition education for individuals from in-utero to toddlerhood. Nutrition education programs on a community level will be addressed at each stage of the life cycle. Prereq: DHN 212; Limited to Dietetics and Human Nutrition Majors only.

#DHN 313 LIFE CYCLE AND COMMUNITY NUTRITION II. (3)
A study of the physiological changes occurring in the life cycle with associated nutrient needs. The course focuses on assessment and determination of nutrition issues and nutrition education for individuals from childhood to old age. Nutrition education programs on a community level will be addressed at each stage of the life cycle. Program planning, evaluation and grant writing will also be covered and applied in this course. Prereq: DHN 312; limited to Dietetics and Human Nutrition majors only.

DHN 315 NUTRITION ISSUES IN PHYSICAL ACTIVITY. (3)
This course explores the special nutritional needs of a person engaged in regular physical activity. Emphasis will be placed on selecting a diet to achieve optimal performance and overall wellness. Athletic performance enhancing supplements will be examined to determine the efficacy and safety of such products. Prereq: DHN 212 and restricted to Dietetics or Human Nutrition majors.

DHN 318 HUNGER, FOOD BEHAVIOR, AND THE ENVIRONMENT. (3)
This course brings together the role of the biological processes that influence hunger with the physiological responses to cues in the social and neighborhood environment that influence what we eat. The connection between what we eat and lifelong health consequences of dietary patterns can be seen at the individual, familial, and community level. Topics in this course will include hunger and satiety, taste preferences and food aversions, food policy, sustainability, the role of the food environment, and nutrition policy. Prereq: DHN 101, DHN 212, or consent of instructor.

DHN 319 SEMINAR IN HUNGER STUDIES. (1)
This course provides a multi-disciplinary approach to hunger studies. Students will develop a written paper and professional seminar on a current hunger-related issue. Prereq: DHN 318: Hunger, Food Behavior, and the Environment.

DHN 320 EXPERIENTIAL LEARNING IN HUNGER STUDIES. (2)
Students will engage in experiential learning in a pre-approved volunteer, internship, study abroad, or paid work experience related to the world fight against hunger and social injustice. Prereq: DHN 318: Hunger, Food Behavior, and the Environment.

DHN 340 INSTITUTIONAL PURCHASING. (3)
Fundamental principles and purchasing techniques for the selection of food and nonfood items in a food service system. Prereq: ECO 201 or 202; limited to Dietetics and Hospitality Management and Tourism majors only.

DHN 342 QUANTITY FOOD PRODUCTION. (4)
An introduction to the production and service of food in quantity, to include the application of production techniques and controls, menu planning and service. Lecture, two hours; laboratory, 4.5 hours per week. Prereq: DHN 302 or HMT 308; DHN 241; limited to Dietetics and Hospitality Management and Tourism majors.

***DHN 346 MANAGEMENT FOR FOOD INDUSTRIES.** (3)
This course examines the evolving field of human resources in the food and hospitality industry. Students will examine the changing roles and responsibilities of the manager. Topics will include fundamental principles and purchasing techniques in the food service system as well as planning, selection, placement, training, disciplining employees, labor relations and compensation. Prereq: ECO 201; Dietetics majors only.

DHN 374 RESEARCH AND WRITING IN DIETETICS. (3)
Study of research, ethics, and methodology for designing, managing, and synthesizing evidence based research in dietetics. Students develop critical thinking, writing, and oral communication skills through scientific literature searches, interpretation of data, and development of a news brief, newsletter article, and literature review with accompanying oral presentations. Prereq: DHN 212 and STA 210; limited to Dietetics majors only. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

DHN 403 COMMUNITY NUTRITION AND WELLNESS. (3)
Study of nutrition education programs on a community level. Experience is provided for presenting nutrition in health clinics, health camps, schools, state institutions, family resource centers, and corporate wellness programs. Attention is paid to special populations, including pregnant women, children, adults, the elderly, and persons with disabilities. Prereq: DHN 312.

DHN 408G SEMINAR IN DIETETICS AND HUMAN NUTRITION. (1)

Investigation of recent research in dietetics and human nutrition. May be repeated to a maximum of three credits. Nutritional Sciences graduate students may not enroll for graduate credit. Prereq: DHN 510 or consent of instructor.

DHN 474 RESEARCH IN NUTRITION: THEORY. (3)

A required course which allows the student to explore research opportunities in the health field, identify potential funding sources, review institutional review board requirements, and develop a grant proposal based on their own interests in nutrition. Prereq: Human Nutrition majors only. Senior standing. DHN 311 (may be taken concurrently with consent of instructor). This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

DHN 475 RESEARCH IN NUTRITION: APPLICATION. (3)

A required course which allows the student to design a research study, write a grant, prepare a comprehensive literature review, design a survey, conduct statistical analyses on collected data, and prepare a professional article and poster to present at University and regional events. Prereq: Human Nutrition majors only. Grade of C or better in DHN 474. This is a writing-intensive (W) course approved to fulfill the upper tier of the graduation writing requirement (GWR). To receive W credit for this course, you must have successfully completed the first-year writing requirement (ENG 104 or its equivalent) and have completed at least 30 hours of course work. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

DHN 480 DIETETICS PRE-PROFESSIONAL PRACTICE. (1-6)

Pre-professional experiences are designed to allow students to apply knowledge and skills in assessing, planning, implementing, and evaluating nutrition care in various health delivery systems. Student experience will include opportunities to link theory and practice while developing the skills and attitudes essential to practice in the dietetics profession. Placement of experiential settings must have the approval of the appropriate Director of Dietetics in Nutrition and Food Science. A minimum of 60 supervised practice hours will constitute one semester credit hour with prior approval. May be repeated to a maximum of six credits. Prereq: Consent of instructor and senior status in the Dietetics Didactic Program.

DHN 510 ADVANCED NUTRITION. (3)

Application of biochemistry, physiology and nutrition to the understanding of the utilization and function of nutrients in the body as related to the structure, function and metabolic needs of cells/organ systems. Prereq: DHN 311 or BCH 401G or equivalent; PGY 206; Dietetics and Human Nutrition Majors or admission to DHN/NS graduate program.

DHN 512 MEDICAL NUTRITION THERAPY I. (4)

This course explores changes in nutrient metabolism related to biochemical and physiological alterations in disease conditions and application of the Nutrition Care Process. Content includes case study evaluations, medical nutrition therapies for disease conditions, and current research in the field. Prereq: DHN 311 and 312; plus, past or concurrent DHN 510. Enrollment is restricted to dietetics majors only.

DHN 514 DIETETICS: COUNSELING AND COMMUNICATION THEORIES AND APPLICATIONS. (3)

Counseling and communication theories are combined to study specific applications which include disease prevention, disease management and refinement of communication skills to enhance effectiveness as a practicing RD. Students will enhance their capacity to motivate others to practice healthy food behaviors. Active learners will develop a conceptual framework for future professional practice in dietetics as ethical counselors and facilitators of behavior change. Three credit hours. Prereq: DHN 403, DHN 510, DHN 512; must be taken concurrently with DHN 517. Enrollment is restricted to Dietetics majors.

DHN 515 MEDICAL NUTRITION THERAPY. (5)

This capstone course explores changes in nutrient metabolism related to biochemical, physiological, and pathophysiological alterations in disease conditions, application of the Nutritional Care Process and Model, and development of medical nutrition therapy intervention. Content includes case study evaluations, nutritional therapies for disease conditions, including enteral and total parenteral nutrition, and current research in the field. Prereq: DHN 311, 312, 403 and 510 and concurrent with DHN 514. Enrollment is limited to dietetics majors.

DHN 516 MATERNAL AND CHILD NUTRITION. (3)

Food selection for optimal nutrition during pregnancy and lactation and for infant and child development through preadolescence. Cultural, social, and psychological aspects of food selection and dietary patterns, as they relate to mental and physical development. Prereq: DHN 312 or consent of instructor.

DHN 517 MEDICAL NUTRITION THERAPY II. (3)

This course continues study of medical nutrition therapy topics, including trauma and enteral and parenteral nutrition. Content includes more advanced case study evaluations, medical nutrition therapies, and current research in the field. Prereq: DHN 512 and concurrent with DHN 514 and enrollment is limited to dietetics majors.

DHN 518 EVALUATION OF DIETETIC ISSUES AND LEADERSHIP. (2)

Course provides opportunities for the development of competencies, attitudes and values expected of the entry level professional. Lectures, presentation of individual case studies and research projects are conducted. Opportunities are provided for transfer of theory to practice, interpretation of research, discussion of professional literature and application of leadership and communication skills in addressing issues of professional dietetic practice. This web

enhanced didactic course is taught via distance learning coupled with on campus sessions. Prereq: Admission to the Coordinated Program or Dietetic Internship.

DHN 520 MEDICAL NUTRITION THERAPY I: SUPERVISED PRACTICE. (5)

Supervised practice in health care facilities. Course focuses on patient assessment, diet planning, care plan implementation, and nutritional evaluation. Fulltime medical nutrition therapy experience at an assigned facility with the opportunity to gain entry level experience while seeing a variety of patients with varied disease states. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

DHN 522 FOOD SERVICE SYSTEMS MANAGEMENT I: SUPERVISED PRACTICE. (5)

Supervised practice in foodservice systems management in a variety of food service operations. Experience involves participation in management functions including procurement, production, financial and human resources management, marketing, and training. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

DHN 524 FOOD SERVICE SYSTEMS MANAGEMENT II: SUPERVISED PRACTICE. (3)

In-depth application of foodservice systems management in a variety of food systems operations. Provides variety of experience in operations, financial, and managerial aspects of food services. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

DHN 526 MEDICAL NUTRITION THERAPY II: SUPERVISED PRACTICE. (3)

This course provides an in-depth clinical application of the principles of dietetics. The course will focus on the team concept of patient care and provide advanced dietetics practice with the opportunity to test and evaluate results. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

DHN 528 COMMUNITY NUTRITION I: SUPERVISED PRACTICE. (1)

This course provides an introductory supervised practice in community nutrition. Experiences include public and private agencies/organizations that provide food and nutrition services, public policy and program development, and nutrition education for various socioeconomic groups. Full-time community nutrition experience as a member of the community health delivery team at assigned community and health related agency. The student will have opportunities to manage nutrition care for population groups across the lifespan; develop community based food and nutrition programs; and develop health promotion/disease prevention intervention projects. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

DHN 530 COMMUNITY NUTRITION II: SUPERVISED PRACTICE. (2)

This course provides an introductory supervised practice in community nutrition. Experiences include public and private agencies/organizations that provide food and nutrition services, public policy and program development, and nutrition education for various socioeconomic groups. Full-time community nutrition experience as a member of the community health delivery team at assigned community and health related agency. The student will have opportunities to manage nutrition care for population groups across the lifespan; develop community based food and nutrition programs; and develop health promotion/disease prevention intervention projects. Prereq: Admission to UK DHN Supervised Practice Program (SPP).

DHN 591 SPECIAL PROBLEMS IN DIETETICS AND HUMAN NUTRITION. (1-3)

Intensive work on an independent project related to dietetics and human nutrition. Senior or graduate standing. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

DHN 600 RESEARCH METHODS IN NUTRITION AND FOOD SYSTEMS. (3)

Students will study research methodologies and scientific approaches in human nutrition and food systems. Emphasis is placed on understanding the research methods, study design, data collection, and evaluation of various nutrition related studies. Discussions include development of research aims and hypothesis, internal review board, collecting of primary and secondary data, measurement approaches, study designs, and key considerations in developing a thesis for publication. Prereq: Admission to graduate program and selection of graduate faculty mentor with approved research topic.

DHN 603 ADVANCED COMMUNITY PROGRAM DEVELOPMENT. (3)

The course focuses on concepts and theories of program development, use of planned goals and objectives such as Healthy Communities-goals and objectives, use of data from national monitoring, survey and surveillance programs, and community assessment to guide decision making for program development. Program marketing, staffing formulas, and grant writing and grant management, cost analysis and cost effectiveness reporting, and formative and summative evaluation of community programs complete the study. Prereq: Admission to graduate program.

DHN 605 FOOD SYSTEMS AND SOCIETY. (3)

Food Systems and Society tracks food from farm to table, including growing, harvesting, processing, packaging, transporting, marketing, consumption, and disposal. Policy and culture determine who eats what and who benefits and loses in any given food system. As a result food systems vary considerably across the world with each evolving to affect overall health. The course will assess sustainability of food systems and explore the ethical, economical, socioecological, and environmental factors that affect local, regional, national, and global food system development. Content includes case study evaluations and current research in the field. Prereq: Graduate standing.

DHN 607 FOOD RELATED BEHAVIORS. (3)

This team-taught course will provide background in topics and methods in food related behaviors to students in Nutritional Sciences and other interested students. The course will follow a problem-based learning approach, and will consist of 3 out of 4 modules in any given year. The four modules will be Social and Cultural Perspectives on Food, Psychological Perspectives on Food and Food Behaviors, Challenges to Community Food Security, and International Issues in Nutrition.

DHN 608 CHRONIC DISEASE MANAGEMENT AND PROCESS. (3)

This course focuses on the etiology and pathophysiology of nutrition-related chronic diseases and conditions including obesity, hypertension, dyslipidemia, heart disease, diabetes, and cancer. Emphasis is placed on the biochemical and physiological mechanisms involved by which nutrients impact the prevention, nutrition care process—diagnosis, assessment, implementation of care, monitoring and evaluation, and progression of chronic diseases and conditions. Prereq: Graduate standing and minimum 3 credit hours of upper level advanced nutrition or DHN 510.

DHN 610 MARKETING IN HOSPITALITY AND DIETETICS. (3)

This course overviews the discipline of marketing as it relates to the hospitality and dietetics professions. Special emphasis will be placed on the analysis of the marketing environment, marketing strategies and the diversity of marketing practices used by the hospitality industry and dietetics profession. This course will provide opportunities for students to develop appropriate marketing approaches in today's increasingly competitive and complex global marketplace. Prereq: MKT 300 or HMT 320 or equivalent course.

DHN 620 NUTRITION AND AGING. (2)

Emphasis on current research in nutrition and aging, nutrition needs of the elderly and nutrition-related diseases associated with aging. Prereq: DHN 510 and 511 or equivalent. (Same as NS 620.)

DHN 640 HUMAN NUTRITION: ASSESSMENT. (3)

Assessment of dietary, anthropometric and biochemical parameters of nutritional status in health and disease. Lecture, two hours; laboratory, three hours per week. Prereq: DHN 510, DHN 511 or equivalent. (Same as NS 640.)

DHN 648 MANAGEMENT OF HOSPITALITY AND DIETETICS ORGANIZATIONS. (3)

This course will engage students with the theories and their application in the area of leadership and management of people, resources, finances, information and internal and external customers as they relate to dietetics, food service and hospitality professions. Prereq: Admission to graduate program, DHN 346 or equivalent course.

DHN 690 ADVANCED WORK IN DIETETICS. (3)

Evaluation of administrative practices in dietetics. This course will examine topics related to managing dietetics services including medical nutrition therapy protocols, dietetics outcomes research, parenteral and enteral support, clinical pathways, JCAHO requirements, state and institutional policy controls, reimbursement for dietetics services, in-patient and out-patient quality management, and hospital outreach programs. Prereq: Admission to graduate program. Lecture only course.

DHN 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1)

This course is designed to develop the student's independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as CNU/NS 704.)

DHN 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. (Same as NS 748.)

DHN 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours. (Same as NS 768.)

DHN 770 SEMINAR IN HOSPITALITY AND DIETETICS ADMINISTRATION. (1)

Investigation of recent research in Hospitality and Dietetics Administration. May be repeated to a maximum of three credits.

DHN 772 CURRENT TOPICS IN HOSPITALITY AND DIETETICS ADMINISTRATION. (2)

Faculty from different disciplines will provide in-depth coverage of selected topics in Hospitality and Dietetics Administration.

DHN 774 SEMINAR IN NUTRITION AND FOOD SYSTEMS. (3)

This advanced participatory seminar focuses on the latest in nutrition and food systems research. Students will be expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies in nutrition and food systems through weekly readings, presentations, and class discussions. Prereq: Graduate standing and upper level graduate statistics.

DHN 782 SPECIAL PROBLEMS. (1-6)

Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as CNU/NS 782.)

DHN 784 SPECIAL PROBLEMS IN FINANCIAL MANAGEMENT. (3)

A current events approach to the financial and accounting decision-making process in dietetics and hospitality administration. The course will prepare advanced students in dietetics and hospitality administration to analyze and make sound financial decisions in settings relevant to the dietetics profession and the hospitality industry. Prereq: Admission to graduate program, ACC 201, ECO 201 and either FIN 300 or (DHN 340, DHN 342, and DHN 346).

DHN 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6)

Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as CNU/NS 790.)

DIP Diplomacy and International Commerce

DIP 600 SPECIAL TOPICS. (1-3)

This course will vary in content depending on special needs or faculty availability.

DIP 700 DYNAMICS OF DIPLOMACY. (3)

This course explores the historical evolution of diplomacy, then focuses on post WWII diplomatic practice and especially the dynamics of diplomacy since the end of the Cold War. Emphasis will be placed on diplomacy's role in the international system, new tasks for diplomacy, and enhancing diplomatic skills in a new paradigm. Prereq: Permission of instructor.

DIP 712 WEAK STATES AND INTERNATIONAL SECURITY. (3)

This course reviews how the policy community has measured the weak state, revealing discrepancies in the quantifiable parameters, definitions, and categorizations, and analyze the efforts taken to address state weakness, particularly foreign economic and security assistance. It will review the five theoretical approaches to the weak state in the literature, which are informed by the international community's concerns with state weakness: development, intervention, post-colonialism, globalization and terrorism. The theory will be applied to specific cases of weak states in several regions (e.g., Africa, Asia, the Balkans, Latin America, the Middle East, and the Former Soviet States) and analyzes the threats they pose to international security.

DIP 715 DEMOCRACY AND INTERNATIONAL AFFAIRS. (3)

Discussion of the impact of the global spread of democracy on foreign policy and war. Prereq: Graduate status and consent of instructor. (Same as PS 735.)

DIP 716 INTERNATIONAL TRADE POLICY AND PRACTICE. (3)

This course is designed to prepare students to function comfortably in either the trade policy formulation (public trade policy producers) or commercial environment (policy consumers). Although the course is organized in two discrete sections, throughout the course, the implications of policy on commercial practice and the reverse will be stressed.

DIP 720 ECONOMIC STATECRAFT. (3)

This seminar course will explore how economic values and choices shape economic options, and the techniques used to pursue them in the diplomatic arena. Trade and fiscal techniques, financial policies, and sanctions will be explored in relationship to the interplay between economic and political/international relations theory, and the relevance of economic statecraft to achieving both economic and noneconomic goals.

DIP 725 GEOPOLITICAL MODELING. (3)

Course uses large user friendly computer model of world's political/economic systems to explore topics such as globalization, development, energy security, and political instability from a theoretical and quantitative viewpoint. Prereq: STA 570 or permission of instructor.

DIP 726 INTRODUCTION TO INTELLIGENCE. (3)

This course will introduce the student to the role of intelligence in U.S. national security policy-making.

DIP 727 ANALYTICAL METHODS FOR INTELLIGENCE ANALYSIS. (3)

This course will introduce the student to the role of intelligence analysis in U.S. national security policy-making. It will be discussed and put to practical use the various analytical methods and techniques that are used by analysts within the Intelligence Community.

DIP 730 CROSS-CULTURAL NEGOTIATION AND BARGAINING. (3)

A multidisciplinary graduate course using contemporary studies of negotiation and bargaining from the individual to the international level. Uses both public (Diplomatic) and private (Commercial) examples, including case studies and practice negotiations. Group and national differences are explored as well as the content and environment of negotiations. Prereq: Any one graduate course plus consent of instructor.

DIP 734 AFRICA'S DEVELOPMENT CHALLENGES. (3)

Examination of challenges facing sub-saharan African countries in developing economic and politically sustainable societies.

DIP 735 ENERGY SECURITY. (3)

This course uses the tools of economic analysis and economic statecraft to examine energy security. It will look at the connection between energy and the economy in both the U.S. and other states and the connections between energy and military security and power. It will include a detailed review of the U.S. energy economy, the international energy market, the economies of the major Middle Eastern states, and the Russian economy. At the end of the course each student will understand the history of energy security, be aware of the data sources for current

Course Descriptions

policy analysis, be able to use the relevant tools of economic analysis including econometrics, and be familiar with the energy security policy debate both in the United States and in key foreign countries. Prereq: DIP 740 or ECO 672 or at least two semesters of undergraduate economic theory with grades of B or better. DIP 720 and DIP 750 recommended.

DIP 740 GLOBALIZATION. (3)

This course examines the phenomenon of globalization by applying core theories of the international political economy. Subjects to be covered include economic and political definitions of globalization, the technological, economic, and political causes of globalization, and the effects of globalization on national politics and wealth. By the end of the course, students should be able to apply the basic international political economy analysis to both trade and financial issues, giving them the necessary skills to prepare convincing policy analyses, political advocacy programs, and business plans. Lecture/Discussion hours per week. Prereq: Graduate status, a modest undergraduate or graduate background in Foreign Affairs or permission of the instructor.

DIP 742 NATIONAL SECURITY POLICY. (3)

This course provides a foundation in the major debates on national security policy.

DIP 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

DIP 750 DEFENSE STATECRAFT. (3)

Students will gain familiarity with the key military policy issues that confront government officials, and they will learn to evaluate the claims of journalists and advocacy organizations that confront informed American opinion on a day-to-day basis. Prereq: Graduate status.

DIP 755 POLITICS AND DIPLOMACY OF THE MIDDLE EAST. (3)

Analyzes the interplay between politics and diplomacy in the Middle East. Prereq: Permission of instructor.

DIP 756 DIPLOMACY OF NUCLEAR WEAPONS. (3)

This course explores diplomatic issues with developing and maintaining, securing, restricting and eliminating nuclear weapons.

DIP 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

DIP 777 RESEARCH PROBLEMS IN INTERNATIONAL RELATIONS. (3)

This seminar focuses on research strategies that can be utilized in dealing with problems in international relations. May be repeated once with consent of instructor. Prereq: PS 674 or consent of instructor.

DIP 780 INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY. (3)

A multidisciplinary graduate course that investigates policy questions and the policy process surrounding developments in international sciences and technology. This course will focus on the intersection of scientific research, technological applications and change, and business and governmental activities in these areas that impact upon international relations. Prereq: Consent of instructor.

DIP 795 SPECIAL PROBLEMS IN DIPLOMACY AND INTERNATIONAL COMMERCE. (3)

Specially designed independent study course taken under the supervision of various instructors. May be repeated to a maximum of six credits. Prereq: Permission of instructor.

DIS Decision Science and Information Systems

DIS 600 PRODUCTION MANAGEMENT. (3)

This course exposes the MBA generalist to the functional area of production in both manufacturing and service sectors. Topics include tactical decisions in production and operative relationships with corporate strategy. The course emphasizes operations planning and control. Prereq: Graduate standing; MGT 611, ECO 610, ACC 628, DIS 650, ECO 611, FIN 600, DIS 651, MKT 600.

DIS 612 SUPPLY CHAIN OPERATIONS. (3)

An introduction to the terminology, concepts, and skills related to supply chain management. Students develop an understanding of the complexities associated with the movement of goods and information, and how they affect the mission of the firm. Discussions address the various processes and activities within an organization and how they interface with other members of the supply chain.

DIS 620 MANAGEMENT INFORMATION SYSTEMS IN DECISION MAKING. (3)

In-depth consideration of the value of information in managerial decision making. Topics include issues in design and evaluation of management information systems, decision support systems, and business expert systems. Prereq: DIS 651.

DIS 621 BUSINESS EXPERT SYSTEMS. (3)

Introduction to expert systems and artificial intelligence in the business setting. Discussions include past and current applications of expert systems in business and considerations of future application possibilities. Prereq: DIS 620.

DIS 622 BUSINESS DATA SYSTEM ANALYSIS AND DESIGN. (3)

An introduction to the comparative analysis and business use of various data models. Topics include the theory and design of information storage and retrieval procedures in the context of business information needs. Prereq: DIS 620, CS 101 or consent of instructor.

DIS 623 BUSINESS DECISION SUPPORT SYSTEMS. (3)

Discussion of business decision support system concepts and the applications of these concepts in business organizations. The theoretical development of the decision support system concept is analyzed through review of important literature in this area. Emphasis is placed on the impact of technological advances which form the basis of decision support system software. Current decision support systems are studied and future likely applications considered. Prereq: DIS 620.

DIS 624 MANAGEMENT OF INFORMATION RESOURCES. (3)

The course is designed to prepare students to understand and analyze major issues related to the management of information resources, evaluate the current state of information resources management within an organization, and participate in the management of such resources. Prereq: DIS 620 or consent of instructor. (Same as MGT 624.)

DIS 651 QUANTITATIVE ANALYSIS IN BUSINESS DECISION MAKING. (3)

A study of key problem formulation and solution procedures in business decision making. The topics studied include statistical techniques integrated in decision making under uncertainty, decision trees, queuing problems, and value of information. A major segment of the course is devoted to the study of linear programming problems, sensitivity analysis, assignment problems and transportation problems. Prereq: MBA standing.

DIS 695 INDIVIDUAL WORK IN DSIS. (3)

Students confer individually with instructor. May be repeated to a maximum of six credits. Prereq: Consent of the instructor.

DIS 700 TOPICS IN OPERATIONS MANAGEMENT. (3)

To review the various topics of operations management and to survey the status of the art research in each topic area. Research methodology and research opportunities in each topic area will be identified. May be repeated to a maximum of nine credits.

DIS 720 MANAGEMENT INFORMATION SYSTEMS THEORY. (3)

A theoretical consideration of the role of MIS in managerial decision making. Emphasis is placed on current research in MIS and interrelationships with management science and operations management. Prereq: Consent of instructor.

DIS 753 SEMINAR IN MANAGEMENT SCIENCE. (3-6)

Each semester some topic in management science such as simulation, queuing theory, stochastic processes, numerical methods, and Bayesian Decision Theory will be studied intensively. Prereq: DIS 751, 752.

DIS 780 STUDIES IN DECISION SCIENCE AND INFORMATION SYSTEMS. (3)

This course will analyze the current research topics of interest in the decision sciences. Possible areas of study may include: network management, multiple-criteria decision making; data envelopment analysis, combative decisions, and models for service organizations. May be repeated to a maximum of nine credits. Prereq: DIS 751 or consent of instructor.

DIS 790 SPECIAL TOPICS IN MANAGEMENT DECISION SYSTEMS (Subtitle required). (3)

This is a variable topic course enabling focused doctoral student investigation of current research areas. It is anticipated that the course grade will be based on individual student semester research papers in the course topic area. May be repeated to a maximum of 12 credits under different subtitles. Prereq: Consent of instructor.

DMT Interior Design, Merchandising, and Textiles

DMT 520 TEXTILES FOR INTERIORS. (3)

Selection, cost, expected performance and care of textiles used in residential and commercial interiors. Prereq: MAT 120.

DR Diagnostic Radiology

DR 815 FIRST-YEAR ELECTIVE, DIAGNOSTIC RADIOLOGY. (1-3)

With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Diagnostic Radiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

DR 825 SECOND-YEAR ELECTIVE, DIAGNOSTIC RADIOLOGY. (1-4)

With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Diagnostic Radiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or

complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

DR 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)

With the advice and approval of the Third and Fourth Year Curriculum and Student Progress Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or by the permission of Third and Fourth Year Curriculum and Student Progress Committee.

Approved electives:

DR 850 FOURTH-YEAR ELECTIVE IN DIAGNOSTIC RADIOLOGY

DR 851 RESEARCH IN DIAGNOSTIC RADIOLOGY

DR 855 NUCLEAR MEDICINE

DR 856 PEDIATRIC RADIOLOGY

DR 890 OFF-SITE CLERKSHIP IN DIAGNOSTIC RADIOLOGY

DSP Discovery Seminar Program

DSP 110 SOCIAL SCIENCES: (Subtitle Required). (3)

An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the social science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP social science requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 120 HUMANITIES: (Subtitle Required). (3)

An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the humanities requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP humanities requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 130 NATURAL SCIENCES: (Subtitle Required). (3)

An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the natural science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP natural science requirement. Each proposal must be approved by the College of Arts and sciences and the Dean of Undergraduate Studies.

DSP 200 GENERAL RESEARCH SKILLS: (Subtitle Required). (3)

Course provides the basic skills required to conduct research and other scholarly activities. Prereq: All students must be actively engaged (for an average of at least ten hours per week) in a research or other scholarly activity under the mentorship of a UK faculty member through the UK Undergraduate Research Program (UKURP).

EAP Education Abroad Program

EAP 400G EDUCATION ABROAD ON UK-SPONSORED PROGRAM. (1-18)

A course designed for undergraduate, graduate and non-degree students who participate in a UK-Sponsored Education Abroad Program. Students will be enrolled in this course by Education Abroad at UK upon submission of the required application materials and payment of the non-refundable program fee deposit. The balance of the program fee will be charged through Student Billing Services as an EAP 400G-xxx course fee. The suffix indicates the particular UK-sponsored program. Prereq: Approval by each student's academic advisor, the program director and Education Abroad at UK.

EAP 431G EDUCATION ABROAD ON EXCHANGE PROGRAM: TFE. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TFE-Tuition/Fees. Prereq: Approval by each student's academic advisor and Education Abroad at UK.

EAP 432G EDUCATION ABROAD ON EXCHANGE PROGRAM: TLM. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TLM-Tuition/Lodging/Meals.

EAP 433G EDUCATION ABROAD ON EXCHANGE PROGRAM: TLO. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad

advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TLO-Tuition/Lodging.

EAP 434G EDUCATION ABROAD ON EXCHANGE PROGRAM: TMO. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TMO-Tuition/Meals.

EAP 435G EDUCATION ABROAD ON EXCHANGE PROGRAM: TPE. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TPE-Tuition/Plus Other.

EAP 436G EDUCATION ABROAD ON EXCHANGE PROGRAM: ISEP. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. ISEP.

EAP 437G EDUCATION ABROAD ON EXCHANGE PROGRAM: DES. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. DES.

EAP 438G EDUCATION ABROAD ON EXCHANGE PROGRAM: HSC. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. HSC.

EAP 440G EDUCATION ABROAD ON EXCHANGE PROGRAM: BUS. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. BUS.

EAP 441G EDUCATION ABROAD ON EXCHANGE PROGRAM: BAE. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. BAE.

EAP 442G EDUCATION ABROAD ON EXCHANGE PROGRAM: EGR. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. EGR.

EAP 443G EDUCATION ABROAD ON EXCHANGE PROGRAM: CHS. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. CHS.

#EAP 533 EDUCATION ABROAD ON EXCHANGE PROGRAM: TFE. (0-1)

A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TFE-Tuition/Fees. Prereq: Approval by each student's academic advisor and Education Abroad at UK.

EAP 599 STUDY ABROAD. (1)

A course designed for undergraduate and graduate students who go abroad for study following a plan developed as part of their academic program and who are not otherwise registered at the University during the period overseas. Registration in the course would constitute full-time status. The course may be taken on a pass-fail basis for undergraduate students and audited by graduate students. Evaluation by the academic adviser will be an element of the plan. May be repeated to a maximum of three credits. Prereq: Approval by each student's academic department, the Registrar, and the Office for International Programs.

ECO Economics

ECO 101 CONTEMPORARY ECONOMIC ISSUES. (3)
A basic course in the analysis of contemporary economic issues with emphasis on current economic topics such as inflation, poverty and affluence, urban congestion, and environmental pollution. (Credit will not be given for this course to students who have received prior credit in ECO 201 and/or 202.)

ECO 201 PRINCIPLES OF ECONOMICS I. (3)
The study of the allocation of scarce resources from the viewpoint of individual economic units. Topics include household and firm behavior, competitive pricing of goods and resources, and monopoly power.

ECO 202 PRINCIPLES OF ECONOMICS II. (3)
A study of how society's needs are satisfied with the limited resources available. Topics include contemporary issues such as inflation, unemployment, economic growth, international dependencies, and how public policy deals with them. A critical understanding of the U.S. and global economies will enhance your value as a manager or executive of a business (whether for-profit or non-profit), as a family member dealing with jobs and financial decisions, and as a voter in a democracy. The course will allow you to become knowledgeable of, and able to critically think about, the major macroeconomic issues of unemployment, jobs, recessions, economic growth, inflation, deflation, oil prices, monetary policy, the Federal Reserve, fiscal policy, budget deficits, the national debt, international trade, international finance, and the financial system. Prereq: ECO 201.

#ECO 301 ECONOMIC PRICE THEORY. (3)
ECO 301 is an undergraduate course in microeconomic theory designed for students who enjoy economics but are NOT planning on selecting a major in economics. We will study the behavior of individual decision makers: households, firms, resource owners and the interaction of such individual economic units in markets. We will study the role that prices play in guiding the allocation of resources in a market economy. To reinforce students' understanding of microeconomic theory, and also to demonstrate the relevance of particular theoretical concepts, we will include numerous real world situations as we apply each topic. Students who have already taken ECO 401 are not allowed to take ECO 301. Prereq: ECO 201 and ECO 202 or the equivalent.

***ECO 311 BUSINESS ECONOMICS. (3)**
This course applies basic economic principles to the types of problems faced by business decision makers. Particular attention is paid to the economics of organizations and to the economics of firm strategy. Topics covered will include the nature of the firm, the make or buy decision, corporate governance, distribution channels, external market structure, selling decisions, and rivalry and strategy. Prereq: ECO 201 and ECO 202 or equivalent.

***ECO 312 MONETARY ECONOMICS. (3)**
This course analyzes how savers and borrowers meet in financial markets to allocate resources to their most productive uses. Major topics include the theory of pricing of financial assets, equilibrium determination of asset prices, risk and term structures of interest rates, how moral hazard and adverse selection inhibit credit allocation, fundamentals of commercial banking, and central bank policies. Prereq: ECO 201 and ECO 202 or equivalent.

ECO 327 STRATEGIC DECISION MAKING: AN INTRODUCTION TO GAME THEORY. (3)
The course is an introduction to strategic decision making and game theory. Ideas such as Nash equilibrium, dominant strategies, evolutionary stability, and asymmetric information are applied to a variety of strategic decision making problems taken from economics, computer science, politics, and biology. Prereq: A grade of B or better in MA 113 or MA 132 or MA 137 or consent of department. Students should have a strong background in first semester calculus. (Same as MA 327.)

***ECO 365 SOCIAL ECONOMIC ORGANIZATION. (3)**
This course examines the major economic systems of the world. Students will develop a general understanding of how economic systems work and how economic theory interacts with government policy, history, and culture to explain economic performance. Prereq: ECO 201 and ECO 202 or equivalent.

***ECO 367 AMERICAN ECONOMIC HISTORY. (3)**
The development of the American economy will be examined within the general framework of economic theory. Major emphasis will be given to the long-run process of economic growth of the economy from the colonial period to the present. Prereq: ECO 201 and ECO 202 or the equivalent.

***ECO 370 THE GLOBAL ECONOMY. (3)**
This course explores the theoretical foundations of International Trade including the basics of why countries trade, factors that explain the pattern of trade, the effects of trade on welfare and the distribution of income, and various policy issues. The course also provides an examination of topics in International Finance such as how international financial markets are structured and how currencies across countries relate to each other in foreign exchange markets. Prereq: Courses include ECO 201 AND ECO 202 or the equivalent. Students who have already taken ECO 471 or ECO 472 may not take ECO 370 and ECO 370 may not be taken concurrently with ECO 471 or ECO 472. Students majoring in Foreign Language and International Economics are not allowed to take ECO 370. While other economics majors through the College of Business and Economics and the College of Arts and Sciences are allowed to take this course, it is ideal

for non-majors who have an interest in the global economy and students pursuing a Minor in International Business and Economics.

ECO 379 THE ECONOMICS OF PUBLIC POLICY, LAW, AND GOVERNMENT. (3)
This course develops the economics view of the role of government from both normative and positive perspectives. Conditions under which markets perform well are presented, as well as cases where there is market failure. Legal and social institutions that support markets are discussed, as are government policies to intervene in markets. Economic models of the operation of government are developed to understand possible shortcomings of government action, as well further linkages of economics to law. The economics perspective on income redistribution is presented along with examples from specific government programs. Prereq: ECO 201.

#ECO 383 HEALTH ECONOMICS. (3)
This course examines the organization, financing, and management of the U.S. health care system and programs, and emphasizes contemporary health policy concerns. Prereq: ECO 201 and ECO 202 or equivalent.

#ECO 385 LAW AND ECONOMICS. (3)
This course will survey the field of law and economics. We will study the core areas of common law – property, contract, and tort. We will consider the sometimes-competing goals of equity and efficiency and their roles in the formulation of legal decisions. We will study the Coase theorem, and will see how the presence of transactions costs, incomplete information, and risk aversion can influence the outcome of any particular legal decision. Finally, we will examine criminal law, optimal punishment, and optimal enforcement. Prereq: ECO 201 and ECO 202 or the equivalent.

***ECO 391 ECONOMIC AND BUSINESS STATISTICS. (3)**
A survey of statistical techniques relevant to modern economics and business, with major emphasis on correlation and regression, Bayesian decision theory, index numbers, time series analysis, and forecasting models. Prereq: STA 296 or STA 381 or equivalent.

#ECO 393 SPORTS ECONOMICS. (3)
This course focuses on the application of economic theories to sports and the sports industry and understanding the behavior of economic agents in sports. Students who complete the course will gain insight into economics, understand how to apply economic models to explain observed behavior in sport, and appreciate empirical economic evidence generated from sports-related data. Prereq: ECO 201 and ECO 202 and ECO 391 or the equivalent.

ECO 395 INDIVIDUAL WORK IN ECONOMICS. (1-6)
Students confer individually with the instructor. Written paper usually expected and filed in chairperson's office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

ECO 401 INTERMEDIATE MICROECONOMIC THEORY. (3)
An analysis of the behavior of consumers and firms, price determination, various market structures, and income distribution. Prereq: ECO 201 or equivalent with a grade of C or higher and ECO 202 or equivalent with a grade of C or higher.

ECO 402 INTERMEDIATE MACROECONOMIC THEORY. (3)
National income concepts, the determination of aggregate income and employment, the theory of money and inflation and problems of economic growth. Prereq: ECO 202 or equivalent and ECO 401 taken previously or permission of instructor.

ECO 410 CURRENT ISSUES IN ECONOMICS (Subtitle required). (3)
The course addresses relevant topics in economics. May be repeated for a maximum of six credits under different subtitle. Prereq: ECO 202 and/or ECO XXX to be identified by instructor upon time of offering.

ECO 450G THE ECONOMICS OF POVERTY AND WELFARE PROGRAMS. (3)
Examines the economic conditions of the poor in the U.S., theories of poverty, and major redistribution programs in the U.S. The course will study the economic impacts of such programs as Social Security, Medicare, Aid to Families with Dependent Children, Food Stamps, Medicaid, and child care subsidies. Prereq: ECO 401 or equivalent or consent of instructor.

ECO 461 MARKET STRUCTURE AND ANTI-TRUST POLICY. (3)
A study of the relationship between industry performance and market structure, and the role and effect of the government's anti-trust policies. Prereq: ECO 401 or equivalent.

***ECO 471 INTERNATIONAL TRADE. (3)**
This is advanced economic course in international trade. The first part of the course covers the basics of why countries trade, what explains the pattern of trade that we observe and what are the effects of trade on welfare and the distribution of income. The second part of the course covers issues concerning trade policy and looks at the positive and normative effects of trade policy and trade agreements as well as investigating topics of current interest. While the focus of the course is on theory, students will also be exposed to many applications of the theory as a means of both explaining the economic intuition and encouraging students to analyze the world around them from an economic perspective. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as AEC 471.)

ECO 472 INTERNATIONAL MONETARY ECONOMICS. (3)
This course deals with macroeconomic and financial aspects of the open economy. Main subjects include the balance of payments, exchange rate determination, and macroeconomic

theory and policy in an open economy. Students are exposed to basic concepts such as purchasing power parity, interest parity, monetary models of the exchange rate, and the Mundell-Fleming model. Current issues for discussion include currency crises, pros and cons of international capital flows, and the choice of exchange rate regime. Prereq: ECO 402 or consent of instructor.

ECO 473G ECONOMIC DEVELOPMENT. (3)

A comparative study of economic progress in selected countries; growth patterns, theories of development and capital formation, interaction of social and economic change. Prereq: ECO 401 or equivalent or consent of instructor.

ECO 477 LABOR ECONOMICS. (3)

Application of economic principles to analyze the operation of labor markets. Topics covered include: theories of labor movements, comparative analysis of unionism in different economies, labor supply, labor demand, human capital, collective bargaining, public policy and the operation of labor markets. In addition, selected topics such as female and minority employment, social security, and industrial conflict will be covered. Prereq: ECO 401 or equivalent.

ECO 479 PUBLIC ECONOMICS. (3)

An application of economic analysis to the study of the role of government. Emphasis is on the reasons for and the effects of government intervention in the economy. Topics covered include: market failure, public goods and externalities, welfare policy, voting and public choice, taxation, public debt and cost-benefit analysis. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as AEC 479.)

ECO 491G APPLIED ECONOMETRICS. (3)

To provide the student with a firm foundation in the design and estimation of economic models, empirical analysis of economic relationships, and forecasting. Emphasizes the structure and utilization of economic models. Prereq: ECO 391, ECO 401, and ECO 402 or equivalent or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ECO 499 SEMINAR IN ECONOMICS (Subtitle required). (3)

Reading, research and discussion in a seminar format to illuminate problems of historical and contemporary interest in areas of special faculty competence. May be repeated to a maximum of nine credits, but may not be repeated under the same subtitle. Will be limited to a maximum of 15 students. Prereq: ECO 391, ECO 401, and ECO 402 or equivalent. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ECO 590 INTRODUCTION TO QUANTITATIVE ECONOMICS I. (3)

An introduction to mathematical approaches to economic theory. Emphasis on linear models, constrained optimization, and techniques used in comparative statics. Prereq: ECO 401 and MA 113, or consent of instructor. (Same as AEC 590.)

ECO 601 ADVANCED MICROECONOMIC THEORY. (3)

An intensive course covering microeconomic theory and its various methodological and analytical techniques. Prereq: ECO 401 or consent of instructor.

ECO 602 MACROECONOMIC THEORY. (3)

An analysis of a market clearing, general equilibrium macroeconomic model. Emphasis on theoretical foundations of relevant behavioral functions and comparative statics. Not open to those with credit in ECO 761. Prereq: ECO 402 or consent of instructor.

ECO 603 RESEARCH METHODS AND PROCEDURES IN ECONOMICS. (3)

The basic procedures and methods of research in economics are considered from the standpoint of their applicability to problem solving and discovery of new scientific facts and generalizations in economics. Definition of the problem, statement of hypothesis, research design, data collection methods, and data analysis constitute the major topics. Attention is given to proper style and preparation of research reports in economics.

ECO 610 MANAGERIAL ECONOMICS. (3)

Analysis of applications of economic theory to management decision making. Such problems as demand and cost determination, pricing, and capital budgeting are treated. Prereq: Graduate standing, MA 123 or its equivalent.

ECO 619 SKILL DEVELOPMENT FOR APPLIED ECONOMIC ANALYSIS. (3)

Calculus, matrix algebra, mathematical statistics to understand basic economic models and applications and the fundamentals of econometric analysis. The intent of this course is to provide and develop the tools the students will need to engage in applied economic analysis and that will be used in subsequent courses in the MS in Economics Program. Prereq: MA 114 or its equivalent or consent of the instructor.

ECO 621 APPLIED MICROECONOMICS. (3)

This course covers essential microeconomic models and issues for the advanced applied economist and is the foundational course for the microeconomics in the applied track of the MS in economics program. The focus is on topics and methods most frequently used and relied upon in applied business and policy problems. By doing so, the course will prepare students for subsequent coursework for the applied MS track. Additionally, it will strive for students to gain strong intuitive skills regarding how to approach applied economics problems and their related empirical applications. Prereq: ECO 401 or its equivalent or consent of the instructor.

ECO 622 MACROECONOMICS FOR APPLIED ECONOMISTS. (3)

An applied analysis of macroeconomic conditions useful to a professional business economist is presented. Emphasis is on blending mainstream economic models of the economy with data to interpret current conditions, prospects for future conditions, and monetary and fiscal policies that influence these conditions. Prereq: ECO 402 (Intermediate Macroeconomics) or an equivalent course.

ECO 623 ECONOMETRICS FOR APPLIED ECONOMICS. (3)

This course examines a variety of topics in applied econometrics. The course begins with a review of the classic linear regression model and ordinary least squares estimation. The primary focus of the class is to examine how estimation can be done when the classic model doesn't apply. Topics include endogenous regressors and instrumental variables, limited dependent variables models and maximum likelihood estimation, unobserved heterogeneity and panel data methods. Prereq: ECO 491 or equivalent or consent of instructor.

ECO 624 EMPIRICAL DATA MANAGEMENT. (3)

This course will cover the basic ways that economic data can be obtained. The course will cover obtaining data from data from the web, from APIs, and from colleagues in various formats including raw text files, binary files and databases. It will also cover the basics of data cleaning and how to make data operational. Organized data dramatically speeds downstream data analysis tasks. The course will also cover the components of a complete data set including raw data, processing instructions, codebooks, and processed data. The course will cover the basics needed for collecting, cleaning and sharing data. Particular points of emphasis will include reading and writing datasets, data cleaning, creating, changing and labeling variables and values, automating your work, combining and reshaping files, processing observations across subgroups, .do file programming, and programming using .ado files. Prereq: ECO 491 or its equivalent or consent of the instructor.

ECO 625 PREDICTIVE MODELS AND FORECASTING. (3)

This course provides students with an overview of modern techniques in the forecast of time series used in a variety of applications in the private and public sectors including revenue and sales forecasting. As an applied course the techniques will be motivated by specific practical problems and will be put to use in forecasting practices. The course covers auto-regressive and moving average models, distributed lag models, forecasting, Vector Auto-Regression, unit roots and testing, and auto-regressive conditional heteroskedasticity. Prereq: ECO 623 or its equivalent.

ECO 631 BUSINESS ECONOMICS. (3)

ECO 631 studies the economics of organizations and the economics of strategy. The first half of the course applies transactions costs and principal-agent theories to study the internal organization of the firm. Topics to be covered include the boundaries of the firm, corporate governance, choice of production process, and internal incentive systems. The second half of the course applies economic tools to the analysis of firm strategy. Topics to be covered include basic cost and demand conditions, economies of scale and scope, product differentiation, entry, exit and mobility conditions, price discrimination and commodity bundling, vertical control, and rivalry and strategy. Basic tools of game theory and asymmetric information are integral parts of this course. Prereq: ECO 621 or its equivalent or consent of the instructor.

ECO 652 PUBLIC POLICY ECONOMICS. (3)

Principles and practices of economical resource management in the governmental sector: tax and expenditure types, intergovernmental fiscal cooperation, debt financing, budgeting and financial planning. Prereq: ECO 201 or equivalent and MPA or MPP program status or permission of department. (Same as PA 652.)

ECO 653 HEALTH ECONOMICS. (3)

This course applies general theoretical principles of economics to the health care sector. The basic approach is to recognize the importance of scarcity and incentives, allowing for differences peculiar to health. The demand and supply of health and medical care are examined as they involve physicians, nurses and hospitals. The competitiveness of their markets, health insurance and the role of government are explored. Special topics include regulation and planning, benefits-cost analysis, and reform health plans. Prereq: The economics prerequisite can be met in three ways: (a) an undergraduate principles course in microeconomics and HA/PA 652; (b) an undergraduate microeconomics principles course and a graduate course in managerial economics; or (c) an undergraduate microeconomics principles course and an intermediate microeconomics course. (Same as PA 636.)

ECO 654 BENEFIT-COST ANALYSIS. (3)

Principles, practices and applications of applied welfare analysis are the content of this course. The basic theory of benefit-cost analysis is presented and the relevance of implementation analysis in policy analysis is established. Prereq: PA 652. (Same as PA 680.)

ECO 672 WORLD TRADE AND COMMERCIAL POLICY. (3)

An analysis of trade patterns and the implication of government policy on trade, in the light of both economic theory and empirical findings. Prereq: Successful completion of an upper division undergraduate or graduate level economics course.

ECO 674 AGRICULTURE AND ECONOMIC DEVELOPMENT. (3)

Analytical consideration of the role of agriculture in economic development in relation to overall development strategy at various stages of growth. Theoretical and policy issues of particular relevance to the agricultural development in underdeveloped agrarian economies with various resource, social, political and economic systems. Prereq: ECO 473G or consent of instructor. (Same as AEC 626.)

ECO 679 ECONOMICS OF THE PUBLIC SECTOR. (3)

Topics and methods for students who wish to become policy practitioners as well for those who will deal with policy makers. Focus is on role of the federal, state, and local government in the economic with both the expenditure and revenue sides of the government budget examined. Substantial material from standard public finance courses including welfare measures and cost-benefit analysis, program evaluation, and tax analysis. Prereq: ECO 621 or equivalent or consent of the instructor.

ECO 692 ECONOMETRICS FOR POLICY ANALYSTS. (3)

Maximum likelihood estimation, ordinary least squares (OLS) regression, instrumental variables (IV) regression, heteroscedasticity-consistent regression, fixed and random effects models, probit, logit and tobit models, and identification and two-state least squares estimation of simultaneous equations models. Prereq: Any undergraduate statistics course. MPA, MPP or PUAD program status for priority registration, other students with permission of instructor. (Same as PA 692.)

ECO 697 FINAL PROJECT IN APPLIED ECONOMICS. (3)

The purpose of this course is to assist the student in developing and completing a research study applying the tools and institutional knowledge obtained in other courses in the Applied Economics courses to evaluate an important economic policy or concern in either the public or private sector. While much of the work in the course is done independently students will meet together to discuss their progress as well as meet with the instructor individually. Prereq: ECO 623 or its equivalent or consent of the instructor.

ECO 700 TEACHING METHODS IN BUSINESS. (1)

A three part course that examines what constitutes good teaching and explores effective techniques for college instruction. Seminars emphasize practical information for both the principal activities and the details of teaching. Departmental discussions allow students to discuss issues that arise in their teaching practice. Reviews of classroom performance provide professional feedback in order to enhance on-the-job learning. Seminar, two hours per week. Prereq: Approval of Director of Graduate Studies. (Same as BA 700.)

ECO 701 NEOCLASSICAL MICROECONOMIC THEORY. (3)

The Neoclassical theory of consumer behavior, production, market equilibrium and imperfect competition. Prereq: ECO 601 and ECO 590, or consent of instructor.

ECO 702 ADVANCED MACROECONOMIC THEORY. (3)

Analysis of general equilibrium macroeconomic models and factors responsible for deviations from general equilibrium. Emphasis on issues from recent professional literature. Prereq: ECO 602 or consent of instructor.

ECO 703 INTRODUCTION TO ECONOMETRICS I. (3)

The first course in the introduction to econometrics. A comprehensive survey of the general linear regression, autocorrelation, errors in variables and distributed lag models. Prereq: ECO 590 and either ECO 603 or STA 525, or consent of instructor.

ECO 704 GENERAL EQUILIBRIUM ANALYSIS AND WELFARE ECONOMICS. (3)

Existence, stability, efficiency and Pareto satisfactoriness of competitive equilibrium. Recent developments in general equilibrium and welfare theory. Prereq: ECO 701 or consent of instructor.

ECO 705 MACROECONOMIC DYNAMICS. (3)

Theoretical and empirical assessment of dynamic issues in macroeconomics. Topics include neoclassical and endogenous growth models and vector autoregressions. Prereq: ECO 702 or consent of instructor.

ECO 706 INTRODUCTION TO ECONOMETRICS II. (3)

The second course in the introduction to econometrics. A comprehensive survey of identification, estimation and hypothesis testing in the context of simultaneous equations model. Prereq: ECO 703 or consent of instructor.

ECO 707 RESEARCH SEMINAR IN ECONOMICS. (3)

This course will help students develop research skills by requiring them to work through an independent project from start to finish. The student will review the literature and select a topic in an area of economics of interest. The student will then complete the project under the guidance of the instructor. Students will discuss their ongoing work in class with other students and in individual meetings with the instructor. The final output of the course will be a finished paper suitable for submission to a scholarly journal for publication. Prereq: Passing the Theory Exams or permission of the instructor.

ECO 721 ENVIRONMENTAL ECONOMICS, REGULATION AND POLICY. (3)

This course takes a balanced practitioner approach to the problems of the environment and environmental regulation. Efficiency aspects will be developed carefully, so as to provide a background for an extensive coverage of various available alternative policies. Prereq: PA 652 and MPA or economics program status or consent of instructor. (Same as PA 727.)

ECO 724 ENVIRONMENTAL ECONOMICS. (3)

This seminar in environmental economics deals with market failure, benefit-cost analysis, no market failure, valuations of environmental changes, and selected topics in environmental economics. Central to the course is valuing changes in health risks, risk perception, and behavior related to health risk. Selected topics include international issues, environmental equity and markets for environmental quality. This course and ECO 725 Health Economics are the two courses that are the basis for the area in Environmental and Health Economics in the Ph.D. Program in Economics. Prereq: ECO 601 and ECO 703 or consent of instructor.

ECO 725 HEALTH ECONOMICS. (3)

This course rigorously examines the organization, financing, and management of the US health care system and programs, and emphasizes economic analysis contemporary health policy concerns. By the end of the semester, students should have the institutional knowledge and analytic tools needed to contribute to current public policy debates about health and medical care. This course and ECO 724 Environmental Economics are the two courses that are the basis for the area in Environmental and Health Economics in the Ph.D. program in Economics. Prereq: ECO 601 and 703 or consent of instructor.

ECO 726 ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS. (3)

This course is a graduate-level survey of environmental and natural resource economics. Students will use mathematical models and econometric analysis to address topics including externalities and other market failures, environmental policies, management of renewable and nonrenewable resources, and non-market valuation. Prereq: ECO 701 and 703 (or equivalent courses), or consent of instructor. (Same as AEC 745.)

ECO 731 LABOR ECONOMICS I. (3)

The theory and estimation of the demand for and the supply of labor are introduced. Topics include demographic changes, minimum wages, retirement, and secular trends in labor force participation. The concept of human capital is examined, including applications to income distribution. Theory and evidence on the structure of wages in the U.S. is considered. Topics include compensating wages and race and gender differences. Prereq: ECO 601 or consent of instructor.

ECO 732 LABOR ECONOMICS II. (3)

Dynamic and cyclical labor demand are examined theoretically and empirically. Models of unemployment are considered, including search theory and the implicit contract model. Aspects of labor unionism are examined including changes in union membership, strikes, and union wages and employment. The incentive effects of compensation are discussed, including sorting models and the principal-agent problem. Prereq: ECO 601 or consent of instructor.

ECO 741 THEORY OF THE FIRM AND MARKET STRUCTURE. (3)

A study of firms and markets covering such topics as organizational structure and objectives of firms; product selection, advertising and quality; price discrimination; vertical control; entry, accommodation and exit; cost structure and market organization, market structure and performance; and public policy. Prereq: ECO 601 or consent of instructor.

ECO 742 INDUSTRIAL ORGANIZATION. (3)

A comprehensive survey of the literature in industrial organizations including static theories of oligopoly, dynamic theories of oligopoly, information about strategic behavior, research and development, patents, and adoption of new technology.

ECO 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ECO 751 PUBLIC ECONOMICS. (3)

An advanced study of both how government activities influence allocation, relative prices and welfare and what is the proper role of the public sector in resource allocation. Relevant topics include: public goods, externalities, tax incidence, optimal taxation, benefit-cost analysis, public pricing, fiscal federalism, state-municipal finance and public choice. Prereq: ECO 601 or consent of instructor.

ECO 752 ADVANCED TOPICS IN PUBLIC FINANCE. (3)

Principles of taxation and expenditure; applications to federal, state, and local policy; fiscal federalism; international public finance. Prereq: PA 752, ECO 701 or permission of the instructor. (Same as PA 754.)

ECO 753 URBAN AND REGIONAL ECONOMICS. (3)

An intensive study of the theory, evidence and policy concerning urban areas and regions. Topics typically covered include: nature of regions and urban areas, size and distribution of cities, location decisions, housing, transportation, migration and regional growth. Prereq: ECO 601 or consent of instructor.

ECO 761 MACRO AND MONETARY ECONOMICS I. (3)

Advanced study of business cycle fluctuations. Theoretical and empirical investigations of the causes of business cycles; evaluating the effectiveness of monetary, fiscal, and other policies to affect inflation, unemployment, and short-run economic goals. Emphasis on current academic research. Prereq: ECO 701, ECO 702 or consent of instructor.

ECO 762 MACRO AND MONETARY ECONOMICS II. (3)

Advanced study of long-run macroeconomic issues. Theoretical and empirical examinations of the determinants of economic growth; analysis of government policies, country endowments, and institutional factors in determining growth rates and income levels. Emphasis on current academic research. Prereq: ECO 702 or consent of instructor.

ECO 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

- ECO 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.
- ECO 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE.** (0-12)
May be repeated indefinitely.
- ECO 771 INTERNATIONAL ECONOMICS: INTERNATIONAL MONEY AND FINANCE.** (3)
International finance and open economy macroeconomics; the balance of payments; theory of exchange rate determination; macroeconomic policy issues in open economies. Prereq: ECO 602.
- ECO 772 INTERNATIONAL ECONOMICS: TRADE THEORY AND POLICY.** (3)
Theory and empirical analysis of the effects of trade and trade policy. Prereq: ECO 601.
- ECO 773 OPEN ECONOMY MACROECONOMICS.** (3)
Development of rigorous models to enhance knowledge of open economies. Topics include: impact on an economy of changes in trade, the current account balance, exchange rates, and international financial markets. Prereq: ECO 702.
- ECO 790 TIME SERIES ANALYSIS.** (3)
Time series and stochastic processes, auto-correlation functions and spectral properties of stationary processes; linear models for stationary processes, moving average, auto-regressive and mixed auto-regressive-moving average processes; linear nonstationary models, minimum mean square error forecasts and their properties; model identification, estimation and diagnostic checking. Prereq: STA 422G or its equivalent. (Same as STA 626.)
- ECO 796 SEMINAR.** (1-6)
An extended original investigation of some specific topic with a view to giving training in methods of research and studying intensively a particular subject in the field of economics. May be repeated to a maximum of six credits.
- ECO 797 RESEARCH PROBLEMS IN ECONOMICS.** (1-9)
Students confer individually with the instructor. May be repeated to a maximum of nine credits. Prereq: Permission of the Director of Graduate Studies is required.

EDC Curriculum and Instruction

- EDC 317 INTRODUCTION TO INSTRUCTIONAL MEDIA.** (1)
An introductory instructional media experience including basic production and utilization techniques for media materials and operation of commonly used educational media equipment. Topics include graphic preservation, transparency production, audio materials, motion pictures, 35mm photographic techniques, and an introduction to videotape television. Prereq: Admission to a Teacher Education Program.
- EDC 322 ELEMENTARY PRACTICUM.** (1-3)
Planned and supervised practicum in teaching elementary science, reading, social studies, and mathematics. Observation, selecting objectives and materials, questioning strategies, learning centers, instructional units, and assessment techniques will be emphasized. May be repeated to a maximum of three credits. Lecture, one hour; laboratory, six to twelve hours per week. Prereq: Admission to Early Elementary TEP. Concur: EDC 323, EDC 326, SEM 328, SEM 337, and EDC 339.
- EDC 323 CLASSROOM MANAGEMENT AND DISCIPLINE.** (3)
EDC 323 should be taken in conjunction with EDC 329. Prereq: Admission to Teacher Education Program.
- EDC 326 TEACHING SOCIAL STUDIES IN THE ELEMENTARY SCHOOL.** (3)
A study of methods and materials for teaching social studies at the elementary level. The course will include a critical analysis of a variety of objectives, instructional materials and strategies, and evaluation techniques for elementary social studies. Consideration will be given to addressing the individual needs of a diverse student population. Special emphasis is placed on instruction in grades K-4. Twenty hours of field experience are required in conjunction with EDC 322. Prereq: Admission to TEP and 15 hours of social sciences. Coreq: EDC 322.
- EDC 327 READING IN THE CONTENT AREAS.** (3)
A study of materials and techniques useful in the diagnostic teaching of reading and other language arts with students in grades 5-9. The course will emphasize materials, techniques, and procedures, which diagnose individual strengths and weaknesses, and prescriptive instruction based upon the diagnosis. Lecture, three hours; laboratory, one hour. This course is in conjunction with a guest field experience to occur in a 16-week placement at one school site. Prereq: Admission to teacher education or permission of instructor.
- EDC 329 TEACHING READING AND LANGUAGE ARTS.** (3)
Development of competencies for the teaching of reading and other language arts to groups. Course will also provide an overview of the nature of reading and language arts development from grade K-8. Twenty hours of laboratory work in the schools are required. Prereq: Admission to Early Elementary Education TEP or Middle School TEP.
- EDC 330 WRITING IN THE CONTENT AREAS.** (3)
Development of competencies for the teaching of writing and other language arts, including digital texts and other 21st century platforms, to groups. This course is in conjunction with
- a four-week field experience, consisting of 2 two-week placements in the candidate's areas of content concentration. Prereq: EDC 327, or permission of instructor.
- EDC 334 ORAL AND WRITTEN LANGUAGE DEVELOPMENT IN THE ELEMENTARY SCHOOL.** (3)
A study of language differences, methods for teaching children with language differences, ways to integrate oral language instruction with the total curriculum, ways to enhance students' expressive writing abilities, and ways to teach grammar, spelling, and handwriting through functional and creative writing activities. Prereq: EDC 329 and admission to the elementary teacher education program.
- EDC 339 DESIGNING A READING AND LANGUAGE ARTS PROGRAM FOR THE ELEMENTARY SCHOOL.** (3)
A study of materials and procedures for developing reading and language arts skills with elementary students, with an emphasis on grades K-4. Course will emphasize how to diagnose individual student skill strengths and weaknesses and build a prescriptive program based upon the diagnosis. Prereq: EDC 329; admission to the TEP or permission of instructor. Coreq: EDC 322.
- EDC 341 THE EARLY ADOLESCENT LEARNER AND METHODS IN MIDDLE LEVEL EDUCATION.** (3)
An examination of the nature of early adolescents as well as the history and characteristics of the schools designed to teach them. Focus is on responsive pedagogy, especially the rationale behind the middle school concept and the generic techniques of teaching as an individual and as a member of an interdisciplinary team. Lecture, three hours; laboratory, one hour. This course is in conjunction with a guest field experience to occur in a 16-week placement at one school site. Prereq: Admission to Teacher Education or permission of instructor.
- EDC 342 STUDENT TEACHING IN ART.** (3-12)
Designed to give the student practical experience through observation, planning, teaching, and evaluating procedures. The student works with children on all grade levels under the guidance of the supervising teacher. Offered on a pass-fail basis only. Prereq: Admission to the Teacher Education Program or permission of instructor.
- EDC 343 METHODS AND MANAGEMENT IN MIDDLE LEVEL EDUCATION.** (3)
A study of classroom management in theory and practice, with a focus on planning and assessment in middle level classrooms. This course is in conjunction with a four-week field experience, consisting of 2 two-week placements in the candidate's areas of content concentration. Prereq: EDC 341, or permission of instructor.
- EDC 346 METHODS OF TEACHING MIDDLE LEVEL SOCIAL STUDIES.** (3)
Introduction to theory, research, purposes, methods and materials appropriate to social studies instruction in the middle grades. This course is in conjunction with a four-week field experience, consisting of 2 two-week placements in the candidate's areas of content concentration. Prereq: Admission to Teacher Education, 12 hours in approved social studies courses, or permission of instructor.
- EDC 347 METHODS OF TEACHING MIDDLE LEVEL ENGLISH LANGUAGE ARTS.** (3)
This course introduces teacher candidates to the fundamentals of theory and practice for teaching English Language Arts at the middle level (grades 5-9) as they develop an understanding of state and national standards. Course work includes current issues and recent developments in curriculum and methodology in the teaching of middle level English Language Arts with emphases on the integration of reading, writing, listening, speaking, and language use. Course includes a four-week field placement in middle school settings. Prereq: Admission to Teacher Education, 9 hours in English, or permission of instructor.
- EDC 362 FIELD EXPERIENCES IN SECONDARY EDUCATION.** (1-3)
Supervised experiences in schools, other education agencies, and the community. Required of all students receiving a bachelors degree in secondary education. Includes field trips, work in schools, and involvement in community projects.
- EDC 377 STUDENT TEACHING IN MUSIC.** (3-12)
A course planned for teachers who expect to become either instructors or supervisors of music in the public schools. Observation, teaching, work on research problems, and conferences with the supervising teacher included. Offered on a pass-fail basis only. Prereq: Admission to the Teacher Education Program or permission of instructor.
- EDC 421 SURVEY OF SECONDARY MATHEMATICS CURRICULUM.** (3)
This course will examine the content of the mathematics curriculum of the secondary school and issues related to that curriculum. Students are expected to demonstrate competency in this content.
- EDC 433 STUDENT TEACHING IN THE ELEMENTARY SCHOOL.** (3-12)
A course designed to give the student experience with and practice in the program of an elementary school. Actual work with children in all learning situations is the basic part of the course. A required weekly seminar will include sessions on: beginning teacher internship, school law and students' rights, administrative organization, and professional development. Offered on a pass/fail basis only. Prereq: Must meet the published college requirements for student teaching.

EDC 446 APPLICATIONS OF TEACHING MIDDLE LEVEL SOCIAL STUDIES. (3)

This course emphasizes analyzing and assessing teaching and learning appropriate to inquiry-based social studies instruction in the middle grades. This course is in conjunction with an eight-week field experience. Prereq: EDC 346 or permission of instructor.

***EDC 454G CULTURE, EDUCATION AND TEACHING ABROAD. (3)**

Introduction to theory and practice of intercultural communication, cross-cultural (especially international experience), and teaching with a global perspective, plus an opportunity for country-specific research. Required for those wishing to student teach overseas. Prereq: Sophomores must have instructor's permission to register. (Same as EPE 454G.)

EDC 501 TEACHING INTERNSHIP. (1-12)

Supervised practice teaching under competent leadership. Observation, instruction, independent study which parallels field experience, and conferences with supervising instructor included. This course is designed primarily for students in Allied Health Professions, Education, Library and Information Science, Home Economics, and Social Work. May be repeated to a maximum of 12 hours. Prereq: EDC 500 or permission of instructor.

EDC 504 LITERATURE AND RELATED MEDIA FOR YOUNG ADULTS. (3)

A study of literature and related materials for use with young people in grades 6-12. Emphasis is placed on the special characteristics and needs of young people and the evaluation of materials for this age group. (Same as LIS 514.)

EDC 509 COMPOSITION FOR TEACHERS. (3)

A course covering the basic studies helpful to teachers of English composition at the secondary level. Focuses on the teaching of grammar, punctuation, usage, etc., and on theme planning, correction, and revision. Students are required to do quite a bit of writing. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG 509.)

EDC 513 TEACHING ENGLISH AS A SECOND LANGUAGE. (3)

The course examines the current theories and methods of teaching English as a second language. The course will include (1) language learning theory as it relates to other disciplines; (2) methods and techniques of contrastive analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG/LIN 513.)

EDC 514 TESL MATERIALS AND METHODS. (3)

An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using their own materials. Prereq: ENG/EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG/LIN 514.)

EDC 520 ASSESSMENT AND ACCOUNTABILITY IN MIDDLE LEVEL EDUCATION. (3)

This capstone course is taken during the student teaching experience and is taught via an online modality. The purpose of the course is to investigate and document teaching effectiveness. Candidates design an integrated unit of study, pre and post test student learning, analyze learning gains drawing on formative and summative measures, and make modifications and accommodations based on the results. Prereq: Admission to Teacher Education.

EDC 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS. (3)

Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examinations, criteria for evaluation and marking and other rating systems. (Same as EDP/EPE 522.)

EDC 533 TEACHING LITERACY ACROSS THE DISCIPLINES. (3)

This course provides an in-depth study of theories and teaching methods for integrating literacy (including digital literacy) instruction into content area classrooms at the K-12 levels. Instructional strategies, procedures, and assessments designed to increase vocabulary learning and comprehension of expository texts are emphasized. Prereq: Graduate standing or consent of the instructor.

EDC 537 ADVANCED APPLICATIONS OF TEACHING WRITING. (3)

This course promotes the thoughtful examination of writing instruction at the middle and high school levels. Throughout the course, learners are introduced to strategies and skills they can use to enhance their own writing and the writing of their students. Using a process approach, students learn how to communicate ideas effectively in a variety of genres and for a multitude of purposes. Based on the most current research in the field, this course explores such topics as writers workshop, conferencing, assessment of struggling writers, reading/writing connections, writing in the disciplines, revision and editing, the use of digital media to support writers, and the management of writing instruction. This course is offered in conjunction with an eight-week clinical field experience. Prereq: EDC 347, graduate standing, or permission of instructor.

EDC 541 READING AND UNDERSTANDING EDUCATIONAL RESEARCH. (3)

The purpose of this course is to learn how to critically read, analyze, and reflect upon educational research from quantitative, qualitative, and mixed methods perspectives.

EDC 543 DIGITAL GAME BASED LEARNING AND INSTRUCTION. (3)

Digital game-based video applications as prominent video-based vehicles for distance education and multimedia development through multi-user and virtual platforms. Classroom exercises and projects develop basic video game production skills including the use of graphical and video assets, flash animations storyboarding, equipment, terminology and systems, message design issues and research on DGBL.

EDC 544 USE AND INTEGRATION OF INSTRUCTIONAL MEDIA. (3)

Students use a range of traditional, interactive, and emerging technological interventions in analog and digital formats. Students gain skill in the operation, production, and integration of basic media such as video, graphics, videodisk, and CD-ROM in a variety of instructional settings (training, exploratory learning, on-line databases, etc.). Students demonstrate skills via the composition and production of several media documents using available tools and resources.

EDC 547 TECHNOLOGY IN INSTRUCTION PRACTICE. (3)

Students use instructional computing applications and understand the roles and uses of computers in instruction. Students select and use instructional computing hardware and software appropriate to instructional goals and settings. Students use electronic networks for instructional purposes. Students demonstrate skill using basic productivity software through structured assignments and collaborative projects.

EDC 548 INSTRUCTIONAL TECHNOLOGY LEADERSHIP. (3)

Students develop skill in advanced aspects of the operation and use of the range of instructional technologies from desktop to distributed computing environments. Students use operating systems, learn network administration, do technology planning, and work with basic authoring tools. Skill is demonstrated through a series of projects including development of a technology plan for a specified work setting and authorship of a prototype program.

EDC 549 MIDDLE LEVEL STUDENT TEACHING. (3-15)

This course provides candidates with the opportunity to participate in a full-time, supervised internship in middle grade classrooms. The student teaching experience occurs in a 5-9 school setting. Offered on a pass-fail basis only. Repeated for up to 15 hours. Prereq: Must meet published college requirements for student teaching.

EDC 550 EDUCATION IN A CULTURALLY DIVERSE SOCIETY. (3)

This course assists future educators in developing strategies to create an equitable teaching/learning environment where all students are validated, stimulated, and nurtured. Course participants explore the rationale for their current belief systems and perceptions of other cultures; investigate how and why their personal attitudes, behaviors, and expectations affect the academic and social development of children and youth, and examine contemporary educational issues. (Same as AAS 550.)

#EDC 560 LITERACY DEVELOPMENT IN THE ESL CLASSROOM. (3)

This course is designed to introduce students to theory, research, and teaching applications of second language literacy development in the ESL classroom. This is a field-based course, and students will study current teaching methods of literacy instruction and apply those ideas with learners in an ESL setting. (Same as TSL 560.)

EDC 575, 576 MODERN EDUCATIONAL PROBLEMS. (UNCLASSIFIED). (3 ea.)

EDC 601 THEORIES, PERSPECTIVES, TRENDS AND ISSUES IN MULTICULTURAL EDUCATION. (3)

This course provides students with a critical analysis of multicultural education theories, perspectives, current issues, and trends. Students will develop the competencies needed to write scholarly literature reviews, identify areas in multicultural education needing further research studies, and submit papers for review and presentation at professional meetings. Prereq: Graduate standing, EDP 557 or consent of instructor. (Same as AAS 601.)

EDC 605 DISTANCE LEARNING RESEARCH AND DESIGN. (3)

Study of the design and development of distributed learning systems in education and training. Topics include: foundations of distance education, distance learning research, and the design and development of e-learning courses and workshops. Student involvement in the design of an e-learning course or workshop will be emphasized.

EDC 607 INSTRUCTIONAL DESIGN I. (3)

Introduction to the instructional design process from needs assessment and goal definition through evaluation. Each student will design prototype instructional materials based on an instructional design model and/or procedures. The course will also introduce students to the field of instructional design and technology.

EDC 608 INSTRUCTIONAL DESIGN II. (3)

Critical analysis of instructional design models and their theoretical foundations including the impact of various models and perspectives on the practice and the products of instructional design. Prereq: EDC 607 or consent of instructor.

EDC 609 INTERACTIVE MULTIMEDIA AND USER DESIGN. (3)

The goal of this course is to examine the theoretical foundations and best practices involved in multimedia research and interface design. These investigations are anchored in user-centered design and the methodology explored in the course is research to practice in usability testing and iterative program design. Prereq: EDC 544.

EDC 610 DISCIPLINE AND CLASSROOM MANAGEMENT. (3)

The course is designed to examine the causes of and solutions to disruptive and noncompliant behavior and classroom management problems that are within the control of the classroom teacher. The course content is designed around two approaches: (1) identifying prevalent problems and exploring specific solutions to them; (2) presenting selected strategies and applying them to a variety of problems. In both cases, alternatives are considered in the light of relevant theory, law, research and experience. Prereq: Teacher certification and EDP 203.

EDC 611 AUTHORING APPLICATIONS FOR TECHNOLOGY-BASED INSTRUCTION. (3)

Focuses on individual and collaborative authoring applications for technology based instruction.

tional materials. Topics include linear and non-linear information structures, instructional message design, compositional issues related to audience focus, information density, language control, and organization, and prototype production with industry standard authoring software. Prereq: EDC 547 and EDC 607 or consent of instructor.

EDC 612 INSTRUCTIONAL DESIGN AND TECHNOLOGY FOUNDATIONS. (3)

Provides an in-depth survey of the field of instructional design and technology. Topics covered include the history of instructional design and technology, critical issues, current trends and future prospects for the field, instructional development, research, certification, and professional development.

EDC 615 ADVANCED INSTRUCTIONAL APPLICATIONS FOR THE EARLY ADOLESCENT LEARNER. (3)

This course for middle school teachers examines the complex nature of the 10 to 14 year old student. Analysis of recent research-based effective instructional strategies to meet the needs, interests, and characteristics of these students will be included. Prereq: Teacher Certification or consent of instructor.

EDC 616 THE MIDDLE SCHOOL. (3)

The purpose of this course is to provide middle school teachers with an in-depth analysis of the characteristics of effective middle school facilities. An examination of current curricular models, issues, trends, and exemplary middle schools will comprise the primary focus of this course. Prereq: EDC 615 or consent of instructor.

#EDC 617 EFFECTIVE TEACHING IN CULTURALLY AND LINGUISTICALLY DIVERSE CLASSROOMS. (3)

The purpose of this course is to prepare educators to effectively teach culturally and linguistically diverse students in mainstream classrooms. Prereq: Graduate student status is required.

EDC 618 ADVANCED STUDY IN THE TEACHING OF READING. (3)

An advanced course for classroom teachers which focuses on selection and implementation of reading assessment and instructional procedures. The theoretical bases of the reading process and the knowledge of research in reading will be related to the design of classroom instruction. This course is to become an option in Area 7 of both the Elementary and Secondary Standard Certification programs. Prereq: EDC 330 or 339 or 533 or equivalent.

EDC 619 ASSESSMENT OF READING GROWTH AND DEVELOPMENT. (3)

Clinical techniques for the diagnosis of reading disabilities. A course designed to develop both theoretical understandings and operational skills in clinical diagnosis of reading problems. Classroom application of the techniques is discussed. Prereq: EDC 330, or EDC 533, or EDC 534, or permission of instructor.

EDC 620 DESIGN AND IMPLEMENTATION OF READING INSTRUCTION. (3)

Clinical techniques used in the remediation of reading problems. It is a course designed to develop individualized procedures related to diagnosis. Classroom applications of the instructional procedures are discussed. This course is a combination of lecture and application with a student client. Prereq: EDC 619, or permission of instructor.

EDC 620 DESIGN AND IMPLEMENTATION OF READING INSTRUCTION. (3)

Clinical techniques used in the remediation of reading problems. A course designed to develop individualized procedures related to diagnosis. Classroom application of the instructional procedures is discussed. Lecture, two hours; laboratory, two hours. Prereq: EDC 619, or consent of instructor.

EDC 621 LANGUAGE AND LITERACY DEVELOPMENT. (3)

A study of language and literacy development (oral and written language development, first and second language development, etc.) across the lifespan to provide a foundation for literacy instruction and curriculum development. Prereq: EDC 641 or equivalent course in research foundations.

#EDC 622 OBSERVING AND RESPONDING TO YOUNG READERS. (3)

Throughout the preparation year, teacher leaders engage in sensitive observation and responsive teaching of individual grade one children who have been identified as having difficulty learning to read and write. They study the theoretical rationales and practical application of Reading Recovery teaching procedures and connect their practice to wider understandings of literacy development. Across the year, teacher leaders work with a variety of children to gain a range of experiences, always focusing on teaching for accelerated learning. Reading Recovery trainers provide clinical supervision and guidance as teacher leaders learn how to problem solve the particular challenges of children who are not making accelerated progress. In order to work effectively with teachers in the future, teacher leaders are placed in the teaching role with visible accountability across a school year. Prereq: Applied for and been accepted to a Reading Recovery position in a school district.

#EDC 623 THEORETICAL FOUNDATIONS: LANGUAGE AND LITERACY LEARNING AND DEVELOPMENT. (3)

Teacher Leaders in training examine the theoretical base underlying the processes of reading and writing. We will explore and extend our own personal models of reading and writing processes and ground this theory, building in close observations of young children reading and writing. Prereq: Applied for and been accepted to a Reading Recovery position in a school district.

#EDC 624 LEADERSHIP PRACTICUM FOR TEACHER LEADERS. (3)

The course prepares teacher leaders for multiple and complex roles. Teacher leaders learn how

to deliver initial training courses and ongoing professional support for Reading Recovery teachers. A key aspect of the teacher leader's role is to provide the yearlong course of initial training for Reading Recovery teachers. In order to prepare teacher leaders for this role, attention is given to research, theory and practice relating to adult learners.

EDC 625 LITERACY LEADERSHIP P-12. (3)

The purpose of this course is to prepare literacy professionals to facilitate positive change in school and community settings through program development and evaluation, mentoring, and advocacy. Students will: understand and assume various roles as literacy leaders; learn how to develop, implement, and evaluate effective research-based literacy programs and practices; learn how to design, facilitate, lead, and evaluate effective professional development programs for professional educators; learn how to mentor colleagues and work collaboratively with families, teachers, administrators, policymakers, and community members in individual and group contexts; and learn how to influence local, state, and national policy decisions related to literacy education.

EDC 626 CURRENT ISSUES IN LITERACY EDUCATION. (3)

"Current Issues in Literacy Education" (EDC626) is an advanced course for graduate students, which focuses on contemporary matters in literacy education and learners. An emphasis on social, historical, and political factors affecting the literacy learning is included.

#EDC 627 OBSERVING AND RESPONDING TO YOUNG READERS, ADVANCED. (3)

This course represents advanced study of the Fall Semester course (622). Students will continue to engage in sensitive observation and responsive teaching focusing on the hardest to teach children. Students will refine and deepen their understandings of the theoretical rationales and practical applications of Reading Recovery. The Teacher Leader-in-training will have the opportunity to observe, analyze, discuss, and directly experience the role of Teacher Leader in class and assigned field experiences, while preparing to implement the Reading Recovery program within their region, university or school district.

EDC 628 THEORETICAL FOUNDATIONS: ISSUES IN LITERARY DIFFICULTIES. (3)

The purpose of this course is three fold. First, to acquaint students with the most current thinking about reading and learning processes relative to young, low progress, 'at-risk' students. Second, to acquaint students with the seminal research and theories which have influenced the reading difficulties field. Third, to help students relate recent and seminal theories of learning and, in particular, reading difficulties, to young students who are hard for us to teach. Prereq: Applied for and been accepted to a Reading Recovery position in a school district. EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627

EDC 629 LEADERSHIP PRACTICUM FOR TEACHER LEADERS, ADVANCED. (3)

Careful attention to implementation is critical for a successful intervention. Reading Recovery has well-developed, context-sensitive and evolving mechanisms for ensuring quality implementation. Teacher leaders play a critical role in maintaining the quality of each implementation. In order to provide effective leadership, teacher leaders must be knowledgeable about the design principles of the intervention and skillful in problem solving issues that arise. Teacher leaders collect and analyze data to evaluate and strengthen the implementation of Reading Recovery. They create awareness, work collaboratively with stakeholders, and cultivate support for Reading Recovery at the building, district, site, and state levels. Prereq: Applied for and been accepted to a Reading Recovery position in a school district. EDC 502, EDC 503, EDC 622, EDC 623, EDC 624, EDC 627, EDC 628.

#EDC 630 FAMILY AND COMMUNITY LITERACY. (3)

Viewed through a lens of lifelong literacy, this course focuses on developing strong partnerships between families, communities, and schools. Course topics will include: (a) family diversity & multiple literacies, (b) learning about, from, and with families & communities, (c) building upon family/community knowledge and resources in instruction, and (d) designing effective partnerships and family-engagement programs. Course assignments will provide hands-on opportunities to engage with these topics in real-world settings. This course is offered via a hybrid distance format, with a combination of on-campus face-to-face class meetings, synchronous online class meetings, and asynchronous work. There are no prerequisites to this course, other than graduate student status.

EDC 632 SOCIAL STUDIES PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)

Through campus and school-based experiences, students will learn how to engage young people in learning social studies and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDC 633 BUSINESS PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)

Through campus and school-based experiences, students will learn how to engage young people in learning business and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDC 635 ENGLISH PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)

Through campus and school-based experiences, students will learn how to engage young people in learning English and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDC 637 CLASSROOM MANAGEMENT IN SECONDARY EDUCATION. (1)

The Classroom Management component course is designed to prepare future teachers to effectively manage aspects of their instruction, interactions with students, and student behavior in the secondary classroom. Causes of and solutions to disruptive and noncompliant behavior and classroom management problems that are within the control of the classroom teacher will be examined. Prereq: Admission to the M.A. Education (Secondary Education with Initial Certification).

EDC 638 TECHNOLOGY IN SECONDARY EDUCATION. (1-3)

This course emphasizes the use of several key interactive technologies for problem solving – problem solving that occurs on several levels: (1) instructional problem solving (using technology to support various kinds of learning outcomes for students), (2) content problem solving (using games/software/websites to learn to solve problems that reflect the principles and core concepts in your discipline, (3) assessment problem solving (using technologies to support authentic challenging assessments that support evaluation of what students know and are able to do).

***EDC 639 TEACHING DIVERSE LEARNERS IN SECONDARY EDUCATION. (1)**

This course explores the influence of self-concepts and past experiences on current attitudes, perceptions and behaviors; investigates the effects of cultural traditions, political mandates, educational trends and school curriculums on student achievement; and develops strategies to create equitable teaching/learning environments in secondary education that validate, stimulate, and nurture all students. Prereq: Admission to M.A. in Education (Secondary Education with Initial Certification).

EDC 642 RESEARCH AND THEORY IN LITERACY EDUCATION. (3)

The purpose of this course is to critically examine, analyze, and reflect upon research and theory pertaining to the production and understanding of oral and written language (reading, writing, speaking, listening, viewing, and visually representing). Prereq: EDC 641 or equivalent course in research foundations.

EDC 709 SOCIAL MEDIA AND INTERACTIVE SYSTEMS DESIGN. (3)

The purpose of this course is to examine the growing research and design literature for on-line communities and networked learning groups that support cooperative, collaborative and social instructional activities. Framed by concepts from Activity Theory, Social Networking Theory and Social Learning Models students will read current books, research articles and be introduced to research methods and tools (such as tracking utilities and on-line data collection) for examining on-line communities. Students will design and collect data for an original research project as part of required course work. Prereq: EDC 608, EDC 612, or consent of instructor.

EDC 710 ADVANCED TOPICS IN INSTRUCTIONAL DESIGN. (3)

An identification and analysis of current theories and programs of research in instructional systems design. Students will develop the skills necessary to conduct and write a scholarly literature review and identify potential areas and questions needing further study. Prereq: EDC 608, EDC 610, EDC 612, or consent of instructor.

EDC 712 THE ELEMENTARY SCHOOL. (3)

Recent research and modern trends in teaching the skills and content subjects in the elementary school. Planned for supervisors, superintendents, principals, and teachers for better understanding of a modern elementary school.

EDC 714 THE SECONDARY SCHOOL. (3)

A course designed to acquaint the secondary teacher and the administrator with the nature and function of the secondary school.

EDC 724 GUIDING AND ANALYZING EFFECTIVE TEACHING. (3)

A course designed for educators who are preparing to supervise teachers and who wish to analyze their own practice. Research, policies, and trends are examined and practices analyzed in the context of how to promote effective teaching. Principles apply to elementary and secondary education.

EDC 726 CURRICULUM INQUIRY MIXED METHODS RESEARCH. (3)

A mixed methodology conceptual framework is used to examine various approaches for designing, implementing, and analyzing practitioner data generated in a variety of instructional settings. Topics include epistemological, methodological, and ethical issues involved in action research, classroom discourse analyses, and mixed methods curriculum inquiry. Prereq: EDP/EPE 558 and EPE 663 or permission of instructor.

EDC 730 PROBLEMS OF THE SCHOOL CURRICULUM. (3)

Problems in the field of the school curriculum and in the preparation of instructional materials. Students enrolling in this course are required to leave on file with the College of Education a complete report of each problem studied. May be repeated once for a maximum of six credits.

EDC 731 SOCIAL STUDIES SEMINAR: HISTORY EDUCATION. (3)

Advanced study of the purposes and practices that characterize K-12 history education in diverse settings, critical analysis of research on the development of children's and adolescents'

historical thinking and the introduction of classroom-based techniques for assessing students' historical understanding. Prereq: Graduate standing.

EDC 732 CURRICULUM DESIGN FOR LEARNING AND LEADING. (3)

Critical analysis, design, and implementation of curricula. Survey of theoretical foundations, in-depth applied research experiences, design of curriculum resource materials, and implementation of curriculum designs.

EDC 733 LEADERSHIP IN ADVANCED INSTRUCTIONAL PRACTICE. (3)

Course participants will develop leadership skills in curriculum and instruction through a variety of research-based analytic practices such as lesson study, observation, mentoring, dialogic and collaborative work in the context of a school learning community. Clinical/field/practicum experiences provide experience identifying a research problem, planning a course of action, and implementing and evaluating the action plan to improve learning results in K-12 classrooms. This course is designed as a hybrid workshop as follows. The class begins with a one-week intensive summer experience. Online and distance learning instruction will be conducted throughout the fall semester as students engage in their course work through clinical/field/practicum experiences. During the semester, two in-class meetings will serve as midpoint and final assessments of student progress toward meeting course objectives. Clinical/field work will be conducted in school classrooms. Prereq: Graduate-level curriculum course, graduate-level assessment course, and a minimum of two years' K-12 teaching experience.

EDC 740 PRACTICUM IN TEACHING READING AND RELATED LANGUAGE ARTS. (3)

Supervised practicum in analyzing problems in reading and related language arts and providing remedial work. Requires six hours per week in practicum with individual children or groups, plus two hours per week in seminar. May be repeated to a maximum of six credits. Prereq: EDC 619, 620.

EDC 746 SUBJECT AREA INSTRUCTION IN THE SECONDARY SCHOOL. (0-9)

Students will teach in their subject areas in the schools full-time, meet regularly to discuss teaching effectiveness and strategies for improvement and develop their professional portfolios. May be repeated to a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: The appropriate methods course in the subject area (SEM 631, EDC 632, EDC 633, SEM 634 or EDC 635). Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education). (Same as SEM 746.)

EDC 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EDC 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EDC 750 INTERNSHIP IN INSTRUCTIONAL SYSTEMS DESIGN. (3)

Students will apply their knowledge of instructional systems design in a real-life setting. The work setting will be selected based on the professional goals of each student and student work will be supervised and reviewed by the internship coordinator. May be repeated to a maximum of nine credits. Prereq: Consent of program coordinator.

EDC 755 INSTRUCTIONAL SYSTEMS DESIGN RESEARCH COLLOQUIUM. (1)

Students and faculty will discuss current research and related issues in instructional systems design. May be repeated to a maximum of two credits. Prereq or concur: EDC 547 and EDC 608.

EDC 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDC 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

EDC 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

EDC 777 SEMINAR IN CURRICULUM AND INSTRUCTION (Subtitle required). (1-3)

A critical analysis of recently developed materials and techniques in curriculum and instruction for precollege education. Includes analysis of evaluative research related to new materials and techniques. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

EDC 781 INDEPENDENT STUDY IN CURRICULUM AND INSTRUCTION. (1-3)

An independent study course for graduate students who have completed at least half of the program course requirements in clinical and college teaching, curriculum and instruction, early childhood education, elementary education, reading or secondary education. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies.

EDC 791 RESEARCH PROBLEMS IN CURRICULUM AND INSTRUCTION. (1-3)

A research problems course for graduate students who have completed at least half of the program course requirements in clinical and college teaching, curriculum and instruction, early childhood education, elementary education, reading or secondary education. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies.

EDL School Administration**EDL 401 THE PROFESSIONAL TEACHER: LEGAL PERSPECTIVES. (1)**

Study of legal concerns of public school teachers. Emphasizes legal rights and responsibilities of teachers and pupils. Lecture, two hours per week for eight weeks. Prereq: Admission to the Teacher Education Program.

EDL 402 PRINCIPLES OF LEADERSHIP. (3)

This course is designed to provide an introduction to leadership. Its focus is the development of an understanding of leadership theories and styles. You will also learn strategies for successful leadership. The introduction will include: 1) historical, theoretical, and cultural perspectives of leadership, 2) leadership skills and styles and strategies for success, and 3) examination of the responsibilities of leadership. Prereq: Admission to the program or consent of instructor. (Same as CLD 402.)

EDL 403 LEADERSHIP AND COMMUNICATION. (3)

This course is designed to expand student understanding of the theory and practice of leadership, conflict management, and decision-making. It is also designed to focus on issues of cohesiveness, trust, motivation, vision, and goals. Students must integrate their personal ethics and definition of leadership in various course assignments and projects. Prereq: Admission to the program or consent of instructor. (Same as CLD 403.)

EDL 404 CONTEMPORARY LEADERSHIP APPLICATIONS. (3)

This course supplements and integrates previous learning and is designed to provide maximum exposure to various concepts and perspectives of leadership through observational experiences, critical thinking, and self-analysis. It is also designed to allow the demonstration of previously learned leadership theories, styles, and strategies. Students must integrate their personal ethics and vision of leadership in their examination of various contemporary leadership contexts. Prereq: Admission to the program or consent of instructor. (Same as CLD 404.)

EDL 571 DESIGN THINKING IN EDUCATION. (3)

This course exposes students to many facets of design thinking and provides them with an interdisciplinary perspective about the role of design in addressing the world's challenges. This course also raises awareness about the value and power of design thinking our culture. Students will work in collaborative teams on semester-long projects in collaboration with client organizations, field liaisons, and a set of multidisciplinary experts. Students are exposed to the process of human-centered design, and hone their skills in need finding, problem definition, brainstorming, prototyping, and user testing. The course will consist of lecture, hands-on practicum, and guest speakers.

EDL 601 INTRODUCTION TO SCHOOL LEADERSHIP AND ADMINISTRATION. (3)

Study of school leadership and administrative responsibilities, with emphases on understanding schools as complex organizations and facilitating leadership to create a work climate supportive of excellence in teaching and learning.

EDL 610 SCHOOL LEADERSHIP PRACTICUM I. (1)

Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed, or consent of instructor.

EDL 611 SCHOOL LEADERSHIP PRACTICUM II. (1)

Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed and EDL 610 completed, or consent of instructor.

EDL 612 SCHOOL LEADERSHIP PRACTICUM III. (1)

Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed and EDL 610, EDL 611 completed, or consent of instructor.

EDL 625 SCHOOL SAFETY AND DISCIPLINE LEADERSHIP. (3)

Study of processes and programs effective in promoting school wide safety and discipline. Emphasis on school connections to community security and resources. Prereq: Admission to Department Program or Consent of instructor.

EDL 627 SCHOOL FINANCE AND SUPPORT SERVICES. (3)

Study of concepts in school finance and school business management. Attention is given to national, state, and local issues. Emphasis is also given to school support services including transportation, facility planning and maintenance, food service, and risk management. Prereq: Program status or consent of instructor.

EDL 628 SCHOOL LAW AND ETHICS. (3)

Study of legal and ethical issues as related to practical problems of school administration. Constitutional provisions and court decisions are examined as they impact education. Prereq: Program status or consent of instructor.

EDL 631 LEADERSHIP FOR SCHOOL PROGRAM COLLABORATION. (3)

This course prepared school leaders to administer integrated instructional support programs in schools and districts. Attention is also given to leadership requirements needed to facilitate collaboration among school and community-based programs that provide and support student learning. Prereq: Program status or consent of instructor.

EDL 634 LEADERSHIP FOR HUMAN RESOURCES DEVELOPMENT IN SCHOOLS. (3)

Study of human resources development practices in school systems, with emphases on central office and school unit responsibilities for attracting, selecting, developing, evaluating, and retaining competent faculty and staff. Prereq: Program status or consent of instructor.

EDL 638 THE SUPERVISOR OF INSTRUCTION. (3)

A study of the role and responsibilities of the supervisor of instruction as a member of the leadership team for the school district. Prereq: Admission to program or consent of instructor.

***EDL 646 LEADERSHIP FOR SCHOOL-FAMILY COMMUNITY ENGAGEMENT. (3)**

EDL 646 explores issues in administering integrated support programs in schools and districts serving specific student or community populations while increasing school and community collaboration. Prereq: Program status or consent of instructor.

EDL 661 SCHOOL TECHNOLOGY LEADERSHIP. (3)

This course provides an introduction to the study of school technology leadership with an emphasis on educational administrators developing a shared vision, planning, and promulgating policies and utilizing resources for the comprehensive integration of technology at the school, district, and state levels. Prereq: Admission to the program or consent of instructor.

EDL 662 DIGITAL AGE LEARNING AND SCHOOL TECHNOLOGY LEADERSHIP. (3)

This course focuses on the role of educational administrators in creating and sustaining a culture of learning that ensures all students have access to an academically rigorous, relevant, and engaging education through the use of appropriate digital technologies. Prereq: Admission to the program or consent of instructor.

EDL 663 LEADERSHIP FOR SCHOOL PROGRAM IMPROVEMENT. (3)

This course addresses the role of the educational administrator in providing professional development that supports communities of practice and the adoption of contemporary technologies and digital resources to enhance student academic learning. The course introduces students to principles of adult learning that characterize effective professional development and planning as it relates to technology adoption at the school, district and state-levels of education.

EDL 664 SCHOOL TECHNOLOGY LEADERSHIP FOR SCHOOL IMPROVEMENT. (3)

This course focuses on educational administrators' use of technology to support data-driven decision-making to support continuous improvement and change at the school, district, and state levels of education. Prereq: Admission to the program or consent of instructor.

EDL 665 SCHOOL TECHNOLOGY LEADERSHIP FOR DIGITAL CITIZENSHIP. (3)

This course examines school administrators' social, ethical, and legal issues and responsibilities all students, including those with disabilities and special needs, for digital citizenship. Facilitating understanding of evolving virtual school environments and modeling digital citizenship at the school, district, and state levels are also addressed. Prereq: Admission to the program or consent of instructor.

EDL 669 LEADERSHIP FOR CREATIVE PROBLEM SOLVING. (3)

Study of diverse strategies and protocols used to identify authentic problems of practice in educational settings, diagnose potential options, determine innovation solutions, and assess impact by using diverse data sources.

EDL 676 THE SCHOOL SUPERINTENDENCY. (3)

Role of the school district superintendent is studied including: historical and current job responsibilities of the position; knowledge, skills and dispositions necessary to serve successfully in the position; future challenges of the position. Prereq: Admission to the program and consent of instructor.

EDL 677 SCHOOL SYSTEM ADMINISTRATION. (3)

Study of overall school district management and operations including administration of auxiliary services, federal programs, financial management, and human resources. Prereq: Admission to program or consent of instructor.

EDL 678 STRATEGIC MANAGEMENT IN EDUCATION. (3)

Study of strategic management procedure applications in school administration utilized at both the school district and individual school site levels. Prereq: Admission to program or consent of instructor.

EDL 679 SCHOOL SUPERINTENDENT PRACTICUM I. (1)

Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prereq: Admission to school superintendent certificate program or consent of instructor.

EDL 680 SCHOOL SUPERINTENDENT PRACTICUM II. (1)

Study and observation of the role and responsibilities of the school superintendent in practice.

Course Descriptions

Students are required to spend time in field settings. Prereq: Admission to school superintendent certificate program and completion of EDL 679 or consent of instructor.

EDL 681 SCHOOL SUPERINTENDENT PRACTICUM III. (1)

Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prereq: Admission to school superintendent certificate program and completion of EDL 679 plus EDL 680, or consent of instructor.

EDL 682 LEADING DISTRICT CHANGE AND INNOVATION. (3)

This course focuses on understanding the role of the school district superintendent in leading system-wide change and innovation, educational reform in national, state and local contexts and change models and processes. Students will collaborate with a superintendent mentor in completing field-based, work-embedded assignments. Prereq: Admission to the Superintendent Certification Program or consent of the instructor.

EDL 694 LEADERSHIP IN CAREER AND TECHNICAL EDUCATION. (3)

A course designed for superintendents, high school principals, and other leaders. Its purpose is to prepare administrators and supervisors for leadership in career and technical education. (Same as CLD 694.)

EDL 700 KNOWLEDGE BASE FOR LEADERS. (3)

This course reviews the quest for a knowledge based in educational administration. It begins with a survey of the history of education and organizational thought in the United States, examining scientific management, human relations, bureaucracy, and the theory movement. The course also reviews more recent attempts to capture the knowledge base including the University Council of Educational Administration's article bank, PRIMIS, and the Standards for School Leaders from the Interstate School of Leadership Licensure Consortium. The course emphasizes epistemologies used to generate a knowledge base in educational administration tracing the evolution of thought and vocabulary within the profession. Prereq: Permission of instructor.

EDL 701 LEADERSHIP IN EDUCATIONAL ORGANIZATIONS. (3)

A study of leadership with particular emphasis on understanding the nature, defining characteristics, responsibilities, contextual determinants, and importance of leadership within educational organizations. Prereq: Admission to Department program or consent of instructor.

EDL 702 LEADERSHIP FOR ORGANIZATIONAL LEARNING. (3)

This course examines theories associated with organizational learning and change processes that can be used by leaders of 21st century educational systems. Theories are then used to examine prevailing practices within organizations and to inform the development of action plans appropriate for improved organizational performance. Prereq: Admission to Department program or consent of instructor.

EDL 703 LEADING ORGANIZATIONAL CHANGE. (3)

This course focuses on understanding the field of organizational change as well as emphasizing the nature, characteristics, responsibilities, and contextual determinants that influence a leader's role in changing educational organizations. Prereq: Admission to Department program or consent of instructor.

EDL 704 POLITICS OF EDUCATIONAL LEADERSHIP. (3)

This course provides a study of the political contexts in which educational leaders must operate. The course explores the roles of policy actors, institutions, ideologies, and competing interests, both internal and external to education institutions. The course places emphasis on the ways that race, class, and income factor into political decision making in education. Prereq: Graduate standing. (Same as EPE 603.)

EDL 705 INTERNATIONAL PERSPECTIVES ON EDUCATIONAL REFORM. (3)

The course focuses on international education reform, the function of schools in national social, economic and political development, as well as emerging perspectives on educational leadership and professional preparation. Prereq: Admission to a doctoral degree program at the University of Kentucky, completion of EPE 555, its equivalent, or consent of the instructor.

EDL 706 CONTEMPORARY SCHOOL LEADERSHIP. (3)

EDL 706 examines leadership and administrative responsibilities in contemporary P12 schools with emphasis on a principal's role in creating a learning-centered culture focused on student achievement and school excellence. Hybrid delivery that features face-to-face and online sessions. Prereq: Admission to EdD program or permission of instructor.

EDL 707 LEADERSHIP IN LEARNING-CENTERED SCHOOLS. (3)

EDL 707 examines theories associated with learning-centered leadership in P12 educational organizations with emphasis on the roles and responsibilities of principal in supervising and monitoring a school's instructional program, learning assessment, and evaluation and accountability processes to assure academic achievement by all students. Prereq: Admission to Ed.D. program or permission of instructor.

EDL 708 ORGANIZATIONAL LEARNING IN P12 SCHOOLS. (3)

EDL 708 examines theories associated with organizational learning and change processes that can be used by principals to create learning-centered schools. Students conduct disciplined inquiry within P12 schools to identify current practices and then develop action plans to improve school performance.

#EDL 709 EVIDENCE-BASED DECISION MAKING. (3)

EDL 709 provides an overview of assumptions and procedures for systematic inquiry in educational settings and practice using diverse strategies to analyze data in order to make

informed decisions about improving student learning and school performance. Hybrid delivery that features face-to-face and online sessions. Prereq: Current EdS degree-seeing student in principal preparation program or approval of course instructor.

EDL 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EDL 751 FOUNDATIONS OF INQUIRY. (3)

Introductory study of assumptions and procedures of systematic inquiry used to investigate administrative, leadership and supervisory phenomena in education. Issues regarding quantitative, qualitative and mixed methods models of inquiry are included.

EDL 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDL 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

EDL 770 TOPICAL SEMINAR IN EDUCATIONAL LEADERSHIP. (1-3)

Advanced graduate students enroll in this topical seminar to enhance their portfolios for educational leadership through concentrated study of innovations in the specialized functions of leadership. These specializations include, but are not limited to, the study of curriculum and instructional leadership, educational law, personnel administration, school and community relations, education for diverse populations, budgeting and financing of schools. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDL 771 SEMINAR IN LEADERSHIP. (1-3)

A variable topic seminar on selected problems in educational leadership. Activities are designed to improve skill in planning, data-informed decision making, organizing, communicating, evaluating, negotiating, and problem solving will be provided as appropriate. Educational innovations and processes of implementing change may be analyzed. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDL 785 INDEPENDENT WORK IN EDUCATIONAL LEADERSHIP. (3)

Includes research on a practical problem in educational leadership. Open only to students with at least one semester of graduate work in education. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

EDL 792 RESEARCH IN EDUCATIONAL LEADERSHIP. (3)

Critical examination of representative research studies in leadership and related fields. Emphasis upon the students' defining and delimiting an appropriate problem in educational leadership, generating a design appropriate to the problem and selecting appropriate techniques of analysis. Prereq: Admission to program.

EDP Educational and Counseling Psychology

EDP 202 HUMAN DEVELOPMENT AND LEARNING. (3)

Theories and concepts of human development, learning, and motivation are presented and applied to interpreting and explaining human behavior and interaction in relation to teaching across the developmental span from early childhood to adulthood. A field experience in a school or other educational agency is a required and basic part of the course. Prereq: PSY 100.

EDP 203 TEACHING EXCEPTIONAL LEARNERS IN REGULAR CLASSROOMS. (3)

An introduction to the characteristics and instructional needs of exceptional learners is presented with an overview of principles, procedures, methods, and materials for adapting educational programs to accommodate the integration of exceptional children in regular classrooms, when appropriate. A field experience in a school or other educational agency is a required and basic part of the course. Lecture, three hours per week; laboratory, two hours per week for a maximum of six weeks. Prereq: Successful completion of EDP 202 with an earned grade of C or higher.

EDP 303 TEACHING EXCEPTIONAL LEARNERS IN THE ELEMENTARY CLASSROOM. (2)

This course is designed to introduce students to issues related to classroom instruction to meet the needs of ALL students. We will examine the concept of the "least restrictive environment" (LRE) for learners and will discuss a variety of individual and group differences and exceptionalities, including various disabilities, giftedness, multicultural and diversity issues that teachers encounter in the regular classroom. The emphasis will be on understanding the needs and abilities of exceptional learners in order to make appropriate, reflective decisions about their instruction. Prereq: Admission to the Elementary Teacher Education Program and successful completion of EDP 202, or an equivalent.

#EDP 305 INTRODUCTION TO COUNSELING SKILLS. (3)

This course serves as an introduction to the skills and techniques required to be an effective helper, broadly defined, but generally focused within a counseling context. Didactic and

experiential training is provided for initial counseling, interviewing (listening), and relationship building skills. Prereq: Completion of PSY 100 or consent of instructor.

***EDP 513 SOCIAL ASPECTS OF BEHAVIOR. (3)**

This course is designed to meet the needs of undergraduate and graduate students in the College of Education for a course in theory and principles of social psychology. The course will cover the basic concepts and theories in social psychology. The theories of attitude formation, group dynamics, and biases will be surveyed, with an application to the professional fields of psychology. In addition to the theories and principles of social psychology, research paradigms, social change, social influence, system consultation, and community issues as they relate to social psychological considerations will be addressed. Undergraduate-level prereq: One course in psychology or consent of instructor. Graduate-level prereq: None.

EDP 518 CONTEMPORARY TOPICS IN UNIVERSITY RESIDENTIAL LIVING. (3)

An exploration of topic areas such as conflict mediation, crisis management, communication skills, student development theories, and wellness designed to provide new Resident Life Advisors with the skills and knowledge essential for being successful. Prereq: PSY 100, PSY 215, or EDP 202 and must be a Residence Life Advisor.

EDP 520 PROGRAM EVALUATION. (3)

This course is an application-focused course that provides an overview of program evaluation. This course will cover the types of evaluation, the theory associated with evaluation, and the tools most commonly applied to the evaluation process. Students will develop an appreciation for the flexibility needed in order to perform evaluation tasks in practical situations related to their area of expertise. (Same as EPE 520/KHP 520.)

EDP 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS. (3)

Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examinations, criteria for evaluation and marking and other rating systems. (Same as EDC/EPE 522.)

EDP 545 PSYCHOLOGY OF THE BLACK EXPERIENCE. (3)

EDP 545, Psychology of the Black Experience, is an elective course in the Department of Educational, School, and Counseling Psychology and is cross-listed with the Africana Studies program and Psychology department. It is designed to offer enrolled undergraduate and graduate students opportunities to survey, explore, and critique classic and contemporary theories and research articulating the psychologies that inform both social and academic experiences and observed behaviors of Black people. While there are multiple objectives for this upper-level undergraduate and graduate-level seminar course, one central objective for the course is to expose all students to literature and research pertaining to the Black experience in the United States in an effort to develop and refine ideas and mindsets that will foster and reflect innovative ways of thinking about how to enhance the life experiences of Black persons. That is, in the course, the primary objective is to have the course material and critical discourse influence your thinking about and actions towards or on behalf of Black persons. Prereq: PSY 100 or AAS 200 or consent of the instructor. (Same as AAS 545.)

EDP 548 EDUCATIONAL PSYCHOLOGY. (3)

An introduction to the application of principles of psychology to classroom learning and teaching problems.

***EDP 557 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA. (3)**

This course is rooted in the conceptual understanding of statistics and covers applications of statistical and graphical methods for educational and evaluation data. Basic descriptive statistics, correlation, normal distributions and hypothesis testing will be covered. An emphasis is placed on exploratory data analysis and interpretation of results within the broad contexts of education and evaluation. Statistical literacy exercises will be used for comprehension and application of materials. In addition, applications of statistical software will be demonstrated. Prereq: MA 109 or equivalent; undergraduate (with permission) or graduate status in the College of Education; or consent of the instructor. (Same as EPE 557.)

EDP 558 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA II. (3)

The course covers applications of statistical and graphical methods for educational and evaluation data. Topics to be covered include descriptive statistics, correlation, normal distributions, hypothesis testing, regression, ANOVA, and power. General goals include: developing an understanding of statistical concepts, improving reasoning and critical thinking skills, and to prepare for more advanced quantitative courses. Students will gain valuable statistical computing skills via stats Software. Prereq: EDP/EPE 557 or equivalent. (Same as EPE 558.)

EDP 570 INTRODUCTION TO PSYCHOLOGICAL SERVICES IN SCHOOLS. (3)

A review of the historical development and models of organization and administration in the field of school psychology and the relationship between school psychology and other educational and psychological specialties. Prereq: Admission to School Psychology Program or consent of instructor.

***EDP 600 LIFE SPAN OF HUMAN DEVELOPMENT AND BEHAVIOR. (3)**

This course is designed to meet the needs of graduate students in the College of Education for a course in theory and principles of developmental theories of individuals across the lifespan. Lifespan developmental psychology is a study of how and why people change over time as

well as how and why they remain the same from conception through the aging process. The course is described through three perspectives: physical, cognitive, and psychosocial. Emphasis will be on the major transitions from infancy through young adulthood in the physical, cognitive, social, moral and emotional domains. The impact of ethnic, gender, and cultural factors on development will also be examined.

EDP 603 HUMAN COGNITIVE DEVELOPMENT. (3)

Theory and research concerning the development of attitudes, motives, self-concept and other cognitive processes are presented and the educational implications explored. Prereq: EDP 548 or EDP 610 or EDP 600.

EDP 604 LIFESPAN GENDER DEVELOPMENT. (3)

An in-depth examination of theory, research, and personal attitudes concerning gender development over the lifespan. Interaction of gender with effective personal functioning in family, educational, and work-related settings. Prereq: EDP 600 and 601 or equivalent.

EDP 605 INTRODUCTION TO COUNSELING: TECHNIQUES I. (3)

A survey of counseling psychology, philosophy, procedures and practices. Consideration of the roles of the counselor in relation to counseling services in the community and educational settings. In-depth training in initial counseling skills, interviewing (listening) and relationship building skills. Prereq: Acceptance to the graduate program in counseling psychology with the following major codes: RECO, ECGO, CPEC, ECPY, ECPC, CNPS, ESPP, ESPY, ECPP, or consent of instructor via permit.

EDP 606 COUNSELING PSYCHOLOGY PROFESSIONAL IDENTITY, ISSUES, AND RESEARCH METHODS. (3)

Foundational doctoral seminar in counseling psychology. Addresses professional identity, historical perspectives, training issues, and current issues in counseling psychology. Provides an introduction to counseling psychology research methodology related to evidence-based practice. Prereq: Enrollment in the doctoral program in counseling psychology.

EDP 610 THEORIES OF LEARNING IN EDUCATION. (3)

Consideration of the theoretical origins of learning within the context of education. Topics include major theories of learning, physiological bases for learning, relationships between learning theory and instruction, and major applications of learning theories in educational settings.

EDP 614 MOTIVATION AND LEARNING. (3)

This course will provide a review of current educational and psychological theories of motivation. After examining various theories (e.g., attributions, goals, self-efficacy, expectancy X value), the course will examine applications of these theories to contemporary issues such as violence, substance abuse, dropping out of school, health maintenance, etc.

EDP 615 PROSEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY. (3)

A study of the philosophical precursors and scientific traditions of psychology. The schools of 19th and 20th century psychology are surveyed as are the major theoretical positions and content areas of contemporary psychology. Prereq: Graduate standing in department of Psychology or department of Educational and Counseling Psychology. (Same as PSY 620.)

EDP 616 MULTICULTURAL PSYCHOLOGY. (3)

This course is designed to increase one's sensitivity to and respect for individual differences. Models, frameworks, techniques and experiential exercises are presented to increase one's skill level in working with persons from racially and ethnically diverse backgrounds. Prereq: EDP 600 or equivalent or consent of instructor. (Same as AAS 616.)

EDP 620 TOPICS AND METHODS OF EVALUATION. (3)

An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to: provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EPE 620/SOC 622.)

EDP 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)

An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE/ANT 620; and consent of instructor. (Same as ANT/EPE 621.)

EDP 630 PRINCIPLES OF PSYCHOLOGICAL ASSESSMENT. (3)

An overview of the principles and methods of psychological assessment including observational methods, interviewing, behavioral analysis, and standardized psychological testing as a means of arriving at a comprehensive individual analysis and of creating a treatment plan for both children and adults. Students develop skills in selection and evaluation of psychological tests (personality, interests, and aptitudes), integration of multi-modal assessment methods, and report writing. Prereq: Acceptance to the graduate programs in Educational and Counseling Psychology with the following major codes: CPEC, ECPY, ECPC, CNPS, ECPP, ECPE, EEPS, ESPY, ECP, ESPP or consent of the instructor via permit.

EDP 640 INDIVIDUAL ASSESSMENT OF COGNITIVE FUNCTIONING. (3)

This course provides theoretical material and advanced laboratory practice in the measurement of intelligence by individual techniques. Lecture, two hours; laboratory, two hours. May be repeated to a maximum of six credits. Prereq: PSY 535 (with a grade of "B" or better) or

equivalent, enrollment in a professional program in Educational, School, and Counseling Psychology or consent of instructor.

EDP 642 INDIVIDUAL ASSESSMENT OF PERSONALITY FUNCTIONING. (3)

An in-depth study of the nature and measurement of human emotion, temperament and personality. Laboratory and field experience in the administration, scoring, and interpretation of tests related to personality functioning and underlying dynamics of personality. May be repeated to a maximum of six credits. Prereq: Successful completion of PSY 535 (or equivalent) with a grade of "B" or better and enrollment in a professional program in Educational, School, and Counseling Psychology.

EDP 649 GROUP COUNSELING. (3)

An overview of the theoretical bases and practical procedures used in the organization, and effective use of group counseling in the facilitation of psychological and educational goals. Prereq: EDP 605, EDP 652 and EDP 661 (all with grades of "B" or better), or consent of instructor.

EDP 650 DIAGNOSIS AND PSYCHOPATHOLOGY IN COUNSELING PSYCHOLOGY. (3)

An integrative seminar in diagnosis and application of theories, techniques and assessment tools in Counseling Psychology. Special consideration of classification of psychological states and characteristics including DSM-IV temperament, analysis, and other research methods of integrating assessment and treatment alternatives. Prereq: PSY 535 or equivalent, EDP 652, and EDP 661 (all with a "B" or better) and admission to a program in Educational, School, and Counseling Psychology or consent of the instructor.

EDP 652 THEORIES OF COUNSELING. (3)

A survey of theories and methods in facilitating personality growth, character maturation, problem solving, decision making, crisis resolutions, and behavior change, through individual and group counseling. Prereq: Acceptance to a graduate program in EDP with the following major codes: EGCO, CPEC, ECPY, ECPC, ESPP, ECPS, ECPE, EEPS, CNPS, EDPS, or consent of instructor via permit.

EDP 656 RESEARCH METHODS. (3)

An introduction to research methods applicable to education, the scientific method, research designs, measurement techniques, statistical analysis, and writing the research report. Prereq: EDP/EPE 557, EDP/EPE 558, or equivalent, but preferred EDP/EPE 558.

EDP 657 MAJOR THEORIES IN LEARNING IN SECONDARY EDUCATION. (1)

This course will provide an overview of some of the major theories of human learning as they relate to formal education and schooling. We will attempt to examine such theories of human learning while paying close attention to the roles that philosophy, history, the humanities, the natural sciences, and psychology have played in their development. Also, throughout the course, we shall attempt to explore current topics in the formal educational experiences of elementary, secondary and postsecondary students in order to link such theories to known educational practice. Finally, in the interest of advancing the current learning theories, we will offer critical evaluations of the presented learning theories and use these in the development of our own ideas, conceptualizations and theoretical developments regarding human learning. Prereq: Admission to the M.A. in Education (Secondary Education with initial certification option).

EDP 658 PROBLEMS IN EDUCATIONAL PSYCHOLOGY. (1-3)

Special topics in psychological theories and research applicable to educational practices. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EDP 660 RESEARCH DESIGN AND ANALYSIS IN EDUCATION. (3)

This is a statistics-oriented course that focuses on various aspects of regression analysis (general and generalized linear models). Topics to be covered include, but are not limited to, simple correlation and regression, multiple regression (with and without interaction/moderation terms, with/without nonlinear terms, contrast variable coding for categorical predictors, nested model comparison for hierarchical regression, etc.), regression diagnostics (outlying and influential cases identification and assessment, collinearity evaluation, residual analysis, etc.), logistic regression (with a comparison of the logit model with other commonly used classification models like probit model, decision tree model, etc.), among other things. The course will familiarize students with cleaning data for regression analysis, building regression models, conducting statistical inference of regression models, selecting the optimal regression model(s) for the data in hand, and interpreting regression analysis results using the right language. Students will gain requisite foundation knowledge necessary to learn more complex statistical tests and procedures, and become more critical of statistical presentations in academic journals and the mass media. Students will also become proficient in using at least one major statistics computer program (SPSS, Minitab, SAS, Stata, or R). Prereq: EPE/EDP 558 or consent of instructor. (Same as EPE 660.)

EDP 661 TECHNIQUES OF COUNSELING II. (3)

Practice in interviewing, simulated problems, observational techniques, role of the counselor. Study of films, tapes and transcripts of leading practitioners of several schools of counseling. Supervised practice with selected clients. Lecture, two hours; laboratory, two hours. Prereq: EDP 652, PSY 535 (both with a grade of "B" or better), and consent of instructor.

EDP 662 DOCTORAL PRE-PRACTICUM SEMINAR. (1)

Preparation for UK Counseling Center Doctoral Level practicum will include starting to develop an integrative understanding of theory, assessment, ethics, and practice as it relates

to effective work with university students. The course introduces the application of traditional individual and group psychotherapy and the provision of effective outreach and consultation on a university campus. Lecture, one hour, fifteen minutes. Prereq: Approval for doctoral-level practicum at UK Counseling & Testing Center.

EDP 664 PRE-MASTERS PRACTICUM IN COUNSELING PSYCHOLOGY. (3-6)

Supervised experience in application of diagnostic and interviewing techniques in a counseling service. May be repeated to a maximum of 12 credits. Lecture, three hours; laboratory, eight hours per three credit hours. Prereq: All required counseling coursework. EDP 605, PSY 535 or equivalent, EDP 652, EDP 688, and EDP 661 (minimum competency courses with grades of "B" or better), application for practicum the semester prior to practicum placement and permission of CPAC.

EDP 665 POST-MASTERS PRACTICUM IN COUNSELING PSYCHOLOGY. (1-6)

Supervised experience in application of diagnostic and interviewing techniques in a counseling service. Prereq: PSY 535 or equivalent, EDP 605, EDP 652, EDP 661, EDP 649, and EDP 688 or equivalent (all with grades of "B" or better). Application for practicum the semester prior to practicum placement and permission of CPAC.

EDP 666 PSYCHOLOGY OF CAREER COUNSELING. (3)

A survey of theories and methods used in Career Counseling. Contemporary approaches to career counseling are studied within developmental and decision-making frameworks. Prereq: EDP 652 and PSY 535 or equivalent (both with a grade of "B" or better).

EDP 669 DIAGNOSTIC CLASSIFICATION IN SCHOOL PSYCHOLOGY. (3)

Review of theory and research related to individual differences in physical, intellectual, social, and emotional development of preschool and school-aged children and adolescents. Compares psychological and educational approaches to diagnostic classification of such differences. Prereq: PSY 533 or consent of instructor.

EDP 670 PSYCHOEDUCATIONAL STRATEGIES OF INTERVENTION. (3)

A general review of and development of basic competence in the major intervention strategies applicable to the amelioration of children's common learning and adjustment difficulties in the school setting. Prereq: EDP 640, EDP 669 and Admission to School Psychology Program.

EDP 671 SEMINAR IN PSYCHOEDUCATIONAL CONSULTATION IN SCHOOLS. (3)

A study of the rationale and techniques used in consultation with teachers, parents, administrators and other school personnel for the purpose of both preventing and alleviating the learning and adjustment difficulties of individual or groups of school-aged children. Prereq: Admission to School Psychology Program, advanced standing in a professional educational program or permission of the instructor.

EDP 674 SCHOOL-BASED PRACTICUM IN SCHOOL PSYCHOLOGY. (1-6)

Supervised experience in the application of psychoeducational, diagnostic assessment, intervention, and consultation services in a school setting. Requires minimum three hours of on-site activities per credit hour. Students will have a primary supervisor at their school site. Students will attend class meetings in a didactic format. Students will have a university supervisor who will serve as a secondary supervisor and communicate and coordinate on-going communication with the school-based supervisor. May be repeated to a maximum of 18 credits. Prereq: Admission to the School Psychology Program and consent of instructor.

EDP 675 PRACTICUM IN SCHOOL PSYCHOLOGY. (1-6)

Supervised experience in the application of psychoeducational, diagnostic assessment, intervention, and consultation services in a clinic, school, or community setting. Requires three hours of on-site activities per credit hour and weekly supervision meetings. May be repeated to a maximum of 18 credits. Prereq: Admission to the School Psychology Program and consent of instructor.

EDP 679 INTRODUCTION TO MEASUREMENT THEORY AND TECHNIQUES. (3)

This is a measurement-oriented course that focuses on introducing measurement theory and techniques used in education and evaluation. Topics to be covered include, but are not limited to, measurement models, bivariate measures of association, norms, standardized score scales, scaling, reliability, validity, item analysis, factor analysis, confirmatory factor analysis, test construction for affective and cognitive instruments, Item Response Theory, and Rasch. The course aims to familiarize students with measurement terminology, possess a detailed strategy for constructing an instrument suitable for research purposes, become familiar with statistical procedures and software for implementing measurement techniques, gain requisite foundation of knowledge necessary to learn more complex measurement models, and become more critical of measurement presentations in academic journals and the mass media. Prereq: EDP/EPE 660, EPE 621, or equivalent. (Same as EPE 679.)

EDP 680 PARENT AND CHILD COUNSELING. (3)

Theories, methods, and techniques of counseling psychology as applied to planned interventions with parents and their children. Contemporary approaches to family and child dysfunctioning are studied within a framework of human development; applied practice utilizing simulated problems. Prereq: EDP 652 and EDP 661 (both with a grade of "B" or better) or consent of instructor.

EDP 683 TOPICS IN COUNSELING PSYCHOLOGY.**(1-3)**

Counseling for special problems with special methods. Topics may vary from semester to semester. Seminar, one-three hours per week. May be repeated to a maximum of 12 credits. Prereq or coreq: EDP 652 and consent of instructor.

EDP 685 ISSUES AND TECHNIQUES IN THE COUNSELING OF WOMEN.**(3)**

The course is designed to improve students' knowledge of the special counseling needs of women and to facilitate students' development of highly skilled techniques for counseling with women. Skill and knowledge areas include such topics as rape, spouse abuse, mastectomy, career, assertiveness, single parenting, and sex discrimination. Prereq: EDP 652 and EDP 661 (both with a grade of "B" or better) or corequisite EDP 604 or consent of instructor.

EDP 686 THEORY AND METHODS IN MARRIAGE AND FAMILY THERAPY.**(3)**

A survey of theories and methods used in marriage and family therapy. Designed to provide students with a knowledge of the theoretical bases for marriage and family therapy, including an introduction to procedures used to assess, diagnose and treat marriage and family dysfunctions. Prereq: Consent of instructor and EDP 661 (with a grade of "B" or better).

EDP 688 ETHICAL AND LEGAL ISSUES IN PSYCHOLOGY.**(3)**

This course is designed to educate students about ethical and legal issues related to the practice of psychology. An emphasis is placed on learning the current APA ethical code of conduct, mental health laws, and ethical decision-making models. Prereq: EDP 605 and 661, or consent of the instructor.

EDP 703 SEMINAR IN CLINICAL SUPERVISION AND CONSULTATION.**(1-3)**

An advanced seminar covering theories, issues, methods and techniques used in supervision of counseling and psychotherapy and in consultation with groups and organizations. Seminar topics will vary depending on the interests of the professor and students. May be repeated to a maximum of six credits. Prereq: EDP 652, EDP 661, and EDP 665 or equivalent.

EDP 704 SOCIAL JUSTICE CONSULTATION AND EVALUATION.**(3)**

This course focuses on theoretically grounded social justice consultation and evaluation in counseling psychology. The purpose of this course is to help students develop beginning competencies in social justice consultation, advocacy, and program evaluation as counseling psychologists. Doctoral students in counseling psychology will practice beginning skills in interprofessional collaboration and community partnership. Prereq: Students can enroll once they have completed the first year of the counseling psychology doctoral program.

EDP 707 MULTIVARIATE ANALYSIS IN EDUCATIONAL RESEARCH.**(3)**

Multivariate statistics will prepare student to understand multivariate statistical methods and draw the link between statistics previously learned. Students will be able to conduct, interpret, and critique procedures such as factorial ANOVA, multiple regression, MANOVA, ANCOVA, MANCOVA, PCA, EFA, discriminant function analysis, logistic regression, canonical correlation, hierarchical linear regression, and multivariate analysis of change. Become familiar with statistical software for implementing multivariate procedures. Develop an understanding of the concepts, terms, and symbols used in multivariate statistics (e.g., Matrix Algebra, effect sizes). Gain an appreciation of the role of multivariate procedures in the research process. Gain requisite knowledge necessary to learn more complex statistical procedures. Prereq: EDP/EPE 660 or equivalent. (Same as EPE 707.)

EDP 708 INTERNSHIP IN EDUCATIONAL, SCHOOL, AND COUNSELING PSYCHOLOGY.**(0-9)**

Full-time practice in an operational setting such as a school or government agency, with on-site supervision provided by the host agency and with academic supervision provided by a University faculty member. Practicum: full-time field experience. May be repeated to a maximum of 12 credits. Prereq: Completion of a minimum of one year of graduate study in the department and consent of instructor.

EDP 711 ADVANCED QUANTITATIVE METHODS.**(3)**

This course will provide students with an overview of the theory and applications of advanced quantitative methods. A quantitative research method focuses on advanced quantitative methodologies used in methodologically-oriented studies in educational education, evaluation, and statistics. The goal of this course is to prepare students to analyze data using advanced quantitative methods. It covers topics in the areas of multilevel modeling, data mining, missing data, categorical data analysis, meta-analysis, and longitudinal data analysis. Other specific analysis techniques may also be explored. Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. Prereq: Prereq: Intermediate Statistics. (Same as EPE 711.)

EDP 712 ADVANCED PSYCHOMETRIC METHODS.**(3)**

This course will provide students with an overview of the theory and applications of advanced psychometric methods. A psychometric method focuses on advanced psychometric methodologies used in methodologically-oriented studies in educational measurement and evaluation techniques. The goal of this course is to prepare students to analyze data using advanced psychometric methods. It covers topics in the areas of Rasch Modeling, Item Response Theory, Structural Equation Modeling, Advanced Survey Techniques, and Latent Variable Modeling (as well as additional techniques). Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application

of the tools rather than on the math or the mechanics behind the tools. Prereq: Intermediate Statistics. (Same as EPE 712.)

EDP 748 MASTER'S THESIS RESEARCH.**(0)**

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EDP 749 DISSERTATION RESEARCH.**(0)**

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EDP 765 DOCTORAL RESEARCH SEMINAR.*(1)**

This seminar provides structure for working with faculty advisors and peer colleagues to cultivate the research skills needed to create new knowledge related to research questions that are important to the field of counseling psychology and to the mission of social justice. Prereq: Enrollment in the counseling psychology graduate program and permission of the instructor.

EDP 767 DISSERTATION RESIDENCY CREDIT.**(2)**

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDP 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE.**(1-6)**

May be repeated to a maximum of 12 hours.

EDP 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE.**(0-12)**

May be repeated indefinitely.

EDP 770 LEGAL ETHICAL PSYCHOLOGY.**(3)**

The goal of this course is to provide students with knowledge of ethics and law that pertinent to the theory, research, and practice of school psychology. This course will provide experiential and problem-based learning in the area of professional standards and ethics for the field of school psychology. Professional standards and ethics will be drawn from the codes of the American Psychological Association, the National Association of School Psychologists, and the Association of State and Provincial Psychology Boards. Students will translate ethical principles and standards into guidelines for decision making and practice. Prereq: Admission to School Psychology graduate program or permission of instructor.

EDP 776 SEMINAR IN SCHOOL PSYCHOLOGY (Subtitle required).**(3)**

Topical consideration of philosophical, technical, professional and theoretical positions in school psychology theory and practice. May be repeated to a maximum of nine credits under different subtitles. Prereq: Graduate standing in School Psychology or consent of instructor.

EDP 777 SEMINAR IN COUNSELING PSYCHOLOGY.**(1-3)**

Topical consideration of philosophical, technical and theoretical positions in counseling theory and practice. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EDP 778 SEMINAR IN EDUCATIONAL PSYCHOLOGY (Subtitle required).**(3)**

Intensive study of selected topics in human learning and development. Particular emphasis on research topics. Students will design sample studies in their areas of interest. May be repeated to a maximum of nine credits under different subtitles. Prereq: Doctoral standing in the College of Education or consent of instructor.

EDP 782 INDEPENDENT STUDY IN EDUCATIONAL PSYCHOLOGY.**(1-3)**

Independent study course for advanced graduate students who desire to investigate special problems and conduct research in educational psychology. May be repeated to a maximum of 12 credits. Prereq: One year of graduate work in educational psychology and consent of instructor.

EDS**Special Education****#EDS 301 INITIAL PRACTICUM IN SPECIAL EDUCATION.****(2)**

This field-based course is intended to provide opportunities for students to demonstrate their readiness for teaching students with disabilities across grade levels, special education settings, and types of disabilities. This initial practicum will allow you to gain experiences in teaching students with disabilities and apply your course content to a classroom setting. Prereq: You must have successfully completed EDS 375. Additionally, you must be concurrently enrolled in EDS 517, EDS 530, and EDS 570.

EDS 357 INITIAL PRACTICUM IN SPECIAL EDUCATION.**(1)**

An introductory supervised field experience for special education majors. Students will participate in two special education programs as teacher aides. Placements will include public schools and other agencies serving children with disabilities. May be repeated to a maximum of three credits. Lecture, one hour; field experience, three hours per week. Prereq or concurrent: EDS 375 (may be a co-requisite); restricted to declared majors in Learning and Behavioral Disorders (SELB) and Moderate and Severe Disabilities (SEMS).

EDS 375 INTRODUCTION TO EDUCATION OF EXCEPTIONAL CHILDREN. (3)

An introduction to the various contemporary areas of special education. Topics include special education diagnostic categories, programming, service delivery models, career education, child advocacy and litigation affecting public education for students with disabilities.

EDS 395 INDEPENDENT STUDY IN SPECIAL EDUCATION. (1-6)

An independent study course for undergraduate students with an interest in a specific problem in special education. Offered by appointment.

#EDS 401 INTERMEDIATE PRACTICUM IN SPECIAL EDUCATION. (3)

This field-based course is intended to provide opportunities for students to demonstrate their readiness for teaching students with disabilities across grade levels, special education settings, and types of disabilities. This intermediate practicum will allow you to gain experiences in teaching students with disabilities and apply your course content to a classroom setting. Prereq: You must have been admitted to the special education teacher education program (TEP), and successfully completed the EDS 357 and EDS 301. Additionally, you must be enrolled in EDS 528, EDS 549, and EDS 518.

#EDS 402 ADVANCED PRACTICUM IN SPECIAL EDUCATION. (3)

This field-based course is intended to provide opportunities for students to demonstrate their readiness for teaching students with disabilities across grade levels, special education settings, and types of disabilities. This advanced practicum will allow you to gain experiences in teaching students with disabilities and apply your course content to a classroom setting. Prereq: You must have successfully completed EDS 375, EDS 301, and EDS 401. Additionally, you must also be enrolled in EDS 529, and EDS 548.

EDS 447 STRATEGIES FOR INCLUDING STUDENTS WITH DISABILITIES IN THE ELEMENTARY CLASSROOM. (2)

This course will focus on inclusion of students with disabilities in all aspects of the elementary classroom. The course will prepare general education elementary teachers to collaborate with special education teachers and other professionals in planning and implementing instruction, behavioral supports, and assessments. Prereq: Elementary Education major, admission to Teacher Education Program, successful completion of EDP 303 and EDC 322, and concurrent enrollment in EDC 433.

EDS 459 STUDENT TEACHING IN SPECIAL EDUCATION. (3-12)

Supervised student teaching experience utilizing the special techniques used in working with individuals with exceptional educational problems such as speech handicaps, physical handicaps, visual impairments, hearing disabilities, neurological impairments (learning disabilities), mental retardation, and the gifted. To be offered only on a pass-fail basis. Prereq: Must complete the published College requirements for admission to student teaching; admission to the Teacher Education Program or permission of instructor.

EDS 513 LEGAL ISSUES IN SPECIAL EDUCATION. (3)

A review of pertinent legislation concerning human and constitutional rights related to persons with disabilities. Teachers' specific responsibilities and liabilities are described and related to current requirements for development of appropriate educational programs. Emphasis is given to how, through active parent participation, teachers can facilitate each student's developmental progress. Prereq: EDS 375 or consent of instructor.

EDS 514 INSTRUCTIONAL TECHNOLOGY IN SPECIAL EDUCATION. (3)

An overview of ways technology can be used to facilitate the education of students with disabilities. Topics include personal computer operation, personal productivity tools, instructional software evaluation and integration into the curriculum, multimedia applications, telecommunications, and emerging technologies. Lecture, three hours; laboratory, two hours per week. Prereq: EDS 375 or EDP 203.

EDS 516 PRINCIPLES OF BEHAVIOR MANAGEMENT AND INSTRUCTION. (3)

Basic principles of applied behavior analysis and modification which employ social learning theory and operant conditioning models are taught. Emphasis is placed on designing individualized learning environments, selecting and implementing behavior management strategies, writing behavior objectives, and performing task analyses. Prereq: EDS 375 or permission of the instructor.

***EDS 517 ASSISTIVE TECHNOLOGY IN SPECIAL EDUCATION. (3)**

This course is designed to enable students to critically discuss issues relating to the educational, psychosocial, medical, and therapeutic aspects of teaching students with specific cognitive, physical, and sensory disabilities and health impairments. Students will learn to use assistive technology. This will include selecting appropriate adaptive devices/strategies, programming for their use in an educational setting, and identifying professionals who support these selections. The conceptual underpinning of the course is based on the Human Function Model which identifies assistive technologies to assist with the areas of existence; communication; body support, alignment and positioning; travel and mobility; education and transition; environmental adaptation; and sports, recreation, and leisure. Prereq: EDP 203 or EDS 375 or equivalent; or permission of the instructor. Coreq: EDS 301.

#EDS 518 BEHAVIOR MANAGEMENT IN APPLIED SETTINGS. (3)

Principles of behavior analysis will be used to determine behavioral functions and intervention development for students exhibiting challenging behaviors within the schools. The course will focus on the key tenants of functional behavioral assessments and behavior intervention planning, with special attention to the provisions of indirect services to students. Field experiences are required as part of this course. Coreq: EDS 401 or permission of instructor.

EDS 522 CHILDREN AND FAMILIES. (3)

The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as IEC 522.)

#EDS 526 INTRODUCTION TO SPECIAL EDUCATION ASSESSMENT AND PROGRAM PLANNING. (3)

This course provides an introduction to the procedures used in determining special education eligibility and subsequent program planning for students with disabilities. Emphasis is placed on understanding various assessment processes, instruments, norm-referenced and curriculum-based scores, and individualized educational program planning. Prereq: EDS 375, EDS 513, and EDS 516.

***EDS 528 EDUCATIONAL PROGRAMMING AND EVALUATION FOR STUDENTS WITH MILD DISABILITIES IN READING. (3)**

EDS 528 focuses on designing, implementing, and evaluating individualized reading programs based on the educational characteristics of children with learning and behavior disorders. This course also addresses the procedures needed for assessing the educationally relevant strengths and weakness in reading using informal and formal evaluation measures. Prereq: Admission to Teacher Education Program, EDS 570, EDS 516, and/or permission of the instructor. Coreq: EDS 401.

***EDS 529 MATHEMATICS AND WRITTEN LANGUAGE ASSESSMENT AND INTERVENTION FOR STUDENTS WITH OR AT-RISK OF DISABILITY. (3)**

EDS 529 focuses on designing, implementing, and evaluating individualized mathematics and written expression programs based on the educational characteristics of children with learning and behavior disorders in elementary and secondary school. This course also addresses the procedures needed for assessing the educationally relevant strengths and weakness in mathematics and written expression using informal and formal evaluation measures. Prereq: Admission to Teacher Education Program, EDS 528, EDS 570, EDS 516, and/or permission of the instructor. Coreq: EDS 402.

***EDS 530 MODERATE AND SEVERE DISABILITIES. (3)**

Special education issues with individuals exhibiting moderate to severe intellectual and developmental disabilities. A critical examination of contemporary research with regard to the educational, behavioral, developmental issues of individuals exhibiting moderate to severe intellectual and developmental disabilities. Issues and research describing the full educational inclusion and community integration of persons with moderate to severe intellectual and developmental disabilities will be addressed. Lecture, three hours. Prereq: Junior or graduate student status. Coreq: Should occur concurrently with EDS 301; or permission of instructor.

***EDS 546 TRANSDISCIPLINARY SERVICES FOR STUDENTS WITH DISABILITIES: TRANSITION. (3)**

This course is designed as an examination of the critical issues of transition from school to work and post-secondary education for students with disabilities. As such, this course is appropriate for both graduate students in special education and those in rehabilitation counseling. Given the increasing numbers of students with disabilities, including intellectual disabilities, who are attending post-secondary education programs, this course will provide equal emphases to work and post-secondary education, as well as to other critical life domains (community living, recreations, social networks, financial and legal issues involved in transition). Finally, this course will address the broad spectrum of youths and young adults with disabilities—including students with the most significant disabilities, as well as students with more mild disabilities. Prereq: EDS 375 or permission of instructor.

EDS 547 COLLABORATION AND INCLUSION IN SCHOOL AND COMMUNITY SETTINGS. (3)

This course will focus on inclusion of students with moderate to severe disabilities in all aspects of school and community life, with special consideration given to the individual student planning variables that must be addressed in meeting the needs of each school-age student and for preparing students to function as fully and independently in their communities as possible. The course is designed to meet the needs of those pursuing certification in Moderate and Severe Disabilities and pursuing degrees in Elementary and Secondary Education, Vocational Rehabilitation, School Psychology, Social Work, Physical Therapy, Communication Disorders, and related disciplines. Prereq: Consent of instructor. (Same as RC 547.)

***EDS 548 CURRICULUM DESIGN FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3)**

This course is designed to expand student's knowledge and skills in administering, interpreting, and utilizing a variety of assessment instruments and procedures (standardized and informal) for the purpose of program planning specifically for students with moderate and severe disabilities. Students will learn about transdisciplinary assessment processes and how to facilitate collaboration between the various related service providers when assessing students. Students will use assessment results to plan individualized instruction for students using a transdisciplinary model. Prereq: Admission to Teacher Education Program, EDS 516, EDS 530, or permission of the instructor; coreq: students enrolled in this course must also be concurrently enrolled in EDS 402.

***EDS 549 METHODS FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3)**

This course is designed to introduce students to instructional strategies typically used with students classified with moderate and severe disabilities. Throughout the semester, course

participants will be presented with information on how to organize and present instruction to students with moderate to severe disabilities across environments. The implementation of these skills is assessed through written products and classroom performance in school settings. Class meetings are two and one-half-hours per week. Prereq: Admission to Teacher Education Program, EDS 516. Coreq: Occurs concurrently with EDS 401; or, permission of instructor.

***EDS 550 STUDENT TEACHING: SPECIAL EDUCATION. (12)**

Supervised student teaching in a classroom for students with disabilities utilizing contemporary curricula, assessments, methods, and materials designed for use with children exhibiting moderate severe developmental or intellectual disabilities and learning and behavior disorders. Student teachers are required to demonstrate attainment of the Kentucky Teacher Standards. Student teachers will be evaluated on these competencies by the university supervisor and the supervising classroom teacher throughout the student teaching placement. EDS 550 is offered on a letter grade basis only. Prereq: Published University, College and Departmental requirements (see appropriate section of the most recent *UK Bulletin*) for admission to student teaching; admission to the Teacher Education Program or permission of instructor. Successful completion of all EDS Core Moderate/Severe Disabilities (MSD) and Learning and Behavior Disorders (LBD) Certification Area course work. EDS 550 is the final certification requirement in the special education teacher undergraduate program. Prior to entering this course, the special education major will have successfully completed all MSD and LBD Area and EDS CORE practica in a variety of learning environments serving the needs of children exhibiting moderate to severe intellectual or developmental disabilities and learning and behavior disorders.

EDS 558 ISSUES IN SPECIAL EDUCATION. (1-9)

In-depth study of a current and topical problem or issue in the education of exceptional children and youth. May be repeated to a maximum of nine credits. A title is assigned each time the course is offered.

***EDS 570 CHARACTERISTICS OF LEARNING AND BEHAVIORAL DISABILITIES. (3)**

The learning and behavioral problems of exceptional children and youth are considered in the context of normal child development. A survey of the major categories of learning and behavioral disabilities including identification, description and etiology, with material drawn from clinical, theoretical, and research sources. Approaches to remediation cover both community resources and the roles of various professional personnel. Prereq: EDS 375 or equivalent. Coreq: This course will be taken concurrently with EDS 301; or, permission of instructor.

EDS 580 INTRODUCTION TO VISUAL IMPAIRMENTS. (3)

This course will provide an introduction to the educational programs and services for students with blindness and visual impairments. Content of this course will focus on the historical foundation of the field, the developmental and psychosocial aspects of individuals with visual impairments, an overview of legislation, influential agencies, and service delivery methods. The impact of vision loss on early childhood development will also be covered. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission required.

EDS 581 METHODS FOR TEACHING STUDENTS WITH VISUAL IMPAIRMENTS. (3)

This course is designed to examine how to teach and modify the core curriculum for students who are blind or visually impaired. Topics will include: adaptation of general education classroom materials, IEP development and implementation, lesson planning, and braille literacy. Prospective teachers will develop organization skills and strategies necessary to be efficient in delivery of services as a teacher of the visually impaired. This course requires one weekend at the Kentucky School for the Blind in Louisville as well as attendance at the Kentucky AER Conference. Prereq: Admission to the Teacher Preparation Program in Visual Impairments and successful completion of EDS 580 or instructor permission.

EDS 582 ANATOMY AND PHYSIOLOGY OF THE EYE. (3)

This course will cover the anatomy and physiology of the eye, including visual development. Causes of ocular and neurological visual impairment will be addressed, treatments, and their impact on learning. Course topics will include optics, low vision devices and services, environmental adaptations, and interpreting eye reports. Learners will have the opportunity to directly observe a low vision evaluation and will learn the components of a functional vision assessment. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission required.

EDS 583 BRAILLE CODES I. (3)

This course is designed to teach the literary braille code. Students will become proficient in transcribing both uncontracted and contracted braille utilizing a Perkins Braille, slate and stylus, and six-key entry computer software with proper formatting. Students will also learn appropriate techniques for reading braille both tactually and visually. In addition, the history of the braille code will be covered as well as current resources. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 584 BRAILLE CODES II. (3)

This course studies braille codes with a special emphasis on the Nemeth Code (Braille Mathematics). Other codes covered are music, foreign language (French, German, and Spanish), and computer braille. Braille formats will also be taught, including how to correctly transcribe and format materials for braille users, including preparing worksheets and tests for students. Competency in using the Cranmer Abacus will also be mastered. This course requires one weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 585 ASSISTIVE TECHNOLOGY FOR STUDENTS WITH VISUAL IMPAIRMENTS. (3)

This course introduces a wide variety of technologies for people who are blind or visually impaired. Students will learn about Universal Design for Learning (UDL) as it relates to technology, as well as proprietary software and hardware. Technologies covered include, but are not limited to: Screen readers, screen magnification, electronic note takers, refreshable braille displays, braille translation programs, magnification hardware, scanning and OCR programs, and accessible digital book options. A wide variety of computers, tablets, and smart phone options will be explored. Instructional strategies for teaching technology skills will be emphasized. In-state students are required to attend class at the Kentucky School for the Blind in Louisville and will need to choose the section of the course related to the off-site campus. Out-of-state students will take the course online and should register for the distance learning section. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 586 EXPANDED CORE CURRICULUM FOR BLIND AND VISUALLY IMPAIRED. (3)

The Expanded Core Curriculum (ECC) is the body of knowledge and skills that are needed by students with visual impairments due to their unique needs. This course will explore all nine areas of the ECC including: compensatory or functional academic skills, orientation and mobility, social interaction skills, independent living skills, recreation and leisure skills, career education, use of assistive technology, sensory efficiency skills and self-determination. Participants will have the opportunity to observe and work with students in a summer program and teach skills from the ECC. In-state students are required to attend class at the Kentucky School for the Blind in Louisville as well as complete practicum hours at various locations throughout the state. In-state students will need to choose the section of the course related to the off-site campus. Out-of-state students will take the course online and should register for the distance learning section. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 587 VISUAL IMPAIRMENTS AND MULTIPLE DISABILITIES. (3)

This course is designed to provide students with knowledge and skills necessary to design and implement programs for persons who have visual impairments and additional disabilities. Topics include assistive technology, augmentative and alternative communication, literacy instruction, sensory processing, adaptive behavior, and self-help skills. An emphasis will be placed on adaptations that enhance functioning for persons with developmental delays, autism, medical conditions, deaf-blindness, communication disorders, and those with common syndromes and eye disorders related to multiple disabilities. This course requires a weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 588 ASSESSMENT OF STUDENTS WITH VISUAL IMPAIRMENTS. (3)

This course covers various types of assessments used to evaluate students who are blind or visually impaired. Participants will discuss testing and assessment including the development of standardized tests and their applicability for individuals with visual impairments, as well as alternate assessments. Students will practice assessing and planning educational programs for students with visual impairments by completing a Functional Vision/Learning Media Assessment, as well as assessments in assistive technology and the Expanded Core Curriculum. This course is designed to be taken in conjunction with student teaching/internship in visual impairments. This course requires a weekend at the Kentucky School for the Blind in Louisville. Prereq: Admission to the Teacher Preparation Program in Visual Impairments or instructor permission.

EDS 589 FIELD EXPERIENCES: MILD DISABILITIES. (3)

Supervised pre-student teaching experiences with children having learning and behavioral disabilities, including practica experience with public school students in at least two different special education sites. Approximately two hours lecture-discussion and two three-hour observations and/or practica per week. Prereq: EDS 513, 516, admission to the Teacher Education Program; or consent of instructor. Prereq. or concur: EDS 528. Must take EDS 529 concurrently. Must not take concurrently with the Middle School methods block (EDS 330, EDS 343, and two methods classes).

EDS 590 STUDENT TEACHING/FIELD EXPERIENCE IN VISUAL IMPAIRMENTS. (3-12)

This is a supervised student teaching/field experience working with children, preschool through graduation age, who are blind or visually impaired. Candidates will apply best practices for working with children who are blind or have low vision, including those with additional disabilities. Successful completion of this course will demonstrate the candidate's ability to apply methods of teaching that include assessment, program planning and implementation, appropriate environmental and academic modifications, and instruction in the Expanded Core Curriculum. Candidates will also have to demonstrate appropriate classroom and/or caseload management strategies based on their placement. Prereq: Successful completion of EDS 580, 581, 582, 583, 584, 585, 586, and 587 or instructor permission.

EDS 600 SURVEY OF SPECIAL EDUCATION. (3)

A survey of current status of the field of special education. Emphasis is on analysis of the major research literature pertaining to exceptional children and their education. Prereq: Graduate standing.

EDS 601 APPLIED BEHAVIORAL ANALYSIS. (3)

The focus of this course is on the technology of applied behavior analysis, including the functional analysis of children's behavior and the development, implementation, evaluation

of behavior management programs with children and youth. Prereq: Completion of EDS 516 or equivalent, with a grade of “B” or better.

EDS 602 ADMINISTRATION AND PROGRAMS IN SPECIAL EDUCATION. (3)

The organization, management and supervision of programs for exceptional children at the local, state and national levels. Roles and functions of the special education administrator are considered. Experiences drawn from special residential, private and public day schools are studied. Prereq: Certification in special education; six hours of course work in educational administration and supervision.

EDS 603 BEHAVIORAL CONSULTATION IN THE SCHOOLS. (3)

Principles and techniques of behavioral consulting with classroom teachers and other school personnel, with particular focus on supporting handicapped children in mainstream education programs. The consultant’s role in providing indirect service to children, through inservice teacher training and consultation, is emphasized. Lecture, two hours; laboratory, two hours. Prereq: EDS 601, or equivalent; EDP 671 (may be taken concurrently); or permission of instructor.

EDS 604 SPECIAL EDUCATION FOR SECONDARY EDUCATION. (1)

This course is designed for secondary teachers who encounter students who require special education services. As such, it is intended to provide an in-depth examination of issues in the education of individuals with disabilities. The course is organized in a seminar format with the intent of creating a dialogue among the participants and the instructors. Emphasis will be placed on the development of concepts and the acquisition of a body of knowledge, which relate to issues, processes and procedures to facilitate the inclusion of all student and collaboration across disciplines. The course takes a broad view of inclusion in all aspects of school and community life. Special consideration is given to the individual student planning variables that must be addressed in meeting the needs of each school-age student with a disability in a variety of integrated school and community settings. Prereq: Admission to the M.A. in Education–Secondary with Initial Certification.

EDS 605 PRACTICAL APPLICATIONS OF APPLIED BEHAVIOR ANALYSIS. (3)

In this course students will expand their understanding of Applied Behavior Analysis (ABA) by learning how to design and evaluate behaviorally based programs that address academic (e.g., learning to learn), adaptive (e.g., self-care), communication (e.g., naturalistic strategies; verbal behavior), social (e.g., initiations), and other related skills (e.g., imitation; self-management) in persons with or at-risk for disabilities and provide training and feedback when working with families and professionals. In addition, students will receive training on writing and modifying behavior intervention plans, with an emphasis on conducting functional analyses. Prereq: EDS 601 (or equivalent); EDS 630 recommended.

EDS 610 ADVANCED EDUCATIONAL ASSESSMENT FOR STUDENTS WITH MILD DISABILITIES. (3)

This course examines factors that contribute to the reliable and valid measurement and diagnosis of students with mild disabilities. Emphasis is placed on evaluating standardized, norm-referenced instruments according to their technical characteristics and merits, developing curriculum-based measures for classroom use, and critiquing emerging systems of determining eligibility for special education. Prereq: EDS 528 or consent of instructor.

EDS 611 CONTEMPORARY TRENDS AND ISSUES IN THE EDUCATION OF STUDENTS WITH MILD DISABILITIES. (3)

This course examines trends and issues in the education of students with mild disabilities (e.g., learning disabilities, mild cognitive disability, ADHD, and emotional/behavioral disabilities). The professional literature is examined to identify emerging methods of effective instruction as well as points of controversy in identification, placement, and service. Prereq: EDS 529 and EDS 610 or consent of instructor.

***EDS 612 ADVANCED PRACTICUM: SPECIAL EDUCATION. (1-6)**

Intensive clinical experience with exceptional children in day and residential schools, hospitals and private agencies. Students engage in prescriptive teaching with persons with disabilities in individualized, small group and special class settings. Laboratory, 6-12 hours per week. Prereq: Graduate Standing; major in Special Education, Applied Behavior Analysis, or permission of the instructor.

EDS 613 LEGAL AND PARENTAL ISSUES SCHOOL ADMINISTRATION. (3)

This course is designed as a required course for certification in the school administration program or elective in graduate or post baccalaureate degree. Essential course questions will emphasize the delivery of a free and appropriate public education for children with disabilities within a practical application format that is accessible and useful to educational professionals. In addition, the course will consider the implications of federal requirements in state and local policy. Particular attention will be given to leadership within an educational reform environment as well as the legal and programmatic implications for children with disabilities and their families. Finally, the course will model appropriate ways in which educational professionals working with families can maximize educational results for children with and without disabilities. Prereq: Be admitted to an Administrator preparation program, or received permission of instructor. (Same as RC 613.)

EDS 614 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS. (1)

This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures, as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares

students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Requisite to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.

EDS 615 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS II. (1)

This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures, as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Requisite to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.

EDS 616 PROFESSIONAL ETHICS IN BEHAVIOR ANALYSIS III. (1)

This 1-credit hour course is part of a three-course sequence designed to address ethical, behavioral, and professional conduct for behavior analysts. This course will address content related to the BACB Disciplinary and Ethical Standards and Disciplinary Procedures, as well as the Guidelines for Responsible Conduct for Behavior Analysts. This course prepares students to apply for the Board Certified Behavior Analyst exam. (Must be taken as Co-Requisite to EDS 612: Practicum in Special Education). Prereq: Entrance into the Board Certified Behavior Analyst program, Master’s in Applied Behavior Analysis program or permission of instructor.

EDS 630 ADVANCED METHODS FOR TEACHING STUDENTS WITH DISABILITIES. (3)

An intensive study of the principles and procedures used in programming learning activities for students with disabilities, including those with autism spectrum disorders. Topical areas include the acquisition of stimulus control and programming for the generalization and maintenance skills. Lecture, three hours. Prereq: EDS 601 and consent of instructor.

EDS 631 ADVANCED PROGRAMMING FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3)

Intensive review of instructional programs designed for use with students with moderate and severe disabilities, including autism spectrum disorders. Emphasis is on leadership in assessment and developing individual education programs for students. Lecture, three hours. Prereq: Consent of instructor.

EDS 632 ADVANCED PRACTICUM: MODERATE AND SEVERE DISABILITIES. (1-12)

Intensive educational experience with students with moderate and severe disabilities in educational, residential and hospital settings. Site and practicum responsibilities will be based on students’ competencies and area of interest. May be repeated to a maximum of 21 credits. While enrolled in this course, students will be required to apply for the Teacher Education Program. Prereq: Admission to the Master’s program in Special Education or permission of the instructor.

EDS 633 SINGLE SUBJECT RESEARCH DESIGN. (3)

Principles and methods in designing single subject research, including those involving students with disabilities. Students will be required to design a research proposal. Prereq: EDS 601 or 630 or consent of instructor.

EDS 634 LEADERSHIP IN SPECIAL EDUCATION. (3)

Students will select from a variety of options that demonstrate leadership in the field of education. Between the course instructor and each student’s master’s committee, students will complete a variety of activities and experiences that will assist them in completing the capstone requirement. Prereq: EDS 601, 630, 633.

EDS 640 ADVANCED ASSISTIVE TECHNOLOGY. (3)

An advanced study of assistive technology devices and services for individuals with learning, cognitive, physical, and sensory disabilities. The course includes lecture, hands-on experiences, and discussions of current trends and issues in assistive technology consideration and implementation for teachers, families, and administrators. Prereq: EDS 600 or equivalent or permission of instructor.

EDS 641 ASSISTIVE TECHNOLOGY ASSESSMENT. (3)

A study in the evaluation of students with learning, cognitive, physical, and sensory disabilities for assistive technology devices and services. Students implement data-based assistive technology decisions for students with disabilities, locate assistive technologies through a variety of sources, and develop assistive technology implementation plans for individuals with disabilities. Prereq: EDS 640, or permission of instructor.

EDS 645 HYPERMEDIA DEVELOPMENT FOR SPECIAL EDUCATION. (3)

Students will study ways that hypermedia/multimedia can be developed for use in special education programs. Students will examine how theories of human learning and principles of universal design provide a foundation for designing instructional programs that meet the unique needs of all students. Topics will include theories of human learning, principles of universal design, hypermedia/multimedia concepts, interface design guidelines, computer graphics programs, digital scanning of images, accessible text, sound effects, use of digital movies, and multimedia authoring tools. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 647 SEMINAR IN SPECIAL EDUCATION TECHNOLOGY**(Variable topic) (1-3)**

A topical seminar on technology applications in special education. Seminars will address different topics of timely interest, current issues, and various approaches to providing assistive technology and instructional technology services for people with disabilities. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 648 COORDINATING ASSISTIVE TECHNOLOGY PROGRAMS. (3)

Students will study procedures for planning and implementing assistive technology programs in schools. Topics will include use of planning models, philosophy and mission development, generating program goals and objectives, procedures for preparing strategic plans, establishing policies and procedures, identifying resource requirements, managing program implementation, evaluation of program effectiveness, and preparation of proposals for funding. Prereq: EDS 640 and EDS 641 or permission of instructor.

EDS 649 ADVANCED PRACTICUM: SPECIAL EDUCATION TECHNOLOGY. (1-9)

Students will engage in supervised practicum activities associated with the delivery of technology services to individuals with disabilities. Practicum settings may include schools, rehabilitation agencies, clinics, hospitals, technology resource centers, administrative offices, and other facilities involved in the development or delivery of technology services. May be repeated to a maximum of nine credits. Prereq: EDS 514 and EDS 600, or permission of instructor.

#EDS 650 INITIAL CERTIFICATION ADVANCED PRACTICUM IN MODERATE AND SEVERE DISABILITIES. (6)

Supervised practicum experience in a classroom for students with moderate/severe disabilities utilizing contemporary curricula, assessments, methods, and materials designed for use with children exhibiting moderate-severe developmental or intellectual disabilities. This course is designed as an advanced practicum for students in the MSD program who are pursuing an initial certification at the graduate level. Practicum students will be evaluated on these competencies by the university supervisor throughout the semester. EDS 650 is offered on a letter grade basis only. Prereq: Published University, College and Departmental requirements (see appropriate section of the most recent UK Bulletin) admission to the Teacher Education Program or permission of instructor. Successful completion of all EDS Core and Moderate/Severe Disabilities (MSD) Certification Area course work. EDS 650 is the final certification requirement for students obtaining initial certification at the graduate level. Prior to entering this course, the MSD major will have successfully completed all MSD Area and EDS CORE practica serving the needs of children exhibiting moderate to severe intellectual or developmental disabilities. Students in this course will complete their assignments while working full time in a classroom for students with MSD.

EDS 651 DISTANCE EDUCATION: DELIVERY. (3)

This course has been designed for those faculty or future faculty who plan to teach via distance education technology. This course will review current literature on how to deliver distance education content with attention to developing materials, setting delivery timelines, facilitating interactions, and using appropriate teaching strategies. Prereq: Master's degree.

EDS 652 DISTANCE EDUCATION: MANAGEMENT AND SUPPORT. (3)

This course has been designed for those faculty or future faculty who plan to manage or direct programs delivered through distance education technology. The course will focus on current issues and challenges in distance education administration, including such topics as provision of quality support services; policy issues at the local, state, national, and international level; model administrative structures; instruction and technology funding; and virtual institutions. Prereq: Master's degree. (Same as CJT 652.)

EDS 660 OVERVIEW OF CHARACTERISTICS AND INSTRUCTIONAL STRATEGIES FOR INDIVIDUALS WITH ASD. (3)

This course introduces students to the characteristics, classification systems, etiology and research, screening and assessment strategies/issues, approaches, and research-based interventions related to individuals with autism spectrum disorders. Practical classroom strategies, such as visual strategies and environmental arrangements will also be reviewed. The primary goal of the course is to provide students with a foundational knowledge of the strengths and needs characteristic of individuals with ASD, as well as to provide students with a comprehensive array of research-based instructional approaches for individuals with ASD, and to provide the criteria for determining which approach to use. Prereq: EDS 601.

EDS 661 ADVANCED INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH ASD. (3)

This course builds on topics previously learned in EDS 660. Teachers will learn to critically analyze current trends, issues, and therapies used with individuals with ASDs. Practical classroom strategies detailing what to teach based on assessment results, how to use data-based decisions to guide instruction, and an overview of alignment to state standards based on alternate assessments will also be reviewed. The primary goal of the course is to provide teachers with a comprehensive array of practical research-based instructional approaches for individuals with ASDs, criteria for determining which approaches to use, and planning for access to the general education curriculum for all students across the spectrum. Completion of this course sequence (in combination with EDS 660, EDS 662, and EDP 671) will prepare teachers for applications in the ASD Institute (EDS 663). Prereq: EDS 601 and EDS 660.

EDS 662 COMMUNICATION, AAC, AND TECHNOLOGY FOR INDIVIDUALS WITH AUTISM SPECTRUM DISORDERS. (3)

This course prepares persons who will be serving individuals with ASD. The focus of the course

is on developing communication in this population, exploring augmentative and alternative communication devices, and using technology to teach individuals with ASD. The course will provide information on (a) typical language development, (b) characteristics of persons with autism and their unique communication needs, (c) assessment of communication needs, (d) development of communication goals, (e) development and delivery of effective strategies for teaching communication, and (f) use of technology to teach individuals with ASD. The objectives of this course are designed to provide students with a comprehensive knowledge of the communication characteristics of persons with autism, the state-of-the-art techniques in providing communication services for this population, and research-based strategies utilizing technology in teaching individuals with ASD. This course will be taught jointly by the Department of Special Education & Rehabilitation Counseling and the Department of Communication Sciences and Disorders. Prereq: EDS 601, EDS 661, EDS 662. (Same as CSD 649.)

EDS 663 SERVING INDIVIDUALS WITH ASD INSTITUTE. (3)

Students will connect content knowledge with skills from courses taken in the Autism Certificate courses (EDS 660, EDS 661, EDS 662, and EDP 671). Students will demonstrate skills in areas such as implementing research-based strategies and/or behavior supports, collaborating for planning and delivery of instruction, working with diverse families and service providers, and evaluating appropriate technologies based on student needs. Students will demonstrate proficiency via role-play, case studies, video examples, and/or direct observation of individuals with ASD. Students will have an opportunity to learn from one another and experts in the field in a face-to-face format. Prereq: EDS 601 and EDS 660, EDS 661, EDS 662, EDP 671.

EDS 701 SEMINAR FOR EDSRC LEADERSHIP PERSONNEL. (1)

Study of issues and topics affecting the preparation of Rehabilitation Counseling, Special Education, and Early Childhood personnel and of research issues involving persons with disabilities and educational and rehabilitation programs. May be repeated to a maximum of six credits. Lecture, two hours per week. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 701.)

EDS 710 SEMINAR IN MILD DISABILITIES. (3)

Advanced study of issues related to mild disabilities in children, including etiology, assessment, intervention, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ed.D. program in Special Education or consent of instructor.

EDS 711 SEMINAR IN MODERATE AND SEVERE DISABILITIES. (3)

Advanced study of issues related to moderate and severe disabilities, including problems of identification and assessment, program alternatives, curricula, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ed.D. program in Special Education or consent of instructor.

EDS 712 SEMINAR IN EDSRC PROFESSIONAL SERVICES. (3)

Education and Rehabilitation professional services including consultation, technical assistance, continuing education programs, professional organization development, committee and advisory board involvement, professional writing and editing, leadership training, and funding proposal development. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 712.)

EDS 713 DESIGNING CLASSROOM-BASED INTERVENTION RESEARCH IN SPECIAL EDUCATION. (3)

The purpose of this course is to acquaint students with methods for designing and conducting experimental and quasi-experimental intervention studies in school-based settings. Students will have the opportunity to conceptualize a study based on their interests and propose procedures for implementing it. Although knowledge of basic statistics would increase understanding, the substance of the course focuses primarily on designing studies that test for the presence of a distinct cause-and-effect relationship between variables.

EDS 720 SEMINAR IN EDSRC TEACHER PREPARATION. (3)

Rehabilitation Counseling and Special Education college/university professor preparation, including syllabus development, organization of class presentations, instructional alternatives, scheduling, student assessment, professor-student interactions, student advising, resource identification and utilization and program evaluation. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 720.)

EDS 721 PRACTICUM IN EDSRC PERSONNEL PREPARATION. (1-9)

Professional preparation of Rehabilitation Counselors or Special Education Teachers, including practice in delivering lectures, conducting class discussions, leading seminars, directing independent studies, guiding student research projects, demonstrating instructional methods and materials, supervising rehabilitation counselors or special education student teachers, and advising. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 721.)

EDS 730 SEMINAR IN SPECIAL EDUCATION ADMINISTRATION. (3)

Administration of special education programs at the local and state levels. Emphasis is on program planning, staffing, fiscal management and program evaluation. Prereq: EDS 602 and admission to the Ed.S. or Ed.D. program in special education or consent of instructor.

EDS 731 ADVANCED PRACTICUM: SPECIAL EDUCATION ADMINISTRATION. (1-9)

Supervised practicum experiences related to the administration of special education programs at the local and state levels, and project management, including staff management and development, program planning, evaluation, fiscal management, organization, reporting,

Course Descriptions

communications, and coordination. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to the Ed.S. or Ed.D. program in special education administration or in certification program for special education administrators.

EDS 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EDS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EDS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 767.)

EDS 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

EDS 769 RESIDENCE FOR THE DOCTORAL DEGREE. (0-12)
May be repeated indefinitely.

EDS 779 SEMINAR IN SPECIAL EDUCATION (Variable topic). (1-3)
Study of philosophy, principles, trends and research in education of exceptional children. Students will carry on an extensive study of a problem dealing with education of the exceptional child. May be repeated to a maximum of nine credits.

EDS 789 INDEPENDENT STUDY IN EARLY CHILDHOOD/SPECIAL EDUCATION/REHABILITATION COUNSELING RESEARCH. (1-6)
An independent study supervised research course for advanced graduate students in Rehabilitation Counseling, Special Education, or Early Childhood with an interest in a specific research problem. Class hours determined with supervising instructor. Note: For Rehabilitation Counseling doctoral students this course will satisfy CACREP internship requirements in the Research core area. Additional internship in 2 additional core areas are also required. Prereq: Admission to EDSRC Doctoral Program or approval of instructor. (Same as RC 789.)

EDU Education

EDU 300 SPECIAL COURSE. (1-9)
This course is an opportunity for experimental, topical or interdisciplinary experience for up to 9 hours of credit without creating a permanent course. The description and course subtitle will be submitted each time the course is offered. Subtitle required.

EDU 305 CONTEMPORARY ISSUES FACING THE AT-RISK SCHOOL-AGE/ADOLESCENT CHILD. (3)
To provide background information, experience, and skills for undergraduate students to interact with elementary and middle school children in a consulting role. Special emphasis will address the needs of the "at-risk" student population. The "at-risk" student is associated with families with incomes below the poverty level, as well as other significant problems which plague contemporary society-e.g., homelessness, child abuse/neglect, single parent homes, non-English speaking parents, fetal alcohol or substance abuse syndrome, mentally and/or physically handicapped parents or siblings, and high incidence of academic achievement declines and dropout rates. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

EDU 645 FOUNDATIONS OF PEDAGOGICAL THEORY AND PRACTICE IN THE SECONDARY SCHOOL. (0-9)
Students will participate with other secondary education majors in a variety of disciplines in the reflective study of adolescent behavior, secondary school curriculum, school law, learning theory, learning styles, effective teaching and learning, instructional technology, working with special populations, cultural diversity in the schools, school context, and professional development. Students will spend time in the schools applying concepts. May be repeated to a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDU 745 INTERDISCIPLINARY INSTRUCTION IN THE SECONDARY SCHOOL. (0-3)
Students will participate with other secondary education majors from a variety of disciplines in the reflective study of the context of schooling, classroom management, individual student differences, and professional development. Students will be in the schools applying concepts on a full-time basis. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDV Vocational Education

AGRICULTURAL EDUCATION

EDV 580 MATERIALS AND METHODS FOR TEACHING VOCATIONAL AGRICULTURE. (3)
Designed to develop teacher competency in methods of teaching with emphasis on the problem-solving procedure and use of demonstrations, field trips, and audiovisual materials. Evaluation of teaching-learning is emphasized. A study of facilities and instructional materials needed by a department of vocational agriculture is made. Prereq: Admission to the Teacher Education Program or permission of instructor.

BUSINESS EDUCATION

EDV 626 CLASSIFICATION AND POSSIBLE USE OF COMMUNITY RESOURCES IN BUSINESS EDUCATION. (3)
Course provides for community analysis, and the development of possible ways and means to supplement the business education course in the secondary school with a study of vital community resources.

VOCATIONAL EDUCATION

EDV 501 PRACTICUM IN VOCATIONAL EDUCATION. (1-12)
Planned and supervised practicum in teaching agriculture, business, home economics and vocational industrial education at middle and high school levels. Requires the integration of observation skills, application of instructional objectives, teaching strategies, selection of instructional materials, assessment of student progress, and use of student organizations. Regularly scheduled seminars included as an integral part of course. Open only to students in the master's degree combined with initial teaching certification program. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

EDV 520 THE ADULT LEARNER IN VOCATIONAL SETTINGS. (3)
An overview of adult education practices and their relevance to adult learning in the work setting. Prereq: EDV 211 or consent of instructor.

EDV 535 PRINCIPLES AND PHILOSOPHY OF VOCATIONAL EDUCATION. (2-3)
Study is made of philosophy, accepted principles, and legislation affecting programs in vocational education. May be repeated to a maximum of six credits.

EDV 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EDV 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDV 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

EE Electrical Engineering

EE 101 CREATIVITY AND DESIGN IN ELECTRICAL AND COMPUTER ENGINEERING. (3)
This course provides an introduction to the process and application of creative design and problem solving within science and engineering. Emphasis is placed on applications and case studies in the areas of electrical and computer engineering. Several laboratory-based engineering problems are used to provide practical settings in which to apply and evaluate constraint- and product-focused strategies for creative design and problem solving. In addition to technical and aesthetic considerations, ethical and cultural influences on the creative process will also be discussed.

EE 167 FUNDAMENTALS OF NANOTECHNOLOGY AND APPLICATIONS IN RENEWABLE ENERGY. (3)
In 6 lecture modules and 4 observational visits to laboratories on UK campus, this course covers: effects of small size (1 nm to 100 nm) on the electro-optical properties of materials; fundamental principles of quantum mechanics; applying quantum mechanics to understand the changes in material properties like color, luminescence and electrical conductance at nanoscale; operating principles, basic theory and design issues in solar cells; nanotechnology applications for enhancing the performance of renewable energy generation and storage systems, especially solar cells and batteries. Prereq: Proficiency in mathematics, physics and chemistry at the high school graduate level.

***EE 211 CIRCUITS I. (4)**
Fundamental laws, principles and analysis techniques for DC and AC linear circuits whose elements consist of passive and active components used in modern engineering practice including the determination of steady state and transient responses. In addition to the required text book, additional materials including a portable Oscillator & Signal Generator, a digital

Multimeter, an electronics-part kit, and a simulation software are required for at-home laboratory assignments. Prereq: MA 114, prereq or concurrent; PHY 232, 242.

EE 221 CIRCUITS II. (3)

Analysis and design methods for analog linear circuits whose elements consist of passive and active components used in modern engineering practice, including transfer functions, network parameters, and a design project involving modern design practices. Prereq: EE 211. Concur: MA 214.

EE 222 ELECTRICAL ENGINEERING LABORATORY I. (2)

Laboratory exercises in the use of measuring instruments. Experiments in R-L-C circuit analysis. Lecture, one hour; laboratory, three hours. Prereq or concur: EE 221.

EE 223 AC CIRCUITS. (4)

Analysis and design methods for analog linear circuits whose elements consist of passive and active components used in modern engineering practice, including transfer functions, network parameters, and a design project and laboratory experiments involving modern design practices. Prereq: EE 211. Concurrent: MA 214.

EE 280 DESIGN OF LOGIC CIRCUITS. (3)

Boolean algebra; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using standard integrated circuits. Prereq: CS 115 or EGR 102.

EE 281 LOGICAL DESIGN LABORATORY. (2)

A laboratory involving the design and implementation of logic circuits. Combinational and sequential (both synchronous) design examples using small and medium scale integrated circuits. Lecture, one hour; laboratory, one three-hour session. Prereq: EE 280.

EE 282 DIGITAL LOGIC DESIGN. (4)

Boolean algebra; number systems; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using digital logic. Laboratory experiments reinforce the course content. Lecture, three hours; laboratory, one three-hour session. Prereq: EGR 102 or equivalent programming course. (Same as CPE 282.)

EE 287 INTRODUCTION TO EMBEDDED SYSTEMS. (4)

Introduction to Embedded Systems teaches students how to use microcontrollers to interact with the physical world. Lectures will cover the theory behind microcontroller architecture, programming, and interfacing and lab projects will back up that theory with hands-on design experiments using microcontrollers. Topics include assembly language and high-level language programming, address decoding, hardware interrupts, parallel and serial interfacing, analog I/O, and basic real-time processing. Prereq: EE/CPE 282 and prereq or concur: CS 215 or consent of instructor. (Same as CPE 287.)

EE 305 ELECTRICAL CIRCUITS AND ELECTRONICS. (3)

A service course covering electrical engineering principles for engineering or science students with majors outside of electrical engineering. Topics include: AC and DC circuits analysis. Prereq: MA 114, PHY 232.

EE 360 INTRODUCTION TO SEMICONDUCTOR DEVICES. (3)

Electronic properties of solid-state materials and calculation of charge carriers in semiconductors; structure and physical model of p-n junctions and various diode devices, bipolar transistors, field effect transistors; semiconductor fabrication technologies and microelectronics manufacturing issues. Prereq: PHY 232 and CHE 105.

EE 380 COMPUTER ORGANIZATION. (3)

Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: CS 215 and CPE/EE 282 or EE 280. (Same as CPE/CS 380.)

EE 383 INTRODUCTION TO EMBEDDED SYSTEMS. (3)

A course in the hardware and software of microprocessors. Assembly language programming, address decoding, hardware interrupts, parallel and serial interfacing with various special purpose integrated circuits. Each student is expected to do homework assignments using microprocessor hardware. Prereq: EE 280 and EE/CS 380. (Same as CS 383.)

#EE 391 UNDERGRADUATE RESEARCH EXPERIENCE. (1)

Research project or activity led by an engineering faculty member, designed to provide students research experience. Completion of this course requires that the student submit a report overviewing activities of the student and summarizing the experience. Course may be repeated to a maximum of three credit hours. Prereq: Submission of approved learning plan and approval of department.

EE 395 INDEPENDENT WORK IN ELECTRICAL ENGINEERING. (1-6)

Special research and problems for individual students who are capable of pursuing independent investigations. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

#EE 396 COMMUNITY OR CAMPUS EXPERIENTIAL LEARNING. (1)

This course credit recognizes extensive involvement by a student in a campus organization or community organization. This involvement may be leadership or responsibility for significant substantial portions of a project or event. Enrollment in this course requires a Learning Plan developed by the student and a faculty advisor (such as the organization faculty advisor, for campus organizations). The Learning Plan must be approved by the Director of Undergraduate Studies. The plan should include a list of learning objectives, and a list of readings or other

curricular materials that will be read related to the experience. Successful completion of the course requires that the student submit a report, covering an overview of activities and responsibilities of the student during the experience, and a reflective statement on lessons learned during the experience. These lessons learned may be in regards to leadership, team interactions, project management, or technical aspects of a project. The report must be approved by the designated advisor and the DUS, or his/her delegate. Course may be taken on a pass-fail basis only and may be repeated to a maximum of three credit hours. Prereq: Submission of acceptable learning plan and approval of department.

EE 402G ELECTRONIC INSTRUMENTATION AND MEASUREMENTS. (3)

Elementary treatment of electronic circuits emphasizing laboratory work. Topics include AC circuits, filters, theory and operation of transistors and other semiconductor devices and a simple treatment of operational amplifiers. Lecture, two hours per week; laboratory, three hours per week. Prereq: PHY 242 or EE 305 or consent of instructor. (Same as PHY 402G.)

EE 415G ELECTROMECHANICS. (3)

Study of electric machines and electromechanical systems. Prereq: EE 221 with a C or better and PHY 232.

EE 416G ENERGY CONVERSION LABORATORY. (2)

Laboratory practice and experimental studies related to EE 415G. Lecture one hour; laboratory, three hours. Prereq or concur: EE 415G.

EE 421G SIGNALS AND SYSTEMS. (3)

An introduction to continuous and discrete signal and system models and analyses. Topics include discrete and continuous convolution, Fourier series, Fourier transforms, and Laplace transforms and Z-transforms with application examples including AM modulation and the sampling theorem. Prereq: MA 214 and a C or better in EE 221.

EE 422G SIGNALS AND SYSTEMS LABORATORY. (2)

Lectures and laboratory exercises on signal and systems modeling. Topics include noise models and analysis, filter design, modulation techniques, sampling, discrete Fourier Transforms, State Variable Models, and feedback design with an emphasis on using computer software for analysis and simulation. Prereq: EE 421G, MA 320.

EE 461G INTRODUCTION TO ELECTRONICS. (3)

Analysis and design of electronic circuitry incorporating nonlinear electronic elements such as transistors, FET's, and vacuum tubes. Applications to amplifiers. Prereq: A grade of C or better in EE 221.

EE 462G ELECTRONIC CIRCUITS LABORATORY. (2)

Experimental exercises in the design and analysis of useful electronic circuits incorporating semiconductor devices: transistors, tunnel and Zener diodes; also, vacuum tubes, integrated circuits and operational amplifiers. Lecture, one hour; laboratory, three hours. Prereq: EE 222 and EE 461G.

EE 468G INTRODUCTION TO ENGINEERING ELECTROMAGNETICS. (4)

Applications of electromagnetic theory; electrostatic and magnetostatic fields; Maxwell's field equations; plane waves; transmission lines and waveguides; antennas and radiation. Prereq: MA 213; prereq or concur: EE 221.

EE 480 ADVANCED COMPUTER ARCHITECTURE. (3)

This course focuses on advanced computer architectures and low-level system software. Topics include RISC architectures, vector and multiprocessor architectures, multiprocessor memory architectures, and multiprocessor interconnection networks. Peripheral devices such as disk arrays, NICs, and video/audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, linkers, and loaders. Prereq: CPE/CS/EE 380. (Same as CPE 480 and CS 480G.)

EE 490 ECE CAPSTONE DESIGN I. (3)

The first semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Topics important in product design and manufacturing are included, including considerations of economics, safety, and communication. Students are expected to formally propose a design project that includes a problem definition that incorporates engineering standards and realistic constraints. Students work in teams to develop and complete the designs. Lecture, two hours; laboratory, three hours per week. Prereq: Engineering standing and completion of all other required 400-level EE/CPE courses, excluding EE/CPE 491. (Same as CPE 490.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

EE 491 ECE CAPSTONE DESIGN II. (3)

The second semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Students work in teams to develop and complete the designs. Topics to include engineering ethics, design, documentation, and communication. Prereq: EE/CPE 490 completed in the previous semester and Engineering standing. (Same as CPE 491.)

#EE 503 POWER ELECTRONICS. (3)

Study of solid-state power electronic devices and their applications. Examination of control philosophies, steady-state models, and numerical simulation of characterizing differential equations. Current topics of interest from the literature. Prereq: EE 415G and EE 461 or consent of instructor.

EE 511 INTRODUCTION TO COMMUNICATION SYSTEMS. (3)

An introduction to the basic signal processing operations in communications systems. Topics include frequency and time domain signal and system representation, random signals, modulation, sampling, pulse modulation, information theory. Prereq: EE 421G, MA 320, and engineering standing.

EE 512 DIGITAL COMMUNICATION SYSTEMS. (3)

A treatment of the basic signaling concepts involved in the communication of digital information. Topics include transmission requirements and distortion of digital signals; discrete amplitude, frequency, and phase modulation; error control coding. Prereq: EE 421G, EE 422G, engineering standing or consent of instructor.

EE 513 AUDIO SIGNALS AND SYSTEMS. (3)

An introduction to digital signal processing and classification methods for audio signals. Topics include signal analysis and system design using correlation functions, power spectra, difference equations, and transfer functions; implementations of filters, classifiers, and audio effects; characteristics and modeling of common audio signals such as speech, music, and noise. Prereq: EE 422G, engineering standing.

EE 517 ADVANCED ELECTROMECHANICS. (3)

Dynamics of electromechanical systems and rotating electrical machines. Applications of electro-magnetic theory to electrical machines. Certain special topics of current interest. Prereq: EE 415G, EE 421G, and engineering standing.

EE 518 ELECTRIC DRIVES. (3)

Introduction to common power electronic converters used in electric motor drives. Steady-state analysis methods for electric machines fed by power conditioning converters. Performance prediction of electric machines by electromagnetic field theory and by coupled oil models. Prereq: EE 415G, EE 421G, and engineering standing.

EE 521 INTRODUCTION TO WIRELESS COMMUNICATIONS. (3)

Study of analog RF electronics for wireless communications through a combination of course and laboratory work. Topics covered in the course include: modulation/demodulation, filters, RF transformers, mixers, transistor switches and amplifiers, class A, B, AB, C, D, E, and F amplifiers, quartz crystals, transmission lines, impedance inverters, acoustics, oscillators, audio circuitry, noise and inter-modulation, and antennas. Prereq: Engineering standing.

EE 522 ANTENNA DESIGN. (3)

Principles of radiation, potential solution to Maxwell's equations for current in empty space, electrically small antennas, antenna arrays, wire antenna principles, introduction to numerical methods, aperture antennas, frequency scaling antennas, receiving properties of antennas, antenna measurement techniques. Prereq: EE 468G and engineering standing.

EE 523 MICROWAVE CIRCUIT DESIGN. (3)

Physical and mathematical descriptions of wave propagation in guided structures; microstrip lines; microwave integrated circuits; passive components; two-terminal devices; four-terminal devices; S-parameter concept; equivalent circuit concept; solid state microwave amplifiers and oscillators. Prereq: EE 468G and engineering standing.

EE 524 SOLID STATE PHYSICS. (3)

Introductory solid state physics with emphasis on the properties of electrons in crystals; crystal structure, crystal diffraction, reciprocal lattice, lattice vibrations and phonons, free electron theory, energy bands in solids, semiconductors. Prereq: PHY 520, or consent of instructor. Engineering standing required for EE 524. (Same as PHY 524.)

EE 525 NUMERICAL METHODS AND ELECTROMAGNETICS. (3)

This course covers the basics of numerical methods and programming with applications in electromagnetics. Examples range from statics to radiation/scattering problems involving numerical solutions to integro-differential and finite difference equations. Prereq: EE 468G and engineering standing, or consent of instructor.

EE 526 LEAN OPERATIONS MANAGEMENT. (3)

This course will cover topics in basic lean system operations as well as the management system to support the attainment of highest customer satisfaction with respect to Safety, Quality, Cost, Productivity, Delivery and Human Resource Development. The instructional method employs discovery learning techniques and consists of in-class presentations with a focus on hands-on activities, and selected outside assignments to teach and demonstrate the development of a lean operations environment and the management system to support it. Working in teams, students apply fundamental lean tools and concepts to develop a lean operations environment capable of driving continuous improvement in a simulated factory. As the operational environment evolves, key management principles and tools are explored using the teachings of Taiichi Ohno and others considered to be the pillars of the Toyota Production System. Prereq: Enrollment restricted to junior-level or above students. (Same as ME/MFS 526.)

EE 527 ELECTROMAGNETIC COMPATIBILITY. (3)

Design of electronic systems to minimize 1) emission of electromagnetic signals that cause interference in other electronic systems, 2) the susceptibility of that system to electromagnetic signal from other electronic systems, and 3) the susceptibility of that system to its own, internally generated signals. A set of brief laboratory experiments demonstrate the design principles and provide familiarity with modern test equipment. Prereq: EE 468G and engineering standing.

EE 531 ALTERNATIVE AND RENEWABLE ENERGY SYSTEMS. (3)

Study of non-traditional, electric generating systems, and the use of renewable energy sources.

Energy sources include solar, wind, hydro, and biomass/biogas. Generating technologies include both inverter based equipment and rotating machinery. Prereq: EE 415G, Engineering Standing or consent of instructor.

***EE 532 SMART GRID: AUTOMATION AND CONTROL OF POWER SYSTEMS. (3)**

This course covers introduction to smart grid, key technologies in transmission and distribution systems that enable smart grid, power market structure, and real time pricing. Prereq: Engineering standing, or consent of instructor.

#EE 533 ADVANCED POWER SYSTEM PROTECTION. (3)

This course teaches philosophies for protecting power systems, covers micro-processor based relays, and provides projects on relay setting and relay testing. Prereq: Engineering standing, or consent of instructor.

EE 535 POWER SYSTEMS: GENERATION, OPERATION AND CONTROL. (3)

This course covers essential aspects of the energy management system of power systems. Will cover topics: power system economics, state estimation, power system stability, power quality, and fault location. Prereq: EE 537 or concurrent, and Engineering Standing.

EE 536 POWER SYSTEM FAULT ANALYSIS AND PROTECTION. (3)

This course teaches computer based methods for performing fault analysis of power systems, and principles for protecting power systems. Prereq: EE 537, or concurrent, and Engineering Standing.

EE 537 ELECTRIC POWER SYSTEMS I. (3)

A study of power flow, elements of power factor correction, the one-line diagram, the per-unit system, transformer modeling, generator modeling, transmission line modeling, transmission line performance calculations from equivalent circuits, and general methods for network calculations. Prereq: EE 468G and engineering standing.

EE 538 ELECTRIC POWER SYSTEMS II. (3)

Introduction to modern power system practices, basic transient and steady-state stability analysis with emphasis on digital techniques. Prereq: Engineering standing and consent of instructor.

EE 539 POWER DISTRIBUTION SYSTEMS. (3)

Study of electric utility distribution power systems. Topics include configurations, equipment, customer class data, load flow, phase balancing, capacitor placement, system protection, power quality, and distributed generation. Prereq: EE 537, engineering standing or consent of instructor.

#EE 543 SOLAR CELL DEVICES AND SYSTEMS FOR ELECTRICAL ENERGY GENERATION. (3)

Physics of photovoltaic (PV) devices, emerging technologies, design of PV cells and systems, electronic components for signal conditioning, integration, installation, performance evaluation and economic issues related to PV systems. Prereq: EE 211 or EE 305 and Engineering Standing, or consent of instructor. (Same as BAE 543/EGR 543.)

EE 546 ELECTRIC POWER SYSTEM FUNDAMENTALS. (3)

Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent. (Same as EGR 546.)

EE 555 INTRODUCTION TO MICRO-/NANO-ELECTROMECHANICAL SYSTEMS. (3)

This course provides an overview of micromachined structures with an emphasis on operational theory and fabrication technology. Prereq: Engineering standing or consent of instructor. (Same as ME/MSE 555.)

EE 560 SEMICONDUCTOR DEVICE DESIGN. (3)

Theory, development and discussion of equivalent circuit models of transistor devices, negative resistance, semiconductor devices and praetersonic devices based on electronic processes in solid state elements. High and low frequency, as well as the Ebers-Moll and charge control switching models and their application in computerized electronic circuit analysis will be developed. Prereq: EE 461G or equivalent, and engineering standing.

EE 562 ANALOG ELECTRONIC CIRCUITS. (3)

Feedback amplifiers, tuned and untuned amplifiers, oscillators, AM and FM transmitters. Prereq: EE 360, EE 461G and engineering standing.

EE 566 ENGINEERING OPTICS. (3)

Fundamentals of geometrical and physical optics; applications as related to problems in engineering design and research, details of some optical measurement techniques; introduction to lasers; techniques for determining optical properties. Prereq: Engineering standing. (Same as ME 560.)

EE 567 INTRODUCTION TO LASERS AND MASERS. (3)

Basic principles of laser action; atomic transitions; population inversion; two and three level systems; optical resonators; pumping methods; applications. Prereq: EE 360, EE 468G, or PHY 417G, or consent of instructor. (Same as PHY 567.)

EE 568 FIBER OPTICS. (3)

The course presents theory and practice related to (a) fiber optic cable and their fabrication, (b) fiber optic transmitters and detectors, (c) fiber optic communication systems and (d) fiber optic remote sensors. Prereq: EE 468G. (Same as MSE 568.)

EE 569 ELECTRONIC PACKAGING SYSTEMS AND MANUFACTURING PROCESSES. (3)

Study of packaging systems which interconnect, support, power, cool, protect, and maintain electronic components. The course will address systems at the chip, board, and product levels. Topics include design, properties, materials, manufacture, and performance of various packaging systems. Laboratory will provide familiarity with design software and production equipment and processes. Prereq: EE 211 or EE 305, EE 360 or MSE 402G, or consent of instructor. (Same as MSE 569.)

EE 570 FUNDAMENTALS OF NANOELECTRONIC DEVICES AND MATERIALS. (3)

Energy bands in crystals; heterostructures; quantum wells and low dimensional systems; the two-dimensional electron gas and MODFET; transmission in nanostructures; current topics in nanoscale devices. Prereq: EE 360 and engineering standing, or consent of instructor. (Same as ME/MSE 570.)

EE 571 FEEDBACK CONTROL DESIGN. (3)

System representation via transfer function and state variables, root locus analysis; Bode plots; compensation by root-locus and frequency response methods; state variable feedback; sensitivity analysis; tracking via output feedback; digital control systems. Prereq: EE 421G, EE 422G, engineering standing, and consent of instructor.

EE 572 DIGITAL CONTROL OF DYNAMIC SYSTEMS. (3)

Zero and first order hold, theory of analog to digital and digital to analog conversion. Z-transform analysis, discrete state variable analysis, discrete estimation techniques, error analysis of discrete systems. Prereq: EE 422G, engineering standing.

EE 575 INDUSTRIAL CONTROL. (3)

Control technologies for industrial and process control systems, including sensors, actuators, PLCs, and hydraulic and pneumatic control elements. Prereq: Engineering standing or graduate standing.

#EE 576 CYBERSECURITY. (3)

This course focuses on technologies in protecting infrastructure, networks, programs and data from unintended or unauthorized access, change or destruction. It provides a survey of latest developments in cyber-security through study of theoretical foundation and hands-on practical implementation. Topics include basic security technology, cryptography, security management, risk assessment, operations and physical security, software and network security, as well as ethical and legal issues. Prereq: CS 270 and EE 380 or consent of instructor.

EE 579 NEURAL ENGINEERING: MERGING ENGINEERING WITH NEUROSCIENCE. (3)

A multidisciplinary approach combining engineering principles for systems analysis and control, knowledge of biological control mechanisms, and computational properties of biological neural networks in the development of engineering neural networks for control applications. Topics include: equivalent circuit models for biological neurons and networks, non-linear differential equation representations, biological control strategies for rhythmic movements, design and development of controller for robot function, proposal development and presentation. Prereq: EE 422G and Engineering Standing or consent of instructor. (Same as BME 579.)

EE 580 EMBEDDED SYSTEM DESIGN. (3)

Embedded System Design covers the design and implementation of hardware and software for embedded computer systems. Topics include architectural support for embedded systems, power management, analog and digital I/O, real-time processing design constraints and the design of embedded systems using a real-time operating systems. Prereq: EE/CPE 287, EE/CPE 380, and engineering standing or consent of instructor. (Same as CPE 580.)

EE 582 HARDWARE DESCRIPTION LANGUAGES AND PROGRAMMABLE LOGIC. (3)

A study of hardware description languages including netlists, VHDL and Verilog; their use in digital design methodologies including modeling techniques, design verification, simulation, synthesis, and implementation in programmable and fabricated logic media. Programmable logic topics include CPLD and FPGA architectures, programming technologies and techniques. Prereq: EE/CS 380 and engineering standing.

EE 584 INTRODUCTION OF VLSI DESIGN AND TESTING. (3)

Introduction to the design and layout of Very Large Scale Integrated (VLSI) Circuits for complex digital systems; fundamentals of the VLSI fabrication process; and introduction to VLSI testing and structured design for testability techniques. Prereq: Engineering standing or consent of instructor. (Same as CPE 584.)

EE 585 FAULT TOLERANT COMPUTING. (3)

Students in this course study the theory and practice of fault-tolerant and dependable computing systems. The course will introduce sources of faults, error and failures in computer controlled systems and approaches to design masking and recovery techniques at the hardware, software, and systems level. Prereq: EE/CPE 380 and engineering standing or consent of the instructor. (Same as CPE 585.)

EE 586 COMMUNICATION AND SWITCHING NETWORKS. (3)

Fundamentals of modern communication networking and telecommunications, data transmission, multiplexing, circuit switching networks, network topology routing and control, computer communication, packet switching networks, congestion control, frame relay, ATM switching networks, traffic and congestion control. Prereq: EE/CPE 282 and engineering standing. (Same as CPE 586.)

EE 587 ADVANCED EMBEDDED SYSTEMS. (3)

An advanced course in the design of embedded systems using state-of-the-art microcontroller hardware and software development tools. Topics include architecture support for real-time operating systems, language support for embedded and real-time processing, embedded and wireless networking. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as CPE/CS 587.)

EE 588 REAL-TIME COMPUTER SYSTEMS. (3)

This course covers features typically found in real-time and embedded systems. Topics include real-time operating systems, scheduling synchronization, and architectural features of single and multiple processor real-time and embedded systems. Prereq: EE/CPE 580 and engineering standing or consent of instructor. (Same as CPE 588.)

EE 589 ADVANCED VLSI. (3)

An advanced class in topics related to Very Large Scale Integration. Example topics are advanced simulation, yield impact, memory design, statistical analysis and data reduction. Prereq: EE 584, engineering standing.

EE 595 INDEPENDENT PROBLEMS. (1-3)

For electrical engineers. A problem, approved by the chairperson of the department, provides an objective for study and research. May be repeated to a maximum of six credits. Prereq: 2.5 standing and engineering standing.

#EE 598 SPEC. TOPICS MULTI-INST (Subtitle required). (3)

This course covers advanced topics on various aspects of electrical engineering, and is a template for courses to be shared among multi-institutions via distance learning technologies.

***EE 599 TOPICS IN ELECTRICAL ENGINEERING (Subtitle required). (3)**

A detailed investigation of a topic of current significance in electrical engineering such as biomedical instrumentation, digital filter design, active networks, advanced electrical devices, digital communications, display of electronics. May be repeated, but only three credits can be earned under the same title. Only nine credit hours may count toward degree requirements. A particular topic may be offered at most twice under the EE 599 number. Prereq: Equivalent of two 400-level courses in electrical engineering, consent of instructor and engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics. For major work, a candidate must hold a bachelor's degree in electrical engineering or its equivalent.

EE 601 ELECTROMAGNETIC ENERGY CONVERSION I. (3)

Generalized electric machine theory; parameter determination. Energy conversion in continuous media including magnetohydrodynamics. Prereq: Consent of instructor.

EE 603 POWER ELECTRONICS. (3)

Study of solid-state power electronic devices and their applications. Examination of control philosophies, steady-state models, and numerical simulation of characterizing differential equations. Current topics of interest from the literature. This course may not be used to satisfy degree requirements if credit is earned in EE 503. Prereq: EE 517 and EE 571 or consent of instructor.

EE 604 SWITCH MODE CONVERTERS. (3)

Study of analysis techniques for switching mode converters and associated control practices. Boost, buck, buck-boost, flyback, and Cuk topologies in both continuous and discontinuous conduction modes are presented. Numerical solution, state-space averaging, and linearization techniques are applied to predict performance and formulate transfer characteristics. Prereq: EE 517 or consent of instructor.

EE 605 MODELING, SIMULATION AND CONTROL FOR MANUFACTURING. (3)

The purpose of this course is to examine methods and systems from the perspectives of modeling, simulation, and control of manufacturing facilities. The emphasis will be primarily on techniques that can be used to model and evaluate performance of systems. Students are encouraged to think critically about available technologies, identify relative strengths and weaknesses, and analyze the technologies toward developing improved solutions to factory control and information management problems. Prereq: Graduate Standing. (Same as ME/MFS 605.)

EE 606 GLOBAL ISSUES IN MANUFACTURING. (3)

The need to increase quality, productivity, efficiency and sustainability in manufacturing operations spanning the product, process and systems (manufacturing systems as well as supply chain) domains is essential for companies to be successful. The increased globalization of markets and manufacturing operations, declining natural resources and negative consequences of some manufacturing practices as well as increased legislation in many regions has led to many new challenges that companies must overcome to be successful in competitive markets. This seminar course will introduce students to a variety of global issues in manufacturing through presentations by leading national and international experts in these

domains. The seminars will cover a broad range of manufacturing related topics relevant to many disciplines including manufacturing, mechanical and electrical engineering. The course can also help graduate students identify topical issues that need further investigation and could become potential research topics. (Same as ME/MFS 606.)

EE 611 DETERMINISTIC SYSTEMS. (3)

Concepts of linear systems, singularity functions, convolution and superposition integrals, state-variable method for linear systems, relation between transfer function and state-variable equations, fundamental matrix, state-transition matrix, unit-impulse response matrix, and transmission matrix. Prereq: EE 421G.

EE 613 OPTIMAL CONTROL THEORY. (3)

State-space modeling of control systems; variational techniques; system optimization by maximum principle, dynamic programming; Hamilton-Jacobi equations design of linear optimal systems; computational methods for solving boundary value problems. Prereq: EE 611.

EE 614 ADAPTIVE CONTROL. (3)

Real-time parameter estimation; deterministic self-tuning regulators; stochastic and predictive self-tuning regulators; model-reference systems; auto-tuning; gain scheduling; practical issues; design and simulation projects. Prereq: EE 611.

EE 619 PROBLEMS SEMINAR IN OPERATIONS RESEARCH. (3)

In this course, the student is exposed to the art of applying the tools of operations research to real world problems. The seminar is generally conducted by a group of faculty members from the various disciplines to which operations research is applicable. Prereq: MA 617 and STA 525 or consent of instructor.

EE 621 ELECTROMAGNETIC FIELDS. (3)

Development of electromagnetic field theory from the basic postulates of Maxwell's equations in differential and integral forms, solution to static, quasistatic, and wave-propagation problems. Radiation from dipole antenna elements. Prereq: EE 468G.

EE 622 ADVANCED ELECTRODYNAMICS. (3)

Solution methods for applied electrodynamics problems; uniqueness, equivalence, duality, reciprocity; linear space methods; wave solutions in separable coordinate systems; classical problems in cartesian, cylindrical, and spherical coordinates. Prereq: EE 468G.

EE 624 COMPUTATIONAL ELECTROMAGNETICS: THE FINITE-DIFFERENCE TIME-DOMAIN. (3)

A course on the application of the finite-difference time-domain (FDTD) technique for the full-wave simulation of time-dependent electromagnetic waves in complex media. Representative topics in the course include: The Yee-algorithm, numerical dispersion and stability, physical source models, absorbing boundaries and perfectly matched layered media, near-field to far-field transformations, modeling of microwave circuits and antennas, parameter extraction, lumped load models, non-uniform and non-orthogonal grid methods, and current topics in FDTD. Prereq: EE 621 or consent of instructor.

EE 625 COMPUTATIONAL ELECTROMAGNETICS. (3)

This advanced course in computational electromagnetics primarily covers moment method and finite element method solutions to scattering problems. Representative topics of the course include surface and volume equivalence principles, scattering by material cylinders, scattering by periodic structures and absorbing boundary condition models. Prereq: EE 525, EE 621, or consent of instructor.

EE 630 DIGITAL SIGNAL PROCESSING. (3)

An introductory treatment of the basic concepts of signal processing via time and frequency domain (Z-transform) methods and a survey of procedures for designing, implementing and using digital signal processors. Prereq: EE 512 or consent of instructor.

EE 635 IMAGE PROCESSING. (3)

The course outlines applications of image processing and addresses basic operations involved. Topics covered include image perception, transforms, compression, enhancement, restoration, segmentation, and matching. Prereq: Graduate standing and consent of instructor. (Same as CS 635.)

EE 639 ADVANCED TOPICS IN SIGNAL PROCESSING AND COMMUNICATIONS. (3)

Advanced topics in signal processing and communications research and design topics of current interests, such as optical processing, pattern recognition, satellite systems, and digital communication networks. A review and extension of current literature and selected papers and reports. May be repeated to a maximum of nine credits. Prereq: Advanced graduate standing.

EE 640 STOCHASTIC SYSTEMS. (3)

Random variables, stochastic processes, stationary processes, correlation and power spectrum, mean-square estimation, filter design, decision theory, Markoff processes, simulation. Prereq: EE 421G.

#EE 641 ADVANCED POWER SYSTEMS. (3)

This course covers advanced topics on electric power systems including power system analysis, operation, monitoring, protection, optimization and control. Prereq: Graduate student, AND EE 415 or equivalent or consent of instructor.

EE 661 SOLID-STATE ELECTRONICS. (3)

A study of semiconductor fundamentals including crystal structure, basic quantum mechanics, energy-band theory, carrier distributions, carrier transport, and recombination-generation.

Analysis of semiconductor devices including PN junction diodes, bipolar-junction transistors, metal-semiconductor diodes, and metal-oxide semiconductor field effect transistors. Prereq: EE 360 and EE 461G or consent of instructor.

EE 663 OPTOELECTRONIC DEVICES. (3)

Theory and applications of photodetectors, solar cells, semiconductor lasers, light emitting diodes and display devices, nanocrystalline structures and organic semiconductors applications in optoelectronic devices. Prereq: EE 360 or MSE 402G, consent of instructor and/or graduate standing. (Same as MSE 663.)

EE 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3)

A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/CME/MSE 664.)

EE 684 INTRODUCTION TO COMPUTER AIDED DESIGN OF VLSI CIRCUITS. (3)

Computer aided design of Very Large Scale Integration (VLSI) circuits. Topics include: VLSI technologies, CMOS circuit characteristics, computer aids in the design of VLSI circuits, use of various CAD tools for layout, circuit design, logic design, and functional design, and the use of VLSI circuits in the system design. A design project is required. Prereq: EE 581 and EE 461G or consent of instructor.

EE 685 DIGITAL COMPUTER STRUCTURE. (3)

Study of fundamental concepts in digital computer system structure and design. Topics include: computer system modeling based on instruction set processor (ISP) and processor-memory-switch (PMS) models, design and algorithms for ALU, processor, control unit and memory system. Special topics include floating-point arithmetic, cache design, pipeline design technologies, and parallel computer architectures. Prereq: EE 380 and EE 581 or consent of instructor.

EE 686 ADVANCED COMPUTER ARCHITECTURE DESIGN. (3)

A study of current diverse advanced architectures such as microprogrammed, parallel, array and vector, networked, and distributed architectures; applications and example systems employing these architectures; matching applications to architectures; consideration of architectures of the future. Prereq: EE 685.

#EE 698 SPEC. TOPICS MULTI-INST (Subtitle required). (3)

This course covers advanced topics on various aspects of electrical engineering, and is a template for courses to be shared among multi-institutions via distance learning technologies.

EE 699 TOPICS IN ELECTRICAL ENGINEERING (Subtitle required). (3)

A detailed study of a topic of current interest in electrical engineering. May be repeated to a maximum of six credits, but only three credits may be earned under the same subtitle. A particular topic may be offered at most twice under the EE 699 number. Prereq: Consent of instructor.

EE 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EE 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EE 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EE 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

EE 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

EE 780 ADVANCED PRACTICE IN ELECTRICAL AND COMPUTER ENGINEERING. (1-3)

Apply advanced training in electrical/computer engineering to solve complex practical problems through analysis, design, implementation, experiments, and/or developments subject to approval of the course instructor. This course may be repeated for a maximum of six credit hours in combination with EE 783. Prereq: 18 hours of graduate courses.

EE 783 SPECIAL PROBLEMS IN ELECTRICAL ENGINEERING. (1-3)

Open to graduate students only. Individual work on an assignment approved by the chairperson of the department. May be repeated to a maximum of nine credits.

EE 784 RESEARCH PROJECT IN ELECTRICAL ENGINEERING. (3)

Individual study related to a special research project supervised by the student's advisor. A final written report on the project is required. This course is open only to and required by students pursuing the MSEE degree with a non-thesis option (Plan B). The course cannot satisfy part of the required 30 hours of course work for Plan B. Prereq: Approval of student's MSEE advisor.

EE 790 RESEARCH IN ELECTRICAL ENGINEERING. (1-9)
Research in any field of electrical and/or computer engineering subject to approval of the Director of Graduate Studies. This course can be taken prior to the qualifying examination, but will not count for pre-qualifying examination residency credit. This course may be repeated to a maximum of 18 credit hours. Prereq: Consent of DGS.

EES Earth and Environmental Sciences

EES 110 ENDANGERED PLANET: AN INTRODUCTION TO ENVIRONMENTAL GEOLOGY. (3)

An introductory course that applies basic geological concepts to current environmental issues including the availability and use of water and soil resources, pollution causes, effects and solutions, and causes and prediction of environmental hazards including floods, landslides, subsidence, earthquakes and volcanoes.

EES 120 SUSTAINABLE PLANET: THE GEOLOGY OF NATURAL RESOURCES. (3)

An introduction to the geologic and societal controls that govern the distribution and cost of using geologic resources: minerals, soils, and energy and industrial materials. Topics include the geological processes responsible for forming these resources, controls on their distribution, quality and abundance, economic factors that drive their recovery, and the legal/political arena in which we attempt to utilize them.

EES 130 DINOSAURS AND DISASTERS. (3)

More than 65 million years ago, dinosaurs and their kin dominated the earth and relegated our mammalian ancestors to positions of unimportance for nearly 155 million years. This course traces the history of dinosaurs from early vertebrate ancestors to their final extinction and surveys the evolutionary, paleogeographic, environmental, and possible extraterrestrial causes for the rise to dominance and sudden fall. Along the way and afterwards, dinosaur interactions with other organisms and the environment, as well as their indirect influence on mammals, particularly on the much later evolution of humankind, will be examined.

EES 150 EARTHQUAKES AND VOLCANOES. (3)

An introduction to earthquakes and volcanoes through theory, active learning assignments, and case studies. Using the basic principles of plate tectonics, students will learn why, where and how earthquakes and volcanoes occur. The hazards associated with earthquakes and volcanic eruptions will be discussed, as well as their societal implications in both the United States and developing world. Earthquake and volcanic hazard mitigation techniques will be addressed. In addition, earthquake hazards in the central United States will be discussed.

***EES 151 QUANTITATIVE PLANET.** (3)

A basic problem solving approach to quantifying and predicting how Earth changes through time. Involves application of math skills of sufficient level for UK admission. Satisfies the UK Core Quantitative Foundations requirement; no prerequisites.

EES 155 EARTHQUAKES AND QUANTITATIVE REASONING. (3)

Earthquake phenomena will be introduced in a manner that will allow students to learn why, where, and how earthquakes occur using elements of fundamental topics in algebra and trigonometry. These quantitative foundations will be used to investigate the origins and hazards associated with earthquakes, as well as their societal implications in both the United States and developing world. Students will often work in small groups to increase confidence in orally communicating their quantitative thinking and defending their logic, as well as providing an opportunity to consider alternative problem solving strategies.

EES 160 GEOLOGY FOR TEACHERS. (3)

The basic principles of geologic processes, materials, and history with primary emphasis on inquiry-based laboratory and field activities. The course is designed in conjunction with PHY 160 to provide basic concepts of earth science, astronomy and physics appropriate for elementary and middle school teachers. Both courses are taught with an emphasis on inquiry-based, laboratory activities. Lecture, two hours per week; laboratory, three hours per week. Not available for credit to students who have received credit for EES 220.

EES 170 BLUE PLANET: INTRODUCTION TO OCEANOGRAPHY. (3)

Survey of oceanography, including the geologic evolution of the ocean floor; composition and dynamics of ocean water; interaction of lithosphere with hydrosphere; ocean-atmosphere interaction and oceanic controls on climate dynamics; marine life and ecosystems; impact of human activity on marine ecosystems.

EES 180 GEOLOGY OF THE NATIONAL PARKS. (3)

The American system of national parks and monuments provides a natural and exciting basis for learning about geology, the scientific study of the Earth. These spectacular, diverse natural classrooms will be used to uncover the origin and variety of Earth materials, probe the dynamic processes that have produced and continue to modify internal and surficial environments over geologic time, critically examine the effects of changing patterns of land use on the natural environment, and recount the conservation efforts that have preserved these unique natural environments for future generations. The course includes a required, two-day (Saturday-Sunday) field trip to Mammoth Cave National Park.

EES 185 QUANTIFYING THE BLUEGRASS WATER SUPPLY. (3)

This course develops the ability to locate and identify data, critically evaluate the data, develop probabilistic models, and present the results of their research. Geology provides important information on the origins of natural resources and the amounts available for exploitation and

use. Course focuses on the issues surrounding the water supply and demand in the central Kentucky Bluegrass region, and the impact of global climate change.

EES 220 PRINCIPLES OF PHYSICAL GEOLOGY. (4)

How the Earth Works: an integrated course in physical geology, covering the physical, chemical and biological processes that combine to produce geological processes. Attention is focused on plate tectonics, earth surface processes, and properties and formation of earth materials. Lab exercises emphasize identification and interpretation of geologic materials and maps. Lecture/Discussion, three hours per week; laboratory, three hours per week.

EES 230 FUNDAMENTALS OF GEOLOGY I. (3)

Field and laboratory methods for identification and description of rocks and minerals with emphasis on sedimentary rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, three hours per week. Eight days in the field. Prereq: EES 220.

EES 235 FUNDAMENTALS OF GEOLOGY II. (3)

Laboratory and field methods for identification and description of rocks and minerals with emphasis on igneous and metamorphic rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, four hours per week. Four days in the field. Prereq: EES 220 and 230. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

EES 295 GEOSCIENCE ORIENTATION. (1)

Survey of geoscience disciplines and post-baccalaureate career options for Geology majors. Introduction to the range of geoscience research approaches and means of dissemination of geoscience information. Guest speakers from industry, government, and academia will discuss career issues specific to geology, including consideration of appropriate educational preparation for potential career paths. Pass/Fail only. Prereq: EES 220 and sophomore standing.

EES 310 EXPLORATIONS OF THE SOLAR SYSTEM. (3)

Fundamental and current topics in the space exploration of our solar system. Topics and examples of themes include: What is a planet; critical evaluation of the evidence for the heliocentric system; electromagnetic waves; the threat of asteroid impact; critical evaluation of the possibilities of extra-terrestrial life; critical evaluation of the evidence for climate change; and other topical items based on the results of on-going space missions. Prereq: Any two university science/math courses or completion of one and concurrent enrollment in another.

EES 323 FIELDWORK IN REGIONAL GEOLOGY. (6)

Geologic mapping in the field for a six-week period. Description, measurement, and mapping of a wide variety of rocks and structures, and analysis of geologic events in mountainous regions of the Rockies or Appalachians. Includes practice in writing geologic field reports. Offered only during the summer session. At least 40 hours of field-related work per week. Special fee. Prereq: EES 230 and EES 235.

EES 341 LANDFORMS. (3)

A study of the origin and distribution of landforms. Lecture, three hours per week. (Same as GEO 351.)

EES 345 PALEOCLIMATOLOGY: THE SCIENCE. (3)

This course focuses on the science behind our understanding of how our planet's climate has changed over time, in particular from 100 million years ago to the present. The most significant processes, astronomical, geological, oceanographic, and atmospheric, are examined with an emphasis on the broad scales of time and space over which they operate, and drive climatic change. Proxy data records are defined in the context of how they record climatic data, and how we "read" them to learn the climatic history they store. Finally, the course brings us into the historical age, where data stores on climate change are the most diverse, but shortest in duration. The ultimate goal is for students to understand how we know what we know about Earth's past climatic changes, so that we can formulate informed strategies moving forward to mitigate our own species' impact on global climate.

EES 350 REGIONAL HISTORICAL GEOLOGY. (3)

Integration of basic rock types, geologic structures, geomorphology, and natural resources in the context of geologic history of the major regions of North America. Global plate tectonics as a framework for evolution of the North American continent. Prereq: EES 230.

EES 360 MINERALOGY. (4)

The study of mineral structure and composition, and mineral classification through crystallographic and crystal chemical techniques. Laboratory work includes study of minerals via crystallography, X-ray diffraction, mineral chemical analysis, and optical petrographic techniques. Lecture, three hours per week; laboratory, three hours per week. Prereq: CHE 105 and EES 220. Prereq or concur: EES 230 or EES 235.

EES 385 HYDROLOGY AND WATER RESOURCES. (3)

The occurrence, movement, and quality of fresh water in the water cycle, including environmental problems and possible solutions. Case studies are explored through readings, videos, and required field trips. Prereq: EES 220.

EES 395 SPECIAL PROBLEMS IN GEOLOGY. (1-3)

Individual work on a special problem in geology. Report required. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EES 399 WORK EXPERIENCE IN GEOLOGICAL SCIENCES. (1-6)

Professional-level, pre-planned learning experience in geological sciences in the work place under the supervision of a faculty member. The student will complete work of the type done by professional geoscientists in the same setting. May be repeated to a maximum of six credits. Pass/fail only. Prereq: Approval of learning contract by faculty supervisor, director of undergraduate studies, and department chair.

EES 401G INVERTEBRATE PALEOBIOLOGY AND EVOLUTION. (3)

Basic ecologic and evolutionary framework of common fossil invertebrate taxa. Major principles of paleontology, ecology, systematics, and evolution; and the use of fossils in paleoecology and biostratigraphy. Laboratory work in classification of common fossils. Lecture, two hours; laboratory, three hours per week. Prereq: EES 102/112.

EES 420G STRUCTURAL GEOLOGY. (4)

An introduction to earth structures. Advanced geologic map interpretation. Prereq: EES 230.

EES 450G SEDIMENTARY GEOLOGY. (4)

Basic principles and concepts of stratigraphy and sedimentation. Lithologic correlation and the interpretation of geologic history and paleogeography. Field and laboratory analysis of sedimentary rocks including megascopic and microscopic methods. Lecture, three hours per week; laboratory, three hours per week. Prereq: EES 230 and EES 360.

EES 461 IGNEOUS AND METAMORPHIC PETROLOGY. (4)

Classification and origins of the common igneous and metamorphic rocks. Lecture material will emphasize the mineralogical, chemical, and physical equilibria within the earth. Laboratory topics will stress hand-specimen and microscopic petrography. Lecture, three hours; laboratory, three hours per week. Prereq: EES 230 and 235 and EES 360. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

EES 480 ADVANCED TOPICS IN GEOLOGICAL SCIENCES (Subtitle Required). (1-6)

Advanced topical course in the geological sciences. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor.

EES 490 EARTH DYNAMICS. (3)

Basic planetary changes through geologic time, including continental drift, formation of supercontinents, paleoclimate, and the growth of the earth's crust. Students will be required to take the Fundamentals component of the ASBOG professional geologist certification exam (fee required). Prereq: Senior standing with at least 30 credits in a Geological Sciences curriculum.

EES 511 PETROLEUM GEOLOGY. (3)

Survey of the origin, chemical composition, occurrence in the context of stratigraphy, structure, and reservoir types of natural hydrocarbons; exploration methods and production techniques; environmental impacts of exploration and production. Prereq: EES 450G, EES 420G, or equivalent, or consent of instructor.

EES 530 LOW TEMPERATURE GEOCHEMISTRY. (3)

An introduction to sedimentary and environmental geochemistry, including carbonate equilibria, coal and petroleum geochemistry, and the geochemistry of aqueous contaminants. Prereq: EES 360, MA 114, or consent of instructor.

EES 550 FUNDAMENTAL GEOPHYSICS. (3)

Survey of active geophysical measurements and passive geophysical observations and their relation to Earth's structure and composition. Investigation of the relationship between Earth's elastic, potentiometric, and thermodynamic properties and traditional geophysical methods for measurement (e.g., gravity, magnetics, seismic, and heat flow). Material will help students improve their quantitative problem-solving abilities, but will also emphasize the visual learning skills commonly developed in the broader geology curricula. Prereq: MA 113, PHY 211 or 213, or consent of instructor. (MA 114 suggested).

EES 555 STRATIGRAPHY. (3)

Principles of stratigraphy, depositional systems, sequence stratigraphy, and tectonic framework of sedimentation. Prereq: EES 450G.

EES 560 GEOPHYSICAL FIELD METHODS. (4)

An introduction to the principles and applications of geophysics in the field. The course will present the geophysical methods used to assess the configuration and physical properties of the Earth's subsurface, as well as to explore for natural resources. Designed for geology students (upper-division or first-year graduate) and other science or engineering students without prior formal instruction in geophysics. To understand the discussions and exercises, the student should be familiar with first-year calculus and physics. Prereq: MA 113, 114; PHY 211, 213 or PHY 231, 232 or consent of instructor. MA 114, PHY 213 or PHY 232 may be taken concurrently.

EES 570 SEMINAR IN GEOLOGICAL SCIENCES (Subtitle required). (1)

A general seminar in a broad range of topics in the geological sciences. May be repeated to a maximum of six credits under different subtitles. Prereq: Senior or graduate standing in Geological Sciences.

EES 585 HYDROGEOLOGY. (3)

A study of the physical aspects of groundwater, including regional flow, well hydraulics, and computer simulation. Prereq: EES 220 and MA 113 or 123.

EES 610 TOPICS IN HYDROGEOLOGY AND SURFICIAL PROCESSES (Subtitle required). (3)

Study of topics in hydrogeology and surficial processes. Recent topics include: models of surface processes; contaminant hydrogeology; modeling in hydrogeology. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 620 TECTONICS. (3)

A study of the structural features of the earth's crust with an analysis of the mechanics involved. Prereq: PHY 211, 213; EES 420G.

EES 624 ADVANCED STRUCTURAL GEOLOGY. (3)

An advanced study of the theory, principles, and application of structural geology. Prereq: EES 420G.

EES 625 TOPICS IN GEOPHYSICS. (3)

Special topics in geophysics such as advanced seismology, seismic processing, seismic stratigraphy, earthquake seismology, geologic hazards, gravity fields, magnetic fields, heat flow, geodynamics, planetary geophysics, quantitative methods, inverse methods, geophysical modeling. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 626 GRAVITY AND MAGNETIC METHODS. (3)

Theory and practice of the gravity and magnetic methods of geophysical exploration as applied to geological, archeological, environmental, and planetary exploration problems. The course includes principles of instrumentation, surveying, reduction of anomalies, and their interpretation. Prereq: MA 113, MA 114; PHY 211 and PHY 213 or PHY 231 and PHY 232; or consent of instructor. MA 114 and PHY 213 or 232 may be taken concurrently.

EES 645 TOPICS IN PETROLOGY AND GEOCHEMISTRY (Subtitle required). (3)

Study of selected topics in petrology and geochemistry. Past topics include: Carbonate Petrology; Igneous Petrology; Organic Petrology; Isotope Geochemistry. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 652 TECTONICS AND STRATIGRAPHY. (3)

Use of stratigraphic data in the interpretation of tectonic framework of sedimentation, tectonic controls on paleogeography, and interactions between sedimentary rocks and geologic structures. Prereq: EES 420G and 450G or equivalent.

EES 670 EXPLORATION SEISMOLOGY. (3)

Advanced study of the acquisition, processing and interpretation of reflected and refracted seismic waves in layered media with applications to energy and geotechnical exploration. Prereq: EES 550 or EES 560 or consent of instructor.

EES 675 EARTHQUAKE SEISMOLOGY. (3)

A study of the principles and methods of earthquake and engineering seismology. Specifically, the course will focus on the concepts of the seismic source, path, and site effects phenomena, as well as the practical aspects of seismic hazard assessment. Prereq: EES 550 or consent of instructor.

EES 685 GROUNDWATER MODELING. (3)

This course teaches the basic concepts in groundwater modeling and provides basic exposure to standard modeling software. Prereq: EES 585 Hydrogeology; or consent of instructor.

#EES 695 SCIENTIFIC COMMUNICATION. (3)

A professional development course focused on scientific communication in the geosciences. Prereq: Graduate student in Geological Sciences or related field.

EES 715 COAL GEOLOGY SEMINAR. (2)

Seminar discussion and presentation of current work in coal geology from current literature or ongoing research. May be repeated to a maximum of eight credits. Prereq: EES 515 or 617 or consent of instructor.

EES 730 SEMINAR IN TECTONICS AND STRATIGRAPHY (Subtitle required). (3)

Seminar in Tectonics and Stratigraphy. Past topics include: Tectonics and Stratigraphy of the Appalachians; Tectonics and Sedimentation; Basin Analysis. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 735 TOPICS IN STRUCTURE AND TECTONICS. (3)

Seminar or new course offering in Structure and Tectonics. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 741 ENVIRONMENTAL CLAY MINERALOGY. (3)

A comprehensive study of the crystal structures of clay minerals commonly found in soils and sediments. Lecture and discussion, two hours; laboratory, three hours. Prereq: EES 360 or consent of instructor. (Same as PLS 741.)

EES 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EES 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EES 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EES 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

EES 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

EES 782 INDIVIDUAL WORK IN GEOLOGY. (1-3)

Problems involving independent laboratory and/or library study conforming to the student's special interest under the direction of an appropriate staff member having proficiency in the area selected. May be repeated to a maximum of nine credits. Prereq: Geology major with graduate standing.

EES 790 RESEARCH IN GEOLOGICAL SCIENCES. (0-6)

Research in the geological sciences. May be repeated to a maximum of twelve credits. Prereq: Approval of instructor and Director of Graduate Studies.

EGR Engineering

EGR 101 ENGINEERING EXPLORATION I. (1)

Engineering Exploration I introduces students to the engineering and computer science professions, College of Engineering degree programs, and opportunities for career path exploration. Topics and assignments include study skills, team development, ethics, problem solving and basic engineering tools for modeling, analysis and visualization. Open to students enrolled in the College of Engineering. Students who received credit for EGR 112 are not eligible for EGR 101. Prereq: Enrolled in the College of Engineering or MA ACT of at least 23 or equivalent. Students who received credit for EGR 112 are not eligible for EGR 101.

EGR 102 FUNDAMENTALS OF ENGINEERING COMPUTING. (2)

Fundamentals of Engineering Computing introduces students to the practice and principles of computer programming and computational problem solving. Students will engage in hands-on project-based problem solving using modern computer software and hardware, with a particular emphasis on problems and techniques commonly appearing in various domains of engineering. Open to students enrolled in the College of Engineering. Prereq: Enrolled in the College of Engineering or MA ACT of at least 23 or equivalent.

***EGR 103 ENGINEERING EXPLORATION II. (2)**

Engineering Exploration II focuses on a semester long engineering design project with students working in teams to apply the skills and tools introduced in EGR 101 or EGR 112 for transfer students and EGR 102. Topics and assignments include more in depth exploration of engineering tools for modeling, analysis, visualization, programming, hardware interfacing, team development, documentation and communication. Students gain experience in project management, identifying constraints, iteration and technical report writing. Prereq: EGR 102 or equivalent; prereq or concur MA 113; prereq or concur PHY 231; prereq or concur; CHE 105.

EGR 111 SUCCESS IN ENGINEERING. (1)

EGR 111 reserved for Freshman College of Engineering students who have been admitted into the Engineering Living Learning Community. For registration information contact 859-257-0552.

EGR 112 ENGINEERING EXPLORATION FOR TRANSFER STUDENTS. (1)

Engineering Exploration For Transfer Students introduces transfer students to the engineering and computer science professions using multidisciplinary and societally relevant content. Topics and assignments will focus on skills development for engineering academic success, team development, engineering ethics, problem solving and basic engineering tools for modeling, analysis and visualization. In addition, the students will be introduced to College of Engineering student services and will have opportunities for career path exploration. Open to transfer students enrolled in the College of Engineering. Students who received credit for EGR 101 are not eligible for EGR 112. Prereq: Enrolled in the College of Engineering or MA ACT of at least 23 or equivalent. Students who received credit for EGR 101 are not eligible for EGR 112.

EGR 120 TECHNOLOGY: BLESSING OR CURSE. (3)

Technology has created the world in which we live. Our wealth, our economy, and the way we live each day have come about due to the emergence of technology over the centuries. The course will examine the relationship between technology and society; how technology influenced the development of society, how society influenced the development of technology, and how people in society view technology. Prereq: Acceptance into SEAM Program.

#EGR 190 UNDERSTANDING LEADERSHIP. (1)

To introduce students to the principles of leadership, common strategies used by leaders, and communication techniques that are vital to becoming a dynamic leader. This course is only available to students admit to the Scholars in Engineering And Management (SEAM) honors program.

#EGR 196 ENGINEERING PRACTICE, CULTURE, AND LANGUAGE IN GERMANY. (3)

This course is part of a study abroad program conducted in Germany. Students will visit Engineering companies and cultural sites in Germany, and better understand engineering practices, training and culture of Germany and its engineering companies. Students will conduct background research on the companies and sites they visit. Students will also take a German language and culture course as part of this course, which will teach basic German language, but also customs, culture and history of Germany and its residents.

EGR 198 PLTW CREDIT. (1-6)

This course grants college credit to Project Lead the Way Pathway to Engineering graduates from PLTW Certified high schools. University of Kentucky Engineering students may earn one college credit for each of the PLTW Pathway to Engineering courses [IED, POE, DE, CIM, CSE, CEA, ES, AE] completed while enrolled in secondary school(s), up to a maximum of six UK College of Engineering credits. Three of these credits may be used in approved engineering majors as support electives. Additional credits past three can be used for fulfill free electives in approved engineering majors. Criteria to obtain the credit include: • Graduation from a PLTW Certified secondary school. • Completing each PLTW course with an average of B. • Scoring in the 6th Stanine or above on the End-of-Course (EOC) PLTW exam. • Enrolling in the UK College of Engineering. • Paying any designated University of Kentucky tuition and fees. Prereq: Process to obtain the credit: • be a graduate of a PLTW Certified secondary school; • received a B (or better) in the PLTW course in high school; • scored in the 6th Stanine or above on the End-of-Course (EOC) PLTW exam for that course; • be enrolled in the UK College of Engineering; and • pay any designated University of Kentucky tuition and fees.

EGR 199 TOPICS IN ENGINEERING: TITLE TO BE ASSIGNED. (1-6)

An experimental, topical or interdisciplinary course devoted to special topics of interest in engineering. Course offerings must be approved by the Deans and Chairpersons of all cosponsoring academic units. A particular title may only be offered twice under the EGR 199 number. Students may not repeat this course under the same title. May be repeated to a maximum of twelve hours. Prereq: Enrollment in the College of Engineering, or permission of the instructor.

EGR 201 LITERATURE, TECHNOLOGY, AND CULTURE. (3)

EGR 201 focuses on human endeavors in science as refracted through literature. The course brings together two distinct traditions: the study of literature and the practice of technical communication. The course operates from several assumptions: (1) that imaginative treatments of technological subjects offer powerful, useful, and even needed critical perspectives, (2) that authors and engineers both work from written conventions – genres and other tropes – that frame knowledge, (3) that writers benefit from scrutiny of generic conventions, and (4) that creative play with conventional literary genres can inspire engineers to “think outside the box,” to think creatively about their own designs and projects and about innovative ways of presenting their work. Prereq: Students must have successfully completed the first course in the General Education Communication sequence (or its transfer equivalent) and must have completed at least 30 hours of course work.

EGR 240 GLOBAL ENERGY ISSUES. (3)

This is a cross-disciplinary course open to all majors. This course critically examines issues associated with the technical, economic, societal, environmental, and geopolitical aspects of energy. The course is taught through lectures, discussions, and invited speakers.

EGR 390 EXPERIENTIAL LEARNING IN ENGINEERING OR COMPUTER SCIENCE. (0-3)

Project or activity led by an engineering faculty member, designed to provide students the opportunity to apply engineering principles in the context of real-world and multi-disciplinary community-based problems. May be repeated to a maximum of three credits. Prereq: Engineering standing.

EGR 394 BS/MBA SEMINAR. (0-1)

Participation in team development exercises, seminars, company visits, and activities associated with the BS/MBA program. Prereq: Admission to the BS/MBA program.

EGR 399 COOPERATIVE ENGINEERING EDUCATION. (1)

A course designed for undergraduate students who, through the engineering cooperative education office, secure full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and may be repeated on a rotational basis to a maximum of six credit hours. Prereq: Approval of Coordinator of Cooperative Engineering Education.

EGR 401 CAREER PLANNING/EMPLOYMENT SEMINAR. (1)

This course will introduce students to the various elements involved in obtaining a position in their chosen field of engineering. Prereq: Engineering standing.

#EGR 505 PROJECT LEAD THE WAY (Subtitle required). (1-6)

Project Lead The Way is the nation's leading provider of science, technology, engineering, and math (STEM) programs. Through world-class K-12 curriculum, high-quality teacher professional development, and outstanding partnerships, PLTW is helping students develop the skills needed to succeed in the global economy. To be an educator in this program teacher must successfully complete a core training session. Core Training is an intensive program intended to give Instructors an overview of the PLTW course they will be teaching. Class meets from 8am to 5pm each day, with an hour for lunch. Attendance is required at all sessions. During the training, participants complete a portfolio in order to be certified to teach the course and receive credit. Prereq: Completion of a bachelors or be registered as a junior or higher at a Kentucky university.

#EGR 523 CONCEPTS, ASSESSMENT TOOLS AND METHODS IN SUSTAINABLE POWER AND ENERGY. (3)

A multidisciplinary course presenting an overview of key topics in sustainability and environmental impact assessment for engineers. Topics will include assessment of current and future energy systems, renewable and conventional energy technologies, supply chain management, sustainability metrics, energy assessment tools, environmental impact assessment and life cycle assessment. Topics will be presented and their attributes described within a framework that aids in evaluation and analysis of energy technology systems and designs in the context of political, social, economic, and environmental goals. Prereq: Engineering Standing and Senior Classification or Consent of Instructor. (Same as CME/MFS 523.)

EGR 537 NUMERICAL ANALYSIS. (3)

Floating point arithmetic. Direct methods for the solution of systems of linear algebraic equations. Polynomial and piecewise polynomial approximation, orthogonal polynomials. Numerical integration: Newton Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of commonly occurring problems in science and engineering. Prereq: CS/MA 321 or equivalent, or graduate standing or consent of instructor. Knowledge of a procedural computer language is required. (Same as CS/MA 537.)

EGR 540 POWER ECONOMICS AND PUBLIC POLICY. (3)

This course provides an introduction to the theories and industry practices related to power economics and power public policy. Topics studied include: U.S. power markets, electric utility business regulation, electric utility environmental regulation, public policy theory, political science theory, development of new electric generation facilities, utility business operation, engineering influence on public policy, and engineering economic analysis. Prereq: Engineering standing, graduate standing, or consent of instructor.

EGR 542 ELECTRIC POWER GENERATION TECHNOLOGIES. (3)

Overview of technologies used for generating electricity from location, recovery, transportation and storage of fuel to the types of technologies used to convert the fuel to electricity. Included is a discussion of the advantages and disadvantages of each technology and how they must adapt to be viable in the future. Technologies covered include coal, natural gas, nuclear, biomass, wind, solar and advanced technologies. Prereq: Engineering standing or consent of instructor. (Same as CME 542.)

#EGR 543 SOLAR CELL DEVICES AND SYSTEMS FOR ELECTRICAL ENERGY GENERATION. (3)

Physics of photovoltaic (PV) devices, emerging technologies, design of PV cells and systems, electronic components for signal conditioning, integration, installation, performance evaluation and economic issues related to PV systems. Prereq: EE 211 or EE 305 and Engineering Standing, or consent of instructor. (Same as BAE 543/EE 543.)

EGR 546 ELECTRIC POWER SYSTEM FUNDAMENTALS. (3)

Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent. (Same as EE 546.)

#EGR 549 POWER AND ENERGY EXPERIENCES. (3)

This course will provide unique experiences through visits to a variety of energy-related sites and presentations from topical experts. The course begins with preparations through readings, videos, and assignments. The course then has a week-long tour of selected energy related sites, which may include: pumped storage site, coal mine, coal- and gas-fired and nuclear power plants, power operations center, wind farm, hydroelectric generation, landfill gas site, smart grid demonstration center, solar farm, high efficiency building, etc. in the region. More than simply tours, these visits include presentations by industry technical personnel. Students prepare for these visits in advance through preliminary assignments, and students then do a written summary and reflection journal on these visits afterwards. This Course may not be used to satisfy degree requirements if credit is earned in EGR 649. Prereq: EGR 240 or EGR 542 or EGR 546, or consent of the instructor. Due to the nature of this class, enrollment is limited. Students pursuing either the Undergraduate Certificate or Graduate Certificate in Power and Energy may be given preference in enrollment.

EGR 553 ENVIRONMENTAL CONSEQUENCES OF ENERGY PRODUCTION. (3)

This course will introduce the relationship of energy, pollution control technology, and the environment. The scientific and engineering aspects of energy production are examined and the associated environmental problems and control technologies are discussed. Prereq: CHE 105, MA 214, and engineering standing or consent of instructor. (Same as CE 553.)

EGR 599 TOPICS IN ENGINEERING (Subtitle required). (1-3)

An experimental, interdisciplinary course devoted to a topic of interest to students in several departments of the college. Only three credits may be earned under the same title; students may register for more than one section each semester. A particular topic may be offered at most three times under the EGR 599 number. Prereq: Variable, given when topic is identified.

EGR 601 INTRODUCTION TO RESEARCH IN ENGINEERING. (3)

Introduction to scientific research, applied to engineering. Characterization of scientific research, the definition of a research project, and methodology in research. Discussion includes management, organization and execution of a research project, scientific writing, information related to research ethics and data management, national policies, and intellectual properties.

Case studies. Introduction to share research tools such as high performance computing or scanning electron microscopy. Prereq: Graduate standing or consent of instructor.

EGR 611 BOUNDARY ELEMENT METHODS IN ENGINEERING. (3)

Introduction of boundary element methods for use in solving common engineering equations, such as the Laplace equation, the Poisson equation, the wave equation, and the diffusion equation. Both the theoretical and numerical aspects of the boundary element technique are presented. Application areas include heat conduction, potential flow problems, acoustic wave propagation, general diffusion, and stress analysis. Prereq: EGR 537 or consent of instructor. (Same as ME 611.)

EGR 649 POWER AND ENERGY EXPERIENCES. (3)

This course will provide unique experiences through visits to a variety of energy-related sites and presentations from topical experts. The course begins with preparations through readings, videos, and assignments. The course then has a week-long tour of selected energy related sites, which may include: pumped storage site, coal mine, coal- and gas-fired and nuclear power plants, power operations center, wind farm, hydroelectric generation, landfill gas site, smart grid demonstration center, solar farm, high efficiency building, etc. in the region. More than simply tours, these visits include presentations by industry technical personnel. Students prepare for these visits in advance through preliminary assignments, and students then do a written summary and reflection journal on these visits afterwards. This course may not be used to satisfy degree requirements if credit is earned in EGR 549. Prereq: EGR 542 or EGR 546, or consent of the instructor. Due to the nature of this class, enrollment is limited. Students pursuing the Graduate Certificate in Power and Energy may be given preference in enrollment.

ELS Teacher Leadership

ELS 600 LEADERSHIP IN LEARNING-CENTERED SCHOOLS. (3)

ELS 600 is a study of school leadership responsibilities assumed by teachers working collaboratively with colleagues and principals to create learning-centered schools that assure all students learn at their highest potential.

ELS 601 BUILDING A PROFESSIONAL LEADERSHIP COMMUNITY. (1)

ELS 601 is the study of characteristics of school-based professional learning communities with emphasis on shared vision, values and goals, collective inquiry, collaborative teams, action orientation for continuous improvement of student-learning.

ELS 602 LEADERSHIP ROLES IN PROFESSIONAL LEADERSHIP COMMUNITIES. (1)

ELS 602 is the study of professional learning communities with emphasis on essential roles of collaborative leaders (i.e., principals, teachers, students, parents) in creating and sustaining continuous improvement of student-learning.

ELS 603 LEADERSHIP FOR STUDENT LEARNING. (1)

ELS 603 is the study of professional learning communities with emphasis on understanding strategies used by collaborative leaders to ensure all students learn at high levels, with emphasis on establishing instructional priorities, building capacity, planning, data analysis, resource allocation, monitoring and communicating with stakeholders.

ELS 604 LEADERSHIP IN PROFESSIONAL LEARNING COMMUNITIES. (3)

ELS 604 is an introduction to the study of professional learning communities and collaborative leadership roles intended to bring about significant school changes that contribute to all students' learning at high levels.

ELS 605 LEGAL RIGHTS AND RESPONSIBILITIES OF STUDENTS. (1)

Students have both legal rights and responsibilities within the school environment, which teachers must both respect and enforce. ELS 605 provides an overview of rights and responsibilities of students within classrooms (e.g., student expression, discipline, harassment, discrimination, attendance, instruction and testing, privacy).

ELS 606 LEGAL RIGHTS AND RESPONSIBILITIES OF TEACHERS. (1)

Teachers are both primary recipients and implementers of educational laws. Given this front line position, a wealth of legal rights and responsibilities are bestowed on teachers. Likewise, teachers are confronted with myriad policies and procedures to follow (e.g., certification, employment, collective bargaining, termination) and with rights to protect (e.g., expression, privacy, discrimination). An overview of these rights and responsibilities for teachers is examined in ELS 606.

ELS 607 TEACHER RESPONSIBILITIES IN SCHOOL-BASED DECISION MAKING. (1)

School-Based Decision Making (SBDM) Councils have been an integral part of school governance since passage of the 1990 Kentucky Educational Reform Act. Role and responsibilities of SBDM Council are examined with focus on how teachers can use their local Council to assure successful school improvement efforts.

ELS 608 SCHOOL LAW AND GOVERNANCE FOR TEACHERS. (3)

ELS 608 is the study of school operations from a legal perspective with particular focus on mandates of the Kentucky Legislature affecting students, teachers, and schools. Teachers are introduced to the governing regulations of schools to begin to understand how schools and classrooms legally operate and their rights and responsibilities, as well as the rights and responsibilities of their students, in the schooling enterprise.

ELS 609 TECHNOLOGY LEADERSHIP IN SCHOOLS. (1)

The Information Revolution fundamentally changed the way schools operate at the beginning of the 21st century—not only has technology facilitated improved school operations, but also is radically changing how students learn inside and outside of the classroom. ELS 609 emphasizes the role of the teacher leader in improving the school-wide technology integration and use of technology beyond the classroom to link people and resources to integrate more innovation into the school environment.

ELS 610 DISTRIBUTED LEADERSHIP IN SCHOOLS. (1)

ELS 610 is the study of distributed leadership research and related teacher leadership roles and responsibilities through readings, assignments, and collegial discussion. Emphasis placed on building connections between course concepts and activities and students' professional work.

ELS 611 CURRENT ISSUES FOR EDUCATION LEADERSHIP. (1)

ELS 611 is a study of selected issues that face school leaders and reflect differences among community citizens about who schools should serve (equity and justice), what curriculum should be taught (knowledge and literacy), and how schools should be organized and governed (environment).

ELS 612 LEADERSHIP FOR TECHNOLOGY AND INNOVATION. (3)

Successful implementation of innovation in schools requires broad-based leadership. ELS 612 (a) highlights current issues provoking educational innovation nationally and locally, (b) explores how innovations require students and teachers to become technologically competent, and (c) explores distributed leadership research and concepts for improving leadership practice through distributed roles and responsibilities for teacher leaders and other stakeholders.

ELS 613 LEADERSHIP IN THE PUBLIC CONTEXT OF EDUCATION. (1)

ELS 613 is a study of the role of teacher leader whose influence and responsibility transcends school walls to include community and civic leadership.

ELS 614 PARTNERSHIPS FOR CLOSING ACHIEVEMENT GAPS. (1)

ELS 614 is a study of strategies that teacher leaders may utilize for mobilizing school, community, and family resources toward eliminating achievement gaps among students.

ELS 615 LEADERSHIP FOR RESPONSE TO INTERVENTION CLASSROOMS. (1)

ELS 615 is a study of roles of teacher leaders in the Response to Intervention (RTI) model, which serves as both a strategy for providing assistance to children having learning difficulty, as well as a method for diagnosing learning disabilities.

ELS 616 LEADERSHIP FOR SCHOOL AS INCLUSIVE COMMUNITY. (3)

ELS 616 is a study of evolving perspectives of the purposes of public education, leadership within and beyond the school building to support family-community partnerships and networks, and leadership to ensure inclusive classrooms. Curriculum includes how diverse personnel ensure school-wide safety.

ELS 617 TEACHER LEADERSHIP FOR INSTRUCTIONAL TEAMS. (1)

ELS 617 is the study of teacher roles and responsibilities within instructional teams at classroom, school, and district levels. Emphasis is placed on concepts and procedures for creating and sustaining instructional teams, designed to support systemic inquiry and school improvement.

ELS 618 INTRODUCTION TO LEADING ACTION RESEARCH FOR SCHOOL RENEWAL. (1)

ELS 618 is the study of teacher roles and responsibilities within instructional teams at classroom, school, and district levels. Emphasis is placed on concepts and procedures for creating and sustaining instructional teams, designed to support systemic inquiry and school improvement.

ELS 619 EVIDENCE-BASED DECISION MAKING. (1)

ELS 619 is the study of teacher roles and responsibilities when analyzing evidence of student outcomes at classroom and school levels and examination of a model and tools for data analysis and team based discussions, reflection, and decision making.

ELS 620 LEADING ACTION RESEARCH IN SCHOOL RENEWAL I. (3)

ELS 620 is the first course in a two-part sequence that presents concepts and procedures for conducting systematic inquiry to investigate phenomena in classrooms and schools to ensure learning excellence. Emphasis is placed on developing a proposal for disciplined inquiry in classrooms or schools that will be conducted in ELS 621, the second course in the sequence. Prereq: Admission to M.Ed. program or consent of instructor.

ELS 621 LEADING ACTION RESEARCH IN SCHOOL RENEWAL II. (3)

ELS 621 is the second course in a two-part sequence in which action research proposed in ELS 620 is conducted. Emphasis is placed on appropriate use of data for making informed decisions about classroom and school practices. Prereq: Successful completion of ELS 620 or consent of instructor.

ELS 624 LEADERSHIP PRACTICUM: MONITORING LEARNING, ASSESSMENT, AND ACCOUNTABILITY. (3)

ELS 624 is a field-based practicum to explore distributed leadership roles and responsibilities for monitoring assessments and accountability results to guide decisions about curricular or instructional modifications. Students work closely with school principal and leadership team at a P-12 school to examine specific site issue and provide recommendations for action. Prereq: Successful completion of ELS 620 or consent of instructor.

ELS 691 LEGAL PERSPECTIVES FOR TEACHERS. (1)

This course introduces legal concerns for public school teachers. It emphasizes legal rights and responsibilities of both teachers and pupils. Course coverage includes an introduction to governance, liability, church and state, instructional issues, student rights, student discipline, student abuse, teacher rights, and teacher discipline.

EM Engineering Mechanics**EM 221 STATICS. (3)**

Study of forces on bodies at rest. Vector algebra; study of force systems; equivalent force systems; distributed forces; internal forces; principles of equilibrium; application to trusses, frames and beams; friction. Prereq or concur: MA 213.

EM 302 MECHANICS OF DEFORMABLE SOLIDS. (3)

A study of stress and strain in deformable solids with application primarily to linear elastic materials: stress and strain transformations; simple tension and compression of axial members; torsion of shafts; bending of beams; combined loading of members; buckling of columns. Prereq: Registration in the College of Engineering or consent of chairperson, and EM 221; prereq or concur: MA 214.

EM 313 DYNAMICS. (3)

Study of the motion of bodies. Kinematics: cartesian and polar coordinate systems; normal and tangential components; translating and rotating reference frames. Kinetics of particles and rigid bodies: laws of motion; work and energy; impulse and momentum. Prereq: Registration in College of Engineering, EM 221; prereq or concur: MA 214.

EMBA Executive Master of Business Administration**EMBA 601 MANAGING PEOPLE. (2)**

This course will address the central question of how to manage and motivate individuals and teams for high performance in today's organizations including the underlying fundamental and powerful concepts in organizations as open systems, individual behavior, group and social processes, and control and leadership. Prereq: Admission to joint EMBA program.

EMBA 602 BUSINESS MODELS FOR QUANTITATIVE ANALYSIS. (2)

This course introduces students to quantitative techniques commonly used to make effective business decisions. It introduces tools and techniques illustrating the application of the techniques for managerial decision making. Prereq: Admission to the joint EMBA program.

EMBA 603 ECONOMICS I. (2)

This course will apply economic theory to managerial decision making and analysis. Traditional tools of microeconomics will be employed to see how they can be used to evaluate practical business problems. Prereq: Admission to the joint EMBA program.

EMBA 604 STRATEGIC ANALYSIS. (2)

This course provides a framework of competitive analysis and competitive advantage upon which functionally oriented courses in the program may build. It provides an overall picture of the analysis activities and decision-making situations facing a company's top management team (i.e., CEOs, general managers, division managers) focusing on top management decisions relating to the external environment and internal issues. It presents practical experience in recognizing what information is important, sifting it for relevance, and employing the knowledge for the competitive benefit of the firm. Prereq: Admission to the joint EMBA program.

EMBA 605 ECONOMICS II. (2)

This course will apply economic theory to managerial decision making and analysis. It will employ many of the traditional tools of microeconomics to see how they can be used to evaluate practical business problems. Markets and market structures will be studied including competitive markets, monopoly and pricing with market power, and oligopoly, rivalry, and strategic behavior. Particular attention will be paid to the strategy of firms in the marketplace. Prereq: Admission to the joint EMBA program.

EMBA 606 FINANCIAL ACCOUNTING. (2)

This course provides an overview of financial accounting information and the role of that information in the economy. It focuses on the recognition and measurement concepts underlying financial accounting, but also covers the mechanics of recording and reporting accounting information to outside parties. The first portion of the course presents an overview of the accrual accounting model, how information is presented and the mechanics of keeping track of financial accounting information. Prereq: Admission to the joint EMBA program.

EMBA 607 BUSINESS INTELLIGENCE. (2)

This course is an introduction to the field of Business Intelligence (BI), a field that encompasses the use of business performance monitoring, querying/reporting, online analytical processing (OLAP), and business analytics, with particular emphasis on the latter. Prereq: Admission to the EMBA program.

EMBA 608 MANAGERIAL ACCOUNTING. (2)

This course reviews the tools needed by managers to plan and control (evaluate) personnel and operations of the firm. It provides a framework for understanding when and why managers need

Course Descriptions

specific types of accounting information to both facilitate their decision making and influence the decisions of their employees. Techniques covered include: product costing, activity-based costing, planning and controlling costs, budgeting, standard cost systems, new production philosophies and analytical techniques for decision making. Prereq: Admission to the EMBA program.

EMBA 609 FINANCIAL MANAGEMENT I. (2)

The goal of this course is to provide an overview of modern corporate financial methods with an emphasis on practical financial decision that financial managers in the real world need to make on a regular basis. Emphasis will be placed on the investment decision (how firms should spend money). This course takes the perspective of a corporate financial manager attempting to pursue strategies that increase shareholder wealth. Prereq: Admission to the EMBA program.

EMBA 610 MARKETING MANAGEMENT I. (2)

This course will help develop the skills, knowledge and experience required to critically solve marketing problems. It will rely on a mixture of lectures, applications, and cases to add well-established and proven marketing concepts and frameworks to your managerial arsenal. The course is intended to be practical and is focused on developing your ability to be an effective manager and decision maker. Prereq: Admission to the EMBA program.

EMBA 611 FINANCIAL MANAGEMENT II. (2)

This course provides an overview of modern corporate financial methods with an emphasis on practical financial decisions that financial managers in the real world need to make on a regular basis. It will emphasize the financing decision (how firms optimally raise money). Topics will include cost of capital, capital structure, valuation, and issuing securities. The course will take the perspective of a corporate financial manager attempting to pursue strategies that increase shareholder wealth. Prereq: Admission to EMBA program.

EMBA 612 MARKETING MANAGEMENT II. (2)

This course provides students with insight into how profitable branding strategies can be created by addressing three important questions: (1) How do you build brand equity? (2) How do you capitalize on brand equity to expand your business? (3) How can brand equity be measured? Prereq: Admission to the EMBA program.

EMBA 613 LEADING ORGANIZATIONS. (2)

In this course, you will discuss theories, empirical studies, and strategies for improving your effectiveness as a leader, all within a framework designed to enhance your learning experience. Experiential learning, projects, case discussion and critical analysis will be used to help you develop an entirely unique viewpoint on what leadership is, how to be a leader. It will help you begin the process of practicing new leadership skills and how to make them habitual. As a result, you will increase your positive impact now and in the future. Prereq: Admission to the EMBA program.

EMBA 614 MANAGING GLOBAL CHALLENGES. (2)

This course will familiarize students with the foundations of the global economy, current trends in the global business environment, and issues facing countries and individual firms (e.g., foreign market entry modes, global supply chain configurations, global new product development, international joint venture formation, and global competitive rivalry). It will introduce the fundamental principles of international economics, discuss positive and negative impacts of globalization on the domestic economy, labor and product markets. Prereq: Admission to the EMBA program.

EMBA 615 OPERATIONS MANAGEMENT. (2)

This course addresses how to design and operate a manufacturing or service company. The underlying fundamental and powerful concepts include (1) design of a system, (2) operations of a system, and (3) measuring and controlling the performance of a system from effectiveness (e.g., quality of a product) and efficiency (e.g., cost of producing a product) viewpoints. Prereq: Admission to the EMBA program.

EMBA 616 CORPORATE ENTREPRENEURSHIP. (2)

This course introduces entrepreneurship in the corporate setting. The difference between individual entrepreneurial activities and corporate entrepreneurial activities is examined. Models of entrepreneurial activities in established organizations are presented. Prereq: Admission to the EMBA program.

EMBA 617 BUSINESS STRATEGY AND PUBLIC POLICY. (2)

This course will examine how public policy decisions are made at the federal and state level and how they influence business decision making. A managerial perspective is used to examine the interface between business and the external political environments in which they operate. Public policies, from tax or trade policies to regulatory policies affecting the environment, intellectual property, human resources and tort liability are discussed. Prereq: Admission to the EMBA program.

EMBA 618 COMPLEX ORGANIZATIONAL CHANGE. (2)

This course examines both the content and process of complex organizational change. The first part of the course is dedicated to content issues, including an introduction to a systems view of organizations and organization structure, an examination of the role of organizational structure in creating competitive advantage, and understanding how structure and strategy need to be aligned within various environmental constraints. The second part of the course focuses on the complexity and intricacies of the change process, including working with internal and external change agents. Prereq: Admission to the EMBA program.

EMBA 619 NEGOTIATIONS AND CONFLICT RESOLUTION. (2)

This course focuses on negotiation skills and making the student a more confident and judicious negotiator. By the conclusion of this course, you will have improved your daily ability to diagnose negotiation situations, strategize and plan upcoming negotiations, and engage in more fruitful negotiations when you are dealing with difficult negotiation partners. Prereq: Admission to the EMBA program.

EMBA 620 STRATEGIC MANAGEMENT. (2)

This course is an integrative capstone course – the only course that challenges students to study and experience sets of multifunctional problems that confront top management. The course requires students to bring together all of their learned functional skills (i.e., accounting, finance, marketing, etc.) and use them to study organizational problems within the context of hands-on-exercises/stimulations, real-world business case studies, and open discussion forums. Prereq: Admission to the EMBA program.

EMBA 650 SPECIAL TOPICS IN BUSINESS ADMINISTRATION (Subtitle required). (2)

This course is designed to illuminate current topics of special interest to executives in today's organizations. May be repeated a maximum of 6 credit hours when taken under separate subtitles. Prereq: Admission to the joint EMBA program.

END Endodontics

***END 820 ANTERIOR ENDODONTICS. (2)**

This is a lecture-laboratory course which is designed to introduce the student to the diagnostic terminology of pulpal and periapical disease and the techniques of endodontics in anterior teeth. Prereq: RSD 812 and RSD 814, or consent of course director.

END 821 CLINICAL ENDODONTICS I. (1)

In this course, students will treat two clinical endodontic cases, one of which shall be a molar. Thirty hours clinic, total. Prereq: END 820.

***END 822 POSTERIOR ENDODONTICS. (2)**

This is a lecture-laboratory course which is designed to introduce the student to the diagnostic terminology of pulpal and periapical disease and the techniques of endodontic in posterior teeth. Prereq: END 820 and RSD 824, or consent of course director.

***END 830 ENDODONTICS II. (1)**

This course concerns the diagnosis and treatment of endodontically related problems. Traumatic injuries, controversies in instrumentation and filling procedures, periodontic-endodontic consideration, surgical endodontics and other selected topics are discussed in depth. Prereq: END 821.

***END 831 CLINICAL ENDODONTICS II. (1)**

In this course students will treat routine endodontic cases. Prereq: END 821.

***END 841 CLINICAL ENDODONTICS III. (1)**

This course offers dental students further experience in providing endodontic treatment. Prereq: END 831 or consent of instructor.

END 880 CLINICAL ENDODONTICS SEMINAR. (1)

This course is designed to give a more in-depth hands-on view of some of the newest concepts in endodontics. Seminars will be presented including new concepts of instrumentation and root canal obturation. Demonstrations and hands on class participation will supplement the seminars. Note: scheduling for this course will take place outside of regularly scheduled class/clinic time. Prereq: END 830, 831, ranked in the upper half of the class, and consent of instructor.

ENG English

ENG 098 ENGLISH FOR SPEAKERS OF OTHER LANGUAGES. (3)

This course is a writing course designed to provide international undergraduate students with a firm basis in the rhetorical patterns of written English and in the grammatical structures and expressions associated with those patterns. It also serves as an introduction to the analysis and organization of information as found in English paragraphs and essays. Emphasis is placed upon writing beyond the sentence level. Students must attain at least a C in order to enter ENG 099. The course may be repeated up to six credits. Students cannot count this credit toward the Freshman Composition requirement or toward the graduation requirement. Lecture, five hours per week.

#ENG 100 ORIENTATION TO THE ENGLISH MAJOR. (1)

It is strongly recommended that all incoming freshmen with a declared English major should take this course, which serves as an introduction and orientation to the benefits and requirements of majoring in English. You will learn about literary fields including American, British, and African-American literature, and Creative Writing. You will meet professors, hear about the Creative Writing Option, learn how to earn honors and do internships in English, and also hear about study abroad options. You will meet your classmates and have opportunities to get involved with extra-curricular activities in English. Most important, you will develop

your own personalized four year plan. This class will put you on a track to excel and get the most out of your major. Prereq: Declared English major.

^ENG 101 WRITING I. (3)

A course in writing emphasizing argument. Instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. Includes grammar and mechanics review. Notes: (a) Credit not available by special examination; (b) ENG 101 and ENG 102 may not be taken concurrently.

^NOTE: ENG 101 is no longer taught at UK. This course is a placeholder for transfer students only. Along with ENG 102 this course can be used to partially fulfill the Composition and Communication requirements in the UK Core.

^^ENG 102 WRITING II. (3)

Argumentative writing. Emphasis on development of a fluent, precise, and versatile prose style. Continued instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. Prereq: ENG 101 or equivalent. Notes: (a) Credit not available by special examination; (b) ENG 101 and ENG 102 may not be taken concurrently.

^NOTE: ENG 102 is no longer taught at UK. This course is a placeholder for transfer students only. Along with ENG 101 this course can be used to partially fulfill the Composition and Communication requirements in the UK Core.

ENG 107 WRITING CRAFT: INTRODUCTION TO CREATIVE WRITING. (3)

An introduction to the genres and craft of creative writing, including fiction, nonfiction, and poetry. Students will study and practice writing in various modes through composition, peer critique, and research. Lecture or lecture with discussion section. Offers credit for the UK Core requirement in Intellectual Inquiry in Arts & Creativity. Fulfills ENG pre-major requirement and provides ENG minor credit.

ENG 130 LITERARY ENCOUNTERS. (3)

This course introduces students to literary works of various styles that deal with current subjects and creative applications. Topics vary by semester and are chosen to give a broad-based understanding of literary works, genres, creative techniques, or cultural trends (e.g., Literature and Other Art Forms; Film, Art, & Social Protest; Creative Writing, Mixed Media, & Social Media). See departmental listings for different offerings per semester. Fulfills ENG premajor requirement or provides ENG Major or Minor Elective credit.

ENG 142 GLOBAL SHAKESPEARE. (3)

Global Shakespeare will expose students to selected productions and adaptations of Shakespeare's plays by authors and acting companies from Asia, the Middle East, Africa, the Americas, and from European nations other than Great Britain. In our globally connected age, Shakespeare has crossed borders, occupying an honored place in the school curricula and cultural aspirations of many formerly colonized nations. In a post-colonial age, he has become the medium through which multiple cultures articulate their own values and enter into equal intellectual and aesthetic exchange with the English-speaking west. Students in the course will be asked to ponder what there is about Shakespeare that makes his plays such rich raw material for these encounters and exchanges. Prereq: None. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 168 ALL THAT SPEAK OF JAZZ: AN INTELLECTUAL INQUIRY INTO JAZZ AND DEMOCRACY (3)

This course is a hybrid cultural studies seminar and creative composition course that explores jazz theory as a philosophical artistic practice rooted in American democracy. It investigates jazz aesthetics as a literary, visual, and musical art form, and it examines theories of jazz composition as philosophical statements in direct conversation with the principles of U.S. democracy. The course also explores the philosophical and aesthetic connections of jazz literature to surrealist and existentialist artistic movements in modern and postmodern cultural contexts. Artists to be discussed include James Baldwin, Harryette Mullen, and others. The theoretical aspects of this course will demonstrate how jazz has been a source of inspiration for a variety of twentieth-century literatures and theoretical practices. The readings include selections of fiction, poetry, drama, and essays with emphasis on jazz literary modes, creative trends, and political connotations specific to African American literature and culture. (Same as AAS 168.)

ENG 171 GLOBAL LITERATURE IN ENGLISH. (3)

A course exploring the diversity and significance of English literature from across the world. To what extent is English now a global language, no longer the property of any national group? How has fiction contributed to the process of internationalizing English? To answer these questions and others, this course examines the idea of global citizenship and cosmopolitan English through the work of some of the language's most compelling international novelists. Lecture. Offers credit for the UK Core requirement in Global Citizenship. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 181.

***ENG 180 GREAT MOVIES (Subtitle required). (3)**

A course introducing students to films of various genres and styles, from both historical and contemporary filmmakers, investigating a particular issue or theme. Topics vary by semester and are chosen by faculty to give a broad-based understanding of important cinematic works, trends, and the creative processes behind this important, collaborative artform. As with all Arts

and Creativity classes, this class will require students to produce an artistic artifact. Intended as a general humanities course for non-majors. Lecture and section. See departmental listings for different offerings per semester. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Fulfills the UK Core requirement in Arts and Creativity.

ENG 191 LITERATURE AND THE ARTS OF CITIZENSHIP. (3)

A survey and investigation of contemporary literature of modern American citizenship, with an emphasis on questions of race, religion, gender, sexuality, and socioeconomic class. Lecture. Offers credit for the UK Core requirements in either U.S. Citizenship or Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement or ENG Major Elective credit. Provides ENG minor credit.

ENG 207 BEGINNING WORKSHOP IN IMAGINATIVE WRITING (Subtitle required). (3)

A beginning workshop in the craft of writing, teaching students how to read critically and how to revise work in progress. The students provide an audience for each others' work. Exercises involve practice in aspects of craft and promote experimentation with different forms, subjects, and approaches; outside reading provides models and inspiration. May be repeated under different subtitles to a maximum of 6 credits. Does not fulfill ENG premajor requirement. Provides ENG Major Elective credit and ENG minor credit. Required for ENG Imaginative Writing Option.

ENG 209 THE STRUCTURE AND USE OF ENGLISH. (3)

A general survey of the history, structure, and use of the English language. Topics investigated include: the history of the English language; elements of the structure of English; the distinctive characteristics of spoken and written English and the varied registers of English; the diversity of the English lexicon; regional and social dialects of English and their representation in literature; and the ideological dimensions of English language use, especially those relating to social and political issues and controversies. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG pre-major requirement and ENG minor credit. (Same as LIN 209.)

ENG 210 HISTORY OF THE ENGLISH LANGUAGE. (3)

A survey of the historical development of English from its Indo-European origins to the present. Includes an investigation of the principal changes which have affected English phonology, morphology, syntax, semantics, and vocabulary, and of the ways in which these changes are reflected in contemporary English usage; and an examination of the socio-historical factors that have shaped the evolution of the English language. (Same as LIN 210.)

ENG 221 INTRODUCTION TO LINGUISTICS: THEORETICAL FOUNDATIONS AND ANALYSIS. (3)

First of two courses offered in the introductory linguistics sequence, designed for majors and minors in Linguistics. Provides an intense and thorough introduction to the fundamental concepts of the field, including but not limited to: phonetics, phonology, morphology, syntax, and semantics. May be of use to students in other disciplines. Prerequisite for most 500 level LIN courses. Prereq: This course is primarily designed for Linguistics major and minor students, but it is also suitable for students pursuing a major in the following disciplines: English, Modern and Classical Languages, and Communication Science Disorders, or consent of instructor. (Same as LIN 221.)

ENG 230 INTRODUCTION TO LITERATURE (Subtitle required). (3)

An introduction to literary analysis through close reading and argumentative writing. The course involves studying selected texts from several genres and investigating a unified theme or set of topics indicated in the subtitle. Students will learn how to read closely, how to relate texts to contexts, and how to use basic literary terms and concepts. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings with different subtitles each semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG premajor requirement. Provides ENG minor credit. Prereq: Graduation Requirement Course – credit is awarded to students meeting the GWR prerequisites.

ENG 241 SURVEY OF BRITISH LITERATURE I. (3)

A survey of British literature from the Anglo-Saxon period to the later seventeenth century, with emphasis on different genres, periods, and cultural characteristics of the early English literary tradition. Texts and authors covered may include *Beowulf* and Old English elegiac poetry; Middle English poetry and selections from Geoffrey Chaucer's *Canterbury Tales*; Renaissance lyrics, sonnets, and narrative poetry; the drama of Shakespeare; selections from John Milton's *Paradise Lost*; and more. Lecture. Fulfills ENG major Historical Survey Requirement and Early Period requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 331.

***ENG 242 SURVEY OF BRITISH LITERATURE II. (3)**

A survey of British literature from the seventeenth century to the present, with emphasis on different genres, periods, and cultural characteristics of the later English literary tradition. Authors covered may include the Augustan poetry of John Dryden and Alexander Pope; the early and later Romantic movements; novelists and poets of the Victorian period such as Charles Dickens, Alfred Tennyson, and Elizabeth B. Browning; the early twentieth-century Modernism of Virginia Woolf and T.S. Eliot; and more. Lecture or lecture with discussion. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 332.

***ENG 251 SURVEY OF AMERICAN LITERATURE I. (3)**

A survey of American literature from its colonial origins to the Civil War, with emphasis on different genres, periods, and cultural characteristics of the American Colonies and antebellum United States. The course explores both the social conditions in which authors lived and wrote

—such as conflicts over land with Native Americans, slavery, and the emergence of women’s rights — as well as the key developments in literary form during this period, such as the rise of the novel, the slave narrative, and the changing shape of poetry. Texts and authors covered may include Susanna Rowson, Herman Melville’s *Moby Dick*, Frederick Douglass’ *Narrative*, short stories by Edgar Allan Poe, the poetry of Walt Whitman and Emily Dickinson, and more. Lecture or lecture with discussion. Fulfills ENG major Historical Survey Requirement and Early Period requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 334.

***ENG 252 SURVEY OF AMERICAN LITERATURE II. (3)**

A survey of American literature from the Civil War to the present, with an emphasis on different genres, periods, and cultural characteristics of later periods in U.S. history. The course explores the changing social conditions in which American literature was produced—such as the Roaring 20’s, the Cold War, and the upheaval of the 1960’s—and several key literary movements, such as the Harlem Renaissance, Modernism, and Postmodernism. Texts and authors covered may include Edith Wharton’s *House of Mirth*, Nella Larsen’s *Quicksand*, Ernest Hemingway, Toni Morrison, the poetry of Marianne Moore and Elizabeth Bishop, and more. Lecture or lecture with discussion. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 335.

ENG 260 INTRODUCTION TO BLACK WRITERS. (3)

An introduction to written and oral works by Black authors of Africa, the Caribbean, and the United States. The course includes writers such as Chinua Achebe (Africa), Wilson Harris (Caribbean), and Toni Morrison (USA), as well as others from the diverse field of literature written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core Credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 264. Prereq: Graduation Writing Requirement Course—credit is awarded to students meeting the GWR prerequisite. (Same as AAS 264.)

ENG 265 SURVEY OF AFRICAN-AMERICAN LITERATURE I. (3)

A survey of African-American literature from the mid-eighteenth century to Reconstruction and after, with emphasis on selected genres, periods, and thematic characteristics of the early African-American cultural and literary experience. Topics include colonialism and abolitionism; early black aesthetics, narratives of enslavement, and drama, novels, and poetry. Authors may include Jupiter Hammon, Phillis Wheatley, William Wells Brown, George Moses Horton, Martin Delaney, Frederick Douglass, Harriet Wilson, Ellen Craft, and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit.

ENG 266 SURVEY OF AFRICAN-AMERICAN LITERATURE II. (3)

A survey of African-American literature from post-Reconstruction to the Black Arts Movement and beyond, with emphasis on selected genres, periods, and thematic characteristics of the later African-American cultural and literary experience to the present day. Topics include literature of the Reconstruction; poetry and dialect poetry, the “plantation tradition” and black musical traditions; Black Modernism and the Harlem Renaissance; the Black Power movement and Civil Rights. Authors may include Pauline Hopkins, Frances Harper, Sutton Griggs, Oscar Micheaux, W.E.B. DuBois, Langston Hughes, Countee Cullen, Zora Neale Hurston, Richard Wright, Gwendolyn Brooks, and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit.

ENG 271 THE BIBLE AS LITERATURE. (3)

A course investigating selections from the Christian Bible (Old and New Testaments) in English, and from related sacred texts, as literary and cultural documents of great significance and literary achievement. Emphasis is on the careful analysis of literary forms and themes within a broadly historical and non-denominational context. Lecture. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 274 CLASSICS OF WESTERN LITERATURE. (3)

A study of selected works by major Western authors from the Bible and ancient Greek literature through the Renaissance and Enlightenment periods, and later. Emphasis is on the study of genres, themes, characters, and literary forms that have had an enduring presence in Western culture. Texts may include Homer’s *Iliad* and *Odyssey*; selections from the Old Testament; classical Greek drama; Virgil’s *Aeneid*; Dante’s *Divine Comedy*; Cervantes’ *Don Quixote*; and others. Lecture. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 280 INTRODUCTION TO FILM. (3)

An introduction to the study of films as narrative art and cultural documents. The course involves viewing and analyzing films from different genres and investigating a unified theme or set of topics. Students will learn how to view films closely, how to relate films to their contexts, and how to employ the basic terms and concepts of film analysis. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. Viewing films outside of class is required. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 281. Prereq: Graduation Writing Requirement Course—credit is awarded to students meeting the GWR prerequisite.

ENG 284 HISTORY OF FILM I. (3)

An introduction to the history of film as art and industry from the invention of the moving picture to World War II. Emphasis is on the artistic development of the silent film in America and Europe, the rise of the American studio system, and the emergence of sound in film in the 1930’s. Filmmakers may include the Lumiere brothers, Georges Meliès, Buster Keaton, D. W. Griffith, Charlie Chaplin, King Vidor, Alan Crosland, Leni Riefenstahl, and others. Lecture. Viewing films outside of class is required. Does not fulfill Historical Survey requirement. Can be taken for ENG Major Elective requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 381.

ENG 285 HISTORY OF FILM II. (3)

A chronological survey of narrative film (primarily American) from World War II to the present, concentrating on both canonical films (such as Hitchcock’s *Vertigo*) and often overlooked examples of cult, low budget, and independent film. Many paradigms of the major genres are included: musical, film noir, gangster, screwball comedy, horror and science fiction, western, and more. This survey also examines more idiosyncratic work of auteur directors (Nicholas Ray, Jane Campion), films capturing a specific sociopolitical moment (e.g. Spike Lee’s *Do the Right Thing*), and larger cinematic movements such as Italian neo-realism, French New Wave cinema, and the New Hollywood of the 70’s. Lecture. Viewing films outside of class is required. Does not fulfill ENG Historical Survey requirement. Can be taken for ENG Major Elective requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 382.

ENG 290 INTRODUCTION TO WOMEN’S LITERATURE. (3)

An introduction to the rich traditions of women’s writing, focusing on some important issues and representative examples. Students will read canonical and non-canonical works, discuss continuities and differences among women writers, and master some of the concepts of gender studies. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 234. Prereq: Graduation Writing Requirement Course—credit is awarded to students meeting the GWR prerequisite.

ENG 301 STYLE FOR WRITERS. (3)

This course is designed for those who wish to improve their own writing style or the style of others. While the course may include some account of historical changes in prose style and require some stylistic analysis of literary texts, the emphasis is on editing contemporary prose, both in exercises and in the students’ own writing. Students will learn and practice principles such as economy, coordination, subordination, precision, parallelism, balance, coherence, rhythm, clarity, and grace. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. (Same as WRD 301.)

#ENG 307 SPECIAL TOPICS IN CREATIVE WRITING (Subtitle required). (3)

An exploratory creative writing class (craft-based, cross-genre, or theme-based), this course is suitable for prospective English teachers, for those practicing creative writing who wish to explore cross-genre work, or for students with other majors who are interested in the given topic. May be repeated under different subtitles to a maximum of 6 credits. Prereq: Completion of Composition and Communication requirement and consent of instructor.

ENG 310 AMERICAN ENGLISH. (3)

The study of the varieties of modern American English: regional, social, and ethnic varieties, gender differences in communication, creoles and pidgins, stylistic variation. History and methods of American dialect study. No prerequisites. Provides ENG Major Elective credit and ENG minor credit. (Same as LIN 310.)

ENG 330 TEXT AND CONTEXT (Subtitle required). (3)

The core course in the English Major focusing on the close reading and analysis of a single major literary text, or a focused set of texts, in historical and critical context. Students will develop analytical and interpretive skills that deepen their historical and conceptual understanding of literature, as well as their skills of critical reading, writing, and presentation. See departmental listings for different offerings per semester. ENG major and minor requirement. Repeatable for up to six hours of credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent, and either ENG 107, or ENG 209, or ENG 230. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ENG 337 LITERATURE AND GENRE: (Subtitle required). (3)

An advanced course exploring one or two literary genres or formal categories. It focuses on analyzing the parameters and practices of a broad generic category (e.g. the short story; lyric poetry; epic and mock-epic; autobiography; the bildungsroman; protest literature) or a genre specific to a particular period (e.g. mid-century American crime novels; Elizabethan songs and sonnets; Victorian drama). May be repeated up to 9 hours under different subtitles. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. Provides ENG Major Elective credit and ENG minor credit. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester.

ENG 338 TOPICS IN LITERATURE (Subtitle required). (3)

An advanced course exploring a focused literary topic across various periods, genres, styles, and media. It focuses on the creative connections in literature unifying a shared set of themes

or topical concerns (e.g., narratives of travel; the family through history; stories about work and play; ethnic identities; nature and the natural world). Provides ENG Major Elective credit and ENG minor credit. May be repeated to a maximum of 9 hours under different subtitles. May fulfill ENG Early Period requirement depending on the course; see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 339 AUTHOR STUDIES (Subtitle required). (3)

An advanced course exploring the works of a single important author of English literature, or literature in translation, from any period or nationality. It focuses on developing a strong familiarity with the oeuvre of a specific important writer. Provides ENG Major Elective credit and ENG minor credit. May be repeated to a maximum of 9 hours under different subtitles. May fulfill ENG Early Period requirement depending on the course; see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 341 CHAUCER AND HIS CONTEMPORARIES. (3)

A course covering medieval English literature from around the years 1350-1450 and centering on the works of Geoffrey Chaucer (c. 1340-1400), particularly his early dream-visions and *The Canterbury Tales*. Other authors and texts may include William Langland's *Piers Plowman*; the poetry of John Gower; *Sir Gawain and the Green Knight* and the works of the Pearl-Poet; Thomas Hoccleve; Margery Kempe; anonymous romances and Arthurian narratives; and more. Topics include courtly love and chivalry; Christian spirituality; women and gender roles; feudal politics and rebellion. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 342 SHAKESPEARE. (3)

A course offering advanced study of a representative selection of Shakespeare's plays across the length of his career. It situates Shakespeare within Renaissance theatre culture: the playhouses and audiences he wrote for, the structure of his acting company, and the patronage system that supported their business. Students will learn how his plays departed from received ideas about dramatic genres and in some instances set new standards for how certain types of plays should look and feel. Students will also gain a sense of how interpretations of individual plays have changed over time and how later periods and audiences continue to make Shakespeare their own. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Credit will not be given to students who already have credit for ENG 340. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 343 RENAISSANCE DRAMA AND SOCIETY. (3)

This course studies Elizabethan and Jacobean drama by Shakespeare's predecessors and contemporaries. Although most people identify Shakespeare as the representative Renaissance playwright, he was only one member of a distinguished generation. Students will encounter a variety of popular dramatic genres in which Shakespeare either did not work or that he heavily adapted to his own ends: Turk plays, city comedy, unperformed "closet drama," revenge tragedy, pastoral. Readings may include playwrights such as Thomas Kyd, Christopher Marlowe, Elizabeth Cary, Lady Mary Wroth, Thomas Middleton, John Webster, and others; and topics such as tragedy and comedy, sex and romance, urban life and the value of money, and racial and religious difference. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 345 BRITISH POETRY. (3)

This course provides a selective encounter with the poetry of the British tradition. Texts and topics may be drawn from the later Renaissance (16th c.) up through the present day, exploring the depth, history, and continued vitality of British poetry. Particular attention is paid to the formal aspects and skills of reading poetry in different periods and styles. Reading may include authors and texts such as the sonnets and songs of Philip Sidney and Shakespeare; the verse of John Milton and other seventeenth-century poets; Alexander Pope and his contemporaries; Victorians and pre-Raphaelites such as E. B. Browning and Christina Rossetti; Modernists such as Ezra Pound, W. B. Yeats, and H.D.; and contemporary British, Irish, and Scottish poets. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 347 THE RISE OF THE BRITISH NOVEL. (3)

What is the novel and how did it begin? Why did it develop at a specific moment in history and what counted as fiction before that time? What makes one novel "literature" and another "trash"? In this course we explore the early decades of the novel to better understand prose fiction and how it came to be a dominant genre in English literature. Readings can include works by Daniel Defoe, Eliza Haywood, Samuel Richardson, Henry Fielding, Laurence Sterne, Frances Burney, Mary Shelley, Jane Austen (including selected cinematic adaptations), and more. Topics can include the novel in history and the history of the novel; the evolving cultural practices of novel-reading; eighteenth-century fiction and contemporary popular culture. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 348 VICTORIAN NOVELS AND THEIR WORLDS. (3)

This course examines the development of the novel as a literary and cultural form at the moment of its greatest impact during the Victorian era (1837-1901). It focuses on the emergence of the realist novel and other modes that intersected and competed with it (e.g. the gothic, the supernatural, sensation fiction, the New Woman novel), to explore the complex ways that represented different realities. The course also addresses contemporary issues such as new

ideas about human psychology; gender, domesticity, and The Woman Question; social status and class conflict; science and religion; race and empire. Authors may include Jane Austen, Mary Shelley, Charles Dickens, Mary Elizabeth Braddon, Oscar Wilde, Olive Schreiner, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 349 MODERNISM. (3)

A course on Modernist Literature: British, Irish and American writing from the first half of the twentieth century. Virginia Woolf once tried to explain modernism by claiming, "On or about December 1910 human character changed." Much of the writing of the period might be read as an attempt to record and understand that change. Texts include the fiction, poetry, drama, and essays from writers such as Woolf, James Joyce, T.S. Eliot, W.B. Yeats, Ezra Pound, Wyndham Lewis and Gertrude Stein. The literature of the period will be examined in relation to various contexts and backgrounds, including the experience of war, the breakup of empire, and other major events and upheavals. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 352 AMERICAN LITERATURE AND CULTURES TO 1900. (3)

This course focuses on selected literary movements and their relationships to American culture up through 1900. Authors studied may include Susanna Rowson, Nathaniel Hawthorne, Herman Melville, Walt Whitman, Harriet Jacobs, and Henry James. Topics may include American imperialism, slavery and abolition, the rise of the historical novel, Sentimentalism, Romanticism, and the emergence of psychological realism. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 353 AMERICAN LITERATURE AND CULTURES POST-1900. (3)

This course focuses on selected literary movements and their relationships to American culture since 1900. Authors studied may include Edith Wharton, F. Scott Fitzgerald, Allen Ginsberg, Ralph Ellison, Toni Morrison, Thomas Pynchon, and others. Topics may include the literatures of World War I, the Cold War, the Beat Generation, the New Social Movements of the 1960's, Postmodernism, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 355 AMERICAN POETIC TRADITIONS. (3)

A course investigating contrasting traditions of American poetry from the nineteenth and twentieth centuries. Several poets are examined within historical and literary contexts, and their poems examined in detail through close reading, with attention paid in particular to stylistic/formal characteristics. Poets studied may include Walt Whitman, Emily Dickinson, William Carlos Williams, Wallace Stevens, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 357 CONTEMPORARY AMERICAN LITERATURE. (3)

A course examining contemporary American fiction primarily since the 1970s and 1980s, as well as the diverse categories by which its critics and readers have sought to identify it: minimalism, hyperrealism, postmodernism, cyberpunk, the magical real. The class investigates contemporary authors in order to generate the key terms and problems for approaching work in diverse current genres, from science fiction and graphic novels to historical novels and self-consciously "literary" fiction. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 359 THE KENTUCKY LITERARY HERITAGE. (3)

A course exploring the rich literary heritage of the Commonwealth of Kentucky and the greater Appalachian region, surveying its local history and diversity as well as its wider significance for American art. Authors covered may include early figures such as William Wells Brown, the first African-American novelist, and John Fox Jr., the first million-selling novelist; Robert Penn Warren, first Poet Laureate of the United States and author of *All the King's Men*; Elizabeth Madox Roberts; Harriette Arnow, winner of the National Book Award in 1954 for *The Dollmaker*; counter-cultural writers of the 60's and 70's such as Hunter S. Thompson, Gurney Norman, and Ed McClanahan; contemporary Kentucky writers such as Wendell Berry, Erik Reece, Bobbie Ann Mason, Sara Jeter Naslund, C. E. Morgan, Kim Edwards, and Gayle Jones; and contemporary award-winning poets such as Frank X Walker, Nikky Finney, and Maurice Manning. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 361 EARLY AFRICAN-AMERICAN LITERATURE. (3)

This course investigates selected writers of the early African-American tradition, primarily from the mid-eighteenth century to post-Reconstruction. Inquiry focuses on the literary modes and genres that were central to the creation of a distinct African-American literary voice and canon, including slave narratives, folklore, poetry, drama, and more. Authors can include Phyllis Wheatley, Frederick Douglass, Harriet Jacobs, William Wells Brown, Frances Harper, Charles Chesnut, Martin Delaney, Sojourner Truth, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 260, 265 or 266 are recommended but not required.

ENG 362 FLIGHTS TO FREEDOM: LITERATURE OF THE GREAT BLACK MIGRATIONS. (3)

Between 1910 and 1930 more than one million African Americans migrated from the rural South to the urban North. This course focuses on the development of African-American migration

narratives from the slave era to the contemporary moment. It examines literary, musical, artistic, and journalistic representations of the Great Migrations that capture the experiences of African-Americans as they moved not only from the South to the North, but also from the South to the Midwest and the West in pursuit of better economic opportunities and political freedom. Readings are drawn from writers such as William and Ellen Craft, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, James Weldon Johnson, Jean Toomer, Nella Larsen, Ann Petry, Dorothy West, Pearl Cleage, August Wilson, Toni Morrison, Ishmael Reed, Colson Whitehead, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 260, 265, or 266 are recommended but not required.

ENG 368 CONTEMPORARY AFRICAN AMERICAN VOICES. (3)

Encompassing an array of genres and forms, this course examines black culture, literature, and performance from mid-20th century to present. It engages aesthetic, critical, and political issues related to seminal periods such as the Black Arts Movement of 1960's, the Third Renaissance of 1980's-90's, and the ascent of the first U.S. president of African descent. This course examines how forms of performance such as folklore and work songs, the blues, jazz, and rap, all shape cultural and literary production. Authors may include Lorraine Hansberry, Ernest Gaines, Gloria Naylor, Ice Cube, Cornell West, Marlon Riggs, Tupac, India Arie, Percival Everett, Nikky Finney, Natasha Tretheway, Barack Obama, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 369 AFRICAN AMERICAN WOMEN'S WRITING. (3)

This course analyzes the literary and visual representation of black women from the nineteenth to the twenty-first century. It explores how selected writers, working across different genres, render black female characters in ways that perpetuate, contest, or subvert stereotypical images of black women. Texts and authors may include Harriet Jacobs' *Incidents in the Life of a Slave Girl*, Frances Harper's *Trial and Triumph*, Nella Larsen, Zora Neale Hurston, Gwendolyn Brooks' *Maud Martha* (1953), Toni Cade Bambara's *Gorilla, My Love* (1972), Toni Morrison's *Sula* (1973), and contemporary authors such as Ann Allen Shockley, Gayl Jones, Nikky Finney, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 370 LITERATURE ACROSS BORDERS. (3)

A course examining literature as a product of multiple regional, national, and international contexts. How do texts, ideas, goods, and people move across borders? How are identities and concepts produced through transnational dialogue and exchange? Possible areas of study include transatlantic political or literary movements, border studies, multinational literatures, or literatures of migration and diaspora. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 380 FILM AND GENRE (Subtitle required). (3)

An advanced course exploring one or two film genres, styles, or formal categories. It focuses on analyzing the parameters and practices of a broad generic category (e.g. gangster films; documentaries; biographies; war films) or a genre specific to a particular period (e.g. early silent films; twentieth-century horror films). Viewing films outside of class is required. See departmental listings for different offerings per semester. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 280, 284, or 285 are recommended but not required.

ENG 384 LITERATURE AND FILM. (3)

This course explores the relationship between two creative traditions, literature and film, focusing on film adaptations of literary works for the screen. Subjects can include the adaptation of works by a particular writer such as Shakespeare or Jane Austen, or it may range more widely among the thousands of innovative cinematic reinventions of literary texts, e.g. Richardson's *Tom Jones*, Altman's *Short Cuts*. In some semesters the course may focus on a particular topic or genre and its treatment in both literary and cinematic texts, or on a particular moment when cinema and literary writers exerted a strong mutual influence (such as Hollywood in the 1920's). Viewing films outside of class is required. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 280, 284, or 285 are recommended but not required.

ENG 391 LITERARY THEORY. (3)

Since the 1940's "literary theory" has emerged as a vibrant and vital aspect of literary studies. The term covers a wide range of formal, historical, and critical approaches to literature and culture that have changed the ways we read. This course investigates selected trends and schools of modern literary theory in diverse texts and contexts. These can include formalism, Practical Criticism, and the New Criticism; French Structuralism and the various modes of post-structuralism (Semiotics, Deconstruction, Reader-response, Speech-act theory); historicism and the New Historicism; as well as broader modes of cultural critique such as Feminism, Marxism, Critical Theory and the Frankfurt School, Post-colonialism, Critical Race Theory, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

ENG 395 INDEPENDENT WORK. (1-3)

For undergraduate majors in English with high standing. Students pursue an independent course of study, tutorial, or directed project under the guidance of a faculty member, with appropriate assessment and grading (e.g., term paper(s), examinations, final project). Projects are generally proposed and arranged by students themselves, reflecting individual interests and goals. Limited enrollment. Prereq: ENG major with a major GPA of 3.0 or above; prior permission of faculty advisor and ENG chairperson; approved Learning Contract. May be repeated to a

maximum of 6 credits. Contact the Director of Undergraduate Studies for information. Provides ENG Major Elective credit.

ENG 399 INTERNSHIP IN ENGLISH-RELATED WORK EXPERIENCE. (1-3)

The Department of English internship is available for qualified students to receive academic credit toward the Bachelor of Arts or Bachelor of Science in English through applied and practical experience with a variety of private and public entities, including but not limited to the University Press of Kentucky. The student will identify a field-, community-based, practical or applied educational experience and locate a sponsor to host their internship, which will be supervised by both a responsible person on site and by an English Dept. faculty member. The internship will provide supervised professional experience in public and private sector positions and is intended to introduce students to the skills and working environments of careers for graduates of the English Dept. Students should consult with an English faculty member in advance of registering for this class. A learning contract must be completed by the student, the faculty supervisor, and the on-site internship supervisor, then filed with the English Dept.'s Director of Undergraduate Studies (DUS) in order to receive credit for this course. Credits: 1-3 credit hours, depending on the time required and nature of the internship. Approximately 10 hours a week of internship work equals three credit hours. At midterm, the faculty and on-site supervisors will communicate about the student's progress so that the faculty member can submit a midterm grade. English 399 will be graded only on a pass-fail basis. Repeatable for a total of up to 6 credit hours. Prereq: To be eligible for the internship, students must (1) be sophomores, juniors or seniors, and (2) have completed both parts of the CCR/composition and communication requirement.

ENG 401 SPECIAL TOPICS IN WRITING (Subtitle required). (3)

Studies of special topics in writing, in areas such as literary nonfiction (essays), responding to literature, cultural critique, and composing law and justice. Topics announced the preceding semester. May be repeated under different subtitles to a maximum of six credits. Does not fulfill ENG major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. (Same as WRD 401.)

ENG 405 EDITING ENGLISH PROSE. (3)

This course is designed for students interested in the basics of editing and publishing and offers instruction and extensive practice in editing and revising both the student's own writing and the prose works of others. In addition to learning techniques of revision, verification of sources, and preparation of manuscripts, students will be expected to learn about the editing profession generally and to follow trends in editing and publishing. Not for students with writing deficiencies. Does not fulfill ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG Minor credit. Prereq: WRD 301, or WRD 306, or consent of instructor. (Same as WRD 405.)

***ENG 407 INTERMEDIATE WORKSHOP IN CREATIVE WRITING (Subtitle required). (3)**

Continued studies in the writer's craft, focusing on student work but with increased emphasis on outside reading. Areas of workshop practice include Poetry, Fiction, and Creative Non-Fiction. Prereq: ENG 207 in the same genre or consent of instructor. May be repeated to a maximum of 9 credits. Provides ENG Major Elective credit and ENG minor credit. Can count only once for ENG Major 400-level course requirement. Required for ENG Creative Writing Option.

ENG 425 ENVIRONMENTAL WRITING. (3)

Students will consider the way writers address environmental issues by exploring various forms of environmental writing, from personal narrative to literary nonfiction to advocacy. Students will be required to take a mandatory day long field trip to UK's Robinson Forest. All students must participate in this field trip. Prereq: Completion of Composition and Communication requirement or consent of instructor.

ENG 440G STUDIES IN BRITISH LITERATURE: (Subtitle required). (3)

An advanced British Literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 450G STUDIES IN AMERICAN LITERATURE: (Subtitle required). (3)

An advanced American Literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit.

ENG 460G STUDIES IN AFRICAN-AMERICAN LITERATURE: (Subtitle required). (3)

An advanced African-American literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 470G COMPARATIVE AND TRANSNATIONAL STUDIES IN LITERATURE: (Subtitle required). (3)

An advanced literature course focusing on comparative or transnational periods, themes,

genres, national or ethnic traditions, or one or more authors. Possible areas of study include transatlantic connections, diasporic communities, or comparisons between English language authors and foreign authors in translation. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 480G STUDIES IN FILM (Subtitle required). (3)

An advanced course in the history, analysis, criticism, and theory of film. Viewing of films outside of class is required. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. ENG 280 strongly recommended. Provides ENG Major Elective credit and ENG minor credit.

ENG 490G STUDIES IN LITERATURE AND GENDER: (Subtitle required). (3)

An advanced course focusing on any aspect of gender in literary studies, such as gender and genre, gender issues in a particular literary period, masculinity, minority women writers, or feminist literary theory. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 491G STUDIES IN THEORY: (Subtitle required). (3)

An advanced course on any aspect of literary or critical theory, in relation to selected texts. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 492G CULTURAL STUDIES: (Subtitle required). (3)

An advanced course on any aspect of cultural studies, in relation to selected texts. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 495 MAJOR HONORS SEMINAR (Subtitle required). (3)

An advanced undergraduate seminar in literature, film, or cultural study. Honors seminar topics will be announced the preceding year. Required for graduation with Departmental Honors in English. Enrollment limited to junior and senior ENG majors. May be repeated up to 9 hours under different subtitles. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit. Prereq: ENG major; completion of premajor requirements and ENG 330; ENG major GPA of 3.5 or above. Enrollment limited to junior and senior ENG majors.

ENG 507 ADVANCED WORKSHOP IN IMAGINATIVE WRITING (Subtitle required). (3)

For the student who has shown marked talent and commitment, this course provides a rigorous workshop among peers and includes additional attention to outside reading. Each student will produce a chapbook of poems or stories. See departmental listings for different offerings per semester. Prereq: ENG 207 and ENG 407, or the equivalent, and consent of the instructor. May be repeated with the same or different subtitle to a maximum of 6 credits. Required for the ENG Imaginative Writing Option under two different subtitles. Provides ENG Major Elective credit and ENG minor credit.

ENG 509 COMPOSITION FOR TEACHERS. (3)

A course covering the basic studies helpful to teachers of English composition at the secondary level. Focuses on the teaching of grammar, punctuation, usage, etc., and on theme planning, correction, and revision. Students are required to do quite a bit of writing. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC 509.)

ENG 512 ANALYSIS OF ENGLISH SYNTAX. (3)

Contemporary approaches to the syntactic analysis of Modern English; particular attention is devoted to Chomskyan syntactic theory. Prereq: LIN 221 or graduate standing. (Same as LIN 512.)

ENG 513 TEACHING ENGLISH AS A SECOND LANGUAGE. (3)

The course examines the current theories and methods of teaching English as a second language. The course will include (1) language learning theory as it relates to other disciplines; (2) methods and techniques of contrastive analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/LIN 513.)

ENG 514 TESL MATERIALS AND METHODS. (3)

An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using their own materials. Prereq: ENG/EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/LIN 514.)

ENG 518 ADVANCED HISTORY OF THE ENGLISH LANGUAGE. (3)

This course explores the development of English from its roots in Indo-European, through Old, Middle, and Early Modern English(es), culminating with a review of the English languages of today. It focuses on the phonological, grammatical, and lexical changes of the language, as well as on the social contexts of the rise and spread of English as a contemporary world language.

Special emphasis is given to a linguistically informed understanding of how the language has changed in response to political and historical pressures. Fulfills the ENG Early Period requirement. Provides ENG Major Elective Credit and ENG Minor credit. (Same as LIN 518.)

ENG 519 INTRODUCTION TO OLD ENGLISH. (3)

An introduction to the study of the Old English language and its literature from the 8th to the 11th centuries. Emphasis on learning the basic vocabulary and grammar of Old English in the West Saxon standard written dialect. Readings include excerpts from prose and poetry, the basics of Old English verse forms and alliterative poetry, and some historical and cultural background. The course is particularly recommended for students of European languages (especially German) and Linguistics; some basic background in Linguistics is recommended but not required. Fulfills ENG major Early Period Requirement. Provides ENG Major Elective credit and ENG minor credit.

ENG 570 SELECTED TOPICS FOR ADVANCED STUDIES IN LITERATURE (Subtitle required). (3)

Study of special topics that cut across the normal divisions of genre or periods, such as the relations of literature to other disciplines; metaphor and symbolism; interpretative theory. May be repeated to a maximum of six credits. Prereq: Junior standing or consent of instructor.

PROSEMINARS: The purpose of the proseminar courses (600 level) is to impart through lectures and discussion both the facts of literary history and the techniques of literary analysis. They are, therefore, designed to go beyond the mere information level to techniques of contemporary literary criticism and scholarship.

ENG 600 BIBLIOGRAPHY AND METHODS OF RESEARCH. (3)

An introduction to descriptive and enumerative bibliography, textual criticism, and historical scholarship.

ENG 601 ESSAYS AND CREATIVE NONFICTION. (3)

Study and practice in nonfiction writing, including literary nonfiction, literary journalism, personal essays, and creative nonfiction. May not be repeated for graduate credit. Prereq: Admission to the graduate program or consent of instructor.

ENG 605 EDITING. (3)

ENG 605 offers instruction in the history of U.S. publishing and extensive practice in verification of sources, fact checking, copy editing, and manuscript preparation. Prereq: Admission to Graduate School or consent of instructor.

ENG 607 GRADUATE WRITING WORKSHOP (Subtitle Required). (3)

A course for experienced writers who have some knowledge of contemporary American literature. Equal emphasis on students' original work and outside reading. Each student will produce a chapbook of poems or stories and write a short introduction to it. May be repeated with the same subtitle to a maximum of six credits. Prereq: Consent of instructor.

ENG 608 CRAFT OF WRITING (Subtitle required). (3)

This course examines the craft, emphasizing techniques, style, and structure. May be offered in each genre offered in the MFA degree program. At least 6 hours of courses related to the study of creative writing genres, such as: Craft of Poetry, Fiction, or Nonfiction, with emphasis on themes such as: Ekphrastic Writing, Experimental Forms, Working Class Themes, etc. Prereq: This course is open only to MFA in Creative Writing candidates or by permission of the instructor.

ENG 609 COMPOSITION FOR TEACHERS. (3)

A course in the theory and practice of teaching English composition at the college level. Required of first-year teaching assistants in the Department of English, the course is structured to match the ordering of English 101 so that the practical work of college writing and the theoretical considerations of English 609 will be mutually reinforcing.

ENG 610 STUDIES IN RHETORIC. (3)

This course introduces theories of rhetoric with readings drawn from major theoreticians and rhetoricians; applies theory to the practice of teaching college writing, with special emphasis on argumentation, the subject of English 102; and provides an opportunity for teaching assistants to get help from the teacher and from their peers in responding to and evaluating students' written work. This course, required of second semester teaching assistants in the Department of English, continues the work of English 609. Prereq: ENG 609 or equivalent.

ENG 611 LITERATURE TEACHING SEMINAR. (3)

This seminar prepares graduate students to teach literature classes at the University of Kentucky and elsewhere. It offers instruction and guidance in curriculum design, syllabus creation, reading and work exercises, and more. Students develop a portfolio of course materials and refine skills for teaching literature and film at the introductory as well as advanced levels of an undergraduate curriculum. This course is not a requirement for completing the Ph.D. degree, but it is required for graduate instructors to be approved to teach their own introductory-level literature and film classes in the University of Kentucky English Department curriculum.

ENG 612 STRUCTURE AND STYLISTICS OF FRENCH. (3)

A study of the history and structure of French with an emphasis on contemporary features. (Same as FR/LIN 612.)

ENG 619 BEOWULF. (3)

Translation and study of *Beowulf*. ENG 518 or ENG 519 recommended as background courses.

ENG 620 STUDIES IN MIDDLE ENGLISH LITERATURE. (3)

A study in depth of selected writers and movements.

Course Descriptions

- ENG 621 STUDIES IN CHAUCER.** (3)
A study in depth of selected works of Chaucer, especially *Troilus*, in relation to aspects of the medieval literary tradition.
- ENG 622 STUDIES IN RENAISSANCE LITERATURE: 1500-1660.** (3)
Intensive study of selections from the drama, poetry, and prose of the period.
- ENG 625 STUDIES IN RENAISSANCE DRAMA EXCLUSIVE OF SHAKESPEARE.** (3)
A study in depth of selected writers.
- ENG 626 STUDIES IN SPENSER, SHAKESPEARE, MILTON.** (3)
Intensive study of one or more major authors and the relevant criticism and scholarship. Prereq: ENG 425 or ENG 426 or ENG 428 or equivalent.
- ENG 630 STUDIES IN ENGLISH LITERATURE: 1660-1720.** (3)
Comprehensive study of broad topics, normally limited to an intensive survey of the literature and scholarship of the period as a whole.
- ENG 631 STUDIES IN ENGLISH LITERATURE: 1720-1780.** (3)
Comprehensive study of broad topics, normally limited to an intensive survey of the literature and scholarship of the period as a whole.
- ENG 635 STUDIES IN ROMANTICISM.** (3)
Readings in selected authors and relevant scholarship.
- ENG 638 STUDIES IN VICTORIAN LITERATURE.** (3)
Readings in the poetry and prose non-fiction of the period with relevant scholarship.
- ENG 642 STUDIES IN MODERN BRITISH LITERATURE.** (3)
Selected writers, works, and movements in the modern period with concentration on the period from 1890 to 1945.
- ENG 651 STUDIES IN AMERICAN LITERATURE BEFORE 1860.** (3)
A study in depth of selected writers and movements.
- ENG 652 STUDIES IN AMERICAN LITERATURE: 1860-1900.** (3)
A study in depth of selected writers and movements.
- ENG 653 STUDIES IN AMERICAN LITERATURE SINCE 1900.** (3)
A study in depth of selected writers and movements.
- ENG 656 BLACK AMERICAN LITERATURE.** (3)
An in-depth study of black American literature, with concentration on major texts by major black writers. (Same as AAS 656.)
- ENG 660 MODERN CRITICAL THEORY (Subtitle required).** (3)
Detailed examination of one or another topic in contemporary theory of interpretation, such as literature and analytical philosophy, phenomenology and literature, structuralism, Marxism, psychoanalysis. May be repeated up to 6 credit hours under different subtitles.
- ENG 681 STUDIES IN FILM.** (3)
Comprehensive study of the history, theory, and criticism of film, with concentration on a series of major American and foreign films. Viewing of films outside of class is required. May be repeated up to 9 credit hours under different subtitles.
- ENG 682 STUDIES IN FICTION.** (3)
A study in depth of selected types of fiction.
- ENG 690 STUDIES IN LITERATURE AND GENDER (Subtitle required).** (3)
This course focuses on gender as a primary category for literary analysis. Topics will vary, from a group of authors, an historical period or an aesthetic movement, to a genre, a theme, or an aspect of literary theory. May be repeated under different subtitles to a maximum of six credits.
- ENG 691 READINGS IN RHETORIC (Subtitle required).** (1)
This reading course allows graduate students to integrate readings in Rhetoric and Composition scholarship and provides an opportunity to discuss research with faculty associated with Rhetoric and Composition. In addition to readings, students will be expected to keep a reading journal or complete a brief annotated bibliography. May be repeated to a maximum of three credits. Prereq: ENG 609 and ENG 610 or consent of instructor.
- ENG 700 TUTORIAL FOR PH.D. CANDIDATES.** (3)
This course allows Ph.D. candidates who have completed all course work requirements to work together under the direction of a senior faculty member in preparing for and taking the Qualifying Examination. May be repeated to a maximum of twelve credits. Prereq: Admission to the Ph.D. program and instructor's consent.
- ENG 720 SEMINAR IN MEDIEVAL LITERATURE.** (3)
Recent topics: medieval fiction; Chaucer and the Gothic mind. May be repeated to a maximum of six credits.
- ENG 722 SEMINAR IN RENAISSANCE STUDIES (Subtitle required).** (3)
Advanced work on a specific author or topic. Recent topics: Eco-Milton, Romance narrative. May be repeated to a maximum of nine credits.
- ENG 730 SEMINAR IN 18th CENTURY LITERATURE.** (3)
Recent topics: neoclassic satire. May be repeated to a maximum of six credits.
- ENG 735 SEMINAR IN ROMANTIC LITERATURE.** (3)
Recent topics: Keats; Wordsworth. May be repeated to a maximum of six credits.
- ENG 738 SEMINAR IN VICTORIAN LITERATURE.** (3)
Seminar in Victorian literature. May be repeated to a maximum of six credits.
- ENG 740 SEMINAR IN 20th CENTURY BRITISH LITERATURE.** (3)
Seminar in 20th century British literature. May be repeated to a maximum of six credits.
- ENG 748 MASTER'S THESIS RESEARCH.** (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.
- ENG 749 DISSERTATION RESEARCH.** (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.
- ENG 750 SEMINAR IN COLONIAL LITERATURE.** (3)
Seminar in Colonial Literature; may be repeated to a maximum of six credits.
- ENG 751 SEMINAR IN AMERICAN LITERATURE: 1800-1860.** (3)
Seminar in American literature 1800-1860. Recent topics: Emerson and Melville; Hawthorne. May be repeated to a maximum of six credits.
- ENG 752 SEMINAR IN AMERICAN LITERATURE: 1860-1900.** (3)
Seminar in American literature 1860-1900. Recent topics: Whitman and Dickinson. May be repeated to a maximum of six credits.
- ENG 753 SEMINAR IN AMERICAN LITERATURE SINCE 1900.** (3)
Seminar in American literature since 1900. Recent topics: Faulkner, Wolfe, and Warren. May be repeated to a maximum of six credits.
- ENG 767 DISSERTATION RESIDENCY CREDIT.** (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.
- ENG 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.
- ENG 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE.** (0-12)
May be repeated indefinitely.
- ENG 771 SEMINAR IN SPECIAL TOPICS (Subtitle required).** (1-3)
Seminar in special topics; includes genres and subject matters such as symbolism which cover more than one period of literature. Recent topics: symbolism and allegory. May be repeated up to 9 credit hours under different subtitles.
- ENG 780 DIRECTED STUDIES.** (1-6)
Independent work devoted to study and research on specific subjects and problems according to the interests and needs of individual students. May be repeated to a maximum of nine credits. Permission of chairperson required.
- ENG 781 SEMINAR IN FILM (Subtitle required).** (3)
Seminar in special topics in film, such as directors, genres, historical periods, film and literature, film theories, and film movements. Viewing of films outside of class is required. May be repeated under different subtitle to a maximum of nine credits.

ENS Environmental Studies

- ENS 200 INTRODUCTION TO ENVIRONMENTAL STUDIES.** (3)
A broad-ranging multidisciplinary introduction to current environmental issues and problem solving presented through a series of case studies. Case studies incorporate contemporary environmental themes including industrialization, resource use, and pollution; changing land use patterns; global warming and deforestation; biodiversity; political regulation; economic resources; cultural attitudes toward nature. Each case study will present environmental issues as scientific problems with social, political, philosophical, and economic causes and consequences. Emphasis is placed on understanding and combining different approaches to environmental problems and on proposing public policy solutions.
- ENS 201 ENVIRONMENTAL AND SUSTAINABILITY STUDIES I: HUMANITIES AND SOCIAL SCIENCES.** (3)
This course will provide a foundation in the core ideas, theoretical concerns and practical approaches to environmental studies framed within the disciplines of the humanities and social sciences. Students will study human interactions with the environment, both natural and built, and inter-human relations conditioned by local and global environmental factors. Students will obtain a basic conceptual and historical understanding of the nature and value of their local, regional, and global environment.

ENS 202 ENVIRONMENTAL AND SUSTAINABILITY STUDIES II: NATURAL SCIENCE AND POLICY. (3)

This is an introduction to natural science and policy as they pertain to understanding environmental studies. The core ideas include understanding how the ecological theories of population dynamics, community structure, and ecosystems dynamics lay a scientific foundation to understanding the nature of current environmental issues and how they might be addressed individually and through governmental regulation.

ENS 300 SPECIAL TOPICS (Subtitle required). (1-4)

Special topics in environmental studies. This course permits the offering of special topics in order to take advantage of faculty specialties. Course topic must be approved by the Environmental Studies Program Director. Prereq: Variable, when topic is identified.

ENS 395 INDEPENDENT WORK. (1-4)

Under special conditions selected students may investigate specific environmental issues and problems. The instructor and the student will agree on a formal semester plan/learning contract, which will be filed with the Environmental Studies Program Director and will include weekly reports to the instructor. Prereq: Environmental Studies minor, 3.0 G.P.A., consent of instructor.

ENS 400 SENIOR SEMINAR (Subtitle required). (3)

This course will draw on your interdisciplinary understanding of environmental issues and your problem-solving capacities developed while fulfilling Environmental Studies Minor requirements. It is a participatory capstone seminar designed to utilize and test your critical ability for independent thinking organized around specific environmental issues. Independent library work and writing assignments will be required in order to prepare for weekly, interactive topical seminar meetings. Group projects will culminate in individual term papers/projects on different aspects of the environmental issues under discussion. Specific topics will vary. Prereq: ENS 200 and 12 hours of course work from approved Environmental Studies courses (or instructor's consent). This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ENT Entomology**ENT 110 INSECT BIOLOGY.** (3)

Overview of the biology of insects. Emphasizes how this enormously abundant and important group of animals has resolved the basic challenges of survival and reproduction. Principles of physiology, behavior, ecology, and evolution are introduced using insects as examples. The roles of both beneficial and detrimental insects will be discussed. [Offered in fall, spring and summer.]

ENT 300 GENERAL ENTOMOLOGY. (3)

Fundamentals of insect biology and relationships among insects, plants, and other organisms; identification of commonly encountered insects. Beneficial and detrimental effects of insects are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: One course in introductory biology. (Same as BIO 300.) [Offered in fall only.]

ENT 310 INSECT PESTS OF FIELD CROPS. (3)

Identification, life histories and control of insects attacking field crops, especially those of importance in Kentucky. The damage that these insects cause, the reasons for their abundance, and alternatives in control practices will also be emphasized. Lecture, two hours per week; laboratory, two hours per week. [Offered in fall only.]

ENT 320 HORTICULTURAL ENTOMOLOGY. (3)

A detailed coverage of the insects and mites attacking turf, ornamentals, greenhouse plantings, vegetables and fruits, with emphasis on field recognition of the pests and their damage. Lecture, two hours per week; laboratory, two hours per week. [Offered in fall only.]

ENT 340 LIVESTOCK ENTOMOLOGY. (2)

Biology and behavior of insects and other pests attacking livestock, poultry, pets and wildlife. Current control methods are discussed. For students interested in livestock production, farm management, dairy science, poultry science, and preveterinary medicine, as well as general agriculture. [Offered in spring only.]

ENT 360 GENETICS. (3)

The basic principles of heredity as currently understood from evidence accumulated in classical, cytogenetic, molecular, and quantitative genetic experiments. Emphasis is placed on a thorough understanding of genetic principles and the relationship of genetics to all biological disciplines. Prereq: BIO 148, BIO 152 and CHE 105 or consent of instructor. (Same as ABT 360.) [Offered in fall only.]

ENT 395 INDEPENDENT WORK. (1-3)

Special problems for individual students who are capable of pursuing independent investigations in the various areas of entomology. May be repeated to a maximum of six credits. Prereq: ENT 300. [Offered in fall, spring and summer.]

ENT 399 FIELD BASED/COMMUNITY BASED EDUCATION. (1-6)

Field-based or community-based experience in entomology under supervision of a faculty member. Pass/Fail only. Prereq: Permission of faculty member and department chairperson and completion of a departmental learning agreement before registration. [Offered in fall, spring and summer.]

ENT 460 INTRODUCTION TO MOLECULAR GENETICS. (3)

Molecular genetics is the study of the biochemical basis of heredity and focuses on the structure and expression of DNA at the molecular and cellular level. The course will provide a detailed understanding of the biochemical events involved in genome replication, prokaryotic and eukaryotic transcription, and translation of DNA, as well as RNA processing, recombination and the theoretical underpinnings of genetic engineering. Prereq: ABT/ENT 360 or BIO 304 or consent of instructor. (Same as ABT 460.) [Offered in spring only.]

ENT 461 INTRODUCTION TO POPULATION GENETICS. (3)

This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/BIO/FOR 461.) [Offered in spring only.]

***ENT 502 FOREST ENTOMOLOGY.** (3)

Lectures primarily address principles and concepts. Laboratories use a hands-on approach to demonstrate insect collecting and identification techniques, ecological concepts and management approaches, and use of reference materials. Prereq: A minimum of 3 credits of basic biology (BIO 103 or BIO 148 or equivalent) or consent of instructor. (Same as FOR 502.) [Offered in fall only.]

ENT 505 EVOLUTION IN AGRICULTURE, MEDICINE AND CONSERVATION BIOLOGY. (3)

An introduction to modern evolutionary theory with emphasis on its application to current problems in agriculture, the biomedical sciences, and conservation biology. Prereq: Genetics (ABT 360, BIO 304 or equivalent introductory genetics course). (Same as ABT 505.)

ENT 530 INTEGRATED PEST MANAGEMENT. (3)

Principles of insect damage, populations and distributions. Various types of natural and applied control, including problems of insecticide toxicity, resistance and residues. Prereq: ENT 300 or ENT 310 or ENT 320.

ENT 550 SPIDER ECOLOGY AND BEHAVIOR. (3)

Spiders are fascinating in their own right, and also are major predators in terrestrial food webs. This course examines the ecology and behavior of spiders as model predators in systems ranging from undisturbed forests and meadows to agroecosystems and the urban landscape. While focusing on spiders, the course also intertwines two general sub-themes: (1) the advantages of employing diverse approaches (e.g. field and laboratory experiments, non-manipulative observations, and meta-analyses) in ecological and behavioral research; and (2) the strengths, and limitations, of using model organisms to develop and test theory. Prereq: One year of undergraduate biology.

***ENT 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH.**

Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: 3 credits of basic biology (BIO 103 or BIO 148 or equivalent) or permission of instructor. (Same as BIO/CPH 561.) [Offered in fall – odd years.]

ENT 563 PARASITOLOGY. (4)

Protozoan, helminth and arthropod parasites of man and domestic animals, emphasis on etiology, epidemiology, methods of diagnosis, control measures, and life histories. Techniques for host examination and preparation of material for study. Prereq: BIO 148, BIO 152, BIO 155 or BIO 198, or consent of instructor. (Same as BIO 563.)

ENT 564 INSECT TAXONOMY. (4)

A study of insect taxonomy including the collection, preparation, and identification of adult insect specimens. Prereq: Consent of instructor. (Same as BIO 564.) [Offered in fall – even years.]

ENT 568 INSECT BEHAVIOR. (3)

The principles of animal behavior will be stressed using insects as examples. Physiology, mechanisms, behavioral ecology and evolution of insect behavior will be covered. Prereq: One year of biology. (Same as BIO 568.) [Offered in spring – odd years.]

ENT 574 ADVANCED APPLIED ENTOMOLOGY. (4)

The objective of this course is to present the student with advanced concepts of applied entomology in a system-specific context. Each week, the insect problems associated with a different commodity/production system will be presented so as to illustrate a different broadly-based theme. Prereq: An introductory entomology course and consent of instructor.

ENT 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)

This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/FOR 606.)

ENT 607 ADVANCED EVOLUTION. (2)

This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within popula-

Course Descriptions

tions (e.g., selection, inheritance, population subdivision) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 508 or consent of instructor. (Same as BIO/FOR 607.) [Offered in fall only.]

ENT 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)

This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as BIO/FOR 608.)

ENT 609 POPULATION AND COMMUNITY ECOLOGY. (3)

This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as BIO/FOR 609.) [Offered in fall only.]

ENT 625 INSECT-PLANT RELATIONSHIPS. (3)

This course examines the natural history, ecology, and evolution of insect/plant relationships. Topics include mechanisms and theory of plant defense, behavioral and physiological adaptations of herbivorous insects, pollination biology, multitrophic-level interactions, causes of insect outbreaks, and applications to managed ecosystems. Critical reading and discussion of current literature is emphasized. Prereq: Two years of college-level biology. (Same as BIO 625.) [Offered in spring – odd years.]

ENT 635 INSECT PHYSIOLOGY. (4)

Study of insect physiological processes including development, digestion, reproduction, respiration, excretion, hormones and immunity. Opportunity to learn techniques used in insect physiology and molecular biology. Prereq: Consent of instructor. (Same as BIO 635.) [Offered in spring – even years.]

ENT 636 INSECT MOLECULAR BIOLOGY. (4)

Principles of insect molecular biology. Analysis of insect development, reproduction, behavior, immunity, transgenic insects and insecticide resistance at the molecular level. Hands-on experience with molecular biology techniques. Prereq: ENT/BIO 635 or consent of instructor. (Same as BIO 636.) [Offered in spring – odd years.]

ENT 660 IMMATURE INSECTS. (3)

Bionomics, structure and classification of immature stages of insects; practice in their identification. Lecture, one hour; laboratory, six hours. Prereq: BIO 570 or ENT 564, or consent of instructor.

ENT 665 INSECT ECOLOGY. (3)

The biotic and physical factors influencing the distribution and abundance of insects and insect populations. Prereq: Consent of instructor. (Same as BIO 665.) [Offered in fall – even years.]

ENT 667 INVASIVE SPECIES BIOLOGY. (3)

This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as BIO/FOR 667.) [Offered in fall – odd years.]

ENT 670 SCIENTIFIC PUBLISHING: PROCESS AND ETHICS. (2)

An introduction to scientific publishing, including types of scientific journals, choosing where to publish, the structure of scientific papers, the peer review process, data management and archiving, post-publication promotion of research, metrics of scientific impact such as impact factors and altmetrics, and publication ethics.

ENT 680 BIOLOGICAL CONTROL. (3)

Principles related to the use of arthropods to suppress populations of arthropod pests and weeds. Includes historical perspective, ecological relationships, and contemporary issues related to the conservation and manipulation of arthropod predators, parasitoids, and herbivores. Prereq: ENT 300 or equivalent. [Offered in spring – even years.]

ENT 684 PHYLOGENETIC SYSTEMATICS. (3)

Theory and methods of phylogenetic analysis and cladistics will be explained. Applications of phylogenetic analysis, such as historical biogeography, biological classification, and testing of ecological hypotheses will be explored. (Same as BIO 684.)

ENT 695 SPECIAL TOPICS IN ENTOMOLOGY (Subtitle required). (3)

Special topical or experimental courses in entomology for graduate students. Special title required and must be approved by the chairperson of the Department of Entomology. A particular title may be offered twice at most under ENT 695. Students may not repeat under the same subtitle. Prereq: Will be set by instructor. [Offered in fall and spring.]

ENT 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. [Offered in fall and spring.]

ENT 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ENT 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. [Offered in fall and spring.]

ENT 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

ENT 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

ENT 770 ENTOMOLOGICAL SEMINAR. (1)

Discussion of current research problems in entomology. May be repeated to a maximum of six hours. [Offered in fall and spring.]

ENT 780 SPECIAL PROBLEMS IN ENTOMOLOGY AND ACAROLOGY. (2-3)

Investigations of chosen insect problems, including original work. Discussion and assignment of current insect subjects. May be repeated to a maximum of six credits. Prereq: Consent of instructor. [Offered in fall and spring.]

ENT 790 RESEARCH IN ENTOMOLOGY AND ACAROLOGY. (1-6)

Independent research in entomology or acarology. May be repeated to a maximum of 12 hours. Prereq: Consent of instructor. [Offered in fall and spring.]

EPE Educational Policy Studies and Evaluation

EPE 174 THEORIES OF COLLEGE STUDENT SUCCESS. (3)

The objective of the course is to introduce theories of student development and the organizational structure of teaching and learning in college. This course satisfies the UK Core requirement for Inquiry in Social Sciences.

EPE 301 EDUCATION IN AMERICAN CULTURE. (3)

Critical examination of contending views, past and present, regarding the nature and role of educational institutions in American society as well as proposed purposes and policies for schools and other educational agencies. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

EPE 317 HISTORY OF EDUCATION. (3)

A study of the historical foundations of American education.

EPE 350 TOWN AND GOWN IN FACT AND FICTION: CAMPUS AND COMMUNITY AS LOCAL HISTORY. (3)

The study of campus and community – “Town and Gown” – as part of local history. It includes reading a variety of sources – novels, memoirs, historical documents, and scholarly articles plus field studies. Prereq: Junior standing or higher.

EPE 374 THEORIES OF COLLEGE STUDENT DEVELOPMENT AND MENTORING. (3)

This course will explore the research discourse regarding college student development, behavior, relationship of student personnel to the total college experience, organization and administration of co-curricular academic support, program evaluation and assessment models, and research of models for college student mentoring. Prereq: Sophomore status or higher.

*EPE 454G CULTURE, EDUCATION AND TEACHING ABROAD. (3)

Introduction to theory and practice of intercultural communication, cross-cultural (especially international experience), and teaching with a global perspective, plus an opportunity for country-specific research. Required for those wishing to student teach overseas. Prereq: Sophomores must have instructor's permission to register. (Same as EDC 454G.)

EPE 520 PROGRAM EVALUATION. (3)

This course is an application-focused course that provides an overview of program evaluation. This course will cover the types of evaluation, the theory associated with evaluation, and the tools most commonly applied to the evaluation process. Students will develop an appreciation for the flexibility needed in order to perform evaluation tasks in practical situations related to their area of expertise. (Same as EDP 520/KHP 520.)

EPE 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS. (3)

Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examinations, criteria for evaluation and marking and other rating systems. (Same as EDC/EDP 522.)

EPE 525 SPECIAL TOPICS SEMINAR IN EDUCATIONAL POLICY STUDIES AND EVALUATION (Subtitle required). (3)

Examination of selected topics in educational policy studies and evaluation. May be repeated to a maximum of six credits but no more than three may be earned under the same subtitle. Prereq: Consent of instructor.

EPE 555 COMPARATIVE EDUCATION. (3)

Analytic and comparative study of contemporary education in selected countries, with emphasis on the historical development and total cultural context of educational programs in non-Western countries. Informal as well as formal agencies and programs will be studied with particular attention to recent reforms and innovations. Prereq: Junior, senior or graduate status, or consent of instructor.

***EPE 557 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA. (3)**

This course is rooted in the conceptual understanding of statistics and covers applications of statistical and graphical methods for educational and evaluation data. Basic descriptive statistics, correlation, normal distributions and hypothesis testing will be covered. An emphasis is placed on exploratory data analysis and interpretation of results within the broad contexts of education and evaluation. Statistical literacy exercises will be used for comprehension and application of materials. In addition, applications of statistical software will be demonstrated. Prereq: MA 109 or equivalent; undergraduate (with permission) or graduate status in the College of Education; or consent of the instructor. (Same as EDP 557.)

EPE 558 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA II. (3)

The course covers applications of statistical and graphical methods for educational and evaluation data. Topics to be covered include descriptive statistics, correlation, normal distributions, hypothesis testing, regression, ANOVA, and power. General goals include: developing an understanding of statistical concepts, improving reasoning and critical thinking skills, and to prepare for more advanced quantitative courses. Students will gain valuable statistical computing skills via stats Software. Prereq: EDP/EPE 557 or equivalent. (Same as EDP 558.)

EPE 571 WRITING SEMINAR IN EDUCATIONAL RESEARCH. (3)

This course is intended to familiarize students with the academic writing process and expectations. Topics include: qualitative writing, quantitative writing, and program evaluation report writing. Other specific writing topics may also be explored

EPE 600 SOCIAL FOUNDATIONS TOPICS FOR SECONDARY EDUCATION. (1)

This course is constructed to link reflective practitioner objectives of the MIC program to scholarly interests of "social foundations" faculty in the UK College of Education. The implicit objective of social foundations courses (e.g., Philosophy of Education, History of Education, Politics of Education, etc.) is to assist students in understanding the social nature of education in our society; to think critically and reflectively about education; and to recognize education as an area of inquiry in which systematic study can benefit practice. In the MIC version of this very abbreviated course, we will attempt to more explicitly link ideas and perspectives in course materials to the aims and interests of future reflective practitioners (you are they). Substantive origins and methodologies found in the "social foundations" course typically come from outside academic specialties like those enumerated above. That is, there are many academic historians and sociologists and political scientists and anthropologists, etc., who are quite interested in formal schooling as a social and cultural enterprise even though they do not work in schools themselves, nor are they interested in "improving" them. Prereq: Admission to the M.A. in Education - Secondary with Initial Certification Option.

EPE 601 PROSEMINAR. (1)

Introductory survey of the bibliographic parameters and research approaches to educational policy studies and evaluation. Graduate faculty resources and typical research problems are introduced. Emphasis upon significance and importance of thesis writing and dissertation in graduate studies. Required, first semester of study, for all degree students in the department. Prereq: Graduate standing or consent of instructor.

EPE 602 SOCIAL POLICY ISSUES AND EDUCATION. (1-3)

Study of philosophical, historical, and sociological dimensions of contemporary educational policy issues. Topical policy controversies, such as equality of educational opportunity, tuition tax credits, and religious education, will be examined.

EPE 603 POLITICS OF EDUCATIONAL LEADERSHIP. (3)

This course provides a study of the political contexts in which educational leaders must operate. The course explores the roles of policy actors, institutions, ideologies, and competing interests, both internal and external to education institutions. The course places emphasis on the ways that race, class, and income factor into political decision making in education. Prereq: Graduate standing. (Same as EDL 704.)

EPE 612 INTRODUCTION TO HIGHER EDUCATION. (3)

This course is intended to give the student a broad overview of contemporary higher education. The course examines major trends, issues, and problems facing colleges and universities from a variety of perspectives, including historical, administrative, public policy, governance, and faculty. The primary objectives of the course are to assist the student in developing an understanding of 1) various components and operations of higher education and 2) the interaction of these components and operations.

EPE 619 SURVEY RESEARCH METHODS IN EDUCATION (Subtitle required). (3)

Survey research is one of the most common and useful methods for gathering data in educational research. Obtaining valid and reliable research results requires the administration of instruments that provide valid and reliable measures of the variables selected for observation. This course will focus on principles of measurement and procedures for developing a variety of survey instruments and for determining their validity and reliability. It is designed to teach students both how to improve the questions and design instruments. The theory and practice of survey research relies on contributions from disciplines such as psychology, sociology, statistics, and computer science. The purpose of this course is to familiarize participants with basic features of the design and implementation of surveys, and acquaint them with some principles and underlying theory from disciplines that have traditionally used surveys most heavily. The course will cover major stages of the survey process, including hypothesis and problem formulation, study design, sampling, questionnaire design, interviewing techniques, pretesting, modes of data collection, and data cleaning, management, and analysis. The course involves lectures, readings, and discussions. Students are encouraged to bring materials related to their own research interests. The course will provide an overview of the theoretical and experimental literature related to question and questionnaire design as well as focusing on practical issues in the design, critique, and interpretation of survey questions that are often not taught in formal courses. There will be exercises both in and outside of class to reinforce both theory and practice. Prereq: EPE/EDP 557 or an equivalent course; an introductory statistics course.

EPE 620 TOPICS AND METHODS OF EVALUATION. (3)

An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to: provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EDP 620/SOC 622.)

EPE 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)

An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE 620/SOC 622; and consent of instructor. (Same as ANT/EDP 621.)

EPE 622 COLLEGE AND UNIVERSITY FACULTY. (3)

This course considers college and university faculty in their roles as researchers, teachers, and community/institutional servants. The class considers from various theoretical perspective who faculty are, what they do, and how they relate to the environments and cultures in which they work. Prereq: EPE 612 or consent of instructor.

EPE 628 ETHICS AND EDUCATIONAL DECISION MAKING. (3)

Examination of ethical theories upon which educational evaluations are based and upon which they become the basis for educational policies. Theories considered include classical and rule utilitarianism, Rawlsian social justice, behavioristic, critical, and hermeneutic theories of value. Prereq: EPE 603 or consent of instructor.

EPE 632 STUDENT SERVICES. (3)

This course focuses on students services (broadly defined) and those who work with college and university students outside of the academic arena. The course not only surveys the history of student services but critically examines its theoretical bases and current practices with special attention paid to the relationship between students services and other segments of campus. Prereq: EPE 612 or consent of instructor.

EPE 640 PHILOSOPHY OF EDUCATION. (3)

The course is designed to enhance the professional educator's competence in analyzing and evaluating educational policies and programs. Theoretical frameworks, philosophical methods, and current educational debates are examined. May be repeated once to a maximum of six credits. Prereq: Twelve semester hours in education or permission of instructor.

EPE 651 HISTORY OF EDUCATION IN THE UNITED STATES. (3)

A history of the growth and development of education in the United States from earliest colonial times to the present, including recent movements and trends.

EPE 652 HISTORY OF EDUCATIONAL THOUGHT. (3)

Description and critical examination of the core ideas of leading educational theorists in the history of Western culture. Emphasis upon the societal and cultural conditions in which the ideas emerged, and the relevance of these ideas to contemporary educational policy concerns.

EPE 653 HISTORY OF HIGHER EDUCATION. (3)

Social and institutional history of higher education which will include selected topics in European culture and education and which will emphasize the development of the American college and university. This is a Distance Learning (DL) course that will be offered via formats and media provided by the University of Kentucky Distance Learning Center. It will be asynchronous in character, using standard Distance Learning internet capabilities.

EPE 655 COMPARATIVE HIGHER EDUCATION. (3)

This seminar will explore comparative methods and theoretical frameworks in international higher education research. Students will examine questions of access, quality, and accountability in tertiary education, student mobility within nations and internationally, and the process of internationalization and regional collaborations in higher education in the US and abroad.

EPE 660 RESEARCH DESIGN AND ANALYSIS IN EDUCATION. (3)

This is a statistics-oriented course that focuses on various aspects of regression analysis (general and generalized linear models). Topics to be covered include, but are not limited to, simple correlation and regression, multiple regression (with and without interaction/moderation terms, with/without nonlinear terms, contrast variable coding for categorical predictors, nested model comparison for hierarchical regression, etc.), regression diagnostics (outlying and influential cases identification and assessment, collinearity evaluation, residual analysis, etc.), logistic regression (with a comparison of the logit model with other commonly used classification models like probit model, decision tree model, etc.), among other things. The course will familiarize students with cleaning data for regression analysis, building regression models, conducting statistical inference of regression models, selecting the optimal regression model(s) for the data in hand, and interpreting regression analysis results using the right language. Students will gain requisite foundation knowledge necessary to learn more complex statistical tests and procedures, and become more critical of statistical presentations in academic journals and the mass media. Students will also become proficient in using at least one major statistics computer program (SPSS, Minitab, SAS, Stata, or R). Prereq: EPE/EDP 558 or consent of instructor. (Same as EDP 660.)

EPE 661 SOCIOLOGY OF EDUCATION. (3)

A study of schooling and education using basic analytic paradigms of sociology. Emphasis on schools as formal organizations and education in a changing, technologically oriented and stratified society. Prereq: SOC 101 or equivalent. (Same as SOC 661.)

EPE 663 FIELD STUDIES IN EDUCATIONAL INSTITUTIONS. (3)

Field research in an educational setting. Questions of theory, method, and application examined. Students plan and implement a study under faculty supervision. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EPE 665 EDUCATION AND CULTURE. (3)

An analysis of the cultural role and function of educational institutions and processes. Topics considered include schooling as cultural transmission, the community context of education, cross-national studies of schools, and implications of anthropological approaches for teacher training.

EPE 667 EDUCATION AND GENDER. (3)

The course examines the relationships between gender and education in U.S. society. The focus will be on the formation and enactment of gender within social and educational institutions. Using a variety of source materials and theories, we will address the following questions. How and what do educational institutions teach about gender? And how do females and males respond to these learning contexts? In what ways are social class, race and ethnicity important to engendering our lives? How does schooling contribute to the differential experiences of women and men in their transitions to adult work in the domestic and waged labor forces? How can education contribute to societal changes in sex equity?

EPE 669 ORAL HISTORY. (3)

This course is an introduction to oral history methodology and theory. It is designed for persons intending to use oral and life history interviews in historical or other qualitative research. The course examines how: oral history projects are initiated, projects are administered, interviews are conducted, and oral history interviews are preserved in archives and libraries. The course also explores the reliability of memory and the utilization of oral histories in public presentations. Readings in the course focus on the development of oral history as a research methodology. Assignments and discussions will provide experience with interviewing, recording and transcribing, editing and publishing oral histories.

EPE 670 POLICY ISSUES IN HIGHER EDUCATION. (3)

A survey of modern tendencies in higher education; scope and development, objectives, organization, administration, curricula, finance, faculty and student personnel. Designed primarily for prospective college administrators, teachers, and registrars.

EPE 672 COLLEGE TEACHING AND LEARNING. (3)

A study of all phases of instruction at the college level. The course will include methods and principles of teaching, utilization of materials in teaching, a consideration of the teaching-learning process as it relates to the individual student, and the evaluation of student progress. A comprehensive course for prospective college teachers.

EPE 674 THEORIES OF STUDENT DEVELOPMENT. (3)

A study of college student behavior, relationship of student personnel to total college program, organization and administration, evaluation, and research of college student personnel.

EPE 675 SOCIOLOGY OF HIGHER EDUCATION. (3)

A study of higher education and society using sociological views and policy perspectives. Topics include inequality and diversity in higher education; universities and colleges as social organizations and cultural institutions; the academic profession, academic departments and disciplines; the social and academic lives of students; as well as the impact of higher education and its relations to labor markets.

EPE 676 ORGANIZATION AND ADMINISTRATION OF HIGHER EDUCATION. (3)

Purposes and scope of higher education, organization, general administration, faculty administration, inter-institutional cooperation, allocation of financial resources, state systems of higher education.

EPE 678 ECONOMICS OF HIGHER EDUCATION. (3)

This course addresses issues of equity and efficiency by analyzing 1) how students, faculty and institutions are influenced by markets and incentives, 2) the economic impact of higher education on students and society, and 3) the financial management of institutions.

EPE 679 INTRODUCTION TO MEASUREMENT THEORY AND TECHNIQUES. (3)

This is a measurement-oriented course that focuses on introducing measurement theory and techniques used in education and evaluation. Topics to be covered include, but are not limited to, measurement models, bivariate measures of association, norms, standardized score scales, scaling, reliability, validity, item analysis, factor analysis, confirmatory factor analysis, test construction for affective and cognitive instruments, Item Response Theory, and Rasch. The course aims to familiarize students with measurement terminology, possess a detailed strategy for constructing an instrument suitable for research purposes, become familiar with statistical procedures and software for implementing measurement techniques, gain requisite foundation of knowledge necessary to learn more complex measurement models, and become more critical of measurement presentations in academic journals and the mass media. Prereq: EDP/EPE 660, EPE 621, or equivalent. (Same as EDP 679.)

EPE 680 POLITICS OF HIGHER EDUCATION. (3)

Survey and analysis of the political forces and processes which influence the development and implementation of higher education policies, financing and programs at the federal, state and institutional levels.

EPE 681 HISTORY OF THE UNIVERSITY: GOVERNANCE AND ITS LEGAL CONTEXT. (3)

Identification and analysis of the legal and governance issues in medieval, reformation and American colonial universities and their implications for contemporary issues of governance, autonomy and academic freedom.

EPE 682 HIGHER EDUCATION AND THE LAW. (3)

Case analysis regarding the university as a legal entity, private universities, the constitutionally autonomous university and other public universities, faculty rights, student rights, miscellaneous issues. Prereq: EPE 681 or consent of instructor.

EPE 683 AFFIRMATIVE ACTION AND FEDERAL REGULATION OF HIGHER EDUCATION. (3)

Affirmative Action as a legal concept; history and current application; sexual harassment; special codes; higher education desegregation cases and other miscellaneous issues including copyright, age discrimination, ADA and the Rehabilitation Acts. Prereq: EPE 682 or consent of instructor.

EPE 684 HIGHER EDUCATION AND ATHLETICS: A HISTORICAL ANALYSIS. (3)

Historical analysis of the politics, economics and philosophical implications of intercollegiate athletics programs as part of the American college and university.

EPE 685 THE RESEARCH UNIVERSITY. (3)

Historical analysis of the changing character, missions and roles of research universities in the United States. Emphasis will be on critical examination of large-scale sponsored research and graduate programs.

EPE 686 PHILANTHROPY AND HIGHER EDUCATION. (3)

Social, historical and philosophical perspective on the development of philanthropy as a significant factor in the character of American higher education and non-profit sector.

EPE 690 THE COMMUNITY COLLEGE. (3)

Comprehensive analysis of community colleges: history, current activity and future; demography, budget, administration. Prereq: EPE 612 or consent of instructor.

EPE 703 PREPARING RESEARCH PROPOSALS. (3)

The goal of this seminar is to provide advanced graduate students with individualized guidance and direction on the preparation of successful research proposals. Typically such proposals will involve masters theses, doctoral dissertations, or various forms of sponsored research. Prior to enrolling in the seminar, students will be expected to have successfully completed graduate level courses in research methodology, data collection techniques, and qualitative and/or quantitative data analysis procedures. Prereq: 6 hours graduate level research methods courses.

EPE 707 MULTIVARIATE ANALYSIS IN EDUCATIONAL RESEARCH. (3)

Multivariate statistics will prepare student to understand multivariate statistical methods and draw the link between statistics previously learned. Students will be able to conduct, interpret, and critique procedures such as factorial ANOVA, multiple regression, MANOVA, ANCOVA, MANCOVA, PCA, EFA, discriminant function analysis, logistic regression, canonical correlation, hierarchical linear regression, and multivariate analysis of change. Become familiar with statistical software for implementing multivariate procedures. Develop an understanding of the concepts, terms, and symbols used in multivariate statistics (e.g., Matrix Algebra, effect sizes). Gain an appreciation of the role of multivariate procedures in the research process. Gain requisite knowledge necessary to learn more complex statistical procedures. Prereq: EDP/EPE 660 or equivalent. (Same as EDP 707.)

EPE 711 ADVANCED QUANTITATIVE METHODS. (3)

This course will provide students with an overview of the theory and applications of advanced quantitative methods. A quantitative research method focuses on advanced quantitative methodologies used in methodologically-oriented studies in educational education, evaluation,

and statistics. The goal of this course is to prepare students to analyze data using advanced quantitative methods. It covers topics in the areas of multilevel modeling, data mining, missing data, categorical data analysis, meta-analysis, and longitudinal data analysis. Other specific analysis techniques may also be explored. Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. Prereq: Prereq: Intermediate Statistics. (Same as EDP 711.)

EPE 712 ADVANCED PSYCHOMETRIC METHODS. (3)

This course will provide students with an overview of the theory and applications of advanced psychometric methods. A psychometric method focuses on advanced psychometric methodologies used in methodologically-oriented studies in educational measurement and evaluation techniques. The goal of this course is to prepare students to analyze data using advanced psychometric methods. It covers topics in the areas of Rasch Modeling, Item Response Theory, Structural Equation Modeling, Advanced Survey Techniques, and Latent Variable Modeling (as well as additional techniques). Given the advanced nature of the course, we will not shy away from using the mathematical tools needed to develop the conceptual understanding. But the emphasis of the course will be on the conceptual understanding and application of the tools rather than on the math or the mechanics behind the tools. Prereq: Intermediate Statistics. (Same as EDP 712.)

EPE 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EPE 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EPE 763 ADVANCED FIELD STUDIES. (3)

This course continues an exploration of qualitative research methods in the study of education. It focuses on advanced data collection techniques and particularly on methods of data analysis, representation and writing. The course revolves around an experiential core of individual student research products. May be repeated to a maximum of six credits. Prereq: EPE 663, other introductory qualitative research methods courses or instructor's permission.

EPE 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EPE 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

EPE 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

EPE 773 SEMINAR IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-3)

Examination of selected problems in educational policy studies and evaluation. May be repeated to nine credits but no more than three credits may be earned under the same title. Prereq: Consent of instructor.

EPE 778 SEMINAR IN HISTORY OF EDUCATION IN KENTUCKY. (3)

Emphasis upon implications of major trends in national historiography for needed research in education in Kentucky. Prereq: A graduate-level course in the history of education or consent of instructor.

EPE 785 INDEPENDENT STUDIES IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-3)

Independent study experience for advanced graduate students to investigate special problems and conduct research in educational policy studies and evaluation. Prereq: Permission of department chairperson required.

EPE 790 INTERNSHIP IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-6)

Formal assignment to an evaluation and/or policy analysis project in an appropriate educational setting. Student's work directed and evaluated by both departmental faculty and on-site supervisor. Laboratory, 5-20 hours per week. May be repeated to a maximum of 12 credits. Prereq: Twelve hours graduate course work in the department and permission of the director of graduate studies.

EPE 797 HISTORICAL RESEARCH ON EDUCATION (DL FORMAT). (3)

Advanced historical research and writing on issues in the study of education taught in Distance Learning (DL) asynchronous format.

EPE 798 SEMINAR IN HIGHER EDUCATION. (3)

A critical study of selected problems in higher education. May be repeated to a maximum of nine credits but no more than three credits may be earned under the same subtitle. Prereq: Consent of instructor.

EPI Epidemiology

EPI 714 EPIDEMIOLOGIC STUDY DESIGN. (3)

This course provides students with advanced course material relevant to the planning and execution of epidemiologic studies of various designs. The course will consider study designs which employ routinely collected data on disease occurrence, such as would be undertaken in government agencies and health departments, and the classic etiologic study designs including the case-control, prospective cohort, retrospective cohort, nested case control, case-cohort and case-crossover designs. The course will focus considerable attention on measurement methods and measurement error, borrowing examples from the subfields of epidemiology including occupational, cardiovascular, and social epidemiology. Given current interest on multilevel methods of analysis, the class will discuss approaches to the incorporation of designing multilevel studies. Finally, we will consider recent advances in experimental epidemiology with consideration of controlled community trials. Prereq: CPH 605 or consent of instructor.

EPI 715 RESEARCH METHODS IN EPIDEMIOLOGY AND BIOSTATISTICS. (3)

This course builds a broad array of skills that are useful for the design and development of research protocols and funding applications for peer review, and for the analysis of resultant scientific data. Prereq: BST 760, EPI 714, and BST 639.

EPI 716 INFECTIOUS DISEASE EPIDEMIOLOGY. (3)

This course provides instruction about the epidemiological and microbiological characteristics of bacteria, fungi, prions, rickettsia and viruses causing emerging and infectious diseases. Prereq: Graduate student or consent of instructor.

EQM Equine Science and Management

EQM 101 INTRODUCTION TO THE HORSE AND THE HORSE INDUSTRY. (2)

An introduction to the horse and its basic biology, behavior and conformation. Additional subjects related to breeds, activities, the industry and current issues will also be covered. Prereq: Restricted to Equine Science and Management majors. [Offered in fall only.]

EQM 105 EQUINE BEHAVIOR AND HANDLING. (2)

This course covers basic equine behavior and how to handle horses safely in a variety of management situations. Students will use their understanding of equine behavior to develop management strategies and practices for all classes of horse. Prereq: EQM 101 and restricted to Equine Science and Management majors. [Offered in spring only.]

EQM 106 INTRODUCTION TO CAREERS IN THE EQUINE INDUSTRY. (1)

This course will introduce students to more than 30 equine industry related jobs through guest lecturers, career research, and job shadowing. Guest lecturers will represent various jobs in different disciplines. They will explain how they ended up with the career they have and through question and answer sessions discuss how others can find similar careers and share career advice with the class. Students will also learn about benefits including insurance, retirement, 401K plans, housing, time off, etc. and they will study different careers in relation to Myers-Briggs personality types. [Offered in spring only.]

EQM 205 EQUINE CAREER PREPARATION. (1)

This course will prepare students for careers in the equine industry by teaching them to prepare for, find, and apply for jobs. It will also help them learn to plan for and design their own business and related marketing, employee relations, and tax issues. [Offered in fall only.]

EQM 300 TOPICS IN EQUINE SCIENCE AND MANAGEMENT. (1-6)

Study in special topics in equine science and management. May be repeated under a different subtitle to a maximum of fifteen credit hours. Hours are variable with each special course. Prereq: As specified by the instructor.

EQM 301 THOROUGHBRED SALES. (1)

This course will introduce students to the thoroughbred sales industry. Students will learn about the different regional and targeted markets as well as the sales process from sales prepping to being auctioned off. Students will learn about the different sales organizations and the different roles of individuals at the sales including consignors, auctioneers, sales companies, veterinarians, owners, pinhookers, and bloodstock agents. Students will also be introduced to the legal aspects of thoroughbred sales from contracts to insurance to financial transactions and conditions of sale. Prereq: EQM 101 or consent of instructor. [Offered in spring only.]

EQM 302 EQUINE EVENT PLANNING. (1)

This course will introduce students to planning equine events. Students will learn about the process of event planning including organization, committee work, and preparing timelines. They will also be introduced to numerous marketing strategies and tools and gain experience working with different registration programs. Students will also gain hands on event planning experience by putting on and Equine Career Fair as a class. They will be assigned to committees, responsible for different tasks, and involved in the Equine Career Fair from developing measurable objectives for success to analyzing survey feedback. Prereq: Sophomore level or above. EQM students on first priority registration. [Offered in spring only.]

Course Descriptions

EQM 351 EQUINE HEALTH AND DISEASES. (3)

This course will focus on health issues affecting the horse industry. Students will learn about the diseases and parasites affecting horses in Kentucky and across the nation. In addition, discussions will focus on management practices used on horse enterprises to reduce incidence of disease and maintain health for breeding horses, performance horses and the recreational horse. Prereq: ASC 320 and major in Equine Science and Management B.S. degree program. [Offered in spring only.]

EQM 399 EQUINE SCIENCE AND MANAGEMENT INTERNSHIP. (1-6)

The equine internship is designed to provide students with experiences in career opportunities related to the horse industry. The internship gives students an educational experience that allows them to see the application of concepts learned in the classroom in an industry setting approved by the instructor. Prereq: Junior standing (minimum of 60 earned credits), at least 12 hours of EQM core courses, 40 hours of verifiable previous work experience in the equine industry, a GPA of 2.0 or above, and an approved learning contract. [Offered in fall, spring and summer.]

EQM 490 CAPSTONE IN EQUINE SCIENCE AND MANAGEMENT. (3)

Discussion of the major issues impacting today's equine industry. Students will use concepts from core and discipline related courses to analyze a variety of scenarios related to the industry. The scenarios will range from production to enterprise management, but may also include issues that have the potential to impact all aspects of the industry. Prereq: Senior standing, major in Equine Science and Management degree. [Offered in fall and spring.]

ER Emergency Medicine

ER 815 FIRST-YEAR ELECTIVE, EMERGENCY MEDICINE. (1-3)

With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Emergency Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

ER 825 SECOND-YEAR ELECTIVE, EMERGENCY MEDICINE. (1-4)

With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Emergency Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

ER 843 EMERGENCY MEDICINE. (4)

This course will provide the students with an introduction to the field of Emergency Medicine, Emergency Medical Services (EMS), and the approach to the acutely ill or injured patient. The students will complete an ACLS class during this rotation. Laboratory, 40 hours per week. Prereq: Admission to fourth year of medical curriculum. (Same as MD 843.)

ER 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)

With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:

ER 850 FOURTH-YEAR ELECTIVE EMERGENCY MEDICINE

ER 853 RESEARCH IN EMERGENCY MEDICINE

ER 875 PEDIATRIC EMERGENCY MEDICINE

ER 890 EMERGENCY MEDICINE OFFSITE

ES Environmental Systems

ES 600 ENVIRONMENTAL SYSTEMS SEMINAR. (1)

A series of presentations by experts in the field on environmental systems topics including topics from the fields of law, economics, social sciences, medicine, biology, engineering and physical sciences. May be repeated to a maximum of two credits.

ES 610 ENGINEERING AND PHYSICAL SCIENCES IN ENVIRONMENTAL SYSTEMS. (3)

Earth systems: environmental impacts of natural and human processes; the role of water systems on the earth including surface water systems, groundwater systems, and water quality and contamination systems; the role of atmospheric systems on earth including the nature and source of air pollutants, meteorological principles, radiation balance, climatology and air pollution, and air pollution control methodology; and processes and principles involved in waste producing organizations. Prereq: Freshman chemistry.

ES 620 ENVIRONMENTAL HEALTH. (3)

An introduction to the theory and practice of assessing, correcting, controlling, and preventing environmental health hazards that may adversely affect the health of current and future generations. Prereq: Undergraduate chemistry and biology, or permission of instructor. (Same as CPH 601.)

ES 630 LEGAL, SOCIAL AND ECONOMIC SCIENCES IN ENVIRONMENTAL SYSTEMS. (3)

Jurisprudential history, ethics and rule of law, environmental economics, history of science, governmental structures, process for development and enforcement of standards, social/political implications of environmental systems, regulatory schemes for environmental control.

ESL English as a Second Language

ESL 090 ENGLISH FOR INTERNATIONAL TEACHING ASSISTANTS. (3)

ESL 090 English for International Teaching Assistants is designed for non-native English-speaking graduate assistants who either placed into or were recommended to take the course during ITA Language Screening conducted by the Graduate College. This course focuses on skills needed for international graduate teaching assistants to be successful in classroom teaching at the university level. Instruction in the course focuses on improving the communication and pronunciation skills of students with special emphasis on listening/speaking skills, presentation skills, negotiation skills, and other classroom management tools such as interactive and pedagogical communication. Students required to take ESL 090 will be reassessed at the completion of the semester to determine types of TA duties they may perform. Students may not count credit from ESL 090 toward their graduate degree requirements.

#ESL 093 ACADEMIC SPEAKING AND LISTENING FOR INTERNATIONAL GRADUATE STUDENTS. (3)

ESL 093: Academic Speaking and Listening for International Graduate Students is designed to help international students develop their oral and aural skills in a practical environment. Students' pronunciation patterns are assessed at the beginning of the semester and time is spent developing a sense of American English sounds, rhythms, and intonation patterns. Course time will also be devoted to helping students develop communication strategies, prepare for and present short presentations, and lead group as well as roundtable discussions. Instruction is often individualized to meet the specific needs of the students and some class time is planned to enable all students to develop better listening strategies and confidence when speaking. Students may not count credits earned in ESL 093 toward their graduate degree requirements.

ESL 095 ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS. (3)

ESL 095 Academic Writing for International Graduate Students is designed to assist international students prepare for academic writing at the graduate level. Particular attention is given to writing conventions in the United States, and there is an emphasis on learning and applying the process of writing (drafting, revision, editing, and proofreading). Students will also learn about the importance of academic honesty at the American University, including how to avoid plagiarism as well as how to evaluate and cite sources in their specific disciplines. May be repeated. Students may not count credit earned in ESL 095 toward their graduate degree requirements.

ESL 100 LISTENING FOR ACADEMIC PURPOSES. (3)

This course cultivates skills to improve academic listening performance for non-native speakers of English enrolled in American university classes. Special attention is given to lecture styles, note-taking, interpersonal communication skills, research projects and presentations. This course is designed to raise students' listening skills so they can participate in academic settings with competencies similar to their native-speaker peers. Prereq: COMPASS Test score determines enrollment.

ESL 110 SPEAKING FOR ACADEMIC PURPOSES. (3)

This course cultivates skills to improve academic speaking performance for non-native speakers of English enrolled in American university classes. Special attention is given to effective academic presentations, interpersonal communication skills, pronunciation and accent. This course is designed to raise students' speaking skills so they can participate in academic settings with competencies similar to their native-speaker peers. Prereq: COMPASS Test determines enrollment.

ESL 120 READING FOR ACADEMIC PURPOSES. (3)

This course cultivates skills to improve academic reading performance for non-native speakers of English enrolled in American university classes. Special attention is given to cross-disciplinary academic reading, reading rates and speeds, effective research methods, documentation and essay exams skills. This course is designed to raise students' reading skills so they can participate in academic settings with competencies similar to their native-speaker peers. Prereq: COMPASS Test determines enrollment for this course.

ESL 130 WRITING FOR ACADEMIC PURPOSES. (3)

This course cultivates skills to improve academic writing performance for non-native speakers of English enrolled in American university classes. Special attention is given to cross-disciplinary research, collaboration, the writing process, content organization and development, editing and proofreading. This course is designed to raise students' writing skills so they can participate in academic settings with competencies similar to their native-speaker peers. Prereq: The COMPASS Test determines enrollment in this course.

#ESL 615 ESL TEACHING METHODS: UNIVERSITY INTENSIVE ENGLISH PROGRAMS. (3)

Building on the foundations of ESL/EFL language acquisition and pedagogy developed in the graduate level MCL 510 and 610 series, this course will introduce pre- and in-service teachers to the structure, curriculum, and pedagogy of intensive English programs (IEPs) in the university setting. Students will engage in research, reflection, observation, and praxis in UK's

Center for English as a Second Language to understand the expectations and challenges in teaching pre-matriculated post-secondary ESL students. Prereq: MCL 510, or permission of instructor; MCL 610, or permission of instructor.

EXP Experiential Education

EXP 396 EXPERIENTIAL EDUCATION. (1-12)

A community-based or field-based learning experience under the supervision of a faculty member. May be repeated to a maximum of 30 credits. Pass/fail with departmental permission required for letter grade. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Career Center prior to course registration.

EXP 397 EXPERIENTIAL FIELDWORK. (1)

A course designed for undergraduates involved in full-time internship studies. Students will be engaged in preprofessional positions such as internships and cooperative education under the supervision of a faculty member. Enrollment in the course constitutes full-time student status. Pass/Fail only. Laboratory, 20–40 hours per week. May be repeated to a maximum of 4 times. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Career Center prior to course registration.

EXP 455 CAPSTONE EXPERIENCE IN INNOVATION AND ENTREPRENEURSHIP. (3)

EXP 455 is designed as the required capstone course to earn the interdisciplinary Certificate in Entrepreneurship Studies at the University of Kentucky. It is aimed at providing students with the opportunity to integrate the knowledge and skills they have acquired as part of the courses they have completed in entrepreneurship as well as provide experiences for students to focus on innovative processes that require entrepreneurial thinking. The course is based upon the National Science Foundation Innovation Corps program and Stanford's Lean Launch Pad developed by Steve Blank. Students get out of the building, build a company, and test hypotheses related to the nine building blocks of the Business Model Canvas as they complete a capstone project that draws on prior entrepreneurial course work. The experience culminates in a formal business plan and pitch. The course requires students to apply their critical thinking skills as they synthesize previous course work and extend and develop their own original ideas in entrepreneurial thinking. By integrating their knowledge and skills, students will also demonstrate that they possess them. Prereq: COM 381 and consent of instructor.

EXP 510 INTERNATIONAL SERVICE-LEARNING. (1-12)

This course is designed to introduce students to the theories, concepts, and practices of service-learning in an international setting. Service-learning engages the student in enhancing the common good through the application of learning to service. (Same as MC 500.)

EXP 650 GRADUATE LEVEL EXPERIENTIAL EDUCATION. (1-9)

A community-based or field-based learning experience under the supervision of a faculty member. Letter grade. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Stuckert Career Center prior to course registration.

EXP 651 GRADUATE LEVEL EXPERIENTIAL EDUCATION. (1-9)

A community-based or field-based learning experience under the supervision of a faculty member. Pass/Fail. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Stuckert Career Center prior to course registration.

FA Fine Arts

FA 501 ARTS-STUDY TOUR. (3)

Domestic or foreign tour for intensive study of the arts in major cultural centers. Seminars, tours, and performances are planned according to specific itineraries. Attendance at all scheduled seminars on campus and arts events during the tour plus maintenance of a journal and completion of a substantial course project is required. May be repeated to a maximum of six credits.

FAM Family Sciences

FAM 251 PERSONAL AND FAMILY FINANCE. (3)

Management of personal and family financial resources throughout the lifespan. A study of individual and family finances as related to planning, credit, savings, investment, insurance, taxes, housing costs, transportation costs, retirement and estate planning.

FAM 253 HUMAN SEXUALITY: DEVELOPMENT, BEHAVIOR AND ATTITUDES. (3)

An introductory survey of human sexuality including gender, love and intimacy, sexual expression and variation, sexual orientation, contraception, pregnancy and birth, sexually transmitted infections, sexual coercion, and sex in society. FAM 253 is a University Studies Program Course. Prereq: Three hours in social or behavioral science.

FAM 254 LIFE COURSE HUMAN DEVELOPMENT. (3)

An introduction to the basic principles of human development through the life course of the individual from conception to death, common life transitions, and social change shape people's lives from birth to death. Roles of family, school, peers, and work will also be examined in relation to human development. Emphasis will be placed on the general theories of human development and their relation to the life course.

FAM 350 CONSUMER ISSUES. (3)

An in-depth study of consumer issues, rights, and responsibilities. An examination of how individual and societal decisions affect quality of life, including consumer safety, and the interactions of consumption, health, law, government regulations and the economy. Consumer education and financial literacy will also be emphasized.

FAM 352 ISSUES IN FAMILY SCIENCES. (3)

The scientific study of the family. Topics covered will include the important theoretical frameworks in family sciences, historical trends in marriage and family life, gender role theory, family life cycle theory, parenthood, communication, economics of family life, family wellness, capacity building, resource sustainability, integrative elements in life course development, conflict, divorce, stepfamilies and stepparenting, and family strengths. Students will analyze contemporary family issues and take informed, written positions on these issues. This course is required for all Human Environmental Sciences students and Family Sciences minors, and meets American Association of Family and Consumer Sciences accreditation standards. Prereq: Restricted to majors in Human Environmental Sciences; and Family Sciences minors only. Junior or senior standing required.

FAM 354 THE FAMILY IN CROSS-CULTURAL PERSPECTIVE. (3)

Approaches the study of the family from a comparative perspective, emphasizing cross-cultural variability in the structure and function of family. Kinship, household formation, sex roles, and socialization are examined in the context of the family, as well as patterns of interaction, personality formation, and family pathology. Prereq: Declared majors or minors in Dept. of Family Sciences or SW. (Same as SW 354.)

FAM 357 ADOLESCENT DEVELOPMENT. (3)

This course conducts an in-depth analysis of adolescent development and adjustment using an ecological, multi-contextual framework. The primary focus is on scholarship and empirical evidence from a number of disciplines that have direct bearing on the study of adolescent development, with a particular interest in applying a cross-cultural/national comparative lens. Prereq: Declared majors or minors in Dept. of Family Sciences, CTED or consent of the instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

FAM 360 INTRODUCTION TO FAMILY INTERVENTION: WORKING WITH FAMILIES AND INDIVIDUALS. (3)

Survey course to introduce students to the various skills, strategies and professional ethical standards used by family scientists in helping relationships. The emphasis will be on learning the skills required to provide support for families and individuals. Prereq: Declared majors or minors in Dept. Family Sciences. FAM 251, may be taken concurrently. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

FAM 390 INTRODUCTION TO RESEARCH METHODS. (3)

An introduction to research design, methodology, instrumentation, and data analysis with emphasis on a student's ability to understand and critique research in human development and family relations. Prereq: Declared majors or minors in Family Sciences; STA 210. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

*FAM 402 ISSUES IN FAMILY RESOURCE MANAGEMENT. (3)

Examination of family economics and management issues and analysis of their impact on the well-being of families across the major transitions of the family life-cycle. Particular emphasis will be given to family decision-making. Prereq: FAM 251 and declared majors and minors in Department of Family Sciences, or with consent of instructor.

FAM 403 MATE SELECTION THEORY AND RESEARCH. (1-3)

This course is designed to develop a basic understanding of mate selection theory and research. Processes in the U.S. and abroad will be explored. Sex, love, culture, values, and how these factors play into the process of mate selection will be covered. Students may enroll for 1, 2, or 3 credits.

FAM 473 FAMILY LIFE EDUCATION. (3)

Historical development, current programs, and emerging trends in family life education with particular emphases on programs and techniques for teaching sex education, marital relations, parenting and human development. Prereq: Declared majors and minors in Department of Family Sciences and FAM 360.

FAM 475 SPECIAL TOPICS IN FAMILY SCIENCES. (1-3)

Course will focus on selected topics drawn from various areas of family sciences taught by faculty members with special interests and competence. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor.

FAM 486 FIELD EXPERIENCES IN FAMILY RESOURCE MANAGEMENT. (3)

Field training in community setting. Opportunities for developing competencies in planning and conducting individual and small group experiences related to family resource management. Lecture, one hour; laboratory, seven hours per week. May be repeated to a maximum of six credits. Prereq: Senior standing and consent of instructor.

FAM 495 INDEPENDENT WORK IN FAMILY SCIENCES. (1-3)

Intensive independent scholarship or training in family sciences. May be repeated to a maximum of 12 credits. Prereq: Junior or senior standing.

FAM 499 INTERNSHIP IN FAMILY SCIENCES. (3)

Supervised internship, and capstone course for seniors, in a community, educational, Cooperative Extension, and/or research setting. Emphasis on observation, teaching, conceptualizing research problems, and developing competencies in providing service at the individual, family and/or community level. Students will be required to assist in designing, implementing, and evaluating research and programs related to family life. Presentations, research papers, outside speakers, and career guidance will be significant course components along with the laboratory hours. Lecture, two hours bi-weekly; laboratory, eight hours weekly. May be repeated for a maximum of six credits. Prereq: FAM 251, 352 and 360, and junior or senior standing. Family Sciences majors only.

FAM 502 FAMILIES AND CHILDREN UNDER STRESS. (3)

An investigation of the stressors and crises experienced by families and their members and their efforts to cope with them. Special attention is given to prevention, management and enrichment strategies. Implications for practitioners will be drawn from conceptual frameworks and recent research. Prereq: FAM 352 and declared majors or minors in Dept. of Family Sciences or consent of instructor.

FAM 544 CULTURAL DIVERSITY IN AMERICAN CHILDREN AND FAMILIES. (3)

Study of cultural and linguistic diversity in American children and families, with special emphasis on Kentucky children and families. Consideration of implications for working with young children and families in educational settings. Study of the variations in beliefs, traditions, values and cultural practices within American society, and their effects on the relationships between child, family, and school. Prereq: FAM 352; declared majors or minors in Dept. of Family Sciences or consent of instructor.

FAM 553 PARENT-CHILD RELATIONSHIPS ACROSS THE LIFECOURSE. (3)

Exploration of the parenting process from a lifespan perspective. Current theory and research, with childrearing application, will be emphasized. Emphasis will be on parent education methods and the changing parental role over the life cycle. Prereq: FAM 352; declared majors and minors in Dept. of Family Sciences or consent of instructor.

FAM 554 WORKING WITH PARENTS. (3)

Principles, techniques, and resources relevant to working with parents as individuals, couples, and families. Survey of related literature on parent effectiveness and parent education is included with relevant field experiences. Lecture, two hours; laboratory, two hours. Prereq: FAM 260 and six hours of 300 level or above in social and behavioral sciences or consent of instructor.

FAM 563 FAMILIES, LEGISLATION, AND PUBLIC POLICY. (3)

A study of the impact of legislation and public policies on the well being of the family. Emphasis on the involvement of individuals and families with policies and legal resources as a means for realizing satisfying life styles. Prereq: FAM 251, 352, and declared majors and minors in Dept. of Family Sciences or consent of instructor.

FAM 585 AGING AND ENVIRONMENT. (3)

Explores the elderly person's changing experience of environment. Physiological, psychological and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as GEO/GRN 585.)

FAM 600 WORKING WITH MILITARY FAMILIES. (3)

This course provides an overview of military work and family connections. Students will gain familiarity with the challenges unique to military individuals and families and the resources available to address them. Topics to be covered include: theoretical approaches to understanding the impact of military work on individuals and families; demographic profiles of and organizational demands on military service personnel and their families; military service and outcomes for children and adolescents, roles and challenges of military spouses; family policy in the military (including current formal and informal support structures and emerging trends in serving military families). Prereq: Graduate or advanced undergraduate standing and 6 hours of 300 level or above courses in social and behavioral sciences or consent of instructor.

FAM 601 FAMILY PROCESSES. (3)

Advanced study of typical family functioning across the family life course from a family process perspective, including examination of how "normal" differs according to family culture, structure, and history. Prereq: Family Science major.

FAM 622 THE FAMILY'S ROLE IN EARLY CHILDHOOD EDUCATION. (3)

The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as EDS 622.)

FAM 624 PERSPECTIVES ON HUMAN SEXUALITY. (3)

An examination and study of historical and current perspectives of sexuality as it relates to behavioral patterns, cultural attitudes, social policy and practice. Prereq: Knowledge of human behavior and personality theory highly recommended. (Same as SW 624.)

FAM 640 USING THE DSM IN CFT ASSESSMENT. (3)

Students will be trained to use the Diagnostic and Statistical Manual of Mental Disorders (DSM) in family therapy assessment and practice. This will include a basic understanding of the process and procedures for diagnosing individual and family disorders, with the intent that students working with families in the context of a traditional mental health milieu will be able

to make appropriate, basic diagnoses. Emphasis on assessing and treating disorders relating to family violence, child abuse, addictions, and substance abuse will be included.

FAM 652 READINGS IN FAMILY THEORY AND RESEARCH. (3)

Entry level course for graduate study of family theory and research. Conceptual frameworks and theoretical approaches are introduced and applied to an array of contemporary family issues, as identified through extensive readings of the empirical research literature. Prereq: Family Science major.

FAM 654 THE LIFE COURSE PERSPECTIVE ON FAMILIES AND INDIVIDUALS. (3)

Individual, family, and societal growth and change through the life span are examined using a life course perspective. The life course perspective emphasizes the interplay of human development, agency, linked lives, historical context, and timing of events. These five interlocking concepts will be understood through reading life course research and applying life course principles and concepts to issues in family sciences.

FAM 658 ADOLESCENT DEVELOPMENT. (3)

A survey of theory and research in adolescent development with particular emphasis on the role of families and implications for working with adolescents. Prereq: Six hours in social or behavioral science.

FAM 660 AGING ISSUES AND FAMILY RELATIONS. (3)

The study of dynamics of family interactions and issues when some family members are elderly. Emphasis is placed on perspectives from multiple generations and across various kin categories. (Same as GRN 660.)

FAM 661 HEALTH AND FINANCIAL ISSUES OF AGING FAMILIES. (3)

This course is designed to discuss health and financial security of older adults and develop empirical research from the perspectives of economics of individual aging and family relations. Emphasis is placed on the following topics: health status of the elderly, economic well-being of older Americans, intergenerational transfers of time and money, family care, giving and work, living arrangements, and empirical research for aging and family. Prereq: STA 570 or equivalent, or consent of instructor.

FAM 668 ALLOCATION OF FAMILY RESOURCES. (3)

Study of the contributors to and the recipients of family resources. Emphasis on the methods of assisting families to better allocate family resources through understanding money beliefs and attitudes and practicing financial planning strategies.

FAM 673 FAMILY LIFE EDUCATION. (3)

Demographic, social, economic, political, and professional issues related to emerging trends in family life education will be examined. Emphasis will be placed on the development, implementation, and evaluation of family life education curriculum materials. Prereq: FAM 690; FAM 652 or FAM 654; or consent of instructor.

FAM 685 PROFESSIONAL ISSUES IN COUPLE AND FAMILY INTERVENTION. (3)

Exploration and definition of the legal, ethical, and professional issues in the practice of couple and family intervention. Emphasis will be on developing professional skills, attitudes, and identity for couple and family intervention.

FAM 686 THEORY AND METHODS IN COUPLE AND FAMILY THERAPY. (3)

A survey of theories and methods used in couple and family therapy. Designed to provide students with a knowledge of the theoretical bases for couple and family therapy, including an introduction to procedures used to assess, diagnose and treat couple and family dysfunctions.

FAM 687 PRE-PRACTICUM: TREATMENT MODALITIES IN COUPLE AND FAMILY THERAPY. (3)

Phases of couple and family therapy process are presented both in theory and in case study analysis. The presenting problem, history of the problem, family history, identification of dysfunctional dynamics, goals, plan of treatment, and outcome/evaluation are emphasized within the context of organizing family therapy and phases of family therapy. Prereq: Admission to the CFT master's program or consent.

FAM 690 RESEARCH METHODS IN FAMILY SCIENCES. (3)

The study of research techniques and methodological problems involved in research on the family. Emphasis is placed on research concerning interrelations between the family and its environment, development within the family, and family dynamics. Prereq: Consent of instructor.

FAM 699 FIELD EXPERIENCES IN FAMILY SCIENCES. (1-3)

Field training in a community setting related to family sciences to develop competencies in program planning, delivery, and evaluation. Student will work under the supervision of a faculty and a training site supervisor. May be repeated to a maximum of six credits.

FAM 703 ADVANCED THEORY AND RESEARCH IN FAMILY ECONOMICS AND MANAGEMENT. (3)

Advanced study of research and theories in family economics and management with special emphasis given to current issues. Conceptual frameworks developed by leaders in family economics and management are studied and applied through designing and carrying out an empirical study. Prereq: Graduate work in statistics and research methods.

FAM 740 COUPLE AND SEX THERAPY. (3)

Field training in a community setting related to family sciences to develop competencies in program planning, delivery, and evaluation. Student will work under the supervision of a faculty and a training site supervisor. May be repeated to a maximum of six credits.

#FAM 745 FAMILIES AND CHILDREN IN PLAY THERAPY. (3)

This course reviews the history, theories, techniques, and methods of play therapy and its clinical application to treat children, adolescents, adults and families. Instruction will include exercises, role playing, videos, class presentations, and instructor lectures. Prereq: FAM 686 or consent of instructor.

FAM 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

FAM 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of FAM 769 residence credit following the successful completion of the qualifying exams.

FAM 752 SEMINAR IN FAMILY THEORY CONSTRUCTION. (3)

An advanced seminar focusing on the definition, evaluation and construction of family theory. Inductive and deductive theory construction strategies are surveyed, evaluated and applied. Prereq: FAM 652. (Same as SOC 752.)

FAM 759 SPECIAL ADVANCED TOPICS IN FAMILY SCIENCES. (1-3)

Intensive study of advanced family sciences topics. May be repeated under different subtitles to a maximum of six credits. Prereq: Consent of instructor.

FAM 763 PRIMARY PREVENTION IN FAMILY SCIENCES. (3)

Designed to provide students with a background in prevention science with applications in family science and child development. Topics will include primary prevention of mental health problems among families and children, principles of prevention, prevention research design, ethical issues, and national agendas in primary prevention research. Prereq: Admission to a doctoral program in the social or behavioral sciences.

FAM 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

FAM 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

FAM 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

FAM 775 PROFESSIONAL DEVELOPMENT SEMINAR. (1-3)

Orientation to policies, procedures, and possibilities in the family sciences graduate program. Prereq: Consent of instructor.

FAM 777 APPLIED STATISTICS IN FAMILY SCIENCE. (3)

Emphasis is on conducting statistical analyses and reporting results. Topics include selection of statistical approach, techniques for conducting analyses, interpretation of output, and writing the results section of a manuscript based on that output. Prereq: STA 570, FAM 690 (or equivalent) and FAM major.

FAM 784 RESEARCH PRACTICUM IN FAMILY SCIENCES. (1-3)

Doctoral student research experience in collaboration with major professor in preparation for the qualifying examination. Prereq: Consent of instructor.

FAM 785 ADVANCED PROBLEMS IN FAMILY SCIENCES. (1-3)

Intensive independent scholarship or training in family sciences. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

FAM 786 TEACHING PRACTICUM IN FAMILY SCIENCES. (3)

Independent doctoral student teaching experience, under faculty supervision. May be repeated to a maximum of 6 credits. Prereq: Consent of instructor.

FAM 787 SUPERVISED PRACTICE OF COUPLE/FAMILY THERAPY. (1-6)

Intensive study of skills, issues, or treatment procedures in couple and family therapy. May be repeated to a maximum of eighteen credits. Prereq: Admission to the CFT master's program.

FAM 790 ADVANCED RESEARCH METHODS IN FAMILY SCIENCES. (3)

Advanced study of quantitative research methods, including but not limited to complex study designs, model building and structural equation modeling, reliability and validity of measures, statistical power and effect size, mediator and moderator variables, and identifying appropriate statistical techniques for specific types of problems. Prereq: FAM 690 and FAM 777, or equivalents.

FCS Family and Consumer Sciences**FCS 110 INTRODUCTION TO CAREER AND TECHNICAL EDUCATION. (3)**

The history, status, philosophy, and objectives of career and technical education in relation to general education. (Same as AED 110.)

FCS 350 DESIGN ISSUES FOR FAMILY AND CONSUMER SCIENCES EDUCATORS. (3)

This course will provide a broad understanding and appreciation of the housing and interior design fields. Topics will cover the many issues faced with selecting and personalizing a home. Various housing and design options are presented to help recognize the wide variety of choices available for addressing different needs and life situations. FCS Education students will design lesson plans to correspond with housing and design topics. Design projects will be completed.

FCS 362 FIELD EXPERIENCES IN CAREER AND TECHNICAL EDUCATION. (3)

Supervised experiences in schools and other agencies. Required of all Career and Technical Education majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Majors only. (Same as AED 362.)

FCS 371 ADVISING A CAREER AND TECHNICAL STUDENT ORGANIZATION. (3)

This course is designed to assist students in developing skills and competencies needed to plan, implement, advise, and evaluate a Career and Technical Student Organization as part of the total CTE program. (Same as AED 371.)

FCS 395 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION. (1-3)

Directed independent study of a selected problem in the field of career and technical education under the supervision of a faculty member. May be repeated to a maximum of 6 credit hours. Prereq: Consent of appropriate instructor. (Same as AED 395.)

FCS 399 EXPERIENTIAL LEARNING IN CAREER AND TECHNICAL EDUCATION. (1-3)

A field based learning experience in career and technical education under the supervision of a faculty member. Student must complete a learning contract which outlines the requirements agreed to by the student for successful completion of the course. Prereq: Consent of appropriate instructor. (Same as AED 399.)

FCS 535 PRINCIPLES AND PHILOSOPHY OF CAREER AND TECHNICAL EDUCATION. (3)

Study is made of philosophy, accepted principles, and legislation affecting programs in career and technical education.

FCS 580 FOUNDATIONS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)

Course focuses on the foundation of teacher development including: effective teacher characteristics, principles of teaching and learning, and preparation of lesson plans. Prereq: Admission into the Teacher Education Program. (Same as AED 580.)

FCS 583 DESIGNING CURRICULUM AND ASSESSMENT IN CAREER AND TECHNICAL EDUCATION. (3)

Instructional methodology course focused on analyzing the principles of teaching and learning to design curriculum, instruction, and assessment for formal and non-formal educational settings. (Same as AED 583.)

FCS 586 METHODS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)

Development of teaching competencies with emphasis on: discussion, demonstration, problem-solving, cooperative learning, service learning methods. Prereq: Admission into the Teacher Education Program and AED/FCS 580. (Same as AED 586.)

FCS 592 TEACHING EXPERIENCE IN CAREER AND TECHNICAL EDUCATION. (12)

Supervised experience in teaching Career and Technical Education. Requires observation, lesson plan development, and incorporation of effective teaching methods and strategies. Regularly scheduled seminars included as an integral part of course. Prereq: Admission into the Teacher Education Program and successful completion of AED/FCS 580 and AED/FCS 586. (Same as AED 592.)

FCS 670 ADVANCED METHODS IN TEACHING CAREER AND TECHNICAL EDUCATION. (3)

The principles of method applied to teaching in the field of career and technical education. Prereq: Experience in teaching vocational education.

FCS 671 YOUTH ORGANIZATIONS IN CAREER AND TECHNICAL EDUCATION. (3)

A study of the underlying philosophy and principles for organizing and advising youth organizations in career and technical education. Emphasis on activities that will enrich and motivate the instructional programs, and develop leadership, cooperation and citizenship. (Same as AED 671.)

Course Descriptions

FCS 679 ADULT EDUCATION IN CAREER AND TECHNICAL EDUCATION. (3)

Preparation for teaching adult classes in career and technical education including organization of classes, development of curriculum, and methods of teaching.

FCS 684 CURRENT TRENDS IN CAREER AND TECHNICAL EDUCATION. (3)

Class work in current trends and significant developments in career and technical education. May be repeated to a maximum of nine credits.

FCS 686 INSTRUCTIONAL ASSESSMENT IN CAREER AND TECHNICAL EDUCATION. (3)

Instructional assessment of learning and achievement in Career and Technical Education middle and high school classrooms is addressed. Focus is placed on test writing, measurement and student achievement. (Same as AED 686.)

FCS 693 SUPERVISION IN CAREER AND TECHNICAL EDUCATION. (3)

This course includes practice in teaching for observation by others, student teaching, and school visiting.

FCS 694 THE ADMINISTRATION OF CAREER AND TECHNICAL EDUCATION. (3)

A course designed for superintendents, high school principals, and other leaders. Its purpose is to prepare administrators and supervisors for leadership in career and technical education.

FCS 695 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION. (3)

An independent work course for students interested in career and technical education. Students make individual investigations and report on special problems.

FCS 710 COLLEGE TEACHING OF AGRICULTURE, NATURAL RESOURCES AND HUMAN SCIENCES. (3)

A course designed to assist current or future college faculty in agriculture, natural resources or human science disciplines seeking to enhance the teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education. Prereq: Graduate Standing in the College of Agriculture.

FCS 799 RESEARCH IN CAREER AND TECHNICAL EDUCATION. (1-3)

Individual research of importance to career and technical education. May be repeated to a maximum of nine credits. (Same as AED 799.)

FIN Finance

FIN 250 PERSONAL INVESTING AND FINANCIAL PLANNING. (3)

An overview of financial planning, decision making and investing activities. Emphasis is on financial assets such as stocks, bonds, options and futures and their use in meeting investment goals. Discusses IRAs, 401(k)s and other retirement programs. Also considers mutual funds, real estate, insurance and other alternatives. Includes a discussion of asset selection and allocation strategies, risk management methods, and alternative wealth maximization strategies.

FIN 300 CORPORATION FINANCE. (3)

An introduction to the basic principles, concepts, and analytical tools in finance. Includes an examination of the sources and uses of funds, budgeting, present value concepts and their role in the investment financing and dividend decision of the corporate enterprise. Prereq: ECO 201, ECO 202, ACC 201, ACC 202, MA 123, STA 291 or equivalent.

FIN 360 PRINCIPLES OF REAL ESTATE. (3)

An overview of the basic concepts and principles of real estate in the private and public sectors. The course provides an introduction to real estate issues and a foundation for further study in the various specialized areas of real estate and urban development. The course will cover topics related to urban economics, mortgage finance, and real estate valuation.

FIN 395 INDIVIDUAL WORK IN FINANCE. (1-6)

Students confer individually with the instructor. Written paper usually expected and filed in chairperson's office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

FIN 405 CAPITAL INVESTMENT AND FINANCING DECISIONS. (3)

A study of the factors that drive firm decisions to invest in new plant, capital equipment or technology and/or to pursue acquisitions of other firms. Optimal strategies for financing such investments are also a focal point of this capstone course, which involves extensive application of financial concepts and tools. Prereq: ACC 301, ACC 302 (prereq or coreq), ECO 391, and a grade of C or better in FIN 300.

FIN 410 INVESTMENT ANALYSIS. (3)

Analysis of corporation statements for investment purposes; the security market; market influences on security prices; effect of interest changes on security prices; and the development of investment programs. Prereq: ACC 301, ACC 302 (prereq or coreq), ECO 391, and a grade of C or better in FIN 300.

FIN 423 INTERNATIONAL FINANCE. (3)

The course provides an overview of world trade, international monetary and trade theory, and the theory of exchange rate determination. Focus is on the management of short- and long-term

international assets, with particular attention given to the direct investment decision and on financing international operations. Prereq: ACC 302 and a grade of C or better in FIN 405.

FIN 430 FINANCIAL MODELING. (3)

The rapidly increasing computational power of personal computers in combination with the development of dynamic software solutions for computational needs have in the recent few years brought the advantage of fairly sophisticated financial models into the reach of a broader audience. The increasing flow of financial information is converting the skill of quantitative modeling using computers from an advantage into a necessity. This course is designed to provide students with the skills necessary to apply modern financial theories to real world applications using advanced spreadsheet and visual-basic programming tools. Prereq: ACC 302 and a grade of B or better in FIN 410.

FIN 432 QUANTITATIVE PORTFOLIO MANAGEMENT. (3)

This course covers the complex characteristics and analysis of individual securities as well as the theory and practice of optimally combining securities into portfolios. Stressing the economic intuition behind the subject matter, this course presents advanced concepts of investment analysis and portfolio management. Prereq: ACC 302 and a grade of C or better in FIN 410.

#FIN 435 VENTURE FINANCE. (3)

The goal of this class is to understand the process of new venture financing from both the entrepreneur and investor perspectives. The course will primarily focus on the financing of high-growth technology start-ups. Students will learn how to apply financial theory to new venture valuation and capital structure decisions. Prereq: A grade of C or better in FIN 405.

FIN 452 OPTIONS AND FUTURES. (3)

A study of the options and futures markets including institutional aspects, pricing, and regulation. Primary emphasis will be on the uses and applications of options and financial futures. Prereq: ACC 302 and a grade of C or better in FIN 410.

FIN 464 REAL ESTATE FINANCE. (3)

The course surveys the sources and uses of real estate funds. The institutions which provide funds and the various types of financial instruments are described and compared. Likewise, various forms of real estate investment are analyzed and methods of determining value are critiqued. Prereq: A grade of C or better in FIN 410.

FIN 465 FINANCIAL INSTITUTIONS MANAGEMENT. (3)

A study of the principles and cases in commercial banking practice. Financial institution management practices are studied within the economic, monetary, fiscal and legal framework of the American economy. Prereq: ACC 302, and a grade of C or better in FIN 410.

FIN 470 FINANCIAL RISK MANAGEMENT. (3)

Financial price risk in the form of unexpected movements in the foreign exchange rates, interest rates, and commodity prices and their impacts on a firm's earnings, cash flows, value, and competitiveness are the focus of this course. Various financial derivatives such as forwards, futures, options, and swaps and different hedging techniques, principles, and strategies will be studied. The course also includes the design, development, execution, and evaluation of corporate risk management program. Lecture, discussion, readings, case study, and internet access approaches will be employed. Prereq: ACC 302, FIN 405, and FIN 410.

FIN 475 FIXED INCOME SECURITIES. (3)

The course provides students with an introduction to the fundamentals of fixed income securities and markets. Topics covered include bond pricing, convexity, duration, the yield curve, the U.S. Treasury market, corporate bond markets and mortgage-backed securities. Prereq: A C or better in FIN 410.

FIN 480 MONEY AND CAPITAL MARKETS. (3)

A study of the institutional structure and theory of the money and capital markets, including the types of financial claims traded in such markets, the major buyers and sellers, the regulatory environment, capital market theory, and the forces of supply and demand affecting the level and structure of interest rates. Prereq: ACC 302, and a grade of C or better in FIN 410.

FIN 485 APPLIED INVESTMENT ANALYSIS AND PORTFOLIO MANAGEMENT. (3)

The course gives students a working knowledge of, and experience applying, the basic principles of value-oriented equity investing. Students manage a real-money equity portfolio currently, making all buy/sell decisions. Prereq: Consent of instructor.

FIN 490 SPECIAL TOPICS IN FINANCE (Subtitle required). (3)

Readings, projects, lecture and/or discussion to illuminate current topics of special interest or concern in finance. May be repeated to a maximum of six credits. May not be repeated under the same title. A particular topic may be offered at most three times under the FIN 490 number. Prereq: Varies by topic.

***FIN 600 CORPORATE FINANCIAL POLICY. (3)**

A study of financial management from the viewpoint of the corporate financial officer. Areas studied include capital budgeting, capital structure, financing decisions, working capital management, dividend policy, and mergers and acquisitions. Prereq: Graduate standing: ECO 610, ACC 628, MGT 650 or consent of department.

***FIN 623 INTERNATIONAL FINANCIAL MANAGEMENT. (3)**

This course provides an overview of financial management at the international level. Topics covered include: The nature and uses of international financial markets, the financial behavior of multinational corporations, exchange rates, and hedging in international business. Prereq: FIN 600 or consent of the department.

FIN 630 FINANCIAL MODELING AND ANALYSIS. (3)

This course provides students with the skills necessary to apply modern financial theories to real world applications in both corporate finance and investments. Students will get hands-on experience implementing models from areas such as capital budgeting, financial planning, and asset valuation.

***FIN 637 HEALTH FINANCE. (3)**

This course applies general principles of finance to the financial management of health care institutions. The major financial incentives which dictate how health care is delivered are studied and proposals to change these incentives are explored. Prereq: MHA/MPA program status and HA 601, HA 621, PA 623, HA 635, or consent of department.

***FIN 645 CORPORATE INVESTMENT AND FINANCING POLICY. (3)**

Emphasizing both theory and practice, this course is an in-depth study of long-term corporate investment and financing decisions. Topics include valuation, capital budgeting, cost of capital, leasing, dividend policy, capital structure, and mergers and acquisitions. Prereq: FIN 600 or consent of department.

***FIN 650 INVESTMENTS. (3)**

Analysis and valuation of securities and the effects on investment decisions. Prereq: Appropriate undergraduate courses in accounting and finance or consent of department.

***FIN 664 REAL ESTATE FINANCE. (3)**

A basic orientation in commonly used instruments, institutional structures, and real estate financing policies. Emphasis will be placed on mortgage instruments, mortgage types, effective cost of borrowing, construction lending, financial institutions, loan underwriting, and the secondary mortgage market. Analysis is primarily from the debt investor's perspective. Prereq: FIN 600 or consent of department.

FIN 680 MONEY, INTEREST AND CAPITAL. (3)

A study of the theory of money, interest and financial intermediation. In addition to the theory, the major financial markets, financial institutions and financial instruments will be examined. Finally, the governmental agencies which regulate the industry will be discussed as will the overlapping nature of the regulatory process. Prereq: Completion of the first year MBA core or consent of instructor.

#FIN 685 INVESTMENTS PRACTICUM. (3)

The course gives students a working knowledge of, and experience applying, the basic principles of value-oriented equity investing. Students manage a real-money equity portfolio, making all buy/sell decisions. Prereq: Consent of department.

***FIN 691 ADVANCED TOPICS IN FINANCE (Subtitle required). (1-3)**

The study of selected topics in finance for graduate students. Special title required. May be repeated for a maximum of nine credits under different subtitles. Prereq: Consent of department.

***FIN 695 INDIVIDUAL WORK IN FINANCE. (1-6)**

Students confer individually with the instructor. Prereq: Consent of department.

FIN 700 SEMINAR IN FINANCIAL THEORY. (3)

Primary emphasis on the theory of financial asset valuation. Topics include utility theory, investor reaction to uncertainty, cost of capital theory, dividend theory, portfolio theory, and asset pricing in equilibrium.

FIN 701 SEMINAR IN FINANCIAL THEORY II. (3)

A continuation of FIN 700. Topics covered include state-preference theory, arbitrage pricing theory, agency theory, and the pricing of contingent claims.

***FIN 740 SEMINAR IN THEORETICAL CORPORATE FINANCE. (3)**

This is an introduction course in theoretical corporate finance for Ph.D. students. This course has the objective of introducing doctoral students to theoretical research in corporate finance. The emphasis will be on incomplete information models, though a few models driven by other considerations will also be studied. The first part of the course will examine the fundamentals of corporate finance theory (e.g., the theory of the firm's choice of its capital structure and dividend policy under alternative assumptions), as well as various tool areas in corporate finance (e.g., the notion of moral hazard and agency problems, adverse selection and signaling, various aspects of non-cooperative games with and without incomplete information, and the equilibrium concepts in such games). The second part of the course will focus on a couple of important related topics which are the focus of recent research in corporate finance. Prereq: FIN 600 and 650, or equivalent or consent of department.

***FIN 745 SEMINAR IN MANAGERIAL FINANCE. (3)**

Primary emphasis on the implementation of financial theory for the management of the assets of a business firm. Topics include capital budgeting, working capital planning, financing the firm, cost of capital and the financial structure of the firm, and mergers and acquisitions. Prereq: FIN 700 or consent of department.

***FIN 750 SEMINAR IN INVESTMENT THEORY. (3)**

Primary emphasis on the implementation of financial theory for the evaluation and management of financial assets in an efficient capital market. Topics include mean-variance efficiency, development and testing of the capital asset pricing model, stochastic dominance, and option pricing theory as well as other topics in modern capital market theory. Prereq: FIN 700 or consent of department.

***FIN 780 SEMINAR IN FINANCIAL INSTITUTIONS. (3)**

An examination of the role of financial institutions in the financial system and in the economy, with special emphasis on commercial banks. Topics covered include: theories of financial

intermediation, asset-liability management, regulation and deposit insurance, structure of the financial institutions industry, and empirical models of banking. Prereq: FIN 700 or consent of department.

***FIN 791 SEMINAR IN FINANCE (Subtitle required). (1-3)**

An intensive study of current theory and research in a topic in finance as discussed in scholarly journals. Examples of possible topics include: Capital structure, agency theory, market efficiency, contingent claims. May be repeated with a different subtitle for a maximum of 12 credits. Prereq: Consent of department.

***FIN 795 INDEPENDENT WORK IN FINANCE. (1-12)**

Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to a total of 12 credit hours. Prereq: Consent of department.

FM Family and Community Medicine

FM 815 FIRST-YEAR ELECTIVE, FAMILY MEDICINE. (1-3)

With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Family and Community Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

FM 825 SECOND-YEAR ELECTIVE, FAMILY MEDICINE. (1-4)

With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Family and Community Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

FM 840 FAMILY AND COMMUNITY MEDICINE RESEARCH. (4)

The Department Family and Community Medicine (DFCM) Research Elective is a 4 week course for medical students in Year 4 to experience primary care and community medicine research. Under the mentorship and supervision of a qualified DFCM faculty member, students will develop specific plans for a research experience. Students will be expected to identify a DFCM faculty member and an associated research experience with this member prior to enrollment to this elective course. This experience may involve various aspects of a research experience continuum, such as specific aim and hypotheses generation, study design, literature reviews, implementing interventions, collecting data, data analyses, manuscript preparation and submission. Prereq: (1) Fourth year medical student. (2) Has identified a Department of Family and Community faculty member and project.

FM 841 OFF-SITE PRECEPTORSHIP IN FAMILY MEDICINE. (1-6)

A senior selective in remote sites designed to acquaint the student with the functions, techniques, and experiences associated with a family physician. Students will function in an office-based practice of family physicians, will live in the community and practice primary health care delivery. One credit per week, not to exceed six weeks. Prereq: Admission to the fourth year, College of Medicine.

FM 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)

With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:**FM 850 ACTING INTERNSHIP IN FAMILY MEDICINE****FM 851 CLINICAL CLERKSHIP IN FAMILY MEDICINE****FM 852 INTERDISCIPLINARY APPROACH TO SPORTS MEDICINE****FM 853 INTERNATIONAL CLERKSHIP IN PRIMARY CARE****FM 854 ACTING INTERNSHIP IN RURAL FAMILY MEDICINE****FM 855 HOSPICE AND PALLIATIVE CARE: A CONTINUUM OF CARING****FM 856 INTEGRATIVE MEDICINE**

FOR Forestry

FOR 100 FORESTS AND FORESTRY. (3)

This course covers the interrelated components of forests as well as their growth and importance. Also covered are the general fields of professional forestry including policies, management practices and utilization.

FOR 101 INTRODUCTION TO WILDLIFE CONSERVATION. (3)

An introduction to the history, concepts, and principles of wildlife biology and management. The role of wildlife in ecological systems and human-altered environments will be discussed. Lecture, two hours; laboratory, two hours per week.

FOR 110 NATURAL RESOURCE ISSUES. (1)

A communication intensive course in which students will learn to research current forestry and natural resource issues, interpret popular press and professional publications, evaluate opposing viewpoints, and discuss issues in a clear, effective and professional manner through a variety of communication media.

FOR 150 COMPUTER APPLICATIONS IN NATURAL RESOURCE PROFESSIONS. (2)

Use and application of standard computer software to solve problems. Emphasis will be placed on decision processes and algorithm construction. Additionally, students will learn to construct aesthetic graphs, diagrams, maps and other visual material and will gain experience communicating results in a variety of written formats.

FOR 200 BASICS OF GEOSPATIAL TECHNOLOGY. (3)

A basic introduction to the various types of maps and their uses, field navigation skills, and map making. The course is heavily field and laboratory based, with an emphasis on hands-on learning and practice. Both traditional technologies, such as compasses, U.S. Geological Survey maps, and aerial photographs as well as newer technologies, such as global positioning systems and geographic information system databases will be employed in carrying out course exercises.

FOR 205 FOREST AND WILDLAND SOILS AND LANDSCAPES. (4)

A study of soil-plant-landscape relationships as related to forestry and the management of natural ecosystems. Emphasis will be on properties and processes of wildland soils, and on interrelationships between soils; composition and productivity of plant communities; and the structure, form, and functioning of landscapes. Lecture, three hours; laboratory, three hours per week. Prereq: At least three credits of biology and three credits of chemistry.

FOR 219 DENDROLOGY. (4)

A study of the basic concepts of botany related to woody species and their use, along with basic soil and site characteristics in the identification of trees and forest vegetation.

FOR 221 WINTER DENDROLOGY. (1)

Identification of 100 species of trees, shrubs, and lianas based upon bark, form, twig, and bud characteristics. Laboratory; four hours per week for one-half semester. Prereq: FOR 219.

FOR 240 FORESTRY AND NATURAL RESOURCE ETHICS. (2)

A study of the key ethical concepts of conservation, preservation, deep ecology, land ethic, spiritualism/religion, and multiple value systems as applied to forestry and natural resource issues. Students will gain an understanding of the ethical dilemmas faced by natural resource professionals, and will be able to identify ways of handling these dilemmas, including application of professional associations' codes of ethics.

FOR 250 STATISTICS AND MEASUREMENTS I. (4)

The application of statistical concepts, computations, and software to forestry sampling and inventory problems. Land, individual tree and timber stand measurement techniques will be covered as will the design and implementation of sampling systems to derive information necessary to meet landowner objectives. Prereq: MA 109 or calculus.

FOR 255 FOREST FIRE. (1)

Basic wildland fire behavior including factors that impact the start and spread of wildfires. Learn foundational skills needed for wildland firefighters. Topics also include an introduction to the incident command and incident management systems. A day-long field day is required as part of the course.

FOR 260 FOREST PRODUCTS AND WOOD SCIENCE. (4)

An examination of basic material properties of wood, methods by which it is used, and issues and economic conditions in which domestic and global wood markets operate. Concepts covered include species identification, chemical and mechanical properties and their effect on utilization, utilization technologies and their linkage to silvicultural practices, and affiliated issues such as recycling, product certification, environmental concerns, and alternative products.

FOR 261 WOOD SCIENCE AND ANATOMY. (2)

A 2 credit hour course examining the basic structure of wood and how it affects wood's physical properties. Topics include macroscopic wood properties, composition and structure of wood cells, hardwood and softwood structure, juvenile wood, reaction wood, wood and water relationships, wood deterioration and prevention, and specific gravity and density.

FOR 262 WOOD IDENTIFICATION. (2)

A 2 credit hour course covering the methods and techniques necessary for identifying common wood species. Topics include macroscopic wood properties, hardwood and softwood structure, and the systematic thought processes for successful identification of 27 wood species.

FOR 280 FOREST RESOURCE POLICY AND LAW. (3)

This course provides a basic knowledge of United States policy and law as it applies to management and administration of forests and related resources on public and private land. Topics include the sources, development, and analysis of relevant laws, administrative regulations, and other policies. Judicial decisions addressing the management of National Forests, biodiversity, water resources, and other specific issues will be discussed.

FOR 285 COMMUNICATION AND PROFESSIONAL DEVELOPMENT IN FORESTRY AND NATURAL RESOURCES I. (1)

Course provides students with the knowledge and skills to communicate effectively in a variety of professional situations. Leaders from the forestry sector will meet with students in open

seminar settings to discuss various internship and career opportunities, job requirements, and career paths. A key component of these presentations will emphasize the ideas, concepts, and skill sets students need to succeed in various forestry careers.

FOR 286 COMMUNICATION AND PROFESSIONAL DEVELOPMENT IN FORESTRY AND NATURAL RESOURCES II. (1)

The course provides students with the knowledge and skills to communicate effectively, written and orally, in a variety of professional settings. Students will meet with forestry and natural resource professionals at their place of business, professional conferences, and in class. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 366, or consent of the field semester coordinator.

FOR 310 INTRODUCTION TO FOREST HEALTH AND PRODUCTION. (1)

Introduction to common forest health challenges in the central Appalachians. Identify symptoms associated with common biotic agents (e.g., hemlock woolly adelgid, emerald ash borer, chestnut blight, etc.) and abiotic stressors that affect the health of forested ecosystems. Understand and assess the effects these problems have on ecosystem processes and different methods for conserving forest resources while addressing the impacts. Course incorporates components of forest entomology, forest pathology, abiotic stressors, and invasive species. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 366, or consent of the field semester coordinator.

FOR 320 FOREST VALUATION AND ECONOMICS. (3)

Apply economic concepts to silvicultural practices, land values, and values affiliated with various forest uses. Apply supply and demand concepts and financial computations to identify and quantify economic consequences of silvicultural actions or management practices. Taxation and monetizing ecosystem services will be discussed. Prereq: MA 109 or Calculus.

FOR 325 ECONOMIC BOTANY: PLANTS AND HUMAN AFFAIRS. (3)

Plants have played a major role in human affairs. Course will relate plant life processes and chemistry to human uses: food crops, spices, medicinals, and materials. Major units are the origins agriculture and early domesticates, ethnobotany, and a selection of plants and plant products with major historical impacts — potato, nutmeg, pepper, chocolate, sugar cane, cotton, quinine, rubber, tobacco. Contemporary themes include herbal medicine and plant-based pharmaceuticals. Prereq: PLS 104, PLS 210, one year of introductory biology, or permission of the instructor.

FOR 330 GIS AND SPATIAL ANALYSIS. (3)

Principles and operations of Geographic Information Systems (GIS) applied to forestry and natural resources. Students will learn to collect necessary field data to create GIS maps and digital spatial data sets, perform basic spatial analysis, and integrate social and economic data to solve spatially related natural resource problems. Prereq: MA 109 or Calculus, and FOR 200, or consent of instructor.

FOR 340 FOREST ECOLOGY. (4)

The study of the forest as a biological community, covering ecosystem concepts such as energy flow, forest nutrition, nutrient cycling, and decomposition. Interrelationships between trees and other organisms comprising the community is also examined through concepts of disturbance, succession, population dynamics, biological and ecosystem diversity, ecosystem management, and ecosystem services. Prereq: BIO 103 or BIO 150.

FOR 350 SILVICULTURE. (4)

A study of ecologically based manipulations of forests to achieve desired management objectives. Develop and apply silvicultural prescriptions and learn the effects of these prescriptions on timber and non-timber forest benefits, forest health and biodiversity, soil, and water resources as well as their effect on broader social, economic, and ecological issues. Prereq: FOR 219 and FOR 250.

FOR 356 FOREST SOILS AND HYDROLOGY. (1)

Students will learn to assess the physical environment of forested ecosystems by examining soil-plant-water relationships across a variety of landscape settings. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 366, or consent of the field semester coordinator.

FOR 357 INVENTORY AND MEASUREMENTS II. (2)

This is a practical course designed to provide students with knowledge and skills related to the collection of forest inventory data and the preparation of a forest inventory report required to manage forests and natural resources. Students will become familiar with statistical concepts used in forest measurements; use mapping and navigation procedures to locate sampling areas; conduct forest inventories; and develop inventory reports. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, PLS 366 or consent of the field semester coordinator.

FOR 358 SILVICULTURAL PRACTICES. (3)

A study of the silvicultural practices for altering the forest canopy and regenerating the forest. Students will learn to apply these practices to meet multiple use objectives such as forest products, wildlife, health and protection, watershed, and recreation and develop silvicultural prescriptions. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, PLS 366 or consent of the field semester coordinator.

FOR 359 FOREST OPERATIONS AND UTILIZATION. (3)

Plan and design timber harvests, mark a stand for harvest, and describe the effects of harvesting. Use herbicides and pesticides to eradicate invasive species, perform tree planting, conduct thinnings, and participate in prescribed burns. Learn timber utilization technology and determine value added in converting trees to lumber. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, PLS 366 or consent of the field semester coordinator.

FOR 365 WILDLIFE ASSESSMENT. (2)

An experiential learning opportunity designed to introduce students to basic concepts of forest wildlife management. Become familiar with common techniques to determine wildlife presence and relative abundance. Learn how forest management practices can directly and indirectly impact many wildlife species and their habitats in Kentucky. Understand how forestry and wildlife professionals manipulate forests to meet wildlife management and biodiversity conservation objectives at various spatial scales. Learn the direct and indirect impacts of some wildlife species on forest management. Prereq: FOR 219, FOR 250, FOR 330, FOR 340, FOR 350, FOR 370, and PLS 366, or consent of the field semester coordinator.

FOR 370 WILDLIFE BIOLOGY AND MANAGEMENT. (4)

Applications of basic biological concepts such as physiology, energetics, nutrition, digestive systems, and anatomy to the study of wildlife and wildlife management. In addition to basic wildlife biology, students will also learn taxonomy and identification of wildlife and the principles of wildlife management as well as applied field techniques such as trapping and radio telemetry.

FOR 399 FIELD-BASED EDUCATION IN FORESTRY. (1-6)

The use of field experience as an educational complement to classroom work. May be repeated to a maximum of 12 credits which are to be used as electives. Prereq: Permission of instructor and department chairperson. A departmental learning agreement must be completed prior to registration.

FOR 400 HUMAN DIMENSIONS OF FORESTRY AND NATURAL RESOURCES. (3)

In an issues based format, students will study and write about societal trends and their impact on natural systems, the disconnect between society and nature, wildlife-human interactions, as well as problems related to globalization and urbanization. Prereq: This course is approved to fulfill the Graduation Composition and Communication Requirement (GCCR) for forestry majors. To receive GCCR credit for this course, you must 1) already have sophomore status (completed 30 credit hours), 2) earn an average grade of C or better on the designated Composition and Communication intensive assignments, and 3) complete this course and the other approved GCCR course, FOR 480. This course provides partial credit for the written component of the GCCR for the forestry major in conjunction with FOR 480. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

FOR 425 FOREST MANAGEMENT. (4)

The principles of sustained yield forest management, management objectives, forest regulation, allowable cut, and timing of timber harvests. Students will identify management objectives for various properties and ownership types and integrate scientific knowledge and both timber and non-timber considerations with landowner objectives to derive management decisions. Prereq: Completion of the Spring Field Semester or consent of instructor. (Same as AEC 425.)

FOR 435 CONSERVATION BIOLOGY. (3)

Review the ethical foundations of conservation biology, discuss the scientific evidence that illustrates recent rapid loss of biological diversity at multiple spatial and temporal scales, identify and elaborate on the causative factors of biodiversity loss, discuss various strategies for conserving biodiversity, and discuss ways that various human cultures and associated resource use influence non-human life and the human societies that depend on them. Conservation biology is multidisciplinary in scope and discussion topics include wildlife management, restoration ecology, economics, ethics, geology, evolution, philosophy, phylogeny, taxonomy, genetics, behavioral ecology, population ecology, disease, sociology, sustainable living, and human dimensions. Conservation topics will be global in scope, with well-studied case examples used to support class activities. Prereq: Introductory biology course, or consent of instructor.

FOR 460 FOREST HYDROLOGY AND WATERSHED MANAGEMENT. (3)

Principles and techniques involved in watershed management as it relates to the practice of forestry. Emphasis is placed on understanding the hydrologic cycle, plant-soil interactions from a land-use and landscape perspective, and the need for implementation of forestry best management practices. Prereq: Forestry spring field semester, or NRE 320, or consent of instructor.

FOR 461 INTRODUCTION TO POPULATION GENETICS. (3)

This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/BIO/ENT 461.)

FOR 470 INTERDEPENDENT NATURAL RESOURCE ISSUES. (3)

Culmination of the student's study of public concerns and problems related to natural resources. Work in teams to find and verify information on diverse topics, listen to and address public concerns, communicate natural resource information to a wide range of audiences, and be effective professionals in working toward solutions. Prereq: Senior Standing. This is a writing-intensive (W) course approved to fulfill the upper tier of the graduation writing requirement (GWR). To receive W credit for this course, you must have successfully completed the first-year writing requirement (ENG 104 or its equivalent) and have completed at least 30 hours of course work. Forestry majors must complete this course and FOR 400 to fulfill the upper tier graduation writing requirements.

FOR 480 INTEGRATED FOREST RESOURCE MANAGEMENT. (5)

Capstone course. Students will be presented with a real life management scenario in a forested location in Kentucky. Working in teams, students will collect data, determine management

objectives, and develop action plans for managing the forest according to the desires of the owner, subject to realistic legal, economic, ethical, and social constraints. Students will be required to produce a professional management plan and present the plan in a public forum at the end of the semester. Prereq: Completion of Field Semester, FOR 425, FOR 460, and Senior Standing. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

***FOR 502 FOREST ENTOMOLOGY. (3)**

Lectures primarily address principles and concepts. Laboratories use a hands-on approach to demonstrate insect collecting and identification techniques, ecological concepts and management approaches, and use of reference materials. Prereq: A minimum of 3 credits of basic biology (BIO 103 or BIO 148 or equivalent) or consent of instructor. (Same as ENT 502.)

FOR 510 HERPETOLOGY. (4)

This is a 4-credit, advanced biology and/or wildlife course about amphibians and reptiles for both undergraduate and graduate students. Lectures and labs follow two concurrent themes: 1) a survey of amphibians and reptiles, with special emphasis on Kentucky species, and 2) a general analysis of amphibian and reptile biology, ecology, conservation and management. Prereq: All students enrolled in FOR 510 should have taken at least one college-level Biology course.

#FOR 520 MAMMALS OF THE EASTERN UNITED STATES. (4)

Covers the evolution, taxonomy, biogeography, biology, and natural history of mammals, emphasizing North American fauna. All mammalian orders extant (and extinct) in North America will receive coverage, emphasizing major morphological differences among groups, and physiological and behavioral adaptations to North American climates and ecosystems. Lecture discussions will cover major physiological systems (digestive, excretory, reproductive, etc.), energetics, diet and nutrition, reproductive patterns, and anatomical differences unique to each taxonomic order. Laboratory exercises will stress identification of extant mammals occurring in eastern North America, with heavy emphasis on species occurring in Kentucky and adjacent states. Prereq: Entry level courses in biology (BIO 148 or equivalent), field ecology (FOR 340 or equivalent), and wildlife management (FOR 370 or equivalent) or consent of instructor.

#FOR 530 FRESHWATER ECOLOGY. (3)

Advanced biology and natural resources course about the ecology of freshwater environments. Course material covers 1) interactions among freshwater species and between the species and their aquatic environment, 2) how these interactions influence distribution and abundance of freshwater species, and 3) conservation and management of freshwater species and aquatic systems. Prereq: Upper level course in biology, field ecology, wildlife management or consent of the instructor.

#FOR 540 URBAN ECOLOGY. (3)

Discussion-based course focused on describing urban ecosystems, the processes determining patterns of abundance and distribution of organisms in urban ecosystems, the interactions among organisms in the urban environment, the interactions between humans (and societies) and nature in urban environments, and some aspects of urban planning and urban forestry as it relates to ecology and the environment. Prereq: Upper level course in biology, ecology, environmental policy or consent of the instructor.

#FOR 550 U.S. BIODIVERSITY HOTSPOTS. (3)

This is a 3-hour travel-based experiential learning course designed to immerse students in some of the most biodiverse areas in the U.S. Students will experience and learn about the ecology, geology, conservation, and management activities and policy of these areas by: 1) visiting several representative protected areas (e.g. National Parks, National Forests), and 2) interacting with resource managers and land stewards that work on landscape and local conservation and management issues to get a feel for the challenges and opportunities in protecting biodiversity and accommodating human needs. Student funded domestic travel is embedded with this course. There is a cost of approximately \$600 for this trip. Prereq: At least two upper level (300+) courses in biology, forestry, ecology, wildlife, or natural resources environmental sciences, or consent of instructor.

#FOR 570 LANDSCAPE ECOLOGY FOR NATURAL RESOURCES. (3)

Principles of landscape ecology and their applications to contemporary ecological issues. Students will learn and apply the tool of geographic information system (GIS) and spatial analysis to problems in natural resource ecology, management, and conservation. Course covers the following topics: principles of landscape ecology (e.g., patch, mosaic, and scale), quantification of landscape patterns, formation and dynamics of landscape patterns, role of disturbance, landscape models and their applications. Prereq: Any upper level course in GIS or consent of instructor. (Same as GEO 570.)

FOR 599 INDEPENDENT WORK IN FORESTRY. (1-3)

Study and independent work on selected problems related to allocation and utilization of natural resources. May be repeated to a maximum of six credits. Any combination of FOR 599 and FOR 781 cannot exceed six credits. Prereq: Senior or graduate standing and consent of instructor.

FOR 601 RESEARCH METHODS IN FORESTRY. (3)

A study of research methods, procedures, and techniques used in forestry. Major emphasis will be placed on problem analysis and methods of conducting organized research. Prereq: Graduate standing.

FOR 602 RENEWABLE NATURAL RESOURCES IN A GLOBAL PERSPECTIVE. (3)

An advanced course that examines world and transboundary issues related to renewable natural resources. Students will attend a series of lectures, discuss assigned readings, and identify issues for further study. Student research papers related to those issues will be presented and discussed in a seminar format. Prereq: Graduate standing.

FOR 605 EMPIRICAL METHODS IN ECOLOGY AND EVOLUTION. (2)

This course provides students with hands-on experience in a diverse array of modern research methods used by ecologists and evolutionary biologists, including techniques used in: molecular genetics, chemical ecology, behavioral studies, motion analyses, using high-speed video, image analyses for morphometrics and color, and field techniques in both aquatic and terrestrial systems. Lecture, one hour; laboratory, three hours per week. Prereq: BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 605.)

FOR 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)

This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 606.)

FOR 607 ADVANCED EVOLUTION. (2)

This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivision) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 508 or consent of instructor. (Same as BIO/ENT 607.)

FOR 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)

This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as BIO/ENT 608.)

FOR 609 POPULATION AND COMMUNITY ECOLOGY. (3)

This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as BIO/ENT 609.)

FOR 612 FOREST ECOSYSTEM DYNAMICS. (3)

The study of ecosystem structure and function with emphasis upon eastern deciduous forest ecosystems. Topics discussed will include energy flow, mineral cycling, the influence of disturbance upon ecosystem properties and dynamic processes in the development of ecosystems. Prereq: FOR 340 or BIO 451G and consent of instructor.

FOR 620 SPECIAL TOPICS IN FORESTRY (Subtitle required). (1-3)

Special topical or experimental courses in forestry for advanced graduate students. Special title required and must be approved by the chairperson of the Department of Forestry. May be repeated to a maximum of nine credits. Students may not repeat under the same subtitle. Prereq: Consent of instructor.

FOR 622 PHYSIOLOGY OF PLANTS I. (3)

A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as BIO/PLS 622.)

FOR 623 PHYSIOLOGY OF PLANTS II. (3)

A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, phytochrome-photomorphogenesis-phototropism nitrogen and sulfur metabolism. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as BIO/PLS 623.)

FOR 662 QUANTITATIVE METHODS IN RENEWABLE AND NONRENEWABLE RESOURCE MANAGEMENT. (3)

Application of dynamic optimization methods to renewable and nonrenewable resource management. Includes problem formulation, mathematical problem solving, Matlab programming, simulations and optimal policies analysis. Case examples are used to demonstrate applicability and problem formulation in finance and general and partial equilibrium. Prereq: MA 113 and MA 162 or equivalent, and AEC 661 or equivalent. (Same as AEC 662.)

FOR 667 INVASIVE SPECIES BIOLOGY. (3)

This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as BIO/ENT 667.)

FOR 695 FIELD RESEARCH IN FORESTRY. (0)

Full-time research that requires the student to remain off-campus for extended periods. Students enrolled in this course remain in full-time academic status. May be repeated to a maximum of 2 semesters. Prereq: Graduate standing in the Forestry Graduate Program. For students whose research precludes them from taking courses on campus for a semester. Registration requires (a) approval of Research Contract by a committee of at least three Forestry faculty members established to consider a particular student's Research Contract, (b) approval of Research Contract by Director of Graduate Studies, and (c) approval of Research Contract by Associate Dean for Academic Programs.

FOR 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

FOR 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours. Prereq: Consent of adviser and chairperson of the department.

FOR 770 FORESTRY SEMINAR (Subtitle required). (1)

Reports and discussions on recent research and current literature. Credit is given to those who satisfactorily present papers. Required of all graduate students. Can be repeated to a maximum of three credits. Prereq: Graduate standing.

FOR 781 SPECIAL PROBLEMS IN FORESTRY. (1-3)

Advanced study of selected problem areas in forestry. May be repeated for a total of six credits; any combination of FOR 781 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate adviser.

FOR 791 RESEARCH IN FORESTRY. (1-3)

Involves original research in selected areas of interest in forestry. May be repeated for a total of six credits; any combination of FOR 781 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate adviser.

FP Family Practice and Community Medicine

FP 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)

With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

FR French Language and Literature

FR 011 FRENCH FOR READING KNOWLEDGE. (3)

This course is designed to meet the needs of upper division and graduate students who are preparing for the graduate reading examination.

FR 101 ELEMENTARY FRENCH. (4)

The study of basic French through grammar, reading and oral practice.

FR 102 ELEMENTARY FRENCH. (4)

A continuation of FR 101. The study of basic French through grammar, reading and oral practice. Prereq: FR 101.

FR 103 FRENCH CINEMA. (3)

A history of the French cinema from the early twentieth century to the present. Emphasis on the primary aesthetic movements of French cinematic expression in social and historical context. Attention given to the formal elements specific to film, techniques of film analysis, and the nature of visual culture. Viewing of films outside of class required. Taught in English, with no knowledge of French necessary.

FR 106 ELEMENTARY FRENCH REVIEW. (5)

A course equivalent in level to FR 102 designed to prepare students with two or three units of high school French for French 201 who, on the basis of the placement test, appear to lack sufficient skill in French for that course. Prereq: Two years of high school French and the placement test.

FR 201 INTERMEDIATE FRENCH. (3)

Reading, conversation and oral comprehension are the basic aims of this course, which is structured around contemporary texts. Prereq: FR 102 or two years of high school French and placement test.

- FR 202 INTERMEDIATE FRENCH. (3)**
A continuation of FR 201. Prereq: FR 201 or three years of high school French and placement test.
- FR 204 INTRODUCTION TO FRENCH AND FRANCOPHONE STUDIES. (3)**
Introduces students to the concepts, questions, and methodologies that inform the study of the Francophone world. Includes an intensive French grammar review. Prereq: FR 202 or equivalent.
- FR 205 THE FRENCH GRAPHIC NOVEL. (3)**
Examines the rich tradition of graphic narrative in France where the modern comic form was invented in the early nineteenth century. Explores the technical aspects of graphic narrative and considers how the graphic novel has been linked to political questions of national identity in post-war France. Taught in English with no knowledge of French necessary.
- FR 214 FRANCE TODAY. (3)**
Explores the issues, debates, and conflicts that define culture and society in contemporary France. Emphasis on speaking and listening skills in French. Prereq: FR 202 or equivalent.
- FR 215 VISUAL CULTURES. (3)**
An interdisciplinary discussion of the centrality of the visual in French and Francophone society and culture. Representative examples of the kinds of visual media encountered might include medieval tapestries as well as twenty-first century web sites. Prereq: FR 202 or equivalent.
- FR 225 FRENCH FILM NOIR. (3)**
Examines the crime thriller and the “noir” style in French cinema during the 1940s and 50s. Emphasis on the aesthetic, philosophical, and historical origins of the crime film in France, the impact of French cinema on Hollywood film noir, and the role of noir in French visual culture. Viewing of films outside of class required. Taught in English, with no knowledge of French necessary.
- FR 263 AFRICAN AND CARIBBEAN LITERATURE AND CULTURE OF FRENCH EXPRESSION IN TRANSLATION (Subtitle required). (3)**
This course treats major cultural questions concerning the exchange between Africa and the Caribbean in terms of historical, sociological, political, and literary events. No knowledge of French is required. (Same as AAS 263.)
- FR 307 FRENCH FOR BUSINESS AND ECONOMICS. (3)**
Development of specialized conversational and written proficiency necessary to import-export business activities, banking, insurance, business regulation, etc., in the French-speaking world. Prereq: FR 204.
- FR 310 FRENCH PHONETICS. (3)**
Phonetics and phonemics, theory and practice. Advanced corrective pronunciation drill on an individual basis. Prereq: FR 204.
- FR 311 INTRODUCTION TO FRENCH LINGUISTICS. (3)**
An introduction to the study of language structure. Explores various aspects, levels, and components of verbal communication. Prereq: FR 204.
- FR 324 STUDIES IN FRENCH LITERATURE (Subtitle required). (3)**
An introduction to the major trends of the French literary tradition, with emphasis on textual analysis and critical approaches. May be repeated to a maximum of 6 hours with a different subtitle. Prereq: FR 204.
- FR 325 FRENCH CINEMA (Subtitle required). (3)**
An introduction to the analysis of film and to the major movements in the history of French cinema. May be repeated up to 6 hours with different subtitle. Prereq: FR 204.
- FR 335 WAR, LITERATURE, FILM. (3)**
This course examines the strategies used by French writers and filmmakers to translate the experience and memory of World War I and World War II into literary and cinematic form. Topics treated will include eyewitness testimony, uses of irony and humor, the representation of disfigurement, the question of documentary, collaboration with the enemy, and practices of commemoration. Taught in English, with no knowledge of French necessary.
- FR 344 THE LITERARY TEXT (Subtitle required). (3)**
An exploration of the concepts of text and textuality in relation to the notions of authorship, form and formal experiment, theme and other questions at the heart of literary studies. May be repeated up to 6 hours with a different subtitle. Prereq: FR 204.
- FR 350 FRANCOPHONE CULTURES: (Subtitle required). (3)**
Explores the social, historical, and political situation of French-speaking cultures outside metropolitan France. May be repeated up to 9 hours with a different subtitle. Prereq: FR 204 or equivalent.
- FR 395 INDEPENDENT WORK IN FRENCH AND FRANCOPHONE STUDIES. (3)**
Directed study in French and Francophone studies. Given in exceptional circumstances only. May be repeated up to 6 credit hours. Prereq: Major, junior or senior standing, 3.5 grade-point average in the major, consent of instructor, and approval of the Director of Undergraduate Studies.
- FR 410 FRENCH IN PERFORMANCE. (3)**
Deepens linguistic and analytical skills as well as cultural knowledge through the rehearsal and performance of texts and other cultural artifacts. Representative activities include theatrical and short cinematic productions. Prereq: Completion of 6 hours of 300-level or higher French course work.
- FR 425 MEDIA STUDIES. (3)**
Provides a set of skills for the critical analysis of different types of textual, audio, and visual media in the French-speaking world. Students will consider the relationship between information media and aesthetic media and explore the extent to which both “mediate” between what is called the real world and their reading, viewing, listening public. Prereq: Completion of 6 hours of 300-level or higher French course work.
- FR 470G TOPICAL SEMINAR I (Subtitle required). (3)**
Advanced work on a specific topic, concept or problem in the field of French and Francophone Studies. Emphasis on advanced critical skills and research methods. Recent topics include: War, Literature, Film; Comedy in the Age of Enlightenment; *Le nouveau roman*; Literature and Film of Subsaharan African; The Eighteenth-Century Novel; Ghosts, Vampires, and the Fantastic; Love and Madness in the Nineteenth Century; *Le poème ivre*; The Early Modern Self. May be repeated to a maximum of 6 credits under different subtitle. Prereq: Completion of 9 hours of 300-level or higher French course work.
- FR 471G TOPICAL SEMINAR II (Subtitle required). (3)**
Advanced work on a specific topic, concept or problem in the field of French and Francophone Studies. Emphasis on advanced critical skills and research methods. Recent topics include: War, Literature, Film; Comedy in the Age of Enlightenment; *Le nouveau roman*; Literature and Film of Subsaharan African; The Eighteenth-Century Novel; Ghosts, Vampires, and the Fantastic; Love and Madness in the Nineteenth Century; *Le poème ivre*; The Early Modern Self. May be repeated to a maximum of 6 credits under different subtitle. Prereq: Completion of 9 hours of 300-level or higher French course work.
- FR 502 INTRODUCTION TO CRITICAL AND CULTURAL THEORY: THE FRENCH CONNECTION. (3)**
Introduces upper-level undergraduate and beginning graduate students to the principles of critical and cultural theory. Explores topics of language, textuality, writing, subjectivity, culture, gender, everyday life, and power through the work of primarily, but not exclusively, French thinkers such as Saussure, Barthes, Fanon, Foucault, Derrida, Lyotard, Kristeva, Baudrillard, de Certeau. Taught in English with no knowledge of French necessary.
- FR 504 TOPICS IN FRENCH LITERATURE AND CULTURE (Subtitle required). (3)**
Intensive study of an author, genre, period or movement of French literature or an aspect of French culture. May be repeated to a maximum of nine credits under a different subtitle.
- FR 510 LINGUISTIC STRUCTURE OF MODERN FRENCH. (3)**
An introduction to the basic phonological, syntactic and semantic categories and processes of contemporary French as studied in the light of current linguistic theory and practice. Prereq: FR 306 or equivalent.
- FR 550 FRANCE TODAY. (3)**
A contrast between contemporary France in today’s Europe and the historical image of France. The impact of the “New Quiet French Revolution” and of the new institutions on French Society. Conducted in French. Prereq: FR 306 and consent of instructor.
- FR 553 TEACHING OF FRENCH. (3)**
The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on French. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.
- FR 570 SEMINAR IN FRENCH LANGUAGE PEDAGOGY. (1)**
A general seminar in a broad range of subjects in the area of French language pedagogy. May be repeated to a maximum of two credits. Prereq: Graduate student standing in French or consent of instructor.
- FR 606 LITERATURE OF THE MIDDLE AGES (Subtitle required). (3)**
Special topics in French literature from the period 1050-1500. May be repeated to a maximum of six credits. Prereq: Consent of instructor.
- FR 607 STUDIES IN RENAISSANCE LITERATURE (Subtitle required). (3)**
Comprehensive study of selected writers. May be repeated under a different subtitle to a maximum of six credits. Prereq: Consent of instructor.
- FR 609 SEVENTEENTH-CENTURY STUDIES (Subtitle required). (3)**
Study of selected French writers, literary, intellectual and cultural practices of the time. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.
- FR 612 STRUCTURE AND STYLISTICS OF FRENCH. (3)**
A study of the history and structure of French with an emphasis on contemporary features. (Same as ENG/LIN 612.)
- FR 617 EIGHTEENTH-CENTURY STUDIES (Subtitle required). (3)**
Literary, intellectual and social practices and theories of the French Enlightenment. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

- FR 619 NINETEENTH-CENTURY STUDIES (Subtitle required). (3)**
Study of the intellectual, literary and social practices and theories of the major movements of the century, including Romanticism, Realism, and Symbolism. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.
- FR 621 TWENTIETH-CENTURY STUDIES (Subtitle required). (3)**
Study of the practices and theories of the major intellectual, literary and social movements of the century, such as modernism, existentialism, the new novel, post structural and postmodern writing. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.
- FR 630 FRENCH LANGUAGE, LITERATURE AND CULTURE OUTSIDE FRANCE (Subtitle required). (3)**
Study of Francophone writing, currents of thought, and cross-cultural movements in Africa, the Caribbean, Quebec and elsewhere. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.
- FR 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)**
May be repeated to a maximum of 12 hours.
- FR 780 SPECIAL STUDIES IN FRENCH. (3)**
Selected studies and investigations in the French language and literature, permitting the student to work in areas of special interest, and providing opportunity for original endeavor. May be repeated to a maximum of six hours. Prereq: Consent of instructor.

FSC Food Science

- FSC 107 INTRODUCTION TO FOOD SCIENCE. (3)**
A general basic food science course that deals with world food needs and available food supplies, types of food and nutritive values and use, food processing technology and distribution methods.
- FSC 304 ANIMAL FOOD PRODUCTS. (4)**
Principles of red meat, poultry, fish and dairy processing; physical and chemical composition and nutritive value of meat, dairy and egg products; structure and identification of muscle; inspection, grading, formulation, processing and preservation methods; organoleptic properties and consumer acceptance of processed meat, dairy, and egg products. Lecture, three hours; laboratory, two hours per week. Prereq: FSC 107.
- FSC 306 INTRODUCTION TO FOOD PROCESSING. (4)**
Commercial processing of foods including theory and use of heat exchangers, separators, freezers, air and vacuum dryers, evaporators, membrane separation, electro dialysis, emulsion formers, extruders, and irradiators. Physico-chemical changes in osmotic pressure, vapor pressure, pH surface tension, viscosity, emulsification and colloidal dispersions in processed foods will be discussed. Processing of waste streams will also be discussed. Prereq: CHE 105, CHE 107, CHE 236.
- FSC 395 SPECIAL PROBLEM IN FOOD SCIENCE. (1-4)**
Independent study in food science under the supervision of a faculty member. A learning contract must be completed prior to enrolling course. May be repeated for a maximum of 8 credits. Prereq: Completion of learning contract and consent of instructor.
- FSC 399 EXPERIENTIAL LEARNING IN FOOD SCIENCE. (1-3)**
A field-based learning experience in food science under the supervision of a faculty member. May be repeated for a maximum of six credits on a pass/fail basis. Prereq: Consent of instructor and department chairman and completion of a departmental learning contract before registration.
- *FSC 430 SENSORY EVALUATION OF FOODS. (3)**
This course deals with the sensory evaluation methods used for food products based on flavor, odor, color, and texture. This includes techniques for measuring sensory attributes, instrumental analysis of foods, statistical analyses of data, and how sensory evaluation programs are utilized in the food industry. Prereq: STA 296 and FSC 306, or FSC 304 (prerequisite or concurrent enrollment).
- FSC 434G FOOD CHEMISTRY. (4)**
Chemical and physical properties of proteins, lipids, carbohydrates, pigments and food additives as they relate to food processing and food preservation. Lecture, three hours; laboratory, two hours. Prereq: BCH 401G or consent of instructor.
- FSC 530 FOOD MICROBIOLOGY. (5)**
Study of procedures for the enumeration and identification of foodborne microorganisms important in the food industry. Principles for controlling contamination and growth of microorganisms during production, processing, handling and distribution of food products. Lecture, three hours; laboratory, four hours. Prereq: BIO 108 and BIO 109 or equivalent.
- FSC 535 FOOD ANALYSIS. (4)**
Techniques and instrumentation used to determine the chemical composition of foods. Emphasis is placed on the principles of chemical analysis as it relates to foods and food processing. Lecture, two hours; laboratory, four hours per week. Prereq: FSC 434G.
- *FSC 536 ADVANCED FOOD TECHNOLOGY. (4)**
Concepts of developing/improving new food products or food processing including: consumer awareness, marketing, ingredient specifications, product formulation, stabilization of product,

packaging to meet shelf life goals, shelf testing of products, challenge testing, establishment of HACCP system, consumers testing, market testing, and introduction to the market. A capstone course, where all concepts of food science are used to extend or create new food products for the market place. Lecture, three hours; laboratory, two hours. Prereq: AEN 340, FSC 306, and FSC 535; or consent of instructor.

- FSC 538 FOOD FERMENTATION AND THERMAL PROCESSING. (4)**
Thermal processing of foods. The use of microorganisms in the preservation of raw foods and the manufacture of new foods. Manipulation and improvement of cultures to ensure production of desirable end products. Lecture, three hours; laboratory, two hours. Prereq: BIO 108, BIO 109, BIO 476G, FSC 530 or consent of instructor.
- FSC 540 FOOD SANITATION. (3)**
A study of sanitation principles and techniques for ensuring the safety and wholesomeness of our food supply. Prereq: FSC 530 or equivalent.
- FSC 603 INTEGRATED NUTRITIONAL SCIENCES III. (2)**
This course is aimed at providing medical and health professional students with a working knowledge of dietary requirements and guidelines, nutritional assessment and nutritional requirements, food safety issues and nutritional needs throughout the lifecycle. Prereq: Health Professional Graduate Status. (Same as CNU/NS 603.)
- FSC 630 ADVANCED MEAT SCIENCE. (4)**
Advanced meat science with special reference to the histological, chemical, physical and microbiological properties as they relate to meat quality, organoleptic acceptability and processing procedures. Lecture, three hours; laboratory, two hours. Prereq: FSC 304, FSC 306 or equivalent; one course in histology or biochemistry or consent of instructor. (Same as ASC 630.)
- FSC 632 FOODBORNE DISEASE AGENTS. (3)**
Discussion of microorganisms, toxins and chemical involved in foodborne illnesses as well as procedures for controlling and investigating foodborne disease outbreaks. Prereq: FSC 530.
- FSC 636 FOOD PACKAGING. (2)**
Detailed description of food packaging materials, composition and resistance to chemical and physical damage and their use in food systems as well as criteria for selection of packaging systems for specific food processing techniques will be presented. Methods of production, e.g.: blow mold, casting and extrusion; layering; lamination and co-extrusion; processing; and printing and sealing will be discussed. Prereq: FSC 536, FSC 538 or equivalent or consent of instructor.
- FSC 638 FOOD PROTEINS. (3)**
This course deals with chemical, biochemical, and enzymatic significance of proteins in food systems; physicochemical and functional properties of animal and plant proteins, their interactions with lipids, carbohydrates, flavors, minerals and other food components during processing and storage, and resulting modifications of food quality. Prereq: FSC 434G or consent of instructor.
- FSC 640 FOOD LIPIDS. (3)**
An advanced study of the physical, chemical, and biochemical significance of lipids in foods. Topics include the structure and function of lipids in post-harvest physiology, interaction with other food components, and the effect of lipids on the physical properties of foods during processing and storage. Prereq: One course in Food Chemistry or Biochemistry.
- FSC 642 FOOD PIGMENTS. (3)**
Course deals with the chemistry and biochemistry of color of different food products which influence consumers' purchase decision. Lecture topics include fundamental basis of food color and pigments, manipulation of food color, influence of processing on food color, and regulatory issues related to food pigments. Prereq: FSC 434G.
- FSC 780 SPECIAL PROBLEMS IN ANIMAL DERIVED FOODS. (1-4)**
May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as ASC 780.)
- FSC 790 RESEARCH IN ANIMAL DERIVED FOODS. (1-6)**
Problems involving original investigation. May be repeated for maximum of nine credits. Prereq: Consent of graduate adviser. (Same as ASC 790.)

GEN General Agriculture

- GEN 100 ISSUES IN AGRICULTURE, FOOD AND ENVIRONMENT. (3)**
An introductory course requiring critical analysis of the major social, economic, political and scientific issues in agriculture and related disciplines. The historical development of agriculture will be surveyed, followed by discussions of major issues related to agriculture, food and environment. Development of skills in information gathering, critical analysis of issues, and written and oral communication will be emphasized. Satisfies the U.S. Citizenship area of UK Core. Prereq: Students enrolled in the College of Agriculture, Food and Environment; freshmen only in fall semesters and transfer students only in spring semesters.
- GEN 109 SPECIAL INTRODUCTORY COURSE: (Subtitle required). (1-6)**
Interdisciplinary, topical or experimental courses offered at the introductory level to be approved by the Dean of the College of Agriculture, Food and Environment. A particular title may be offered at most twice under the GEN 109 number. Students may not repeat under the same title; repeatable to a maximum of twelve credit hours. Prereq: To be set by the instructor.

GEN 200 ISSUES IN AGRICULTURE: CONTEMPORARY PROBLEMS IN AGRICULTURE AND NATURAL RESOURCES. (3)

An intermediate course which extends the critical analysis of selected issues in agriculture and related disciplines begun in GEN 100. Continues the development of skills in information gathering, critical analysis, and written and oral communication. Students will be required to investigate scientific literature germane to the issues covered and develop reviews, reports and position papers. Prereq: Sophomore enrolled in College of Agriculture.

GEN 300 SPECIAL COURSE. (1-3)

Interdisciplinary, topical or experimental courses to be approved by the Dean of the College of Agriculture. A particular course may be offered at most twice under the GEN 300 number, and no GEN 300 course may be given for more than three credits per semester. Open to all University students, subject to such limits or prerequisites as set by the instructor. Hours are variable with each special course. Prereq: As specified by the instructor.

GEN 301 AN INTRODUCTION TO CHINESE CULTURE THROUGH AGRICULTURE. (3)

This course is designed to introduce students to basic culture in China. Students will learn about Chinese agriculture, languages, customs, history, the political and educational system, geography and the economy. The culmination of the course is a three-week trip to China. Only students committed to go on trip to China will be enrolled in the course. First priority for the trip is given to College of Agriculture students.

GEN 302 INTERNATIONAL EXPERIENCE IN AGRICULTURE AND NATURAL RESOURCES. (1-6)

Credit for international experiences and travel abroad related to College of Agriculture degree programs. Students must work with faculty to determine if the experience is appropriate for credit. Credit will be determined by Associate Dean of the College depending on type of activity and requirements to be completed by students. Student may not use more than six hours toward degree requirements.

GEN 305 GOVERNMENT IN AGRICULTURE, FOOD AND ENVIRONMENT. (3)

Course is an in-depth study of government in relation to agriculture, food and environment. Instructor and guest presenters will address the class on how government policy, regulations, laws and decision making affect all aspects of agriculture, food and environment. The origination and purpose of the land grant institution will also be discussed. Class will be very informative and time will be allotted each class period for questions/answers.

GEN 401 JOB SEARCH SEMINAR. (1)

This course will address the selection of appropriate career choices, job search activities and the transition to the world of work. It will emphasize the application of communicative and team building skills in the area of career development. Pass/Fail only. Prereq: Junior or senior standing in the College of Agriculture.

GEN 501 AGRICULTURAL AND ENVIRONMENTAL ETHICS. (3)

This course illuminates the major moral considerations of public policy issues concerning agriculture and the environment. The course will provide an overview of major moral theories, as well as opportunities to apply these theories to critical analysis of the major contemporary moral issues associated with agriculture and the environment. Prereq: Senior Standing.

GEO Geography

GEO 109 DIGITAL MAPPING. (3)

This course introduces the concepts, techniques, and histories behind mapping as a creative and artist practice. It covers the centrality of the map in everyday life and the changing role of maps as society becomes increasingly saturated by digital information technologies such as geographic information systems (GIS) and global positioning systems (GPS). The course introduces principles in cartographic design and geovisualization culminating in a series of maps created by each student.

GEO 130 EARTH'S PHYSICAL ENVIRONMENT. (3)

A course exploring the fundamental characteristics of earth's physical environment. Emphasis is placed on identifying interrelationships between atmospheric processes involving energy, pressure, and moisture, weather and climate, and terrestrial processes of vegetative biomes, soils, and landscape formation and change. Fulfills General Education requirements for Inquiry in Natural Sciences, and elementary certification requirements in education.

GEO 133 SCIENCE AND POLICY OF NATURAL HAZARDS. (3)

This course examines the science of natural hazards such as hurricanes, earthquakes, landslides and floods, and the causes and effects of the natural hazards. It explores the relationships between the science of, and policy toward, such hazards, discusses their predictability, and examines how scientific knowledge influences policy-making.

GEO 135 GLOBAL CLIMATE CHANGE. (3)

This course provides a broad overview of the processes that have shaped the climate in which we live, and of consequences of changes to this climate. The principle functions of climate in relation to the hydrosphere and biosphere are introduced, and climate change over geological time is described. The basic data used by climate science to identify and explain historical climate change, paleoclimate change, and more recent climate trends are examined. The course also considers the difference between climate science and 'pseudoscience' and how to evaluate predictions of future climate change. Fulfills the Gen Ed Intellectual Inquiry – Natural/Physical/Mathematical Sciences requirement.

GEO 152 REGIONAL GEOGRAPHY OF THE WORLD. (3)

A geographical study of the world by regions with a focus on the world's physical and human landscapes. Emphasis on how regions are connected to each other. Also how each region is affected by, and affects, global issues such as economic restructuring, food production, and environmental change, will be examined. Fulfills elementary certification requirement for Education and USP disciplinary social science requirement.

GEO 160 LANDS AND PEOPLES OF THE NON-WESTERN WORLD. (3)

The geographic study of the conceptual and historical definition of regions of the world as "Non-Western." Global patterns of social, cultural, economic, and political difference between the West and Non-West as well as the processes key to the making of the Non-Western world (such as colonialism and imperialism) are discussed. In addition, selected current issues of significance to peoples in the Non-Western world, such as sustainable development, environment, human rights, and gender relations, are considered. Fulfills the General Education Global Citizenship requirement.

GEO 161 GLOBAL INEQUALITIES. (3)

This course focuses on basic spatial patterns of wealth and poverty at the global scale, comparing places and regions. Contemporary trends are identified and viewed in their historical context. Inequalities in access to basic human needs – food and water – are investigated through case studies drawn from around the world. The highly unequal world we live in raises serious questions of justice and sustainability, and these are considered in this course. Fulfills General Education requirements for Global Citizenship.

GEO 162 INTRODUCTION TO GLOBAL ENVIRONMENTAL ISSUES. (3)

This course addresses environmental questions of global importance, including population growth, resource consumption, environmental degradation, biodiversity conservation, toxic contamination and environmental justice. Fulfills Gen Ed Global Dynamics requirement.

GEO 163 GLOBAL CONFLICTS. (3)

This course will focus on the dynamics and effects of conflicts over boundaries, territory, environmental resources, and civil and political rights. A geographic lens will be used to understand contemporary world conflicts. This course introduces students to an understanding of conflict as grounded both in localities and an effect of global interconnections – political, economic, and cultural. The course will focus on six major contemporary conflicts. Students will become versed in the debates and possible options for solution of these problems. While lectures will provide students with an understanding of the coordinates of the conflicts, recitations sections provide an opportunity for discussion and debate. The readings are chosen to supplement lecture material, providing a greater depth of understanding of the issues at stake. Fulfills the Global Dynamics requirement of General Education.

GEO 164 iWORLDS: GLOBAL INFORMATION GEOGRAPHIES. (3)

This course examines the ways that existing and emerging information technologies are helping to transform places and the way in which the world interacts. It covers the intertwining of society and technology and how different cultures produce distinct technologies and use similar technologies in unique ways. Of particular focus will be the history and evolution of mapping technologies to present days systems such as global positioning systems (GPS), geographic information systems (GIS) and the geoweb. In addition the course will introduce the spatial implications of information technologies and contemporary debates on digital divides, surveillance and privacy, proximity and distance, democracy, and relationships between virtual, real-world and hybridized communities. Fulfills the Global Dynamics Requirement of General Education.

GEO 172 HUMAN GEOGRAPHY. (3)

An introduction to geographic perspectives on human political, economic, social, and cultural activities (such as trade, economic development, empire, colonialism and nation building, agriculture, pollution, urbanization, population dynamics). Emphasis is on spatiality (including concepts of location, scale, globalization, maps, migration, and diffusion), place making and regions (including concepts of the cultural landscape, place meaning, race, class and gender identities, and territoriality), and nature/society relations (including concepts of environmental adaptation and modification, climate change, and sustainability). Fulfills Gen Ed Intellectual Inquiry – Social Science and elementary certification requirement for education.

GEO 200 ORIENTATION TO GEOGRAPHY. (3)

Introduces students to geographic perspectives, theories, research and professional opportunities. Applied quantitative and qualitative approaches to geographic research are reviewed and examples from current literature presented and discussed. Prereq: GEO 130, GEO 172.

GEO 220 U.S. CITIES. (3)

This course introduces salient contemporary U.S. urban topics as seen from and analyzed by a geographic perspective. Topics include migration, urban sprawl, city services, gentrification and urban redevelopment, school districts, parks, housing, financing, and others. The course examines key issues, problems, and debates facing diverse U.S. urban communities, and will address the possibilities for citizen engagement in their resolution. Fulfills the Gen Ed U.S. Citizenship requirement.

GEO 221 IMMIGRANT AMERICA: A GEOGRAPHIC PERSPECTIVE. (3)

This course uses a geographic and spatial perspective to introduce students to contemporary immigration to the United States, its origins, adaptation patterns, and long-term effects on American society. Current immigration debates, humanitarian migration, immigrants' experiences (local and transnational), and questions of citizenship and civic participation of immigrants are central to the course.

GEO 222 CITIES OF THE WORLD. (3)

Focuses on the historical development, contemporary character, and alternative futures of cities in both developing and developed regions. The spatial, social, economic, and political processes of major world cities are studied and contemporary urban problems are discussed. Fulfills Gen Ed Global Dynamics requirement.

GEO 230 WEATHER AND CLIMATE. (3)

A survey of the atmospheric controls associated with local, regional, and global weather and climate variability. Includes fundamental coverage of the physics and chemistry of energy, gasses, pressure and moisture, with a goal of promoting understanding of general weather analysis and forecasting, severe storms, atmospheric pollution, descriptive climatology, and global climate change. Prereq: GEO 130 or consent of instructor.

GEO 231 ENVIRONMENT AND DEVELOPMENT. (3)

This course explores the intertwining of environment, development and sustainability. It analyzes the political economy of environmental destruction (at macro and micro levels) to understand its origins and strategies to prevent it.

GEO 235 ENVIRONMENTAL MANAGEMENT AND POLICY. (3)

An introduction to environmental systems such as weather and climate, vegetation, land forms and soils, and how the quality of these systems is modified by human use. Resource issues discussed include: atmospheric pollution and global warming; groundwater, flooding, and flood plain management; volcanic activity and earthquakes; and biospheric processes associated with deforestation and lake eutrophication. Case studies based upon important environmental problems illustrate how human activity and environmental systems interrelate. Fulfills USP Cross-Disciplinary requirement.

GEO 240 GEOGRAPHY AND GENDER. (3)

Adopts a geographic approach to the study of gender relations. The role of space and place in shaping the diversity of gender relations throughout the world will be considered. Through case studies the importance of gender relations in understanding a variety of issues will be stressed. Such issues include: the design and use of urban and rural environments; "Third World" development; regional economic restructuring; changing political geographies; and migration.

GEO 255 GEOGRAPHY OF THE GLOBAL ECONOMY. (3)

This course reviews the globalization of the world economy as a historical process with specific local, regional, and national outcomes. It introduces students to the factors and dynamics of ongoing globalization of the economy. Fulfills General Education requirements for Global Citizenship.

GEO 260 GEOGRAPHIES OF DEVELOPMENT IN THE GLOBAL SOUTH. (3)

The course focuses on differences between the richer global north and the poorer global south – sometimes referred to as the "Third World". The basic global patterns of "development" are studied and the various explanations for development or lack thereof are examined critically. Differences between regions of the global south are investigated through selected case studies from Latin America, Asia, and Africa. Fulfills the Gen Ed Global Dynamics requirement.

GEO 261 GLOBAL DYNAMICS OF HEALTH AND DISEASE. (3)

This course is an introduction to health and disease from a geographical perspective. It provides an introduction to globalization; global health; epidemiology; the immune system; major pandemics of the 20th and 21st Centuries; and, global attempts to confront current and future pandemics. Connections are made to medicine, nursing, public health and related fields. Fulfills the Global Dynamics requirement of Gen Ed.

GEO 285 INTRODUCTION TO PLANNING. (3)

An introduction to the history, purpose, and objectives of planning with emphasis on urban and regional planning, planning processes, techniques, and legislation.

GEO 300 GEOGRAPHIC RESEARCH. (3)

Provides a detailed examination and discussion of the methods of initiating and executing research projects in human or physical geography. Includes identification of geographic dimensions of research topics, theoretical/conceptual frameworks, conduct of literature reviews, research designs, data collection/analysis and presentation. Prereq: GEO 130 or 152, 160 or 172, or consent of instructor.

GEO 305 ELEMENTS OF CARTOGRAPHY. (3)

Fundamental training in map drafting, compilation, symbolization, scales, projections, and map reproduction, including emphasis on the conceptual planning and designing of maps and graphs as a medium for communication.

GEO 309 INTRODUCTION TO GIS. (3)

This course introduces students to the use of geographic information systems and their basic principles. Topics addressed include data collection, processing and output. Students will learn about types of geographic information and data: sources, constraints, and uses; the range of secondary spatial data sets available; and the collection of primary spatial data using global positioning systems (GPS) and other technologies.

GEO 310 QUANTITATIVE TECHNIQUES IN GEOGRAPHY. (3)

The application of spatial techniques geographers use to collect, sample, map, and analyze data in human and physical geography. Students will be introduced to automated data processing.

GEO 311 QUALITATIVE METHODS IN GEOGRAPHY. (3)

This course is an introduction to qualitative methods in geographical research. Students will begin by learning the basic principles of research design, as well as ethical and procedural

considerations of any research project using qualitative methods. The course primarily will focus on introducing students to basic qualitative methods used in geographic research, but pertaining also to social science research in general, potentially including (but not limited to): participant observation, archival analysis, interviews, surveys, focus groups, participatory action research, data coding and analysis, discourse and textual analysis, visual analysis, and content analysis.

GEO 316 ENVIRONMENT AND DEVELOPMENT. (3)

This is an introductory/intermediate level course on the relationships between environment and economic development. While this course emphasizes environmental concerns of the 'Global South', this course will also cover instances of 'Global Northern' peoples and places, particularly in less privileged areas such as Appalachia. The course examines the political economy of environmental destruction by asking why, despite much significant research, environmentally destructive development schemes continue. Although we understand at least the main contours of what it will take to become a sustainable society, little progress has been made in implementing even evidently necessary policies.

GEO 320 GEOGRAPHY OF THE UNITED STATES AND CANADA. (3)

A systematic review of the physical context, economic, historic, and cultural diversity that distinguish U.S. and Canadian regions. Topical emphasis on the geographic aspects of regional problems. Fulfills General Education requirements for U.S. Citizenship. Prereq: GEO 130 or 152 or 172, or consent of instructor.

GEO 321 LAND, PEOPLE, AND DEVELOPMENT IN APPALACHIA. (3)

Major themes revolve around regional diversity and regional development. Major topics examined include physical environmental context, historical development, and economic and population geography. The study region includes the upland areas between southern New York State and central Alabama. Prereq: GEO 130, 152 or 172, or consent of instructor.

GEO 322 GEOGRAPHY OF KENTUCKY. (3)

An examination of the cultural, economic, political, and environmental diversity of Kentucky. In addition to studying the state's historical evolution, emphasis will be placed on contemporary problems facing the state. Kentucky's regional, national, and international contexts are discussed. Prereq: GEO 130, 152, 160, or 172.

GEO 323 MEXICO: ENVIRONMENT, POLITICS AND SOCIETY. (3)

This course examines how politics, the environment, and socio-economic relations have shaped Mexico's contemporary social and cultural geography. The course examines how historical and contemporary processes such as agrarianism, urbanization (Mexico City), the Mexican Revolution, migration, and development have shaped the politics of identity, community, and geography, with particular attention to questions of gender, indigenous peoples, and popular culture.

GEO 324 GEOGRAPHY OF CENTRAL AND SOUTH AMERICA AND THE CARIBBEAN. (3)

A study of the diversity of physical environments and human societies. The various historical geographies (pre-Columbian and after) of the region are presented as essential to an understanding of contemporary geographical patterns and processes in transport, agricultural, industry and mining, urbanization, and population. Throughout the course case-studies are presented and students are guided as they develop their own case studies. Prereq: GEO 152 or 160 or 172.

GEO 326 GEOGRAPHY OF EUROPE. (3)

This course explores the physical, cultural, and political geography of the European continent. Diversity of populations and physical landscapes is stressed. The geographic context for current events that are changing the face of Europe are presented. Prereq: GEO 152 or 172.

GEO 328 GEOGRAPHY OF THE MIDDLE EAST AND NORTH AFRICA. (3)

A comprehensive regional overview, emphasizing cultural adaptation to desert environments. The interrelationships among religions, cultures, and the physical environment will be examined, along with the region's position and influence in the global system. Prereq: GEO 152, GEO 160, GEO 172, or consent of instructor. (Same as AAS 328.)

GEO 329 GEOGRAPHY OF THE FORMER SOVIET UNION. (3)

A study of this region's diverse physical and human landscapes, emphasizing the historical and contemporary interlinkages between the various states. Contemporary problems of the post-Soviet era (such as environmental degradation, economic and regional restructuring, or the international position of the region) will be studied from a geographical perspective. Prereq: GEO 152, 160, or 172.

GEO 330 GEOGRAPHY OF THE INDIAN SUBCONTINENT. (3)

A study of the human, economic, and environmental aspects of India, Pakistan, Bangladesh, Himalayan Nepal and Bhutan, and Sri Lanka. Topics include basic physical and cultural regionalisms, land use and population problems, and patterns of economic development involving urbanization, resources, and industrialization. Prereq: GEO 152 or 160 or 172.

GEO 331 GLOBAL ENVIRONMENTAL CHANGE. (3)

This course focuses on environmental processes (in the atmosphere, hydrosphere, lithosphere and biosphere) and the effects of historic and long-term environmental changes. Climatic change and natural system adjustments will be discussed, but the course will concentrate on human-induced environmental changes. Prereq: GEO 130 or equivalent, or consent of instructor.

GEO 332 GEOGRAPHY OF SOUTHEAST ASIA. (3)

A study of the cultural, economic, and political patterns and processes in mainland and insular

Southeast Asia. Major themes examined are how the region's diverse physical geography, uneven natural resource base, cultural diversity, and colonial heritage provide a background to understanding contemporary development. Prereq: GEO 152 or GEO 160 or GEO 172 or consent of instructor.

GEO 333 GEOGRAPHY OF EAST ASIA. (3)

Provides an understanding of the life and landscapes in East Asian nations, with special focus on China and Japan. Emphasis is placed on contemporary issues of sustainable development, environmental management, minority groups, human rights and gender relations. Prereq: GEO 152, GEO 160, GEO 172 or consent of instructor.

GEO 334 ENVIRONMENT, SOCIETY AND ECONOMY OF JAPAN. (3)

This course examines some of the major aspects of the society, culture, and economy of Japan. It discusses Japan's human and natural environments; natural hazards and disasters; cultural history and geography; economic and technological developments, their prospects and potentials; challenges to the management of environment and its resources; and Japan's role in global economy. (Same as JPN 334.)

GEO 336 GEOGRAPHY OF SUB-SAHARAN AFRICA. (3)

This course focuses on the cultural and environmental geographies of the subcontinent, rural landscapes and cultures and environmental problems, the historical geography of precolonial and colonial Africa, and the social geography of contemporary economic development. Prereq: GEO 130 and 152, 160, or 172. (Same as AAS 336.)

GEO 351 PHYSICAL LANDSCAPES. (3)

A study of earth surface processes and land forms. The focus is on the analysis and interpretation of earth surface features and topography in terms of process-response mechanisms, and on an understanding of the fundamental physical, chemical, biological, and human processes which create and modify landscapes. The course emphasizes the dynamic nature of land forms and Landscapes, and the interrelationships between land forms and hydrology, climate, soils, and the biosphere. Prereq: GEO 130, or consent of instructor.

GEO 365 SPECIAL TOPICS

IN REGIONAL GEOGRAPHY (Subtitle required). (3)

Offers coverage of world regions not usually covered in other geography courses, or in-depth examinations of specific subregions. Topics covered include: elements of climate and physical landscapes; political and economic systems and their historical development and dynamics; social and cultural processes and landscapes. May be repeated to a maximum of six credit hours under different subtitles. Prereq: Any 100-level geography course or consent of instructor.

GEO 399 INTERNSHIP IN GEOGRAPHY. (3)

Provides supervised professional experience in public and private sector positions, and is intended to introduce students to the skills and working environments of careers in geography. Students should consult with a geography faculty member in advance of registering for this class. Prereq: Junior or senior standing in the major.

GEO 406 FIELD STUDIES IN GEOGRAPHY (Subtitle required). (3)

Field-based, regionally specific study of selected topics in cultural, economic, environmental, physical, political, social, or urban geography. May be repeated to a maximum of 18 credits with change in field site. Prereq: GEO 200.

GEO 409 ADVANCED GIS. (3)

This course is developed to introduce intermediate and advanced topics in geographic information science and spatial analysis including theoretical and applications areas. Building upon a range of GIS software systems this course covers geographic data collection, entry and editing, spatial analysis, interpolation and map development and display. Prereq: GEO 309 or consent of instructor.

GEO 415 MAP INTERPRETATION. (3)

An introduction to reading and interpreting maps. Special attention given to the study of physical and cultural geography as portrayed on large scale topographic maps. Emphasis on the relationship between the environmental setting and human activities, surveys and boundaries, transportation, urban and rural settlement and land use, and place names. Prereq: GEO 130 or 172 or consent of instructor.

GEO 419 INTRODUCTION TO REMOTE SENSING. (3)

This course offers an introduction to remote sensing technologies and their application to land use/land cover analysis, environmental monitoring, natural resources management, and urban planning. This course covers the fundamental remote sensing principles, overview of space/air borne sensors/data, essential techniques for digital image processing, and applications particular related to diverse land surfaces such as vegetation, water, urban, and soil/bedrocks. Theoretical training and lab exercises are integrated components in this course. Prereq: GEO 309 or consent of instructor.

GEO 422 URBAN GEOGRAPHY. (3)

Examines the relationship between urbanization and the larger social and economic contexts within which city growth occurs. Surveys a range of theoretical perspectives on the internal socio-economic structure and built environment of cities, including the contributions by Chicago School, neoclassical, marxist, and postmodern theorists. Emphasis also placed on relevant environmental, social, and political problems of cities. Primary focus is on North American cities, but includes cross-cultural comparisons. Prereq: GEO 152, 160, 172, or 222, or consent of instructor.

GEO 431 POLITICAL ECOLOGY. (3)

This course examines the relationship between political economics and the biophysical

environment and seeks to understand the challenges of development, agriculture, gendered divisions of labor, and the representation of nature in the context of the globalization of economic relations.

GEO 442G POLITICAL GEOGRAPHY. (3)

This course examines how space and political activities are related. Major topics will include: history of political geographic thought; geopolitics; nationalism and identity; the territorial state; regionalism; conflicts; borders and frontiers, and electoral geography, at a range of scales.

GEO 451G FLUVIAL FORMS AND PROCESSES. (3)

An examination of erosion, deposition, and sediment transport processes associated with flowing water, landforms associated with fluvial processes, and landscape evolution in areas dominated by fluvial dissection and deposition. Field trips may be required. Prereq: GEO 351 or GLY 341.

GEO 452G WORLD GEOGRAPHY FOR TEACHERS. (3)

Approaches to teaching geographic themes and concepts within the context of the world's major regions and countries in grade levels K-12. Addresses those issues and problems that affect world regions in the context of the following broad themes: location, place, movement, regions, and human-environment interactions. Among those topics discussed are the use and importance of maps and related resource materials in instruction, presentation of themes at different grade levels, and identification and utilization of a broad range of reference materials for student and teacher use. Lecture, ten hours per week for four weeks.

GEO 455 GLOBALIZATION AND THE CHANGING WORLD ECONOMY. (3)

This course provides an advanced review of the ongoing restructuring of the geography and organization of the capitalist global economy. Emphasis will be placed on contemporary issues (such as industrial restructuring or the financial industry), and specific regions (such as Kentucky or China). Competing theories (classical, neoclassical, and marxian) and empirical and analysis aimed at explaining these patterns and processes are discussed and applied.

GEO 465 SPECIAL TOPICS IN GEOGRAPHY

(Subtitle required). (3)

Offers coverage of issues and themes not covered in other geography courses, or in-depth examinations of specific issues and themes. Topics covered will commonly address emerging national and global issues of both general and scholarly interest. May be repeated for a maximum of six credit hours (under different subtitles). Prereq: Any 100-level geography course or consent of instructor.

GEO 470G AMERICA'S CULTURAL GEOGRAPHIES. (3)

This course examines the diversity of cultural attributes (both tangible and intangible) in the American landscape through a range of perspectives, e.g., environmental/historical, politics, economic, gender, race, etc., to understand how deeply held values manifest in minds and places. Prereq: GEO 172 or ANT 220.

GEO 475G MEDICAL GEOGRAPHY. (3)

An examination of the basic principles of the two major traditions of medical geography: disease ecology and medical care. Examined are the etiology, diffusion, and distribution of selected major diseases. Issues pertaining to the spatial-temporal distribution, accessibility and utilization of medical care resources are presented. Prereq: GEO 172 or consent of instructor.

GEO 485G URBAN PLANNING AND SUSTAINABILITY. (3)

An analysis of urban and regional planning with emphasis on the contemporary urban and regional planning activities. Prereq: GEO 285 or consent of instructor.

GEO 490G AMERICAN LANDSCAPES. (3)

A review and analysis of America's vernacular landscapes. Topics include: the history of settlement by Europeans, Africans, and others; evolving political allegiances; and the expansion of agricultural and industrial technologies in the context of diverse physical environments. The role of political philosophy in landscape development and historic preservation will be highlighted. Prereq: GEO 172 or consent of instructor.

GEO 491G JAPANESE LANDSCAPES. (3)

A study of the landscapes of Japan as vivid portrayal of Japanese culture and their value system, including review and analysis of major primary and secondary components of the Japanese landscape. Prereq: JPN 334 or GEO 334 or consent of instructor. (Same as JPN 491G.)

GEO 499 SENIOR RESEARCH SEMINAR. (3)

Course is intended to provide a capstone experience in geographical research and problem-solving through demonstrating students' ability to identify an appropriate research topic in geography; developing and implementing appropriate research strategy; and presenting research results. Prereq: GEO 406. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

GEO 505 PRACTICUM IN CARTOGRAPHY. (3)

Experience credit in which a small number of advanced students work under the direct supervision of the faculty or staff cartographer and in conjunction with other faculty members on departmental and contracted projects. May be repeated to a maximum of six hours. Prereq: GEO 305 and GEO 506 and consent of instructor.

GEO 506 INTRODUCTION TO COMPUTER CARTOGRAPHY. (3)

A basic introduction to computer-assisted cartography. Emphasis on basic computer graphics literacy and automated techniques for spatial data acquisition, storage, processing, and output.

Course Descriptions

Introduction to current mainframe, workstation, and desktop mapping programs. Prereq: GEO 305 or permission of instructor.

GEO 509 WORKSHOP IN GEOSPATIAL TECHNOLOGIES. (3)

This course focuses on the development of applied GIS skills and follows a participatory workshop model with intensive, hands-on collaboration with community partners. The course covers a full range of collaborative GIS: working with team members and project partners to identify project goals, acquiring and preparing spatial data for GIS analyses, communicating with clients to assess progress, managing spatial data, and producing necessary maps and analyses. Prereq: GEO 309 or GEO 609 or consent of instructor.

GEO 530 BIOGEOGRAPHY AND CONSERVATION. (3)

An introduction to the geographic patterning of biological diversity, exploring its origins, dynamics, and present trends. Examines the interplay among physical conditions, ecological interactions, evolutionary processes, and the historical movements of organisms and land masses as they have combined to affect the distribution of species, with particular attention to the application of biogeographic knowledge to current problems of species loss and conservation. Prereq: Two semesters of introductory biology or physical geography, or consent of the instructor. (Same as BIO 530.)

GEO 531 LANDSCAPE ECOLOGY. (3)

This course explores the field of landscape ecology—the causes, development, importance of ecological processes, and the interactions of dynamic processes over broad spatial scales that can serve as foundation for decision-making and problem solving. Prereq: Six hours of physical geography or biology.

GEO 544 HUMAN POPULATION DYNAMICS. (3)

The study of human population distributions, densities, and growth patterns through analyses of the processes of fertility, mortality and mobility. Topical coverage includes the environmental, social, political, economic, and behavioral impacts on personal action and population change. Emphasis is placed on historic and contemporary meanings and influences of population diversity, with special attention given to issues of gender, race, and class.

GEO 546 TOURISM AND RECREATION GEOGRAPHY. (3)

Tourism is the world's fastest-growing economic sector, creating and transforming places, regions and broader geographies of travel, movement, and investment. The course will examine concepts, models, and theories in the study of tourism and recreation. Selected themes include major travel flows and patterns; economic, environmental, and socio-cultural impacts; mass vs. "new" (e.g., eco-tourism, adventure tourism, extreme tourism) types of tourism; heritage tourism; marketing; place boosterism; tourism and recreation planning; and the politics of tourism. Local, national, and international examples in both developed and developing countries are discussed. Prereq: GEO 152, 172, 455, or consent of instructor.

GEO 550 SUSTAINABLE RESOURCE DEVELOPMENT AND ENVIRONMENTAL MANAGEMENT. (3)

A study of the theories and strategies for environmental management and sustainable development of resources. Topics covered include contemporary environmental degradation and resource use problems, political economy of resource use and environmental change, design and management of sustainable resource development, impact of sustainable development on gender issues and poverty, and environmental accounting. Prereq: GEO 130 or GEO 210 or consent of instructor.

GEO 551 JAPANESE MULTINATIONAL CORPORATIONS. (3)

A study of the giant Japanese multinational corporations in the world economy and their impact on development and environment of selected countries. Topics include: geographical organization of multinational corporate system; their locational decisions; affect of multinationals policies on the environment; and local economy. Prereq: Consent of instructor. (Same as JPN 551.)

GEO 560 INDEPENDENT WORK IN GEOGRAPHY. (3)

Individualized study and/or research intended to provide opportunities for students to explore topics in more depth than is offered in existing courses, or to address topics not covered in existing courses. Students work with a faculty supervisor in defining a specific area of study, appropriate learning objectives, and suitable evaluation criteria. Course format may range from critical reading of selected literatures to innovative research projects. Students should identify and consult with faculty supervisor well in advance of registration for this course. Prereq: Restricted to Geography majors with GPA of 3.0 or above in the department.

GEO 565 TOPICS IN GEOGRAPHY. (3)

Discussion, readings, and papers focusing on relevant topics in geography directed by a staff member having specific competence for the topics under study. Current research developments in particular geographic subfields will be stressed. May be repeated under different subtitles to a maximum of six credits. Prereq: Consent of instructor.

#GEO 570 LANDSCAPE ECOLOGY FOR NATURAL RESOURCES. (3)

Principles of landscape ecology and their applications to contemporary ecological issues. Students will learn and apply the tool of geographic information system (GIS) and spatial analysis to problems in natural resource ecology, management, and conservation. Course covers the following topics: principles of landscape ecology (e.g., patch, mosaic, and scale), quantification of landscape patterns, formation and dynamics of landscape patterns, role of disturbance, landscape models and their applications. Prereq: Any upper level course in GIS or consent of instructor. (Same as FOR 570.)

GEO 585 AGING AND ENVIRONMENT. (3)

Explores the elderly person's changing experience of environment. Physiological, psychological and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as FAM/GRN 585.)

GEO 600 INTRODUCTION TO METHODS IN GEOGRAPHY. (3)

A broad survey of methods and methodological debates of research in human/physical geography. Emphasis on contemporary research examples. Prereq: Graduate standing.

GEO 609 GISCIENCE FUNDAMENTALS. (3)

This course introduces students to the use of geographic information systems and the science behind their use. Topics include an introduction to types of geographic information and data; the sources, constraints, and uses of data; the techniques for processing and visualizing spatial data and the methodological, epistemological and ontological issues associated with GIScience.

GEO 610 ANALYTICAL METHODS IN GEOGRAPHY. (3)

An introduction to the application of analytical methods to geographic problem solving. Topics cover sampling theory, probability theory and both parametric and nonparametric statistical techniques. Prereq: STA 570 or equivalent or consent of instructor.

GEO 619 REMOTE SENSING FUNDAMENTALS. (3)

This course covers the use of remote sensing technologies and their application in natural resource management, land use/land cover analysis, city and regional planning and environmental monitoring. This course covers the basic remote sensing principles, the range of space/air borne sensors/data, key techniques for digital image processing, and applications particular related to diverse land surfaces including the built environment, water, soil and vegetation.

GEO 655 SPECIAL STUDY OF SYSTEMATIC GEOGRAPHY. (3)

The application of the methods of systematic geography to particular special studies in topical areas, such as conservation, urban areas, climatology, cartography, or others. May be repeated to a maximum of six hours. Prereq: Appropriate 500-level course work in systematic or topical geography (e.g., conservation, urban, climatology, cartography).

GEO 702 CONCEPTS IN GEOGRAPHY. (3)

Contemporary geographic concepts and theories are examined with emphasis on concepts within human geography, especially with reference to the economic, urban, cultural, and population subfields within the discipline. Prereq: Graduate student status.

GEO 705 ADVANCED GEOGRAPHIC METHODS (Subtitle required). (3)

In-depth study and application of one or more research methods/techniques (e.g., qualitative methods, ethnography, textual analysis, visual analysis, GIS). Intended to offer M.A. and Ph.D. students advanced methodological specialization in geography. May be repeated to a maximum of six credits under different subtitles. Prereq: GEO 600 or equivalent.

GEO 706 ADVANCED FIELD STUDIES (Subtitle Required). (1-9)

Field-based, regionally specific study of selected topics in cultural, environmental, political, social, urban, or economic geography. May be repeated to a maximum of 18 credits with change in field site. Prereq: Consent of instructor.

GEO 707 DEVELOPMENT OF GEOGRAPHIC THOUGHT. (3)

An analytical review of the evolution of geographic thought, in terms of concepts, methodologies and scholars, emphasizing the basic literature through a series of topics.

GEO 708 GEOGRAPHIC INFORMATION SYSTEMS RESEARCH METHODOLOGIES. (3)

Following a brief overview of GIS, remote sensing, GPS, and other relevant information technologies as information collection, presentation, and analytical aids, this course will consider current developments of geographic information technologies. These include, but are not limited to, field GIS, public participation GIS, participatory information technology, collaborative environments, and spatial decision-making. Discussion of these developments will be complemented by a rigorous examination of theoretical and methodological issues. Prereq: GEO 409G or its equivalent, or consent of instructor.

GEO 709 ADVANCED GISCIENCE. (3)

This course explores advanced applications and topics within GIScience including data mining, scripting, point pattern analysis, data interpolation, geospatial modeling and network analysis and the methodological, epistemological and ontological issues with the classification requirements and analytical capabilities of GIScience. Prereq: GEO 609 or consent of instructor.

GEO 711 CULTURAL STUDIES AND GEOGRAPHY (Subtitle required). (3)

Seminar in cultural studies and geography, including, for example, interpretation and analysis of the built environment; space and representation; the political economy of landscape production; regional imagery; media studies; popular culture; the social construction of community; historic preservation; recreation, tourism and society. May be repeated to a maximum of nine credits under different subtitles.

GEO 712 DEVELOPMENT STUDIES AND GEOGRAPHY (Subtitle required). (3)

Seminar in selected topics in the policies, practices, and processes of development, including, for example, political economy perspectives on development; anti-development and postcolonial theory; economic restructuring and transition economies; gender and development; the relations between development and migration, transportation and tourism; environmental

management and sustainable development. May be repeated to a maximum of nine credits under different subtitles.

GEO 713 ECONOMIC GEOGRAPHY: (Subtitle required). (3)

A seminar in economic geography, including, for example, global, regional, and local economic restructuring, global financial systems; foreign direct investment and trade; geography of multinational corporations; geography of labor; spaces of production and spaces of consumption; gender and economic space; space-time convergence; information and communications. May be repeated to a maximum of nine credits under different subtitles.

GEO 714 POLITICAL GEOGRAPHY: (Subtitle required). (3)

A seminar in political geography, including, for example, electoral systems; state theory; post-Cold War democratization; the geography of revolutionary change; critical geopolitics; political economy of environmental movements; political economy of globalization discourses and practices. May be repeated to a maximum of nine credits under different subtitles.

GEO 715 GEOGRAPHY AND SOCIAL THEORY (Subtitle required). (3)

Seminar in geography and social theory, including, for example, theories of human spatiality; marxist, neo-marxist, and post-marxist theory; postmodernism and poststructuralism; feminist theory; actor network theory; identity theory; geographic thought and society; technology and society. May be repeated to a maximum of nine credits under different subtitles.

GEO 717 URBAN GEOGRAPHY (Subtitle required). (3)

Seminar in urban geography, including, for example, urban morphology; urban systems; the local state; urban social fragmentation; conflicts over urban growth and development; urban transportation planning; urban historical geography; gender and urban space; race and urban space; urban landscapes. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 718 TOPICAL SEMINAR IN GEOGRAPHY OF ENVIRONMENT AND RESOURCES (Subtitle required). (3)

Study of selected topics on agriculture resource allocation, resource conflict, public land policy, natural hazards, environmental management, energy and biogeography. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 719 GEOSPATIAL TECHNOLOGIES (Subtitle required). (3)

A seminar in the social construction of geospatial technologies and the implications of their use. Topics may include crowd-sourcing, privacy and surveillance, open source software, code/space, censorship and control, copyright and locative media usage. May be repeated to a maximum of nine credits under different subtitles.

GEO 721 TOPICAL SEMINAR IN PHYSICAL GEOGRAPHY (Subtitle required). (3)

Examination of selected topics in geomorphology, hydrology, pedology, biogeography, climatology, and earth system science. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 722 SOCIAL GEOGRAPHY (Subtitle required). (3)

Seminar in social geography, including, for example, race and gender, feminist geography, health care, disease and society; the geography of AIDS; the geography of aging and the life course; poverty and social policy; human behavior in space and time; population and migration studies; spatial structure of social networks; transportation of disadvantaged groups. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 731 EARTH SURFACE SYSTEMS. (3)

A treatment of earth surface systems from the perspective of complex systems theory. The course takes a holistic viewpoint, emphasizing interactions between the atmo-, litho-, hydro-, and biospheres and the manifestations of those signatures in soils, landforms, and ecosystems. Prereq: Consent of instructor.

GEO 740 RESEARCH INTERNSHIP (Subtitle required). (1-6)

To provide students with course credit for faculty supervised internships with governmental and non-governmental organizations. May be repeated to a maximum of nine credits.

GEO 741 TEACHING PRACTICUM. (1)

Introduction to teaching, with particular focus on pedagogical issues in geography courses. Intended to provide students with background sufficient to enable them to assume full responsibility for university and college level courses.

GEO 742 PREPARING FUTURE FACULTY IN GEOGRAPHY. (1)

Introduction to the professoriate, with particular focus on geography within the academy. Intended to provide students with background sufficient to assume responsibility as new faculty members in universities and colleges.

GEO 743 RESEARCH PROPOSALS AND GRANT WRITING. (1)

Introduction to basic geographic research proposal design standards, with particular emphasis on the requirements of granting agencies.

GEO 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GEO 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

GEO 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

GEO 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

GEO 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

GEO 772 SPECIAL RESEARCH PROBLEMS IN GEOGRAPHY. (1-6)

Open to doctoral candidates who have the necessary training and ability to conduct research on a selected problem. May be repeated to a maximum of 12 credits. Prereq: Approval of the director of graduate studies.

GER German Studies

GER 011 GERMAN FOR READING KNOWLEDGE. (3)

This course is designed to meet the needs of upper division and graduate students who are preparing for the graduate reading examination, who need a reading knowledge of German in their minor, or who require a review of German grammar.

GER 101 BASIC GERMAN. (4)

Fundamentals of German with development of the four basic skills: reading, writing, listening, and speaking.

GER 102 BASIC GERMAN. (4)

Continuation of GER 101. Prereq: GER 101, or one year of high school German, or equivalent.

GER 103 FAIRY TALES IN EUROPEAN CONTEXT. (3)

Introduction to major types of fairy tales in European historical and literary context, covering the period from the Renaissance to the present. Taught in English.

GER 104 TURNING POINTS: (Subtitle required). (3)

An introductory course exploring the many ways in which art, architecture, literature and film have come to define and represent major urban centers in the German-speaking world. Focus in a given semester will be on an individual city such as Berlin, Vienna or Munich in times of innovation and upheaval during which it has contributed significantly to developments in literature and the visual arts and was or continues to be at the center of world historical events. May be repeated once with new subtitle.

GER 201 INTERMEDIATE GERMAN. (3)

Systematic review of grammar and furthering of reading, writing, listening, and speaking skills based upon cultural and literary materials. Prereq: GER 102 or equivalent or placement test.

GER 202 INTERMEDIATE GERMAN. (3)

Continuation of GER 201. Prereq: GER 201 or equivalent or placement test.

GER 205 READING AND WRITING PRACTICE. (2)

This course concentrates on the development of reading and writing skills. Students learn to build vocabulary systematically and develop strategies for reading texts of varying kinds and levels of difficulty. Writing assignments ranging from brief descriptions and reports to translations and original compositions enable students to develop and sharpen writing skills. Prerequisite for upper division courses. Prereq or concur: GER 201 or equivalent.

GER 206 SPOKEN COMMUNICATION. (3)

This course concentrates on the development of speaking and listening skills. Students learn to negotiate everyday communication situations by acquiring verbal strategies and idiomatic expressions needed for meaningful interaction in a German-speaking country. Emphasis is placed on skills and vocabulary needed to discuss topics related to German culture. Prereq: GER 201.

GER 211 GERMAN FOR READING KNOWLEDGE I. (3)

This is the first of a two-course sequence in German that will enable students to read any German texts they wish, from daily newspapers and magazines, to literary works, to scholarly prose in any discipline.

GER 212 GERMAN FOR READING KNOWLEDGE II. (3)

The course will confront students with a variety of texts of ever increasing difficulty. Students will be provided with the foundation necessary both for understanding the evolution of German literature, history, and culture, and with the reading skills necessary for them to use the language in their course work. Completion of the two-semester sequence will enable undergraduates to pursue a course of study leading to the proposed certificate in German studies. Prereq: GER 211, or GER 201 and permission of instructor or GER 202.

GER 263 THE GERMAN CULTURAL TRADITION I. (3)

An introduction to the social, intellectual and aesthetic traditions of German-speaking cultures from the Germanic past to the Enlightenment. Texts in English translation. Films with English subtitles to be viewed outside of regular class time.

GER 264 THE GERMAN CULTURAL TRADITION II. (3)

An introduction to the social, intellectual and aesthetic tradition of German-speaking cultures from the Enlightenment to the present. Texts in English translation. Films with English subtitles to be viewed outside of regular class time.

***GER 305 GERMAN FILM TODAY. (3)**

This course explores German filmmaking in the 21st century. It is an introduction to the understanding and interpretation of films produced in a specific national context outside of what is commonly referred to as Hollywood. Our examination will have two parts. An introduction to interpretative strategies used to understand feature length films as one of the dominant modes of storytelling and myth making in the contemporary world. And, an on-going discussion of the many ways in which issues related to history, nationality, language and global economics have influenced filmmaking in Germany. We will view, analyze, compare, discuss and interpret a representative sampling of contemporary German films while questioning and exploring the very designation German in the context of globalized media markets.

GER 307 INTERMEDIATE GERMAN COMPOSITION AND CONVERSATION I. (3)

This course develops listening, speaking and writing skills in German with emphasis on practical communicative needs. It includes a review of grammar, special oral and written projects, class discussion, and practice in a variety of written forms. Prereq: GER 202 or equivalent.

GER 308 INTERMEDIATE GERMAN COMPOSITION AND CONVERSATION II. (3)

Continuation of GER 307. Prereq: GER 307, or equivalent.

GER 310 GERMAN FOR INTERNATIONAL BUSINESS AND PROFESSIONS. (3)

This course will develop written and conversational skills based on communicative needs of international business and professions in German-speaking countries, using materials from banking, computer science, export-import, journalism, government and the public sphere. Prereq: GER 307 or permission of the instructor.

GER 311 INTRODUCTION TO GERMAN LITERATURE: THEMES (Subtitle required). (3)

An introductory course that explores such themes in German literature as Fathers and Daughters, Fathers and Sons, Trials, Judgments and Justice, and Conceptions of the Self. Readings will be drawn from various periods and major genres. Themes vary and will be announced. May be repeated once for a total of six credits by nonmajors if theme changes. Prereq: GER 202 or equivalent.

***GER 312 GERMAN POPULAR FORMS (Subtitle required). (3)**

An introductory course that focuses on social, political, anthropological and aesthetic aspects of popular forms of German literature. Readings include fairy tales, folk songs and legends, children's literature, detective stories, comics and other popular literary forms. May be repeated up to 6 hours with change in topic. Prereq: GER 202 or equivalent.

GER 317 HISTORY OF GERMAN CULTURE. (3)

An introduction to German culture with emphasis on the epochs important to the development of modern German-speaking countries. Readings in German from philosophy, the sciences, the arts, history, politics and literature. Visual materials documenting high culture and everyday life. Taught in German. Prereq: GER 205 or 206, or equivalent.

GER 319 CONTEMPORARY GERMAN LITERATURE AND CULTURE. (3)

Selected works of contemporary German literature by Austrian, German, and Swiss authors are read relative to the economic, social, political, artistic and ideological developments in the three countries of the German-speaking world. Taught in German. Prereq: GER 307.

GER 342 WAR, PEACE, AND TERROR IN GERMANY AND EUROPE. (3)

This course explores the topics of war, peace, and terror in the context of Germany, Central Europe, and beyond: in the desire for peace and for war; from depictions of battle to reflections on policy and strategy; and from the logic of terror to its horrifying effects.

GER 352 GERMAN-SPEAKING EUROPE: (Subtitle required). (3)

This course will place an important aspect of German culture in the broader context of European cultural and historical developments. Focus in a given semester will be on a special topic through which significant developments in literature and the arts may be considered in relation to the historical context of such developments. Possible topics include Literature of the Holocaust, Terrorism in the German Context, The Culture of Sport, and Children's Literature. All readings will be in English. Students taking the course for a German major or minor will complete a number of assignments in the German language. May be repeated to a maximum of six credits under different subtitles.

GER 361 GERMAN CINEMA. (3)

A history of the cinema in the German-speaking world from its beginnings to the present, emphasizing the evolution of the production, distribution and reception of film in relation to changing political, social, economic, ideological and literary/artistic contexts. Some consideration of film theory and criticism in conjunction with class discussion of individual films. Viewing of films (silent or German dialogue with English subtitles) outside of class is required. Class taught in English.

GER 363 GERMANIC MYTHOLOGY. (3)

Overview of the mythological traditions of the Germanic peoples and their continuing presence in Western culture.

GER 395 INDEPENDENT WORK IN GERMAN. (1-3)

This course is designed for students who wish to do advanced work in German on any subject. May be repeated up to a maximum of six credit hours. Prereq: Major and a standing of 3.0 in the department.

GER 507 ADVANCED GERMAN COMPOSITION AND CONVERSATION. (3)

Further development of conversational skill and practice in writing stylistically appropriate German. Study of finer points of grammar. Discussion of special topics and theme writing. Prereq: GER 308 or equivalent.

GER 515 STUDIES IN MAJOR AUTHORS. (3)

Explorations into one or several major figures of German literature. Reading of primary texts and pertinent scholarship together with an investigation of the authors' literary, social, or political significance during contemporary or later periods. May be repeated to a maximum of 12 credits. Prereq: GER 311 or GER 312, or equivalent. Instructor consent.

GER 516 STUDIES IN GENRE. (3)

One major genre or a group of related genres. Readings in genre theory and in the key texts from various periods; study of the development of forms, techniques, and ideas. May be repeated to a maximum of 12 credits. Prereq: GER 311 or GER 312, or equivalent. Instructor consent.

GER 520 SPECIAL TOPICS SEMINAR. (3)

Investigation of a topic pertinent to the advanced study of German language, literature and culture. May be repeated once with new topic. Prereq: GER 415G, 416G, 420G or equivalent.

GER 550 MULTIDISCIPLINARY GERMAN STUDIES SEMINAR (Subtitle required). (3)

A team-taught, multidisciplinary exploration of a set of issues that effect cultural, literary, geographical, historical, political, philosophical or social developments in Germany in relation to surrounding geographical areas. The seminar will foster multidisciplinary perspectives in the study of Germany, its inhabitants, and cultural traditions, in historical, contemporary, and comparative contexts. Seminar readings in German, discussion in English. Seminar foci will vary year to year, including such topics as "Individual and Collective Identity Formations in post-Enlightenment Germany," "Constructions of German Heimat," and "Freud, Culture, Society." May be repeated to a maximum of six credits under different subtitles. Prereq: Senior standing or consent of instructor.

GER 553 THE TEACHING OF GERMAN. (3)

The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on German. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

GER 612 STUDIES IN LITERARY THEORY. (3)

Course will explore such fundamental issues as the definition of literature, interpretation and evaluation, the reading process, and literary life from the perspective of competing theoretical systems.

GER 615 STUDIES IN MAJOR AUTHORS. (3)

Explorations into one or several major figures of German literature. Reading of primary texts and pertinent scholarship together with an investigation of the authors' literary, social, or political significance during contemporary or later periods. May be repeated to a maximum of 12 credits.

GER 616 STUDIES IN GENRE. (3)

One major genre or a group of related genres. Readings in genre theory and in the key texts from various periods; study of the development of forms, techniques, and ideas. May be repeated to a maximum of nine credits.

Note: The series of courses GER 620-630 provides a general framework for the systematic study of German literature in its cultural setting and delimits various issues to be investigated further in corresponding 700-level courses. Readings and discussions focus on documents central to the literary life of a given period and to the understanding of its institutional and biographical basis as well as its regional, sociopolitical, motivational, poetological, and ideological diversity. Each course also emphasizes critical methodology and tools of scholarship and identifies new directions for basic research.

GER 625 STUDIES IN THE 18TH CENTURY. (3)

Enlightenment to Classicism.

GER 629 STUDIES IN THE 19TH CENTURY. (3)

Romanticism to Naturalism.

GER 630 STUDIES IN THE 20TH CENTURY. (3)

Turn-of-the-century Modernism to the present.

GER 650 MULTIDISCIPLINARY GERMAN STUDIES SEMINAR (Subtitle required). (3)

A team-taught, multidisciplinary exploration of a set of issues that effect cultural, literary, geographical, historical, political, philosophical or social developments in Germany in relation to surrounding geographical areas. The seminar will foster multidisciplinary perspectives in the study of Germany, its inhabitants, and cultural traditions, in historical, contemporary, and comparative contexts. Seminar readings in German, discussion in English. Seminar foci will vary year to year, including such topics as "Individual and Collective Identity Formations in post-Enlightenment Germany," "Constructions of German Heimat," and "Freud, Culture, Society." May be repeated to a maximum of six credits.

GER 653 RESEARCH AND ISSUES IN TEACHING GERMAN. (1)

This course builds on GER 553, Methods of Teaching German. The course will address a range of educational issues beyond the teaching of foreign language skills as well as acquaint students with research methods in both a theoretical and practical manner. May be repeated to a maximum of four semesters. Coreq: GER 553.

Note: The course series 720-730 offers the opportunity for the more specialized and greater in-depth investigation of various topics encountered in the corresponding, but more broadly conceived, period courses of the 620-630 series. With changes in topic, each course number of the 720-730 series can be repeated a total of three times - thus enabling the student at the more advanced level to specialize within a particular period or periods.

GER 721 SPECIAL TOPICS IN GERMAN LITERARY AND CULTURAL HISTORY. (3)

This course allows for the in-depth study of specific topics in German literary and cultural history encountered in the broadly conceived period courses of the 620-630 series. With changes in topic the course may be repeated to a maximum of nine credits. Prereq: Permission of Director of Graduate Studies.

GER 748 MASTER'S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GER 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

GER 781 INDEPENDENT STUDIES IN GERMAN. (1-3)

Course allows individual students to pursue independent research on a selected aspect of German linguistic, literary or cultural history. May be repeated once if topic changes. Prereq: Permission of Director of Graduate Studies.

SCANDINAVIAN

(Offered as required)

GER 610 OLD ICELANDIC. (3)

Rapid coverage of morphology, phonology and syntax of Old Icelandic, with some attention to linguistic affinities within the Indo-European and Germanic groups of languages. Prereq: Reading knowledge of German; consent of instructor.

GRN Gerontology**GRN 250 AGING IN TODAY'S WORLD. (3)**

This class explores the processes and meanings of "growing old," focusing on influences from childhood through adolescence and adulthood, with constant attention to how these processes and meanings are situated in time and space and eventually inform individual and societal conceptions of and actions concerning old age. The many faces of aging are examined from an array of disciplinary perspectives using selected readings, film documentaries, consideration of personal/family histories, and a series of exercises that allow students to place one's own life experience and thoughts of growing old in broader societal context.

GRN 513 GERIATRIC PHARMACY. (3)

A course designed to educate students in the basic knowledge of attitudes and skills required to meet the pharmaceutical needs of the elderly. Topics include discussions of the aging process, physiological and psychological changes in the elderly, how these changes influence patient compliance and the responses to drug and nondrug treatments, monitoring drug use in long-term care facilities, and special community services available to the elderly. Prereq: PHR 849, 852, 853, 854 and 856 or permission of instructor. (Same as PPS 813.)

GRN 585 AGING AND ENVIRONMENT. (3)

Explores the elderly person's changing experience of environment. Physiological, psychological and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as FAM/GEO 585.)

GRN 600 A STUDY OF THE OLDER PERSON. (3)

This didactic/experiential course is designed to give the student an overview of the experience of growing old by focusing on the individual older person. Framed from a cell to society perspective, didactic lectures will focus on historical, demographic, biological, psychological, social, environmental, life course and humanistic dimensions of growing old. Emphasis is placed on the relationship between individual experience and societal context. The experiential component will consist of having each student interact with a healthy elder mentor who will provide insight from the perspective of lived experience. Prereq: Admission to the Ph.D. Program in Gerontology.

GRN 602 CERTIFICATE PRACTICUM IN GERONTOLOGY. (3)

The course is a field experience of approximately 220 hours focused on aging. Content, site, and supervisor may vary; but the student must have an objective-based proposal approved prior to beginning the practicum. Prereq: Acceptance into the Graduate Certificate in Gerontology.

GRN 610 PSYCHOLOGY OF AGING. (3)

This is a graduate level seminar on the psychology of aging. The course will focus on many of the major topics and theories relevant to understanding the aging process. It focuses on health

behaviors, sensation and perception, cognitive abilities, personality, social interactions, motivation and emotion, psychological disorders, end of life issues, and successful aging. The course examines the topics above from a normal aging perspective, atypical aging, successful aging, and demonstrates the interrelationships between the topics to address the aging individual. The course will also focus on the methods used to conduct psychological research with an aging population.

GRN 612 BIOLOGY OF AGING. (3)

A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as ANA/BIO/PGY 612.)

GRN 615 SEMINAR IN TEACHING MEDICAL SCIENCE (MED SCIENCE TEACHING I). (2)

A two (2) credit seminar course in which issues related to the theory and practice of life science education are discussed in a Socratic manner. May be repeated to a maximum of three credits. Prereq: Current enrollment in a life science graduate program. (Same as PGY 615.)

GRN 616 TEACHING SEMINAR IN GERONTOLOGY. (2)

The purpose of this seminar is to prepare doctoral students as classroom instructors, and to enhance instructional skills of those students with teaching experience. Emphasis is placed on developing the fundamental knowledge and skills needed to survive and excel in the classroom. Topics covered include: course development strategies; lecture preparation and delivery; interactive and group learning; writing for learning; student evaluation; student advising; and instructional ethics and responsibilities. Seminar activities include development of instructional materials, thematic discussion, and demonstrations/simulations of classroom experiences. Prereq: GRN 600 and GRN 620, or consent of instructor.

GRN 617 TEACHING PRACTICUM IN GERONTOLOGY. (3)

This practicum provides a forum for continued development of teaching skills by concurrently combining classroom instruction experience with formal instructor debriefing sessions. Problematic and successful experiences will be discussed, and specific instructional concepts and issues will be addressed in depth. Prereq: GRN 616 and concurrent classroom teaching.

GRN 618 EPIDEMIOLOGY OF AGING. (3)

This course introduces the application of epidemiologic methods to the study of older persons. Prereq: Enrollment in a Public Health degree and SPH 605/PM 620 Intro to Epidemiology and GRN 650, or consent of instructor. (Same as SPH 618.)

GRN 620 HUMAN AGING AND ADJUSTMENT. (3)

The intent of GRN 620 is to provide continued development (from GRN 600) of critical interdisciplinary skills in studies of the aging process. Students will, as a group, identify a single central issue associated with aging and conduct comprehensive literature reviews and appropriate research to thoroughly address that issue. Prereq: GRN 600 and admission to the Ph.D. program in gerontology.

GRN 644 DEMOGRAPHY AND AGING. (3)

This course examines the dynamics of human population distributions, densities, and growth patterns as they relate to population aging. The essential demographic processes of fertility, mortality, and mobility are addressed from multiple disciplinary perspectives, and topical coverage includes the environmental, social, political, economic, and cultural impacts on personal demographic behavior and population change. Emphasis is placed on historic and contemporary meanings and influences of population diversity, and how this diversity affects the patterns and consequences of aging across space and time.

GRN 650 RESEARCH DESIGN IN GERONTOLOGY. (4)

This course will provide training in research design appropriate for the study of aging and the aged and will critically assess special considerations involved in studying this population. Topics to be covered will include: philosophy of science; data sources for research on aging (including medical informatics and clinical epidemiology sources); the use of animal models in aging research; special design considerations for the study of aging [reconciling age, period, and cohort effects]; longitudinal research; measurement tools for assessing the elderly [functional assessment, ADLs, life satisfaction scales, etc.] issues in interviewing older people; qualitative methods in aging research; the ethics of research on aging and the aged. Prereq: Admission to Gerontology Ph.D. Program.

GRN 651 QUALITATIVE GERONTOLOGY. (3)

This course (1) critically evaluates different qualitative epistemologies including biography, phenomenology, grounded theory, ethnography and the case study; (2) assesses the value of alternative qualitative methodologies for gaining deeper understanding of the experience of elders; (3) explores practical issues in employing such methodologies; and (4) provides opportunities for participants to engage in different styles of qualitative research. Prereq: Graduate standing.

GRN 653 LABORATORY RESEARCH IN GERONTOLOGY. (3)

Students will be exposed to current biomedical techniques by conducting supervised research in a laboratory setting. Prereq: Permission of instructor.

GRN 656 INTEGRATIVE STUDIES IN GERONTOLOGY. (3)

This seminar is designed to provide gerontology doctoral students the opportunity to place individual dissertation topics within the broader field of gerontology, and to broaden the authority with which the students engage in their dissertation work. Although work will largely be independently driven, frequent class meetings provide ongoing feedback from the group on

Course Descriptions

progress and allow all participants to learn from each others work. Prereq: Completion of gerontology core requirements.

GRN 660 AGING ISSUES AND FAMILY RELATIONS. (3)

The study of dynamics of family interactions and issues when some family members are elderly. Emphasis is placed on perspectives from multiple generations and across various kin categories. (Same as FAM 660.)

GRN 704 MENTAL HEALTH AND AGING. (3)

The aim of this class is to provide some breadth and selected depth in the area of Mental Health and Aging, aimed at research perspectives. Various psychiatric syndromes will be evaluated in lectures and throughout the readings in relation to prevalence, assessment, etiology, and treatment in reference to research in older adults. Prereq: Graduate student status.

GRN 705 COGNITIVE AGING. (3)

This is a graduate level seminar on cognitive aging. Topics to be addressed include theories of aging, memory, sensation, and perception, attention, language, social cognition, intelligence, decision-making, and dementia.

GRN 706 HEALTH PROMOTION AND AGING. (3)

In this class health promotion in old age will be examined. The theory behind health promotion programs and the status of existing health promotion program for older adults will be reviewed and discussed. Finally, the knowledge acquired in class will be used to develop and demonstrate an innovative health promotion program for older adults. Prereq: Graduate student standing.

GRN 710 AGING OF THE NERVOUS SYSTEM. (3)

This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer's disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences is encouraged. (Same as ANA/PGY/PHA 710.)

GRN 720 GERONTOLOGY/GERIATRIC DENTISTRY. (1)

This course is designed to help students gain an appreciation for the significant opportunities as well as challenges the aging population will bring to their oral health practice. This course will provide students basic knowledge and information in gerontology/geriatric dentistry. Lecture, 17 hours. May be repeated to a maximum of two credits. Prereq: Permission of course director.

GRN 731 ELDER MISTREATMENT. (3)

This course reviews major issues and trends related to elder mistreatment. The course emphasizes individual and systemic issues related to elder abuse, neglect, exploitation, and self-neglect on individual, local, state, and federal levels. Special consideration is given to dynamics that shape past, current, and future issues related to elder mistreatment. Prereq: Graduate student status and/or permission of instructor.

GRN 749 DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

GRN 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

GRN 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)

May be repeated indefinitely.

GRN 770 SPECIAL TOPICS IN GERONTOLOGY. (1-3)

This course is designed to present contemporary topics in gerontology in either a lecture or seminar format. It is intended to provide students with opportunities to be informed of current issues in gerontology as well as to explore in-depth studies of particular gerontological topics. May be repeated to a maximum of twelve credits.

GRN 771 AGING IN RURAL ENVIRONMENTS. (3)

In the context of a changing rural environment, this seminar explores the life circumstances and life experience of rural elders in relation to the health and well-being of this population.

GRN 772 AGING AND THE LIFE COURSE. (3)

This seminar will establish a common foundation of knowledge through examinations of traditional "life courses" influencing individuals as they age through time, including household and family, education and work, and housing. This foundation will be built upon using critical examinations of such themes as gender roles, spatial experience, cognitive change and memory, and structural effects on life trajectories. Emphasis will be placed on surveys of existing literature and on integrating various life course elements within social and behavioral theory.

GRN 773 ETHICS AND AGING. (3)

The focus of this class is on applied ethics and aging. We will address the following topics: mid/late life reproduction; research with older adults; spirituality/selfhood; legal issues; cultural issues; vulnerable older people; caregiving and community-based care; specific issues related to Alzheimer's Disease; issues at the end of life, and other timely ethical issues that may arise during the course. The course will make use of provocative readings, case studies, supplementary professional articles, a presentation and paper, lively class discussion, and outside speakers who will share their expertise with you on a variety of ethical issues related to aging.

GRN 774 PUBLIC POLICY AND AGING. (3)

This course reviews major issues and trends in the economics of aging and social policy and aging. The course emphasizes health, economic, and welfare policies and considers their implications on federal, state, and local levels. Special consideration is given to dynamics that shape past, current, and future policy in the area of aging. Prereq: Graduate standing.

GRN 775 CLINICAL GERIATRICS. (3)

This course provides a perspective of clinical geriatrics. Basic concepts of geriatric care are presented, along with concepts of gerontology as it applies to geriatric medicine. This course is designed for both clinicians and non-clinicians.

GRN 778 CURRENT TOPICS IN BRAIN AGING. (3)

Students will learn cellular and molecular changes that occur in the brain through AD progression in addition to the impact of these changes on individual lifestyle and on society.

GRN 780 APPLIED GERONTOLOGY PRACTICUM. (1-3)

This course is designed to provide students the opportunity to experience the practical application of gerontology in such domains as government, administration and clinical environments. In addition, the student will gain in-depth experience with the organization and an introduction to problems in applied research. Students will work under the supervision of a gerontology faculty member to coordinate efforts, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of six credits. Approval of the Director of Graduate Studies required.

GRN 781 STUDENT DEVELOPMENT PRACTICUM. (1)

This practicum provides an opportunity for students to present and discuss their research findings in a venue that promotes skill development in the areas of preparation and delivery of research presentations. Students are required to enroll in GRN 781 during each of the first five semesters in residence. Prereq: Admission to Gerontology Ph.D. program.

GRN 782 WOMEN'S HEALTH AND AGING. (3)

This class explores the issues related to health and well-being among older women. Using a multidisciplinary approach that blends humanities, social and medical science and public policy, the course examines social, economic and cultural contexts of chronic physical and mental health. Prereq: Upper level/graduate class in social science. (Same as BSC 782.)

GRN 783 PUBLIC HEALTH AND AGING. (3)

Public Health and Aging is an elective course in the Graduate Center for Gerontology and Department of Health Behavior and is offered to students on the graduate level. The focus of the course is to help students identify a public health framework and a paradigm for addressing the issues of social, emotional, physical, and mental health in older adults, as well as a keen understanding and awareness of chronic disease prevention, mortality, and quality of life issues that are germane to aging in the United States. Prereq: Graduate standing.

GRN 785 INDEPENDENT RESEARCH IN GERONTOLOGY. (1-6)

Open to doctoral students who have the necessary training and ability to conduct research at an advanced level. Students will work under the supervision of a gerontology faculty member to coordinate research efforts, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of 9 credits. Approval of the Director of Graduate Studies required.

GRN 786 INDEPENDENT READINGS IN GERONTOLOGY. (1-6)

Open to doctoral students who have the necessary training and ability to work independently at an advanced level. Students will work under the supervision of a gerontology faculty member to identify readings appropriate for the student's chosen topic, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of nine credits. Approval of the Director of Graduate Studies required.

GRN 790 PROFESSIONAL DEVELOPMENT IN GERONTOLOGY. (1)

This seminar will cover elements of professional development in the areas of research, teaching and service as students are prepared for obtaining positions and developing careers in gerontology. Emphasis will be placed on means of documenting progress and accomplishment (e.g., CV building, teaching portfolio development, evaluation), effective strategies for searching for and securing jobs (e.g., interview skills), and strategies for promoting quality performance and professional success in gerontology-related professions. Prereq: Admission to the Gerontology Ph.D. program.

GS The Graduate School

GS 600 SPECIAL TOPICAL GRADUATE COURSE. (1-3)

An interdisciplinary, topical or experimental course to be approved by the Dean of the Graduate School. A particular course can be offered no more than twice under the number GS 600. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

GS 610 COLLEGE TEACHING. (1)

This one-credit-hour seminar addresses teaching and learning issues in the college classroom. It is intended for graduate students who want to prepare for future academic careers and enhance current teaching activities. The seminar will examine pedagogical issues in a general format with opportunities for discipline-specific applications. This course can serve to augment any department-based programs.

GS 620 TEACHING IN THE 21ST CENTURY.**(1-2)**

This seminar, part of the Preparing Future Faculty program, is a rotating series of 1-2 credit hour courses on various aspects of life in institutions of higher education. Participating graduate students from a range of disciplines will have the opportunity for an in-depth exploration of the research and practice surrounding a special topic in college teaching and learning. The seminars will involve both classroom activities and experience-based learning. For example, the course on first-year students will include a study of current research on the first-year experience, interviews with first-year students, and an experiential component where participants serve as mentors for first-year students. Participants will be asked to produce a paper that integrates the theoretical and experiential aspects of the course and develops implications for teaching in their content areas. May be repeated to a maximum of three enrollments.

GS 630 INSTRUCTIONAL TECHNOLOGY.**(1)**

This seminar addresses pedagogically sound and effective applications of instructional technologies (IT) in college teaching. Course goals include examining the impact of IT on learning outcomes, teaching strategies, and instructional assessments; developing proficiency in creating PowerPoint presentations, designing and managing instructional Web sites, facilitating Internet dialogue, and conducting distance learning courses; and considering how IT affects faculty roles and responsibilities, the nature of the college classroom, and the future of higher education.

GS 640 GRANT WRITING.**(3)**

This course prepares graduate students to be PI on a state, federal, other large competitive grant. Students prepare and critique proposal. Prereq: GS 650.

GS 650 PREPARING FUTURE FACULTY.**(2)**

Preparing Future Faculty is designed to introduce graduate students to the roles and responsibilities of the college teacher and to assist them in understanding the variety of institutions in which effective teaching takes place. Students will focus on the academic expectations, institutional identities, and particular policies and procedures which characterize different types of institutions of higher learning. Skills to help students apply for positions and achieve success in their appointments will also be addressed. Lecture, two hours per week.

GS 660 BIOACTIVE INTERFACES AND DEVICES SEMINAR.**(1)**

A multi-disciplinary seminar in Bioactive Interfaces and Devices. May be repeated to a maximum of four credits. Prereq: Graduate status.

GS 680 GRADUATE STUDENT LEAVE OF ABSENCE.**(0)**

This course is intended for degree-seeking graduate students that have received permission to take a leave of absence for one or more semesters. By registering for GS 680 (0 credit) students remain officially enrolled in the Graduate School and will therefore be eligible to priority register for the subsequent semester. Prereq: Enrollment in a graduate degree-granting program.

GS 695 SPECIAL PROBLEMS**IN COLLEGE TEACHING AND LEARNING.****(1-3)**

This special problems course is designed to provide opportunities for graduate students and postdoctoral scholars pursuing a Certificate in College Teaching and Learning to explore special problems related to college teaching that bridge or fall outside the domain of departmental efforts; graduate students exploring faculty development as a career option; and students who currently hold full-time teaching positions in colleges or universities and who are interested in professional development or credentialing in College Teaching and Learning. An "Independent Graduate Work Initiation Form" must be filed with the Certificate Director prior to registration for this course. May be repeated to a maximum of six credits. Prereq: Submission of the GS 695 Proposal Form one semester in advance.

GS 699 PRACTICUM IN COLLEGE TEACHING.**(3)**

The Practicum is a mentored teaching experience that not only immerses the graduate student in teaching by also fosters reflection on the experience, provides structured feedback and plans for improvement, and guides students in developing a teaching portfolio. The practicum requires that the graduate student assume full responsibility for a course, under the guidance of a mentor teacher. Supervision for the practicum experience is a joint responsibility of the Teaching and Learning Center, certificate faculty, and the student's mentor. The practicum is distinct from many mentored Teaching Assistant experiences because the student must have full responsibility for the course, including syllabus and materials development, assessment, instructional responsibilities, and grade assignments. Credit will not be assigned until the graduate student has submitted a teaching portfolio that includes the practicum experience. Prereq: EPE 672; GS 610 (or equivalent); consent of instructor required.

GS 758 CAPSTONE RESIDENCY.**(0)**

Completion of capstone project for plan B (non-thesis) students; course may not be repeated. All course work toward the degree must be completed. Prereq: All course work toward the degree must be completed.

GWS Gender and Women's Studies**GWS 200 SEX AND POWER.****(3)**

Introduces Gender and Women's Studies from a social science perspective using cross-cultural and interdisciplinary approaches. Analyzes relations of power marked by gender and how these relate to other social distinctions and processes. Interactive learning format.

GWS 201 GENDER AND POPULAR CULTURE.**(3)**

This course examines the role of popular culture in the construction of gendered identities in contemporary society. We examine a wide range of popular cultural forms – including music,

computer games, movies, and television – to illustrate how femininity and masculinity are produced, represented, and consumed.

GWS 250 SOCIAL MOVEMENTS.**(3)**

This course takes you through some ways in which people have organized themselves around local, national, and international issues pertaining to gender. We engage key theories that explain the origins, strategies, and success of different forms of social movements across the world. We also critically analyze case studies from different parts of the world to understand how social movements work on the ground and in specific cultural environments with unique historical trajectories, attending to ways in which social movements are shaped by, and do or do not result in changes to social structures of gender, race, ethnicity, class, and sexuality. This course is required for undergraduate GWS majors and minors.

GWS 300 TOPICS IN GENDER**AND WOMEN'S STUDIES (Subtitle required).****(3)**

Selected topics in women's studies with special attention to those of contemporary relevance. May be repeated to a maximum of nine credits under different subtitles. Prereq: GWS 200 or GWS 201 or permission of instructor.

GWS 301 CROSSROADS (Subtitle required).**(3)**

Specific topics will vary, but all courses taught under this title focus on the contributions, interplay, intersections, constructions, history, and confrontations that the social categories and lived experiences of gender, race and class produce in the United States. Examines opportunities for civic responsibility and social justice. May be repeated up to a maximum of 9 credit hours under different subtitles.

GWS 302 GENDER ACROSS THE WORLD (Subtitle required).**(3)**

Interdisciplinary, comparative and transnational examination of issues of gender focused around particular themes and locations. Thematic focus explicating gender which also illuminates questions of history and political economy in specific locations. Introduces students to research and a variety of analytical questions in the field, as well as the interaction between locales/people and structural processes. May be taken up to 9 credit hours under different subtitles.

GWS 309 HEALTH, HISTORY, AND HUMAN DIVERSITY.**(3)**

Health care reform is often in the news, and everyone has an opinion on why the system is broken, how to fix it, who should have access to good medical care, under what circumstances, and what constitutes "good care." This online, multi-format course will consider what it has meant to be a good patient or a good doctor at various points in U.S. history, who was included or excluded in each group, how medicine became professionalized, and how people have organized around health issues. Students will engage with primary sources, watch related films, interact with the professor during virtual "office hours," and participate in online moderated discussions. (Same as CPH 309.)

GWS 340 HISTORY OF FEMINIST THOUGHT TO 1975.**(3)**

This course is designed to provide students with an historical overview of the cultural diversity, creative and theoretical expression, and defining moments in the development of feminist thought up to 1975. Texts will include works, such as that of Hypatia, Christine De Pizan, Sor Juana Ines de la Cruz, and Mary Astell, that pre-date the term "feminist" but that are pioneering statements in the struggle for gender equality. "Thought" will include political manifestos, poetry, and short stories, as well as classic works of feminist theory and cultural criticism.

GWS 350 FEMINIST THEORY.*(3)**

An interdisciplinary course that acquaints undergraduate students with the central issues and texts in contemporary feminist theories. It will examine what feminist and womanist theories are and the ways in which they analyze and explain the workings of our social world. The course will clarify basic concepts in feminist thought such as gender, difference, patriarchy, and post-colonialism and will provide students with tools to analyze these theories and explore contemporary applications. Prereq: GWS 200 or GWS 201.

GWS 360 LGBTQ HISTORY IN THE UNITED STATES.**(3)**

Introduces changing perceptions of homosexuality over time, as well as the creation of LGBTQ identities and social movements; explores the meanings of same-sex love prior to the existence of current terminology, and how, when, and why such language developed; and examines the cultural context in which "homosexual" came to represent a person rather than a behavior in 19th century Euro-American culture and the concurrent medicalization of homosexuality and gender nonconformity.

GWS 395 UNDERGRADUATE RESEARCH IN GENDER AND WOMEN'S STUDIES.**(1-3)**

The purpose of this course is to give students the opportunity to engage in independent faculty-directed library or field research focused upon significant issues and problems confronting women in contemporary society. May be repeated to a maximum of 6 hours. Prereq: GWS 200 or GWS 201 and written agreement of a Women's Studies Affiliated faculty member, who will direct the study.

GWS 399 INTERNSHIP IN GENDER AND WOMEN'S STUDIES.**(1-6)**

Provides field experiences in women's studies through work in education, industry, government, or community organizations. Offered on a pass/fail basis only. Maximum six credit hours per placement to maximum of twelve credit hours total. (Three hours can be counted toward the undergraduate Women's Studies minor requirements.) Prereq: GWS 200 or GWS 201 and declared minor in Women's Studies and consent of instructor.

GWS 400 DOING FEMINIST RESEARCH. (3)

In this course, we focus primarily on different kinds of qualitative research. Students will become familiar with a variety of methods used by Gender and Women’s Studies scholars, and reflect on the problems involved in gathering information. But primarily, students will BE the researcher: using all these methods to develop a variety of approaches to studying a Women’s Studies topic of choice. Each week, class participants will discuss the practicalities of conducting particular kinds of research and evaluate the studies; and they will share research findings in a workshop format. Prereq: GWS Major or permission of instructor.

GWS 410 INTRODUCTION TO QUEER THEORY. (3)

An introduction to theories of how people think about and enact genders and sexualities. Students will learn key scholarly concepts in order to differentiate between queer theory as an interdisciplinary approach to sexuality studies and disciplinary approaches to the study of sexuality, such as psychological, historical, anthropological, or sociological. We will apply critical theory to political debates, literary texts, and films in order to understand the contributions made by queer theory to the study of humanities, especially issues of human diversity and globalization. Prereq: GWS 201 or GWS 200.

GWS 430 GENDER, POWER AND VIOLENCE. (3)

This course is organized around three selected but interrelated themes to help us examine the interconnections between gender, power, and violence in different cultural settings. We will examine state, institutional, and interpersonal violence and critically analyze the ways in which gender and power are articulated at each of these levels. In our discussions, we will pay special attention to the various forms (physical, psychological, economic, sexual, and symbolic) violence may take and analyze the causes and consequences of different articulations of gender, power, and violence.

GWS 506 HISTORY OF SEXUALITY IN THE U.S. (3)

An overview of the history of beliefs about sexuality, sexual cultures and norms, and sexuality’s relationship to power in American society from the colonial period to the present.

GWS 595 ISSUES IN GENDER AND WOMEN’S STUDIES (Subtitle required). (3)

Discussion, readings, and papers focusing on relevant topics in Women’s Studies directed by a faculty member with expertise in the topic under study. Courses will be interdisciplinary, although they will also include materials from particular relevant disciplines. May be repeated under different subtitles to a maximum of six credits. Prereq: GWS 200 or GWS 201 or permission of instructor.

GWS 599 SENIOR SEMINAR (Subtitle required). (3)

This course provides a space for students to synthesize what they have learned about the methods and theories of GWS in a few different ways. Students will reflect on the ways in which one puts together an argument and writes as an interdisciplinary scholar on gender or women. Students will do this by writing a senior thesis and editing the theses of other students, and reading and discussing some materials which deal with research and writing in GWS. Prereq: Must be a declared major or minor in junior or senior year, or have written permission of the Chair in an exceptional circumstance. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

GWS 600 TOPICS IN GENDER AND WOMEN’S STUDIES (Subtitle required). (3)

Selected topics of theoretical or substantive interest in women’s studies with special attention to topics of contemporary relevance. May be repeated to a maximum of nine credits under a different subtitle. Prereq: Graduate standing or permission of instructor.

GWS 610 WOMEN AND “MADNESS”. (3)

This course explores the social construction of mental illness as it pertains to gender. We will consult narratives from different disciplines: Literature, Psychology, Cultural Studies, Anthropology, History and Feminist Theory. Our focus will concern the ways in which all women are constructed as “sick” as well as the perspectives of women who feel a sense of psychic dislocation and disability in their lives. Readings by women of color and lesbians will suggest the particular ways culture defines such women as “abnormal.”

GWS 616 COLONIALISM/POST-COLONIALISM AND GENDER. (3)

This course is designed to expose students to a range of theories and debates centering on or pertinent to women, gender, and sexuality in the field of postcolonial studies. Here, the field is understood in its widest and most interdisciplinary sense, inclusive of studies of Empire, the independent so-called “Third World”, and diasporas. Topics for study will include classical texts in the field, current postcolonial readings on gender and sexuality in empire, representation, trans/nationalism, and diasporas. Course credit may be used to help satisfy the international component of the Women’s Studies Graduate Certificate requirements.

GWS 620 COMPARATIVE CONSTRUCTIONS OF GENDER AND SEXUALITY. (3)

This course is designed to give students an understanding of an array of diversely situated theories and debates about gender and sexuality mainly outside of mainstream U.S. culture. Countries/communities of focus will vary.

GWS 630 SEMINAR IN FEMINIST RESEARCH METHODS. (3)

This course presents a variety of research methods used by Gender and Women’s Studies scholars. The course examines how research has been conducted in a range of fields within Gender and Women’s Studies, presents basic skills, commonly used methods, ethical issues, and social applications.

GWS 640 HISTORY OF FEMINIST THOUGHT AND ACTION (Subtitle required). (3)

Course provides a historically organized, thematically focused examination of pioneering works of feminist argument and analysis, creative writing, art, memoir, and politics. Theme and time-period vary according to instructor, but time-span covers at least fifty years and content includes at least two national, ethnic, or geographical contexts. May be taken up to six credit hours under different subtitles.

GWS 650 FEMINIST THEORY. (3)

An interdisciplinary course addressing issues in contemporary feminist theory (such as intersections of race and gender, the body, ideology and representation, sexuality, etc.).

GWS 675 ADVANCED FEMINIST THEORY. (3)

An advanced topics course in feminist theory. Prereq: Permission of instructor.

GWS 690 GRADUATE RESEARCH IN GENDER AND WOMEN’S STUDIES. (3)

The purpose of this course is to provide graduate students the opportunity to engage in independent faculty-directed research in Women’s Studies. Prereq: Written agreement of a Women’s Studies Affiliated Faculty Member, who will direct the study.

GWS 700 TOPICAL SEMINAR IN GENDER AND WOMEN’S STUDIES (Subtitle required). (3)

Intensive work in particular topics in Gender and Women’s Studies. May be repeated four times with different subtitles. Prereq: Graduate standing in GWS, or consent of instructor.

GWS 710 LATIN AMERICAN AND U.S. LATINA WOMEN’S LIVES. (3)

This course employs an interdisciplinary perspective to critically examine the various identities and spaces created by, and imposed on, women in Latin America and Latinas in the U.S. We explore connections and divergences within and between these two groups of women, but begin by examining how the legacies of conquest in Latin America and the U.S. have shaped women’s experiences in the past. This background will also help us understand how women’s experiences have differed given the specific contexts in which their lives unravel.

GWS 748 MASTER’S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GWS 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Successful completion of the qualifying examination.

GWS 775 DOMESTIC VIOLENCE ACROSS CULTURES. (3)

This course focuses on domestic violence cross-culturally and from an interdisciplinary perspective. We discuss theories of domestic violence and how research and popular representations influence ideas regarding this phenomenon. We draw on specific experiences of intimate partner violence in different parts of Latin America, North America, Africa, Asia, and Europe. Topics include the impact of migration on women’s experiences of violence, state responses and law enforcement, women’s use of violence, the role of in-laws in women’s experiences of violence, and women’s resistance.

HA Health Administration

HA 622 MENTAL HEALTH ADMINISTRATION. (3)

This course focuses upon the administration of local mental health agencies, facilities and coordination of deinstitutionalization programs, e.g., group houses, halfway houses. The course will focus upon system coordination, finance and communication. Prereq: MHA/MPA program status.

HDI Human Development Institute

HDI 350 UNIVERSAL DESIGN: APPLICATIONS IN THE BUILT, VIRTUAL AND LEARNING ENVIRONMENTS. (3)

This course provides an introduction to universal design. The course will give students a base of core knowledge and experience in universal design principles utilized in the built, virtual and learning environments. This course illustrates the application of universal design across a variety of disciplines and across the lifespan. It is designed to enable students to apply the principles of universal design within their own course of study.

HDI 400 UNIVERSAL DESIGN PRACTICUM. (3)

This course provides experiential learning in universal design principles utilized in the built and learning environments. You will be introduced to a range of spatial thinking skills as they relate to accessibility and universal design. You will become familiar with accessibility evaluation methods including mapping and translate these skills into course fieldwork, with a focus on experiences on campus. This course illustrates the application of universal design across a variety of disciplines. Prereq: HDI 350, acceptance in the Certificate in Universal Design and consent of instructor.

HDI 500 UNIVERSAL DESIGN PRACTICUM II: ADVANCED TECHNIQUES. (3)

This course provides advanced experiential learning in universal design principles utilized in the built and learning environments. This course illustrates the application of universal design across a variety of disciplines. Students, with the assistance of the Director of the Certificate in Universal Design, will identify and secure a practicum setting. Examples of practicums include conducting geomapping of campus features, providing captioning for an online course, assisting in designing a syllabus that employs universal design for learning principles, assisting a small business in maximizing use of floor space by clients, universally designing a sensory garden, assessing accessibility of an online environment for people using assistive technology. Practicum settings may be on campus, within the Lexington community, within a virtual community or beyond. Prereq: Acceptance in the Certificate in Universal Design, HDI 350, HDI 400 and consent of instructor.

HDI 600 INTERDISCIPLINARY APPROACHES TO THE NEEDS OF PERSONS WITH DEVELOPMENTAL DISABILITIES AND SPECIAL HEALTH CARE NEEDS. (2)

This course provides a base of core knowledge and experience in interdisciplinary services and supports for persons with developmental disabilities and/or special health care needs and their families. This course is structured in an interdisciplinary seminar format, illustrating the application of each discipline's expertise to the needs of persons with disabilities and their families. Lecture, three hours per week. Prereq: Graduate standing and consent of instructor.

HDI 601 INTERDISCIPLINARY APPROACHES TO THE NEEDS OF PERSONS WITH DEVELOPMENTAL DISABILITIES AND SPECIAL HEALTH CARE NEEDS: PRACTICUM. (2)

Participants engage in a wide range of structured site visits and other university-based clinical and community-based learning experiences, related to services and supports for persons with developmental disabilities and/or special health care needs and their families. Lecture: one hour; laboratory: eight hours per week. Prereq: Graduate standing and consent of instructor.

HDI 602 INTERDISCIPLINARY SUPPORTS. (2)

This course will build on the disciplinary clinical competence of participating students and enhance their knowledge and skills related to specific issues regarding the needs of persons with developmental disabilities and other special health care needs. Topics covered include: Epidemiology, Prevention of Developmental Disabilities, Micro Environment, Early Childhood, School Age and Adult Issues, Cultural Diversity, the Rural and Underserved Population, Politics, Law and Health Care Reform Issues and Advocacy. Lecture, three hours per week. Prereq: Graduate standing and consent of instructor.

HDI 603 INTERDISCIPLINARY SUPPORTS PRACTICUM. (2)

The course will include practical experiences in interdisciplinary assessments and/or activities, as well as a long-term individualized student practicum. The practicum seminars will focus upon problem-solving strategies in providing high quality supports to persons with developmental disabilities and their families. Lecture: one hour every two weeks; laboratory: eight hours per week. Prereq: Graduate standing and consent of instructor.

HDI 604 INTERDISCIPLINARY LEADERSHIP SEMINAR. (2)

This course will provide a base of core knowledge and experiences in leadership, systems change, strategic planning, proposal development, group facilitation, conflict resolution, and interagency collaboration principles and strategies. These topical areas effectively represent key functions for those who would assume leadership roles in promoting inclusive community supports for persons with developmental disabilities and their families. The course will utilize faculty and Institute staff from a wide range of disciplines. Lecture: three hours per week. Prereq: Graduate standing and consent of instructor.

HDI 605 INTERDISCIPLINARY LEADERSHIP PRACTICUM. (2)

This course will include the trainee's individually designed leadership project. Options for projects include: research, development and preparation of grant applications, development and delivery of in service training, or development of evaluation plans. As a final requirement for this course, the student will be required to develop a Leadership Project Summary, and make a class presentation on the Leadership Project. Laboratory: eight hours per week. Prereq: Graduate standing and consent of instructor.

HES Human Environmental Sciences**HES 100 AN INTRODUCTION TO PROFESSIONS IN HUMAN ENVIRONMENTAL SCIENCES. (1)**

An orientation to human environmental sciences, its history, contemporary issues and philosophy, discussed through a common body of knowledge, utilizing family systems theory as the overarching conceptual model. Emphasis will be on the interactive, interrelatedness and capacity building opportunities of individuals, families, and communities, using a systemic life course approach. Prereq: Declared majors in Human Environmental Sciences.

HES 300 SPECIAL COURSE IN HUMAN ENVIRONMENTAL SCIENCES (Subtitle required). (1-3)

Interdisciplinary, topical or experimental course to be approved by the appropriate department chairperson and by the Dean of the College of Human Environmental Sciences. Open to all University students, subject to limits or prerequisites set by the instructor. May be repeated to a maximum of six credits.

HES 400 CONCEPTS IN HUMAN ENVIRONMENTAL SCIENCES: INTEGRATION AND APPLICATION. (2)

Interdisciplinary approach to the solution of family and individual problems. Application of concepts from the developmental, relational, managerial, nutritional, and environmental studies within the college and support disciplines. Prereq: HES 100, senior standing in the College of Human Environmental Sciences, and consent of instructor (via permit).

HES 596 SPECIAL PROBLEMS IN HUMAN ENVIRONMENTAL SCIENCES. (1-3)

Intensive work on specific topics in human environmental sciences. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

HES 600 RESEARCH METHODOLOGY IN HUMAN ENVIRONMENTAL SCIENCES. (3)

Students will study scientific techniques and accepted research methodologies in human environmental science research. Emphasis is placed on understanding the research process and developing the skills necessary to evaluate and implement research methods and design procedures. Prereq: Graduate standing. (Same as RTM 600.)

HHS Human Health Sciences**HHS 101 SURVEY OF HEALTH PROFESSIONS I. (1)**

An introduction to the health sciences professions including an exploration of health sciences careers. (Same as HSE 101.)

HHS 102 SURVEY OF HEALTH PROFESSIONS II: SHADOWING EXPERIENCE. (1)

This course provides students with opportunities to explore the health sciences professions. It assists students in developing beginning observation, recording, and reporting skills appropriate to the selected professions by way of an on-the-job shadowing experience.

#HHS 104 MINDFULNESS PRACTICES AND STRESS REDUCTION. (1)

This course is designed for students interested in gaining personal insight into their busy mind's activity and learning how to settle the mind and more effectively deal with daily life stressors. Mindfulness practices will be discussed on evidenced based health outcomes and will be applied through personal mindfulness practice experiences. (Same as CLM 104.)

#HHS 120 CAREERS AS A PHYSICIAN ASSISTANT. (1)

An overview of the Physician Assistant profession(s) including aspects of professional practice, areas of specialization, professional issues and trends, and career paths and opportunities. The course will consist of assignments, lectures and interactive discussions led by faculty and visiting professionals designed to expand students' understanding of the profession(s) and to assist in educational and career planning and discernment. (Same as PAS 120.)

HHS 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3)

Review of the wellness-illness spectrum and the societal response in terms of health services. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also includes a discussion of major health problems and related health care programs. (Same as CLM/HSM 241.)

HHS 350 HEALTH POLICY AND POLITICS. (3)

This course will address the development of the past and current US health policies within the context of historical, economic, cultural, and political environments. The political process and the roles and responsibilities of the executive, legislative, and judicial branches of government will be examined. The power and influence that politics, money, the media and special interest groups have had, and continue to have, upon the development of national and state health policies will be discussed and analyzed. Prereq: HHS 101, HHS 102 and CLM 241. Student admitted to the CLM or HHS program or consent of instructor. (Same as CLM 350.) This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

HHS 351 HEALTH SERVICES ADMINISTRATION. (3)

Theories and practices of administration in health care institutions with special emphases on organizational behavior and analyses of various administrative processes and techniques. Prereq: HHS 101, HHS 102, CLM 241. Student admitted to HHS or CLM program or consent of instructor. (Same as CLM/HSM 351.)

***HHS 353 ETHICS IN HEALTHCARE. (3)**

The course will include the study of moral reasoning and ethical theories in medical ethics. Ethical issues arising in the practice of health care delivery will be examined. Codes of ethics and the health professional's obligations to patients, colleagues, employing institutions, and the community will be considered and relevant case studies will be analyzed. (Same as CLM 353.)

HHS 354 HEALTH LAW. (3)

Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes an earned Associate Degree in a health care

discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM/HSM 354.)

***HHS 356 SEMINAR IN INTERPROFESSIONAL HEALTHCARE: PART 1: GLOBAL CONTEXT. (1)**

This course will be the first part of a two part course. In HHS 356, students will gain a better understanding of the world around them, regarding healthcare and practices. A study of selected topics in health and wellness with a focus on the way individuals experience health and utilize resources within their individual nesting environments of health and social communities. Topics will include an exploration of individual perceptions and experiences of health, wellness, and quality of life throughout the lifespan and resources available to achieve health. Prereq: Admission to HHS Program or consent of instructor.

#HHS 357 SEMINAR IN INTERPROFESSIONAL HEALTHCARE: PART 2 COMMUNITY ENGAGEMENT. (1)

In Part 1 of the course, students were able to learn about and reflect upon their thoughts regarding the different healthcare systems and practices around the world. Part 2 of the course will continue to build upon skills in interprofessional understanding and relationships as well as allow students to experience healthcare practices first hand within a community setting. The experience gained during this portion of the course will help students identify, compare, and contrast the different aspects of healthcare in the community as well as allow them to reflect upon how those settings may differ from their own backgrounds. A study of selected topics in health and wellness with a focus on the way individuals experience health and utilize resources within their individual nesting environments of health and social communities will also be key aspects of this course. Topics will include an exploration of individual perceptions and experiences in health, wellness, and quality of life throughout the lifespan and resources available to achieve health. In addition, Part 2 of the course will focus on international and regional differences within healthcare and ways to collaborate and use diverse Interprofessional relationships to achieve health goals. Prereq: HHS 356.

HHS 361 HEALTHCARE QUALITY AND PATIENT SAFETY. (3)

This course provides students an opportunity to study how healthcare quality and patient safety has changed over the last 10 years, how human error and "high-reliability organizations" (e.g., hospitals) interact, how changes to our healthcare system have affected care, and how quality/safety/improvement theories from other industries are impacting healthcare. Prereq: Admission to HHS Program or consent of instructor.

HHS 362 INTERDISCIPLINARY HEALTH ADVOCACY. (1)

The course will provide experiences as a health navigator for students in the health sciences. Students will work with patients who are seeking advice about the availability of health resources, health services and health information. Students will be trained in skills needed to become effective health navigators, will work with communities to develop and maintain a health resources data base and will serve as motivational coaches to patients to attain healthy lifestyles. Prereq: Admission to the HHS Program or consent of instructor.

#HHS 363 INTERDISCIPLINARY HEALTH ADVOCACY II. (1)

The course will allow students to apply concepts they learned in HHS 362 in various Wayfinding and Shadowing opportunities in the healthcare system. Additionally, students will become more familiar with hospital services and work with patients who are seeking advice about the availability of health resources, health services and health information. Prereq: HHS 362.

#HHS 370 ELECTRONIC HEALTH RECORDS. (2)

The Electronic Health Records course is an undergraduate level introduction to the concepts and trends in health care electronic health records in today's technology driven health care field. Several areas will be introduced that will provide baseline knowledge for EHRs. Topics include Meaningful Use, EHR Adoption, Quality of Care, Workflow, Implementation, Acute Care, Ambulatory Care, Specialty-specific EHRs, Health Information Exchange, and other related topics. It is highly recommended for students to either have experience working in a health care related field or have a health care major or minor. Some exceptions to being in a health care profession would be computer science or related majors in which the student plans to apply the profession in a health care organization or consent of instructor. (Same as CLM 370.)

HHS 395 INDEPENDENT STUDY. (1-3)

Independent study for undergraduate students with an interest in a specific problem, topic, or issue in Human Health Sciences. Prereq: Admission to HHS Program or consent of instructor.

HHS 400G NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION. (2)

This course will acquaint students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition related issues commonly observed in physically active individuals and nutritional needs to prevent injury and aid healing following injury. Prereq: Undergraduate Students: Admission to HHS undergraduate degree program OR consent of instructor, 200 level physiology or equivalent. Graduate Students: Acceptance to nutrition, kinesiology, or other health-related graduate programs.

HHS 402G MUSCLE BIOLOGY. (3)

This course examines the gross as well as microscopic structural properties and the physiological function of skeletal muscle. Students will gain in-depth knowledge about not only normal muscle function, but also about the adaptability and plasticity of skeletal muscle under different environmental circumstances. The comparative biology of structure and function of skeletal muscle will be covered; also the relationship between muscle structure and function as it relates

to human health-related issues will be examined and discussed. This course is for undergraduate as well as graduate students and will benefit those interested in health care-related fields (e.g. pre-physical therapy, pre-medicine) as well as students interested in the basic functioning of skeletal muscle. Prereq: One course of general biology (BIO 148, BIO 150 or BIO 152), a general anatomy/physiology (i.e., PGY 206) course or permission of instructor.

HHS 405 EPIDEMIOLOGY AND BIostatISTICS. (3)

This course will provide a foundation in the principles and methods of the epidemiological investigation of disease with special emphasis on the distribution and dynamic behavior of disease in a population. Etiologic factors, modes of transmission and pathogenesis will be examined. Topics to be covered include epidemics and the spread of infectious disease, epidemiological aspects of non-infectious disease; rates of morbidity and mortality, sensitivity, specificity, and predictive values' strategies used in epidemiological studies to include measures of disease effect, validity, reliability; sampling methods and computer-based biostatistical analysis that emphasize the generalized linear model and forms of SEM as appropriate for an upper division undergraduate course. Prereq: Completion of CLM 241, CLM 350, and admission to the CLM Program or consent of instructor. (Same as CLM 405.)

HHS 443 HEALTH INFORMATION MANAGEMENT. (2)

This course provides students with an opportunity to understand and address the challenges associated with health care change and improvement intended by the Recovery Act of 2009. Students will focus on clinician and clinical leader roles in the implementation of an Electronic Medical Record. The course includes material relating to Personal Health Record (PHR) models, architectures, market forces, and law. Students will understand the advantages for using the electronic medical record and mechanisms for planning successful implementation. Prereq: Admission to HHS Program or consent of instructor.

HHS 450 INTRODUCTION TO DENTISTRY. (3)

This course is an introduction to the profession of dentistry and provides a brief overview of some pre-clinical dental courses that are taught in the first two years of dental school. The student will become familiar with basic dental terminology, current issues in dentistry and the latest techniques and technology used in clinical settings. The student will have the opportunity to develop manual dexterity and learn basic clinical etiquette and safety procedures. This course serves as a foundation for students interested in pursuing a career in dentistry or for those who want to enhance their knowledge of oral health prior to entering any health field. Prereq: Admission to HHS Program or consent of instructor. Two semesters of Biology with Lab and Human Anatomy recommended, but not required.

HHS 451 INTRODUCTION TO MEDICINE. (2)

This course will provide students with an introduction to the field of medicine. Skills required to complete patient interviews and take the medical history as well as a limited number of physical examination maneuvers will be discussed. The focus will be on gaining an understanding of why a complete and accurate medical history and physical examination are key to quality medical practice. The course will cover the scope of practice and ethical codes for physicians and physician assistants. Prereq: Admission to HHS Program or consent of the instructor.

HHS 453 CULTURAL COMPETENCE IN HEALTHCARE. (3)

This course is designed to introduce the student to concepts of culture, race, ethnicity, and competence. Emphasis will be placed on identifying individual characteristics and their influence on bias. Factors related to culturally and linguistically appropriate health care will be reviewed. Prereq: Admission to HHS Program or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

HHS 454 RESEARCH IN HUMAN HEALTH SCIENCES. (3)

An introduction to basic methods for undertaking research on issues related to health, health care, and within health services organizations and systems. Students will become critical consumers of research by learning how to evaluate and apply the results of health research conducted by others. The course will also assist those who plan to conduct clinical research or program evaluation within health delivery systems. Prereq: Admission to HHS Program or consent of instructor.

HHS 455 RESEARCH EXPERIENCE IN HUMAN HEALTH SCIENCES. (1-3)

Students complete a mentored, self-directed research experience. Students work with faculty to develop an experience of mutual scientific interest. The nature of the experience and the subsequent activities and expected outcomes are defined and outlined in the research contract between the student and mentor. Prereq: Consent of instructor.

HHS 470 INTERNATIONAL EXPERIENCE IN HEALTH SCIENCES (Variable topic). (1-6)

This course provides students with opportunities to explore international issues in health care through study and international travel. Course content and organization will depend on the topic to be studied and the structure of the course. Prereq: Admission to the HHS Program or consent of instructor.

HHS 480 SEMINAR IN HUMAN HEALTH SCIENCES (Variable topic). (1-3)

Study and analysis of current and topical problems and issues regarding the roles, trends and research for health care professionals. May be repeated to a maximum of six credits. Prereq: Admission to CLM or HHS program or consent of instructor. (Same as CLM 480.)

HHS 501 PRACTICUM IN CLINICAL LEADERSHIP AND MANAGEMENT.*(1-6)**

Students will gain practical general training and experiences in the healthcare workplace with a focus on exposure/experience in clinical leadership and management. The CLM faculty in coordination with the practicum coordinator will arrange these experiences with the site employer/personnel and develop an individualized plan for the student at each site. The plan relates the workplace training and experiences to the student's general and technical course of study. Prereq: Consent of instructor; HHS 102; student must earn a grade of C or better in previous practicum in order to re-enroll in this course. (Same as CLM 501.)

HIS History**HIS 100 INTRODUCTION TO AFRICAN STUDIES.****(3)**

This course provides a basic overview of African histories, cultures and societies. (Same as AAS 100.)

HIS 104 A HISTORY OF EUROPE THROUGH THE MID-SEVENTEENTH CENTURY.**(3)**

This course is a survey of the development of European politics, society, and culture through the Age of Religious Conflict.

HIS 105 A HISTORY OF EUROPE FROM THE MID-SEVENTEENTH CENTURY TO THE PRESENT.**(3)**

This course is a survey of the development of European politics, society, and culture from the Age of Absolutism to the present. It is a continuation of HIS 104.

HIS 106 WESTERN CULTURE: SCIENCE AND TECHNOLOGY I.**(3)**

Presents the interactions of science and technology with the social and cultural development of Western civilization; the values in scientific inquiry as compared with other kinds of inquiry; the importance of science and technology in modifying social organization and human expectations. Emphasizes the period to the Industrial Revolution.

HIS 107 WESTERN CULTURE: SCIENCE AND TECHNOLOGY II.**(3)**

Presents the interactions of science and technology with the social and cultural development of Western civilization; the values in scientific inquiry as compared with other kinds of inquiry; the importance of science and technology in modifying social organization and human expectations. Emphasizes the period since the Industrial Revolution.

HIS 108 HISTORY OF THE UNITED STATES THROUGH 1876.**(3)**

This course is a survey of American history from the first British settlements c. 1585 to the end of Reconstruction in 1876 and explores the most important events, ideas, and people that created the foundations of the American nation. This course fulfills the requirements for the elementary teachers' certificate.

HIS 109 HISTORY OF THE UNITED STATES SINCE 1877.**(3)**

This course examines American History from 1877 to the present: political, economic and social – Gilded Age, Progressive Era, New Deal, Age of Affluence and Limits, Great Society and two Great Wars. You will find out how much, how little, America has lived up to its ideals; how it grew from a nation of farms and cotton mills to an industrial giant; how it became a world power (Top Nation) and what problems this created.

HIS 112 THE MAKING OF MODERN KENTUCKY.**(3)**

An examination of the political, social, economic, environmental, and cultural dynamics that have shaped modern Kentucky.

HIS 119 WAR AND SOCIETY, 1350-1914.**(3)**

"War and Society in the West, 1350-1914," is the opening course in a three-course series on the history of warfare. The course begins in the late middle ages with the impact of gunpowder, and ends with the advent of the First World War. Topics covered in the course include the impact of technology on war, the connections between culture and warfare, the growth of the state in modern Europe, the experience of soldier and civilians during war, and the rise of western military superiority. No prerequisites.

HIS 120 THE WORLD AT WAR, 1939-45.**(3)**

A global overview of the events of the Second World War, including consideration of the conflict's military, diplomatic, political, social and economic dimensions.

HIS 121 WAR AND SOCIETY, 1914-1945.**(3)**

"Total war" in the 20th century exerted a profound impact on social relations in a great many ways. This course provides you with the opportunity to think long and hard about the social impact of "total" warfare, from a transnational perspective. We will explore a number of social and cultural themes as they relate to the two World Wars, such as: the impact of total war on gender relations; military technology and ethics; the demonization of the enemy; war-time propaganda; the roots of the welfare state within the warfare state; and the postwar efforts to come to terms with the atrocities of total war.

HIS 122 WAR AND SOCIETY SINCE 1945.**(3)**

Historical studies of warfare around the world and their impact on society since 1945.

HIS 130 DRUGS AND ALCOHOL IN WESTERN CIVILIZATION, 1492 TO THE PRESENT.**(3)**

"Alcohol and Drugs in Western Civilization" is an overview of the history of drugs and alcohol, and the individual and social problems that surround their use. The course begins when new

or newly wide-spread stimulants like coffee, tea, tobacco, chocolate, sugar, and distilled spirits joined beer and wine as European consumer goods. The course then goes on to the more modern problems of increasingly potent drugs like heroin, cocaine, and cigarettes, and responses to them such as regulation, taxation, Prohibition, Alcoholics Anonymous, and the "War on Drugs." No prerequisites.

HIS 191 A HISTORY OF WORLD RELIGIONS (Subtitle required).**(3)**

A historical introduction to the development of Christianity from social, cultural, and institutional perspectives which demonstrates the evolution of the religion.

HIS 202 HISTORY OF BRITISH PEOPLE TO THE RESTORATION.**(3)**

From the Roman period to the Stuart period. A general survey of the various epochs and phases of the English people at home and abroad.

HIS 203 HISTORY OF THE BRITISH PEOPLE SINCE THE RESTORATION.**(3)**

From the Stuart period to the present. A continuation of HIS 202.

HIS 206 HISTORY OF COLONIAL LATIN AMERICA, 1492 TO 1810.**(3)**

A broad survey of the social, economic, political and cultural development of Latin America from the fifteenth century to 1810. Includes analysis of such topics as pre-Columbian societies on the eve of conquest, the Iberian kingdoms in the Age of Expansion, the conquest and colonization of the indigenous cultures of the New World, the establishment of Spanish and Portuguese institutions, the relations between the Church and the State, the encomienda and the hacienda, slavery and the impact of the Bourbon Reforms on America.

HIS 207 HISTORY OF MODERN LATIN AMERICA, 1810 TO PRESENT.**(3)**

A broad survey of the Latin American nations focusing on their social, economic, political and cultural development. Traces the history of the Independence movements, nation building, the struggle for modernization, dependency and the phenomenon of revolution in the twentieth century.

HIS 208 HISTORY OF THE ATLANTIC WORLD.**(3)**

Examines the connections between Europe, Africa, and the Americas from 1492 to the present day, focusing especially on the legacies of slavery, race, and imperialism in Central America and the Caribbean.

HIS 229 THE ANCIENT NEAR EAST AND GREECE TO THE DEATH OF ALEXANDER THE GREAT.**(3)**

Covers the birth of civilization in Egypt and Mesopotamia, and the history of the ancient Near East and Greece to the conquest of Greece by Philip of Macedon. (Same as CLA 229.)

HIS 230 THE HELLENISTIC WORLD AND ROME TO THE DEATH OF CONSTANTINE.**(3)**

Covers the conquests of Alexander the Great, and the main features of the Hellenistic world, the Roman Republic, and the Roman Empire to the death of Constantine. (Same as CLA 230.)

HIS 240 HISTORY OF KENTUCKY.**(3)**

A general survey of the chief periods of Kentucky's growth and development from 1750 to the present.

HIS 253 HISTORY OF PRE-COLONIAL AFRICA.**(3)**

This course examines the early history of Africa, from human evolution to colonization by European powers in the late 19th century. Topics include: the development of states from kinship based forms of political organization, the political, cultural, and social transformations that accompanied African conversion to Islam, a close examination of oral epic poetry as a window into medieval empire-building in the Sahel, an extended conversation about the role of Africa in the transatlantic slave trade, and a discussion of the dilemmas faced by African rulers in the era of partition on conquest by European powers. Successful students will gain a thorough introduction to the major developments in the early history of Africa, which will serve as a solid foundation for further coursework in African history and other African studies courses. (Same as AAS 253.)

HIS 254 HISTORY OF COLONIAL AND POSTCOLONIAL AFRICA.**(3)**

This course is a survey of the history of Africa from the onset of colonial rule in the 1880s to the present. Its main objective is to introduce students to some of the major socio-political and economic developments that made Africa what it is today. The course will explore themes such as the European conquest of Africa and Africans' responses, African nationalism and struggles for independence, as well as post-colonial African politics and economic (under)development. (Same as AAS 254.)

HIS 260 AFRICAN AMERICAN HISTORY TO 1865.**(3)**

A study of the Black experience in America through the Civil War. An examination of the African heritage, slavery, and the growth of Black institutions. (Same as AAS 260.)

HIS 261 AFRICAN AMERICAN HISTORY 1865-PRESENT.**(3)**

This course traces the Black experience from Reconstruction to the Civil Rights Movement of the 1960's. The rise of segregation and the ghetto and aspects of race relations are examined. (Same as AAS 261.)

Course Descriptions

- HIS 265 HISTORY OF WOMEN IN AMERICA.** (3)
History of American women, with particular emphasis on the mid-19th through the mid-20th centuries. Major themes include the family, work, social ideas about women, and feminism. Prereq: HIS 109 or consent of instructor.
- HIS 295 EAST ASIA TO 1800.** (3)
A survey of Chinese, Japanese and Korean history from earliest times to 1800. Emphasis on political, economic, social and intellectual developments.
- HIS 296 EAST ASIA SINCE 1600.** (3)
What we think of today as East Asia has a long history of both shared culture and separate experiences. In premodern East Asia, cultural contacts led to commonalities including systems of writing and ways of thought such as Confucianism, Daoism, and Buddhism. In modern times and in becoming nations, China, Japan, and Korea each sought their own identity. The reforms and revolutions that Asia has experienced since 1600 can be viewed both in the context of the region and through the experience of each nation. This is an introductory course in the cultural, social, and political history of East Asia.
- HIS 301 HISTORY WORKSHOP: INTRODUCTION TO THE STUDY OF HISTORY.** (3)
An introduction to the skills of historical research writing. Preferably to be taken during the sophomore year. Required of all history majors. Prereq: Sophomore standing.
- #HIS 302 CAREERS IN HISTORY.** (3)
You dread the questions from your parents and others: A history major? What are you going to do with that? This course enables students to articulate a response, going beyond law and teaching to consider all the possibilities a history degree offers. We will strategize about how to best position yourself to make your dreams reality, emphasizing the importance of networking, study abroad, internships, and other experiences outside the classroom. By the end of the course, students will be prepared to sell their skills to future employers in a variety of settings. Prereq: Must be a declared History major or minor or have permission of instructor. Cannot receive credit for both HIS 302 and A&S 350.
- HIS 310 HISTORY THROUGH FICTION AND NON-FICTION.** (3)
Texts contrast fictional (novels) and non-fictional accounts of events in U.S. History dealing with major themes and institutions since the American Revolution.
- HIS 320 ADVANCED STUDIES IN AMERICAN MILITARY HISTORY.** (3)
This course will furnish upper level UK ROTC Cadets, and qualified History majors or minors with the methodological tools and materials needed to gain a more detailed understanding of American Military History and to put together a major research paper. AMS/HIS 320 will emphasize basic research skills: understanding historiographical debates within a military framework, developing effective note taking, outlining techniques, picking a feasible research topic, finding useful primary sources and drawing inferences from them, examining American military campaigns and leaders in order to complete a battle analysis, and short research assignments. Prereq: Consent of instructor (Same as AMS 320.)
- HIS 323 THE HOLOCAUST.** (3)
This course will attempt to help students understand the events that resulted in the virtual destruction of Europe's Jews during the Second World War. Topics will include the history of anti-semitism, the ways in which Nazi policy against the Jews was implemented, Jewish resistance, response of non-Jews and other governments to the Holocaust.
- HIS 330 A HISTORY OF WESTERN RELIGIOUS THOUGHT (I).** (3)
A history of Judeo-Christian religious thought from the rise of Judaism through the Protestant Reformation.
- HIS 350 TOPICS IN U.S. HISTORY BEFORE 1789.** (3)
Readings, research, and discussions in seminar format to illuminate problems of historical and contemporary significance, in areas of special faculty competence. May be repeated once. Lecture, two hours; conference, one hour.
- HIS 351 TOPICS IN U.S. HISTORY SINCE 1789.** (3)
Same as HIS 350.
- HIS 352 TOPICS IN EUROPEAN HISTORY BEFORE 1789.** (3)
Same as HIS 350.
- HIS 353 TOPICS IN EUROPEAN HISTORY SINCE 1789.** (3)
Same as HIS 350.
- HIS 355 TOPICS IN NON-WESTERN HISTORY SINCE 1789.** (3)
Same as HIS 350.
- HIS 357 JAPAN AT WAR, 1850 TO THE PRESENT.** (3)
This course covers military conflicts in modern Japan with a particular focus on the Asia-Pacific War (1931-45) – Japan's imperialist quest in China and Southeast Asia that ultimately expanded into the Pacific Theater of World War II. We will begin by a brief examination of Japan's earlier wars in the modern period, including the Meiji Restoration (1867-8), the First Sino-Japanese War (1894-5), and the Russo-Japanese War (1904-5) in order to set Japan's modern wars in context; of particular focus here will be the emergence and the development of Japan's Emperor-centered, militaristic nationalism, which influenced every aspect of Japanese thought during the Asia-Pacific War. Themes covered will include both politics and culture of a nation at war. We will look not only at the political and military strategists and foreign relations, but also at the life on the battlefield and the home front. The cult of death, which centered around the belief that those who sacrifice their lives for the emperor for the sake of the nation will be honored as a god at Yasukuni Shrine, and which resulted in such fanatical actions as kamikaze attacks and mass suicides, will be investigated in detail. The last sessions of the class will cover the legacies of the Asia-Pacific War in the decades following Japan's defeat. The course requires no prior knowledge of the history of modern Japan.
- HIS 360 RACE AND SPORTS IN AMERICA.** (3)
This reading seminar examines the history of race and sport in America. (Same as AAS 360.)
- HIS 370 EARLY MIDDLE AGES.** (3)
A survey of European history from the fourth through the mid-10th centuries.
- HIS 371 LATER MIDDLE AGES.** (3)
A survey of European history from the mid-10th through the 15th centuries.
- HIS 385 HISTORY OF RUSSIA TO 1825.** (3)
A broad survey of the life of the Russian people and the development of the state from the ninth century through the reign of Alexander I. Although emphasis will be placed on political, economic, and social trends, cultural and intellectual achievements will also be discussed.
- HIS 386 HISTORY OF RUSSIA SINCE 1825.** (3)
A continuation of HIS 285, this course covers the last century of the Tsarist regime (1825-1917) and the evolution of the Soviet system that followed. Emphasis will be placed on the problems that led to the collapse of the monarchy, on the revolutionary movement, and on the Communist state and society under Lenin and Stalin.
- HIS 390 BACKGROUNDS TO AND EARLY HISTORY OF CHRISTIANITY TO 150 CE.** (3)
This course examines the origins of Christianity from its Jewish, Greek, and Roman influences and charts its development through the first one hundred years of its existence. Special emphases are placed on understanding the diversity of Judaic religious identity as well as the influence of Greek philosophy and religion. The world of Jesus, Paul, and the evolution of this new view of one's relationship to God are analyzed historically through a close examination of the texts of this time in the nexus of Jewish, Greek, and Roman cultural interaction. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as CLA 390.)
- HIS 391 CHRISTIANS IN THE ROMAN EMPIRE.** (3)
This course discusses the changing status of Christians in the Roman Empire between 100 and 500 CE. An underlying theme of this course is: What is it to be a Christian? Students will read and discuss both primary and secondary sources and analyze how the answer to the above-mentioned question changed during the Roman Empire. Topics to be discussed include: heresies, persecution, definitions of doctrines and practices, the relationship to the Roman Empire, and more. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as CLA 391.)
- HIS 395 INDEPENDENT WORK.** (1-3)
Under special conditions selected students may investigate problems with weekly reports to the instructor. May be repeated to a maximum of six credits. Prereq: Major and a standing of 3.0 in the department.
- HIS 404 U.S. WOMEN'S HISTORY TO 1900.** (3)
U.S. women's lives and experiences across cultures and regions from pre-settlement to 1900. Addresses current debates and scholarship in the field.
- HIS 405 U.S. WOMEN'S HISTORY SINCE 1900.** (3)
U.S. women's lives and experiences across cultures and regions from 1900 to the present. Addresses current debates and scholarship in the field.
- HIS 460 COLONIAL AMERICA TO 1763.** (3)
This course explores a number of important themes in early America: the comparative view of Western European colonization efforts; the dynamics of a multiracial environment; the character of family, community and religious life; regional distinctiveness in social/economic life; and the maturation of the colonies in the 18th century.
- HIS 461 THE AMERICAN REVOLUTION, 1763-1789.** (3)
A study of the disagreement between Great Britain and the 13 colonies, the decision for independence, and the progress of revolutionary change through the ratification of the Federal Constitution.
- HIS 462 THE NEW REPUBLIC, 1789-1820.** (3)
An intensive study of the launching of the federal government, the rise of America's first parties, and the conflict over the completion of the revolutionary experiment.
- HIS 463 EXPANSION AND CONFLICT, 1820-1860.** (3)
A social and political study of the United States from 1820 to 1860, with special attention to the growth of Jacksonian democracy, territorial expansion, and the rise of the sectional controversy over slavery.
- HIS 464 CIVIL WAR AND RECONSTRUCTION, 1860 TO 1877.** (3)
A study of events immediately preceding the outbreak of conflict, of the military campaigns, and of the social, economic, and political developments during the periods of war and reconstruction.

HIS 465 EMERGENCE OF MODERN AMERICA, 1877-1917. (3)

A study of the transformation of the U.S. from an agrarian society into an industrial nation covering the years from the Gilded Age to the American entry into World War I. This course emphasizes the growth of corporate capitalism, the emergence of modern political institutions, and the development of modern American foreign policy. It also explores how various Americans- workers, farmers, immigrants, women- responded to and were affected by industrialization.

HIS 466 MODERN AMERICAN HISTORY FROM WW I TO PEARL HARBOR, 1917-1941. (3)

A study of America in World War I and the interwar era, emphasizing political, economic, diplomatic, and social developments. The course examines the impact of the first world war and the great depression on America and the nature of the New Era and the New Deal.

HIS 467 MODERN AMERICA: 1941-1974. (3)

An intensive study of the United States from 1941 to 1974, emphasizing America's emergence as a global power and political, economic, and social developments.

HIS 468 CONTEMPORARY AMERICA: 1974 TO THE PRESENT. (3)

Examines the history of the United States since 1974 with particular emphasis on political, social, and economic developments.

HIS 499 SENIOR SEMINAR FOR HISTORY MAJORS (Subtitle required). (3)

All History majors must complete a senior seminar with a grade of C or better. Topics will vary, but a major is required. Prereq: HIS 301 or permission of instructor. Graduation Writing Requirement Course – credit is awarded to students meeting the GWR prerequisites. This course is a Graduation Composition and Communication Requirement (GCCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

HIS 500 PRECLASSICAL AND CLASSICAL GREECE. (3)

A history of Greece from earliest times to the death of Alexander the Great.

HIS 501 FOURTH-CENTURY GREECE AND THE HELLENISTIC WORLD. (3)

A history of Greece and the Greek world from the death of Alexander to the Roman conquest of Egypt.

HIS 502 A HISTORY OF THE ROMAN REPUBLIC. (3)

A history of Rome from earliest times to the fall of the Republic. Emphasis will be placed upon the territorial expansion of Rome and the effects of this expansion on republican institutions.

HIS 503 A HISTORY OF THE ROMAN EMPIRE. (3)

A study of the foundation of the Roman Empire, the development of Imperial institutions, social and intellectual developments of the Graeco-Roman world. The decline of Rome and the barbarian invasions of the fourth century.

HIS 504 GREEK AND ROMAN MEDICINE. (3)

An historical introduction to the development of Greek and Roman medicine, from the pre-Socratic philosophers through Oribasius and early medieval influences. Prereq: A course in ancient history, or classics, or ancient philosophy, or consent of instructor.

HIS 506 HISTORY OF SEXUALITY IN THE U.S. (3)

An overview of the history of beliefs about sexuality, sexual cultures and norms, and sexuality's relationship to power in American society from the colonial period to the present.

HIS 509 ROMAN LAW. (3)

An historical introduction to the development of Roman law, from the Twelve Tables through the Codex Justinianus. (Same as CLA 509.)

HIS 510 MEDIEVAL LAW. (3)

This course examines the development of the various legal systems to which people in western Europe had recourse between the fourth century and the fourteenth century. Topics to be covered include the shift from oral to written law, the problems small communities faced in dealing with transgressors, the competition between various authorities for jurisdiction, the ways in which Judaeo-Christian values and beliefs affected the orientation of medieval law, the use of procedures such as ordeals and inquisitions, the evolution of ideas about natural rights, and how law reflects the massive social and political reorganization of the west that occurred after the Roman Empire.

HIS 511 BARBARIANS. (3)

This course examines the peoples known to historians of Western Europe as the "Barbarians" who took up residence on the continent of Europe and whose polities replaced the central government of imperial Rome in the fifth and subsequent centuries, as well as those of the northern realms of the British Isles and Scandinavia. Topics to be studied include the ethnic and cultural identities of the Barbarians, their role in redefining the social and political institutions of Europe, the reasons for their political and military successes, and their hold on the imaginations of both sympathetic and unsympathetic historians.

HIS 512 CAROLINGIAN EMPIRE. (3)

This course examines the reconstitution of much of the former Roman empire in the western provinces under the hegemony of the Carolingian rulers of the eighth and ninth centuries. Among the topics to be studied are the dynamic interactions between powerful ecclesiastical and secular leaders that produced a distinctive vision of a Christian empire, the relations between the Carolingian, Byzantine, and Islamic polities, the means of building royal legislative and judicial power in an environment of fragmented authority, the role of literary and artistic activity in

creating a distinctive "Carolingian Civilization", the military activities that consolidated the empire, and the fragility of the imperial enterprise.

HIS 513 MEDIEVAL INSTITUTIONS SINCE THE MID-10TH CENTURY. (3)

A survey of medieval political, social, economic and ecclesiastical institutions from the beginning of the High Middle Ages to the middle of the 15th century.

HIS 514 SPAIN: FROM RECONQUEST TO EMPIRE, 1200-1700. (3)

This course focuses on the expansion of the Christian kingdoms (Portugal, Castile, and Aragon) in the Iberian peninsula and across the Atlantic. Special attention will be paid to the interaction of Judaism, Christianity, and Islam: cultural transformations, including developments in music, literature, and the arts; political developments in Iberia and the emergence of Spain and Portugal; and the spread of Iberia's trans-Atlantic empires.

HIS 519 THE ERA OF THE RENAISSANCE. (3)

An historical description and analysis of the development of political, economic, social, religious, intellectual and cultural institutions of Europe from Petrarch to Erasmus.

HIS 520 THE ERA OF THE REFORMATION. (3)

An historical description and analysis of the development of the religious, intellectual, cultural, political, economic and social institutions of Europe from Luther to the Treaty of Westphalia.

HIS 521 EUROPEAN SOCIAL HISTORY, 1400-1800. (3)

Survey of European social history in the early modern period, including analysis of demographic patterns, family and social structures, rural and urban economic patterns, and cultural and religious attitudes.

HIS 522 EUROPE AND THE WORLD IN THE AGE OF REVOLUTION (1760-1815). (3)

A study of the political, social, economic and cultural changes that transformed Europe during the age of the French Revolution and Napoleon, with special emphasis on the relations between Europe and the non-European world during this period.

HIS 525 MODERN EUROPE: 1890-1939. (3)

This course examines European history from 1890-1939. It focuses heavily on the Great War and its aftermath through an analysis of the political cultures of the era. Prereq: HIS 105 or consent of instructor.

HIS 526 EUROPE SINCE 1939. (3)

This course examines the major cultural, social, and political developments that have shaped Europe, European history, and Europe's relationships with the world since the outbreak of World War II. Prereq: HIS 105 or consent of instructor.

HIS 529 WOMEN IN MODERN EUROPE. (3)

This course examines the historical, changing lives of women in Europe from the late eighteenth century to the present. It explores the historical contributions of both ordinary and famous women, as well as their participation in, and contributions to, major political, social, and cultural movements. The course will analyze changes and continues through the lens of gender.

HIS 534 RUSSIA IN THE 19TH CENTURY. (3)

This course examines the social, political, and cultural history of 19th Century Russia in depth, focusing on the social conditions of serfdom and its abolition, the causes of social tension in late Imperial Russia, and the long term causes of the Russian Revolution of 1917.

HIS 535 RUSSIA IN THE 20TH CENTURY. (3)

This course examines the social, political and cultural history of 20th century Russia in depth, focusing on the social conditions that caused the Revolution, the formation of the Soviet Union and its decline.

HIS 536 INTELLECTUAL AND CULTURAL HISTORY OF RUSSIA TO 1800. (3)

A study of Russian culture to 1800 emphasizing Slavic paganism, Orthodox Christian culture in Kiev, Novgorod, and Muscovy, and the impact of the West in the Seventeenth and Eighteenth Centuries.

HIS 537 INTELLECTUAL AND CULTURAL HISTORY OF RUSSIA FROM 1800 TO THE PRESENT. (3)

A study of Russian culture from 1800 to the present emphasizing the conservative as well as the revolutionary tradition, the Russian avant-garde, Stalinist culture, and the Dissident Movement.

HIS 540 HISTORY OF MODERN FRANCE TO 1815. (3)

The course of French history to 1815, including the development of French political, administrative, legal, social, economic and cultural achievements and institutions and their contribution to the modern world.

HIS 541 HISTORY OF MODERN FRANCE SINCE 1815. (3)

Continuation of HIS 540.

HIS 542 GERMAN HISTORY, 1789-1918. (3)

This course examines the political, social, and cultural history of Germany during the century when it arose from utter defeat by Napoleon to become the strongest economic and military power in Europe, then concludes with Germany's fate in World War I.

Course Descriptions

- HIS 543 GERMAN HISTORY SINCE 1918. (3)**
This course examines the history of Germany from the end of World War I until the present, including the Weimar Republic, the Third Reich, the occupation regimes after World War II, East and West Germany from 1949 to 1990, and the reunified Germany since 1990. The main focus of coverage will be on political and social history, with lesser emphasis on cultural, diplomatic, and military history.
- HIS 546 THE BYZANTINE EMPIRE. (3)**
A study of Byzantine history from the time of Constantine the Great to the capture of Constantinople by the Turks in 1453. Prereq: HIS 104 or 247.
- HIS 549 HISTORY OF THE MIDDLE EAST: 1952 TO THE PRESENT. (3)**
A continuation of HIS 548. Emphasis is on the politics of Middle Eastern nationalism, Pan-Arabism and its demise, the Arab-Israeli conflict, the politics of oil and nuclear weapons, the Islamic revolution in Iran, and the development of the Islamic movement since 1967.
- HIS 550 STUDIES IN MID-EAST HISTORY AND POLITICS: (Subtitle required). (3)**
Selected topics on the history of the Middle East and its politics. The specific topics for a given semester will be listed in the class schedule book and the department's website.
- HIS 552 TUDOR-STUART BRITAIN, 1485-1714. (3)**
An analysis of political, religious, cultural, and economic changes in Britain during the reign of the Tudor and Stuart kings and queens, a period when Britain became increasingly prominent in world affairs.
- HIS 553 EIGHTEENTH CENTURY BRITAIN. (3)**
An analysis of English society and politics in an important transition period when the country was transformed by the Industrial Revolution and challenged by the French Revolution.
- HIS 554 BRITISH HISTORY 1815-1901. (3)**
A detailed study of Britain's political, social, diplomatic and industrial development in the 19th century.
- HIS 555 BRITISH HISTORY SINCE 1901. (3)**
A detailed study of Britain in the 20th century with special consideration of Britain in World War I and World War II, and her position in the contemporary world.
- HIS 556 THE BRITISH EMPIRE, 1322-1879. (3)**
This course covers the rise, fall, and rise of the British empire from its extension into Scotland and Ireland till the beginning of the age of "New Imperialism," explaining the means by which Britain came to dominate one-third of the globe, and its impact on the many cultures, economics, and geopolitical entities of the third world. It will further discuss how those cultures transformed Britain itself. Prereq: Prior experience in HIS 105 strongly recommended.
- HIS 557 THE BRITISH EMPIRE AND COMMONWEALTH, 1880-2000. (3)**
This course will trace the imperial theme, and the gradual decline and decomposition of Britain's empire from Victoria's day to the present; it will examine decolonization and the blending and clash of cultures, the effect of technology and western ideas on the subject peoples, and their impact on western civilization. Prereq: Prior experience in HIS 105 strongly recommended.
- HIS 561 CULTURE, IDEAS, AND SOCIETY IN LATIN AMERICA. (3)**
This course explores the interplay of culture, ideas, and society in the history of Latin America from Independence (1825) to the present. It takes an interdisciplinary approach and is attentive to issues of class, gender and sexuality, ethnicity and race, power, domination, and resistance. Major themes to be developed in the course are history of ideas; popular and elite cultures; material and visual culture; work, leisure, and consumption; and the politics of representation. Prereq: HIS 207 or LAS 201 are suggested.
- HIS 562 MODERN MEXICO. (3)**
Following a brief survey of Mexican political history from Independence to the present, this course will examine topically major historical themes, such as landholding and agrarian problems, church and state, and assessment of the 1910 Revolution.
- HIS 563 THE HISTORY OF WOMEN IN LATIN AMERICA. (3)**
This course will survey the history of women in Latin America from pre-Columbian period to the present. The emphasis will be mainly on the late nineteenth and twentieth centuries in order to understand the situation of women in Latin America today.
- HIS 564 HISTORY OF BRAZIL. (3)**
Study of Brazilian history from 1500 to the present, stressing the multiethnic dynamics of colonial society, the political transformations of independence, and the contemporary legacies of race, slavery, abolition, and gender.
- HIS 572 AMERICAN LEGAL HISTORY. (3)**
A history of law in the United States, emphasizing interrelationship of law and society. Particular attention given to law and economic growth, the criminal justice system, legal reform, the bar, and minorities and the law.
- HIS 573 AMERICAN CONSTITUTIONAL HISTORY. (3)**
A study of constitutional development in the United States from the colonial period to current times, with emphasis on the Supreme Court.
- HIS 574 THE DIPLOMACY AND FOREIGN POLICY OF THE UNITED STATES TO 1919. (3)**
A survey designed to acquaint the student with the principles of American foreign policy and its historical evolution. Prereq: HIS 108 or equivalent.
- HIS 575 THE DIPLOMACY AND FOREIGN POLICY OF THE UNITED STATES SINCE 1919. (3)**
A continuation of HIS 574. Foreign policy after the United States became a world power. Prereq: HIS 109 or equivalent.
- HIS 576 FRONTIER AMERICA, 1400-1869. (3)**
A study of the ways in which America's people shaped and were transformed by the frontier; how they wrestled with the problems of nationhood, democracy, sacrifice, and innovation; and how the idealism and promise were fulfilled and betrayed, from the first settlers to the driving of the Golden Spike.
- HIS 577 FRONTIER AMERICA, 1869-PRESENT. (3)**
A survey of the many Westerners, women as well as men, Native Americans, Chinese, and Hispanics as well as whites, sodbusters as well as six-shooters, and of the many Wests, wild and not-so-wild, from the prairie homesteaders to the Sagebrush Rebellion; and how they made, inherited, and were imprisoned by the frontier heritage.
- HIS 578 HISTORY OF THE OLD SOUTH. (3)**
A study of the colonial beginnings and expansion of southern life, economics, and society. The growth of slavery, staple agriculture, and sectional politics will constitute the major interest. Prereq: HIS 108.
- HIS 579 HISTORY OF THE NEW SOUTH. (3)**
The evolution of southern life and society, agrarian politics, relationships with other sections, industrial growth, and new leadership.
- HIS 580 HISTORY OF APPALACHIA. (3)**
A survey of the social, economic, and cultural history of Appalachia from the colonial period to the present with emphasis on the interaction of this social state region with the broader forces of social change at work in modern America. Prereq: HIS 108, 109 or consent of instructor.
- HIS 584 HEALTH AND DISEASE IN THE U.S. (3)**
Examines the emergence of modern medicine and the allied health professions, from colonial times to the present. Emphasis will be placed on the social, institutional, and scientific contexts of medical thought, education, and practice. It also explores how social and professional thought and action shape the meaning of health and disease.
- HIS 587 THE CIVIL RIGHTS MOVEMENT IN THE U.S. SINCE 1930. (3)**
This course will focus on the struggle for African American equality in the U.S. during the mid twentieth century. It will examine key civil rights issues, events, strategies, leaders and organizations on both the local and national levels. Using historical documents and documentary film presentations this course will discuss the status of race relations in America over the past fifty years. (Same as AAS 587.)
- HIS 593 EAST ASIAN HISTORY SINCE WORLD WAR II. (3)**
A study of the revolutionary political, economic and social changes occurring in China, Japan, and Korea in the aftermath of World War II. Important political and institutional developments and their relations to post-war trends will be emphasized.
- HIS 594 USES OF THE PAST IN MODERN CHINA. (3)**
The twentieth century has brought great change to the cultural landscape of China. This change is marked by a paradox: New China's claim to political legitimacy has been based on both revolution and historical continuity. How is the past adapted for the present? This course will examine this dilemma through cultural relics: architecture, art, and artifact. Considering changes to the Chinese city as well as museum history, we will study how cultural relics have been understood in modern China. Prereq: Any course in Chinese history or consent of instructor.
- HIS 595 STUDIES IN HISTORY. (3)**
Professors will offer lecture and discussion courses in areas in which they have special teaching interest. May be repeated to a maximum of six credits. Prereq: To be denoted by the instructor.
- HIS 597 WESTERNERS IN EAST ASIA, 1839 TO THE PRESENT. (3)**
The history of interactions between the peoples of East Asia and those of Europe and North America in the nineteenth and twentieth centuries. The actions and goals of merchants, diplomats, missionaries, journalists, and soldiers will be examined, and such concepts as colonialism, imperialism, and cultural change will be discussed.
- HIS 598 CHINA IN REVOLUTION, 1895-1976. (3)**
After a brief survey of modern Chinese history, this course explores the ideas which inspired the people who organized China's Nationalist and Communist parties and examines the social conditions which influenced the outcome of the Chinese civil war. The course also covers the attempts of some Chinese Communists to "continue the Revolution" after 1949.
- HIS 606 HISTORICAL CRITICISM. (3)**
Required of every entering graduate student in history. For history graduate students only.
- HIS 613 READINGS IN EARLY MEDIEVAL HISTORY. (3)**
The problems, major sources and secondary literature in the period from the beginning of the fifth century to the end of the 10th century will be covered. Primary emphasis will be given to the Latin West. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another.

- HIS 615 MANUSCRIPT CULTURES.** (3)
This course examines how the vehicle of the manuscript and the circumstances of manuscript production shaped the creation, transmission, and reading of texts before the fifteenth century. Among the topics to be studied are orality and literacy, the transcription of sacred texts in Christianity, Judaism, and Islam, the political, economic, and social impacts of manuscript production and circulation, the impact of institutions (such as universities) on reading practices, contexts for the suppression, control, and alteration of texts, and the radical differences between print and manuscript cultures. (Same as CLA 615.)
- HIS 616 PALEOGRAPHY.** (3)
This course provides training in the skills needed to read the handwritten materials that constitute evidence for historical investigation of the production and circulation of information outside the medium of print. While the specific scripts to be studied will vary from semester to semester, depending upon whether the course is focused upon Latin paleography, Greek paleography, or vernacular paleographies, students will learn to read and transcribe manuscripts, to expand abbreviations appropriately, to recognize the chronological and geographical extent of particular scripts, to develop strategies for reading difficult scripts, to find the specialized reference works to assist them in studying handwritten materials, and to understand the historical arguments that have been constructed on the basis of analysis of scripts and the "archaeology of the book." The course also provides training in basic codicology and editorial techniques for establishing a text and recording variant readings. Prereq: Some familiarity with the language of the materials. (Same as CLA 616.)
- HIS 621 READINGS IN EARLY MODERN EUROPE, 1450-1648.** (3)
This course is designed to give graduate students a grounding in the historiography of Europe from 1450 to 1648. Students should expect to familiarize themselves in the recent trends in political, social, cultural, religious, economic, and intellectual history of the period.
- HIS 622 READINGS IN EARLY MODERN EUROPE, 1648-1815.** (3)
This course is designed to give graduate students a grounding in the history of Europe from the conclusion of the Thirty Years War to the Era of The French Revolution, with a focus on political, cultural, and intellectual history.
- HIS 623 READINGS IN 19TH CENTURY EUROPEAN HISTORY.** (3)
Intensive survey of the literature in the political, social, and/or cultural history of nineteenth-century Europe. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another. Prereq: Graduate status.
- HIS 624 READINGS IN EUROPEAN HISTORY OF THE TWENTIETH CENTURY.** (3)
A critical survey of problems and literature in the political, social, and cultural history of Twentieth Century Europe. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another. Prereq: An undergraduate course in European history.
- HIS 625 BRITAIN, 1688-1815.** (3)
A general graduate-level introduction to the political and social history of Britain from the Glorious Revolution through the French Revolution. Focuses on: Whig justification for revolution, "Rage of Party," Walpolean oligarchy and its "country" critics, agricultural revolution, urbanization, growth of the "middling sort," plebeian culture and the limits of hegemony, growth of national identity and the "fiscal-military" state, social context of the criminal law, Wilkite and American crises. Prereq: Permission of instructor.
- HIS 626 BRITAIN, 1792-1914.** (3)
This course will provide graduate students with a detailed overview of the history of Britain in the "long" nineteenth century. It will focus on such issues as the impact of the Industrial Revolution, the formation of a recognizably modern class society, the growth of working-class political consciousness, and the politics of class and gender. Prereq: Permission of instructor.
- HIS 627 THE BRITISH EMPIRE, 1763-1914.** (3)
This course provides graduate students with a detailed overview of several broad themes pertaining to the history of the British empire, 1763-1914: the first imperial crisis, slavery and the slave trade, race as a category of imperial knowledge/power, women's emancipation and the problem of empire, the post-colonial challenge to the "imperial mindset," and the intensification of imperial awareness within Britain itself, c. 1880-1914. Prereq: Permission of the instructor.
- HIS 628 COLLOQUIUM ON MODERN EUROPEAN HISTORY.** (3)
This course will provide an overview of the major themes and events that have shaped Modern European History from the late 18th century to the present. We will analyze the various ways in which particular historical topics have been interpreted (and reinterpreted) over time, as well as historian's different methodologies, underlying assumptions, and use of evidence. The major goal of the course, however, is to introduce graduate students to significant works and historical debates in Modern European History.
- HIS 637 READINGS IN COLONIAL LATIN AMERICAN HISTORY.** (3)
Intensive survey of major themes and debates in colonial Latin American history from 1492 to the early nineteenth century. Includes political, economic, social, and cultural topics.
- HIS 638 READINGS IN LATIN AMERICAN HISTORY.** (3)
Intensive survey of the major themes and debates in Latin American History from 1850 to the present. Includes political, economic, social and cultural topics. Prereq: Consent of instructor.
- HIS 640 READINGS IN AMERICAN HISTORY TO 1877.** (3)
Course will examine major scholarly debates in American history to 1877.
- HIS 641 READINGS IN AMERICAN HISTORY SINCE 1877.** (3)
Course will examine major scholarly debates in American history since 1877.
- HIS 650 READINGS IN SPECIAL TOPICS IN HISTORY.** (3)
Supervised reading at the graduate level of a selected bibliography of the essential literature of various special topics. May be repeated to a maximum of nine credits with different topics. Prereq: Consent of instructor.
- HIS 651 READINGS IN U.S. FOREIGN RELATIONS SINCE 1900.** (3)
This course will involve intensive reading in the history of United States foreign relations in the twentieth century. It will examine various theoretical approaches to the subject. It will analyze the sources and consequences of America's global expansion as well as the historiography of important events such as World War I and II, Korea and Vietnam.
- HIS 653 READINGS IN U.S. WOMEN'S HISTORY.** (3)
This course will introduce students to the main currents in U.S. women's history in four broad chronological units: Traditional America, 1600-1820; Industrializing America-Part I, 1820-1880; Industrializing America-Part II, 1880-1920; and Modern America, 1920-present. Within this framework, the course will explore such topics as: work, communities and public life; gender, families and sexuality; race and African-American experiences; and religion, reform and political culture. The course will also familiarize students with the ongoing theoretical debates within women's history.
- HIS 654 READINGS IN MODERN AFRICAN-AMERICAN HISTORY.** (3)
Introduces graduate students to the historical literature on 20th century African-American history and major historiographical issues. (Same as AAS 654.)
- HIS 655 READINGS IN ANTEBELLUM SOUTHERN HISTORY.** (3)
Introduces graduate students to the historical literature on the antebellum South and the major historiographical issues.
- HIS 656 READINGS IN NEW SOUTH HISTORY.** (3)
Introduces graduate students to the historical literature on the New South and the major historiographical issues.
- HIS 657 RACE RELATIONS IN THE UNITED STATES.** (3)
This seminar focuses on the African American experience in the United States from Reconstruction to the present. Using primary documents and secondary readings, this course will examine the construction of race relations and the individuals, organizations, events, and issues significant to the shaping of the black experience. (Same as AAS 657.)
- HIS 673 READINGS IN AMERICAN HISTORY: THE GILDED AGE AND THE PROGRESSIVE ERA.** (3)
An intensive survey of the major historiographical issues and the secondary literature of the Gilded Age and the Progressive Era.
- HIS 695 INDEPENDENT WORK.** (1-3)
Under special conditions selected students may investigate problems, with weekly reports to instructor. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.
- HIS 700 SPECIAL PROBLEMS IN HISTORY.** (3)
Professors will conduct research seminars in topics or problems in which they have special research interests. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.
- HIS 701 RESEARCH SEMINAR IN AMERICAN HISTORY.** (3)
Graduate research seminar in American history. May be repeated to a maximum of 12 credits.
- HIS 705 COLLOQUIUM IN PRE-MODERN EUROPEAN HISTORY.** (3)
Graduate research seminar for students in pre-modern European history. Students will write a research paper of 20-30 pages using primary sources in the original languages. Class time will primarily involve discussion of works in progress, including works by the students and pre-modern European faculty members, as well as discussion of the mechanics of researching and writing history.
- HIS 706 SEMINAR IN MEDIEVAL HISTORY.** (3)
Directed research on a common problem. May be repeated to a maximum of 12 credits. Prereq: A reading knowledge of Latin or of one European language or consent of instructor.
- HIS 710 SEMINAR IN AMERICAN HISTORY, 1607-1815.** (3)
May be repeated to a maximum of 12 credits.
- HIS 711 SEMINAR IN AMERICAN HISTORY, 1815-1865.** (3)
May be repeated to a total of 12 credits.
- HIS 722 SEMINAR IN MODERN EUROPEAN HISTORY, 1870 TO THE PRESENT.** (3)
May be repeated to a maximum of 12 credits.
- HIS 730 SEMINAR IN MODERN BRITISH HISTORY.** (3)
May be repeated to a total of 12 credits.
- HIS 748 MASTER'S THESIS RESEARCH.** (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

Course Descriptions

- HIS 749 DISSERTATION RESEARCH.** (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.
- HIS 750 INTRODUCTION TO THE HISTORICAL PROFESSION.** (1)
Intend to acquaint students with dissertation research expectations, the responsibilities of a new faculty member, and professional career options.
- HIS 767 DISSERTATION RESIDENCY CREDIT.** (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.
- HIS 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.
- HIS 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE.** (0-12)
May be repeated indefinitely.

HJS Hebrew and Jewish Studies

- HJS 101 ELEMENTARY HEBREW.** (4)
Coverage of Hebrew grammar designed to prepare students to use Hebrew for their particular needs and programs.
- HJS 102 ELEMENTARY HEBREW.** (4)
Continuation of HJS 101. Prereq: HJS 101 or consent of instructor.
- HJS 201 INTERMEDIATE HEBREW.** (3)
Hebrew grammar and introduction to the reading of specimens of Hebrew prose. Prereq: HJS 102 or consent of instructor.
- HJS 202 INTERMEDIATE HEBREW.** (3)
Readings in selected Hebrew authors. Prereq: HJS 201 or consent of instructor.
- HJS 324 JEWISH THOUGHT AND CULTURE I: FROM ANCIENT ISRAEL TO THE MIDDLE AGES.** (3)
A survey of Jewish intellectual and material civilization from its beginnings in ancient Israel to its efflorescence in the medieval period.
- HJS 325 JEWISH THOUGHT AND CULTURE II: FROM THE EXPULSION FROM SPAIN TO THE PRESENT.** (3)
A survey of Jewish intellectual and material civilization from the expulsion from Spain in 1492 to the destruction of European Jewry in the Holocaust and the re-establishment of Israel.
- HJS 326 THE JEWISH EXPERIENCE IN AMERICA.** (3)
An investigation of the history, literature, and situation of Jewish life in America.
- HJS 327 WOMEN IN JUDAISM.** (3)
An investigation of the history, literature, and experiences of women in Judaism.
- HJS 425 TOPICS IN JUDAIC STUDIES (Subtitle required).** (3)
Variable in content, this course focuses on important texts and issues in Jewish history, religion, literature, and philosophy. May be repeated to a maximum of six credits under different subtitles.
- HJS 495 INDEPENDENT STUDY IN JUDAIC STUDIES.** (3)
Independent study on a topic mutually acceptable to instructor and student in Judaic Studies. Prereq: Declared minor in Judaic Studies.

HMN Humanities

- HMN 300 TOPICS IN THE HUMANITIES (Subtitle required).** (1-4)
A multidisciplinary, topical course, experimental in nature, approved by the Gaines Center Faculty Advisory Committee. Open to all juniors and seniors; enrollment will be limited to ten students selected by Gaines Center Faculty Advisory Committee through competitive application. Cannot be repeated under same subtitle. Prereq: Junior/senior status; approval of Gaines Center for the Humanities Director.
- HMN 301 GAINES SEMINAR IN THE HUMANITIES I.** (4)
A multidisciplinary seminar directed to topics of major concern in humanistic studies and to include consideration of culture, literature, history and landscape. Prereq: Gaines Fellowship Program; junior status.
- HMN 302 GAINES SEMINAR IN THE HUMANITIES II.** (4)
Continuation of HMN 301. A multidisciplinary seminar directed to topics of major concern in humanistic studies and to include consideration of culture, literature, history and landscape. Prereq: Gaines Fellowship Program; HMN 301.

- HMN 303 CONTEMPORARY ISSUES CONCERNING THE HUMANITIES.** (1-3)
An interdisciplinary seminar in the humanities which will focus on contemporary issues. Open to all University students, subject to such limits or prerequisites as set by the instructor. May be repeated to a maximum of six credits under different subtitles. Prereq: Set by individual instructors.
- HMN 497 GAINES SENIOR THESIS.** (3-15)
An independent research course leading to an undergraduate thesis in the humanities, to be supervised by three faculty members, to be a minimum of 50 pages in length, and to be defended in an oral examination. A minimum of six credit hours must be taken in the fall semester. May be repeated to a maximum of 15 credits. Prereq: Gaines Fellowship Program; HMN 302.

HMT Hospitality Management

- HMT 120 INTRODUCTION TO HOSPITALITY MANAGEMENT AND TOURISM.** (3)
A survey of the historical development and management structure of organizations that comprise the hospitality and tourism industry. The course format includes presentation by industry representatives, lectures and student led discussions.
- HMT 210 HOTEL ROOMS DIVISION MANAGEMENT.** (3)
A comprehensive study of the management principles which apply to the rooms division of a hotel property that includes front desk and housekeeper operations, reservations and billing, accounting procedures and public relations. Prereq: HMT 120. For Hospitality Management and Tourism majors only.
- HMT 270 PRINCIPLES OF TRAVEL AND TOURISM.** (3)
An introduction to the structure, operation and characteristics of domestic and international tourism. Topics include transportation modes, destination planning and marketing, wholesale and retail travel agent agreements; geographic, social and cultural aspects of tourism. Prereq: HMT 120. For Hospitality Management and Tourism majors only.
- *HMT 308 PRINCIPLES OF FOOD AND BEVERAGE.** (3)
This course provides an overview of the principles of food and beverage concepts, menu development and food service operations in various segments of the hospitality and tourism industries. Food and beverage demonstrations and labs are included. A fee to cover materials and activities may be assessed from students. Lecture, two hours; laboratory, two hours per week. Prereq: HMT 120; DHN 241; Hospitality Management and Tourism Majors only.
- HMT 320 HOSPITALITY AND TOURISM MARKETING.** (3)
This course concentrates on the principles of marketing as they are applied to the hospitality industry. Problems and characteristics specific to the industry will be examined. Additionally this course will be a starting point for the development of a marketing feasibility study and comprehensive plan and strategy for marketing a hospitality operation. Prereq: HMT 120, HMT 210, HMT 270, HMT 308 and MKT 300. For Hospitality Management and Tourism majors only.
- HMT 330 MEETINGS AND CONVENTION MANAGEMENT.** (3)
This course highlights the importance, growth, and economic impacts associated with convention/trade shows to hotels, restaurants, visitors and convention centers, museums, airlines and local governments. Prereq: HMT 120, HMT 210, HMT 270, MKT 300. For Hospitality Management and Tourism majors only.
- HMT 345 INFORMATION TECHNOLOGY IN THE HOSPITALITY INDUSTRY.** (3)
This course discusses the strategic impact of information technology on the hospitality industry, describes basic functions found in IT applications in the hospitality industry, and devotes time to learning industry-specific applications as well as the Internet. Prereq: CS 101, HMT 120. For Hospitality Management and Tourism majors only.
- HMT 350 REVENUE MANAGEMENT.** (3)
This course explores the skills and role of revenue managers in hospitality management as well as discussing the benefits of revenue management practices and systems. Consideration is given to concepts such as pricing, value, forecasting, inventory, distribution and evaluation as it relates to maximizing revenue in hospitality. Prereq: HMT 120 and ACC 201. For Hospitality Management and Tourism Majors only.
- HMT 359 HOSPITALITY AND TOURISM SPECIAL TOPICS (Subtitle Required)** (1-3)
New issues or the in-depth study of issues relevant to hospitality and/or tourism will be offered through this course. Credit hours will vary. May be repeated to a maximum of six credit hours under different subtitles. Prereq: Consent of instructor.
- HMT 360 TOURISM PLANNING AND DEVELOPMENT.** (3)
This course is designed to provide students with a thorough overview of tourism planning at the local, regional, national and international levels. It provides a variety of practical planning theories, procedures and guidelines to meet the diverse needs of travelers, destination communities, tourism and hospitality organizations, public, non-governmental organizations, and the private sector. The course will concentrate on developing student's competencies in the basic techniques of planning and developing sustainable tourism plans as well as procedures and guidelines to enable students to understand the tourism planning process and general surveys; tourist markets, facilities, services and infrastructure; planning analysis and policy

formulation; development of design standards; environmental and socioeconomic considerations in tourism planning and tourism plan implementation. Prereq: HMT 120, HMT 210, HMT 270, MKT 300 and MGT 301 or consent of instructor.

HMT 395 HOSPITALITY AND TOURISM INDEPENDENT STUDY. (1-3)

Independent intensive work on specific topics in hospitality management or tourism. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

#HMT 414 ENTREPRENEURSHIP IN THE HOSPITALITY INDUSTRY. (3)

This course examines the steps required to create a new company and implement a new business initiative utilizing customer development models, product development models, and the business model canvas. With a focus on hospitality businesses, students will be taught how to think like entrepreneurs and develop their soft skills to prepare for successful careers. Prereq: HMT 120 and MGT 301, or consent of instructor.

HMT 420 KENTUCKY BOURBON HOSPITALITY AND TOURISM. (3)

Bourbon is big business in the Bluegrass State and is a distinctive spirit product of the United States. This class will introduce students to the basic manufacturing process while promoting an understanding and awareness of the bourbon industry to focus on the history, culture, heritage and value of bourbon in the state of Kentucky. The course will include guest speakers, field trips and a class project with the Kentucky Bourbon Trail. Some class meeting times will need to be extended to accommodate field trips. Prereq: 21 years old and permission of the instructor.

HMT 470 HOSPITALITY AND TOURISM LAW AND ETHICS. (3)

Students are introduced to the principles of law and their application in the hospitality industry. The focus of the course is on the rights and obligations of hotel, restaurant and travel business managers and professionals in their dealings with customers and other business. Prereq: HMT 120, HMT 210, HMT 270. For Hospitality Management and Tourism majors only.

HMT 486 HMT STUDY TOUR. (3)

A domestic or foreign study tour to include investigation of interests related to hospitality management and tourism. Professional visits are planned according to particular itineraries. Application and payment dates are determined each semester by the instructor. This course may be repeated one time if tour destinations are different. Prereq: Priority is given to majors and upperclassmen. All students are subject to instructor approval.

HMT 560 ADVANCED SEMINAR IN LODGING AND TOURISM. (3)

This course is a review and application of the principles of hospitality (specifically lodging) and tourism learned in pre-requisite courses. Theory and principles will be applied to decision-making in the hospitality and tourism industry while emphasizing features and characteristics of the industry. Current issues of relevance pertaining to the industry will be discussed to highlight their importance to the industry. Prereq: HMT 120, HMT 210, HMT 270, MKT 300, MGT 301. Restricted to upper-division HMT undergraduates, RTM graduate students or consent of instructor.

***HMT 570 EVENT PLANNING AND COORDINATION. (3)**

This course will provide the theoretical and practical foundations for effective twenty-first century event management. Students will learn how to research, design, plan, coordinate, and evaluate professional events. Specifically, this course deals with the horse industry activities in the state of Kentucky. Prereq: HMT 308 or MAT 237.

HMT 580 TRENDS ANALYSIS FOR THE HOSPITALITY INDUSTRY. (3)

The course is designed to acquaint the student with the major trends occurring in the hospitality industry and to develop analytical skills required to interpret them. Throughout the course, the student should be able to identify trends; their timing; the causal effects they have on organizations; the actual probability of their occurrence; and impact they will have on the organization. Prereq: Graduate student status or HMT 120, HMT 210, HMT 270 and HMT 308.

HMT 588 STRATEGIC MANAGEMENT IN THE HOSPITALITY AND FOOD SERVICE INDUSTRY. (3)

A course requiring students to use integrative skills to evaluate theories and applications regarding decision making, strategic planning and management concepts specific to hospitality and food service organizations. Prereq: Graduate student status or HMT 120, HMT 210, HMT 270, HMT 308, MGT 301 and MKT 300.

HMT 646 ADVANCED INFORMATION TECHNOLOGY IN THE HOSPITALITY INDUSTRY. (3)

This course will engage students in the latest technology used by the hospitality industry for advancement of human, material and financial resources. Strategies and applications using technology to gain competitive advantage will be investigated. Students should be able to examine the problems of technology in the hospitality and tourism industries and to provide solutions. Prereq: Admission to the graduate program.

HMT 694 STRATEGIC PLANNING IN HOSPITALITY, LODGING AND TOURISM. (3)

This course is designed to shape students' understanding of strategic planning as it relates to hospitality, lodging, and tourism. The concepts utilized to accomplish this objective represent several discipline areas such as: organizational theory, strategic management, and the function of management. Prereq: Admission to graduate program.

HMT 759 SPECIAL TOPICS IN HOSPITALITY MANAGEMENT AND TOURISM. (3)

Advanced work on a specific topic in hospitality management and tourism. May be repeated for a maximum of twelve credits under different subtitles. Prereq: Graduate standing.

HMT 781 ADVANCED TRENDS ANALYSIS IN HOSPITALITY AND TOURISM. (3)

The student will investigate the major trends occurring in the hospitality, lodging, and tourism industry and develop analytical skills required to interpret them. Throughout the course, the student should be able to identify trends; their timing; the causal effects they have on organizations; the actual probability of their occurrence; and impact they will have on the organization. Prereq: Admission to graduate program.

HMT 785 INDEPENDENT STUDY IN HOSPITALITY MANAGEMENT AND TOURISM. (1-6)

Problems involving independent library, studio, and/or laboratory study conforming to the student's special interest under the direction of an appropriate faculty member having proficiency in the selected area selected. May be repeated up to a maximum of six credits under different subtitles. Prereq: Nine credit hours of graduate study, consent of instructor, contractual agreement.

HON

Honors

HON 100 ACADEMIC ORIENTATION FOR HONORS STUDENTS. (1)

This course is designed to introduce Honors students within a variety of Honors programs, e.g. Singletary, Lewis Scholars, etc., to the scholarly life of the University and also to organize and execute community service as a cohort. Through guest lectures, discussions and out-of-the-classroom assignments, HON 100 helps Honors scholars gain an early understanding of opportunities at a research university, increase awareness and use of campus resources, reflect on community issues that they can address using the skills and talents specific to their cohort, and form beneficial relationship with students, faculty and staff. Prereq: Must be a UK Honors student (First priority given to Honors Scholarship programs cohorts, e.g., the Singletary Scholarship recipients, or the Lewis Scholarship recipients.)

#HON 101 THE INDIVIDUAL AND SOCIETY. (3)

"The Individual and Society" is an intensive, interdisciplinary seminar that will focus on the relationship of the individual to society. Students will examine human thought and imagination from various perspectives, including philosophy, history, literature, science, religion, and art. We will pay particular attention to how the main branches of academic inquiry – humanities, natural sciences, social sciences, and arts and creativity – address the relationship between individuals and the social worlds in which they find themselves. The course will emphasize the development of analytical reading, writing, and speaking skills. It will be writing-intensive; you will produce a minimum of 20-25 pages of writing over the course of the semester, and will complete at least one assignment that includes a formal revision process. It will also be discussion-intensive; from time to time you will be asked to help lead class discussion, and you are expected to contribute to that discussion regularly. Prereq: Membership in the Lewis Honors College.

HON 151 HONORS IN HUMANITIES (Subtitle required). (3)

Honors Humanities topics offered by various professors (topics announced the preceding semester). Whatever the topic, the Honors Humanities courses reflect on the human condition through works of art and literature (including folklore and film), philosophical and religious contemplation and argumentation, and historical narrative. They undertake interdisciplinary investigations of significant intellectual and cultural issues of our past and present (and thus of our future) and are designed to stimulate individual thought as well as develop writing, critical thinking, and small-group discussion skills. May be repeated up to six hours under a different subtitle. Prereq: Membership in Honors.

HON 152 HONORS IN NATURAL, PHYSICAL, AND MATHEMATICAL SCIENCES (Subtitle required). (3)

A hands-on, science course for Honors student in which they ask a question requiring scientific analysis, develop a related experimentation regimen, collect data, do the experimentation, analyze the results, draw conclusions and appropriately disseminate the results. Students will directly experience the scientific process to learn how scientists work. Prereq: Membership in Honors.

HON 153 THE WORLD AS HUMAN NETWORK AND AFFAIRS. (3)

The World as Human Network and Affairs: Courses in this category promote the understanding of individuals in the context of social interactions, groups and societies. The courses will focus on the subjective, intersubjective, and structural aspects of society, with the goal of helping students to enhance their understanding of the phenomenon that is human society. Prereq: Membership in Honors.

HON 251 HONORS IN SOCIAL SCIENCES (Subtitle required). (3)

The World as Human Network and Affairs: Courses in this category promote the understanding of individuals in the context of social interactions, groups and societies. The courses will focus on the subjective, intersubjective, and structural aspects of society, with the goal of helping students to enhance their understanding of the phenomenon that is human society. May be repeated up to six hours under a different subtitle. Prereq: Membership in Honors.

HON 252 HONORS IN ARTS AND CREATIVITY (Subtitle required) (3)

The creative process and its products and results are the focus of these Honors courses, and include but are not limited to, visual, verbal, musical, spatial, or kinesthetic forms of expression. Readings and final projects vary at the discretion of the faculty. May be repeated up to six hours under a different subtitle. Prereq: Membership in Honors.

HON 301 PROSEMINAR. (3)

An interdisciplinary seminar in the history of culture; topics will vary from semester to semester, but a substantial research essay is always required. This course will satisfy the Honors program requirement for Independent Study. May be repeated to a maximum of six hours. Prereq: At least two Honors colloquia and membership in good standing in Honors Program or consent of instructor.

HON 333 JOURNAL/JOURNEY PROJECT. (1)

Special credit for Honors Program students who keep an intellectual journal for both fall and spring semesters, receiving one credit during the spring semester. Regular consultation with an assigned advisor, several group meetings during the year. May be repeated to a maximum of five credits. Pass/Fail only. Prereq: Membership in the Honors Program.

HON 352 STUDY AND TRAVEL ABROAD (Subtitle required). (3)

An experiential, travel-abroad course that requires pre-travel class preparation followed by travel abroad that will provide students with multi-cultural exposure, leadership, and a new frame of reference for understanding the world and their role in it. Prereq: Sophomore status and any two of the following: HON 151, 152, 251, 252, or departmental Honors course, section or option in the Inquiry areas, or permission of the Honors Program.

HON 395 INDEPENDENT WORK. (1-6)

An independent research or creative project for 1-6 credits under the mentorship of a department faculty member in the field. May be repeated up to a maximum of 6 credits. A course research or creative project proposal must be agreed to by the student and faculty member and must be approved by the Honors Program Director of Student Services. Prereq: Must have upper division standing and membership in the Honors Program. Exceptions must be approved by the Director of Student Services or the Program Director.

HON 398 SENIOR HONORS CAPSTONE. (3-15)

A formal thesis or creative project of the student's choosing, to be directed by a professor in the student's major department. Student must present this research in an appropriate public or professional venue. Prereq: Students of junior-senior status, good standing in Honors Program and written permission from the Director of the Honors Program.

HON 399 HONORS SERVICE LEARNING AND COMMUNITY ENGAGEMENT. (1-15)

A service- or community-based learning experience in the field under the supervision of a faculty member. May be repeated to a maximum of 30 credits. Prereq: Consent of supervising faculty member and Honors Director, completion of an Honors Learning agreement and membership in the Honors Program.

HP Historic Preservation

HP 101 HISTORIC PRESERVATION: HOW THE PAST INFORMS THE FUTURE. (3)

An introduction to the theory and practice of historic preservation in the Commonwealth of Kentucky and beyond. The approach will be through an interdisciplinary lens, including architecture, interiors, history, urban planning, archaeology, geography, economic development, and community engagement. Lectures, readings, discussion, and field observations.

#HP 252 ADAPTIVE REUSE AND TREATMENTS FOR HISTORIC BUILDINGS. (3)

Valuable to any student, whether they are a designer or future property owner, this class explores the challenges and artful solutions employed to up cycle existing buildings. Course materials will focus on determining which treatment is most appropriate, evaluating significance, reviving existing spaces, and acquiring historic tax credits. Prereq: HP 101.

#HP 352 KENTUCKY ARCHITECTURE AND LANDSCAPES. (3)

This course is an introduction to Kentucky's characteristic built environment. There will be a focus on central Kentucky to enable context for assignments and access to sites for field trips. The course employs an interdisciplinary approach to architectural and cultural landscape developments, using both historical and geographical perspectives. It will include lectures, discussions, field trips/field observations and readings. Students will need to provide their own transportation to the field trip site. When necessary, carpooling arrangements will be made for any student without appropriate transportation. There will be nominal cost associated with the field trips. Prereq: Junior standing or permission of instructor.

HP 501 SELECTED TOPICS IN HISTORIC PRESERVATION (Subtitle required). (3)

Seminars for investigations of selected topics in historic preservation. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

***HP 601 INTRODUCTION TO HISTORIC PRESERVATION. (3)**

This course will introduce students to the history and theory driving the modern preservation movement, and will draw attention to the broad scope of what constitutes preservation practice in the 21st century. The course will emphasize the relationship between historic preservation

and allied fields, including city planning, economic development, design, archaeology, environmental sustainability, and landscape studies.

HP 602 HISTORIC PRESERVATION LAW. (3)

The goal of this course is to assist non-lawyers in understanding laws, policies, and procedures and how they impact your professional practice as preservationists, planners, archaeologists, and in other conservation related fields. Preservation law encompasses a number of practice areas including, but not limited to land use and zoning, real property, local government, constitutional, administrative, and environmental law as well as the conservation of archaeological resources. Prereq: HP 601 or consent of instructor.

HP 609 URBAN REVITALIZATION IN THE UNITED STATES: HISTORY, CONCEPTS, AND TECHNIQUES. (3)

This course explores the idea of historic preservation as a tool for economic development. Students will critically reflect on the relationship between historic preservation and issues such as low income housing, poverty, and gentrification. It will also introduce students to the tools and techniques being used by preservationists, urban planners, private and non-profit developers, housing advocates, and others to promote the revitalization of economically distressed communities. These tools will include a variety of federal, state and local housing and economic development programs, the National Trust for Historic Preservation's Main Street Program, and basic real estate decision-making tools that can be applied in both historic and non-historic contexts. Prereq: Enrollment in program or consent of instructor.

HP 610 AMERICAN ARCHITECTURE I. (3)

This course will trace architectural developments in America from colonial settlement until the middle of the 19th century. Examples will come from vernacular, professional and monumental contexts so that students become familiar with various design processes and types of architecture. The course will both survey the features of buildings constructed in different times in various American places and consider their historical and social contexts.

HP 611 AMERICAN ARCHITECTURE II. (3)

This course is a sequel to HP 610: American American Architecture I. It will examine architectural developments in America from the middle of the 19th century to the present, with a focus upon the virate intersection of American architecture with the emergence of modern architecture in the rest of the world. There will be special emphasis upon architectural professionalization and its impact on processes of design in all context. Field trip is required. Prereq: HP 610 or consent of instructor.

HP 612 DOCUMENTATION OF HISTORIC BUILDINGS AND SITES. (3)

This course introduces students to basic research methods and techniques for gathering, recording, and interpreting information about historic buildings and sites. Class discussions and practical exercises focus on the National Register system's documentation requirements, HABS conventions for drawing, and recording for survey and compliance purposes (e.g., Section 106). While engaging in field research to investigate historic buildings and sites, students will learn how, when, and why to apply the everyday research and recording techniques used by preservation professionals including fundamental methods for conducting archival research; evaluating physical evidence; developing building descriptions and historical narratives; producing measured drawings (plans); photographing buildings for reporting or archival purposes; and organizing results.

***HP 613 HISTORICAL STRUCTURAL SYSTEMS AND BUILDING MATERIALS. (3)**

HP 613 will provide an in-depth examination of current methods and technologies used in the conservation of historic materials and structural elements. This course will also examine the materials and methods of construction used in historic structures in Europe and the United States. The investigation of historic structural systems will include an examination of the technology available and the progressive changes in technology and how it impacted construction methods.

The analysis of existing regional structures and the conservation methods used to preserve them will be a key component to the class. These investigations will be carried out using a number of methods including research, identification, analysis, problem-solving remediation and writing. Prereq: HP 601.

HP 614 DOCUMENTATION OF HISTORIC BUILDINGS AND SITES II. (3)

This course reinforces concepts taught in HP 612 while introducing students to more advanced documentary and analytical techniques for evaluating historic sites and structures. Students work through practical exercises in large format photography, advanced measured drawing skills including the production of elevations and sections, and new analytical and representational techniques using computer applications. Where HP 612 emphasizes research, interpretive, and recording methods, the emphasis for this course is on analyzing, synthesizing, illustrating, and communicating the results of building investigations. Prereq: HP 612 or consent of instructor.

HP 615 AMERICAN SETTLEMENT PATTERNS: HISTORY OF LAND DEVELOPMENT. (3)

A graduate seminar that explores the traditions, policies, practices and regulations that dictate the form of the built environment in the United States, from colonial times to the present, in rural, suburban, and urban contexts. Prereq: Enrollment in program or consent of instructor.

HP 616 HISTORIC PRESERVATION AND DESIGN. (3)

An introduction to architectural preservation and design, using sites in Kentucky. Design projects will focus on restoration, preservation, and adaptive reuse of historic structures, new

urban infill structures, and new structures within historic urban and rural contexts. Individual and team projects will require interaction with local preservation and planning groups. Course meets for 3 hours each week. Prereq: Enrollment in program or consent of instructor.

***HP 617 HISTORIC PRESERVATION PLANNING. (3)**

An introduction to historic preservation planning. Projects will introduce students to a variety of preservation planning tools, including neighborhood historic resource surveys, the creation of historic districts, the development of design guidelines, and the mapping of historic resources among others. The course will focus on historic sites and structures within Kentucky. Individual and team projects will involve interaction with local government, planning and preservation groups. Class meets for three (3) hours per week. Prerequisite: HP 601 and enrollment in program or consent of instructor. Prereq: HP 601 and Enrollment in program or consent of instructor.

#HP 670 RETHINKING PRESERVATION: ETHICS, PUBLIC POLICY, AND HERITAGE RESOURCES. (3)

This course explores issues of ethics and social justice in the context of historic preservation by examining how these issues have shaped the public debate, policy making, and policy execution surrounding heritage resources. It will provide an overview of how issues such as race, gender, location, and income play a part in preservation efforts in the United States. It will further address ethical considerations in the global context through an examination of the impacts of climate change, political conflict, and human rights on heritage resources. Prereq: HP 601 and HP 602 or consent of the instructor.

#HP 675 ARCHITECTURAL HISTORY FOR PRESERVATION PRACTICE. (3)

This course introduces students to an interdisciplinary method for identifying, documenting, analyzing, and evaluating historic buildings. While 676, Field & Archival Methods in Historic Preservation, focuses in detail on how to gather and record data about buildings, this course emphasizes a methodology for deciphering the information in order to interpret the meaning of historic buildings. Prereq: Enrollment in the online graduate certificate program; prior completion of HP 601 – Introduction to Historic Preservation; or consent of instructor.

#HP 676 FIELD METHODS IN HERITAGE CONSERVATION. (3)

This hybrid course will provide students with an immersive experience in documenting, interpreting, communicating and visualizing cultural heritage—including the built environment (buildings, districts, cultural landscapes) and intangible culture (stories, music, oral history, etc.). The course is divided into eight modules, roughly corresponding to eight weeks in a face-to-face course. The modules are further divided into three units. Unit One and Three will be taught entirely online through the University of Kentucky's Canvas system. Unit Two consists of a six-day intensive face-to-face field school in Lexington, KY. All of the course units are designed to teach students how to "read" the historic built environment within its historical, material, political, social, and cultural contexts. Students will be introduced to traditional field-methods and technology, as well as emerging interdisciplinary methods of enquiry that embrace the knowledge of people, communities and cultures that have been historically marginalized. Prereq: HP 601 or consent of the instructor.

HP 699 SUMMER INTERNSHIP. (1-6)

Summer internship either in or out of Kentucky, providing intensive, practical experience in historic preservation. Internships for which the student can apply in other states or countries will be encouraged to provide practical experience outside of Kentucky, and work at several sites is possible. Possible internship programs include those offered by the Smithsonian Institution, National Park Service, or in various foreign countries, depending on the student's interest and subject to approval of the Director. Prereq: Two semesters of course work or consent of the Director.

#HP 718 ADAPTIVE REUSE. (3)

HP 718 focuses on adaptive re-use and rehabilitation. The Secretary of the Interior defines rehabilitation as "the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values." Students will learn how to recycle buildings, while being sensitive and respectful to their historic and architectural identity and value. This class will revolve around a final project to be completed by the students. This project will encompass property selection, architectural assessment, finance, compatible re-use, and re-design. Students will learn the steps and realities involved in planning an adaptive re-use project. The class will draw from the skills acquired in previous coursework, while taking inspiration from successful projects in Kentucky. Prereq: HP 601 and HP 602.

HP 720 CASE STUDIES IN PRESERVATION. (3)

An elective seminar in which case studies of significant local, regional, national and international preservation projects will be presented, analyzed and evaluated. Site visits, lectures by preservationists, architects, developers, and agency officials. Case studies will vary each semester, focusing upon preservation projects of current interest, including individual structures, rural and urban preservation, and community preservation planning. Interaction with groups, analysis projects, student presentations. Prereq: HP 601 and HP 602 or consent of instructor.

HP 721 INTERPRETATION OF HISTORIC BUILDINGS AND SITES. (3)

This course addresses the issues and problems involved in documenting and establishing historic buildings and sites as local/national museums. Students will examine museum types, such as house museums, living history, and battlefield sites, methods of interpretation, and concerns for the handling and displaying of historic materials. Students will discuss specific museum types within a larger context, including social and political history and the issues associated with heritage tourism. Prereq: Consent of instructor.

HP 724 ADVANCED HISTORICAL STRUCTURAL SYSTEMS AND BUILDING MATERIALS CONSERVATION. (3)

A practical discussion of the most effective methods for conserving buildings, organized by building material - wood, masonry, metals, and glass. Readings will be supplemented by site visits and discussion of actual projects. Prereq: HP 613 or consent of instructor.

HP 748 MASTER'S PROJECT RESEARCH. (0)

Half-time to full-time work on master's project. May be repeated for a maximum of six semesters. Prereq: All course work toward the degree must be completed.

HP 750 ARCHITECTURE DESIGN STUDIO. (6)

An advanced studio in architectural design for students with academic preparation in design who intend to specialize in preservation. Projects include adaptive reuse of historic structures and the design of new structures within historic contexts, using sites in Kentucky as foci for investigations. Individual and team projects of public interest, involving interaction with local preservation and planning groups and other professional and academic disciplines. Lecture, two hours; studio, 12 hours per week. Prereq: Consent of instructor or HP 616.

HP 772 SEMINAR IN HISTORIC PRESERVATION (Subtitle required). (3)

Seminar for the investigation of selected topics in historic preservation. The course requires a subtitle each time it is offered. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

HP 785 INDEPENDENT STUDY IN HISTORIC PRESERVATION. (3)

Independent investigation of selected topics in historic preservation under the supervision of a faculty member with proficiency in the investigation area. May be repeated to a maximum of six credits. Prereq: Nine credit hours of graduate study, written consent of instructor, and contractual agreement approved by Department Chair.

HP 798 RESEARCH DESIGN. (3)

This course will provide students with the basic tools needed for an in-depth investigation of a preservation design project, policy issue, or scholarly question. This course, which must be taken prior to enrollment in HP 799, assists students in designing their Master's Project and results in a Master's Project proposal and selection of a Master's Project Committee. Through readings and class discussions, this course will familiarize students with grounding their research within the literature, formulating research questions or hypotheses, research design, advanced methodologies, critical assessment of methodologies, and data analysis. Prereq: Completion of 9 credits of graduate study or consent of the instructor.

HP 799 MASTER'S PROJECT. (3)

Students work independently, but under the direction of a committee chair and Master's Project committee suggested by the student and chosen in consultation with the department chair or DGS to complete the Master's Project proposed in HP 798. Must be repeated to a maximum of six hours. Prereq: HP 798.

HS Health Sciences

HS 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)

Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient's individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as AT 500, CLS 500, CNU 500, CD 500, PAS 500.)

HSE Health Sciences Education

HSE 101 SURVEY OF HEALTH PROFESSIONS I. (1)

An introduction to the health sciences professions including an exploration of health sciences careers. (Same as HHS 101.)

#HSE 570 MANAGING HEALTH ISSUES IN LONG-TERM CARE: APPROACH. (2)

This course will cover the identification and management of health issues commonly found in long-term care (LTC) settings. Specifically, this course is designed to recognize, screen and identify the most common health issues present in elder residents of LTC facilities. After identification of these health issues, information regarding the appropriate course of action, utilizing appropriate care team resources, to prevent, manage, as well as treat these health issues will be provided. Common health issues to be covered include unintentional weight loss (malnutrition, frailty); unintentional weight gain (obesity and related co-morbidities); major organ system dysfunction (heart, kidney, lungs, immune, gastrointestinal, endocrine/hormonal); diminished function of "senses" (vision, hearing/balance and its implications); physical dysfunction (muscle wasting, mobility issues and implications); osteoporosis (bone health, risk of falls); mental decline (depression, dementia/Alzheimer's Disease); social isolation; spiritual support; polypharmacy. Prereq: HHS 101, HHS 102, CLM 241, GRN 250 or consent of instructor. (Same as CLM 570.)

Course Descriptions

HSE 595 DIRECTED STUDIES. (1-3)

Independent work devoted to research on specific problems, to challenge the student to synthesize concepts from his total program and relate them to his allied health specialty. Conference, one to three hours per week. May be repeated to a maximum of six credits. Prereq: Completion of CLM 241, CLM 350, CLM 351, CLM 353, CLM 354, CLM 355, CLM 405, CLM 444, CLM 445, CLM 452, CLM 495, or consent of instructor. (Same as CLM 595.)

HSE 880 SEMINAR IN ALLIED HEALTH (Variable topic). (1-3)

Study and analysis of current and topical problems and issues regarding the roles, trends and research for allied health educators. May be repeated to a maximum of six credits. Prereq: Admission to the College of Allied Health Professions Program or permission of instructor.

HSM Health Services Management

HSM 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3)

Review of the wellness-illness spectrum and the societal response in terms of health services. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also includes a discussion of major health problems and related health care programs. (Same as CLM/HHS 241.)

HSM 351 HEALTH SERVICES ADMINISTRATION. (3)

Theories and practices of administration in health care institutions with special emphases on organizational behavior and analyses of various administrative processes and techniques. Prereq: HHS 101, HHS 102, CLM 241. Student admitted to HHS or CLM program or consent of instructor. (Same as CLM/HHS 351.)

HSM 353 HEALTH ADMINISTRATION, PLANNING AND MANAGEMENT TECHNIQUES. (3)

Review of quantitative and nonquantitative techniques used in health care settings for planning, implementation and control. Emphasis will be placed on health service area delineation, patient origin studies, research methods, management information systems such as PAS, HAS, I.C.D.A., and quality assessment systems. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor.

HSM 354 HEALTH LAW. (3)

Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM/HHS 354.)

HSM 355 FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS. (3)

A review of financial management practices in health care institutions. Course will analyze regulatory and third party reimbursement for financial management, financial management practices, impact of financing mechanisms and practices on health services decision making. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM 355.)

HSM 452 COMMUNITY AND INSTITUTIONAL PLANNING FOR HEALTH SERVICES DELIVERY. (3)

Theoretical foundations for health planning. History of health planning and regulation. Specific attention will be given to integration of institutional planning with community health planning. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting). Completion of CLM 241, CLM 350, CLM 351, and admission to the CLM Program or consent of instructor. (Same as CLM 452.)

HSM 601 OVERVIEW OF U.S. HEALTHCARE. (3)

An introduction to the health care delivery system in the United States, including its composition, functioning, the interrelationships of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: MHA/MPA program status.

HSM 622 MENTAL HEALTH ADMINISTRATION. (3)

This course focuses upon the administration of local mental health agencies, facilities and coordination of deinstitutionalization programs, e.g., group houses, halfway houses. The course will focus upon system coordination, finance and communication. Prereq: MHA/MPA program status.

HSP Health, Society, and Populations

HSP 255 MEDICINE, HEALTH, AND SOCIETY. (3)

HSP/SOC 255 is an introduction to foundational social theories and concepts through the lens of health, healing, and medicine. Social science perspectives on health disparities across populations, how health and disease are defined and managed, and cultural experiences of illness provide a window into a broader understanding of social life. The course will focus on four major

social theories – social constructionism, symbolic interactionism, conflict theory, and functionalism. We will use these theoretical foundations and related core concepts to explore topics like physician-patient interaction and the social organization and distribution of health care. HSP/SOC 255 will also provide an introduction to social science research through critical analysis of original scholarly work and exposure to conducting, analyzing, and presenting one's own empirical findings. HSP/SOC 255 is ideal for those with career aspirations in medicine, nursing, or other health professions, and covers the sociology content included on the MCAT exam for pre-med students. This course also provides a critical foundation for those interested in learning about population health from the point of view of social science. Throughout the course, we will explicitly address the unique contributions of social science to a broader understanding of the etiology, treatment, experience, and consequences of illness and disease. (Same as SOC 255.)

#HSP 395 INDEPENDENT STUDY IN HSP. (3)

This course provides an HSP major with an opportunity to pursue specific academic and professional interests from social science perspectives that are not addressed in the HSP curriculum. The course may be repeated two times for a maximum of 6 credits. However, only three credit hours can count towards the HSP major requirements, and they must be applied to one of the courses required in the "Topics in Society and Health" Intellectual Unit. Prereq: Major in HSP with a minimum 3.0 GPA in the major and consent of the instructor.

#HSP 399 PRACTICUM IN HEALTH, SOCIETY AND POPULATIONS. (1-3)

This course provides an internship experience in a health workplace under the guidance of an HSP faculty member. A learning contract must be approved by the HSP faculty sponsor and one of the HSP Co-Directors. This course may be repeated for a maximum of 12 credits. Maximum of six hours of HSP 399 will count toward the HSP Major requirements, and this is limited to the Health Professions Intellectual Unit. Pass/fail only. Prereq: HSP Major, consent of instructor and HSP learning contract.

HSP 499 HEALTH, SOCIETY AND POPULATIONS CAPSTONE (Subtitle required). (3)

This course provides an integrative experience for HSP majors in their junior or senior year. The seminar format fosters integration of the program's interdisciplinary coursework, while providing the opportunity to focus on a particular area of interest within the topical theme of the seminar. Students will engage in a variety of activities designed to increase their understanding of the theoretical and methodological approaches that characterize the HSP perspective. They will then use this perspective to design or evaluate a project that addresses health change. The course will consist of seminar sessions, smaller peer group meetings, and individualized tutorial sessions. Students will learn to critically and respectfully engage with the work of their peers and effectively communicate the results of their projects. Prereq: Junior or Senior standing in HSP, or permission of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

IAS Interdisciplinary American Studies

IAS 301 TOPICS IN AMERICAN STUDIES. (3)

A team-taught seminar on a selected topic in American Studies, emphasizing approaches to interdisciplinary study in this field and the ways that different disciplines, when integrated, better complement an understanding of the topic. Possible topics include: slavery, racism, women's rights, Native Americans, the West, the South, the city and industrialization. May be repeated to a maximum of six credits.

IAS 401 PERSPECTIVES IN AMERICAN STUDIES. (3)

A team-taught seminar on a selected period in American history, emphasizing how different disciplines complement and illuminate a perspective on that period. Possible periods for study: Colonial America, the Enlightenment Age in America, the Age of Jackson, Ante-bellum America, Civil War and Reconstruction, the Gilded Age, America between the Two Wars, and Contemporary America. May be repeated to a maximum of six credits.

IBS Integrated Biomedical Sciences

IBS 601 BIOMOLECULES AND METABOLISM. (3)

An introductory graduate-level biochemistry course designed to provide a basic knowledge of molecular and biochemical principles necessary for advanced graduate study. Protein structure and function, enzyme catalysis, the generation and storage of metabolic energy, amino acid, nucleotide, and lipid metabolism and biological membranes and transport will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents. (Same as BCH 607.)

IBS 602 MOLECULAR BIOLOGY AND GENETICS. (3)

In introductory graduate-level course focused on molecular biology and genetics (concepts and techniques) necessary for advanced graduate courses. The course will emphasize basic genetic principles and the molecular mechanisms that underlie the regulated expression of genes, including transcription, mRNA processing and translation, as well as mechanisms of DNA replication/repair and recombination. Genetic engineering and other experimental approaches that are critical to molecular biology research will be covered. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

IBS 603 CELL BIOLOGY AND SIGNALING. (3)

An introduction to cell biology and signaling focused on cell types and architecture, membrane structure, cytoskeleton, mitochondria, cellular mechanisms of development, cell division, cell cycle, apoptosis, necrosis and cancer. Emphasis will also be placed upon the signaling pathways controlling these processes. Prereq: CHE 105, 107, 230 and 232; BIO 150 and 152; or equivalents.

IBS 606 PHYSIOLOGICAL COMMUNICATION. (3)

This course will consider the function of the mammalian organism from a perspective ranging from cells to organs, with an emphasis on physiological communication between organ systems. It will build upon the Integrated Biomedical Sciences (IBS) series of courses to allow the student to develop a truly integrative appreciation of biologic function. Prereq: IBS 601 and IBS 602.

IBS 607 SEMINAR IN INTEGRATED BIOMEDICAL SCIENCES. (0)

Weekly seminar devoted to the presentation and discussion of classic and new research. May be repeated to a maximum of four times; two semesters are required as part of the IBS curriculum. Prereq: Admission to IBS curriculum.

IBS 608 SPECIAL TOPICS IN INTEGRATED BIOMEDICAL SCIENCES. (2)

IBS 608 is comprised of a series of 1/2 credit minicourses, each meeting for 1 hour/week for 7 weeks, that will be taught during the Spring semester. Each minicourse will focus on a specific topic or area of research that is ongoing at UK or is particularly timely/exciting. Each student is required to participate in 4 of these minicourses for a total of 2 credit hours during the semester. Up to ten minicourses will be offered each semester. The particular topics (and participating faculty) may vary from year to year. Students will be expected to sign up for 6 courses in order of preference and will be assigned to 4 minicourses. Prereq: Students enrolled in IBS and have taken IBS601 and IBS602 can participate in this course. Non-IBS students can participate with permission of the Course Director. A strong background in molecular biology, biochemistry and chemistry (including organic chemistry) is highly recommended.

IBS 609 RESEARCH IN INTEGRATED BIOMEDICAL SCIENCES. (1)

Individualized laboratory and research experience under the supervision of a faculty member. May be repeated to a maximum of two credit hours. Two semesters required as part of IBS curriculum. Prereq: Admission to IBS curriculum and consent of instructor.

IBS 610 CRITICAL SCIENTIFIC READINGS. (2)

The major emphasis of this course is to develop within students the ability to critically read, evaluate and critique papers in the areas of biochemistry, molecular biology, and genetics. Students will meet weekly for two hours in a small group setting to discuss papers, with all groups reading the same set of papers. Each group of students (5-6/group) will meet weekly with one faculty member during the course of the semester. Grading will be based on attendance, participation, mock manuscript reviews, and student-led classes. Prereq: Students are required to have taken IBS 601 and IBS 602 or to take IBS 601 and IBS 602 concurrently with this course.

IBS 611 PRACTICAL STATISTICS. (1)

Practical Statistics will introduce students to basic statistical concepts and applications that are used in a majority of biomedical and translational research studies. The emphasis will be on "how" and "why" certain basic statistical applications are used rather than the theory behind various statistical methods. Students will cover materials using didactic lectures, examples of data from the primary literature, and homework problems. Prereq: A strong background in molecular biology, biochemistry and chemistry (including organic chemistry) is highly recommended. It is also highly recommended that students have taken IBS601 and IBS602 or are taking IBS601 and IBS 602 concurrently with this course.

ICR Instructional Communication and Research

ICR 384 TEACHING AND COACHING PUBLIC ADDRESS. (3)

Teaching and Coaching Public Address is a course designed to develop the instructional abilities of students who are interested in teaching public speaking or becoming future forensics coaches at either the high school or collegiate level. Students will develop and practice the skills necessary to successfully teach and coach public address and limited preparation speaking events by actively constructing their own speeches and helping to coach those of their peers. The course will culminate in a public address portfolio that can be included in future job applications. Prereq: CIS 110 and CIS 111 or equivalent.

ICR 385 TEACHING AND COACHING ORAL INTERPRETATION. (3)

Teaching and Coaching Oral Interpretation is a course designed to develop the instructional abilities of students who are interested in teaching oral interpretation or becoming future forensics coaches at either the high school or collegiate level. Oral interpretation is an interactive process that requires students to listen critically, evaluate and adjust their performances, and interact with the words and emotions of the literature itself. Students will develop and practice these skills by actively constructing their own speeches and helping to coach those of their peers. The course will culminate in an oral interpretation portfolio that can be included in future job applications. Prereq: CIS 110 and CIS 111 or equivalent.

ICR 386 TEACHING AND COACHING COMPETITIVE DEBATE. (3)

Teaching and Coaching Competitive Debate is a course designed to develop the instructional abilities of students who are interested in teaching academic debate or becoming future forensics

coaches at either the high school or collegiate level. Students will develop and practice the skills necessary to successfully teach and coach a variety of debate formats including different resolution types (policy, value, or fact), different research levels (limited preparation or evidence based), and different team pairings (individual, team, and congressional debate). Students will gain this experience by constructing their own debate cases and helping to coach those of their peers. The course will culminate in a debate portfolio that can be included in future job applications. Prereq: CIS 110 and CIS 111 or equivalent.

ICR 387 DIRECTING FORENSICS. (3)

Directing Forensics is a course designed to give students practical experience directing a forensics team at the high school or collegiate level. Students will develop and practice the skills necessary to successfully administer a team including selecting a travel schedule, budgeting, public relations, recruiting, and fundraising. Additionally, students will learn the basics of forensics tournament operation including scheduling, logistics, and tabulation. We will also discuss some of the current trends and issues in the activity. The course will culminate in a forensics portfolio that can be included in future job applications. Prereq: CIS 110 and CIS 111 or equivalent.

ICT Information Communication Technology

#ICT 115 COMMUNICATION IN THE DIGITAL AGE. (3)

Communication for the Digital Age focuses on improving students' oral, written, and visual communication skills so they can effectively form and translate technical information in ways that are easily understood by public audiences. In this course, students will both analyze and create materials designed to inform and persuade professionals in fields related to information communication technology. Students will also work individually and in groups to research, create, and present an argument focused on improving the communication of technical information. They will explore issues that align with their professional interests and produce products that use multiple methods (oral, written, or digital) to make an argument. A significant component of the class will involve learning to use visual and digital resources to enhance written and oral presentations. Prereq: CIS 110/WRD 110 or equivalent.

ICT 150 EXPERIENCE ICT. (3)

Through the exploration of social and technological theories related to Information Communication Technology and the evolution and current applications of ICT, students will gain a better understanding of how emerging technologies have led to the need and development of ICT as a discipline; its shared commonalities with other disciplines; its distinct characteristics; its applications in the workplace and personal contexts; and its impact and future implications on individuals, organizations, and societies.

ICT 200 INFORMATION LITERACY AND CRITICAL THINKING. (3)

This course provides an introduction to the concepts and practices of information literacy. It explores how to effectively and ethically find, evaluate, analyze, and use information resources in academic and everyday-life situations. Emphasizing critical inquiry and critical thinking, this course will explore the theories and definitions surrounding the term "information literacy." Students will put this theory into practice by developing problem-solving skills that allow them to meet information needs throughout their lifetimes. Students will gain a better understanding of how information and knowledge function in society and will discover methods of finding, accessing, evaluating, and using different information sources in an effective and ethical manner. (Same as IS 200.)

ICT 201 PERSONAL KNOWLEDGE MANAGEMENT. (3)

Gain knowledge about information sources, information retrieval and professional information management. Learn how information sources are described, organized, and disseminated using metadata standards and publishing practices. Acquire the skills to locate and retrieve quality sources of information with search engines and databases. Implement knowledge management technologies and apply an understanding of social factors in order to create efficient and usable organizational work flows. (Same as IS 201.)

ICT 202 TECHNOLOGIES FOR INFORMATION SERVICES. (3)

This course is designed to teach the fundamental concepts of information technology in ways relevant to professional practice in informatics and the information professions. It explores applications of computers and networks to information problems. Included are features of hardware, types of software, commercial systems and search engines. (Same as IS 202.)

ICT 205 ISSUES IN INFORMATION AND COMMUNICATION TECHNOLOGY POLICY. (3)

This course introduces students to the legal, political, and ethical issues confronting today's information professionals and the subsequent impact of these issues on information and communication technology (ICT) policy and law development. The rapidly evolving ICT infrastructure and the global shift to an information society will provide the context for the course. Emphasis will be placed on: organizational policy development, information ethics, computer ethics, freedom of speech and expression online, information filtering, intellectual property, cyber law, and pertinent legal and political acts related to the present information and communication infrastructure.

ICT 300 ICT IN SOCIETY. (3)

This course studies the impacts of information and communication technology (ICT) on individuals and society. It examines current issues related to the flow of information in society, including the impact of technology and the development of the information economy. The role

of the information profession within the context of information society issues is also explored. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ICT 301 INTRODUCTION TO DATABASES. (3)

This course is intended to give students a solid background in databases, with a focus on relational database management systems. Topics include data modeling, database design theory, data definition and manipulation languages, storage and indexing techniques, query processing and optimization, and database programming interfaces.

ICT 302 CONTENT MANAGEMENT SYSTEMS. (3)

The course focuses on the practice and theory of designing, building and maintaining content management systems.

ICT 303 SYSTEMS ANALYSIS. (3)

This course examines and applies the principles of information systems analysis. It surveys project management, feasibility and analysis, systems requirement definition and resource allocation. It utilizes a structured systems development methodology that spans the entirety of the information system lifecycle, which starts with the conception of the need for a specific information system and ends with the implementation of that system. The course utilizes a case study approach in which students initiate the analysis and logical design of a limited-scope information system. Prereq: IS 202. (Same as IS 303.)

#ICT 305 DATA DETECTIVES. (3)

In today's 24-7 culture, every choice we make comes with more data about which product/service/area is the "best" on a number of factors. The challenge, then, is sorting through the data to make an informed decision. In this course, you will be presented with several "real life" scenarios and then asked to use data to construct an appropriate written or oral response. Whether as information consumers or as information professionals, sorting through the data and making a decision that can be articulated to people unfamiliar with the issue is a key indicator of information literacy. Given that this course fulfills your Graduation Composition and Communication requirement for Information Studies, you will be asked to write and revise several short pieces and complete one digital presentation.

ICT 307 COPYRIGHT. (3)

In the age of digital information, the technology, economics, and law of intellectual property are constantly in flux. In order to continue to effectively provide access to information, ICT professionals need to play a role in managing these changes. This introductory course examines the basic conceptual elements of copyright protection, and its adaptation and application to new media and information communication technologies.

#ICT 310 EXPLORING AND ANALYZING ICTS: METHODOLOGICAL APPROACHES. (3)

Information and Communication Technologies (ICTs) are pervasive in our increasingly global society and, importantly, have the potential to improve lives and society. This course is designed to provide you with a sophisticated understanding of the philosophy, theory, design, and analysis of both qualitative and quantitative research in communication. During this course you will be exposed to a variety of methodological designs and analyses. Using a variety of methods ranging from the foundational (e.g., interviews, surveys) to cutting edge (e.g., big data analysis, geospatial mapping) and readings from a variety of contexts (e.g., education, healthcare, risk and crisis), this course is designed to equip you with the research and methodological tools to understand how ICTs affect individuals, relationships, groups, organizations, social movements, and policies and to use these methodological tools in applied settings.

#ICT 311 INTRODUCTION TO INFORMATION SCIENCE. (3)

This course introduces theoretical and foundational concepts in information science and situates information in various contexts through which it has been circulated, conceptualized, and used. Students will learn fundamental approaches to understanding relationships across technology, people, and society. Emphases include technologies, classification, information transfer, format, use, and definitions of information and "information age."

#ICT 315 HUMAN RELATIONS AND TECHNOLOGY. (3)

With so many new technologies in use today, information can often fail to effectively reach those who need it. In this course, students will focus on the importance of taking a human-centered approach to best identify and meet individuals' and groups' information needs. Human Relations and Technology focuses on engaging critical thinking skills to effectively tailor and disseminate information to people both within and outside of the IT industry. Through analysis and design, students will be asked to address multiple real-world situations with a specific focus on connecting to humans through (and often in spite of) technology.

#ICT 316 UNIVERSAL ACCESS: INFORMATION AND WORKING ENVIRONMENTS. (3)

Universal design is a holistic concept that can be applied to everything from computer software to electronics to dishes. It is the idea that accessibility and usability standards should be blended together to create information that anyone can access. More specifically, web accessibility refers to the inclusive practice of removing barriers that prevent interaction with, or access to information on websites. When websites are correctly designed, developed and edited, all users have equal access to information and functionality. The focus of the course is how web accessibility can be implemented successfully in working environments by creating digital resources online that all consumers can use. In this course, you will learn how information must be presented that is flexible and adaptive to different users' needs or preferences, accessible through a variety of different technologies and why it is easier and more cost-effective to design website and social media content correctly the first time than re-designing it later. Students will

compare and contrast accessible and inaccessible websites and social media and also perform a web accessibility audit for an actual business.

#ICT 320 INFORMATION ARCHITECTURE. (3)

This course is an introduction to Information Architecture (IA), an area concerned with the design, evaluation, and implementation of interactive Web systems in terms of organization, labeling, navigation, and search. It aims to acquaint students with principles and processes of information architecture for User-centered design of Web systems such as websites and mobile applications. It also provides students the opportunity to develop practical skills related to the design of information organization and navigation systems. The course prepares for the companion technical course of "content management systems" where they will apply the theories and techniques studied in this course to the implementation for a fully functional website.

#ICT 325 MULTIMEDIA AND TECHNOLOGY. (3)

This course is designed to engage students with the deployment of multimedia within contemporary interactive technologies, including their historical and cultural contexts, using platforms, visual cultures, sociocultural dynamics, and technical components. The objective of this course is to help students cultivate conceptual tools that are of practical relevance that can be used while creating and engaging with multimedia tools, platforms, and artifacts both in their professional and personal lives. To this extent, the readings are carefully chosen to introduce foundational concepts of new media (Unit 1), associate and apply these concepts in their daily lives (Unit 2), and critically think about some of the broader implications of new media (Unit 3). The assignments are designed to cultivate critical analytical thinking by helping students apply the insights to day-to-day examples. Students are also required to complete two multimedia tool workshops as part of their curriculum in order to gain practical skills.

ICT 326 ELECTRONIC INFORMATION RESOURCES FOR HEALTH PROFESSIONALS. (3)

This course is a survey of electronic information resources for health professionals, including databases and Web resources, but with a focus on MEDLINE. Discussion of relevant controlled vocabularies, their use in formulating and executing search strategies, and alternative interfaces to MEDLINE are addressed. The course also includes reference management software, an evidence-based health care component, and discussion of systematic reviews. Prereq: STA 210 or equivalent. (Same as IS 326.)

ICT 327 CONSUMER HEALTH INFORMATION SEEKING. (3)

This course will provide students with a foundation in the history and development of consumer health information seeking in addition to practical experience in locating, evaluating, and providing health information to diverse and special populations within educational and healthcare settings. Students will gain an understanding of the lifecycle of consumer health information – from policy development, to creation, to dissemination, and use – and the role of healthcare professionals in providing that information. Current issues and trends, as well as future directions in consumer health information provision and health information seeking will be discussed. (Same as IS 327.)

ICT 351 TECHNOLOGY SECURITY. (3)

An introduction to the various technical and administrative aspects of information security and assurance. This course provides the foundation for understanding the key issues associated with protecting information assets, determining the levels of protection and response to security incidents, and designing a consistent, reasonable information security system with appropriate intrusion detection and reporting features.

ICT 390 SPECIAL TOPICS IN ICT. (3)

Intensive study of one aspect of information communication technology under the leadership of an authority in the area.

ICT 395 INDEPENDENT STUDY IN INFORMATION COMMUNICATION TECHNOLOGY. (3)

Opportunities for directed study in subjects or problems of interest to a student. Observation and research required, and a written report describing the work accomplished. Prereq: Consent of instructor and approval of proposal.

ICT 406 E-COMMERCE REGULATION. (3)

Business and commercial transactions conducted via electronic means are subject to complex legislation and regulation that changes frequently. The relevant legislation and regulatory mechanisms govern commercial transactions as well as any electronic marketing, such as promotional emails or online newsletters. This course provides an overview of the regulatory framework governing e-commerce transactions, relevant standards and ethical considerations, protocols to ensure consumer protection, and emergent issues relating to compliance and enforcement.

ICT 410 PRIVACY. (3)

As new information and communication technologies are developed, they increasingly raise concerns about the collection, use, storage, and sharing of personally identifiable information. This course provides an overview of privacy, privacy laws, privacy-related technologies, and self-regulatory efforts to mitigate potential privacy risks. The study of privacy will be approached from philosophical, historical, legal, policy, and technical perspectives.

#ICT 415 TECHNOLOGY TRAINING AND INSTRUCTIONAL STRATEGIES. (3)

Using technology in workplace settings requires an understanding of the relevant instructional strategies as well as an understanding of how technology supports learning in a specific IT context. In this course, students will gain a better awareness of what is needed to develop

instructional experiences for adult populations. Students will explore how to use specific instructional strategies to learn, assess, and develop content to meet the needs of organizations seeking to train those in the workforce. Prereq: ICT 315 Human Relations in IT.

#ICT 420 WEB DEVELOPMENT FOR THE SEMANTIC WEB. (3)

This course introduces students to web development with the goal of designing a website containing structured and semantic data that adheres to principles of usability, accessibility, and inclusion. By the end of this course, students will acquire skills at planning, developing, organizing, and managing websites in HTML5 and CSS3 and will develop an understanding of basic design principles and project management. Prereq: ICT 320 Information Architecture.

ICT 550 SECURITY INFORMATICS. (3)

This course introduces students to policy concerns relating to security informatics, and highlights theoretical and practical approaches to designing secure information and communication technology (ICT) systems. It addresses key issues such as authentication, risk analysis, access control, database and network security, and information assurance.

ICT 552 CYBERCRIME AND DIGITAL LAW ENFORCEMENT. (3)

The global reach of the Internet, the low marginal cost of online activity, and the relative anonymity of users have contributed to a wide escalation in cybercrimes. Consequently, information and communications technologies (ICT) are being increasingly employed to instigate threats to global civil society. This course provides an overview of cybercrime and the digital law enforcement practices put in place to respond to them. The course will focus on the types and extent of current cybercrimes, how the justice system responds to these crimes, the various constitutional protections afforded to computer users, the law and policies that govern cybercrime detection and prosecution, and related technologies.

***ICT 596 INTERNSHIP IN ITC. (3)**

Provides students with supervised work-and-learning experience in a professional environment under the direction of a University faculty member and an employee of a participating firm. One hundred forty four (144) hours of student time are expected during the semester. Enrollment is contingent upon the availability of internships. Students are selected on the basis of personal qualifications, including GPA, courses taken, recommendations, and an interview.

ICT 600 INFORMATION COMMUNICATION TECHNOLOGY IN SOCIETY. (3)

We live in a world of rapid technological innovation. This innovation has allowed significant changes in the ways that we communicate and interact with forms of media. In fact, the technologies related to communication have created a culture surrounding how we see, hear, read and use information, and have significantly impacted politics, economics, policy, etc. This course studies the impacts of information and communication technology (ICT) on individuals and society, and the impact that society has on ICTs. It examines current issues related to the diffusion of new technologies in society as well as the obstacles to widespread use of individual ICTs. Students in this course will analyze the various theories related to the use of emerging communications forms, and consider the factors related to successful ICT deployment. Students will be required to look beyond "good/bad" classification of new communication technology, and conduct in-depth interrogations of ICTs, the issues that surround them and the environments in which ICTs are used.

ICT 601 INFORMATION SEEKING. (3)

This course provides an overview of the theory and practices of human information seeking behavior, including both basic models to understand user behavior, and techniques to effectively select, locate, evaluate, and use information to meet diverse information needs and facilitate human-computer interaction.

ICT 610 ICT RESEARCH METHODS. (3)

Information and Communication Technologies (ICTs) are pervasive in our increasingly global society and, importantly, have the potential to improve lives and society. This course is designed to provide you with a sophisticated understanding of the philosophy, theory, design, and analysis of both qualitative and quantitative research in communication. During this course you will be exposed to a variety of methodological designs and statistical procedures to allow you to complete your own research projects during your time as a graduate student here at the University of Kentucky. Using a variety of methods ranging from the foundational (e.g., interviews, surveys) to cutting edge (e.g., big data analysis, geospatial mapping) and readings from a variety of contexts (e.g., education, healthcare, risk and crisis), this course is designed to equip you with the research and methodological tools to understand how ICTs affect individuals, relationships, groups, organizations, social movements, and policies and to use these methodological tools in applied settings.

ICT 626 ELECTRONIC INFORMATION RESOURCES IN THE HEALTH SCIENCES. (3)

Survey of electronic information resources in the health sciences, including databases and Web sources. Discussion of relevant controlled vocabularies and their use in formulating and executing search strategies. The course also includes an evidence based health care component whereby students learn to analyze critically the biomedical literature and determine reference and research relevancy. (Same as LIS 626.)

ICT 627 CONSUMER HEALTH INFORMATION RESOURCES. (3)

History and development of consumer health information resources; role of professional and governmental agencies in provision of consumer health information; policy issues related to provision of consumer health information. Consumer health professional literature, user information needs, user resources, and information services. Identification, selection, utilization, and evaluation of consumer health information for special populations within specialized

educational and healthcare settings. Trends and issues in consumer health informatics. (Same as LIS 627.)

ICT 630 INFORMATION RETRIEVAL. (3)

This course reviews important information retrieval (IR) theories and models; explores a brief history of IR research; and examines various IR applications. Students will get familiar with IR foundations such as document indexing or query expansion/optimization strategies, as well as understand overall system architectures for selected IR applications. Students will explore how to analyze and compare IR systems, how to select the best IR systems for particular tasks and how to design a prototype for an efficient IR system. Prereq or concur: LIS 636 or LIS 637 or LIS 638. (Same as LIS 630.)

ICT 636 INTRODUCTION TO COMPUTER INFORMATION SYSTEMS. (3)

A broad introduction to the use of computers as tools for creativity, communications, organizing information, and problem-solving. The basic concepts of computer hardware, software, networking, and the Internet are covered. Students also will be introduced to basic techniques for designing and creating a web site.

ICT 638 ADVANCED WEB DESIGN. (3)

This course serves as a hands-on introduction to advanced web design techniques. Topics include the web development process, creating dynamic content, advanced layout and design, client-side and server-side scripting languages, graphic file types and optimization, web forms, multimedia, and web servers and databases. Prereq: ICT 636, or consent of instructor.

ICT 640 HEALTH INFORMATION RESOURCE SERVICES. (3)

A survey of information agencies and health science libraries, including topics related to: the healthcare community and their information needs, information resources in the health sciences, controlled medical terminologies and classification systems, search and retrieval of information resources, issues in the management of collections and access to health libraries. (Same as CJT/ LIS 640.)

ICT 650 INTRODUCTION TO LEADERSHIP IN INFORMATION PROFESSIONS. (3)

The primary purpose of this course is to expose students to leadership strategies and challenges in the information professions. Primary attention is placed on: 1) the role of communication in effective leadership; 2) innovation and change in the information professions and the leadership styles available for addressing such changes; 3) ethical frameworks in communication leadership; 4) issues management and organizational planning; and 5) leadership communication strategies for managing conflict and crises. Prereq: Graduate student status in the ICT, LIS, or CJT graduate programs.

ICT 651 TECHNOLOGY SECURITY. (3)

An introduction to information security including vocabulary and terminology, threats to information systems, cryptology, ethics, the legal environment, and risk management. Identification of exposures and vulnerabilities and appropriate countermeasures are addressed. The importance of appropriate planning, policies and controls is also discussed. It is expected that each student will possess some knowledge of programming, operating systems, and networking, although advanced knowledge in those areas is not necessary.

ICT 658 KNOWLEDGE MANAGEMENT. (3)

Organizational knowledge is a valuable strategic asset. Knowledge management refers to the systematic management of an organization's knowledge assets so that they can be leveraged for sustainable advantage. This course examines how knowledge is created, captured, organized, diffused, and implemented in an organization. Topics covered include knowledge management processes and practices, corresponding technologies, collaboration tools, and people and cultural issues. (Same as LIS 658.)

#ICT 661 INTRODUCTION TO DATA SCIENCE. (3)

This course will provide a foundation in the area of data science based on data curation and statistical analysis. The primary goal of this course is for students to learn data analysis concepts and techniques that facilitate making decisions from a rich data set. Students will investigate data concepts, metadata creation and interpretation, general linear method, cluster analysis, and basics of information visualization. At the beginning, this course will introduce fundamentals about data and data standards and methods for organizing, curating, and preserving data for reuse. Then, we will focus on the inferential statistics: drawing conclusions and making decisions from data. This course will help students understand how to use data analysis tools, and especially, provide an opportunity to utilize an open source data analysis tool, R, for data manipulation, analysis, and visualization. Finally, in this course we will discuss diverse issues around data including technologies, behaviors, organizations, policies, and society. (Same as LIS 661.)

ICT 690 SPECIAL TOPICS IN LIBRARY AND INFORMATION SCIENCE. (3)

Intensive study of one aspect of library and information science under the leadership of an authority in the area. (Same as LIS 690.)

ICT 695 INDEPENDENT STUDY IN INFORMATION COMMUNICATION TECHNOLOGY. (3)

Opportunities for directed study in subjects or problems of interest to a student. Observation and research required, and a written report describing the work accomplished. Prereq: Consent of instructor and approval of proposal.

ID Interior Design

ID 101 INTRODUCTION TO INTERIORS: PLANNING/STRATEGY/DESIGN. (1)

An introduction to the profession of Interiors: historical perspective, career specializations, and career opportunities.

ID 102 INTRODUCTION TO INTERIORS: PLANNING/STRATEGY/DESIGN. (1)

An examination of the Interiors profession focusing on professional practice, current issues, and future directions.

ID 121 INTERIORS FOUNDATION STUDIO. (5)

An introduction to the design process and creative problem solving. Class assignments and discussions focus on theories of two and three dimensional design, spatial definition and organization, and provide a context for analyses of how design interacts with ecological, social, economic and cultural contexts. The course is comprised of daily instruction periods and weekly lectures. Weekly lectures will introduce ideas, case studies, and approaches. Students are also introduced to concepts of design communication and teamwork structures and dynamics. Studio, lecture, research, drawings, models, sketches, written components and field trips.

ID 122 INTERIORS FOUNDATION STUDIO II. (5)

A continuation of ID 121. Emphasis is on application of the design process on color, light, sustainability, and global perspectives. Projects also focus on design decisions within the parameters of ecological, socio-economic, and cultural contexts. Weekly lectures focus on contemporary issues and case studies. Students also are introduced to concepts of design communication and teamwork structures and dynamics. Studio, lecture, research, drawings, models, sketches, written components and field trips. Prereq: ID 121.

ID 161 HISTORY AND THEORY OF INTERIOR ENVIRONMENTS I. (3)

A historical survey of the development of interior design and the decorative arts from pre-history to the 19th century. Emphasis is on the principles of aesthetic philosophy and design theory and the socio-economic, political, and environmental influences affecting the design of the built environment. Lectures, visuals, readings, discussions, historical analysis, research and field trips.

ID 162 HISTORY AND THEORY OF INTERIOR ENVIRONMENTS II. (3)

A historical survey of the development of interior design and the decorative arts from the 19th century to the present. Emphasis is on the principles of aesthetic philosophy and design theory and the socio-economic, political, and environmental influences affecting the design of the built environment. Lectures, visuals, readings, discussions, historical analysis, research and field trips.

ID 221 INTERIORS STUDIO I. (5)

Investigation into how human experience and behavior are influenced by interior spaces. The focus is on design of spaces of multiple scales and exploration of how manipulation of spatial aspects such as scale, color, texture, proportion, light and spatial orientation alter human experience. Field trips are integrated into the studio experience and students are required to do research and evaluation of existing spaces. Interior spaces are created and investigations of interior spaces are recorded using a variety of communication methods including digital media, sketching, and narratives. Research, use of digital media, sketching, analyses, discussions, critiques, field trips. Prereq: ID 122.

ID 222 INTERIORS STUDIO II. (5)

The application of design thinking to studio problems in interior design. Scenario-building with emphasis on human response to the interior environment. Interior modeling in various media and drawing skills required. Studio experiences, analyses, discussions, readings and field trips. Prereq: ID 221.

ID 234 ENVIRONMENTAL THEORY. (3)

A exploration of the relationship between the built environment and people, with special emphasis on understanding how varying social and cultural norms are relevant to design decision-making. Topics include human factor issues that relate to the design of interior spaces such as: foundational theories of environmental psychology; the psychology of behavior; human perception and environmental design; personality and design; preference; culture; symbolism; universal design; and the use of behavioral research in design programming. Concur: ID 274 or consent of instructor. This course is a Graduation Composition and Communication Requirement (GCCR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

ID 263 INTRODUCTION TO DIGITAL MEDIA. (3)

An introduction to various digital media used as a tool within the design professions. Lecture, studio, readings, problem solving, research, field trips. Concur: ID 274.

ID 264 COLOR THEORY AND INTERIOR SPACE. (3)

The study of color theory and its application to the interior environment: the interactive aspects of color, light, and texture within an interior application will be emphasized. The psychological and functional aspects of color application will be explored. The articulation and graphic communication of color concepts applied to an interior space will be stressed. Prereq: Concurrent enrollment in ID 274 or consent of instructor.

ID 275 INTERIOR CONSTRUCTION SYSTEMS. (3)

A survey of interior construction and building systems with emphasis on structural systems

and methods and non-structural systems including ceilings, flooring and interior walls. Focus is on case study analysis and problem-solving related to the integration of construction systems and interior environments. Subject matter includes code analysis and interpretation. Lectures, visuals, readings, discussions, historical analysis, research and field trips.

ID 321 INTERIORS STUDIO III. (5)

Continuation of the studio sequence with particular focus on interiors projects at varying levels of complexity. Students will explore design opportunities in missed use projects. Sustainable design issues will be explored. Prereq: ID 222.

ID 322 INTERIORS STUDIO IV. (5)

Continuation of the studio sequence with particular focus on interiors projects at varying levels of complexity. Students will explore design opportunities in workplace projects. System integration emphasized. Sustainable design issues will be explored. Prereq: ID 321.

ID 346 PROFESSIONAL PRACTICE PREPARATION. (3)

A comprehensive review of professional career development needed in preparation for an interior design work experience or internship (CIDA II-10). Prereq: ID 222.

ID 359 SPECIAL TOPIC IN INTERIORS. (1-3)

Exploration of specific topics of the interiors profession. May be offered as a studio or lecture. May be repeated to a maximum of six credits. Prereq: Junior standing or consent of instructor prior to registration.

ID 364 INTERIOR ENVIRONMENTAL CONTROL SYSTEMS. (3)

An introduction and overview of electrical, lighting, mechanical, thermal and acoustical systems of buildings and how they enhance the health, safety, welfare, and performance of building occupants. Emphasis is on case study analysis and problem-solving related to the integration of building systems and interior environments. Subject matter includes code analysis and interpretation. Lectures, discussions, readings, research and field trips. Prereq: ID 275.

ID 365 INTERIOR FINISH MATERIALS. (3)

An analysis and evaluation of interior design finish materials and production methods. Emphasis on health safety and wellness factors; performance attributes; site/user requirements; and sustainability. Lectures, discussions, field trips, research, and analyses. Concur: ID 321.

ID 366 LIGHTING DESIGN AND THEORY. (3)

An in-depth study of principles, design requirements and equipment for ambient, task and decorative illumination as utilized in the interior environment. Emphasis is on methods of light generation, lighting controls, product analysis, high performance lighting selection, and specification. Lectures, discussion, related readings, calculations and field trips. Prereq: ID 274 or consent of instructor.

ID 370 VERTICAL STUDIO. (5)

Continuation of Interior Design Studio sequence with particular focus on design projects at varying levels of complexity. Design problems will correspond to real world design opportunities in differing areas of interior design specialization (i.e., corporate, hospitality, retail, residential, etc.) Sustainable design issues will be explored. Course shall be repeated for a total of 15 hours. Prereq: ID 274 and concurrent enrollment in ID 365 and ID 366 during first enrollment in the ID 370 Vertical Studio sequence.

ID 375 INTERIOR MATERIAL AND CONSTRUCTION: DETAILING. (3)

A continuation of ID 365 with emphasis on specification and graphic detailing of interior space including architectural finish materials, furniture, fixtures, and equipment. Prereq: ID 275 and ID 365.

ID 395 INDEPENDENT STUDY IN INTERIORS. (1-3)

Problems involving independent study/library study conforming to the student's special interest under the direction of an appropriate faculty. May be repeated to a maximum of six credits. Prereq: Consent of instructor and contractual agreement.

ID 421 INTERIORS STUDIO V. (5)

Research and programming for a project focusing on Healthcare. Incorporates written, graphic and oral communication, digital media, studio experiences, field research, analyses, discussions, readings and site visits. Prereq: 10 credit hours of ID 321.

ID 422 INTERIORS SENIOR THESIS. (5)

Detailed research and programming for a comprehensive studio project. Development of a strong conceptual proposal with written, graphic, and oral presentation. Studio experiences modeling analyses and discussions, readings and field trips. Includes custom design, specifications and working drawings. Prereq: ID 466.

***ID 427 INTERIORS INTERNSHIP. (3-9)**

A supervised full-time professional work experience in the design industry. Specific work assignment to be defined by faculty/employer/student contract with a rate of 50 hours of work for each credit hour earned. Prereq: Permission of School Of Interiors Internship Coordinator or School Director.

***ID 428 INTERIORS TRAVEL SEMINAR. (3-12)**

A program to investigate design outside of the studio and classroom. Travel experience in combination with on-site lectures and discussions provide opportunity for exploring design considering contextual factors and theories in relation to the locale and precedent. Specific experience to be defined by faculty with a rate of 50 hours of travel for each credit hour earned. Prereq: Permission of faculty program leader or School Director.

ID 466 INTERIORS PROFESSIONAL PRACTICE. (3)
The development of custom design elements and studies within the framework of professional business practices and documentations. Lectures, discussions, guest speakers, field trips and design exercises, including developmental sketches, material selection, shop drawings, and scaled prototypes. Prereq: Senior standing.

ID 470 INTERIORS ADVANCED PROBLEM SOLVING: DESIGNER AS CREATOR AND PRAGMATIST. (5)
Studio problems in interiors related to institutional facilities and/or specialized populations, such as education, healthcare and the elderly. Includes custom design, specifications, models and working drawings. Studio experiences, analyses, discussions, reading and field trips.

ID 480 INTERIORS STUDY TOUR. (1-3)
A domestic or foreign study tour to include investigation of interests related to interiors. Professional visits are planned according to particular itineraries. Application and payment dates are determined each semester by the instructor. May be repeated one time if tour destinations are different. Prereq: Priority is given to majors and upperclassmen majors.

ID 559 SPECIAL TOPIC IN INTERIORS (Subtitle required). (1-3)
Advanced exploration of a specific topic in the profession of interior design. May be offered as a studio and lecture. May be repeated to a maximum of six credits. Prereq: Senior standing or consent of instructor prior to registration.

ID 595 INDEPENDENT STUDY IN INTERIORS. (1-3)
Problems involving independent studio and/or library study conforming to the student's special interest under the direction of an appropriate faculty member. May be repeated to a maximum of six credits. Prereq: Senior standing or consent of instructor and contractual agreement.

ID 641 REGIONAL VARIATIONS IN COLONIAL AMERICAN DESIGN. (3)
An analysis of regional variations in American furnishings, interior finishes, and architecture from colonization to 1783; consideration will be given to historical, economic, social, political, and religious influences on design. Prereq: DMT 142 or consent of instructor.

ID 650 SURVEY OF CURRENT LITERATURE AND METHODOLOGIES. (3)
An intensive survey of literature and methodological inquiry used for problem solving related to the student's desired area of design specialization. Emphasis will be placed on conducting a literature search and review in a specific area of interest. Prereq: Graduate standing.

ID 655 CREATIVE AND THEORETICAL DESIGN PROCESSES. (3)
This course will focus on creativity and the design process with emphasis on investigation of current topics in interior design and the built environment. Theoretical frameworks will be explored to advance understanding of creativity and help students form a knowledge base for developing an in-depth research topic. Prereq: Graduate standing.

ID 659 INTERIORS GRADUATE STUDIO. (3-6)
Advanced graduate-level comprehensive information gathering and analysis for identification of design issues associated with workplace and the human environment. Includes methods of inquiry and design thinking appropriate to a specific typology, design programming, conceptualization, studio experiences, discussions, and development of strategies resulting in a design or research deliverable for an Interiors industry driven problem. Prereq: Graduate standing.

ID 669 ADVANCED COLOR THEORY AND APPLICATION. (3)
Advanced color theory will examine the physical, psychological, historical and technical perspectives. Application of color theory to the built environment. Includes color forecasting, technical processes, color specification, and quality control. Prereq: Graduate standing.

ID 700 RESEARCH APPLICATIONS IN INTERIORS. (1-6)
Independent research for the exploration of a specific problem in interior design. May be repeated to a maximum of six credits. Prereq: Eighteen credit hours of graduate work.

ID 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ID 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ID 772 CURRENT ISSUES IN DESIGN. (3)
Investigation of current topics in interior design. May be repeated to a maximum of six credits.

ID 785 INDEPENDENT STUDY IN INTERIORS. (1-3)
Problems involving independent studio, and/or library study conforming to the student's special interest under the direction of an appropriate faculty member having proficiency in the area selected. May be repeated to a maximum of six credits. Prereq: Nine credit hours of graduate study, consent of instructor, contractual agreement.

IEC Interdisciplinary Early Childhood Education

IEC 120 INTRODUCTION TO EARLY CHILDHOOD EDUCATION. (3)
An introduction to the history of early childhood education and an overview of current laws and best practices. Discussions will include issues impacting families and current research in early childhood education.

IEC 255 CHILD DEVELOPMENT. (3)
An overview of the various aspects of development (physical, social, emotional, intellectual) in the social context for children prenatally through adolescence. Course will emphasize techniques of directed observation. Lecture, three hours, laboratory, one hour per week.

IEC 256 GUIDANCE STRATEGIES FOR WORKING WITH YOUNG CHILDREN. (3)
Examination of effective guidance strategies for use with young children in an early childhood setting; modifications of experiences for age level; ability, group and individual needs. Application and evaluation of guidance skills in laboratory experience. Prereq: PSY 223 (for FAM 254) or FAM 255.

IEC 260 CURRICULUM PLANNING IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (4)
Theories, research and strategies for planning, implementing and evaluating learning experiences for young children (birth - five years). Application in practicum in an early childhood setting. Lecture, two hours; field work, four hours per week. Prereq: IEC 120, FAM 255, and IEC/FAM 256.

IEC 411 STUDENT TEACHING IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (12)
Course designed to give students experience with supervised teaching at the preprimary level. Emphasis will be placed on observation and teaching individual, small and large group methods). One afternoon per week will be devoted to a discussion and analysis of problems in student teaching. Discussion, two hours; laboratory 22 hours per week. To be offered pass-fail only. Prereq: Completion of professional sequence and formal admission to student teaching; admission to the Teacher Education Program or permission of instructor.

IEC 507 ASSESSMENT OF YOUNG CHILDREN. (3)
An introduction and application of assessment and measurement in children from birth to primary. Training in the development and use of commercially available and teacher made assessment devices and techniques suitable for teachers to administer. Includes observations, standardized tests, portfolio development, and transdisciplinary assessment, used by teachers of young children. Prereq: FAM 255, admission to Teacher Education Program or enrollment as required/elective course for IEC graduate students. Co-Requisite: To be taken with IEC 508, 509 and 510.

IEC 508 ADVANCED CURRICULUM PLANNING IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
Study of the child's development of reasoning, concept formation, and perception of reality. Consideration of relevant research and theory and their applications to the education of pre-school children. Examination of the methods and techniques for teaching pre-school children in the areas of math, science, social studies, English, arts and humanities, health education and physical education within various curriculum models. Prereq: Six hours of child development and admission to the Teacher Education or enrollment as required/elective course for IEC graduate students. Coreq: IEC 507, 508 and 510.

IEC 509 INTERVENTION PLANNING FOR CHILDREN WITH SPECIAL NEEDS. (3)
An overview of the field of early childhood special education including discussions of historical and empirical support for providing early intervention services, screening, assessment, instructional programming, integration of children with and without disabilities, family involvement, and service delivery models. Emphasis is placed on assessment and promoting attainment of cognitive, language, social, self-help, and motor skills. Prereq: EDS 375 or EDS 203 and admission to the Teacher Education Program or enrollment as required/elective course for IEC graduate students. Coreq: IEC 507, 508 and 510.

IEC 510 PRACTICUM IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
This course is the field based component of the Early Childhood block (IEC 507, 508 and 509) and is taught concurrently with these courses. This course provides an opportunity for students to demonstrate application of readings and content from the Early Childhood block courses. Prereq: Admission to Teacher Education Program or enrollment as required/elective course for IEC graduate students. Co-requisite: IEC 507, 508, and 509.

IEC 512 LANGUAGE AND LITERACY FOR YOUNG CHILDREN. (3)
An overview of early language and merging literacy skills in young children. Will prepare future early childhood service providers to evaluate and plan developmentally appropriate environments to promote oral and written language and literacy. Prereq: Admission to TEP or enrollment as required/elective course for IEC graduate students.

IEC 522 CHILDREN AND FAMILIES. (3)

The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as EDS 522.)

IEC 523 PRACTICUM IN EARLY CHILDHOOD ADMINISTRATION AND SUPERVISION. (3)

Field training in a community setting related to early childhood administration and supervision. Opportunities for developing competencies in program evaluation, personnel training and supervision, appropriate curriculum materials, parent involvement and education, program management and funding will be provided. Prereq: IEC 552 or consent of instructor.

IEC 546 TRANSDISCIPLINARY SERVICES FOR YOUNG CHILDREN. (3)

This course will focus on the philosophical issues related to teaching young children with multiple disabilities. Topics related to planning for the population of children, participants in the areas of communication, physical and motor development, health, vitality and sensory input will be presented. Strategies presented for planning will include transdisciplinary assessment persons centered planning and activity based instruction. Prereq: EDS 375 or EDS 600.

IEC 552 ADMINISTRATION AND SUPERVISION IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION PROGRAMS. (3)

A course designed for students preparing to become administrators and supervisors in Early Childhood Education Programs. Consideration is given to program evaluation, personnel training and supervision, appropriate curriculum materials, parent involvement and education, program management and funding. Prereq: IEC 260 or consent of instructor.

IEC 557 INFANT DEVELOPMENT. (3)

The development of the young child during the prenatal period, infancy and toddlerhood. Care and guidance of the child during the first two years of life. Lecture, two hours; laboratory, two hours per week. Prereq: Six hours of child development, psychology or equivalent.

IEC 558 SPECIAL TOPICS IN INTERDISCIPLINARY EARLY CHILDHOOD. (1-9)

In-depth study of a current and topical problem or issue in early care and education. May be repeated under a different subtitle for a maximum of nine credits. A title is assigned each time the course is offered and reflects current topics in the field.

IEC 620 ASSESSMENT IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)

Reviews policy and research implications that promote recommended practice in assessment and evaluation. A wide variety of formal and informal assessment instruments and strategies in the education of young children will be presented, used and discussed. Prepares students to provide leadership in the selection, development, and implementation of unbiased assessment and evaluation procedures. Prereq: EDS 375 or EDS 600 and IEC 659 or permission of instructor.

IEC 621 ISSUES IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)

Students will review, discuss and participate in issues related to early childhood education and learning experiences related to the preparation and leadership of early care and education teachers. Discussions will include issues in blended early care and education programs. Local, state, and federal initiatives related to early care and education will be explored. Students will explore socio-cultural, historical, and political forces in early childhood education. Prereq: EDS 375 or EDS 600 and IEC 659 or permission of instructor.

IEC 623 ADVANCED PRACTICUM: INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)

This course is designed to provide students with field experiences to bridge professional preparation and professional practice. During the practicum experiences, students will have opportunities to practice, demonstrate, and reflect upon methods and leadership content taught in the IECE lecture courses. Graduate students working towards IECE initial certification must apply for the Teacher Education Program. May be repeated to a maximum of nine credit hours. Prereq: Admission to Department of Special Education and Rehabilitation Counseling or permission of instructor.

IEC 659 ADVANCED CHILD DEVELOPMENT. (3)

Advanced survey of theoretically and professionally important topics in child development. Particular attention to current theory and research in social, affective, cognitive and language domains; familial/cultural influences; the interdisciplinary nature of the knowledge base; and issues concerning the application of child development knowledge to professional work with children. Prereq: Six hours in social or behavioral sciences, including one course in child or human development, or consent of the instructor.

IEC 701 SEMINAR FOR EDSRC LEADERSHIP PERSONNEL. (1)

Study of issues and topics affecting the preparation of Rehabilitation Counseling, Special Education, and Early Childhood personnel and of research issues involving persons with disabilities and educational and rehabilitation programs. May be repeated to a maximum of six credits. Lecture, two hours per week. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 701.)

IEC 709 SEMINAR IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)

Advanced study of issues related to inclusive programs for all young children and their families including etiology of disabilities, developmentally appropriate practice, assessment, intervention and instruction, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ph.D. in Special Education.

IEC 710 ADVANCED INSTRUCTIONAL METHODS IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)

A study of how to design, implement, and evaluate a curriculum framework in blended early childhood education environments using principles of universal design, tiered instruction, and responsive learning environments. Students will support curriculum design with evidence from empirically validated practices. Prereq: IEC 659 or consent of instructor.

IEC 712 SEMINAR IN EDSRC PROFESSIONAL SERVICES. (3)

Education and Rehabilitation professional services including consultation, technical assistance, continuing education programs, professional organization development, committee and advisory board involvement, professional writing and editing, leadership training, and funding proposal development. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 712.)

IEC 720 SEMINAR IN EDSRC TEACHER PREPARATION. (3)

Rehabilitation Counseling and Special Education college/university professor preparation, including syllabus development, organization of class presentations, instructional alternatives, scheduling, student assessment, professor-student interactions, student advising, resource identification and utilization and program evaluation. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 720.)

IEC 721 PRACTICUM IN EDSRC PERSONNEL PREPARATION. (1-9)

Professional preparation of Rehabilitation Counselors or Special Education Teachers, including practice in delivering lectures, conducting class discussions, leading seminars, directing independent studies, guiding student research projects, demonstrating instructional methods and materials, supervising rehabilitation counselors or special education student teachers, and advising. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 721.)

IEC 767 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 767.)

IEC 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)

May be repeated to a maximum of 12 hours.

INF Informatics

INF 401G INFORMATICS FUNDAMENTALS. (3)

An introduction to the fundamentals of informatics for students in a broad array of disciplines. Fundamentals of computer science, including programming, operating systems, database management, and networking will be covered. Not accepted as credit towards a degree in computer science. Prereq: Junior standing.

INF 520 BIOINFORMATICS. (3)

An introduction to computer analysis of macromolecular structure information. This course describes how to access, process, and interpret structural information regarding biological macromolecules as a guide to experiments in biology. Prereq: BIO 315 or BIO 304 or BCH 401 or BCH 501 or BCH 502 or BIO 510 or consent of instructor. (Same as BIO 520.)

INT International Studies

#INT 200 INTRODUCTION TO INTERNATIONAL STUDIES. (3)

An introduction to the interdisciplinary field of International Studies, including the main thematic emphases and approaches that characterize the field and the International Studies major at the University of Kentucky. Emphasis is placed on the relations between people and places across the globe. Students will be exposed to a variety of theories and methods that help in understanding the challenges that face people and nations in the global milieu. Furthermore, this course explores theoretical foundations for analyzing the ways in which the world's economies, politics, and societies change. The course will explore key global issues through different perspectives, using concepts drawn from the social sciences and the humanities. Case studies will be used selectively to allow students to develop skills in critical analysis of international phenomena and processes, and to strengthen the ability to bring an international perspective to bear on key issues. Prereq: Students are strongly encouraged to take this course in the first semester as an International Studies Major requirement.

INT 350 SPECIAL TOPICS IN INTERNATIONAL STUDIES (Subtitle required). (1-3)

Course will focus on selected topics drawn from various areas of International Studies taught by faculty members with special interests and competence. The course is variable credit and may be repeated up to a maximum of 12 credits under different subtitles.

INT 399 INTERNSHIP IN INTERNATIONAL STUDIES. (1-3)

An individual community-based or field-based experience and/or internship with a corporation or government institution with a global/international focus under the supervision of a faculty member. This course is designed for undergraduates to gain first-hand experience of preprofessional positions such as internships, cooperative education, or business related experience in an area of international expertise. INT 399 may count toward either the Thematic Concentration or World Area of IS major, but not both. May count for IS minor. To take the course, the student must have approval of the program director, negotiate a learning contract with an academic supervisor, and provide the program with a report on the internship. Pass-fail only. May be repeated for a maximum of 9 credits. Prereq: Approval by the International Studies Director.

INT 495 CAPSTONE SEMINAR FOR INTERNATIONAL STUDIES MAJORS (Subtitle required). (3)

In this capstone seminar students have to write a 20-25 page research paper. Each seminar has a subtitle of a broad theme to allow students working in different world areas and thematic concentrations to work on their projects. The class works both as a seminar where students learn different theoretical and methodological approaches to a broad topic and as a space where they learn to write their own research paper. Students will be required to present their paper in a power point presentation or another type of creative project. Prereq: Senior status. This course is a Graduation Composition and Communication Requirement (GCCRR) course in certain programs, and hence is not likely to be eligible for automatic transfer credit to UK.

IPS Integrated Plant and Soil Sciences

IPS 610 TRANS-DISCIPLINARY COMMUNICATION IN INTEGRATED PLANT AND SOIL SCIENCES. (1)

A one-credit companion course to IPS 625 specific for graduate students in the Integrated Plant and Soil Sciences program. This course exposes IPSS students to critical skills in publication, grantsmanship, and public presentation. It requires IPSS students to systematically evaluate research presentations from multiple disciplines, present a synthesis of the research topic addressed in IPS 625, and interact with other members of the college and the university on topics related to plant and soil science issues. The course may be repeated twice. Prereq: Graduate student status.

IPS 625 TRANS-DISCIPLINARY RESEARCH IN INTEGRATED PLANT AND SOIL SCIENCES. (2)

A two-credit course specific to students in the Integrated Plant and Soil Sciences Program. This course is designed to explore the foundations, principles, and philosophies of scientific research in a truly integrative manner with strong emphasis on the value of multidisciplinary approaches to a significant issue in plant and soil sciences. The course may be repeated twice. Prereq: Graduate student standing.

#IPS 790 SUPERVISED RESEARCH AND STUDY IN INTEGRATED PLANT AND SOIL SCIENCES. (1-9)

PhD level research and independent study in Integrated Plant and Soil Sciences. May be repeated to a total of 18 credit hours. Work may be conducted in any of the disciplinary areas in IPSS subject to the approval of the PhD committee chair and Program Graduate Committee. Prereq: PhD standing.

IS Information Studies

IS 200 INFORMATION LITERACY AND CRITICAL THINKING. (3)

This course provides an introduction to the concepts and practices of information literacy. It explores how to effectively and ethically find, evaluate, analyze, and use information resources in academic and everyday-life situations. Emphasizing critical inquiry and critical thinking, this course will explore the theories and definitions surrounding the term "information literacy." Students will put this theory into practice by developing problem-solving skills that allow them to meet information needs throughout their lifetimes. Students will gain a better understanding of how information and knowledge function in society and will discover methods of finding, accessing, evaluating, and using different information sources in an effective and ethical manner. (Same as ICT 200.)

IS 201 PERSONAL KNOWLEDGE MANAGEMENT. (3)

Gain knowledge about information sources, information retrieval and professional information management. Learn how information sources are described, organized, and disseminated using metadata standards and publishing practices. Acquire the skills to locate and retrieve quality sources of information with search engines and databases. Implement knowledge management technologies and apply an understanding of social factors in order to create efficient and usable organizational work flows. (Same as ICT 201.)

IS 202 TECHNOLOGIES FOR INFORMATION SERVICES. (3)

This course is designed to teach the fundamental concepts of information technology in ways relevant to professional practice in informatics and the information professions. It explores applications of computers and networks to information problems. Included are features of hardware, types of software, commercial systems and search engines. (Same as ICT 202.)

IS 303 SYSTEMS ANALYSIS. (3)

This course examines and applies the principles of information systems analysis. It surveys project management, feasibility and analysis, systems requirement definition and resource allocation. It utilizes a structured systems development methodology that spans the entirety of the information system lifecycle, which starts with the conception of the need for a specific information system and ends with the implementation of that system. The course utilizes a case study approach in which students initiate the analysis and logical design of a limited-scope information system. Prereq: IS 202. (Same as ICT 303.)

IS 326 ELECTRONIC INFORMATION RESOURCES FOR HEALTH PROFESSIONALS. (3)

This course is a survey of electronic information resources for health professionals, including databases and Web resources, but with a focus on MEDLINE. Discussion of relevant controlled vocabularies, their use in formulating and executing search strategies, and alternative interfaces to MEDLINE are addressed. The course also includes reference management software, an evidence based health care component, and discussion of systematic reviews. Prereq: STA 210 or equivalent. (Same as ICT 326.)

IS 327 CONSUMER HEALTH INFORMATION SEEKING. (3)

This course will provide students with a foundation in the history and development of consumer health information seeking in addition to practical experience in locating, evaluating, and providing health information to diverse and special populations within educational and healthcare settings. Students will gain an understanding of the lifecycle of consumer health information – from policy development, to creation, to dissemination, and use – and the role of healthcare professionals in providing that information. Current issues and trends, as well as future directions in consumer health information provision and health information seeking will be discussed. (Same as ICT 327.)

IS 402 COMPETITIVE INTELLIGENCE. (3)

This course examines competitive intelligence models, functions, and practices; the roles of information professionals in CI, and the management of CI. Discussion and practice topics include: intelligence ethical and legal considerations; identifying intelligence needs; intelligence project management, research methods, analysis, production, and dissemination; the uses of intelligence; intelligence sources and tools; managing the intelligence function; and the evolution of CI.

IS 404 HEALTH INFORMATICS. (3)

Provides an overview of health care information systems, legal and ethical issues in health care, compliance and regulatory requirements, coding of health care data, quality management, HL7, data security, and HIPAA. Explores major applications and commercial vendors, decision support methods, evaluation of health-care information systems; and new opportunities and emerging trends. Prereq: IS 201, IS 202.

ISC Integrated Strategic Communication

ISC 161 INTRODUCTION TO INTEGRATED STRATEGIC COMMUNICATION. (3)

An introductory course in all phases of integrated strategic communication and its role in contemporary business and society. Includes an historical and socio cultural overview of advertising, public relations, sales promotion and direct response marketing as well as an exploration of their interrelationships. Covers strategic planning for integrated communication, message approaches and their foundations in theories of persuasion and information processing, and characteristics of message delivery systems. Provides a discussion of ethics and regulation, and the economic and social impact of the industries. Prereq: ISC pre-majors only or consent of instructor.

ISC 261 STRATEGIC PLANNING AND WRITING. (3)

Introduces students to the systematic planning processes and techniques of creative and persuasive message preparation for integrated strategic communication. Extensive practice in writing and visual communication for print and electronic vehicles in the disciplines of advertising, public relations, sales promotion and direct marketing. Lecture, two hours; laboratory, two hours per week. Prereq: ISC pre-major status; ISC 161; keyboarding 30 wpm.

ISC 311 ETHICAL, LEGAL AND SOCIAL ISSUES IN ISC. (3)

Course will focus upon the legal, ethical and social issues faced by ISC professionals. The course will examine government regulation of direct response communications, advertising, and public relations practices as well as the industry's ethical standards and self regulation efforts. Emphasis will also be placed upon gaining an understanding of ISC's role in society's economic, social, and cultural systems. Topics will include potential societal consequences of persuasive communication practices and the ethical responsibilities of professionals in each of the ISC disciplines. Prereq: Major standing.

ISC 319 WORLD MEDIA SYSTEMS. (3)

A comparison of the communications media in different countries of the world and the theories used to justify them. How various political and social systems affect the media and how the media affect the societies in which they exist. Prereq: JOU 101 or ISC 161 or MAS 101 or TEL 101. (Same as JOU/MAS 319.)

ISC 321 RESEARCH METHODS FOR THE INTEGRATED STRATEGIC COMMUNICATION PROFESSIONAL. (3)

Introduces students to applied research as a decision making tool for the integrated communications professional. Students acquire basic skills in: identification of information needs, stating of research objectives, selection of appropriate research technique (s), sample selection, questionnaire design, analysis procedures, report writing, and budget management. Topics prepare students to conduct small-scale survey research and to buy and evaluate studies from custom and/or syndicated research suppliers. Legal and ethical issues are also examined. Prereq: Major standing; one course in statistics.

ISC 331 ADVERTISING CREATIVE STRATEGY AND EXECUTION I. (3)

Ideas and their translation into words and images which inform and persuade. Emphasis is on a disciplined, strategic approach to creative decision-making across all media. Topics include setting objectives, selection of appeal, copy structure demands of different media, design principles, layout and storyboarding, and regulations affecting messages. Lecture, two hours; laboratory, two hours per week. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321.

ISC 341 STRATEGIC PUBLIC RELATIONS. (3)

A course introducing students to the basic concepts of public relations, including its theory and practices, professional history, function in organizations, and role in society. This course meets the needs of those planning or currently involved in professional and managerial careers which require an understanding of public relations. Prereq: For ISC majors, concurrent or previous enrollment in ISC 311 and ISC 321; for all others, admission to upper-division in the College of Communications and Information Studies.

ISC 351 INTEGRATED STRATEGIC COMMUNICATION ACCOUNT MANAGEMENT. (3)

Development and management of ISC programs that coordinate advertising, public relations, direct/interactive marketing, and sales promotion tactics. Topics include structure of the strategic communication management function, planning, strategy, leadership, operations, evaluating the effectiveness of communications, company-agency relationships, and career development. Practical knowledge and fundamental management concepts are integrated to enhance understanding of communication management's role and challenges in the business environment. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321. Cannot be taken concurrently with ISC 451.

ISC 361 DIRECT RESPONSE TARGETING: MEDIA AND DATABASE MANAGEMENT. (3)
